SEC. 3. Not to exceed one-half of 1 per centum of the funds appropriated pursuant to subsection 1(a) hereof may be transferred to the "Construction of facilities" appropriation, and, when so transferred, together with $10,000,000 of the funds appropriated pursuant to subsection 1(b) hereof (other than funds appropriated pursuant to paragraph (14) of such subsection) shall be available for expenditure to construct, expand, or modify laboratories and other installations at any location (including locations specified in subsection 1(b)), if (1) the Administrator determines such action to be necessary because of changes in the national program of aeronautical and space activities or new scientific or engineering developments, and (2) he determines that deferral of such action until the enactment of the next authorization Act would be inconsistent with the interest of the Nation in aeronautical and space activities. The funds so made available may be expended to acquire, construct, convert, rehabilitate, or install permanent or temporary public works, including land acquisition, site preparation, appurtenances, utilities, and equipment. No portion of such sums may be obligated for expenditure or expended to construct, expand, or modify laboratories and other installations unless (A) a period of thirty days has passed after the Administrator or his designee has transmitted to the Speaker of the House of Representatives and to the President of the Senate and to the Committee on Science and Technology of the House of Representatives and to the Committee on Commerce, Science, and Transportation of the Senate a written report containing a full and complete statement concerning (1) the nature of such construction, expansion, or modification, (2) the cost thereof including the cost of any real estate action pertaining thereto, and (3) the reason why such construction, expansion, or modification is necessary in the national interest, or (B) each such committee before the expiration of such period has transmitted to the Administrator written notice to the effect that such committee has no objection to the proposed action.

SEC. 4. Notwithstanding any other provision of this Act—

(1) no amount appropriated pursuant to this Act may be used for any program deleted by the Congress from requests as originally made to either the House Committee on Science and Technology or the Senate Committee on Commerce, Science, and Transportation,

(2) no amount appropriated pursuant to this Act may be used for any program in excess of the amount actually authorized for that particular program by sections 1(a) and 1(c), and

(3) no amount appropriated pursuant to this Act may be used for any program which has not been presented to or requested of either such committee,

unless (A) a period of thirty days has passed after the receipt by the Speaker of the House of Representatives and the President of the Senate and each such committee of notice given by the Administrator or his designee containing a full and complete statement of the action proposed to be taken and the facts and circumstances relied upon in support of such proposed action, or (B) each such committee before the expiration of such period has transmitted to the Administrator written notice to the effect that such committee has no objection to the proposed action.

SEC. 5. It is the sense of the Congress that it is in the national interest that consideration be given to geographical distribution of Federal research funds whenever feasible, and that the National Aeronautics and Space Administration should explore ways and means of distributing its research and development funds whenever feasible.

SEC. 6. Section 203 of the National Aeronautics and Space Act of 1958 is amended—

(1) by inserting "(1)" after "(b)" in the subsection which was added by section 15(c) of Public Law 94-413; and

(2) by redesignating the subsection which was added by section 4 of Public Law 93-409 (and redesignated by section 15(c) of Public Law 94-413) as paragraph (2) of subsection (b).

SEC. 7. (a) Section 102 of the National Aeronautics and Space Act of 1958 (42 U.S.C. 2451) is amended (1) by redesignating subsection (f) as subsection (g) thereof; and (2) by inserting immediately after subsection (e) thereof the following new subsection.

"(f) The Congress declares that the general welfare of the United States requires that the unique competence of the National Aeronautics and Space Administration in science and engineering systems and in the administration of complex interdisciplinary research and development programs be directed toward bioengineering research, development, and demonstration programs. Such programs shall be conducted to alleviate and minimize the effects of disability.".

(b) The subsection of section 102 of such Act redesignated a subsection (g) by subsection (a) of this section is amended by striking out "and (e)" and inserting in lieu thereof "(e), and (f)".

(c) Section 203(b) of such Act is amended by inserting after paragraph (2), as redesignated by section 6 of this Act, the following new paragraph:

"(3) The Administration shall initiate, support, and carry out research, development, demonstrations, and other related activities, to the extent funds are appropriated therefore, in bioengineering (including but not limited to materials, human factors engineering, electronics and automated systems) to assist handicapped individuals and lessen or alleviate the problems caused by disability. To the extent appropriate, these bioengineering research, development, and demonstration programs shall be conducted in coordination and cooperation with other related Federal agency programs.".

SEC. 8. This Act may be cited as the "National Aeronautics and Space Administration Authorization Act, 1979".

Mr. TEAGUE (during the reading). Mr. Chairman, I ask unanimous consent that further reading of the bill be dispensed with and that the bill be printed

in the RECORD and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Texas?

There was no objection.

AMENDMENT OFFERED BY MR. WEISS

Mr. WEISS. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. WEISS: Page 10, after line 2, insert the following new section (and redesignate the succeeding sections accordingly):

SEC. 5. No part of any funds available to the Administrator pursuant to this Act may be used for any research or development activity relating to civilian Advanced Supersonic Transports, or for the preparation of an overall program plan or any other study, analysis, or planning relating to technology for such transports.

Mr. WEISS. Mr. Chairman, in the course of the general debate on this matter there were some indications that all we are engaged in is pure scientific research effort and that any suggestion on my part that, in fact, we are working toward the development of an actual airplane somewhere in the future arises from some misunderstanding, perhaps, on my part. Mr. Chairman, that is possible, but I must tell you that if I misunderstand the situation then the bible of the aviation industry, Aviation Week and Space Technology, also misunderstands the situation because in their issue of April 17, 1978, they have, as one of their lead stories a picture of a supersonic airplane and it has the caption under it that says:

NASA Considers Fiscal 1983 New Start for Supersonic Technology Demonstrator.

It goes on to say:

Supersonic technology demonstrator under consideration by NASA for a possible fiscal 1983 new start would be an arrow wing design in the 75,000 pound class.

This is not a figment of their imagination or of my imagination. They got their information from the same place I got mine, the report that was submitted by NASA to the committee in which it stated program options for achieving an advanced supersonic transport technological readiness—not research and development readiness. Not an indication as to the elimination of environmental hazards that may be met, but technology readiness, a plane to go into the air to fly. That is what this is all about.

They point out in this report that they can do it by 1983 probably and that the cost would be somewhere between $900 million and $1.7 billion. So here we are talking today about a $27.9 million authorization but we all had better be looking down the road 5 years from now when we are talking about almost $2 billion of expenditures for a project, which, I need not remind anyone again, but I will—which in 1971 was scrapped by the Congress after an expenditure of over a billion dollars in taxpayers' funds. Congress can make that decision, but in making it we ought to be fair to the American taxpaper and the American public at large. What we ought to be saying is, "OK, everybody, we think that we are ready now to explore this before we make a full commitment. We want to be ready, technologically ready by 1983 but we want everyone to know in advance what our plans are." Let us have full scale hearings, not the kind of effort we have had so far because NASA indicates that they expect to start on the project very soon.

Mr. FUQUA. Mr. Chairman, will the gentleman yield?

Mr. WEISS. I yield to the gentleman from Florida.

Mr. FUQUA. Mr. Chairman, I thank the gentleman for yielding.

Mr. Chairman, let me say to the gentleman from New York (Mr. WEISS) that I have been working on this committee for some 16 years and no new starts can be made by NASA without the full congressional authority. It has to have the approval first of the Office of Management and Budget, and their report comes down to the Congress. Let me further say that there is nothing in this bill or in this report that the Congress of the United States has given NASA authority to go ahead with the supersonic transport program. They are doing only research. If they want to come in in 1983, or whatever year, then there must be a request on the part of NASA and OMB that will be presented to the Congress for our action. At that time I can assure the gentleman that then there will be ample opportunity for hearings and debate on this floor as to whether we should proceed or not proceed.

I have no idea, I do not know, my crystal ball does not reveal that day to me, but I might point out to the gentleman that there is not in any way any intention by the committee to put this "snoot" under the tent to open up the SST production. It is specifically prohibited in the report and it appears nowhere in the bill. There is no way NASA can proceed with any type of development of an SST.

We are doing research in all types of aircraft, as has been pointed out, so I would hope that the gentleman's amendment would not prevail.

The CHAIRMAN. The time of the gentleman has expired.

(By unanimous consent, Mr. WEISS was allowed to proceed for 2 additional minutes.)

Mr. WEISS. I appreciate the comment and the statement my good friend has made, and I have no reason to question his integrity or commitment to the statements that he makes. The problem, of course, is that we are always faced with a double-edged sword. We have gone down the path now for some 7 years, and if this measure is authorized today and the money is subsequently appropriated, we will have spent $100 million on this research and development aspect. This year's authorization is almost twice as much as last year's authorization. Next year's authorization will probably be twice or more times this year's authorization. By the time we get to where the gentleman says, now let us let the American public in, we may, in fact, have committed $1 billion to the project. Then the question again will be at that stage: How can we waste $1 billion?

It seems to me, Mr. Chairman, that the time to be concerned about the program, the feasibility or desirability of going forth, is before that money is spent, not after it is spent. That is why I urge that the amendment be adopted. Let us have full, open hearings and national debate on this thing now before the money is spent.

Mr. Chairman, I yield back the remainder of my time.

Mr. TEAGUE. Mr. Chairman, the subject of this amendment has been debated for the last hour. I ask unanimous consent that all debate on this amendment and all amendments thereto close in 5 minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Texas?

There was no objection.

The CHAIRMAN. Members standing at the time the unanimous consent request was agreed to will be recognized for 1¼ minutes each.

The Chair recognizes the gentleman from New York (Mr. WYDLER).

Mr. WYDLER. Mr. Chairman, I do not think there is any Member on this floor who is more adversely affected by the current Concorde SST landing in the United States than myself. I opposed that landing; I fought it at every twist and every turn; and I continue to oppose it. But I think this kind of amendment is just mischievous. I think it is terribly destructive of our Nation's future. I think it is a very bad amendment, because this amendment would cut off the very research, the very studies that could improve the problems and do away with the problems that we are presently suffering from. So although last year, Mr. Chairman, I put in a substitute amendment which simply said that the funds could not be used for the construction of a prototype supersonic transport, I do not think that is necessary this year. That point has been made. The money that we are spending is money for research, money to keep the United States of America in the lead in aircraft and aeronautics. It is absolutely essential not only to the economic future of our Nation, but to give the people who are now suffering from this noise the relief they need. Do not cut that off. Reject the amendment.

The CHAIRMAN. The time of the gentleman has expired.

The Chair recognizes the gentleman from California (Mr. GOLDWATER).

Mr. GOLDWATER. Mr. Chairman, I rise in opposition to the amendment offered by the gentleman from New York.

This House on untold occasions has acted as a forum for supersonic debate. While we talk, our foreign competitors act. Supersonic flight is here to stay. We either keep our ace in the hole with a limited research program or we abandon the field to the British, French, and Russians.

Pride is at stake, of course. But, more importantly, we are looking at the matter of economics. Aviation contributes favorably to the plus side of our balance of payments. Yet, we are witnessing a chink in the armor. Our foreign competitors are penetrating the American market. The French A-300 airbus is a case in point.

It would be tragic if we totally abandoned the field of supersonic development when we have the expertise to develop at some time in the future a supersonic aircraft that is environmentally acceptable and economically viable.

Actually, our work on supersonic research in NASA has been extremely modest, while at the same time producing some impressive results. But, we are at the crossroads, and American industry and its competition abroad is waiting to see what we do.

For instance, in the area of variable-cycle engine technology, NASA has identified concepts that will effectively lower fuel consumption and noise for supersonic aircraft.

And, in the supersonic cruise aircraft research (SCAR) program, NASA is doing basic work that will lead to technologies far superior to what is being done by our competitors. The Congress is not being asked this year, nor for several years, to decide on an SST development program. Rather, what we are asking is that the U.S. technology base in aeronautics remains second to none; that we preserve our options to compete in world aeronautical markets.

Apart from the long-range potential for civil applications, the VCE is needed immediately as a propulsion system for innovative military designs. One which comes to mind is the Navy's VSTOL-B program, which is the deployment of high performance supersonic aircraft to small ships having only helicopter platforms.

Congress should support NASA's coordination of technology for civil/military applications to insure the maximum value to the taxpayers and continued aeronautical leadership.

Mr. Chairman, I believe the gentleman from New York is raising a false issue. There is nowhere in this bill, nor was it the intention of the members of the committee, to have our Government build a supersonic transport. What we are trying to do is address ourselves to basic aeronautic research and development so that we can advance the state of the art so we can maintain our keen competitive advantage in the international world of competition.

One of the plus factors in our international balance of trade has been our superiority in high technology as applies to aeronautics. Here again we can only do this by maintaining a well balanced, positive, progressive research and development program in all areas of flight, including supersonic and hypersonic, not to mention the contribution that this kind of effort will make toward our military capability for future military aircraft on into the future. In addition to this, if we in the Congress and the people of this country are to make decisions about the future of flight as it pertains to the SST, we have got to base those decisions on knowledge arrived at from research and development. I would hope that we would vote down this amendment.

The CHAIRMAN. The Chair recognizes the gentleman from Texas (Mr. MILFORD).

Mr. MILFORD. Mr. Chairman, I would strongly urge all Members to reject this amendment. The most damaging part about the amendment is the wording which would stop the study of this realm. In effect this would stop us from learning more about supersonic flight. NASA would be prohibited from conducting any research in aeronautics other than subsonic-type research. At the same time, our foreign competitors could go full bore ahead with unrestricted aeronautical research. This would place in jeopardy 2 million jobs in the United States and also place in jeopardy our second place export item, that being the sale of aeronautical products. Therefore, I would strongly urge all Members to reject this amendment.

The gentleman from New York has raised what may appear to be some fundamental questions. I say "appear" because in posing them he has relied on information that is clearly at variance with the facts. Let me set the record straight!

First, the question of adequate congressional oversight of NASA's advanced supersonic research program. I believe I can deal with this one quickly.

The gentleman is, of course, well aware that Congress treats complex subjects by first assigning them to committees which have expertise in that particular area. In the case of civil aeronautical R. & D., it is my Subcommittee on Transportation, Aviation and Weather that has the jurisdiction. And I can assure the gentleman that we have exercised that jurisdiction aggressively each year (and recently twice a year) to carefully review all of NASA's aeronautical program. We have looked at each of the many subprograms within that budget line item, including the very modest amount being devoted to research on the problems of supersonic flight. In fact, the time we have spent on that subject has been all out of proportion to the dollar amounts involved. But we have done it because of its unique importance to the country.

The point is, that far from the implied coverup there is an extraordinary volume of material that traces congressional involvement in oversight of this important subject.

Last year, in a letter to the gentleman from New York, Dr. Fletcher, who was then the NASA Administrator, enumerated in detail all of the occasions, since 1972 on which his Agency gave testimony to the authorizing committees of Congress on this subject. That list showed 18 such occasions. In addition, the House and Senate Appropriations Committees have considered the program each year since 1972.

The second issue the gentleman raises is a very basic one. It concerns whether it is proper for the Government to be involved in advanced research and development.

Now this is a question that can be raised in a variety of fields from transportation to energy and yes, even to social problems.

The answer, to my mind, ultimately comes down to questions of national interest, budget priorities and the ability of industry to do the work.

In aeronautics there is a long history of government-sponsored research which has been adopted by private industry and applied to a variety of useful products that have benefited us all. NASA and its predecessor agency have been working on advanced civil and military aeronautical concepts since 1915. One need only look up to see the fruits of this investment. And it truly has been an investment. I cannot think of a single other field where small government expenditures in research have been transformed so effectively into such impressive returns to our economy and our way of life.

For example, government-sponsored research led directly to the new quieter and less polluting engines that now power the jumbo jets. The bill being presented today is aimed at further gains in this area. The NASA supersonic research program is aimed at solving the undesirable side effects of supersonic flight.

We are all concerned about environmental damage and about economics. We know that we must do considerably better than the Concorde. And, I believe we can.

Ever since the 1971 decision to terminate the American SST program, thereby abandoning the field to the British, French, and Russians; NASA has conducted a low level research program.

This program, although restricted mostly to paper studies, has yielded impressive results. For example, we now believe that it is possible to build a fuel efficient, environmentally acceptable advanced supersonic transport. This aircraft would bear no resemblance to the Concorde or any other airplane now flying. It would be as different from the Concorde as today's wide-bodied jets are from the first jet powered transport, the British Comet. But before any American company can assume the enormous cost of building such an aircraft, the theories must be proven in the laboratory. And this has traditionally been a NASA role. Government must take the first step.

Finally, let me make one other point. It is important to stress that in everything I have been saying, I have been talking only about research. Nowhere have I said anything about a prototype airplane or any other flyable hardware. In fact, the committee specifically prohibited NASA from constructing such a prototype.

But we must make a greater research effort than we have in the last 7 years. We must move from the concept formulation stage to the concept validation stage. The time for this is now. We are at a crossroads. We must either keep our options open by moving to the next logi-

cal step in the research program or we must decide now that we do not want an advanced supersonic transport for the foreseeable future. Either we expand this program or we let our highly skilled industry teams evaporate. This is the question before us.

Since the advanced supersonic transport is the only invention with a real potential for increased productivity in the air transportation field, I think it is a very important question. One that will surely affect our future. I urge my colleagues to consider it carefully and defeat this amendment.

The CHAIRMAN. The Chair recognizes the gentleman from Texas (Mr. TEAGUE).

Mr. TEAGUE. Mr. Chairman, there is nothing I could add to what has been said.

Mr. Chairman, I yield back the balance of my time.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New York (Mr. WEISS).

The question was taken; and the Chairman announced that the noes appeared to have it.

Mr. WEISS. Mr. Chairman, I demand a recorded vote, and pending that, I make the point of order that a quorum is not present.

The CHAIRMAN. Evidently a quorum is not present.

The Chair announces that pursuant to clause 2, rule XXIII, he will vacate proceedings under the call when a quorum of the Committee of the Whole appears.

Members will record their presence by electronic device.

The call was taken by electronic device.

QUORUM CALL VACATED

The CHAIRMAN pro tempore (Mr. WIRTH). One hundred Members have appeared. A quorum of the Committee of the Whole is present. Pursuant to clause 2, rule XXIII, further proceedings under the call shall be considered as vacated.

The Committee will resume its business.

The pending business is the demand of the gentleman from New York (Mr. WEISS) for a recorded vote.

A recorded vote was refused.

So the amendment was rejected.

AMENDMENT OFFERED BY MR. GARY A. MYERS

Mr. GARY A. MYERS. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. GARY A. MYERS: On page 11 after line 23 add the following new section and renumber the old section 8:

"SEC. 8. The administrator of the National Aeronautics and Space Administration will report to the House Committee on Science and Technology and the Senate Committee on Commerce, Science and Transportation no later than December 31, 1978 on the Administration policy regarding, conflicts of interest, standards of conduct and financial disclosure and the implementation of that policy."

Mr. TEAGUE. Mr. Chairman, will the gentleman yield?

Mr. GARY A. MYERS. I yield to the gentleman from Texas.

Mr. TEAGUE. Mr. Chairman, NASA says this is a good amendment. So far as this side of the aisle is concerned, we will accept the amendment.

Mr. WINN. Mr. Chariman, will the gentleman yield?

Mr. GARY A. MYERS. I yield to the gentleman from Kansas.

Mr. WINN. Mr. Chairman, we on this side of the aisle accept the amendment offered by the gentleman from Pennsylvania (Mr. GARY A. MYERS), a Member of the committee.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Pennsylvania (Mr. GARY A. MYERS).

The amendment was agreed to.

The CHAIRMAN. Are there further amendments? If not, under the rule, the Committee rises.

Accordingly, the Committee rose; and the Speaker pro tempore (Mr. BOLLING) having assumed the chair, Mr. MCKAY, Chairman of the Committee of the Whole House on the State of the Union, reported that the Committee, having had under consideration the bill (H.R. 11401) to authorize appropriations to the National Aeronautics and Space Administration for research and development, construction of facilities, and research and program management, and for other purposes, pursuant to House Resolution 1143, he reported the bill back to the House with an amendment adopted by the Committee of the Whole.

The SPEAKER pro tempore. Under the rule, the previous question is ordered.

The question is on the amendment.

The amendment was agreed to.

The SPEAKER pro tempore. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

The SPEAKER pro tempore. The question is on the passage of the bill.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. WEISS. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present. The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 345, nays 54, not voting 35, as follows:

[Roll No. 248]

Conyers	Moss	Tucker
Derwinski	Nix	Udall
Florio	O'Brien	Waxman
Frey	Risenhoover	Whitley
Gammage	Roberts	Young, Tex.
Howard	Rodino	

The Clerk announced the following pairs:

On this vote:

Mr. Rodino for, with Mr. Conyers against.

Until further notice:

Mr. Roberts with Mr. Ammerman.
Mr. Risenhoover with Mr. Krueger.
Mr. Whitley with Mr. Mann.
Mr. Jones of North Carolina with Mr. Andrews of North Carolina.
Mr. Waxman with Mr. Kazen.
Mr. Udall with Mr. Russo.
Mr. Nix with Mr. AuCoin.
Mrs. Burke of California with Mr. O'Brien.
Mr. Florio with Mr. Skubitz.
Mr. Howard with Mr. Tucker.
Mr. Meeds with Mr. Moss.
Mr. Mollohan with Mr. Frey.
Mr. Thornton with Mr. Roncalio.
Mr. Derwinski with Mr. Runnels.
Mr. Cochran of Mississippi with Mr. Ruppe.

Messrs. KREBS, LATTA, and RAHALL changed their vote from "yea" to "nay."

Mr. MARTIN changed his vote from "nay" to "yea."

So the bill was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

REPORT ON RESOLUTION PROVIDING FOR CONSIDERATION OF H.R. 9400 TO AUTHORIZE ACTIONS FOR REDRESS IN CASES INVOLVING DEPRIVATIONS OF RIGHTS OF INSTITUTIONALIZED PERSONS SECURED OR PROTECTED BY THE CONSTITUTION OR LAWS OF THE UNITED STATES

Mr. PEPPER, from the Committee on Rules, submitted a privileged report (Rept. No. 95–1085), on the resolution (H. Res. 1150) providing for consideration of H.R. 9400, to authorize actions for redress in cases involving deprivations of rights of institutionalized persons secured or protected by the Constitution or laws of the United States, which was referred to the House Calendar and ordered to be printed.

REPORT ON RESOLUTION PROVIDING FOR CONSIDERATION OF H.R. 2222, TO AMEND THE NATIONAL LABOR RELATIONS ACT TO CLARIFY THE SCOPE OF ITS COVERAGE

Mr. PEPPER, from the Committee on Rules, submitted a privileged report (Rept. No. 95–1084), on the resolution (H. Res. 1149) providing for consideration of H.R. 2222, to amend the National Labor Relations Act to clarify the scope of its coverage, which was referred to the House Calendar and ordered to be printed.

PEACE CORPS ACT AMENDMENTS OF 1978

Mr. PEPPER. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 1145 and ask for its immedate consideration.

The Clerk read the resolution, as follows:

H. RES. 1145

Resolved, That upon the adoption of this resolution it shall be in order to move, section 402(a) of the Congressional Budget Act of 1974 (Public Law 93–344) to the contrary notwithstanding, that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 11877) to authorize supplemental appropriations for fiscal year 1978, and to authorize appropriations for fiscal year 1979, for the Peace Corps, and to make certain changes in the Peace Corps Act. After general debate, which shall be confined to the bill and shall continue not to exceed one hour, to be equally divided and controlled by the chairman and ranking minority member of the Committee on International Relations, the bill shall be read for amendment under the five-minute rule. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and the previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit.

The SPEAKER pro tempore. The gentleman from Florida (Mr. PEPPER) is recognized for 1 hour.

Mr. PEPPER. Mr. Speaker, I yield 30 minutes to the able gentleman from California (Mr. DEL CLAWSON) pending which I yield myself such time as I may consume.

Mr. Speaker, House Resolution 1145 provides for the consideration of H.R. 11877, the Peace Corps Act Amendments of 1978. This rule provides for the usual open rule with 1 hour of general debate, the time to be equally divided and controlled in the customary manner by the majority and the minority. The rule provides for one waiver of a point of order in regard to the Budget Act with the understanding that the Committee on International Relations will offer an amendment to correct what would justify the point of order in the consideration of the matter on the floor.

Mr. Speaker, H.R. 11877 authorizes $96,135,000 for fiscal year 1979, including $1.3 million for the U.S. contribution to the United Nations Volunteer Program and approximately $1.1 million for increases in salary, retirement, and other employee benefits which are authorized by law.

This bill would also amend the Peace Corps Act to make its declaration of purpose in line with the policy directions of the Foreign Assistance Act enacted by the Congress in 1973 which emphasizes helping those persons in the poorest regions of the world. Other changes in the act include directing the Peace Corps to increase efforts in programs aimed at integrating women into the economies of host countries, updating the readjustment allowances for volunteers, providing for volunteers the same medical malpractice protection that is accorded the Department of State, and lifting the limitation on the number of volunteers the President may assign to international organizations, while also giving the Chief Executive explicit authority to assign volunteers to help in refugee assistance programs, with the consent, of course, of the host government.

There are a number of other changes made by this legislation. They will be discussed by the Committee on International Relations subsequent to the consideration of the rule.

Mr. Speaker, we all know what the Peace Corps has done and what it means. I hope this rule will be adopted so that this House may again do this great service for mankind in the extension of the Peace Corps.

I yield to my friend the gentleman from California (Mr. DEL CLAWSON).

Mr. DEL CLAWSON. Mr. Chairman, I yield myself such time as I may require.

Mr. Speaker, House Resolution 1145 provides for the consideration of H.R. 11877 which authorizes appropriations for fiscal year 1979 for the Peace Corps and a supplemental appropriation for fiscal year 1978. The rule allows 1 hour of general debate to be equally divided and controlled by the chairman and ranking minority member of the Committee on International Relations. The bill will then be open to amendment under the 5-minute rule. Upon completion of consideration, one motion to recommit will be in order.

The resolution contains a waiver of the provisions of section 402(a) of the Congressional Budget Act of 1974. A waiver is made necessary by the bill's authorization of new budget authority for fiscal year 1978. This is in violation of the May 15 deadline as set forth in the Budget Act. We understand, however, that the committee will offer a floor amendment which will correct the violation by removing the provisions for the 1978 supplemental appropriation authorizations. The chairman of the Budget Committee has advised us that he has no objection to the Budget Act waiver, as the committee amendment would render it technical in nature.

It is rather interesting that the legislation originally authorized more than $3.5 million "necessary" funds to supplement the 1978 budget. When the extra authorization ran into obstacles, the "need" suddenly disappeared and an amendment will be offered to strike it.

Mr. Speaker, to my knowledge the resolution has no organized opposition.

Mr. Speaker, I have no further requests for time.

Mr. PEPPER. Mr. Speaker, I have no further requests for time, and I move the previous question on the resolution.

The previous question was ordered.

The resolution was agreed to.

A motion to reconsider was laid on the table.

Mr. HARRINGTON. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 11877) to authorize supplemental appropriations for fiscal year 1978, and to authorize appropriations for fiscal year 1979, for the Peace Corps, and to make certain changes in the Peace Corps Act.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Massachusetts (Mr. HARRINGTON).

The motion was agreed to.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill H.R. 11877, with Mrs. BOGGS designated as Chairman, and Mr. KOSTMAYER (Chairman pro tempore) in the chair.

The Clerk read the title of the bill.

By unanimous consent, the first reading of the bill was dispensed with.

The CHAIRMAN pro tempore. Under the rule, the gentleman from Massachusetts (Mr. HARRINGTON) will be recognized for 30 minutes, and the gentleman from Kansas (Mr. WINN) will be recognized for 30 minutes.

The Chair recognizes the gentleman from Massachusetts (Mr. HARRINGTON).

Mr. HARRINGTON. Mr. Chairman, I yield myself such time as I may consume.

I rise in support of the bill H.R. 11877, the Peace Corps Act Amendments of 1978.

The principal purpose of this bill is to authorize a fiscal year 1979 appropriation of $96,135,000 for Peace Corps programs and activities and such sums as may be necessary during that fiscal year.

The authorization for programs and activities represents a modest increase of $9,522,000 over the administration's revised fiscal year 1978 request. The purpose of the bulk of that increase as requested by the administration, or $8,522,000, is to improve the quality of Peace Corps training and programing.

During its deliberations on this bill, the Subcommittee on International Development found that, since fiscal year 1972, spending on each Peace Corps volunteer measured in constant 1972 dollars has declined significantly. Unfortunately, this decline has occurred in functions that affect the volunteer's performance, including training and country programing. This modest increase in last year's level should help to reverse this trend and put better prepared volunteers in the field.

The remainder of the increased authorization, $1 million, was added by the committee in order to provide for an expanded U.S. contribution to the United Nations Volunteer Program. The proposed increase above the current U.S. contribution of $320,000 would provide for 100 additional U.N. volunteers. The bill earmarks $1,320,000 of the total authorization for this purpose. Such a contribution, in the view of the committee, could also motivate other donor nations to expand their support of this worthwhile international program.

Mr. Chairman, in addition to the fiscal year 1979 authorization for the Peace Corps, the bill, as reported by the Committee on International Relations, also contains a supplemental fiscal year 1978 authorization which was added at the request of the administration. The supplemental authorization would provide an additional $3,644,000 in order to improve the quality and duration of volunteer training and provide for additional program support for the remainder of the current fiscal year. The supplemental authorization would also provide an additional $69,000 for pay raises and other employee benefits mandated by law.

However, because floor consideration of supplemental authorizations at this time would violate section 402(a) of the Congressional Budget Act, it was necessary to seek a waiver of this provision in order to bring H.R. 11877 to the floor. Under the Budget Act, such a waiver may be granted in the House if it is determined that emergency conditions so require. The Committee on Rules, in consultation with the Budget Committee, did not find that the supplemental request was the result of an emergency situation, but did agree to the waiver provided that the International Relations Committee would offer an amendment on the floor to strike the supplemental authorization from the bill. It is my intention to offer such an amendment, without prejudice to the basic justification of the administration request, at the appropriate time today.

Apart from the authorization of appropriations for fiscal year 1979, the bill contains a few additional amendments to the Peace Corps Act which would:

Make the act's declaration of purpose consonant with the New Directions policy adopted by the Congress in the Foreign Assistance Act of 1973;

Direct that the Peace Corps give increased emphasis to programs which integrate women into the economies of host countries;

Update language in the act regarding the readjustment allowance for volunteers;

Remove the current ceiling on the number of volunteers the President may assign to international organizations, particularly in case of disasters;

Increase the President's authority to settle tort claims against the Peace Corps;

Increase the authority of the Peace Corps to provide hospital care and medical treatment to foreign employees who are in training in the United States;

Provide explicit authority for the President to assign Peace Corps volunteers to assist in refugee assistance programs abroad; and

Expand the Peace Corps annual reporting requirement to Congress.

Mr. Chairman, Peace Corps volunteers are currently representing the United States by assisting the peoples of 64 nations throughout the developing world. In my opinion, these men and women are bringing much needed skills and assistance to less developed countries as well as continuing to emphasize the American spirit of volunteerism. H.R. 11877 provides the authorization necessary to continue their good work.

I urge the adoption of the bill.

Mr. SISK. Madam Chairman, will the gentleman yield?

Mr. HARRINGTON. I would be pleased to yield to the gentleman from California.

Mr. SISK. Madam Chairman, I just want to ask the gentleman two or three very brief questions to clarify this.

As a longtime supporter of the Peace Corps, I expect to support this bill, but I want to make absolutely certain that all the money that is being authorized here is in fact for the Peace Corps and none of it is for ACTION or VISTA programs.

Mr. HARRINGTON. That is entirely consistent with our understanding. The committee's jurisdiction does not in fact run beyond the Peace Corps request for fiscal year 1979.

Mr. SISK. Madam Chairman, the distinguished gentleman from Massachusetts also mentioned the possibility of some studies and hearings going on in connection with some reorganization or changes in the status of the Peace Corps.

Does this look in the direction of removing the Peace Corps, let us say, from ACTION or removing its association thereunder?

Let me say quite frankly to my colleague, the gentleman from Massachusetts, that I have great reservations about the director of this program. I do not intend to pull any punches. Very frankly, I was amazed when he was appointed, and I have not seen any reason to change my mind. In fact, the more I hear about him, the worse I think he is.

However, that in a way is beside the point at this time if we are in fact moving toward possibly rearranging or restructuring the Peace Corps and separating it from the existing so-called ACTION program.

I want to commend my colleague, the gentleman from Massachusetts, for bringing to us a bill that, as far as I know, I can support. I just cannot, though, let this opportunity pass without raising serious questions about some of the things that apparently are going on in connection with VISTA and that apparently are being pushed by the present Director. I just want to take this opportunity to say that, and I thank my colleague for yielding.

Mr. HARRINGTON. Madam Chairman, let me see if I can carefully wend my way through the range of concerns expressed by the gentleman from California (Mr. SISK) and try to deal with his basic concern.

There are presently a number of dif-

ferent options being considered by the subcommittee dealing with the prospective status of the Peace Corps organization. Among them is legislation filed by a number of members of the subcommittee, including the gentleman from Washington (Mr. BONKER) and myself, who were the principal proponents of this effort to sever the Peace Corps from the existing umbrella organization of ACTION and restore it in a general fashion to its preexisting status prior to the reorganization efforts of the Nixon administration which established the hybridization to which the gentleman referred.

Senator Humphrey, prior to his death submitted broadly ranging legislation dealing with the whole question of foreign aid and made a recommendation which appears attractive to some, including members of the committee itself, the present Director of ACTION, and, to a degree, the White House, that would tend to have the same result to which the gentleman referred, that of placing the Peace Corps with a number of other volunteer organizations.

Let me say to the gentleman that as timely as tomorrow it is my intent to consult with members of the subcommittee to explore on my side of the aisle the appeal of Members of Congress for these options that would move in the direction that has been indicated this afternoon by the gentleman from California (Mr. SISK).

Mr. SISK. Madam Chairman, I thank the gentleman for his remarks, and I want to commend him on the work he is doing.

I was here, of course, at the time the Peace Corps was established, when a distinguished citizen from the gentleman's State, John F. Kennedy, was President of the United States, and I remember the efforts of Sargent Shriver, to whom I give credit for almost single-handedly creating the Peace Corps.

I well remember nights, 7 or 8 o'clock at night, over in the old Cannon Building, walking out and meeting Sarge tramping down the corridors, almost alone selling that great program. And I was one of those who was an early-on supporter. I feel that the Peace Corps has done a great deal for this country in building up and creating friendships in many countries. And that fact itself is the reason, as I said. Maybe I am wrong on some of the other points I make, but I am very much concerned. I just would hope that we do not taint it with something that certainly in many quarters today has the concerns of the American people.

Mr. HARRINGTON. I think there is no substantial disagreement with the gentleman from California on the basic concern about preserving and, to the degree that we can do it, restoring and enhancing what I think is the peculiar benefit the Peace Corps has represented over the period of its existence.

Mr. SISK. I thank the gentleman.

Mr. WINN. Madam Chairman, I yield myself such time as I may consume.

Mr. BROOMFIELD. Madam Chairman, will the gentleman yield?

Mr. WINN. I yield to the gentleman from Michigan (Mr. BROOMFIELD).

Mr. BROOMFIELD. Madam Chairman, I rise in strong support of this bill.

Madam Chairman, I would like to take this opportunity to express my support for the fiscal year 1979 Peace Corps authorization bill, H.R. 11877.

H.R. 11877 authorizes $96.1 million for Peace Corps operations and programs for the coming fiscal year. I have no hesitation in urging the passage of this bill. Of the several varieties of foreign assistance programs conducted by the United States, the Peace Corps, perhaps because of its unique character as a volunteer organization, has been one of the more efficient and widely supported programs, both by the Congress and the American public in general.

Despite an occasional lapse into a regrettable pattern of recruiting Peace Corps volunteers long on reformist zeal and short on practical skills, the Peace Corps has generally been successful at providing trained, motivated, and culturally sensitive volunteer manpower to serve at the village level in a number of countries in the developing world.

The Peace Corps is putting increased emphasis on grass roots assistance to help the people of host countries to develop an improved capacity to provide for their own basic human needs. In this regard, Peace Corps programing has been deemphasizing to a degree its traditional heavy involvement in providing teachers, particularly teachers of English as a foreign language, in favor of concentrating more on volunteers in the areas of food production and storage, nutrition, health, and simple rural water systems.

In addition to the direct developmental benefits obtained by the people of the more than 60 host countries where Peace Corps volunteers serve, there are some more subtle, but important benefits from Peace Corps programs. The Peace Corps provides an opportunity for Americans and the people of the less-developed countries to exchange insights and better understand each other's cultural traditions and views of our rapidly changing world and the problems and aspirations which we have in common.

In conclusion, let me reiterate that I believe in the basic purpose and goals of the Peace Corps and I support this bill before the House authorizing fiscal year 1979 funding for the Peace Corps.

Mr. WINN. Madam Chairman, I support H.R. 11877, the bill now pending before the House to authorize funds for the Peace Corps for fiscal year 1979.

The principal purpose of this legislation is authorized $96.1 million for the Peace Corps' fiscal vear 1979 programs as well as such sums as may be necessary for increases in salary, pay, retirement, and similar employee benefits otherwise authorized by law.

The fiscal year 1979 program includes a significant initiative to upgrade Peace Corps skills, language, and cross-cultural training programs. In recent years the average number of weeks of volunteer training has declined.

The fiscal year 1979 program contemplates increasing preservice, in-service, and specialized skills training which will improve the capabilities and effectiveness of Peace Corps volunteers. The growing emphasis in Peace Corps programs on people-to-people self-help assistance to meet basic human needs requirements, particularly in the development categories of health, nutrition, and food production depends on this.

In addition to the basic authorization for fiscal year 1979, H.R. 11877 includes several amendments to various provisions of the Peace Corps Act. The bill adds policy language to the Peace Corps Act similar to that contained in the Foreign Assistance Act focusing Peace Corps programing on the poorest of the poor, and also language recognizing the role of women in development. Among the other amendments in H.R. 11877 are provisions to require more comprehensive information on Peace Corps' cooperation and coordination with international and host country volunteer organizations in the annual report to Congress; to specifically authorize assignment of Peace Corps volunteers to organizations; and entities providing development or other relief assistance to displaced persons and refugees and provide a more flexible ceiling on annual Peace Corps funding to promote the development of host country and international voluntary service organizations.

The Peace Corps has been a leader in demonstrating and promoting innovative programs to organize and mobilize concerned citizen volunteers for providing practical, appropriate technical assistance and training in a people-to-people setting. In some 64 countries worldwide the Peace Corps is essentially doing just that today.

The Peace Corps has generally enjoyed fairly wide public and congressional support, and, in fact, this particular bill, H.R. 11877, had broad bipartisan support in the International Relations Committee. Even more significantly, perhaps, I think the increasingly active interest other countries who have been exposed to Peace Corps volunteers are showing in international and domestic volunteer development service organizations is fairly strong evidence that the Peace Corps is seen as an effective organization by many people in other countries.

Of course, there is still room for improvement in a number of aspects of Peace Corps operations. However, after fairly careful scrutiny of Peace Corps programs in general, and this authorization in particular, I feel the Peace Corps merits our continued support. On this basis, I urge the passage of H.R. 11877.

Mr. HARRINGTON. Madam Chairman, I yield 5 minutes to the gentleman from Wisconsin (Mr. ZABLOCKI), the chairman of the full committee.

Mr. ZABLOCKI. Madam Chairman, I thank the chairman of the subcommittee for yielding me this time.

Madam Chairman, I rise in support of the bill H.R. 11877 and endorse the recommendations of our Subcommittee on International Development—as reviewed and acted upon by the full Committee on International Relations.

As the subcommittee chairman (Mr. HARRINGTON) has pointed out, this is essentially a "funding bill"—to support the activities of the Peace Corps during fiscal year 1979. While the subcommittee has held an extensive set of hearings on the possible reorganization of the ACTION Agency, it was decided to deal with that question separately and to take up the administration's basic authorization request without delay.

I believe that was a wise decision. There have been a number of thoughtful and far-reaching proposals for changing and strengthening the Peace Corps' organizational structure—as mentioned by Chairman HARRINGTON and our colleague the gentleman from Kansas LARRY WINN—including, among others, the bill sponsored by the gentleman from Washington (Mr. BONKER) and the so-called Humphrey bill which is still undergoing detailed and painstaking review. Whether the Peace Corps requires a greater degree of autonomy or a closer association with a restructured foreign aid administration are matters which deserve careful scrutiny, and thorough, deliberate consideration; and that is exactly what our committee intends to give them in the months ahead.

While the bill we are considering today represents a $9,522,000 increase over the administration's revised fiscal year 1978 request, I am convinced that this is a worthwhile investment. I particularly welcome the new emphasis which has been placed on improvements in training, programing, and volunteer support—all areas in which the committee's oversight operations have uncovered past deficiencies. I am also encouraged by the apparent progress which has been made over the past year in recruiting 34 new country directors—27 of whom have already been placed in the field, while the remaining 7 are still in training. This is in accord with the recommendation which was contained in last year's committee report; namely, that—

. . . Major attention should be devoted to the recruitment of qualified Peace Corps leadership, both in Washington and overseas, to provide adequate direction to, and supervision over, Peace Corps activities worldwide. The future of the Peace Corps is largely dependent on ACTION's success in meeting this important goal.

It is true that the Peace Corps, under its present management, has encountered difficulties in "putting its act together." As of this date, in fact, the incumbent director has only been in office for 6 months and there have been delays and setbacks in moving ahead with a new sense of direction and purpose.

Frankly, I am not as impatient on this point as are some of the Corps' more vocal critics. I would rather have the leadership move cautiously and advisedly, rather than hastily and, perhaps, rashly, in devising and implementing new programs. I am more interested in quality programing than in the so-called "numbers game" by which the agency has attempted to justify its existence to Congress over a period of almost 15 years, and I am pleased to note that the ACTION Director appears to be a recent convert to that view.

At the same time, Madam Chairman, it is clear that the jury is still very much out on the Peace Corps. In the coming fiscal year, we will be looking for results and progress in those areas I have mentioned. Above all, we want to insure that volunteers have real jobs to perform—Jobs which the host governments need and are willing to support—and the committee intends to monitor very closely future developments in those areas.

With this authorization, the Peace Corps will have the "tools" to "get on with the job." We now expect—and will demand—that the job be done, and done properly.

Madam Chairman, it is with these thoughts in mind that I call for the adoption of H.R. 11877.

Mr. HARRINGTON. Madam Chairman, I yield such time as he may consume to the gentleman from Washington (Mr. BONKER).

Mr. BONKER. Madam Chairman, I thank the chairman of the subcommittee for yielding me this time, and I rise in support of the authorizing bill.

While this amount is that which was supported by the administration, I still think it is less than what we need to accomplish the many desirable goals which the Peace Corps has established over the years.

As I understand it, the Senate may be adding further to the Peace Corps authorization. I would also like to echo what the chairman of the full committee has just stated, that the performance of the Peace Corps staff in getting their budget to us and making their case and trying to present consistent figures has not been very impressive. So, I would hope that the Peace Corps sponsors in future years will be coming forth with a clear and certain budget that we can act upon.

I would also like to take this opportunity to renew my support for legislation that is before the subcommittee to reorganize the Peace Corps; specifically, a bill to take the Peace Corps out of ACTION and make it an independent agency. All of the testimony that has come before the subcommittee has been in support of a change that would give the Peace Corps more independence and would revitalize that important agency.

One of the last witnesses was Sargent Shriver, the first Director of the Peace Corps, who expressed not only his strong support for taking the Peace Corps out of ACTION, but his growing concern that we might come up with legislative proposals that would place the Peace Corps in a revamped AID agency. Saying that he was terribly concerned about such a concept, Mr. Shriver noted that in earlier years they had fought the same battles within the White House, and it was vitally important that we have a Peace Corps that is apart and separate from a State Department agency.

While I applaud the efforts of the subcommittee chairman and his staff to go ahead with this legislation, I still feel a sense of frustration that we have yet to come before the full committee and to the floor with a specific bill that would address this problem.

Madam Chairman, I would like to take this moment to ask the chairman of the full committee when he expects the subcommittee to take specific action on the legislation pending before us.

Mr. HARRINGTON. Madam Chairman, will the gentleman yield?

Mr. BONKER. I yield to the gentleman from Massachusetts.

Mr. HARRINGTON. Madam Chairman, I do not want my uncharacteristic lack of patience to indicate a lack of interest in the general area of the resolution, but tomorrow we are trying to assemble the membership that has expressed a continued interest in the subject of Peace Corps reorganization to see if there is a particular bias in support of a particular proposal. I think the gentleman knows my feeling on the matter. I would like to insist on the bill he and I filed last year, and hope that we can get enough support to make that not a totally futile effort. As a sometime expert on futile efforts, I think it would be useful to see whether or not we can develop a sense that the matter might meet with the general approbation of some of our colleagues.

If the gentleman can help round up some of those Members tomorrow, I would be very grateful.

I feel in many ways the same as the gentleman does, that there have been a number of unnecessary impediments that are the result of nothing more than the misplaced opportunities of the first Democratic administration I have had the experience of serving under to take advantage of what I hoped would be a long-sought departure from some of the practices of the preceding few years. I regret that was not appreciated and approached with a little bit more urgency than was the case.

I think there is an opportunity of this kind still to be gained with regard to the Peace Corps.

Mr. BONKER. I thank the chairman.

Mr. HARRINGTON. Madam Chairman, I have no additional requests for time.

Mr. WINN. Madam Chairman, I yield such time as he may consume to the gentleman from New York (Mr. GILMAN).

Mr. GILMAN. Madam Chairman, I am pleased to rise in support of this measure, H.R. 11877, the Peace Corps Act amendments. Certainly the Peace Corps has done an outstanding job in many of the developing nations. While there have been certain areas of criticism that have been properly laid before the Peace Corps by our committee, and while there is a need for reorganization—and I have joined with the gentlemen from Washington (Mr. BONKER) in presenting a bill to do just that and I hope our committee will soon undertake a further review of that important legislation, I do rise in support of this measure, and urge my colleagues to vote in favor of it.

Throughout its 17-year history, the Peace Corps has remained a source of pride for this Nation as a symbol of its true "volunteer" spirit. The Peace Corps has survived as an essential part of the

overall U.S. development assistance effort.

Recently a constituent of mine returned from a 2-year tour in the Peace Corps with these incisive observations:

Peace Corps volunteers see first hand the enormous problems and suffering with which humankind is afflicted. And they are standing up to these challenges. They act; they are out there doing something about the lack of education, health care, technical knowledge and a long list of other matters which to most people in the underdeveloped world are matters of dire urgency . . . Often dismissed as idealists, these people not only tolerate but thrive in condition which most would shun and in which most of the inhabitants of this earth live . . . They indeed reflect the very best in the American Character, and they are a credit to their country."

In order to continue the effective operation of the Peace Corps and help it to meet the many challenges of a changing world we must seek new ways to maintain its unique, image, identity, sense of direction, flexibility of operation, and, most important, its volunteer spirit. The bill before us, H.R. 11877, contains many important provisions reflecting our continually changing world.

I believe that the Peace Corps volunteers are a composite of what America is really about and that they remain to this day one of the best advertisements we can send overseas. They deserve our continued support and I urge my colleagues to vote in favor of this legislation.

● Mr. DERWINSKI. Madam Chairman, I rise in support of H.R. 11877. I continue to believe that the underlying philosophy of the Peace Corps is a sound one. There are many Americans willing to endure the rather spartan existence which Peace Corps service customarily entails.

To the extent that the Peace Corps maintains a commitment to providing practical, basic technical assistance at the grassroots level, it has a continuing contribution to make which can benefit many people in the developing countries. The increased emphasis in the Peace Corps' fiscal year 1979 budget for skills training for volunteers is a fairly hopeful sign that there is some recognition of the need for a practical, down-to-Earth approach to the appropriate implementation of the Peace Corps' broad mission of providing volunteer manpower to help our fellow human beings in the so-called Third World countries.

I would, however, take this opportunity to briefly touch upon one matter in particular which does bother me somewhat. Those who have had the opportunity and inclination to peruse the committee report which accompanies this bill may have noticed the supplemental views in which several of us on the International Relations Committee expressed concern about a recent phenomenon in the ACTION/Peace Corps leadership here in Washington. That phenomenon is the inclination, or perhaps habit, of the agency leadership to increasingly describe Peace Corps policies and goals in warmed-over radical activist rhetoric, sprinkled with a few terms from the contemporary jargon of development assistance.

The thing that troubles me with this habit is that, to paraphrase the British statesman, Benjamin Disraeli, the ACTION/Peace Corps hierarchy may become inebriated with the exuberance of their own vague but intense rhetoric, and project an image of activist political and social reform to which countries with different cultural traditions will react adversely. Thus the Peace Corps' effectiveness would diminish.

Nevertheless, I urge the House to pass H.R. 11877. I do so because, Peace Corps programs in the field have generally been useful and effective, and because I am confident that Congress, in particular my colleagues on the International Relations Committee, will continue to scrutinize Peace Corps policies and programs very carefully.●

Mr. WINN. Madam Chairman, I have no further requests for time on this side, and I reserve the balance of my time.

Mr. HARRINGTON. Madam Chairman, I have no further requests for time.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

H.R. 11877

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Peace Corps Act Amendments of 1978".

SEC. 2. Section 2 of the Peace Corps Act (22 U.S.C. 2501) is amended by inserting "particularly in meeting the basic needs of those living in the poorest areas of such countries," immediately after "manpower,".

SEC. 3. Section 3 of the Peace Corps Act (22 U.S.C. 2502) is amended—

(1) in subsection (b) by striking out the matter before the first proviso and inserting in lieu thereof the following: "There are authorized to be appropriated to carry out the purposes of this Act (1) for fiscal year 1978 not to exceed $86,544,000, and (2) for fiscal year 1979 not to exceed $96,135,000 of which $1,320,000 shall be available only for Peace Corps contributions to the United Nations volunteer program:";

(2) in subsection (c) by striking out "for the fiscal year 1978, $1,000,000" and by inserting after "by law" the following: ", for fiscal year 1978, $1,069,000, and for fiscal year 1979 such sums as may be necessary"; and

(3) by adding at the end thereof the following new subsection:

"(g) In recognition of the fact that women in developing countries play a significant role in economic production, family support, and the overall development process, the Peace Corps shall be administered so as to give particular attention to those programs, projects, and activities which tend to integrate women into the national economics of developing countries, thus improving their status and assisting the total development efforts.".

SEC. 4. Section 5 of the Peace Corps Act (22 U.S.C. 2504) is amended—

(1) in the first sentence of subsection (c) by striking out "; except that" and all that follows through "President"; and

(2) in subsection (h) by adding at the end thereof the following new sentences: "The provisions of section 1091 of the Foreign Service Act of 1946, relating to malpractice protection, shall apply to volunteers, and the Director of ACTION shall have the authority granted to the Secretary of State in subsection (f) of such section. For purposes of subsection (g) of such section, a Peace Corps representative shall be deemed to be a principal representative of the United States.".

SEC. 5. (a) Section 10 of the Peace Corps Act (22 U.S.C. 2509) is amended—

(1) in subsection (a)(2) by striking out "; *Provide*" and all that follows through "section";

(2) in subsection (b) by striking out "$10,000" and inserting in lieu thereof "$20,000"; and

(3) by adding at the end thereof the following new subsection:

"(h) The President may provide hospitalization and medical treatment to Foreign Service local employees who are within the United States for training related to their employment under this Act, for illnesses, injuries, or conditions other than those arising out of and in the course of employment, which, in the judgment of the President, began during such employee's travel related to such training or so near to the beginning of such travel that the onset of the illness, injury, or condition could not have been known, and for which immediate medical treatment or hospitalization is reasonably required.".

(b) The amendment made by paragraph (2) of subsection (a) shall apply to claims made after the date of the enactment of this Act.

(c) Section 10(a) of such Act is further amended—

(1) by inserting the following new paragraph after paragraph (2):

"(3) assign volunteers to duty or otherwise make them available to any entity referred to in paragraph (1), in order to assist such organizations and agencies in providing development or other relief assistance to displaced persons and refugees in any country, if the government of the country agrees to such assignment;"; and

(2) by redesignating paragraphs (3) and (4) as paragraphs (4) and (5), respectively.

SEC. 6. Section 11 of the Peace Corps Act (22 U.S.C. 2510) is amended by adding at the end thereof the following new sentence: "Each report shall contain information describing efforts undertaken to improve coordination of activities of the Peace Corps with activities of international voluntary service organizations, such as the United Nations Volunteer Program, and of host country voluntary organizations, including—

"(1) a description of the purpose and scope of any development project which the Peace Corps undertook during the preceding fiscal year as a joint venture with any such international or host country voluntary service organization; and

"(2) recommendations for improving coordination of development projects between the Peace Corps and any such international or host country voluntary service organization.".

"SEC. 7. (a) Section 301(b)(2) of the Peace Corps Act (22 U.S.C. 2501a(b)(2)) is amended by striking out "$350,000 may be used in any fiscal year" and inserting in lieu thereof "2 per centum of the amount appropriated to the Peace Corps for a fiscal year may be used in such fiscal year.".

(b) The amendment made by subsection (a) shall take effect on October 1, 1978.

Mr. HARRINGTON (during the reading). Madam Chairman, I ask unanimous consent that the bill be considered as read, printed in the RECORD, and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

AMENDMENT OFFERED BY MR. YOUNG OF FLORIDA

Mr. YOUNG of Florida. Madam Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. YOUNG of Florida: Page 2, line 1, insert "(a)" after "SEC. 3.".

Page 2, insert the following after line 25:

(b) Section 3(b) of such Act is further amended by adding the following new sentence at the end therof: "None of the funds authorized to be appropriated under this subsection for fiscal year 1979 may be used to carry out any program in the Central African Empire.".

Mr. YOUNG of Florida. Madam Chairman, this is a very simple amendment. It speaks to one particular country in this program, and that is the Central African Empire. The record of human rights violations on the part of the leadership of this country is so bad that even AID, our own bilateral aid program, is being pulled out of the Central African Empire. I think any time AID is willing to pull out of a country because of this kind of problem, the problem must be really bad.

Not only are there violations of human rights which have been reported, but also—and I will ask unanimous consent when we go back into the House that I be permitted to include extraneous material with my remarks—but also in the December 19, 1977, issue of Newsweek it was reported that Emperor Bokassa actually required the members of the Cabinet to go into a prison and observe while some prisoners were beaten to death by rifle butts.

While that situation is bad, we also ought to be concerned about this. The Central African Empire, a small country, with a budget last year of around $75 million, and that was the whole budget, spent one-third of that budget or $25 million—which would be comparable to us spending something like $200 billion—last year for the coronation of the emperor. This certainly has to be a rather unusual expenditure of funds, to spend one-third of the country's annual budget just to crown a king or an emperor, especially when the people of the country have such serious needs.

What the Peace Corps plans to do in the Central African Empire is to increase the Peace Corps involvement in dollars and cents, from the amount last year of $974,000, by another half million in this fiscal year, to the tune of $1,504,000.

I would like to be of aid and assistance to the poor folks in the Central African Empire, but my feeling is if their own country does not have any more concern for them, why should we? Why does not their own government take that extra $25 million and put it into aid and assistance for their own people?

AID is withdrawing from the Central African Empire, and yet the Peace Corps plans to nearly double their involvement. It is certainly anything but consistent.

The story about Bokassa and his coronation and the things they did to spend this $25 million would make a fine movie, comparable to the "King and I" or something like that.

I do not think American tax dollars ought to be used in this way.

With this, I hope the Committee will agree with my amendment and be consistent in our concern for human rights. Let the world know, and especially those people that violate human rights, that we will not allow the spending of our dollars in countries where violations of human rights are so flagrant. It is an amendment which is consistent and compatible with the position this House has taken on many occasions on the question of human rights.

Madam Chairman, I urgently urge the members of the committee to consider this amendment in the very sincere and serious light in which it is offered.

Madam Chairman, I include at this point the Newsweek article to which I previously referred:

BOKASSA'S NEW CLOTHES

(Africa had a brand-new Emperor last week—Bokassa I of the Central African Empire. From Bangui, the sweltering capital of Bokassa's empire, Newsweek's Loren Jenkins filed this report:)

The setting was the Jean-Bédel Bokassa sports palace, located next to Jean-Bédel Bokassa University on Jean-Bédel Bokassa Boulevard. Bokassa, 56, a former sergeant in the French Army, sat impassively on a gilded, 15-foot-high throne in the winged shape of an imperial eagle. To his right sat Empress Catherine, 28, sheathed in gold lamé, and his 2-year-old son and heir apparent, Jean-Bédel Georges, wearing a crisp white military uniform. Officers of the imperial guard draped Bokassa's shoulders with a 30-foot train of red velvet embroidered in gold and trimmed with ermine. A beplumed general presented him with a diamond-studded scepter and then held up a $2.5 million gem-encrusted gold crown on a velvet cushion. Bokassa stood and slowly raised the crown to his head. Then, like his idol, Napoleon Bonaparte, he crowned himself Emperor.

The Central African Empire—known in French colonial days as Ubangi-Shari—is a landlocked nation of 2.2 million hapless souls teetering on the edge of bankruptcy. But that did not stop its bandy-legged new Emperor from splurging on grandeur. The coronation cost about $25 million, nearly a third of the country's annual budget, and the ceremony was a conscious imitation of Napoleon's own coronation in 1804. For the ensuing festivities, Bokassa imported 40,000 bottles of French table wine, 24,000 bottles of Moët et Chandon champagne, a similar amount of Chivas Regal Scotch, 450 pounds of rose petals, 25,000 fresh-cut flowers and 60 Mercedes limousines—which had to be airfreighted into Bangui.

FIREWORKS AND BARE-BREASTED MAIDENS

The result was a rousing good show. When he wasn't escaping the heat in an air-conditioned Mercedes, the Emperor rode in a green-and-gold carriage drawn by matched grays imported from Normandy (and doomed to die in the fetid climate). The 3,500 invited guests were treated to lavish banquets—and to a ton and a half of fireworks that rained sparks on them as they ate. Lancers in green tunics paraded, bands played, bare-breasted maidens danced and tribesmen coaxed strange sounds out of giant horns. Sparse knots of Bokassa's subjects watched the pageant morosely, but the Emperor himself defended the extravagance. "One cannot create a great history without sacrifices," he declared.

As for the guest list, anyone who was anyone wasn't there. Bokassa had invited his fellow emperors, Hirohito of Japan and the Shah of Iran, along with Queen Elizabeth II and 150 heads of state. Pope Paul VI was invited to hand Bokassa his crown, as Pius VII had done for Napoleon. But Bokassa was royally snubbed by nearly one and all. Pope Paul informed him that the Vatican was no longer in the business of crowning emperors and instead sent an archbishop to watch. Despite his admiration for the French (Bokassa had wept at Charles de Gaulle's funeral), Paris sent only its Minister of Cooperation. The U.S. was represented by its ambassador. The only Head of State in attendance was the Prime Minister of Mauritius, Sir Seewoosagur Ramgoolam.

The fact is that Bokassa has become an embarrassment, even to his tolerant African peers. He is no Idi Amin, but his rule has been mercurial and arbitrary since he took power in a coup on New Year's Day, 1966. Opponents have been jailed or killed—and some have disappeared. The Emperor is still trying to live down an incident that occurred five years ago, when he led his Cabinet into a prison and made them watch as a group of convicted thieves were beaten to death with clubs and rifle butts. Last summer, he had two Western reporters thrown into jail. Before they were freed, one of them, Michael Goldsmith of the Associated Press, was brought before Bokassa, who accused him of being a South African spy, beat him to the ground and stepped on his glasses.

Bokassa's big day began slowly: the Emperor was an hour and a half late to his coronation. As the guests sweated in despair, a French Navy band ran through its entire repertoire and was replaced by canned music. The Women's Army Corps handed out bags of caramels "pour passer le temps." Finally Bokassa arrived and crowned himself. A 21-gun salute rattled the windows of the sports palace, prompting one startled journalist to ask: "Is that outgoing or incoming?" As he prepared to crown his wife, the Emperor announced that "We, Bokassa I" would scrupulously uphold the constitution.

FROM CATHOLICISM TO ISLAM AND BACK

Next, the ceremonies moved to the Cathedral of Notre-Dame de Bangui, where the Emperor's ascension was sanctified by a Solemn High Mass. Conveniently forgotten was the fact that, only a year before, Bokassa had announced his conversion to Islam, in anticipation of aid from the rich and devoutly Muslim regime of Libya. The aid never materialized and Bokassa reverted to his Roman Catholic faith. As the papal delegate, Archbishop Domenico Enricci, looked on, the Archbishop of Bangui officiated at the Mass and an imperial chamberlain with a handkerchief in either hand mopped up the sweat that ran in rivulets from the imperial brow.

That night, Bokassa treated 4,000 people to banquet. There was a giant tureen of caviar and bottles of wine and liquor graced every table. To honor the Emperor's service in Vietnam (where he fought with the French Army and sired one of his 30 children), some of the entertainment was provided by a song-and-dance troupe composed partly of former bar girls from Saigon. But the food ran out before the guests did, and the liquor was pilfered by waiters and soldiers.

MAJORETTES AND PYGMIES

The final act was a parade down the former airport runway now known as Bokassa Boulevard. Wearing a Napoleonic uniform and a cockaded hat, Bokassa reviewed his entire 1,000-man army. Drum majorettes pranced past, led by a leggy baton twirler from Nice. Students and the business community were represented along with a loyal delegation from the country's Pygmy Women's Association.

No amount of spectacle could conceal the fact that the Central African Empire is one of the 25 poorest nations on earth (per capita income is less than $200 a year). On the last day of the festivities, the U.S. announced that it was phasing out its $1 million annual

aid program because of Bokassa's human rights violations. But nothing could dampen the Emperor's spirits. With more bravado than need, he placed an order for still more Mercedes limousines. Few of his guests were impressed by the long-term propects for Bokassa's reign. "It's all well and good to carry on about Napoleonic grandeur," said a French businessman. "What Bokassa seems to be forgetting is that after the grandeur came Waterloo."

Mr. HARRINGTON. Madam Chairman, I rise in somewhat perplexed opposition to the amendment.

Madam, Chairman, I have no desire to debate the specifics of the extent, scope, and magnitude of the details as the gentleman from Florida (Mr. YOUNG) has, with very obvious sincerity, characterized them as they apply to the head of state of the Central African Empire. I have just a couple of observations to make that I think might be useful to put this in perspective.

There has never been, including a country that I have some poignant memories of being involved with in a very, very painful way, Chile, in 1975, any successful effort either from the conservative or from the liberal sides of the areas of the spectrum of the House of Representatives to link the Peace Corps with concerns that relate to the practices of the head of a state, whether they be right, left, or some benign form of government in the middle.

I believe that we should look at the track record of the Central African Empire to the degree that it allows volunteers to better the livelihood of certain segments of its population. To the degree that we can measure success by the number of volunteers asking for reassignment to such countries, let me point out that such requests for reassignments are higher here than in most other countries. Therefore, we have some measure on the part of our own citizens of the level of satisfaction with the program in the Central African Empire.

I believe the broader question is whether we can continue with the practices that have existed under both administrations, Republican and Democratic, to maintain a depoliticized Peace Corps program, and to recognize that we have had to find a way to bridge very significant cultural and political gaps. While I do not necessarily agree with the practices being presently displayed in the Central African Empire, the central purpose of this piece of legislation runs to the philosophy of the Peace Corps as we know it. This I hope will allow us a somewhat broader perspective and not allow us to extend it to the fractionalization on a country-by-country basis or by some misleading misunderstanding of the activities of the Peace Corps there.

Mr. PEASE. Madam Chairman, will the gentleman yield?

Mr. HARRINGTON. I yield to the gentleman from Ohio.

Mr. PEASE. Madam Chairman, I would like to associate myself with the remarks made by the distinquished chairman of our subcommittee, the gentleman from Massachusetts (Mr. HARRINGTON), and point out that there are no other limitations on the assignment of Peace Corps personnel in the statutes. While there are limitations imposed by the Peace Corps itself on a number of nations because of the conditions existing within those nations, there are none that are imposed by the Congress.

I fully appreciate the concern of the gentleman from Florida (Mr. YOUNG) about the Central African Empire. I do not want to defend that nation, or the head of state of that nation. Indeed, I could add a couple of others, most notably Uganda, from my own point of view or concern. But I do think the principle of the Peace Corps is to help the poorest people within these nations and, indeed, if the head of state is squandering money on his own coronation then it may well be that in that nation, above all, we need to put the Peace Corps operations there in order to help the really poor and needy people there.

I thank the gentleman for yielding.

Mr. YOUNG of Florida. Madam Chairman, will the gentleman yield?

Mr. HARRINGTON. I yield to the gentleman from Florida.

Mr. YOUNG of Florida. Madam Chairman, I thank the gentleman for yielding.

I would like to use this time in order to make a correction. When I talked about the total budget I said $1 billion when I meant to say $1 million. And I apologize for that.

Mr. PEASE. I understood that intent.

Mr. YOUNG of Florida. I wanted to make that comment and to further make one more point, if the gentleman will yield again to me. I agree with the gentleman's remarks about Uganda but, of course, there are no Peace Corps volunteers involved in Uganda. But later on we will have an opportunity to work on Uganda through another vehicle.

Mr. WINN. Madam Chairman, I move to strike the last word and I rise in opposition to the amendment.

Madam Chairman, I rise in opposition to the amendment. I appreciate what the gentleman from Florida is trying to accomplish, but I would like to clarify a few points, if I may.

The gentleman referred to AID and withdrawing our support in the Central African Empire. I would like to point out that that is a government-to-government type of support. As the chairman of the subcommittee, the gentleman from Massachusetts (Mr. HARRINGTON) pointed out, the Peace Corps tries not to politicize our aid around the world in our programs.

I would like to touch just briefly, on a few of the priorities of the Peace Corps. Certainly these would be affected by the amendment in the central African empire. Small-scale food production programs are geared toward individuals at the village level, and health and village improvement projects that decrease the incidence of disease and provide villagers with the capacity for improving the quality of life by their own actions; educational programs that provide classroom contact with young adults, trained teachers, and contribute to curriculum development; water resource projects that provide clean water supplies for villages and lead to other community level projects; and long-range projects that provide basic research and information for economic development; indoor physical facilities for critical government reform programs.

I think this points out that the basic philosophy of the Peace Corps is not government to government but is trying to aid the people in the field. I would like to close by pointing out that the Central African Empire is one of the poorest countries of the world. The annual per capita GNP is $230. The U.N. considers it 1 of the 29 most underdeveloped countries in the world, so I think we would have to say that this comes under the classification of a subsistence economy. I think this is a case where a direct people-to-people program is warranted.

Madam Chairman, I yield back the remainder of my time.

Mr. ROUSSELOT. Madam Chairman, I rise to strike the requisite number of words.

I am really quite amazed that my distinguished colleagues on this committee would oppose this very simple amendment which merely asks to strike any support for just 1 year to this ruthless dictator and all who work around him from the Peace Corps. Several of my colleagues have admitted that this rather ruthless dictator manages this small country very improperly. I would almost be interested to see if Nazi Germany were in existence today whether we would send any Peace Corps people there to help the poor people get to the gas chambers, or something.

I am just amazed that my colleagues would even think of wanting to send any help to this extremely ruthless dictator, who runs the country with an iron fist. It is very likely that none of the Peace Corps people would really be able to help the general populace anyway, because the dictator would decide whom they would help and whom they would not, whether it be constructing hospitals or helping poor people be better fed, or whatever.

This amendment is only striking Peace Corps support for the Central African Empire for the fiscal year 1979 which begins October 1, and I am really somewhat amazed that it is so objectionable to cut out this support for just 1 year. Let us try it and see what happens. Maybe they might get the message.

Mr. YOUNG of Florida. Madam Chairman, will the gentleman yield?

Mr. ROUSSELOT. I yield to my colleague, the gentleman from Florida.

Mr. YOUNG of Florida. I thank the gentleman for yielding.

I think the gentleman makes an excellent point. The gentleman from Kansas talked about the difference in the Peace Corps program and the AID program, saying that AID was the government-to-government program, but, of course, it is intended to help people. The Peace Corps is supposedly the people-to-people program.

The fact is that they are all American tapayers' dollars and when the Interternal Revenue Service forms are filed and the taxes are paid the American people do not have the right to make a differentiation between AID, International Financial Institutions or the Peace Corps; will the gentleman not agree to that?

Mr. ROUSSELOT. No, they certainly do not.

I could pose another question. Is it not true that this great Emperor Bokassa, whatever he calls himself, the supreme wizard of the country, pretty much dictates what happens in that country. I find it difficult to believe that just sending Peace Corps representatives there, that they really would be able to penetrate into the country to help people if the dictator of that country did not want them to; is that no correct?

Mr. YOUNG of Florida. Mr. Chairman, if the gentleman will yield further, of course, he is correct. We had the same argument with Idi Amin in Uganda. I do not care what money or assistance goes into Uganda or the Central African Empire, those dictators are going to have the control of it.

Mr. ROUSSELOT. And whether Mr. Bokassa has control does not make any difference.

Mr. YOUNG of Florida. Of course, it does. The gentleman from Kansas made the point that we ought not to politicize the Peace Corps. Every time any one of us tries to put some limitation on something going overseas to some dictator, corrupt or not, moral or not, human rights violator or not, it is always suggested that we ought not to politicize.

The very act that authorizes the Peace Corps provides for politicization. In fact, I am reading from the Peace Corps Act, subparagraph (3) of section 4 says:

(3) Under the direction of the President, the Secretary of State shall be responsible for the continuous supervision and general direction of the programs authorized by this Act, to the end that such programs are effectively integrated both at home and abroad and the foreign policy of the United States is best served thereby.

Now, I just do not believe that it is the foreign policy of the United States, our President has spoken on this issue many times, I do not think it is the foreign policy of the United States to give aid or comfort or dollar assistance to a leader of a nation who is a known violator of human rights. I do not think it is in the best interest of the foreign policy of the United States to send our American tax dollars into a country that spends one-third of their own annual budget to crown their king, including a $2.5 million throne and a $1 million crown. A lot of poor people could be fed on that money.

Mr. ROUSSELOT. I would suppose that a lot of Peace Corps people want to polish that throne.

Mr. YOUNG of Florida. Mr. Chairman, if the gentleman will yield further, my feelings toward the Peace Corps would be a lot different if we were not making that kind of contribution.

The CHAIRMAN. The time of the gentleman from California has expired.

(At the request of Mr. ZABLOCKI, and by unanimous consent, Mr. ROUSSELOT was allowed to proceed for an additional 2 minutes.)

Mr. ZABLOCKI. Mr. Chairman, will the gentleman yield?

Mr. ROUSSELOT. Now that the gentleman has secured more time for me, I am delighted to yield to the gentleman from Wisconsin.

Mr. ZABLOCKI. Mr. Chairman, does the gentleman from Wisconsin understand the gentleman from California to say this amendment would discontinue the Peace Corps program in the Central African Empire for 1 year?

Mr. ROUSSELOT. That is my understanding of the amendment.

Mr. ZABLOCKI. Mr. Chairman, if the gentleman will yield further, does that imply the gentleman from California might review it after a year?

Mr. ROUSSELOT. I would be glad to come back and review it with the gentleman from Wisconsin, who is an excellent chairman and who I know wants to make sure we will not help dictators like this overseas who do not seem to have much care for the concept of human rights and who spend too much money on their thrones.

Mr. ZABLOCKI. Mr. Chairman, if the gentleman will yield further, I certainly want to thank the gentleman for his kind assessment of my chairmanship. Let me assure the gentleman from California that I am just as anxious not to perpetuate any ruthless leader, including the ruler of the Central African Empire; and that is not the Peace Corps' purpose in that country or any country. Rather, the purpose of the Peace Corps is to help the people in the countries to which they are assigned to meet their needs for trained manpower, and to help them understand the American way of life and government. This is definitely what the Peace Corps program is all about. We are not giving aid to the leader of the Central African Empire. We are giving aid to the people of that country and in the process educating them not only to read and write but to aspire to a better life.

Mr. ROUSSELOT. If we could say that the Peace Corps educators going in there would really have the freedom to educate the people of that country to the disadvantages of that kind of dictatorship, that would be fine.

But I really do not think they would be allowed that kind of privilege. I am sure the gentleman does not believe that either.

Mr. ZABLOCKI. No, of course I do not.

Madam Chairman, if the gentleman will yield further, I will venture to say that the people in the Central African Empire do not know what they spent for the coronation of their king. Had they known, I am sure they would have objected.

The CHAIRMAN. The time of the gentleman from California (Mr. ROUSSELOT) has expired.

(By unanimous consent, Mr. ROUSSELOT was allowed to proceed for 2 additional minutes.)

Mr. YOUNG of Florida. Madam Chairman, will the gentleman yield?

Mr. ROUSSELOT. I would be pleased to yield to my friend, the gentleman from Florida, who is the ranking minority member of the Subcommittee of the Committee on Appropriations that has to review all foreign aid requests.

Mr. YOUNG of Florida. Madam Chairman, I appreciate the gentleman's yielding to me again.

I am really interested in this conversation between the gentleman and the chairman of the Committee on International Relations. I want to make sure that my ears did not deceive me.

I wonder if the gentleman from California understood the same thing I did: That the chairman of the committee was in effect suggesting that the Peace Corps members were there to educate the people of the Central African Empire to overthrow their established government?

Mr. ROUSSELOT. No, I do not think the gentleman said that. I believe the gentleman's statement was that they were to educate them as to the disadvantages of all these kinds of corruption in the present leadership and dictatorship. My belief is—and I am sure the gentleman from Florida would agree with me—that that kind of an effort would be impossible under this type of dictatorship.

If I had the slightest evidence that those educators would be allowed access to the people, and especially to the young people in the colleges, and that these institutions would allow that kind of teaching, that would be fine. However, I seriously doubt, on the basis of everything I have heard about this dictator, that that would be possible. I emphasize this point because I know the gentleman from Florida (Mr. YOUNG) has reviewed many of these appropriations that come under these authorizing bills. It is my understanding that Mr. Bokassa has given no evidence that he wants anybody in his country to be educated.

Those are the kinds of undertakings our distinguished committee chairman has suggested; is that not correct?

Mr. YOUNG of Florida. The gentleman is correct.

Mr. ROUSSELOT. Madam Chairman, I urge my colleagues to support this amendment. I think it is a very reasonable test amendment for a period of 1 year.

Mr. ZABLOCKI. Madam Chairman, will the gentleman yield?

Mr. ROUSSELOT. I yield to the chairman of the committee.

Mr. ZABLOCKI. Madam Chairman, I think the gentleman has tried to explain the position of the gentleman from Wisconsin.

Mr. ROUSSELOT. I did the best I could.

Mr. ZABLOCKI. It was not my intention to in any way imply that the Peace Corps volunteers are teaching politics or in their present education programs are teaching any of the citizens of the Central African Empire about the political situation. But if these people can learn to read and write, then they will be able to understand what their role in government should be.

This does not politicize the Peace Corps at all.

The CHAIRMAN. The time of the gen-

tleman from California (Mr. ROUSSELOT) has again expired.

(By unanimous consent, Mr. ROUSSELOT was allowed to proceed for 1 additional minute.)

Mr. YOUNG of Florida. Madam Chairman, will the gentleman yield?

Mr. ROUSSELOT. I yield to the gentleman from Florida.

Mr. YOUNG of Florida. Madam Chairman, I thank the gentleman for yielding.

To begin with, during our hearings it was not established that we were going to teach these people to read and write. That was not the purpose of the Peace Corps involvement.

But beyond that, even if that were the case, I believe that as long as their own government can afford to spend a third of their annual budget to crown the emperor, they could afford to teach their own people how to read and write. Why in the world could they not use that money to pay for their own educational system to teach their own people how to read and write?

The point is this: Why do we have to take care of people in cases where their own government is wasting money by the millions and in some cases by the billions of dollars?

That is like our giving foreign aid to some countries that turn around and establish a foreign aid program of their own to help other countries. Then when the American dollar goes from us to country A, the money ends up in country B, and later on we are going to hear about how country B in some cases is Vietnam.

Mr. ROUSSELOT. Madam Chairman, I urge my colleagues to vote for the amendment. It is a very reasonable and positive amendment, and it deserves our support.

Mr. HARRINGTON. Madam Chairman, I move to strike the requisite words.

Madam Chairman, I have no desire to provide the gentleman from California (Mr. ROUSSELOT) or his colleague, the gentleman from Florida (Mr. YOUNG) with a chance to turn this debate into a Panama Canal issue in the late spring of 1978.

Let us put this in perspective, if we can. We are dealing with a country with a population of 2.4 million people, we are dealing with a country with a budget under $70 million, we are dealing with a low per capita income, we are dealing with a country in which some of the most poignant, messy events dominate their affairs in the argument about what mankind is doing to mankind.

Let us put this in perspective. We are dealing with 2.4 million people, and the Peace Corps is making the best effort it can to help address their problems. I wish somehow, in addition to discussing these issues and emphasizing the sport we can have in talking about that coronation, we could spend an appreciable amount of time where it counts. I do not think this is where the action is; I do not think this is where it counts.

I appreciate the argument that has been made, but the amendment simply does not fit with the philosophy and purpose of the Peace Corps.

Madam Chairwoman, I yield back the balance of my time.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Florida (Mr. YOUNG).

The question was taken; and on a division (demanded by Mr. HARRINGTON) there were—ayes 17, noes 21.

Mr. YOUNG of Florida. Madam Chairman, I demand a recorded vote, and pending that, I make the point of order that a quorum is not present.

The CHAIRMAN. Evidently a quorum is not present.

The Chair announces that pursuant to clause 2, rule XXIII, she will vacate proceedings under the call when a quorum of the Committee appears.

Members will record their presence by electronic device.

The call was taken by electronic device.

QUORUM CALL VACATED

The CHAIRMAN. One hundred Members have appeared. A quorum of the Committee of the Whole is present. Pursuant to rule XXIII, clause 2, further proceedings under the call shall be considered as vacated.

The Committee will resume its business.

RECORDED VOTE

The pending business is the demand of the gentleman from Florida (Mr. YOUNG) for a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 169, noes 228, not voting 37, as follows:

[Roll No. 249]

AYES—169

Messrs. McKAY, LUKEN, MARTIN, and EVANS of Delaware changed their vote from "no" to "aye."

So the amendment was rejected.

The result of the vote was announced as above recorded.

AMENDMENT OFFERED BY MR. HARRINGTON

Mr. HARRINGTON. Madam Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. HARRINGTON: Page 2, line 7, strike out "$86,544,000" and insert in lieu thereof "$82,900,000".

Page 2, line 13, strike out "$1,069,000" and insert in lieu thereof "$1,000,000".

The CHAIRMAN. The question is on the amendment offered by the gentleman from Massachusetts (Mr. HARRINGTON).

The amendment was agreed to.

Mr. BURKE of Florida. Madam Chairman, I move to strike the requisite number of words.

Madam Chairman, I feel that my statement that I am opposing H.R. 11877 will probably fall on deaf ears, particularly in view of the vote on the Young amendment.

I would like to say, however, that frankly I think it is ridiculous for us to talk about what we are going to do to save the American dollar overseas and what we are going to do for our American economy and then decide to spend the amount of money we are spending on this Peace Corps program, which in my opinion has long outlived its usefulness.

It has been very difficult for me to stand before my own committee members, who almost unanimously support this program, along with many other Members on this floor, and make this statement. But I think we do have to wake up pretty soon and decide where we stand. The fact that this program at one time made good sense does not mean that it makes good sense today.

I filed opposing views in the report, and I found no members of the committee who supported those opposing views. I was interested in the supplemental views filed by several of my colleagues, most of whom I consider fellow conservatives. These Members said in their supplemental views, "At the outset let us say that the concept of the Peace Corps is a noble one." They should have said, "The concept of the Peace Corps was a noble one."

The Peace Corps was instituted by a martyred President, so it is extremely difficult to say that a bill like this, when we ask for authorization of appropriations at a time like this, should not be passed. Certainly this is a controversial program when we have a situation as we do, and it is difficult to say we should not continue this program in effect.

There is no reason in the world that we should presume now that there is going to be any change in the program from what it has been in the past. In fact, it has been mostly, in the main, ineffectual in many of the countries. It is true that there have been some countries which have stood up and said, "We like your programs, we think they are good." But I think that is an exception. It has not been the rule in the past, nor in the last ten years I have been here. Madam Chairman, I want to commend the attention of the Members to a very recent book by Kevin Lowther and C. Payne Lucas, called, "Keeping Kennedy's Promise: The Peace Corps, Unmet Hope of the New Frontier."

These gentlemen, former Peace Corps volunteers, ably depict and analyze the performance of the Peace Corps since its inception. While they want to improve the Peace Corps by upgrading the level of technical competency of the volunteers, they recognize the grave defects that have characterized the Peace Corps since its earliest and in its most recent days. At present, a Peace Corps volunteer costs about $16,000 a year, dividing the entire cost of the agency by the number of volunteers in the field. To have a corps of technically capable volunteers would probably be impossible, since most volunteers are generalists and liberal arts students with liberal arts backgrounds. Volunteer engineers, who are badly needed as technicians throughout the world, could not be obtained in today's competitive market, and it would be prohibitively impossible for this program to survive with engineers capable of handling the engineer projects which we are told the Peace Corps handles.

Let me just say that the obvious truth is that this program of the Peace Corps was fine in its inception, but I think the time has come when we ought to bury the Peace Corps. The Peace Corps no longer does what it was intended to do, and very often the volunteers do not even know to what extent their program is authorized, so far as they are concerned individually.

So I say to the Members that what we ought to do, instead of talking about a volunteer program—it is no longer a volunteer program, it is a program that is part of the taxpayers expense to the United States—is to return it back to a volunteer program to the church agencies, to the other agencies that handle programs such as this and did handle them prior to the Peace Corps.

I ask the Members, please let us not keep on funding program after program because it sounds terribly good and because we are afraid to face up to the fact that some of the programs that we fund today, including this one, should be buried.

The CHAIRMAN. Are there further amendments to the bill? If not, under the rule, the Committee rises.

Accordingly, the Committee rose; and the Speaker pro tempore (Mr. EVANS of Colorado) having assumed the chair, Mrs. BOGGS, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 11877) to authorize supplemental appropriations for fiscal year 1978, and to authorize appropriations for fiscal year 1979, for the Peace Corps, and to make certain changes in the Peace Corps Act, pursuant to House Resolution 1145, she reported the bill back to the House Committee of the Whole.

The SPEAKER pro tempore. Under the rule, the previous question is ordered.

The question is on the amendment.

The amendment was agreed to.

The SPEAKER pro tempore. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

The SPEAKER pro tempore. The question is on the passage of the bill.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. BAUMAN. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The vote was taken by electronic device, and there were—yeas 297, nays 102, not voting 35, as follows:

Mr. Moss with Mr. Fish.
Mrs. Burke of California with Mr. Cochran of Mississippi.
Mr. Mann with Mr. Mollohan.
Mr. Risenhoover with Mr. Madigan.
Mr. Eilberg with Mr. Holland.

So the bill was passed.

The result of the vote was announced as above recorded.

TITLE AMENDMENT

Mr. HARRINGTON. Mr. Speaker, I offer an amendment to the title.

The Clerk read as follows:

Amendment offered by Mr. HARRINGTON to the title: Amend the title so as to read: "A bill to authorize appropriations for fiscal year 1979 for the Peace Corps and to make certain changes in the Peace Corps Act."

The SPEAKER pro tempore. The question is on the amendment to the title offered by the gentleman from Massachusetts (Mr. HARRINGTON).

The amendment to the title was agreed to.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. HARRINGTON. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bill just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

REPORT ON RESOLUTION RELATING TO PROVIDING FOR THE EXPENSES OF INVESTIGATIONS AND STUDIES TO BE CONDUCTED BY COMMITTEE ON SCIENCE AND TECHNOLOGY

Mr. THOMPSON, from the Committee on House Administration, submitted a privileged report (Rept. No. 95–1086), on the resolution (H. Res. 1013) to provide for the expenses of investigations and studies to be conducted by the Committee on Science and Technology, which was referred to the House Calendar and ordered to be printed.

TO DISAPPROVE REORGANIZATION PLAN NO. 1 OF 1978

Mr. BROOKS. Mr. Speaker, pursuant to section 912 of Public Law 95–17, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the resolution (H. Res. 1049) to disapprove Reorganization Plan No. 1, transmitted by the President on February 23, 1978, and pending that motion, I ask unanimous consent that general debate on the resolution may continue not to exceed 1 hour, the time to be equally divided and controlled by the gentleman from New York (Mr. HORTON) and myself.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Texas (Mr. BROOKS).

The motion was agreed to.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of House Resolution 1049, with Mr. KILDEE in the chair.

The Clerk read the title of the resolution.

By unanimous consent, the first reading of the resolution was dispensed with.

The CHAIRMAN. Pursuant to section 912 of Public Law 95–17, and under the unanimous consent agreement, the gentleman from Texas (Mr. BROOKS) will be recognized for one-half hour, and the gentleman from New York (Mr. HORTON) will be recognized for one-half hour.

The Chair recognizes the gentleman from Texas (Mr. BROOKS).

Mr. BROOKS. Mr. Chairman, I yield myself 5 minutes.

Mr. Chairman, we have before us today President Carter's first reorganization plan of 1978 submitted to Congress on February 23.

The reorganization plan consolidates various equal employment programs of the Federal Government into the Equal Employment Opportunity Commission. The EEOC was created under the Civil Rights Act of 1964 to administer provisions of that act which require that all persons be given equal opportunity in employment regardless of race, sex, or national origin. The Commission's work heretofore has been primarily in the field of private industry. The reorganization plan will transfer into the Commission functions relating to equal employment opportunity in the Federal Government, and Federal employment of handicapped individuals, now carried out by the Civil Service Commission; and the administration of the Equal Pay Act which prohibits wage discrimination on the basis of sex and the Age Discrimination Act both presently in the Labor Department and the CSC. A total of approximately 417 positions and expenditures of $15.3 million will be involved.

The plan will transfer from the Equal Employment Opportunity Commission to the Attorney General of the United States functions relating to the initiation of litigation with respect to employment discrimination by State or local government. It will also abolish the Equal Employment Opportunity Coordinating Council.

The President has said that this plan will lay the foundation of a unified coherent Federal structure to combat

job discrimination; produce consistent agency standards and increased accountability. It will reduce overlap and duplication in regulation and enforcement procedures to a minimum thereby providing a major benefit to our business community.

During the hearings held by our Subcommittee on Legislation and National Security we questioned the administration witnesses closely on the capability of the EEOC to carry out its additional responsibility. I am satisfied that under the leadership of its new Chairman who has instituted a number of major reforms within the Commission that it will be able to adequately and properly perform these duties.

The plan was considered by the Committee on Government Operations and received unanimous support from our committee. It is our opinion that the plan meets the requirements of the Reorganization Act and will improve the administration of the programs to be carried out by the EEOC.

It is estimated by the Congressional Budget Office that the only significant cost to the Government as a result of the reorganization will be $1 to $2 million during fiscal year 1979 for the transfer of personnel.

House Resolution 1049 is the instrument by which we act upon the President's reorganization plan. Our recommendation to the House is that House Resolution 1049 be rejected since the resolution reads that the House does not favor Reorganization Plan No. 1 of 1978. A vote to support the plan will be a "no" vote on the resolution. Those who oppose the plan will vote "yes."

I urge that the Members vote "no" on the disapproval resolution and allow the President's reorganization plan to go into effect.

Mr. HORTON. Mr. Chairman, I yield myself 5 minutes.

Mr. BROWN of Ohio. Mr. Chairman, will the gentleman yield?

Mr. HORTON. I yield to the gentleman from Ohio.

Mr. BROWN of Ohio. I thank the gentleman for yielding.

Mr. Chairman, without much enthusiasm, I rise in opposition to the resolution of disapproval, and therefore, in favor of the reorganization plan.

Equal employment opportunity is a dream that America has promised its sons and daughters for generations, but never truly achieved. In the last 15 years, we in Congress have made great efforts to advance its cause by writing statute after statute and creating bureaucracy after bureacracy. Sometimes we have actually aided people whom we have intended to help. But on other occasions, we have only provided employment for more civil servants and lawyers. The present governmental structure for promoting and insuring equal employment opportunity is, to be blunt, a mess.

For several months last fall and winter, we heard that the President was about to propose a reorganization plan that would bring order out of this chaos and reinvigorate the Federal Government's commitment to EEO.

However, when the actual plan was announced, I was disappointed. What is before us today is beneficial in that it evinces Presidential interest in consolidating EEO law enforcement, and in that it begins to accomplish that consolidation. But the beginning is so small that it makes me wonder why so much hoopla surrounded its introduction.

I wonder, for example, why the Office of Federal Contract Compliance Programs (OFCCP) is not designated for inclusion in the EEOC. Because it is not Government contractors will continue to find themselves in a situation where their EEO practices could be blessed by the EEOC, but could be challenged in court by OFCCP. I wonder also why the Congress has not been asked to consolidate procedures governing discrimination complaints, as well as consolidating some of the programs for dealing with those complaints. Because the procedures remain diverse, EEOC may administer some programs now handled by the Labor Department, but they will have to follow procedures of labor law, rather than EEOC, in running those programs.

One portion of the reorganization plan seems counterproductive to me. That is the part dealing with resolution of Federal employees' discrimination claims. Under present law, these claims are resolved by the Civil Service Commission. Under the plan, they would still be adjudicated by the Civil Service Commission but, if the employee who had made the claim was dissatisfied with the CSC's determination, he could appeal it to the EEOC. The EEOC could then overrule the Civil Service Commission. In a "mixed case" involving questions of merit as well as discrimination. I question whether this new procedure would be legal, since it would permit the EEOC to order a remedy which could vitiate a ruling of the Civil Service agency on a matter governed by the Civil Service Act, none of whose authority is transferred by this plan. But even if legal, what is the sense of the new procedure? Two steps are never simpler than one. Additional legal complications will mean that Government employees will more frequently have to hire lawyers to plead their cases. And to those who wish to replace the Civil Service Commission as final arbiter of employees' EEO complaints on the ground that it may be partial to management, I ask, why is it more just to designate as final arbiter the EEOC, an agency which exists to promote the cause of a certain portion of labor?

Fortunately, the weaknesses of the plan can be corrected. The President and the Congress can both be spurred on by this first step to propose further consolidations in equal employment opportunity law enforcement. And the EEOC can, under the plan, delegate so much of the determination regarding Federal employees' EEO complaints back to the Civil Service Commission that rational resolution of those claims can be achieved.

I urge all Members to join with me in casting a vote for a beginning—and I emphasize beginning—toward better organization of the Federal Government's equal employment opportunity programs by supporting Reorganization Plan No. 1 and opposing the resolution of disapproval.

Mr. HORTON. Mr. Chairman, I rise in opposition to the resolution and in support of Reorganization Plan No. 1 of 1978.

Protecting American citizens' rights to equal employment opportunity is a valuable function of the Federal Government. We are not doing as good a job of performing that function as we could be doing, though. After listening to analyses of the situation first in my capacity as Chairman of the Commission on Federal Paperwork and later as ranking minority member of the Committee on Government Operations, I have become convinced of this: The Government's structure for enforcing EEO laws is so complex that it sometimes interferes with effective enforcement of those laws.

Eleanor Holmes Norton, the Chair of the Equal Employment Opportunity Commission, has made substantial improvements in the management and efficiency of her agency. Her reforms are highly commendable; they make our laws work better.

Ms. Norton and the EEOC cannot do the job alone, however. Enforcement of EEO laws is a responsibility spread throughout the Government, something in which many, many agencies are involved. Only a large-scale reform of the organization and procedures by which we enforce these laws can be expected to make any improvement.

Reorganization Plan No. 1 is a small, first step in the right direction. It addresses the problem in a fashion which is generally reasonable, if incomplete. On the whole, the governmental structure it proposes is better than the one we have. For that reason, I support the plan.

In the additional views which I have had printed in the Government Operations Committee's report on the resolution of disapproval, I listed four areas of concern I have with regard to the reorganization plan. I would like to take just a moment to mention them here.

First, the plan purports to "lay the foundation of a unified, coherent Federal structure to combat job discrimination in all its forms." Regrettably, the effort falls far short of its goal. In what is called a unified structure, untold numbers of agencies—the EEOC, the Office of Federal Contract Compliance Programs, the Department of Labor, the Department of Justice, the Civil Servic Commission, and all agencies administering grant programs—will retain responsibilities. Further reorganization—including some by legislation—is still needed.

Second, the plan maintains a distinction between Federal contractors and grantees with regard to supervision of EEO activities—the OFCCP will scrutinize the programs of contractors, and individuals granting agencies, under the general direction of the EEOC, will watch

over grantees. This artificial division, based solely on the legal instrument by which U.S. funds are received, disturbs me. It will create problems for institutions such as universities which receive Federal money from both sources. For these people, EEO compliance will be almost as difficult and confusing if the plan becomes law as if it does not.

Third, the plan vastly complicates the procedures by which Federal employees complaints of EEO law violations will be resolved. Under present law, a Federal employee who believes that he has been discriminated against for reasons of race, color, religion, sex, national origin, or age may seek the aid of the Civil Service Commission in righting his agency's treatment. Under the reorganization plan, if the employee is dissatisfied with the decision of the Civil Service, he could appeal still further—to the Equal Employment Opportunity Commission. This two step procedure appears to considerably complicate the current system.

Fourth, the plan assigns to the EEOC the function of coordinating the activities of other Federal agencies in the EEO field but does nothing to alter each of those agencies' preeminence in its own part of the area. EEOC should exercise its authority by truly coordinating, rather than directing, agencies of equal or higher rank which have complementary functions in enforcing various EEO laws.

All told, Mr. Chairman, Reorganization Plan No. 1 has some faults, but it also makes some useful changes in equal employment law enforcement. On balance, it merits our approval.

Mr. WALKER. Mr. Chairman, will the gentlemen yield?

Mr. HORTON. I yield to the gentleman from Pennsylvania.

Mr. WALKER. Mr. Chairman, I would iike to associate myself with the gentleman's remarks supporting the reorganization plan and the disapproval of the resolution.

Mr. HORTON. In other words, what the gentleman is saying the gentleman is for the reorganization plan.

Mr. WALKER. I am for the reorganization plan.

I would like to make one point that was brought out in the hearings and ask the gentleman to confirm this, that there is nothing in this reorganization plan that will result in the adoption of a quota system with regard to affirmative action programs under the resolution; is that correct?

Mr. HORTON. Mr. Chairman, the gentleman is quite accurate in the statement he made. That question was specifically asked, and it was specifically answered by the witnesses on the part of the administration that no quota system would be involved in this plan.

Mr. WALKER. Mr. Chairman, I thank the gentleman.

Mr. BROOKS. Mr. Chairman, I yield 3 minutes to the gentleman from Missouri (Mr. CLAY).

Mr. CLAY. Mr. Chairman, I rise in strong support of reorganization plan No. 1 of 1978 and in opposition to the resolution of disapproval. My involvement personally, and the involvement of the Congressional Black Caucus in bringing about reorganization of the Federal equal employment opportunity agencies dates to the end of 1976 when the caucus met with President-elect Carter and agreed to present him with our recommendations for EEO reorganization.

We continued to work closely with the administration, presenting our proposal in February 1977 and convening a meeting of major civil rights and women's organizations last summer provided the President without joint views on the reorganization.

I am pleased to say that reorganization plan No. 1 of 1978 embodies the major elements of the caucus' recommendations and of the other major organizations with which we worked.

The plan will strengthen the Equal Employment Opportunity Commission which, until the past year had been weak and ineffective. The combination of the strengthened authority given EEOC and the dynamic leadership of the new chair, Eleanor Holmes Norton, will I believe, result in major advances in the fight against employment discrimination.

The statistics on progress made recently by the Equal Employment Opportunity Commission are impressive. New case processing procedures are presently being implemented and will be completed by the end of the fourth quarter of this year. The backlog which had only been talked about in the past, is now being reduced at a rate of 4 percent each month, and 73 percent of new charges are resolved in 4 months or less.

I would like to point, particularly, to the importance of including Civil Service Commission EEO functions within the Equal Employment Opportunity Commission. The Federal Government has, itself, been a prime offender with respect to equal employment opportunity, and it has been clear that the body which administers the Federal civil service system is not the best agency to enforce the EEO laws. There is an inherent conflict in having the civil service system investigate itself on discrimination charges. Equal Employment Opportunity Commission will best be able to fulfill that function.

I am pleased that there has been no major opposition to this reorganization plan. Support has come from groups ranging from the NAACP to the National Women's Political Caucus to the Leadership Conference on Civil Rights and to Women's Legal Defense Fund.

We have suffered too many years of neglect of our civil rights laws. The recent press articles commemorating 10 years since the death of Dr. Martin Luther King all pointed out how far black Americans still have to go in attaining true equality. This Congress, working closely with the administration, can reinvigorate and revitalize the civil rights law enforcement process, and can send a message that this Nation will no longer tolerate discrimination against any group of its citizens.

Mr. HORTON. Mr. Chairman, I yield 5 minutes to the gentleman from Washington (Mr. PRITCHARD).

Mr. PRITCHARD. Mr. Chairman, I have a keen interest in restructuring our civil rights enforcement system to better carry out the intent of our civil rights laws. On October 28, 1977, 32 other Members of Congress and I introduced H.R. 9804—the Civil Rights Act of 1977. The purpose of our bill was to make more uniform and efficient the coverage provided by existing civil rights statutes.

While we continue to believe that the measures provided in our bill would most effectively and comprehensively achieve that purpose, we recognize that the more limited plan proposed by the President is not likely to be disapproved by the Congress. Because our primary concern remains the revitalization of an ailing system of civil rights enforcement, we have examined the President's plan in terms of what its effect will be upon complainants and regulated organizations. While we support the plan, we have concluded that standing alone, it does not adequately address the problems posed by the current fragmented and overlapping system of civil rights enforcement.

If the Equal Employment Opportunity Commission is to be given expanded jurisdiction, as provided in the reorganization plan, we feel the Congress needs to take additional action to correct the following problems:

First. The plan only begins to address the diffused, overlapping system of equal employment opportunity enforcement.

Duplicative enforcement of the more than 30 non-discrimination grant provisions would be totally unaffected by the plan. What does this omission mean for regulated organizations?

Twenty-one overlapping EEO provisions applicable to State and local governments would continue to present duplicative requirements.

Nine overlapping EEO provisions for institutions of higher education would be unaffected by the plan.

Eight duplicative provisions affecting business organizations would perpetuate inconsistent requirements.

In addition, the Civil Service Commission as well as EEOC would have jurisdiction over State employment practices. And the Department of Labor and the EEOC would share enforcement of nondiscrimination provisions affecting Federal contractors. Elimination of these needless overlaps must be a top priority of the Congress.

Second. EEOC's efforts to administer effectively laws placed under its authority by the plan will be hampered by statutory inconsistencies that can be remedied only by legislation.

Many statutorily based provisions of existing law that would be enforced by EEOC are incompatible. These inconsistencies would not be remedied by the President's plan and would continue to plague both employee and employers. These inconsistencies include:

Administrative procedures involving complaint handling.

Coverage provisions.

Authority to issue regulations.

Sanctions—both for civil and criminal offenses.

For example, while a complainant is entitled to only injunctive relief and backpay under title VII, under both the Age Discrimination Act and the Equal

Pay Act, the same complainant might be awarded double damages.

Another illustration: An employer with 17 employees would be subject to regulation by the provisions of the Equal Pay Act and title VII, but not the Age Discrimination Act.

Clearly, these conflicting provisions must be made consistent if we are to truly coordinate civil rights enforcement and produce a uniform, easily understood system of standards and procedures.

Third. Reorganization plan No. 1 deals only with employment discrimination and leaves unaffected massive duplication, overlap, and inconsistencies under numerous general civil rights provisions which include both service delivery aspects and employment.

The Congress must assist the President in completing a job only just begun by his reorganization plan No. 1. My colleagues and I are working on a bill that would substantially increase the effectiveness of the consolidation proposed in the plan. The bill would:

Create a single set of administrative and procedural requirements for the three non-Federal government EEO programs now under EEOC jurisdiction—that is, title VII of the Civil Rights Act of 1964, the Equal Pay Act, and the Age Discrimination Act of 1967.

Eliminate "substantive inconsistencies" among the acts which would create unjust differences in the protection afforded racial and religious minorities (covered only by title VII), and the aged population (covered only by the Age Discrimination Act), and women (covered by title VII and the Equal Pay Act but not the Age Discrimination Act).

Alter the role and operation of EEOC to make the commission more efficient, less burdensome to regulated organizations and complainants, and more responsive to overall policy direction of the President and the Attorney General.

I would be greatly disappointed if this plan represents the end of the line for reorganization, and I look forward to working with my colleagues to create a civil rights enforcement system worthy of our important civil rights laws.

Mr. BROOKS. Mr. Chairman, I yield 3 minutes to the gentleman from Pennsylvania (Mr. DENT).

Mr. DENT. Mr. Chairman, I am awfully sorry that because of time constraints, with so many committees, we never have enough Members on the floor to consider really important legislation. The AFL–CIO recently advised me on what is happening in the President's reorganization proposal. They asked me to vote against the 1978 Reorganization Plan No. 1. The President proposes to move the enforcement of the Equal Pay Act out of the Labor Department and into the EEOC. This historical act has been separately administered since 1963 by the Department of Labor without any major criticism. If we pass this resolution with a "no" vote—which is another peculiar way to have to vote—we are tying the equal pay law to equal opportunities. Equal opportunities legislation was passed for the simple purpose of making sure that discrimination was not practiced in employment. But equal pay for equal work is a fundamental labor law covering all spectrums of labor, regardless of age, color, creed, or any other distinction.

Mr. Speaker, the Congress in 1963 rejected this very proposal because it was felt that the Labor Department was better suited to enforce the equal pay provisions. Since then the Wage and Hour Division has enforced the Equal Pay Act with vigor and effectiveness. It makes no sense, after 14 years of success, to now abandon something that has worked well.

I voted and worked for equal opportunities legislation. But for the last 20 years I have also been responsible for holding safe and sound the Fair Labor Standards Act, which is the Magna Carta of unorganized labor.

I say we should not pass legislation without the consideration of the whole House present to hear long and able debate on the matter.

Mr. Chairman, the AFL–CIO and I urge the House of Representatives to reject Reorganization Plan No. 1 of 1978 in its present form. We are opposed to moving the enforcement of the Equal Pay Act (EPA) and the Age Discrimination in Employment Act (ADEA) to the Equal Opportunity Commission, as the plan provides.

We view both the Equal Pay Act and the Age Discrimination in Employment Act as labor standards legislation, designed to protect the interests of workers, particularly low wage workers.

These acts are currently administered by the Department of Labor and, in our view, the Department of Labor has done an efficient job in interpreting these statutes and an effective job in enforcing them in the private sector.

We do not believe that there is any significant overlap between title VII of the Equal Employment Opporttunity Act and the Equal Pay Act, although both prohibit wage discrimination based on sex. In our view, the guarantee of equal pay is a basic protection for the worker similar to the minimum wage or the hours-worked standard in the Fair Labor Standards Act (FLSA).

We note that the Congress took a similar view with respect to EPA when that law was passed in 1963. The legislative history clearly shows that the Congress enacted the Equal Pay Act only after it was incorporated into the FLSA, and primarily because the measure was viewed as labor standards legislation.

There was a consensus at that time that the expertise developed by the Wage-Hour Division of the Department of Labor since 1938 in enforcing the FLSA was directly transferable to implementing the EPA. The rationale expressed by the Congress is even more valid today than it was in 1963, when the law was enacted. Since June 1964, when the EPA went into effect, the Department of Labor has administered and enforced the Equal Pay Act with vigor. The Wage and Hour Division has about 1,000 investigators, all of whom have received training in the Equal Pay Act along with their training in all other aspects of the FLSA. Most investigators have had experience in investigating equal pay violations. All 60,000 investigations completed in a year by the Wage-Hour Division include a routine check for equal pay violations. It is our view that a significant number of equal pay violations will go undetected if this program were moved to EEOC. We are convinced that moving the program to EEOC would not transfer the 14 years of expertise to that agency and that the workers will be the losers.

Most of the arguments for retaining EPA in the Department of Labor apply equally to retaining ADEA. While the ADEA is not an integral part of the FLSA the Congress clearly established the interrelationship of the two statutes and the enforcement techniques of the FLSA were actually incorporated into the ADEA. This has resulted in utilizing the proven talents of the Department of Labor in administering and enforcing ADEA.

The close link between the ADEA and the FLSA was cited in a February 22, 1978, Supreme Court decision in which the Court ruled 8 to 0 that when an employee sues for lost wages under the 1967 Age Discrimination in Employment Act, either party to the suit may demand a jury trial. Justice Marshall, speaking for the Court, stated, in part:

> Looking first to the procedural provisions of the statute, we find a significant indication of Congress' intent in its direction that the ADEA be enforced in accordance with the "powers, remedies and procedures" of the FLSA.

This month the President signed the Age Discrimination in Employment Act Amendments of 1978. There is no evidence in the language of these amendments that the Congress intended that enforcement of this act, as amended, would not be retained by the Secretary of Labor.

The Department of Labor has established an impressive record in administering these statutes and we question the wisdom of upsetting a well-run operation. We believe the priorities currently given to sex- and age-based discrimination by the Department of Labor will be diluted in the move to EEOC.

Mr. BROOKS. Mr. Chairman, I yield 3 minutes to the gentleman from Maryland (Mr. MITCHELL).

Mr. MITCHELL of Maryland. Mr. Chairman, I rise in opposition to House Resolution 1049. This resolution disapproves Reorganization Plan No. 1 of 1978, which consolidates into the Equal Employment Opportunity Commission a number of equal employment enforcement activities being carried out elsewhere in the executive branch.

The Reorganization Plan No. 1 provides structural and procedural reforms which are desperately needed to strengthen the effectiveness of the Commission to be the instrument for eliminating discrimination that the Congress had intended it to be. In 1972, the Congress had intended for the Equal Employment Commission to integrate litigation powers within the preexisting investigative and conciliation functions of the agency to overcome a much criticized dual agency structure where investigators worked at cross pur-

poses with lawyers instead of in partnership.

However, the Reorganization Plan No. 1 does much more than simply provide a structure. It also designates the EEOC as suitable for the role of the principal Federal agency for fair employment enforcement.

The President, in his message transmitting the plan, informed Congress that the transfer of the Civil Service Commission's equal employment opportunity responsibilities to the EEOC is needed to insure that: First, Federal employees have the same rights and remedies as those in the private sector and in State and local government; second, Federal agencies meet the same standards as are required of other employers; and third, potential conflicts between an agency's equal employment opportunity and personnel management functions are minimized. The Federal Government must not fall below the standards of performance it expects from private employers.

The Civil Service Commission has in the past been lethargic in enforcing fair employment requirements within the Federal Government. While the Chairman and other Commissioners which have been appointed have already demonstrated their personal commitments to expanding equal employment opportunity, responsibility for insuring fair employment for Federal employees should rest ultimately with the EEOC.

Eleanor Holmes Norton, chairperson of the Equal Employment Opportunity Commission, informed the House Government Operations Committee on March 2, 1978 that the Commission will insure that full attention will be given to new jurisdictions. The Commission intends to administer new programs as functional units of a total enforcement effort. Organizational identity will be given to programs both in the field and headquarters structure.

Norton emphasized that the clear lesson of the past decade's experience is that a coherent, Federal job discrimination program requires focus in a single agency. A consolidation of equal employment efforts in one agency creates a focal point to which employers and individuals can look for standards, guidance and information. And with one agency responsible for an effective, cohesive Federal program, accountability to the public will be assured.

Primary implementation will be through: First, the authority of the coordinating council; second, the responsibilities of the Civil Service Commission for Federal employees; and third, the Department of Labor's responsibilities for age discrimination and equal pay in the private sector. A word about each:

A. COORDINATING COUNCIL

The Commission is the only Federal agency whose sole mission is the furtherance of equal employment opportunity. As such, it is the natural home for the responsibilities of the Equal Employment Opportunity Coordination Council.

B. JURISDICTION OVER FEDERAL EMPLOYEES

When the Equal Employment Opportunity Act of 1972 was passed, both the EEOC and the Civil Service Commission were charged with new responsibilities. The EEOC was given jurisdiction over charges of employment discrimination in the private sector of the economy, plus jurisdiction over changes from State and local government employees. Jurisdiction for Federal Government employee charges was given to the Civil Service Commission. The separate enforcement paths taken by the two agencies led to differing compliance standards and to differences in the burdens imposed on individuals charging employment discrimination. The transfer encompasses the authority the Civil Service Commission now exercises under the Equal Pay Act and the Age Discrimination In Employment Act as they apply to Federal employees, and the Rehabilitation Act provisions applicable to Federal employees.

C. EQUAL PAY AND AGE DISCRIMINATION

The shift in responsibility from the Department of Labor's wage and hours division to the EEOC is not scheduled under the reorganization plan until July 1, 1979. The shift is highly logical. In substance, both acts overlap title VII. Virtually any violation of the Equal Pay Act is also a violation of title VII.

Similarities in substance promise to make administration of the three acts a true tandem operation.

The reorganization plan No. 1 of 1978 is not the end, but the beginning to enforce the laws which we in Congress pass to protect the rights of equality for our Nation's citizens. This plan will eliminate a substantial amount of the bureaucratic maze to which many of our constituents are continually subjected by consolidating the functions of various agencies under one roof—EEOC.

I therefore urge my colleagues to vote in opposition to House Resolution 1049, which disapproves the reorganization plan No. 1 of 1978 to the Equal Employment Opportunity Commission.

Mr. BROOKS. Mr. Chairman, I yield such time as he may consume to the gentleman from Oklahoma (Mr. JONES).

Mr. JONES of Oklahoma. Mr. Chairman, I thank the distinguished chairman of the committee for yielding.

I would like to ask the chairman this question: I have looked at the reorganization proposal, and may I say that I looked at the Labor Department personnel within my own congressional district and found that these personnel were highly qualified and experienced to deal with the Equal Pay Act and the Age Discrimination Act.

Mr. Chairman, I would hope that this reorganization would give these people who have the experience and the ability to deal in this area the opportunity to be folded into the newly reorganized EEOC.

Is this generally the intent and hope of the chairman of this committee?

Mr. BROOKS. If the gentleman will yield, Mr. Chairman, I would say to my distinguished friend, the gentleman from Oklahoma (Mr. JONES), that it is the intention of the administration, as I understand it, that all of the 198 positions in the Labor Department that will be transferred will have an opportunity to transfer at their own discretion.

Mr. JONES of Oklahoma. I thank the chairman for yielding, and I congratulate him for bringing this bill to the floor.

● Mr. HAWKINS. Mr. Chairman, I rise in support of President Carter's reorganization of equal employment opportunity programs and to disapprove House Resolution 1049.

The President's EEO reorganization plan provides a sound and orderly basis for reducing overlap, duplication and inconsistency in EEO enforcement. Even more significantly, by consolidating resources and functions it should lead to stronger enforcement efforts of equal employment opportunity throughout this great Nation.

Reorganization alone will not resolve all problems of EEO enforcement. Strong leadership and a commitment by this administration to vigorously enforce all the tools to end employment discrimination are essential. Moreover, the Congress must provide the resources and the support necessary to carry out these functions. A large part of the President's reorganization plan mirrors the findings and recommendations of the Subcommittee on Employment Opportunities, December 1976 Report on its Oversight of Federal EEO Enforcement, which, among other things, found:

Major restructuring of Federal equal employment opportunity efforts to bring about consistency, increased efficiency and more effective enforcement will, of course, require statutory changes. The subcommittee believes that such changes are both necessary and timely. Arguments for retaining a many-headed enforcement structure proposed during consideration of the Equal Employment Opportunity Act of 1972 have proven false, and the current structure is both cumbersome and ineffective. Needed changes to present law include the following: consolidating equal employment opportunity enforcement authority in the Equal Employment Opportunity Commission.

Establishing EEOC as the authority for promulgating equal employment opportunity regulations and extending coverage of title VII to include discrimination on the basis of age and handicapped, and expanding jurisdiction to include employers of legislative and judicial branches and uniformed military employees.

Specifically, the subcommittee found that:

The EEOC has been the most progressive of the three major equal employment enforcement agencies in setting policy, interpreting title VII, the EEOC's role in the *Griggs* v. *Duke Power Company*, 401 U.S. 424 (1971) and other Landmark cases, have contributed immeasurably to an understanding of discriminatory impact that has reshaped employment practices and benefited countless thousands of minorities and women.

Moreover, the Commission has consistently taken positions in the development of guidelines for employee selection, back-pay, pregnancy and other employment factors which have had a far-reaching impact on employment practices and which have established the EEOC as the lead agency in defining employment discrimination.

Overall, the Subcommittee found that the Civil Service Commission has failed in its responsibility under Section 717 to eliminate employment discrimination as it impacts upon affected classes in the Federal Government.

The Commission had not made agencies accountable for the irradication of employment discrimination in all of its forms. It has not sufficiently asserted its authority to issue rules, regulations, orders, and instructions to agencies in the institution of affirmative programs of equal employment opportunity. Such Federal programs reflect a passive, non-discrimination interpretation of section 717 oriented toward complaint processing, yet the complaint process itself is biased against the complainant. Federal EEO programs are not structured to remedy the effects of systemic discrimination through affirmative action. In addition, there is an apparent unwillingness among Federal officials to develop effective methods of identifying discriminatory employment patterns and practices.

Executive Order 11246 issued in 1965 and amended in 1967 and 1968 by President Lyndon B. Johnson, prohibits employment discrimination by federal contractors and subcontractors on the basis of race, color, religion, sex, or national origin. This order places responsibility for administration and enforcement of the Federal Contract Compliance Program in the Department of Labor and provides sanctions against noncomplying contractors. Federal contractors or subcontractors who fail to comply with the nondiscrimination provisions of the Order or its regulations are subject to contract cancellation, termination, or suspension in whole or in part, and the contractor may be declared ineligible for further government contracts.

The Secretary of Labor has delegated this authority for overall administration for the Contract Compliance Program to the Office of Federal Contract Compliance Programs within the Department of Labor. Primary responsibility for compliance with the Executive Order rests with sixteen compliance agencies designated by the Director of OFCCP.

The threat of withholding Federal contracts from companies that discriminate against minority and female workers should constitute the Federal Government's most effective weapon in the civil rights arsenal. In fact, the failure of the Department of Labor and the compliance agencies to effectively administer and enforce the Executive Order has led to the program being called a "comic foam-rubber club", rather than the "stiffest civil rights stick."

The Department of Labor has made technical conformity with complex and cumbersome regulations a greater priority than meaningful progress in employment of minorities and women. The Contract Compliance Program is spread out over 17 federal agencies with a resulting lack of conformity in enforcement. OFCCP has been given neither the status nor the resources to adequately monitor the compliance agencies or effectively enforce the Executive Order.

The Equal Employment Opportunity Coordinating Council was established by section 715 of the Equal Employment Opportunity Act of 1972, which amended title VII of the Civil Rights Act of 1964. The Council is composed of the Secretary of Labor, the Chairman of the Equal Employment Opportunity Commission, the U.S. Attorney General, the Chairman of the U.S. Civil Service Commission and the Chairman of the U.S. Commission on Civil Rights.

The Coordinating Council has been used to forestall basic structural and administrative changes that would improve enforcement. Existence of the Coordinating Council has prevented consolidation of enforcement activities. The subcommittee will continue its oversight activities and will offer all assistance and cooperation to facilitate the smooth and orderly operation of President Carter's reorganization plan.

The President's plan provides:

Responsibility for enforcing the Equal Pay Act and Age Discrimination in Employment Act, and the authority to issue equal employment opportunity for Federal employees would be transferred to the EEOC. Responsibility to coordinate equal employment programs that reside in the agencies other than the EEOC also would be assigned to the EEOC, and the Equal Employment Opportunity Coordinating Council would be disbanded, and its duties transferred to the EEOC. All contract compliance activities initially would be centralized in the Department of Labor.

The reorganization plan defers until 1981 the decision whether to transfer the contract compliance program now administered by the Office of Federal Contract Compliance Programs in the Department of Labor to EEOC.

While the EEOC has demonstrated remarkable improvement in management and enforcement capability over the past year, consolidation of all EEO functions in the EEOC might well prove a back-breaking burden, overwhelming the significant progress which is being made in that agency. The delay of further consolidation decision until January 1981 will serve as a proving time for both OFCCP and EEOC.

I support the proposed plan's transfer of authority for EEO enforcement for Federal employees to the EEOC. Our own subcommittee findings concur with the OMB criticism that "Equal employment opportunity and affirmative action have not been pursued vigorously or administered effectively in Federal departments and agencies."

Transferring responsibility to EEOC for Federal complaints will give Federal employees the same rights and remedies as private employees and employees of State and local governments. I also support the plan's retention of civil service responsibility to develop personnel policies that will insure agency compliance with title VII.●

● Mrs. COLLINS of Illinois. Mr. Chairman, I rise in opposition to House Resolution 1049, to disapprove Reorganization Plan No. 1 of 1978.

Reorganization Plan No. 1 would reorganize the Federal Government's equal employment opportunity programs by consolidating in the Equal Employment Opportunity Commission a number of activities being carried out elsewhere in the executive branch. This reform is urgently needed if we are to end the fragmentation of authority which currently hinders the effective enforcement of Federal prohibitions against discrimination based on race, national origin, sex, age, or religion.

Mr. Chairman, there are today 18 different departments and agencies responsible for enforcing the provisions of the Civil Rights, Equal Employment Opportunity, Equal Pay, Age Discrimination and Rehabilitation Acts. As a result, the executive branch lacks a unified and coherent structure to combat job discrimination, produce consistent agency standards and accountability. For example, Federal employees do not, under current law, have recourse to the EEOC, but must file complaints of discrimination with their own agencies, and ultimately, appeal their case to the Civil Service Commission. However, it is widely acknowledged that the Civil Service Commission has been less than enthusiastic in enforcing fair employment requirements within the Federal Government. As a result, the percentage of minorities and women in all grade levels has remained relatively constant over the last several years, and remain largely concentrated in the lower paying jobs.

To remedy this situation, Reorganization Plan No. 1 would transfer the Civil Service Commission's equal employment opportunity responsibilities to the EEOC. This would insure that Federal employees have the same rights and remedies as those in the private sector and in State and local governments.

Another problem with current practice is the duplication of functions performed by the Equal Employment Opportunity Commission and the Department of Labor in the administration of the Equal Pay and Age Discrimination in Employment Acts. From the point of view of employees, it is necessary to utilize both the procedures of the EEOC and the Department of Labor in order to file a complaint. Therefore the employer must deal with two different Federal agencies and must often comply with different standards and procedures. To resolve these conflicts the Reorganization Plan transfers from the Department of Labor to the EEOC the administration of both the Equal Pay Act and the Age Discrimination in Employment Act.

Finally, the reorganization plan clarifies the authority of the Attorney General to enforce equal employment practices against State and local governments, specifically with respect to the right to file pattern and practice suits. In all other respects, the plan makes the EEOC the principal Federal agency in equal employment enforcement. This is as it should be, considering the expertise that the EEOC has developed in the field of employment discrimination since its creation by the Congress in 1964.

I urge my colleagues to join me in opposition to the resolution to disapprove House Resolution 1049.●

● Mr. GARCIA. Mr. Chairman, I rise in opposition to House Resolution 1049, the resolution which would disapprove the President's Reorganization Plan No. 1, the reorganization of the Equal Employment Opportunity Commission.

One of the least efficient and effective parts of the Government is supposed to be the most effective—and certainly has the potential for being one of the most important. The Equal Employment Opportunity Commission was organized to put an end to discrimination of all kinds in hiring and unemployment. Unfortu-

nately, not only has EEOC been hampered by inadequate staffing, a stunning backlog of cases, and until the outstanding leadership being now provided by my fellow New Yorker, Eleanor Holmes Norton, a really take charge leadership, but it has been crippled by limited jurisdiction. At the same time, enforcement efforts in other agencies, like the Civil Service Commission and the Labor Department have been equally weak.

It is time, finally, to put our action where our legislation is. By consolidating the scattered antidiscrimination functions into the agency where they belong, by charging one agency—and the most logical one may I add—with the responsibility of getting this very, very important aspect of Government operations really functioning, we will finally be on the track toward proper and tough enforcement of the good civil rights laws now on the books.●

Mr. EDWARDS of California. Mr. Chairman, I support the President's Reorganization Plan No. 1 because I believe it is a signal to all concerned of a Federal effort to provide leadership and direction by example rather than by pronouncement.

The consolidation of employment discrimination functions in one agency is not only appropriate but necessary.

The Judiciary Subcommittee on Civil and Constitutional Rights has held numerous hearings regarding the underrepresentation of women and minorities in key professional positions within the Federal Government. Only recently we received testimony from the General Accounting Office—GAO—regarding equal employment opportunities within two Justice Department Bureaus. The finding in both bureaus—Immigration and Naturalization Service and the Drug Enforcement Agency—was that women and minorities are concentrated in the lower level position. This information is particularly disturbing because the key professional jobs from which these groups are being excluded are the very ones needed to qualify for the supervisory and administrative policymaking positions higher up within the Justice Department.

One of the reasons for the lack of progress in equal employment opportunities within the Department appears to be a less than vigorous enforcement effort by the Civil Service Commission.

Transfer of these functions to the EEOC, an agency which has developed experience and expertise in this area, should set the stage for significant increase in equal employment opportunities for women and minorities within the Federal Government.

As the President stated in his message transmitting this plan—

(T)he Federal Government must not fall below the standard of performance it expects of private employers.

Mr. BROOKS. Mr. Chairman, I have no further requests for time.

Mr. HORTON. Mr. Chairman, I have no requests for time.

The CHAIRMAN. The Clerk will report the resolution.

The Clerk read the resolution, as follows:

H. RES. 1049

Resolved, That the House of Representatives does not favor the Reorganization Plan Numbered 1 transmitted to the Congress by the President on February 23, 1978.

Mr. BROOKS. Mr. Chairman, I move that the Committee do now rise and report the resolution back to the House, with the recommendation that the resolution be not agreed to.

The motion was agreed to.

Accordingly the Committee rose; and the Speaker having resumed the chair, Mr. KILDEE, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the resolution (H. Res. 1049) to disapprove Reorganization Plan Numbered 1 transmitted by the President on February 23, 1978, had directed him to report the resolution back to the House, with the recommendation that the resolution be not agreed to.

The Clerk read the resolution.

The SPEAKER. Without objection, the previous question is ordered on the resolution.

There was no objection.

The SPEAKER. The question is on the resolution.

The question was taken; and the Speaker announced that the noes appeared to have it.

Mr. HORTON. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 39, nays 356, not voting 39, as follows:

NOT VOTING—39

Ammerman	Howard	Runnels
Andrews, N.C.	Jones, N.C.	Ruppe
Baucus	Kazen	Russo
Burke, Calif.	Krueger	Santini
Cochran	McCormack	Sarasin
Conyers	Mann	Stockman
Derwinski	Mollohan	Teague
Eilberg	Moss	Thone
English	Nix	Thornton
Fish	Pursell	Tucker
Florio	Risenhoover	Waxman
Frey	Roberts	Whitley
Gammage	Rodino	Young, Tex.

The Clerk announced the following pairs:

Mr. Rodino with Mr. Cochran of Mississippi.
Mr. Roberts with Mr. Andrews of North Carolina.
Mr. Risenhoover with Mr. Thone.
Mr. Santini with Mr. Conyers.
Mr. Waxman with Mr. Derwinski.
Mr. Russo with Mr. Tucker.
Mr. Kazen with Mr. Sarasin.
Mr. Gammage with Mr. English.
Mr. McCormack with Mr. Ammerman.
Mr. Eilberg with Mr. Teague.
Mr. Baucus with Mr. Ruppe.
Mr. Mann with Mr. Florio.
Mr. Thornton with Mr. Fish.
Mr. Whitley with Mr. Stockman.
Mr. Jones of North Carolina with Mr. Moss.
Mr. Howard with Mr. Nix.
Mrs. Burke of California with Mr. Pursell.
Mr. Krueger with Mr. Mollohan.
Mr. Runnels with Mr. Frey.

Messrs. GONZALEZ, MARKS, and BURKE of Massachusetts changed their vote from "yea" to "nay."

Mr. KELLY and Mr. MARLENEE changed their vote from "nay" to "yea."

So the resolution was rejected.

The result of the vote was announced as above recorded.

GENERAL LEAVE

Mr. BROOKS. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks, and to include extraneous material, on the resolution just considered.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

HOUR OF MEETING TOMORROW

Mr. WRIGHT. Mr. Speaker, I ask unanimous consent that when the House adjourn today it adjourn to meet at 2 o'clock p.m., rather than 3 o'clock p.m. tomorrow.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

PROVIDING FOR CONSIDERATION OF H.R. 11832, ARMS CONTROL AND DISARMAMENT AGENCY AUTHORIZATIONS

Mr. MURPHY of Illinois. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 1144 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 1144

Resolved, That upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 11832) to authorize appropriations for fiscal year 1979 under the Arms Control and Disarmament Act. After general debate, which shall be confined to the bill and shall continue not to exceed one hour, to be equally divided and controlled by the chairman and ranking minority member of the Committee on International Relations, the bill shall be read for amendment under the five-minute rule. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and the previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit.

The SPEAKER. The gentleman from Illinois (Mr. MURPHY) is recognized for 1 hour.

Mr. MURPHY of Illinois. Mr. Speaker, I yield the usual 30 minutes for the minority to the distinguished gentleman from California (Mr. DEL CLAWSON); pending that I yield myself such time as I may consume.

Mr. Speaker, House Resolution 1144 provides for an open rule with 1 hour of general debate on H.R. 11832.

This bill authorizes an appropriation of $18,395,000 to fund the Arms Control and Disarmament Agency's operations for fiscal year 1979. This is $2 million more than the amount requested by the Agency. Half of this increase will be used to support the nuclear safeguards programs of the International Atomic Energy Agency, an increase which the committee found to be in the national security interest of the United States. The other $1 million is provided to cover projected increases in the cost of the SALT negotiations caused by the recent devaluation of the dollar, as well as similar cost increases which may confront other negotiations in Europe such as mutual and balanced force reductions and the conference of the committee on disarmament.

Mr. Speaker, I urge the adoption of House Resolution 1144 in order that H.R. 11832 may be considered.

Mr. DEL CLAWSON. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, as has been stated, House Resolution 1144 provides for the consideration of H.R. 11832, which authorizes appropriations for 1979 under the Arms Control and Disarmament Act. One hour of general debate is to be equally divided and controlled by the chairman and ranking minority member of the Committee on International Relations. The bill will then be open to all germane amendments under the 5-minute rule. At the conclusion of consideration, one motion to recommit is made in order. No waivers are contained in the rule.

Mr. Speaker, H.R. 11832 authorizes $18.3 million to the Arms Control and Disarmament Agency. The ACDA participates in a variety of arms control negotiations and assists in formulation of U.S. arms control policy. Some of its primary concerns are nuclear nonproliferation, the United Nations Special Session on Disarmament, and the SALT negotiations.

Some reservations have been expressed that the Agency has allowed too many concessions to the Soviet Union. It is always hoped that the Agency be more responsive to these concerns. Nevertheless, the purpose and intent of the ACDA is laudable.

Mr. Speaker, I know of no opposition to the rule.

Mr. MURPHY of Illinois. Mr. Speaker, I have no requests for time, and I move the previous question on the resolution.

The previous question was ordered.

The resolution was agreed to.

A motion to reconsider was laid on the table.

DENOUNCING GOVERNMENT OF CAMBODIA FOR ITS DISREGARD OF BASIC HUMAN RIGHTS

Mr. ZABLOCKI. Mr. Speaker, I ask unanimous consent that the Committee on International Relations be discharged from further consideration of the concurrent resolution (H. Con. Res. 573) denouncing the Government of Cambodia for its disregard of basic human rights, and ask for its immediate consideration in the House.

The Clerk read the title of the concurrent resolution.

The SPEAKER. Is there objection to the request of the gentleman from Wisconsin?

Mr. ROUSSELOT. Mr. Speaker, reserving the right to object, can the chairman of the committee explain briefly what this concurrent resolution is about?

Mr. ZABLOCKI. Mr. Speaker, will the gentleman yield?

Mr. ROUSSELOT. I would be delighted to yield to the gentleman from Wisconsin.

Mr. ZABLOCKI. Mr. Speaker, I would be delighted to try to explain the concurrent resolution.

This is a very simple resolution. As the gentleman from California (Mr. ROUSSELOT) knows, the President last week issued a condemnation in the form of a memorandum or statement condemning Cambodia, and this resolution would state that the Congress joins the President in condemning and denouncing the Government of Cambodia for its atrocities, its killings, and its continuing disregard for basic human rights.

The concurrent resolution requests that the President call on the governments of those countries which have diplomatic relations with Cambodia to use their good offices to influence the Cambodian authorities to rectify this inhumane situation.

Thirdly, the concurrent resolution urges the President to cooperate with other nations through appropriate international forums such as the United Nations, in an effort to bring the flagrant violations of internationally recognized

human rights now taking place in Cambodia to an end.

Mr. ROUSSELOT. Mr. Speaker, further reserving the right to object, I certainly join with the gentleman in his effort to condemn these atrocities. I am surprised that the gentleman did not join us in condemning the Central African Empire earlier, but I understand.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

The Clerk read the concurrent resolution, as follows:

H. CON. RES. 573

Whereas there have been continuing numerous credible accounts by refugees from Cambodia telling of countless killings and other barbaric acts by the Government of Cambodia;

Whereas reliable estimates put the death toll since 1975 in Cambodia at more than one million people;

Whereas the foreign policy of the United States Government gives high priority to the issue of human rights and freedom of the individual around the world; and

Whereas President Carter, in his statement on the violations of human rights in Cambodia stated that Cambodia is the worst violator of human rights in the world today:

Resolved by the House of Representatives (the Senate concurring), That the Congress—

(1) joins the President in condemning and denouncing the Government of Cambodia for its atrocities and killings and its continuing disregard for basic human rights;

(2) requests that the President call on the governments of those countries which have diplomatic relations with Cambodia to use their good offices to influence the Cambodian authorities to rectify this inhuman situation; and

(3) urges the President to cooperate with other nations through appropriate international forums such as the United Nations, in an effort to bring the flagrant violations of internationally recognized human rights now taking place in Cambodia to an end.

The SPEAKER. The gentleman from Wisconsin (Mr. ZABLOCKI) is recognized for 1 hour.

Mr. ZABLOCKI. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in support of the resolution.

The purpose of House Concurrent Resolution 573 is to condemn the atrocities and killings in Cambodia, to request that the President call on other governments to influence Cambodian authorities to rectify this inhuman situation and to urge the President to cooperate with other nations, under the auspices of appropriate international bodies, in an effort to bring the flagrant violations of internationally recognized human rights now taking place in Cambodia to an end.

On Friday, the President called Cambodia "the worst violator of human rights in the world today." For 3 years now, we have been viewing from afar a situation of growing horror for the people in that unfortunate land. Refugee reports and rare visits to Cambodia bring back what were at first unbelieveable impressions of total violation of even the most basic standards governing human conduct. Total suppression of political and and religious freedoms and economic deprivation appear to be the common practice. Murder has become the instrument of control and fratricide the common experience of a people whose culture and refinement in earlier ages reached world renown.

With the recent reawareness of the Nazi holocaust, we cannot simply stand aside and watch without protecting the "holocaust of the present day." What is daily happening in Cambodia must certainly qualify as mass slaughter of the proportion rarely experienced in human times.

While the resolution before us now will create no miracles for the people of Cambodia, it may hopefully help the search for ways to bring under control the wanton waste of human life that is occurring in Cambodia.

As yesterday's editorial in the Washington Post urged with respect to the terror taking place in Cambodia—

It must be confronted, discussed and investigated insofar as that is possible—and condemned, again and again.

Only through such efforts, can the world community hope to encourage the Cambodian Government to make positive changes.

In his statement on Friday, the President took note of actions on the part of the Norwegian Parliament and by Amnesty International to raise the issue of Cambodian atrocities forcefully. International efforts to involve the U.N. Human Rights Commission have persuaded that body to investigate human rights violations in Cambodia. These are worthy first steps.

Cambodia today presents a real challenge to the American conscience. The horror is apparent; the means to stop it, elusive. We cannot stop a foreign assistance program, nor deny credit nor even use diplomatic means to directly express our concerns to the Cambodian authorities. We can, however, work to build a broad international network of protest, to use all international instruments including the United Nations to bring what is most decent in the nature of mankind to bear on the problem of Cambodia. Hopefully, by such effort and determination, we can play a positive role in halting the destruction and in aiding the Cambodian people as they move to restore their once peaceful land.

Mr. Speaker, I urge the adoption of the resolution.

Mr. DORNAN. Mr. Speaker, will the gentleman yield?

Mr. ZABLOCKI. I yield to the gentleman from California.

Mr. DORNAN. Mr. Speaker, I just wish to congratulate the distinguished chairman of the committee for bringing us this resolution on the condemnation of Cambodia, and I wish to commend two of the television networks, CBS and NBC, although they were 3 years coming to a recognition of the horrendous fact that we had another "Nazi holocaust" going on in Cambodia. These networks presented an excellent report of this all-too-real nightmare. The date of these news presentations was fittingly Adolf Hitler's birthday, April 20. CBS did another excellent followup report on April 21.

Mr. Speaker, the transcripts of the reports follow:

[CBS Evening News, Apr. 21, 1978]

CAMBODIA UNDER COMMUNIST RULE

ROGER MUDD. In the three years that Cambodia has been under communist rule it has undergone a dramatic change. A change dictated by its authoritarian government in an effort to create a new order. A Yugoslav television team, in a recent visit there, took a close look at the new Cambodia and the government that runs it. Bert Quint, in New York, narrates the second of two reports.

BERT QUINT. Phnom Penh has become a city of nameless streets, as part perhaps, of the new regime's effort to wipe out traces of Cambodia's pre-revolutionary past.

Street signs have been whitewashed; and why, one might ask, do you need signs in a place where almost no one lives. You do see a few cars in front of the building where the government is housed. With the country closed for three years to most foreigners, there's been no way for outsiders to be sure even who the rulers are.

Certainly, it's not the Parliament which is said to meet just once a year. The Yugoslavs were given the impression that the number one man is Pol Pot, Prime Minister and Communist Party Secretary. Pol Pot, virtually unknown in the West, told the Yugoslavs about his background.

"I lived the life of peasants like my parents. For six years, I was in a pagoda, learning to read and write. And for two years, I was a monk."

He received a scholarship to study in France and then lost it because he dedicated more time to student politics than to his studies. Pol Pot returned to Cambodia to fight against the French colonial regime. Despite Chinese and North Korean influence, there seems to be a do it yourself, trial and error pattern to the building of this new Cambodia.

Pol Pot says the government evacuated the towns because the people could not be fed in urban areas. But also, because it would have been easier for opponents of the regime to commit sabotage in the cities in the name of American imperialism.

"The evacuation of the towns did not follow a pre-determined plan," he says. "It was the situation of the moment that made us take this measure."

The economy of the new Cambodia is of the kind man knew thousands of years ago. The National Bank, destroyed by an explosion just after the fall of Phnom Penh, has not been rebuilt. There's no need for it in a land where the barter of goods has replaced money.

There are a few small industries, but most of life is on the level of primitive agriculture and handcraft. Hoes are made with the metal of bombshells dropped in the years of war. Cambodia's trying to make up for its lack of technology and money by harnessing its greatest resource: manpower.

The highest priority? Dams to provide the water to grow the rice that is the backbone of the economy and Cambodia's currency in international trade.

One outlet to the sea for that rice is Vietnam. The border fighting between Cambodia and Vietnam has blocked this outlet. The dispute can be explained in part by an age old enmity. Some observers believe the antagonism is fostered by Moscow, as Vietnam's patron and by Peking, as Cambodia's

in an Asian power struggle between the two communist giants.

Two things the Yugoslavs specifically were forbidden to see were military installations and hospitals. Why hospitals? They didn't know, but perhaps the government didn't want them to see men wounded in battle.

One of the first victims of the new regime was the religion of most of the people. Atheism has replaced Buddhism as the official creed. The temples are empty, the saffron robes of the bonzes (?) gone.

The Prime Minister told the Yugoslavs, "Our desire is to build a society in which all people take part in production and national defense. If the people agree," he says, "we can accomplish it all." From the look the Yugoslavs have given us, it would seem the people have little choice.

[CBS Evening News, Apr. 20, 1978]

CAMBODIA

ROGER MUDD. It's been three years now since the communists, the Khmer Rouge took over Cambodia. And in that time, a curtain of isolation has dropped around the country effectively sealing it off from the outside.

But Yugoslavian television within the past month visited Cambodia for a rare look inside. Bert Quint, who covered the war there for CBS News, narrates in New York this first of two reports.

BERT QUINT. Phnom Penh, 1975. A city that had suffered but still was very much alive. Five years of war had seen a change from an oasis of peace to a place like Saigon. Scarred, disheartened, swollen with refugees, another victim of the Indochina conflict. Two million persons fearful of what the imminent victory of the Cambodian communists would mean to them.

Phnom Penh today. A ghost town in a country that has been all but sealed off from the world outside. And where the question remains, what did happen to those who lived there? Where is everybody?

There have been reports, mostly from people who fled to neighboring Thailand, of mass murder that even in a world where atrocities have become commonplace, has been done on an uncommon scale.

The story of a million people killed by the new government because they represented the old burgeoisie, or because they refused to adapt to the new reality have not been confirmed by neutral observers.

Neither have Cambodia's new rulers bothered to deny them.

Other than the representatives of a few countries friendly to the new regime, especially China, few foreigners have been permitted to see what is happening in the country that today calls itself Campuchea (?).

Thanks to Yugoslavia's position as a leader of the nonaligned world, journalists from that country recently were allowed into Cambodia. A Belgrade television team brought out rare pictures of the new Cambodia. An image of life in that hidden land, but an image lacking in many significant details.

It's the picture of a country whose society, whose economy, whose way of life have been transformed almost overnight.

Pol Pot, the Prime Minister, told the Yugoslavs that it was impossible to feed people in the cities, so we emptied the cities. By persuasion, by force, by massacre. Just how the cities were emptied is not clear.

The Yugoslavs had no freedom to move about. Impressions more than facts is what they went home with. Perhaps the most vivid impression is that of a nation of children. Children harvesting rice. If we have rice, the government says, we can eat. We can trade abroad. We can survive.

Children, hardly able to reach the machinery, working in factories. Children, many of whom never had seen the sea, manning boats. Children, in a land where there no longer are high schools and the universities empty, learning the geography of a world, where for Cambodia only seven or eight countries exist in terms of commercial or political relations; learning to read, to add a few figures; or to work with electricity. Children who rarely live with both their parents.

Marriage in the formal sense no longer exists. Those who were married before or who were joined in these years, with the approval of the local communist chiefs, often are separated. The man to work on 1 cooperative, the woman on another. These children are growing up in a country that has gone back to an age where money has no meaning. Where those cooperatives that gather salt, for example, give it to the government for rice that has been gathered by another cooperative. Where the government issues enough rice to keep each family alive and one pair of black pajamas a year to clothe each person.

Where people work nine hours a day for ten days, and then have one day off to listen to political lectures.

Where people apparently do not go hungry as many did before, but where they can be moved by the government, but not move on their own.

If this is a nation of children, what happened to the older people? Many are refugees, what about the others?

Were they indeed killed by the regime, and where is this young nation heading? We'll have a report tomorrow on what Cambodia's rulers say they're trying to do.

["Today Show" NBC–TV Apr. 20, 1978]

CAMBODIA

TOM BROKAW. Former Cambodian Information Minister Song Chang (?) has accused Cambodia's present communist regime of carrying out mass murders on a scale similar to what the Nazis did in World War II.

Speaking in Washington on the third anniversary of the communist victory in Cambodia, Chang said there should be an international conference on human rights violations in his homeland.

Western newsmen are not permitted into Cambodia now, but NBC News has obtained film that gives unusual insight into conditions there. And Jim Lorry has the story.

JIM LORRY. The radical change that has been imposed on Cambodia in three years is obvious in this rare film shot in December by a delegation from Laos.

The capital is now a ghost town of 20,000 soldiers and government officials. Chickens command the school ground of the old French lycee in the heart of town.

Pnomh Penh's inhabitants were driven out of the city just three years ago; sent to the countryside to begin what the communists rulers called "a new peasant society."

The rulers are a handful of French-educated radicals. They are seldom seen except when greeting official parties like this one led by Souvana Vong (?) from Laos.

Children form the backbone of the new Cambodian society; most adults are kept out of sight in rural work camps. Refugees report thousands of Cambodians have died in those camps, some at the hands of 13 year olds charged with maintaining security.

Some youngsters are being trained to work for the new society at schools like this near the seaport of Campongsan (?). Much of the technical know how is provided by China. China is just about Cambodia's only backer, and at the port, most of the ships are Chinese, delivering essential foreign aid.

Mrs. FENWICK. Mr. Speaker, will the gentleman yield ?

Mr. ZABLOCKI. I yield to the gentlewoman from New Jersey.

Mrs. FENWICK. Mr. Speaker, I thank my colleague for yielding.

Mr. Speaker, I rise in support of this concurrent resolution. I hope the intent and purpose of this excellent resolution will make clear that this is the sense of the whole House.

I hope that all of us who have wondered how we might express some of the distress and sorrow and anguish of the people of Cambodia may be assured that this will somehow be a vehicle to convey our solidarity and our feelings about the suffering of those people.

Mr. ZABLOCKI. Mr. Speaker, I yield 1 minute to the gentleman from Florida (Mr. YOUNG).

Mr. YOUNG of Florida. Mr. Speaker, I thank the gentleman for yielding me this time.

Mr. Speaker, I would like to make an inquiry of the chairman of the committee, but first I wish to say I support this resolution very strongly, as I am sure the gentleman already knows.

I am very curious as to why the resolution is limited to Cambodia when there are so many countries like Laos, for example, that refuse to even acknowledge our inquiries as to American servicemen missing in action. I refer to Uganda, for example.

I am curious why it is only aimed at Cambodia, when there are a number of others that really fall into the same category and deserve the same condemnation.

Mr. ZABLOCKI. Mr. Speaker, will the gentleman yield?

Mr. YOUNG of Florida. I yield to the gentleman from Wisconsin.

Mr. ZABLOCKI. Mr. Speaker, I thank the gentleman for yielding, and I will be happy to advise the gentleman that, so far as atrocities, the atrocities are greater in Cambodia than in any other country that the gentleman has mentioned. I would advise the gentleman further that I am in sympathy that we ought to, as the gentleman has pointed out, also condemn the human treatment in all of the other countries he has mentioned.

Mr. YOUNG of Florida. I thank the gentleman.

Mr. ZABLOCKI. Mr. Speaker, I yield such time as he may consume to the gentleman from Alabama (Mr. BUCHANAN).

Mr. BUCHANAN. Mr. Speaker, I, too, want to commend the chairman for this resolution, and I would like to say to the gentleman from Florida that we do have under consideration at this time in the Subcommittee on Africa legislation on the subject of Uganda that I think the gentleman will approve.

GENERAL LEAVE

Mr. ZABLOCKI. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on House Concurrent Resolution 573, presently under consideration.

The SPEAKER. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

Mr. ZABLOCKI. Mr. Speaker, I move the previous question on the concurrent resolution.

The previous question was ordered.

The SPEAKER. The question is on the concurrent resolution.

The question was taken; and the Speaker announced that the ayes appeared to have it.

Mr. BROOMFIELD. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The vote was taken by electronic device, and there were—yeas 388, nays 0, not voting 46, as follows:

[Roll No. 252]

Dent	Nix	Thornton
Derwinski	Obey	Tucker
Eilberg	Poage	Waxman
Fish	Pursell	Whitley
Florio	Risenhoover	Young, Tex.
Frey	Roberts	
Gammage	Rodino	

The Clerk announced the following pairs:

Mr. McCormack with Mr. Cochran of Mississippi.

Mr. Rodino with Mr. Ammerman.

Mr. Waxman with Mr. Clay.

Mr. Rosenthal with Mr. Teague.

Mr. Dellums, with Mr. Derwinski.

Mr. Dent with Mr. Andrews of North Carolina.

Mr. Nix with Mr. Baucus.

Mr. Risenhoover with Mr. Fish.

Mr. Roberts with Mr. John Burton.

Mr. Eilberg with Mr. Skubitz.

Mr. Florio with Mr. Mann.

Mr. Gammage with Mr. Conyers.

Mr. Harkin with Mr. Frey.

Mr. Howard with Mr. Mollohan.

Mr. Jones of North Carolina with Mr. Moss.

Mr. Whitley with Mr. Runnels.

Mr. Shipley with Mr. Pursell.

Mr. Santini with Mr. Obey.

Mr. Russo with Mr. Thornton.

Mr. Kazen with Mr. Ruppe.

Mr. Krueger with Mr. Tucker.

Mrs. Burke of California with Mr. Sarasin.

Messrs. EDWARDS of California, LUKEN, and ASHLEY changed their vote from "nay" to "yea."

So the concurrent resolution was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

PERSONAL EXPLANATION

Mr. HARKIN. Mr. Speaker, I just arrived on the floor moments after the time closed for voting on House Concurrent Resolution 573. I was not aware this resolution was coming up for a vote this afternoon. Also, I have one of these new-fangled gadgets that is supposed to call you when the bells ring, but mine either was not working, or it was shut off.

Mr. Speaker, as one who has taken a central role in promoting human rights legislation in the House, I regret we were not given more notice that this resolution was coming up for a vote. I am quite disturbed that I was not able to record my vote in favor of House Concurrent Resolution 573.

Cambodia presents to us a perplexing situation: we know there has been, and continues to be, massive violations of human rights in Cambodia. Yet we have no economic, military, nor even diplomatic ties with this country. So there is little we can do directly. But we must call on those governments that do have relations with Cambodia to use whatever influence they have to help the suffering people of Cambodia who are suffering under the heel of an oppressive dictator. We must do more to bring the atrocities perpetrated by the Cambodian Government before the world public, to make sure all the world knows what is taking place there.

Again, Mr. Speaker, House Concurrent Resolution 573 has my full support.

MOVING PLACE FOR HOLDING COURT FOR DISTRICT COURT OF EASTERN DISTRICT OF NEW YORK TO BROOKLYN AND HEMPSTEAD

Mr. WYDLER. Mr. Speaker, I ask unanimous consent that the Committee on the Judiciary be discharged from further consideration of the Senate bill (S. 2597) to amend title 28, United States Code, to move the place for holding court for the district court of the eastern district of New York to Brooklyn and Hempstead, and for other purposes, and

ask for its immediate consideration in the House.

The Clerk read the title of the Senate bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York (Mr. WYDLER)?

Mr. AMBRO. Mr. Speaker, I reserve the right to object.

The SPEAKER pro tempore. The gentleman from New York (Mr. AMBRO) reserves the right to object.

Mr. AMBRO. Mr. Speaker, I wonder if I could ask the sponsor of the bill a couple of questions.

Mr. WYDLER. Certainly.

Mr. AMBRO. The district in question is the second largest Federal judicial district in the United States. We both understand that the present site on Long Island, one of those of the eastern district, is inadequate. For example, the courtroom itself only seats 40 people and there is a current trial part with 32 defendants so there is not room in the courthouse to allow the defendants and their attorneys to be present together.

We also understand that at the present moment the former IRS training center on the Hofstra University campus is the only suitable available site to relieve the court's critical situation with respect to inadequate facilities.

Does the gentleman agree with me that moving on to the Hofstra site is only a temporary stopgap measure which should in no way deter us from moving in another direction whenever this site is approved?

Mr. WYDLER. If the gentleman will yield, yes, of course, the gentleman is correct. Whatever we do in the Nassau County area and the Suffolk County area is going to be a temporary situation. This will be rented space; as a practical matter all we are doing literally is moving the court from its present site to within a mile of where it now exists, to a better location so the court can function more efficiently. The only question that was raised in doing that was in crossing geographical lines, and this legislation was needed to make that possible.

The gentleman knows that we are operating against an absolute deadline at the end of this week in which this move must be consummated or the space is going to be lost, if it does lose by the action we take today.

Mr. AMBRO. In terms of the proposed new facility, what will be in this new facility as opposed to the existing facility? What kind of services will the new facility provide?

Mr. WYDLER. If the gentleman will yield further, the building that is under consideration is an excellent building for the courthouse, but the best thing that can be said about it is that it has the full support of all the judges of the eastern district of New York, which is not something that is done very often. They all agree that this building is an excellent building for their purposes. It is a good building that is presently being used by the Custom Service as a training center. But it is a separate and definitely distinguished looking building on the Hofstra campus and will serve the court for a number of years in a very able capacity. It has more space than they are now using in the commercial building.

Mr. AMBRO. The existing space, as I understand it, is 22,000 square feet, and this will double the space. Will it provide detention facilities?

Mr. WYDLER. Yes, it will.

Mr. AMBRO. Will it provide facilities for lawyer-client consultations?

Mr. WYDLER. It will.

Mr. AMBRO. Are there any other adjunct services that can be provided with this facility?

Mr. WYDLER. Of course it will provide clerk of the court services and marshal services as well. It will be a fully operating office for the eastern district of New York.

Mr. AMBRO. As the gentleman knows, one of the reasons why I find difficulty with this approach is because I have a bill which would separate Nassau and Suffolk Counties from the existing judicial district. That would then make the two new districts, if it were to be approved, the 14th and 17th largest in the United States among the over 90 existing today. It was my concern that if we move into a new facility the bill that will be reviewed by the Committee on the Judiciary, in the omnibus judicial bill, will be jeopardized in terms of this concept of this facility. Do we have assurances from the chairman of the subcommittee and the full Committee on the Judiciary that the concept of separating the two counties that we are talking about, Nassau and Suffolk, from Brooklyn and Queens will not be jeopardized by moving to this new facility?

Mr. WYDLER. If the gentleman will yield still further, I can only say that I cannot see how that could have any effect on that at all. This is merely a technical change in the present law to allow the courts that now exist to continue to exist. There is no real change in the operation other than the facilities will be better facilities than now exist in the Nassau-Suffolk County areas and that, of course, will help the gentleman's proposal in the long run because it will mean we will have more actual space in the district court in that area. So I think it could only, in the long run, tend to lend strength to the gentleman's proposal which primarily is the ultimate objective of myself, as well. I hope to see the day when that will come about.

Mr. AMBRO. So we both agree that the best result would be the separation of those two counties from the existing district, and we both agree as well that in our conversations with the subcommittee and committee chairmen this would not jeopardize that concept, which would be aired in a couple of months, but would aid it, in fact?

Mr. WYDLER. The gentleman is correct.

Mr. AMBRO. And the gentleman supports that concept?

Mr. WYDLER. I do.

Mr. AMBRO. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York (Mr. WYDLER)?

Mr. WOLFF. Mr. Speaker, reserving the right to object, I take this time to ask the gentleman, as I understand it, the cost for these new facilities will be the same as the cost of the old facilities? Am I correct in this?

Mr. WYDLER. Mr. Speaker, will the gentleman yield?

Mr. WOLFF. I yield to the gentleman from New York.

Mr. WYDLER. I thank the gentleman for yielding.

No, I do not think that is correct, but the difference in cost will not be a significant amount of money. There is some difference in the cost.

Mr. WOLFF. But the cost differential is very slight for the additional facilities?

Mr. WYDLER. Yes. It is in the thousands of dollars. It is not a large sum of money.

Mr. WOLFF. Mr. Speaker, further reserving the right to object, I ask the chairman of the subcommittee of the Committee on the Judiciary which has jurisdiction about his feelings on this particular situation.

Mr. KASTENMEIER. Mr. Speaker, will the gentleman yield to me under his reservation of objection?

Mr. WOLFF. I will be happy to yield to the gentleman from Wisconsin.

Mr. KASTENMEIER. I thank the gentleman for yielding.

Mr. Speaker, I discussed this, of course, with the gentleman from New York (Mr. WOLFF), some time ago, as I am sure the chairman of the Committee on the Judiciary, the gentleman from New Jersey (Mr. RODINO) did, and more recently the gentleman from New York (Mr. WYDLER) and the gentleman from New York (Mr. AMBRO). Earlier we had hoped to have an omnibus bill in which this would be a part, but it is clear at this point in time that we cannot process legislatively an omnibus bill relating to the places for holding court in various places throughout the country and various judicial districts so as to include this particular item. Therefore, very recently both the chairman of the Committee on the Judiciary, the gentleman from New Jersey (Mr. RODINO), and I agreed that the Senate bill S. 2597 ought to be concurred in for the purpose of accomplishing what is intended here as originally raised by the gentleman from New York (Mr. WOLFF) and more recently by the gentleman from New York (Mr. WYDLER) with discussions with the gentleman from New York (Mr. AMBRO). This should not, however, constitute a precedent. This is not the best way to proceed in these matters.

I would agree with the observations of the gentleman from New York (Mr. AMBRO) that this does not in any sense compromise or mitigate any other interests there may be in legislation affecting those judicial districts which may be pending. The accomplishment of what is incorporated in S. 2597 will not adversely affect any other existing legislation which seeks to accomplish other resolutions of problems with respect to those judicial districts.

I do, however, indicate, I will say to the gentleman from New York (Mr. WOLFF) that both the gentleman from

New Jersey (Mr. RODINO) and I concur in having discharged and approving S. 2597 for the purposes described.

Mr. WOLFF. I thank the Chairman.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

Mr. ADDABBO. Reserving the right to object, Mr. Speaker, I may possibly object. I notice that the court is being moved in Westbury. Will this give greater accommodations to the people of Queens County and give greater accommodations to the courts?

Mr. WYDLER. Mr. Speaker, will the gentleman yield?

Mr. ADDABBO. I yield to the gentleman from New York.

Mr. WYDLER. I thank the gentleman for yielding.

As the gentleman knows, great parts of Queens County in which the gentleman's congressional district lies are closer to the Hempstead site in this bill than they are to the Brooklyn site, so for a great many people resident in Queens this facility would be a definite advantage. I think the gentleman should understand that this bill does not change present law insofar as the places to hold court are concerned. This bill merely changes the possible location of the court in one of the two areas where it is already provided for, so there is no change in the current law at all insofar as the places in which court can be held.

Mr. AMBRO. Mr. Speaker, will the gentleman yield for an observation?

Mr. ADDABBO. I yield to the gentleman from New York.

Mr. AMBRO. I appreciate the gentleman's yielding.

I think the RECORD should contain the fact that this present building and location, vacant for some 10 or 11 months, is one in which GSA has been paying rent.

It is a superb facility as a stopgap measure, so that the existing inadequate facility can be moved about a half a mile. The reason for the urgency of the bill is that within days the GSA would like to make a decision as to whether or not it should or could rent to another client, thereby recovering the amount of money that it has been paying in rent for this facility. They would like an urgent and immediate answer.

The Senate has already passed, as I understand it, this bill and so trying to meet, I think, the April 30 deadline, the gentleman and my colleague from Nassau, the gentleman from New York (Mr. WYDLER) is bringing this bill before us.

Mr. ADDABBO. Mr. Speaker, I thank the gentleman, and in view of the fact it will be of great benefit to my people in Queens, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York (Mr. WYDLER)?

Mr. AMBRO. Mr. Speaker, reserving the right to object, I would just like to once more round out the RECORD by including in this discussion an editorial which outlines, I think, in succinct and clear fashion the whole dilemma of the problem. It is from Newsday and I would like to make that a part of the RECORD.

The editorial follows:

MOVING LONG ISLAND'S FEDERAL COURT

In baseball, hustling infielders have been known to collide and send each other sprawling while the ball drops between them. In Washington, a similarly untidy incident threatens unless Representatives Jerome Ambro (D-East Northport) and John Wydler (R-Garden City) coordinate their efforts to make the federal courts more convenient for Long Islanders.

Both men have excellent motives and—in the manner of those infielders—they appear to be making all the right moves. But unless they work together, a chance for immediate improvement in court facilities could be missed. Ambro has yet to give his approval for House action on a bill that would permit the Long Island branch of the U.S. Court for the Eastern District, which has its headquarters in Brooklyn, to move from a building in Westbury, where it occupies 22,000 square feet, to a government-leased building on the Hofstra University campus. The building, which offers twice the space, was originally built to serve as a training center for Internal Revenue Service personnel. It's empty now, but a decision on whether the court can move may have to be made by the end of this month.

Ambro says the deadline is meaningless because he, as a member of the building and grounds subcommittee of the Public Works and Transportation Committee, can have it set aside. He's sponsoring a bill that would create a separate federal court district for Nassau and Suffolk Counties. That's a concept we've long supported, and Ambro claims there's a good chance the enabling legislation will be incorporated in an omnibus judicial bill to be considered in the House Judiciary Committee next month.

His proposal calls for the headquarters of the new district to be located within five miles of the Nassau-Suffolk line. He's worried that the shift to the Hofstra campus will dilute the argument in favor of the separate district. He wants Wydler, whose district includes Hofstra, to give assurances of support for the new district.

Wydler says he's all for it, but he believes it's still years away. And he wants Ambro to support the Hofstra move. We think they should be backing each other. A temporary move to Hofstra is fine. Indeed, it's overdue. Let's accomplish that and then go to work on the next step—a separate Nassau-Suffolk judicial district.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York (Mr. WYDLER)?

There was no objection.

The Clerk read the Senate bill, as follows:

S. 2597

An act to amend title 28, United States Code, to move the place for holding court for the district court of the Eastern District of New York to Brooklyn and Hempstead, and for other purposes

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the second paragraph of section 112(c) of title 28, United States Code, is amended to read as follows:

"Court for the Eastern District shall be held at Brooklyn and Hempstead (including the village of Uniondale).".

SEC. 2. The United States District Court for the Eastern District of New York, by order made anywhere within its district, may pretermit the regular session of court at Hempstead until Federal quarters and accommodations are available and ready for occupancy, except that for the entire period and such pretermission, a special session of the court shall be held at Westbury. Pretermission may be ordered without regard to the provisions of section 140(a) of title 28, United States Code.

SEC. 3. Notwithstanding the provisions of section 142 of title 28, United States Code, the Administrator of General Services, at the request of the Director of the Administrative Office of the United States Courts, shall continue to provide existing quarters and accommodations at Westbury for the duration of the special session held pursuant to section 2 of this Act. Appropriations to the judicial branch of Government shall be available to the Director to make necessary disbursements for such quarters and accommodations, and to pay user charges as required by section 210 of the Federal Property and Administrative Services Act of 1949, as amended (40 U.S.C. 490), at rates otherwise authorized by law.

SEC. 4. Notwithstanding the provisions of section 456 of title 28, United States Code, any judge, and any officer or employee of the judicial branch, whose official station is, on the day before the date of enactment of this Act, Westbury, may maintain that official station for the duration of the special session held pursuant to section 2 of this Act.

SEC. 5. The Director of the Administrative Office of the United States Courts may pay travel and transportation expenses in accordance with subchapter II, chapter 57 of title 5, United States Code, to any officer or employee of the judicial branch whose official station changes as a consequence of this Act and who relocates his residence incident to such change of official station.

The Senate bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

THE FANNIE MAE RAID

(Mr. SISK asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. SISK. Mr. Speaker, several weeks ago I called to the attention of the House the mischief that was being perpetrated on the Federal National Mortgage Association and the home buying public by the Department of Housing and Urban Development.

Since that time, the Secretary has published proposed regulations which are extensive in their scope. Industry reaction has been uniformly critical of the regulations for the simple reason that they would hurt, rather than help, the people who have unmet housing needs.

A number of newspapers have pointed out the faulty premises on which the proposed regulations are based, most recently the Wall Street Journal in an editorial on Monday morning.

Last night, eight members of the California delegation, both Republican and Democrats, signed a letter objecting to the proposed regulations as being inconsistent with the intent of Congress in making Fannie Mae a private corporation.

I ask unanimous consent to have inserted in the RECORD the full text of the

Wall Street Journal editorial and the letter objecting to the regulations.

[From the Wall Street Journal, Apr. 24, 1978]

THE FANNIE MAE RAID

Year-old feuding between the Department of Housing and Urban Development and the Federal National Mortgage Association might have begun as a patronage coup, but it now threatens to damage what has been a highly successful government intervention in the economy. HUD Secretary Patricia Roberts Harris is trying to engineer a power play which could ultimately hurt would-be homeowners across the country.

At issue is control of FNMA, a privately owned "corporate instrumentality of the United States" whose flighty nickname of Fannie Mae belies its $35 billion in assets.

By the middle of this week, the public comment period closes on HUD-proposed rules that would straitjacket Fannie Mae. Secretary Harris must decide whether to press ahead with her coup, which will certainly produce a major lawsuit, or drop the whole idea. We would all be better off if she dropped it.

From its New Deal origins in the Reconstruction Finance Corp., Fannie Mae has been transformed through increasing private participation into a key element of the national market in mortgages. Using proceeds from public bond issues, it buys mortgages from bankers and mortgage brokers, thus providing them the cash for more mortgage lending. This secondary market increases the flow of money for home buyers, evens out tight money cycles and makes it easier for mortgage lenders in capital-poor regions to attract funds from financial centers. The home buyer benefits most.

Fannie Mae owes its success to its clear distinction between making a market and subsidizing one. Lyndon Johnson spun it out of the federal government in 1968 with the directive to be self-supporting. Even though its charter required it to devote some resources to housing for lower-income families, these mortgages were supposed to provide "reasonable economic return." Its subsidy operations were split off and assigned to its sister Ginnie Mae (the Government National Mortgage Association), which remained a subsidized federal agency.

It's this distinction which HUD Secretary Harris is now trying to obliterate. As the latest phase in her siege of Fannie Mae, she has issued regulations that would substantially redirect its lending. Starting in 1979, at least 30 percent of its conventional mortgage purchases would have to be located in central cities; at least 30 percent would have to be for previously occupied homes; purchase of mortgages with an outstanding principal of more than $75,000 would be verboten. At least 30 percent of all Fannie Mae's yearly mortgage buying would service "low- and moderate-income families."

If these regulations ever went through, they would wreak havoc with Fannie Mae and the mortgage market. Pat Harris's people support the rules in part as an attack on "redlining"; in other words, they are meant to reverse the alleged reluctance of lenders to give inner-city home buyers the same deal on mortgages that suburbanites get. But we've seen little evidence to suggest that this different treatment results from anything other than basic economics. The primary market for inner-city mortgages may well be much smaller than HUD thinks it should be simply because the demand isn't there.

These rules would undeniably disrupt the open auctions by which Fannie Mae maintains its secondary market. Secretary Harris has admitted as much, and has shown by some other disruptive maneuvers that she doesn't give a hoot. Beyond that, the rules put Fannie Mae in a destructive dilemma. It might have to reduce its total activity, if it couldn't find enough sound inner-city mortgages to fill its quota, or it might have to accept riskier mortgages. In the second case, it would ultimately risk its financial soundness and its ability to borrow on the private market, not to mention the capital of its stockholders.

The worst of these consequences may never come to pass, since Fannie Mae has a good chance of killing the rules in court. After all, it's still a private company, in spite of its special government connections. Ms. Harris doesn't have the same power to make it lose money that, for example, New York Gov. Nelson Rockefeller had over his Urban Development Corporation. But the Fannie Mae raid shows the same cast of mind that brought the UDC into temporary default.

Whenever a government-sponsored venture successfully taps the private market, politicians can't resist the temptation to run it into the ground. They forget that the money comes from private investors and try to make it serve their own notion of the public good, no matter how money-losing. In the end comes a collapse that dries up funds for all the projects, financially sound or not.

We're not sure how great a disaster would befall the housing market if Fannie Mae went this route. It occupies a strategic place in the national mortgage market, but some say this function might be better filled by the burgeoning private mortgage insurance industry, unencumbered by Fannie Mae's residual government ties. This fight does show the weakness of the Fannie Mae-style mixed economy: If there's a government string attached somewhere, some politician is going to try to pull it.

APRIL 24, 1978.

RULES DOCKET CLERK,
Office of the General Counsel, Department of Housing and Urban Development, Seventh Street, SW., Washington, D.C.

DEAR SIR: This letter is written to object to the regulations promulgated in the Federal Register on Friday, February 24, 1978 (Docket No. R-77-509).

Our objection basically goes to the concept of the regulations, which are contrary to the intent of Congress in making the Federal National Mortgage Association a privately owned corporation controlled by its shareholders.

Article 3531 of Title 42 of the United States Code states that it was the intention of the Congress in establishing the Department of Housing and Urban Development that the new department address itself to a number of problems relating to housing and urban areas and that it was to "encourage the maximum contributions that may be made by vigorous private homebuilding and mortgage lending industries to housing, urban development, and the national economy."

Section 3532(b) states that among other things, it is to be the duty of the Secretary of the Department to "encourage private enterprise to serve as large a part of the Nation's total housing and urban development needs as it can and develop the fullest cooperation with private enterprise" in meeting the nation's housing needs.

In 1968, a combination of circumstances arose which made it necessary for the Congress to consider the desirability of making FNMA a private corporation and—if that were to be done—how to do it. FNMA was at that time a Government corporation partly owned by the United States Government, partly owned by mortgage lending institutions and, to a lesser extent, partly owned by the general public. The mixed ownership of FNMA was a result of the 1954 Housing Act, which had as one of its long-term objectives the conversion of FNMA to private status.

Faced with budget problems resulting from the adoption of new federal budget concepts and consistent with both the objectives of the 1954 Housing Act and the stated government policy of encouraging private enterprise to play a major role in meeting the nation's housing objectives, FNMA in 1968 was made a stockholder owned corporation with control to rest with its shareholders. During the deliberations leading up to this enactment, a number of alternatives were considered, one of which was to convert FNMA into what would amount to a cooperative. This would involve buying up what stock was in the hands of the public, paying off the United States Government for its share of the ownership, and having the entire amount of the required capital put up by the mortgage lending institutions which would sell mortgages to FNMA. However, it was the considered judgment of the leaders of the industry and the Johnson Administration that this approach was not feasible because the mortgage lenders doing business with FNMA—mainly mortgage companies—could not provide sufficient capital. Accordingly, the Congress decided to permit the public to buy stock.

The implications of this decision are obvious: if private investors were going to be induced to provide the capital for FNMA, they must be given the same expectation of return on their investments as they have with other investments; they must have control over the institution in which they have invested their funds; and they must have confidence that the United States Government would not renege on its word and change the rules of the game after they made their investment.

In a nutshell, what the proposed regulations would do is change the rules of the game. They would, in effect, make FNMA an adjunct of the Department of Housing and Urban Development. This cannot be allowed to happen. The integrity of the Congress of the United States is at stake.

It is true that in making FNMA a private corporation, the 1968 Housing Act also gave the Secretary of Housing and Urban Development certain regulatory authority over FNMA. In due time, it is likely that the courts will have an opportunity to rule on specific questions of how extensive that regulatory authority is.

However, from the public policy standpoint, it appears on the face of it that the proposed regulations are running absolutely counter to the general thrust of Government today. An announced objective of the Carter Administration is to have less regulation, not more. The application of that principle to FNMA not only makes good sense, it is in keeping with what Congress had in mind when FNMA was made private. The committee reports accompanying the 1968 Housing Act make clear that the purposes of HUD regulations were two-fold: (1) to assure that FNMA was not so ineptly managed as to throw the financial burden of its operations back on the United States, and (2) to assure that the needs of the home buying public were not ignored. It was clear that within these parameters, the responsibility for setting FNMA policy and for managing the enterprise were to be left to its Board of Directors and to the management which it would select.

This matter is of great concern to the State of California because excessive regulations can only hinder FNMA's ability to meet California's need for housing finance. If there is one thing about which almost all segments of the housing industry seem to agree, it is that excessive red tape and overregulation have kept the FHA from playing the role it should in housing the American people. We cannot permit that to happen to FNMA.

During 1977, FNMA purchased $1.6 billion in mortgages in California—approximately 34 per cent of its total purchases for the year. Of that amount, $311 million were for the financing of housing by veterans living in the State of California under the VA home loan guaranty program. Another $321 million

were for the financing of housing under the various FHA programs, and $884 million were for the financing of housing under conventional loan programs—that is to say, those not insured by the FHA or guaranteed by the VA.

Of the 30 largest SMSAs in the United States, six are in the State of California. FNMA purchases in 1977 in those six SMSAs are as follows:

Los Angeles/Long Beach, $405 million; San Francisco/Oakland, $154 million; San Jose, $150 million; San Diego, $146 million; Anaheim, $121 million; and San Bernardino, $99 million.

The purchases in the Los Angeles/Long Beach area alone exceeded the total purchases in any other single state in the United States (excepting, of course, California).

It seems odd that in the face of the dismal performance of such other institutions as the postal service and Amtrak, the one successful example of a government-chartered corporation—FNMA—should be made the target of an ill-advised regulatory effort which is totally out of keeping with the need. The proposed regulations far exceed what FNMA's history and performance record indicate is necessary or desirable. Such regulations as are absolutely necessary should be kept to the absolute minimum and should be well within the confines of what Congress intended—a privately owned and managed corporation, entirely privately funded, and operating on its own steam and to the greatest extent possible without interference from the Federal Government.

Sincerely,

Clair W. Burgener, Del Clawson, Barry Goldwater, Jr., Robert J. Lagomarsino, Jim Lloyd, B. F. Sisk, Lionel Van Deerlin, and Charles H. Wilson, Members of Congress.

THE 761ST TANK BATTALION OF THE 3D ARMY OF THE SECOND WORLD WAR

(Mr. LEDERER asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. LEDERER. Mr. Speaker, I would like to pause in the business of the House to join with President Carter in recognizing the service of the 761st Tank Battalion of the 3d Army of the Second World War. The Secretary of the Army, Clifford Alexander, presented the members of the unit with the Presidential Unit Citation at Fort Myer, Va., on April 20, 1978.

The 761st Tank Battalion was organized in 1942 at Camp Claibourne, La., as the first all-black tank unit. In October 1944, the 756 men of the battalion landed in their first combat engagement at Nancy, France. They proved themselves in battle by taking three German towns in the first day. They went on to fight for 183 days before taking their first relief.

This tank engagement was under the command of Gen. George Patton, Commander of the 3d U.S. Army. The unit went on to serve under the 7th and 9th U.S. Armies in France, Holland, Belgium, Luxembourg, Austria, and Germany. After the end of the hostilities, the 761st occupied Bavaria until being disbanded and shipped home in 1947.

In their combat history, the members of the 761st earned 298 Purple Hearts for wounds sustained in action, 11 Silver Stars, and 70 Bronze Stars for heroism. Thirty-three members of the unit were killed in action.

Nothing epitomizes the patriotic spirit of the 761st Tank Battalion as much as the stirring poem penned and recited on the Capitol steps by Walter Lewis of the 761st. I would like to share this poem with my colleagues in the House:

(Words written in conjunction with the PUS AWARDS)

THIS IS OUR OWN OUR NATIVE LAND!

Brought here in chains . . . .
Shackled without name
Forced position . . . .
Not of our own volition.
Frustration . . . . denegation
. . . . But the untiring hand of God Almighty
has mettled out to us a station!
That one day we shall rise up and give an account of ourselves—
in this great nation.
America right . . . . America wrong . . . .
This is the land where we belong,
This is our own our native land!

Released from the shackles and bondage of hell
Who among us refuses to tell?
To whom are we to turn?
From whom are we to learn?
. . . . And then the Great Bell arose and sounded!
We thought the Great Bell silently grounded.
Its message reaching the ear of every man
Its thunder echoing throughout the land
This is our own our native land!

As we search our conscience clear
Hark! O'er hills and valley's dear
We hear the glorious freedom song . . . .
Let's listen to the message reborn!
Let's once again sing . . . . the freedom song
This is our own our native land!

America strives hard to keep us free . . . .
How can we possibly deny thee?
And when we have reached Heaven's choice
We shall still hear America's voice—
We hear the glorious freedom song . . . .
This is where we were born . . . .
assuring us
This is our own our native land!

It was World War II, that gave us birth
The Seven Hundred Sixty First!
Surely and slowly we set the tone
Like the steady beat of a metronome
Our Panther's roared farthest east . . . .
Never once did we retreat,
A long time coming . . . . this reward
Pass that citation Mr. President . . . . Praise we the Lord!
Once again we take our stand . . . . in this,
Our own our native land!

WALTER LEWIS.

INADEQUATE FUNDING OF VA RESEARCH PROGRAMS

(Mr. GUYER asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. GUYER. Mr. Speaker, recently we honored two full-time VA employees who received the Nobel Prize for medicine for their outstanding work with the Veterans' Administration. Although publicity has focused primarily on the outstanding achievements of Dr. Rosalyn S. Yalow and Dr. Andrew V. Schally, senior research investigators with the Veterans' Administration hospitals in the Bronx, N.Y., and New Orleans, La. I can assure my colleagues that the same quality of work is being conducted by numerous VA professionals in our medical and prosthetic research programs. It is, therefore, critical that we continue to fund VA's research program at an adequate level to assure the continuation of the research being conducted.

We are led to believe by the administration that the research programs in most VA hospitals throughout the country will not be adversely affected by the funding level being proposed by the administration for fiscal year 1979. This certainly is not the case, and notwithstanding the budget cuts imposed on the agency by the Office of Management and Budget, our responsibility is to see that adequate funds are included in the research budget for fiscal year 1979. Otherwise programs at 53 hospitals will be terminated during the next year.

So that my colleagues will be aware of the concern of those involved in the research program, there follows correspondence between VA physicians at the Veterans' Administration hospital here in Washington, D.C., and Mr. Denvel D. Adams, national adjutant of the Disabled American Veterans, calling to our attention the hard fact that unless we do something about it in VA's fiscal year 1979 appropriations bill, the Veterans' Administration research programs are going to suffer.

ASSEMBLY OF PHYSICIANS
AND DENTISTS,
VETERANS ADMINISTRATION HOSPITAL,
Washington, D.C., March 24, 1978.

DENVEL D. ADAMS,
National Director, Disabled American Veterans, Washington, D.C.

DEAR MR. ADAMS: We are enclosing a statement signed by nearly every member of our professional staff expressing our alarm concerning the budgetary cuts in VA research and its catastrophic effects on the care of our patients.

Sincerely,

Paul Schafer, M.D., President; Herman Segal, M.D., Vice President; Omega L. Silva, M.D., Secretary; R. James Hawley, M.D., Treasurer; Council: Perry Banda, M.D.; Halley Taylor, M.D.; William Jennings, D.D.S.; Cullen Ward, D.D.S.; Ralph Lingeman, M.D.; and Robert Saunders, M.D.

We, the 128 undersigned physicians and dentists of the Washington, D.C. Veterans Administration Hospital, are greatly alarmed by the catastrophic fiscal year 1979 budget cut which will abolish all research in over one-third of VA hospitals throughout the country and which will gravely curtail research in the remaining two-thirds. Failure to increase the VA research budget according to the cost-of-living increases over the past four years, plus the severe cut which has been planned this year threatens to destroy the entire VA hospital system.

VA research accomplishments have been of enormous practical benefit to our sick and wounded veterans and to all Americans in the fields of cancer, hypertension, infectious disease, spinal cord injuries, prosthetics, sickle cell anemia, psychopharmacology, endocrinology, and innumerable other fields. Two Nobel prizes in medicine were awarded this year to VA researchers! The research activities of VA physicians and paramedical personnel directly and indirectly provide vital patient-care to thousands of sick veterans. The VA research career development program which is also being drastically cut back has trained many bright young investigators who have remained in the VA system to provide quality care for the veteran.

The high caliber of VA research has been the main attraction for the recruitment of

well-trained physicians who wish to participate and work in a stimulating environment where modern, innovative, and imaginative medicine can be practiced. Failure to provide the same salary and benefits to VA doctors as are received by most federal doctors has dissuaded young doctors from making their career in the VA; the elimination of VA research would be the final blow.

The abolition or drastic curtailment of research will rapidly convert VA hospitals into domiciliaries, nursing homes, and second-rate custodial institutions; VA hospitals would become a wasteland. Hundreds of irreplaceable technicians would be fired. Hundreds of academically-oriented doctors would resign, and most of the remaining physicians would be those unable to find positions elsewhere. No University would wish to continue its association with such hospitals. Bottom of the barrel medical care would be a cruel tragedy for our patients, the sick and wounded American veterans who have fought for our country and for all Americans.

VA research must be saved in order to save quality VA medicine. Human lives are at stake. The VA research budget must immediately be restored by $25 million.

DISABLED AMERICAN VETERANS,
NATIONAL SERVICE & LEGISLATIVE HEADQUARTERS,
Washington, D.C., April 11, 1978.

PAUL SCHAFER, M.D.
President,
Assembly of Physicians and Dentists,
Silver Spring, Md.

DEAR DR. SCHAFER: Thanks very much for forwarding the statement signed by nearly every member of the professional staff at the VA Hospital, Washington, D.C. concerning the budgetary cuts in VA research and its catastrophic effects on the care of patients.

The Disabled American Veterans agrees with your conclusion and I want you to know that we are doing everything possible, including a concerted effort on a National basis, to have the Congress restore the funds necessary to provide quality care to this Nation's disabled veterans. I appreciate your forwarding the detailed information and the statement signed by staff members which support our efforts.

Sincerely,

DENVEL D. ADAMS,
National Adjutant.

INDIAN LAND CLAIMS: MAINE'S LOOMING BATTLE

(Mr. COHEN asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. COHEN. Mr. Speaker, my colleagues in this House have heard me speak on many occasions of the Maine Indian land claims case. This monumental case, which is being pressed by the Justice Department in behalf of Maine's 3,000 Indians, threatens to cloud title to millions of acres of land in my State. It is a major source of concern to every resident of Maine.

I have found, however, that the enormity of the case and its significance for the rest of the country is often lost on residents of other States. In this morning's edition of the Washington Post appears an article by a distinguished Maine journalist, James Russell Wiggins. Mr. Wiggins, a former executive editor of the Post, is the publisher of the Ellsworth American and is recognized as an authority on the Maine Indian land claim.

In his article, Mr. Wiggins gives a concise history of the Maine claim and points out a number of the major legal questions raised by the suit. It is inevitable that Congress will eventually have to face these questions, since the answers we find will set a precedent that will affect similar Indian claims in many Eastern States. I urge each of my colleagues to read the article which follows:

INDIAN LAND CLAIMS: MAINE'S LOOMING BATTLE

(By James Russell Wiggins)

The Department of Justice, on June 15, will commence legal action against property owners of Maine, on behalf of the Penobscot and Passamaquoddy Indians, involving 12½ millions acres of land. If that action is not forestalled by negotiation between now and May 10, or subsequently settled out of court, and is pursued to successful conclusion, it would evict more people from their lands and homes than were involved in North America's two most historic expulsions—that of the Acadians from Nova Scotia in 1755 and that of the Indians from Georgia in 1836.

Much of the land involved is like that from which the French Acadians were driven by the British—as Longfellow described it in Evangeline—"forest primeval," with "murmuring pines and the hemlocks." Much of it is thickly settled—cities, towns and farms along the Maine coast. Much of it includes villages like the Georgia settlements from which the Creeks, Choctows and Cherokees were driven by the federal government in the days of Jackson and Van Buren.

Maine awakened to the seriousness of the case in 1975 when the Indians, under the leadership of Tom Tureen, of the Native American Rights Association at Calais, achieved a legal coup in the U.S. District Court of the Maine district. The court held, in *Passamaquoddy v. Morton*, that the Indian Non-Intercourse Act is applicable to the tribe and establishes a trust relationship between the United States and the tribes. Even then, many legal scholars felt the opinion only gave the standing to sue. The decision was upheld in the U.S. Circuit Court. The Department of Justice did not appeal. Nor did the State of Maine which had paid little attention to the case which it had entered as an intervenor.

The decision did a great deal more than open the courts to the Indians. It directed the federal government to treat the Indians as its wards, and it put the Department of Justice on the side of the Indians (in a curious legal twist). The Carter administration has concluded that the department must fight Maine property owners in court to fulfill this fiduciary relationship.

President Carter intervened first, by the appointment of Judge William B. Gunter to inquire into the case. Then he set up a task force, which includes Eliot Cutler, deputy director of the Office of Management and Budget, Leo M. Krulitz, and A. Stephens Clay. The task force met with the Indians and devised a settlement proposal that would clear all titles in one part of the claimed area (9.2 million acres) for payment of $25 million by the federal government, leaving in dispute 3 million acres owned by 14 large landowners and 350,000 acres owned by the state.

The "compromise" would require Maine to pay the Indians $1.7 million a year for 15 years. The large landowners would sell the Indians 300,000 acres of timber land and give them options to buy 200,000 acres.

Maine has not accepted the proposal. It has until May 10 to do so. At that time, according to Eliot Cutler, no settlement having been reached, the Carter administration will ask Congress to appropriate $25 million. Whether that is done or not, the Department of Justice will start legal action on June 15. If no negotiations have succeeded, all the landowners in the original 12 million acre claim area will be vulnerable.

Those lawsuits will raise some of the most interesting legal questions in the country's history:

What is the precise nature of "aboriginal" title, on which the Indians base their suits?

Did the Indians still possess any lands in Maine after the end of the French and Indian Wars in 1763 when France lost its North American possessions and its Indian allies were defeated and submitted to Massachusetts?

If the Indians had any valid titles to land after 1763, did the Non-Intercourse Act of 1790 invalidate the transactions between the remnants of the tribes and the Massachusetts and Maine governments which progressively delimited Indian hunting grounds? (District and circuit court opinions say it did, but the federal government never pretended such a trust relationship prior to 1975).

Have the innumerable grants and sales made by Massachusetts and Maine the same validity as the legislative grants made by the State of Georgia in the 18th century and upheld by the United States Supreme Court in 1810 (*Fletcher v. Peck*), or are those Maine grants to be held invalid?

If the Indians win the Maine case, will many land titles in New England (and in some other parts of the nation) be open to like attack? Tureen has said there are 120,000 Indians in New England alone who have been illegally deprived of their land.

The implications of this enormous tide of litigation are only beginning to be realized by Maine's citizens, who are slowly becoming aware of the threatened erosion of the very foundations of private ownership of land that have hitherto stood every assault for 150 years. In the rest of the country, the scope of the legal battle seems only dimly perceived.

The Indians are confident of victory. Their lawyers, paid by the great foundations that finance the Native American Rights Associations, are confident. The Department of Justice made a poor case when it was defending Maine's landowners, but is proceeding vigorously to carry out the instruction the court gave it to defend the Indians. The president has announced he will not sign a congressional act to extinguish the land claims.

Perhaps the country will not awaken to the third great hegira in North American history until a melancholy train of vehicles, piled high with the possessions of the emigres, crosses the bridge at Portsmouth. Perhaps only in the distant future will literature embellish that expulsion with the drama with which it has invested the British deportation of the Acadians or the tragedy pictured in the "Trail of Tears," in which one-fourth of the Georgia Indians died.

What a curious irony that the descendants of those who drove the Indians out of Georgia now are engaged in driving the non-Indians out of Maine. What an amazing history is unfolding. The mighty Penobscot Indians, armed with the Tomahawk, the scalping knife, and the bow and arrow, for more than a hundred years terrified English settlements from Massachusetts to Machias, in a vain effort to check the invasion of their hunting grounds. Now, more than two hundred years later, armed only with subpenas, writs, and summonses, their descendants seem to be on the brink of a spectacular success.

THE NEED TO REDUCE TAXES NOW

(Mr. STANTON asked and was given permission to address the House for 1

minute and to revise and extend his remarks and include extraneous matter.)

Mr. STANTON. Mr. Speaker, the House Ways and Means Committee has only begun to deal with the President's $25 billion tax reduction program and yet that program is in trouble.

The prospect of sizable income tax cuts for individuals and business is in trouble primarily for one reason—deepening inflation.

Some members of the Ways and Means Committee are talking about cutting back the tax cut to $15 or $20 billion in order to hold down the Federal deficit in the inflation fight. My friend and neighbor CHARLES VANIK is heading up a move to junk the 1978 tax reduction entirely, get at least some tax reforms approved, and maybe reduce the projected deficit by about half. Mr. VANIK would simply extend the modest tax cuts of 1977, and I am told the vote on the Vanik proposal will be close.

The Vanik proposal has much appeal but we need the $25 billion tax cut proposed by the President. We need the tax cut to prevent the economy from sliding into a recession. The American people need the tax cut. Their tax bills are far too high and inflation keeps bumping them into higher income tax brackets, which is the same thing as raising their taxes. What we need to do is to cut taxes and to cut Federal spending at the same time.

Mr. Speaker, I say to you and to my other colleagues that if the American people fail to get tax relief this year it will be because Mr. Carter has failed to fight inflation during the entire 15 months he has been in office.

In fact, not only has Mr. Carter failed to fight inflation, he has even helped to promote it.

Last year, it will be recalled, Mr. Carter signed into law a number of bills that pushed up the cost of doing business—and thus pushed up prices. That legislation included minimum wage increases, rises in social security and unemployment taxes, strip mine controls, and a bill which had the effect of greatly boosting sugar prices.

Now Mr. Carter has vowed to do battle with inflation—like he did when he delivered his state of the Union message to Congress in January. And he has promised to veto any bill that adds to the $60 billion fiscal 1979 deficit he is so proud of. I say that Mr. Carter brandishing his veto threat now is like a brakeman standing at the depot and swinging a stop lantern at a train that has already left the station.

Matters would be much worse if Mr. Carter had had his way last year and had managed to push his cargo preference bill through the Congress. Congress wisely rejected that legislation and saved us all an additional inflationary burden.

Not only does Mr. Carter come belatedly into the inflation fray. I understand he donned his shining armor only because he was pressured by Treasury Secretary Michael Blumenthal, chief economic adviser Charles Schultze, and Federal Reserve Board Chairman G. William Miller.

I do not know why Mr. Carter had to be pushed into fighting inflation. The Consumer Price Index has risen at an annualized rate of 8.4 per cent so far this year and the Wholesale Price Index has been going up even more sharply. I personally believe the inflation rate for consumers will be 7½ to 8 percent by year's end and could reach double digit figures in 1979 unless the President's anti-inflation program has an impact.

Reducing inflation requires follow-through and inspired leadership.

Unfortunately, Mr. Carter has yet to prove he is a leader.

Maybe we should take comfort in the fact that Mr. Carter has named his special trade representative, Robert Strauss, as special counselor on inflation. Mr. Strauss is well known as a snake-oil artist, a charmer who might be able to score some anti-inflation points with both business and labor.

I hope Mr. Carter's anti-inflation program succeeds. But his past record does not give us much reason to be optimistic. And neither does the attitude of American labor leaders, who understandably are pointing to the highly inflationary coal settlement as an indication of what their union members expect as a result of their next contract talks.

I do believe Washington should set an example in the fight against inflation. But I do not believe industrial workers are going to be particularly impressed by the possibility that Federal workers will be held to a 5.5 percent cost of living increase next October.

We are now in our fourth year of economic expansion. If Mr. Carter wanted to set an example for the Nation he would reduce the Federal deficit for fiscal 1979 to at least the $53 billion anticipated for this fiscal year rather than peg it at $60 billion.

Mr. Speaker, I agree with Ways and Means Committee senior Republican BARBER CONABLE when he says:

> Not to cut taxes at this point would raise the total tax burden of the American people by default. The recently enacted Social Security tax increases and the impact of inflation on the graduated income tax have combined to add billions to federal taxation. The issue, then, is not one of stimulus but of trying to reduce the drag on the economy, struggling under these great tax burdens. It is also one of tax equity for the individual who must otherwise constantly run faster to keep from falling behind. If Congress is unwilling to index taxes while pursuing inflationary policies, it must repeatedly pass tax reduction measures or subject our citizens to the double jeopardy of lost purchasing power and tax exploitation.

MUST LEGISLATION TO COMBAT ILLEGAL ALIEN PROBLEM

(Mr. ASHBROOK asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. ASHBROOK. Mr. Speaker, for a number of years the Director of the Immigration and Naturalization Service (INS) has been warning that the influx of illegal aliens into the United States was reaching unmanageable proportions. Estimates of between 8 and 10 million illegals have been advanced, demonstrating the enormity of the problem. While the administration has talked about amnesty for illegals now in the country, the logical and long-established solution, in my opinion, is deportation supplemented by a beefing up of the Border Patrol to drastically reduce future entries.

In checking with the INS people both here and at the border, I have been informed that, unlike the drug traffic where conveyances can be confiscated, there is no provision in law to confiscate vehicles carrying illegal aliens. In fact, vehicles that are apprehended with a shipment of illegals are returned to Mexico, in many cases, to be used again in this illicit traffic.

As in the illegal drug traffic, smuggling rings dealing in the transportation of illegals do exist and are big business. See the item from the San Diego Union of March 22 of this year reporting the capture of 116 illegals caught in one truck. Earlier in the month 110 illegal aliens had been apprehended—riding in two vehicles.

The alien smuggling trade has reached the point of sophistication in which vehicles use false panels, floors, and so forth, to secrete human beings; alteration of conveyances previously apprehended to avoid future detection; the use of "drop houses" in the United States to facilitate the shipment of humans from one point to another.

Needless to say, widespread confiscation of these "special" vehicles would drastically reduce, if not cripple, the smuggling rings which now capitalize on the human yearning for a better way of life.

I have joined with several of my colleagues in offering legislation to plug a loophole which is most glaring. My legistion would grant authority for confiscation of vehicles used in transporting illegal aliens into the United States. Hopefully, this legislation will see quick enactment.

Inserted at this point in the RECORD are two items from the San Diego Union, "116 Illegal Aliens Caught in One Truck", appearing in the March 22, 1978, issue, and "19 Indicted as 'Drop Houses' Hit," which was carried in the April 7, 1978, issue.

ONE HUNDRED AND SIXTEEN ILLEGAL ALIENS CAUGHT IN ONE TRUCK

SAN MARCOS.—Border Patrol officers yesterday apprehended 116 illegal aliens who were being transported north in a single semitrailer truck.

A sheriff's deputy spotted the truck parked in the 700 block of La Moree Road and reported to Border Patrol officers that suspicious persons were being loaded into the vehicle.

As sheriff's deputies approached, the suspects scattered. More sheriff's units along with Border Patrol officers were called about 11 a.m.

Some of the 116 were in the immediate area while others were attempting to hide in the truck. Taken into custody on suspicion of transporting undocumented aliens was the driver of the truck, George Beadles, 32, of Buena Park.

According to officials about 15 of those arrested were residents of El Salvador and many of those taken into custody said they had paid between $50 to $300 each to be taken to Los Angeles.

Border Patrol Agent Alvin Francis said it appeared the truck was to be driven through the San Clemente checkpoint over the truck scales to escape detection.

Earlier this month, 110 illegal aliens were apprehended riding in two vehicles.

ALIEN CASE: NINETEEN INDICTED AS "DROP HOUSES" HIT

(By Roger Showley)

For the last few months, Saad Hirmez noticed that two or three Mexican men shopped almost daily at his grocery store, Miller's Market at 30th and C streets.

"They would come in at 9 a.m. and buy 18 packages of tortillas, chorizo, eggs, beer, coke, soda, lots of fruit punch," the grocery manager recalled.

During this same period, the residents and staff of the House of Metamorphosis, a drug rehabilitation center, noticed an unusual number of vans and cars driving to and from two nearby homes in the Southeast San Diego community.

The pattern was consistent. Someone would stand out on the curb while one or more vans pulled into the alley.

"At first, I thought it was a drug ring or drug connection," one of the residents said. "Then, when I saw the people were Chicanos, I knew it was alien smuggling."

Yesterday, federal officials said the two houses at 628 and 634 30th St.—and a third one nearby at 2954 Webster St.—were being used as "drop houses" in what was described as a major alien smuggling ring.

Border Patrol officers said that during the six months the three sites were under surveillance in a secret investigation, as many as 3,000 persons may have been transported in newly purchased vans from the border to these drop houses, where they waited for several hours—perhaps days—before boarding the vans again.

The vans followed a 400-mile circuitous route to Los Angeles via Arizona to avoid the immigration checkpoints at San Clemente and Temecula, officials said, noting this was an unheard-of procedure in the annals of alien smuggling.

A federal grand jury here handed down an indictment late Wednesday naming 19 persons, 15 of whom were arraigned yesterday in U.S. Magistrate Edward W. Infante's court. A 16th is expected to be arraigned today and more arrests are expected in the next few days. The charges involve conspiracy to harbor and transport illegal aliens.

NEVER SO MANY

"We have never had a case with this many defendants here at one time," said James C. Heinecke, head of the U.S. Border Patrol's anti-smuggling unit. "It's one of the largest rings here and probably anywhere lately."

The maximum penalty for alien smuggling is a $2,000 fine per smuggled alien, a five-year prison sentence or both.

The alleged smugglers, aged 17 to 52, sat in Infante's courtroom yesterday morning, wearing the red, blue and orange uniforms provided by the Metropolitan Correctional facility, where they are being held.

An interpreter was needed to convey the court's procedures to the seven American and eight Mexican citizens.

According to investigators, the case is both predictable and unique—predictable in the way smuggled aliens were treated in passage from Mexico into the United States, unique in the way the alleged smugglers tried to circumvent authorities.

ANONYMOUS TIP

The investigation began on an anonymous tip to the Border Patrol last October. The name of Naomi Irene Jackson, also known as Irene Perez and Maria Garcia-de Sanchez, was provided, along with vehicle license plates and street addresses.

Daniel McCaskill, a border patrolman, was assigned alone to the case and sporadically took up watch 100 to 200 yards away from the houses on 30th Street.

McCaskill received help from six more patrol officers starting Feb 1, when a special 60-day anti-smuggling program began. It has since been extended an additional two months. The agents watched the smugglers shop at a nearby grocery. They watched new vans, being driven in between the two houses on 30th Street, where aliens were loaded or discharged.

Finally, on March 12, the Border Patrol made its first arrest, of Antonio Ortega-Borrayo, 52, of Santa Barbara. Then on March 26, the major arrests were made, followed by two more in the next several days.

WITH DAUGHTER

Jackson, the woman with two aliases, was arrested Tuesday with her 17-year-old daughter, Rebecca, by Mexican authorities at the Hotel El Sol in Tijuana and turned over to U.S. authorities Wednesday.

McCaskill already had looked into Jackson's background. She was a 42-year-old American, three times married, and 25 years on the welfare rolls. In addition to Rebecca, her children Ruth, 19, and Johnny, were arrested on suspicion of alien smuggling.

McCaskill said a check of long-distance telephone records showed numerous calls had been made to Los Angeles, Chicago and Indiana from the 628 30th St. house, where Jackson and her children were listed as residing.

What this information pointed to, McCaskill said, was a highly organized smuggling ring, in which Mexican nationals crossed the border at prearranged spots, boarded vans under cover of darkness and rode to the "drop houses" on 30th Street, Webster Street and possibly three other locations.

After a wait of several hours or days, the aliens then boarded the vans again, bound for Los Angeles, via points in Arizona to avoid immigation checkpoints at San Clemente and Temecula. For this, they paid between $200 and $300 per head. From Los Angeles, they paid additional funds for a flight to Chicago and other cities, where jobs awaited in garment factories and other labor-intensive industries.

FROM PHOTOS

According to photographs provided by the Border Patrol, the aliens had to suffer intolerable conditions of filth and human waste in the drop houses for hours or days at a time until they could be transported to the next destination.

At one of the drop houses on 30th Street, photos showed plastic jugs full of urine arranged in a row on a dirt-covered floor of an old garage. At the time of the March 26 arrests, there were 28 aliens waiting to be transported to Los Angeles, agents said, and many of these people were wrapped up in blankets on the floor, amid discarded food wrappers, soft beverage cans and bits of garbage.

McCaskill said the conditions were not unusual. And the ring, while the largest encountered in the current crackdown, is small compared to a ring he has been chasing for six years that involves an estimated 130 smugglers. He said this ring is thought to be the largest in Mexico, involving the transportation of Central and South American nationals through Mexico into the United States.

As McCaskill's boss, Heinecke, remarked, "Illegal aliens are a commodity to be bought and sold, to be moved in here and then moved out."

THE SEAL HUNT ENDED YESTERDAY—APRIL 24 YOU WERE ON THE ICE—MARCH 12 (FIRST DAY OF THE HUNT)

The SPEAKER pro tempore (Mr. BENJAMIN). Under a previous order of the House, the gentleman from California (Mr. RYAN) is recognized for 60 minutes.

Mr. RYAN. Mr. Speaker, the hunt has been going on in Canada for nearly 200 years.

More than 50 million seals have been killed over the years in the Front and Gulf off Newfoundland.

Canadian journalists have referred to it as the "greatest, most protracted mass slaughter ever inflicted upon any wild animal species".

Demand for seal products was high in the 19th century when the blubber was processed into oil used in the manufacture of soaps, ointment, perfumes, and later margarine.

A historical perspective:

Like medieval men rallying to the call of a crusade, the outporters left their humble homes in February and headed for St. John's. The captains, men of island-wide fame, handed out berth tickets with the air of feudal lords bestowing favors. The fleet left early in March. The ships, originally designed for 40 or 50 whalers, now carried 150 to 200 sealers. Most slept in the hold, a filthy, fetid, floomy hellhole, curling up anywhere they could find space. They had no beds, no bunks, no blankets. Until they reached the seals, the men subsisted on hardtack and tea, after that on seal meat, often eaten raw, especially the hearts. The men were bound together by a rough and honest camaraderie. The trips had the spice of gambling. In 1901 the Southern Cross sailed straight into the heart of the "main patch" and was back in St. John's, loaded with pelts, this time taken in the Gulf, got caught in a storm on the way home. She never arrived. Lost with her were 173 men. "The sea is made of mothers' tears", is a Newfoundland saying. Excerpt from "The Life of the Hard Seal," Fred Bruemmen.

Today, the seal hunt resembles only remotely the danger, adventure and economic necessity of the hunt during the 1800's. In fact, one Canadian journalist suggests that modern sealers "take to the hunt as an exhilarating release from grinding poverty and as a primeval rite of spring."

Another perspective: My counsel who is a woman, who accompanied me to the ice floes this year, was verbally blasted on the ice by a bearded young sealer with blood smeared under his eyes. When she asked him how long he had been sealing, he retorted: "Go away woman, can't you see I'm working." The comment suggests that the sealing activity to prove their manliness is one of few remaining primitive hunting activities that has survived the Ice Age. I submit the price is too high to the rest of the world.

STATISTICAL INFORMATION

Until 1971 no quotas for the take had ever been established.

The take averaged 282,000 a year throughout the 1960's.

All authorities agree that during the 1950's and 1960's harp seal numbers dropped by at least 60 percent.

In 1971 the quota was set at 245,000.

In 1972 the quota was reduced to 150,000 and remained unchanged for 4 years.

In 1975 the quota of 150,000 was exceeded by 24,000 seals.

In 1976 the quota was reduced to 127,000 but the take amounted to 165,000.

The pattern is distressing. The high catch in 1975 exceeding the quota, was followed by a lower quota in 1976 which was also exceeded.

The 1977 quota was raised to 170,000, an increase in the quota by one-third.

In 1978, the quota was raised to 180,000.

ECONOMIC FACTORS

The unit value of the seal pelt in 1976 was $29.76.

Pelt sales contributed $3 million to the Canadian economy in 1976.

Pelt sales accounted for 77 percent.

Oil sales accounted for 9 percent.

Meat sales accounted for 14 percent.

The sealers receive little remuneration for their 6-week efforts: Lansmen, $232; and small vessel sealers, $1,256.

And 27 percent of the seal hunters receive a gross income over $500. (I interpret that to mean that 73 percent of the sealers receive gross incomes under $500.)

The profiteers in the venture are the large vessel operators averaging $35,000 for the season.

The cost of monitoring the hunt is over one-half million dollars.

Only 4,000 sealers engage in the hunt. The population of Newfoundland is 554,000.

The seal skins are used for trinkets, key chains, bow ties, fur-lined cigarette cases and trim on boots.

CONFLICTING SCIENTIFIC DATA

Five studies were recently completed on the Harp seal population. Four of the five studies suggest the population is still in decline.

Based on the conflicting data, the International Union for Conservation of Nature and Natural Resources (IUCN), an independent non-government body headquartered in Switzerland, called for a cancellation in the hunt this year.

The IUCN is a highly respected organization which has existed since 1948 to promote scientifically based action for the conservation of wild living resources.

The IUCN concluded that the 1978 take may well reduce the total population of the Harp seal rather than allow it to grow (as is Canada's policy).

METHODS OF KILL

Killing the Harp seal with a hakapik is the most well-known method. However, other methods, less publicized, are equally as barbarous if not more inhumane.

NET FISHERIES

The fishermen set the nets in the water. The Harp seal becomes trapped in the net, and undergoes a slow death by eventual drowning. (The number of Harp seals taken by this method are unknown.)

SPEED BOAT HUNTING

This method entails shooting the Harp seal while it is swimming in Canadian waters. Again, the take is hard to estimate, not to mention the numbers that cannot be retrieved after they are shot for one reason or another.

FINAL NOTE

On September 20, 1977, two Newfoundlanders were charged with cruelty to animals under the Newfoundland Provincial Animal Protection Act for poking the eyes out of porpoises. H. W. Stone, magistrate of Clarenville Court found the two men not guilty.

Rationale: The Animal Protection Act can be invoked only to protect animals that are in captivity. Thus, the act has absolutely no value in protecting the Harp seal.

(This story is enlightening in understanding the difference that exists between the United States and Canada regarding what constitutes animal protection.)

● Mr. D'AMOURS. Mr. Speaker, I rise on this occasion to urge the Government of Canada to heed the growing international protest toward its present policy of allowing the annual harp seal hunt.

For 6 weeks every year, Canadians and Norwegians venture onto ice floes off the coast of Newfoundland to hunt baby seals for their pelts. The Canadian hunters beat the seals on the head with a club until they are dead. The Norwegians use a long, spiked pole called a hakapik. These helpless pups are skinned on the spot and their carcasses are left behind to rot.

Not only can the method by which this hunt is conducted be called cruel, but more disgusting is the fact that it does not serve to meet any of the basic needs of man. The seals are not used for food, and their pelts do not go for clothing. Rather, the entire purpose of the hunt is to get pelts that go for trinkets and souvenirs for the tourist industry.

It has been brought to light in recent years that the Canadian Government's own figures showing the current herd count of harp seals are grossly overstated. The Government itself has admitted that its counting method consists primarily of fishing officials just walking through the herd to get a feel for its size.

Concerned groups from all over the world have protested the hunt with renewed vigor. The House of Representatives itself overwhelmingly passed a resolution last year urging the Canadian Government to reassess its policy of permitting these killings.

Yet, despite all these facts, the Canadian Government has irresponsibly responded by substantially increasing the permitted kill quota of these animals by 53,000 over the last 2 years. This year alone 180,000 harp seals will be slaughtered. This continued practice is pushing this species to extinction, most likely by the end of this century.

The continued existence of the harp seal is at a critical juncture. We cannot afford to sit idly by if we expect these animals to survive. I call upon the Canadian Government to exercise its moral responsibility and take action that will preserve the harp seal for future generations.●

● Mr. PEPPER. Mr. Speaker, the advent of spring signals a yearly event which takes place off the coast of Canada—the killing of thousands of newborn harp seals. Annually, Canadian and Norwegian clubbers descend upon these helpless creatures for their valuable white fur.

Under the Marine Mammal Protection Act of 1972, these skins cannot and have not been imported into the United States. The Canadian and Norwegian Governments have assured us that the kill was humane and that it was not endangering the harp seal herd with extinction.

I believe that this hunt is neither humane nor necessary. Respected scientists agree that the harp heal population is becoming endangered, and a study by the Swedish Museum of Natural History suggests that harp seal numbers are gradually declining. While more humane methods of killing the seals are being developed, furthermore, the quotas on these killings are being virtually ignored.

The argument that these seals are killed to prevent overcrowding is not valid. The Canadian Department of Fisheries and Forestry admitted that there had been an overkill in the North Atlantic in recent years and that the herd that arrived off Labrador was seriously depleted. Canada's own figures further indicate that the size of the herd has been reduced considerably in the last 20 years—from 5 million to 1.5 million.

Despite these figures, the fact also remains that coats and other items made from this fur are hardly necessities in our society. It is apparent that something must be done to protect these creatures from their annual fate; and the passage of House Concurrent Resolution 533, urging the Canadian Government to reassess its policy of permitting the killing of newborn harp seals, would definitely be a step in the right direction.●

● Mr. KEMP. Mr. Speaker, I join my colleagues today in expressing my deep concern over the senseless slaughter of the harp seal pups in Canadian waters.

Last year, the Congress sent to the Canadian Government a strong message of opposition to the Canadian Government's continued policies permitting this annual harp seal hunt. Yet this year the total allowable catch has increased by 10,000—up to 180,000. Even the Canadian Government admits that approximately 80 percent of this quota will be filled by "whitecoats"—that is, pups under 10 days old who still have the transparent, pure white fur that will be sold for trinkets and boot trim.

I have introduced new legislation, House Concurrent Resolution 532, which again expresses the U.S. Congress serious reservations over Canada's harp seal policies. This bill has 67 cosponsors, and specifically draws attention to the increased quota.

The arguments against the harp seal hunt are many, and frankly, stem from a sense of the inhumaneness associated with killing defenseless pups less than 10 days old. Even regulated sport hunting does not allow the mass killing of wild animals' young. The obvious counter to this, and the argument that the Canadian Government makes in return, is that the inhabitants of the Canadian Arctic and Greenland and the landsmen of Newfoundland need the revenue from this annual seal hunt to exist during the winter months. What the Canadian Government fails to point out is that less than half of the seal pelts taken in 1977 went to these people. More than one-half were harvested by large Canadian and Norwegian commercial ships. This year the Norwegian quota alone was 35,000 pelts. None of these pelts, or the revenue from them, returns to Canada.

These pelts return to Norway, where they are prepared for the European market. Yet there is strong evidence that the market for seal pelts is severely decreasing due to environmental group protests, even though the Canadian quota for 1978 was increased. In fact,

there are numerous reports of 1976 pelts still in storage for lack of buyers, and white-coat pelts being dyed before they go to auction.

Because of the lack of complete data on the seal population, there are differences of opinion as to the total size of the herds. One thing, however, is known—that the total harp seal population has dropped by approximately two-thirds within the last 20 years. Herds that used to number approximately 10 million at the begining of the century are now reduced to roughly 1.3 million. Subsistence harvest levels now announced by the Canadian Government attempt to keep the seal population at around the 1.3 million level. Yet there is no guarantee that this harvest plan will keep the herd at a healthy size. Observers at the 1977 and 1978 hunts have witnessed seal dams aborting their pups on the ice before their time. It is theorized that these dams, who bear new pups each spring, may be responding to the repeated slaughter of their pups by sealers in previous years. If this situation becomes prevalent, the outlook for the harp seal herds will indeed be grave. Dr. David M. Lavigne, the noted scientist widely quoted by the Canadian Government for his work on the infrared tracking of harp seal populations, stated in the January 1976, National Geographic:

> Although it is still too early to give a definitive answer (about the total harp seal population), it seems clear that the harp seal is in trouble. . . . As our census continues, we see increasing evidence that the western Atlantic harp seal population cannot survive continued harvesting by big factory ships. Perhaps the landsmen, under strict rules, may still go out on the seasonal hunts. But we must work fast to provide reliable figures to hunters and conservationists alike. The survival of the harp seal hangs in the balance.

I strongly urge the Canadian Government to take another look at their policies of encouraging this anual harp seal slaughter. To slaughter a vulnerable species for trinkets and toys is a cruelty beyond belief.●

GENERAL LEAVE

Mr. RYAN. Mr. Speaker, I ask unanimouse consent that all Members may be permitted to extend their remarks on the subject of my special order today.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

H.R. 2222 IS BAD LEGISLATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Ohio (Mr. ASHBROOK) is recognized for 10 minutes.

● Mr. ASHBROOK. Mr. Speaker, today the Rules Committee granted a 1-hour open rule on H.R. 2222, a bill to amend the National Labor Relations Act to include interns, residents and fellows who are engaged in hospital training programs as professional employees within the definition of section 2(12)(b) of that act. The asserted need for this legislation is to overrule the National Labor Relations Board's decision in the *Cedars-Sinai Medical Center* case, 223 NLRB 251 (1976), reconsideration denied 224 NLRB 626 (1976), in which the Board, with all the facts before it, held that interns and residents were primarily "students" and not "employees" nor professional employees as those terms are used in a collective bargaining sense.

I am opposed to this bill for a number of reasons as set forth in the minority views in House Report No. 95–980, pages 10 to 18. Additionally, there are a number of issues that should be more fully explicated so that the House may be aware of these additional factors before it acts. These issues can be summarized as:

Dividing three parties two ways;

Bargaining unit determinations for interns and residents;

Bargaining over educational topics;

NLRB intrusion into educational activities;

Exclusion of graduate students in fields other than medicine;

Number of persons affected;

Administrative complications of enactment;

Opinions of residents opposed to H.R. 2222;

Impact on community teaching hospitals and primary care;

Inflationary impact; and

Destroying the intern and resident matching program.

Let me begin with two points today. Other points will be covered in future special orders.

DIVIDING THREE PARTIES TWO WAYS

The National Labor Relations Act is a carefully fashioned piece of legislation designed around some critical assumptions. One of those assumptions that collective bargaining can be adequately conducted in a two-party setting; that is, that labor and management are the two significant parties to the dispute. This assumption, while reasonable in the standard industrial or commercial setting, does not characterize the setting of graduate medical education.

Graduate medical education is, at minimum, the outcome of the collaboration of at least three parties: interns and residents, teaching faculty, and hospitals. The hospitals, like universities, provide the institutional setting and administrative operation within which graduate medical education occurs. They do not, however, provide the teaching or patient care supervision of the intern and resident. That teaching and supervision is provided by a third party, the faculty. Faculty determine the tasks which are to be assigned to a resident. Faculty determine the resident's competence in performing those tasks. Faculty determine the patients on whom the resident will assist. Faculty determine the degree of independence that the resident will have in any particular case. Faculty evaluate the resident for continuation in the program. Thus, we must conclude that significant decisions about graduate medical education programs are made by a faculty.

The assumption of a two-party negotiation under the National Labor Relations Act is violated by reality. If residents are to organize and collectively interact with the hospital, the absence of a role for faculty may undermine the bargaining. It would be unwise to solve this problem by simply combining the faculty and the hospital into the employer unit. The teaching faculty and hospital management may have differing perspectives which should be preserved. Given the heavy educational emphasis of accredited graduate medical education programs, resident relationships should be based upon an educational model rather than an industrial model. The two-party assumption of the industrial model is inappropriate. The three-party combination of the educational model—faculty, student and institution—is appropriate. Under the National Labor Relations Act, I see no possibility for the preservation of the existing and essential three-party relationship in graduate medical education. Therefore, rather than legislating the form and structure of graduate medical education, by artifically imposing a two-sided relationship, I am opposed to H.R. 2222 and would urge my colleagues to oppose it for similar reasons.

BARGAINING UNIT DETERMINATIONS FOR INTERNS AND RESIDENTS

H.R. 2222 is a significant piece of legislation which seeks to deliberately overturn a carefully reasoned position of the National Labor Relations Board that individuals who are essentially in a student role should not be granted collective bargaining rights. The bill is made all the more significant by the sudden effort of its proponents to use this bill to proliferate the number of bargaining units in hospitals.

In the reports accompanying the 1974 health care amendments to the National Labor Relations Act, the Congress directed the NLRB to prevent the proliferation of bargaining units in the health care industry. When the Subcommittee on Labor-Management Relations and the full Committee on Education and Labor marked up and approved H.R. 2222, the proponents were questioned about their intentions regarding bargaining unit determinations for interns and residents. In both sessions it was publically stated that the NLRB should be free to determine the appropriate bargaining unit for these persons.

Nevertheless, in direct contradiction to the proponents' statements, the committee report on H.R. 2222 now advocates a separate and distinct bargaining unit for interns and residents. This sudden and unexplained shift is directly contrary to the congressional directive of 1974, a directive I still find to be desirable.

Therefore, I urge those supporting this bill to adopt a position which clearly reiterates the position that proliferation of bargaining units should be avoided in health care institutions and which directs the NLRB to determine the appropriate bargaining unit for interns and residents under its normal procedures. Otherwise, the small bargaining units resulting from this bill will undermine the previous congressional directive and stimulate many similarly small units. This most certainly would cripple our Nation's hospitals.●

NO PEACE IN MIDEAST UNLESS ARAB COMMUNITY CONTROLS TERRORISTS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Oklahoma (Mr. EDWARDS) is recognized for 5 minutes.

● Mr. EDWARDS of Oklahoma. Mr. Speaker, we are all saddened by the recent Palestinian terrorist attack on innocent civilians just north of Tel Aviv. Thirty-one people were killed and more than 80 were wounded. But I am all the more saddened over what this cowardly act will do to Mideast peace prospects.

Egyptian President Sadat, in another display of courage and statesmanship, has condemned this attack. I believe he understands why Israel insists on secure borders, understands the history of the oppression of the Jewish people, understands how the Holocaust has influenced the attitude of all Israeli citizens toward threats of external hostility, understands that no final peace agreement between Israel and the Arab world will come to pass until Israel truly believes it will be free from the threat of terrorism.

The Arab community must come to realize that it must control the terrorist organizations in their midst or there will be no chance for peace in the Mideast. I am particularly concerned about the support Saudi Arabia has given the Fatah, the major branch of the Palestinian Liberation Organization, founded and led by Yasir Arafat. The official Saudi radio claimed this massacre was a courageous operation designed to "let the world remember that the Palestinians do exist and that no peace talks will succeed without their participation." The Saudi Arabian Government has also contributed large sums of money to the PLO. Last year Time magazine reported that the Saudi Government had given $5 million to Yasir Arafat and that this was in addition to the $25 million that the Saudi Government annually contributes to Palestinian refugee organizations.

A New Year's Day broadcast on Saudi radio this year revealed that the Fatah had received 120 million riyals—about $34 million—from the Saudi Government and Saudi organizations.

It seems clear to me that some of this money goes to buy weapons and materials for PLO terrorists. Until the Arab community is willing to put its own house in order and restrain the terrorist organizations, peace will never come to the Mideast.●

PLAYGROUND SAFETY BILL REINTRODUCED

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Ohio (Mr. WHALEN) is recognized for 5 minutes.

● Mr. WHALEN. Mr. Speaker, I am pleased to note that the Public Playground Equipment Safety Act is being reintroduced today with 15 new cosponsors.

First introduced on March 16 by NEWTON STEERS and me, this legislation, H.R. 11614, is intended to help reduce the number and severity of accidents involving children's playground equipment. Currently, over 100,000 children each year are seriously injured in accidents involving playground equipment. This shows up year after year as the fifth most common category of product-related injuries requiring hospital treatment.

Of course we recognize that there is no way anyone could possibly hope to eliminate all playground accidents. But there very definitely are steps that can and should be taken now to eliminate design defects that make some playground equipment inherently hazardous.

By the simple steps of causing the Consumer Product Safety Commission to issue advisory standards and creating the basis of a strong market for safer playground equipment, we believe children's playground equipment can be made much safer than it is today. There need not be any imposition on the private marketplace and the cost to the public would be negligible.

Mr. Speaker, I find it very interesting to note that most of the cosponsors of the Public Playground Equipment Safety Act are from metropolitan areas. Very few are from truly rural districts.

I do not think this is because Representatives from rural areas have any less concern for the safety and well-being of children. Rather, I think it is just a matter of Members who come from urban areas being more familiar with public playgrounds.

For many American children, there are no big open fields to go out and play on. There are no nearby woods and streams to provide recreational outlets. Instead, many children in our Nation's metropolitan areas must rely on public parks and playgrounds for their recreation. And even in the less densely populated areas, many childhood hours are spent on school playgrounds or other public facilities.

Parents naturally assume that schoolyards and public playgrounds are safe places. But this is not necessarily a correct assumption. Until H.R. 11614 or comparable measures are enacted there is no way for parents or local officials to establish the safety of the equipment on which children play.

The Public Playground Equipment Safety Act remains open for additional cosponsors, Mr. Speaker, and we encourage our colleagues to join in this effort to help protect American children.●

DEATH IN TRANSIT—V

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas (Mr. GONZALEZ) is recognized for 5 minutes.

Mr. GONZALEZ. Mr. Speaker, in order to emphasize the woeful need for transportation safety I evoke a most painful Texas tragedy.

Almost exactly 3 years ago—on April 29, 1975, to be precise—it was a clear day in Eagle Pass, Tex.

At midafternoon people were going about their daily business. Just outside of the town, Route 277 was about the same as any other small-town highway—a mobile home park, an oil company loading and storage area, a used-car lot, and intersecting county roads.

At exactly 4:20 p.m., a tractor-trailer loaded with butane and propane approached Eagle Pass, headed west on Route 277. There was a dirt road intersection near an irrigation canal there, on the outskirts of town. A used car lot and junkyard was also there, and a number of cars were parked along the roadside, near the lot.

The truck was moving at about 50, or perhaps 55 miles per hour, just at or slightly above the posted speed limit.

A white car ahead of the truck suddenly slowed down to turn off the road, which was a two-lane highway. No one remembers seeing any turn signal from the white car. The truck swerved to avoid the car, which put the truck into the lane for oncoming traffic. There were three cars in that lane, headed toward the truck.

The truck driver, having avoided the turning white car, swerved again to avoid the three cars bearing down on him.

The stresses of this double swerve caused the trailer to separate from the tractor, and the trailer also turned over.

The tractor came to a halt, or nearly to a halt, but the overturning trailer skidded into the 23-inch high, 12-inch thick headwall of a culvert for the irrigation canal, which ran under the roadway. The trailer split open.

Inside the trailer was a load of pressurized LPG, 8,748 gallons of it, split evenly between butane and propane. These gases were at about 80 pounds of pressure per gallon, which made them liquid. But, of course, when the tank split open, the pressure disappeared—witnesses said that it sounded like a windstorm—a windstorm because the decompressing liquid gas immediately vaporized. Then there was a violent explosion, a fire, another explosion. No one can say for sure what happened, it was so fast and so violent.

When the fire died down and the explosions ended, there were 16 people dead, 51 injured, 1 building destroyed, 51 vehicles destroyed, and 3 mobile homes destroyed or damaged. The large forward section of the tank was propelled 1,654 feet before it came to a rest.

The truck involved was owned by a Mexican company and the driver was a Mexican citizen. No one has ever been able to find out who drove the white car that slowed down to turn in front of the truck, or even to find the car; it simply vanished.

Federal regulations required that the driver of the truck have a medical certificate, but he did not. He was supposed to have a Mexican driver's license, but no one knows for certain if he did. Nor were Federal safety investigators able to learn anything about the driver's experience or his safety record.

The National Transportation Safety Board observed that—

> Neither the vehicle, the driver, nor the company were in compliance with all applicable Federal Motor Carrier Safety Regulations.

The carrier, Surtigas, a Mexican company, had never been served with a copy of the regulations, even though it was subject to those regulations while its vehicles operated inside the U.S. border.

But because it is a Mexican company, no one has ever been able to examine whatever vehicle maintenance and driver records it maintained.

It is possible that this accident could not have been prevented under the circumstances, no matter how well maintained the vehicle was or how skillful the driver might have been. The roadside was cluttered with parked cars, which greatly restricted maneuvering room; the car in front of the truck slowed suddenly, and probably never gave a turn signal; there was oncoming traffic that also had to be avoided.

But no one can question the driver, because he is dead. His skull was crushed, probably by the force of the explosion. No one knows for certain what kind of condition the vehicle was in, because it was so wrecked by the explosion that no real examination of it could be made, and no records were available from the Mexican company.

If the speed limit had been lower, and if the truck had been moving at such a lower limit, the accident might have been avoided. But no one knows.

What we do know is that Mexican-owned trucks can, do, and are, operating on the U.S. side of the border and that there is no real recourse if they become involved in an accident, even a major disaster like the holocaust at Eagle Pass.

Texas law does not require Mexican operators in the border zone to be registered, licensed, or inspected in Texas. Federal inspectors do not stand at the border handing out the applicable Federal regulations, because they cannot really be enforced on foreign owners. After the Eagle Pass disaster, Federal safety officials, again in the words of the National Transportation Safety Board, "made roadchecks at border crossing points to identify other LPG carriers and to assure that they were aware of the regulatory requirements * * *"

But even if they are aware of regulations, suppose these carriers are not in compliance? Who is to know, and how is the law to be enforced? The State law practically exempts these carriers, and the Federal staff is so small that it may not even know which carriers are operating inside the U.S. border. Indeed, Federal safety personnel did not even know that Surtigas, S.A., was operating in Texas.

Our laws end at the border, but the traffic flows across the border. American operators must abide by all the rules, and can be penalized if they do not. But Mexican operators do not have to comply, because they cannot effectively be penalized.

Even supposing that the driver and vehicle in this disaster were not at fault, the hard truth is that they could have been and might have been. What then? What recourse would our law enforcement agencies have, and what recourse would aggrieved families have? None at all. In this case, the lawsuits were directed against the tank manufacturer—an American firm. The foreign truck line was safe—safe from answering any questions, safe from any legal recourse, and safe from having to comply with U.S. safety laws and regulations, whether known to him or not.

There are sober lessons in this. It is clear that we need some means of assuring that foreign truck lines not only know about U.S. safety requirements, but abide by them. More important, those same foreign truck operators ought to be exposed to the same legal liabilities as American lines are. That alone would assure compliance. That alone would assure that legal liability, where it exists, will be borne by the party responsible, and not by the innocent victims.

THE DuNOIR OF WYOMING

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Wyoming (Mr. RONCALIO) is recognized for 5 minutes.

● Mr. RONCALIO. Mr. Speaker, I am today introducing legislation to add the 28,800-acre DuNoir Special Management Unit in Wyoming's Shoshone National Forest, plus some 11,000 acres of contiguous roadless lands, to the National Wilderness Preservation System.

I am hopeful that this legislation will spell the end of a controversy over the fate of the unique DuNoir Basin which reaches back many years, for in my estimation, the DuNoir is the crown jewel of Wyoming's remaining nonwilderness roadless lands. Back in 1971, prior to the creation of the DuNoir Special Management Unit by Public Law 92-476, I visited the DuNoir and determined that "the entire DuNoir Basin was not only eligible for inclusion as wilderness, but was, in fact, probably the most desirable area in all Wyoming to be in wilderness." That statement is even more accurate today in Wyoming, as our wilderness system is, I believe, more than that of any other State, at the point where only a few more areas are needed to round it out.

My bill is necessary for two primary reasons. First, the Forest Service recommendation for the Special Management Unit, which was by law required no later than October of last year, is already 6 months overdue. I had hoped and expected that this recommendation would be completed on schedule so that my Subcommittee on Indian Affairs and Public Lands would have plenty of time to act on it during my last year in Congress. Time is now running short, however, and legislation is critical if the 95th Congress is to act on this area of utmost concern to myself and all of Wyoming. Second, the long overdue preliminary environmental statement (DES) on the DuNoir Special Management Unit, released February 28, 1978, by the Shoshone National Forest, proposes a DuNoir Wilderness so inadequate and unsupported by the facts as to demand immediate legislative response.

The approximate 40,000-acre DuNoir addition to the existing Washakie Wilderness proposed by my bill affords maximum protection to the wildlife and other wilderness values of the DuNoir Basin. At the same time it excludes several areas important for nonwilderness use. Specifically (as discussed later) several contiguous roadless areas identified by the Forest Service's RARE II inventory could justifiably have been included in my bill to preserve their outstanding wilderness values for addition to the Teton and Washakie Wilderness Areas. However, my bill is strictly confined to roadless lands within the DuNoir Basin drainage itself, and does not spill over into adjacent watersheds as advocated by some. Thus, the unifying thread of my proposal is to protect the DuNoir watershed, which is the last remaining nonclearcut watershed in the upper Wind River Valley, from further encroachments by man so as to preserve it for use and enjoyment by future generations of Americans.

Prior to deciding to introduce this legislation, I thoroughly examined the draft environmental statement (DES) prepared by the Shoshone National Forest to determine whether their proposal should be the basis for my bill. Not only did I find their 11,000-acre wilderness proposal to be totally inadequate, but I was also astonished and disappointed to discover that the facts contained in the DES argue strongly against the conclusion it reaches. Indeed, the draft environmental statement (DES) virtually confirms the necessity for the 40,000-acre proposal of my bill. As proof of this I would offer the following analysis of the two proposals.

BOUNDARIES

The wilderness boundary proposed by the DES is completely illogical, and would be totally unrecognizable, unmanageable, and unenforceable on the ground. Nowhere is this better illustrated than in a series of aerial photographs contained at the back of the DES. These show the proposal cutting directly through forested areas where no recognizable terrain features exist, truncating stream drainages in an irrational pattern, and bisecting key wildlife habitat. From the point of view of wilderness and nonwilderness uses on the ground, the proposed boundary would be almost impossible to find unless marked by expensive fencing or posted boundary signs at close intervals.

By way of contrast, the boundary I am proposing follows either clearly defined ridgelines and hydrographic divides or else the actual national forest boundary line in the Lower DuNoir Basin. As such, it will be readily identifiable by all forest users, and avoids the arbitrary division of stream drainages and wildlife habitat.

WILDLIFE SUITABILITY OF THE DU NOIR BASIN

One of the prime controversies which led to the creation of the DuNoir special management unit wilderness study in 1972 was whether remnants of past selective logging in the DuNoir Basin (and contiguous roadless lands) in the 1920's disqualified the area from wilderness consideration on the theory that it was not entirely free from the imprint of man's activities. During my August 1971 visit and detailed inspection of the area, it became abundantly clear to me that whatever evidence of past selective logging then existed, it did not seriously impair the area's overall scenic beauty and grandeur. The supposed man-made intrusions consisted of little more than an occasional winch cable scar on trees, old rotting stumps, slight paths (sometimes called primitive roads) which had become almost im-

passable to all but the most rugged of four-wheel drive vehicle users, scattered remnants of deteriorating railroad ties, and a few eroding structures which have now been abandoned for 50 years. When placed in context of the 60-square-mile area covered by my bill, these so-called intrusions are insignificant. Further, almost 7 years have elapsed since my 1971 visit, and these features have become less visible with each passing year.

In the interim, Congress has acted numerous times to refute the idea that wildernness must be entirely free from past signs of man's activities, using the logic that the Wilderness Act of 1964 only requires that areas be substantially free from the "imprint of man's work." In this light, Congress passed the Eastern Wilderness Act in 1974 (Public Law 93–622) with the Senate committee report noting that while "* * * It cannot be questioned that national forest lands in the East have felt the impact of man * * * many of these areas have been restored or are in the process of restoration to a primitive and natural condition." More recently, Congress passed the Endangered American Wilderness Act (Public Law 95–237) which specifically laid to rest any notion (the so-called "purity" issue) that a few rotting stumps, primitive roads, or abandoned structures should be used to disqualify an area from wilderness consideration and designation. Concurrently, the Carter administration has rejected the "purity" concept of wilderness and undertaken a new review of wilderness caliber lands that will, in the words of Assistant Secretary of Agriculture Cutler:

> Evaluate and recommend for wilderness lands which are not entirely free of the marks of mankind, but (which are) fully capable of providing, in the long term, wilderness benefits to many people.

Unfortunately, it would appear that those responsible for the preparation of the DuNoir draft environmental statement (DES) are unaware of Congress' direction in recent years, and more importantly, have overlooked their own administration's new policy rejecting the "purity" argument and endorsing wilderness caliber lands which are not entirely free of man's imprint. This oversight is dramatically highlighted by dialog and photographs in the DES which seek to revive the discredited "purity" argument, and use the previously described minor manmade "intrusions" to disqualify over 14,000 acres of the DuNoir Special Management Unit from wilderness consideration. I cannot disagree more completely with the statement in the DES that these intrusions "tend to dominate the landscape," and I submit that the aerial and other photographs in appendix F of the DES emphatically refute this statement.

Further, the 11,000 acre DES recommendation amounts to little more than a "rocks and snow" wilderness proposal. While such high altitude lands are definitely of wilderness caliber, they are representative of only one type of wilderness terrain—terrain that is of little use to humans or wildlife during many months of the year. Once again, the DES own photographs furnish the best evidence that the 11,000-acre proposal is basically confined to the same type of high country and nonforested land which characterizes the contiguous Teton and Washakie Wilderness Areas. The great value of my DuNoir proposal, however, is that it protects a diversive, forested, and relatively low elevation drainage which is of immeasurable importance to wildlife and nonmotorized-recreation use year round. This, more than anything, speaks to its suitability for inclusion in the wilderness system to complement the hundreds of thousands of acres of adjacent high altitude wilderness lands.

TIMBER AVAILABILITY

Simply stated, the timber values of the DuNoir Basin are insignificant in comparison to its other attributes. Although my wilderness proposal contains timber lands with an estimated annual potential yield of from 1.5 to 2 million board feet (MMBF), this represents less than 1.5 percent of the 134.6 MMBF annual potential yield available from the Shoshone and Bridger-Teton National Forests. Intensive forestry practices which are being implemented on national forest lands could more than double this available figure.

The average figures for timber cut in these two forests over the last 9 years show that of a total annual potential yield of 134.6 million board feet (MMBF), only 31.8 MMBF per year—or 24 percent—were actually cut. Of the so-called standard timber component—timber which can be economically harvested using conventional equipment and logging techniques, the 31.8 MMBF actual cut represents only 50 percent use of the total 63.4 MMBF of "standard" timber available. These annual cut figures indicate beyond the shadow of a doubt, that there is currently plenty of timber available in these two forests not only to sustain industry at present levels, but also a "cushion" to permit doubling of the present cut from the "standard" component alone. Of course, the additional availability of timber from State, private, and Indian lands is not even included in these figures. In light of these facts, it is absurd to suggest that wilderness designation for the DuNoir will in any way jeopardize the timber industry. Indeed, the standard component "cushion" indicates that there could be substantial future wilderness additions in these two forests without any harm to the prevailing level of industry.

Further, it should be fully understood that the timber resources of the DuNoir Basin are currently withdrawn from timber harvest, and are, therefore, not included as part of the annual potential yield in the Shoshone National Forest. As such, they are not part of the official timber base of the forest, and current timber availability will not be reduced by designation of the DuNoir as wilderness. What is at stake, however, is whether 2 million board feet per year will be added to the current base to increase timber supply. According to the DES, addition of the DuNoir to the base would create 10 new timber jobs in the local economy—10 new jobs. It is inconceivable to me that one can seriously suggest that the creation of a mere 10 timber jobs should take precedence over the absolutely magnificent nontimber values—and potential for job increases involving wilderness recreation—of the DuNoir—especially when one considers the previously discussed timber supply "cushion" in the Shoshone and Bridger-Teton National Forests.

WILDLIFE VERSUS TIMBER HARVEST AND OFF ROAD VEHICLE USE

Perhaps the most important feature of my 40,000-acre wilderness proposal is that it affords permanent legislative protection to the wildlife values of the DuNoir Basin. These values are best summarized in the testimony of the Wyoming Fish and Game Department at the Forest Service's April 1, 1978, hearing in Dubois, Wyo., on their draft environmental statement, in which they stated:

> The present DuNoir Special Management Unit contains important wildlife habitat for elk, moose, bighorn sheep, deer and trout fisheries, which could substantially benefit from habitat protection provided by inclusion in wilderness status. . . . It is the recommendation of this Department that the entire DuNoir Special Management Unit be designated as wilderness to assure continuation of existing wildlife populations in these drainages.

The 11,000-acre DES wilderness proposal is completely deficient in protecting wildlife values, and, once again, the information provided in the DES (on wildlife maps in Appendix D) furnishes the best possible evidence against the wilderness proposal finally recommended in the DES. To begin with, the DES proposal omits critical "high quality" bighorn sheep habitat in the scenic Pinnacle Buttes and Ramshorn areas, 100 percent of the "high quality" mule deer habitat in the lower DuNoir Basin, the bulk of the "high quality" elk habitat, all of the elk calving grounds and late fall habitat, and most of the "important moose habitat." Trail Lake, having rare nesting trumpeter swans, and which the DES states "is a popular waterfowl nesting area * * * waterfowl would benefit from restricted human use in the area and around the lake," is also excluded. Despite the DES' warning that the basin's lakes are not capable of supporting heavy fishing pressure, the DES excludes the majority of the lakes from wilderness, and the DES proposal to allow off-road vehicle use in these areas—plus construct new permanent roads—can only increase fishing pressure.

The elk habitat of the basin is especially important. Between 1,000 to 1,200 elk migrate through the basin annually, and there is a resident summer population of some 300 to 400 animals. According to the Wyoming Game and Fish Department "there is limited hunting pressure along mountain divides at this time due to restricted road access, and we feel this must be continued to prevent alteration or changes in migration movement through this area." The DES proposal, however, would open the bulk of the basin, including the elk calving grounds, to timber harvest, the construction of permanent logging roads, and off-road vehicle—including snowmobile—use. Even if some of these roads were closed subsequent to logging, the

game and fish department feels the Forest Service's history of road closures shows that they cannot be enforced. Thus, an area which is now unroaded and basically unsuited for off-road vehicle use would be "developed" for such use. This could totally disrupt resident game populations, and drastically diminish the basin's wildlife values.

To prevent this, my bill adopts the recommendation of the game and fish department proposing wilderness for the entire DuNoir special management unit and also picks up the contiguous roadless lands in the lower basin which contain the bulk of elk calving grounds, moose, and high quality mule deer habitat. Trail Lake, with its trumpeter swans and other waterfowl is also protected, as are the popular and highly scenic Kisinger Lakes. In this regard, it should be stressed that the Wilderness Act permits the fisheries values of these and other lakes in the basin to be augmented by aerial stocking, as is noted in the recent House of Representatives committee report on the Endangered American Wilderness Act (Report No. 95-540). My proposal would also preserve the important Bighorn sheep habitat in the Pinnacle Buttes and Ramshorn areas.

NONWILDERNESS USES

I recognize, however, that nonwilderness uses must also be accommodated, and therefore have left several high quality wilderness potential areas out of my proposal. The 26,300-acre Togwatee Roadless Area (RARE II No. 4-903) immediately west of Bonneville Pass is one of these. This area contains several thousand acres of timbered lands and terrain in the vicinity of Brooks Lake and the Jules Bowl which is suitable and popular for off-road vehicle use—especially snowmobiling. While several witnesses at the April 1, 1978, Forest Service hearing urged that this area be included in wilderness, I have determined that its timber and nonwilderness recreation values outweigh its wilderness potential, particularly since it is not part of the DuNoir drainage. Portions of the West DuNoir Roadless Area (RARE II No. 059) have likewise been excluded from my bill for their timber values, and because they do not drain into the DuNoir watershed. The nearby 4,040-acre Carson Lake roadless Area (RARE II No. 055), although a logical and spectacular potential addition to the Washakie Wilderness, has also been omitted despite keen wilderness interest in this area.

WATER QUALITY

Another serious defect of the 11,000-acre DES wilderness proposal is its total failure to protect the watershed values of the DuNoir Basin. As previously discussed, the DES boundary truncates virtually every stream drainage in the basin. Where the upper stream drainages are protected in wilderness, the lower basin is proposed to be opened to logging, road development, and off-road vehicle use. It is no secret that such activities increase surface runoff and, as is indicated in appendix H of the DES, the soils of the entire basin have a high on-site erosion hazard potential. While the DES cites advantages of increased water flows, the Wyoming Game and Fish Department thinks otherwise:

Timbering practices which include road construction and logging, particularly clear cutting (but also some select cuts) have caused increased turbidity in streams in the Wind River drainage. This increased turbidity is in part caused by past logging practices which have caused erosion and the resultant siltation which in turn have damaged the aquatic habitat.

The claim that beneficial increased water flows have resulted from logging could be misleading. Increased flows do occur but the major portion of the increase occurs during the runoff period in the spring when there are often greater flows occurring than the stream channels are capable of handling. The result is increased erosion and siltation and additional flows would only accelerate and increase these problems.

If the DuNoir Special Management Unit is placed in Wilderness status, water quality and the fisheries habitat would be protected. Present logging practices and ensuing activities do not protect either water quality or the fisheries habitat.

As noted by the Game and Fish Department, any increased runoff which occurs as a result of logging in the DuNoir Basin is likely to occur in the spring. Scientific evidence exists, and some area residents have expressed the fear, that increased spring runoff might be associated with less runoff during the ensuing dry season. Such an impact could lead streams to dry up earlier than is now the case, thereby severely curtailing existing grazing patterns and recreational use.

GRAZING

The DuNoir Special Management Unit is currently supporting 1,712 animal unit months of grazing. Although the DES does not come right out and say it, the Forest Service plans a cutback to 1,260 animal unit months no matter what the wilderness future of the unit may be. This cutback comes as a result of an "updated range analysis" which shows "that portions of wet meadows originally classified as suitable range, are, in fact, not suitable * * *"

No matter what the Forest Service finally does to implement this cutback, it should be stressed that the cutback results from normal Forest Service grazing policy changes, and not from any wilderness proposals. In fact, the Wilderness Act provides that grazing shall be permitted to continue in wilderness areas. This whole question is so important (and often misunderstod) that it was the subject of a policy discussion in a recent House of Representatives committee report (Report 95-620) which I feel is instructive here:

GRAZING

Section 4(d)(4) of the Wilderness Act states that grazing in wilderness areas, if established prior to designation of the area as wilderness, "shall be permitted to continue subject to such reasonable regulations as are deemed necessary by the Secretary of Agriculture". To clarify any lingering doubts, the committee wishes to stress that this language means that there shall be no curtailment of grazing permits or privileges in an area simply because it is designated as wilderness. As stated in the Forest Service regulations (36 CFR 293.7), grazing in wilderness areas ordinarily will be controlled "under the general regulations covering grazing of livestock on National Forests . . .". This includes the establishment of normal range allotments and allotment management plans. Furthermore, wilderness designation should not prevent the maintenance of existing fences or other livestock management improvements, nor the construction and maintenance of new fences or improvements which are consistent with allotment management plans and/or which are necessary for the protection of the range.

From the above, I think it is very clear that my 40,000-acre DuNoir wilderness proposal—or other wilderness proposals for that matter—will not require any reduction in grazing levels. Rather, such reductions, if they occur, will be as a result of the normal Forest Service grazing and range management planning process.

OFF-ROAD VEHICLE USE

As previously mentioned, much of the DuNoir Basin is forested, and not readily suited for use by off-road vehicles. The DuNoir special management unit has been closed to off-road vehicles for almost 6 years now, and has provided a high quality wilderness experience to many users. As is noted at several points in the DES, the motorized recreation potential of the unit cannot be realized without significant development of new roads—or the permanent upgrading of primitive vehicle tracks—and such development is entirely inconsistent with wildlife and other values. Therefore, my wilderness proposal would continue the existing closure of the DuNoir Basin to off-road vehicles, while keeping the more open and popular terrain in the Upper Brooks Lake and Jules Bowl areas available for off-road vehicle use.

For all these reasons, I feel that the highest and best use of the DuNoir Basin is to preserve its wilderness values unimpaired for future generations. The basin is a complete, inseparable, and important ecological unit which cannot, and should not, be arbitrarily cut up or developed. The entire watershed is deserving of immediate legislative protection, and my bill does precisely that. I hope my colleagues in both the House and Senate will join me in insuring that the DuNoir is designated as wilderness before the close of the 95th Congress.●

THE CONSUMER BEEF-GRADING ACT OF 1978

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. RICHMOND) is recognized for 5 minutes.

● Mr. RICHMOND. Mr. Speaker, today when the American consumer reaches for a product in our brightly decorated supermarkets, he or she rarely examines the invisible conglomerate of support and regulatory systems which exist in the gimmick-ridden world of food marketing. The problem is not that the consumer is not looking; rather the production of American food is largely invisible.

As the only urban member of the House Agriculture Committee, I believe the time has come for the USDA to give consumers the tools they need to function intelligently in the food marketplace.

An obvious area of neglect is the Federal meat grading system. On the average, Americans spend one-third of their food bill on meat and meat products. This amount totals $50.9 billion spent by consumers on meat each year. These expenditures demand an increased con-

sumer involvement in USDA activities which affect both the price and quality of the meat we buy.

The USDA's neglect of consumer needs and desires was unfortunately demonstrated 2 years ago when the last Administration spent millions of taxpayer's dollars in court defending a streamlined beef grading system which confused and deceived the consumer. Meanwhile, current standards are still based on the unhealthy premise that the best meat contains the most fatty marbling. It is difficult if not impossible, to buy leaner cuts of beef. The USDA in the past has made little effort to promote the consumption of lean, grass-fed or limited grain-fed beef, because cattlemen believe they can survive only by maximum grain-feeding of cattle under the current law.

In response to the glaring omission of consumers from this vital area, I have introduced a bill designed to aid the USDA in its efforts to grant consumers an audible voice in the development of new beef grading standards.

The bill establishes an evenly representative task force within the Department to develop new beef grading standards based on health and nutrition, as well as consumer, farmer and industry acceptance. New standards would help to change the cycle of grain-feeding, allowing cattlemen to raise beef at less cost.

By requiring food stores to post the standards and educate consumers about the nutritional value and cost of the various grades of beef they buy, the Department will also be more able to help consumers make intelligent decisions with their food money.

Last year, Congress widened the jurisdiction of the Federal Meat Inspection Service, and created the Food Safety and Quality Service. Without important revisions in establishing new grading standards, our efforts to insure healthy and high quality meat for the consumer will be meaningless. We cannot strengthen an agency without making it more responsive to the needs and desires of those it serves.

Following is a section-by-section analysis of the bill. I urge my colleagues to read it and to join me in working to establish a broad-based and viable beef grading system which favors no one and allows for rational and healthy food marketing and purchasing.

ANALYSIS OF CONSUMER BEEF-GRADING ACT

Sec. 1: Title: "Consumer Beef-Grading Act of 1978."

Sec. 2: Establishes Task Force on Beef-Grading Standards within USDA, to exist until terminated by Congress.

Sec. 3: Requires Task Force to make recommendations within nine months to the Secretary of Agriculture and to Congress on new beef-grading standards which take into account nutritional properties of beef as affected by age and heredity of cattle, carcass conformity, marbling, leanness and yield grading, nutritional value of grain-fed vs. grass-fed beef, consumer preferences, special consumer health needs, restaurant standards, cost differences in producing various grades, industry acceptance and compliance, retail pricing, uniformity, aging and preservation.

Sec. 4: Task Force is composed of four USDA employees, four producers or others in cattle industry, four consumer representatives, and four nutritionists or other medical personnel who shall serve for two-year terms, appointed by the Secretary.

Sec. 5: Task Force shall have a director and staff of USDA employees, and may use private experts and consultants and employees of other Federal agencies temporarily.

Sec. 6: Secretary shall prescribe proposed regulations based on Task Force recommendations and public comments on which the Task Force has acted. The regulations shall become effective only after a reasonable period to allow the industry time to comply. Subsequent amendments shall be made only after consultation with and receipt of recommendations from the Task Force.

Sec. 7: Notices describing the new standards shall be prepared by the Secretary, and must include descriptions of marbling and leanness of each grade, nutritional qualities of each grade, flavor, tenderness and moisture qualities and preferred uses of each grade, cost-value of each grade and preparation of cooking instructions. Notices shall be provided to all retail stores selling beef, and must be prominently displayed subject to a $1,000 civil penalty.

Sec. 8: Secretary shall educate consumers on the new standards, including providing information on possible health hazards, differences between grain-fed and grass-fed beef, effects of marbling, yield grading and other information. The program shall use pamphlets, materials for schools and other institutions, radio and T.V. and consultation with other Federal and State agencies which purchase beef.

Sec. 9: After the new standards are prescribed under Section 6, the Secretary may not prescribe any beef-grading standards under any other provisions of law.

Sec. 10: Authorization to appropriate such sums as may be necessary.●

WAYS AND MEANS TRADE SUBCOMMITTEE PLANS HEARINGS ON METHODS TO CONTROL OIL IMPORTS, INCLUDING H.R. 8800

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Ohio (Mr. VANIK) is recognized for 5 minutes.

● Mr. VANIK. Mr. Speaker, for over half a year, there have been rumors that the administration was about to impose some form of tariff or quota on oil imports to force the Congress to complete action on the President's energy bill. For a long time, there were reports that a $5 a barrel oil import fee would be imposed if the Congress did not act soon. In Thursday's papers, there are reports that administration officials are now studying some form of licensing and auction system as a way to control oil imports and reduce the demand for foreign oil by driving up its prices.

The President has almost dictatorial authority under section 232 of the Trade Expansion Act of 1962 to restrict imports when he determines that such action is necessary for the national security.

The President's authority to act under section 232 was limited by an amendment to the Senate-passed energy bill. That bill, of course, is currently mired in conference committee—and the President still has the authority to take unilateral and drastic actions to limit imports.

Rather than continue the parade of trial balloons on this issue, I believe that the Congress should hold hearings to discuss the various ways that imports can best be limited and remaining supplies allocated with a minimum of disruption.

The Congress must not leave the debate on the use of the 232 power to the administration alone. Through the forum of the public hearing and public contribution to the debate, I believe the soundest, most feasible solution to our national energy emergency can be found.

Personally, I am a supporter of strong action to reduce our dependence on foreign oil and last fall I urged the President that he take action under section 232 to reduce our disastrous dependence on foreign oil.

Last year, I offered an amendment in the Ways and Means Committee to the energy bill to provide for a system of quotas and the auction of quota allocations. Without administration support, the amendment failed in committee by a vote of 20–11.

On August 4, 1977, Representative OTTINGER and I introduced H.R. 8800 which provides, among other things, for the establishment and administration of an oil import quota system.

In order to focus debate on the best ways to limit oil and to provide public comment for the administration on how best to administer any import limitation program, I intend to hold hearings on H.R. 8800 as soon as the schedule of the full Committee on Ways and Means and the Subcommittee on Trade permits. While I obviously support H.R. 8800, reference to this bill is meant only to help focus the debate. I hope that we will receive a wide range of comments on the entire energy import issue and various plans which have been advanced over the years to reduce our reliance on OPEC, and so forth.

Following is a description of the import control features of H.R. 8800 taken from the CONGRESSIONAL RECORD of August 4. Other references to the concepts in this bill can be found in the CONGRESSIONAL RECORDS of May 9, pages 13975 and June 24, page 20739.

Mr. Speaker on behalf of Representative RICHARD OTTINGER and myself, I am today introducing oil import control legislation similar to, but much more flexible than title I of H.R. 6860, which was reported by the Ways and Means Committee on 1975 and retained on the floor of the House.

As the committee's report on the bill stated:

The quota is not intended as an independent discipline but rather as a means of being sure that the conservation and conversion efforts result in a reduction in imports, rather than a cutback in domestic production . . .

This legislation uses a system of quotas, import licenses, and tariffs to achieve this goal.

This amendment is not designed to force down demand, but rather, to follow demand down; its purpose is to keep a taut line on the relationship between increasing domestic production, and domestic conservation, and declining imports. Chairman ULLMAN described this portion of the 1975 bill as the "centerpiece in our effort to become less dependent on foreign oil."

However, the amendment we are offering is not nearly as inflexible as the 1975 language and contains language insuring that no region of the Nation bears a special burden as a result of quotas. Rather than trying to set specific barrel figures in concrete today for 7 or 8 years from now, we allow more flexibility. Basically, the amendment requires

the President each year to submit a 7-year projection of oil production and oil demand adjusted for conservation. He is then directed each year to limit imports for the following year to no more than that year's difference between planned demand and planned production. The yearly level of imports set by the President could be modified if necessary because of weather conditions or national emergencies. Any level set by the President may be rejected through a 90-day congressional veto process, thus forcing the President to revise his import figures.

In other words, the amendment is a yearly yardstick by which we measure how well we are doing in increasing production, obtaining conservation, and limiting imports. This is significantly different from the wording of the 1975 language. Instead of setting specific barrel per day figures in concrete now, we allow more flexibility. The 1975 language set a level of imports of 6 million barrels per day for 1976 and 6.5 million per day for 1977. In recent months, we were importing an average of 9.3 million barrels per day. The 1975 Act was unrealistic and too inflexible, but it also reflects our failure to moderate the increase in imports and the growth of our dependency on oil imports. Developments since 1975 strongly demonstrate the need for limits on imports; thus while more flexible, this new language would keep the pressure on.

There is one provision, however, which would give the President the discretion to force energy conservation by setting lower levels of imports. This would be subject to Congressional veto. Indeed, if the Congress thinks this is too much discretion, an amendment could be offered limiting his discretion to no more than 20 percent or 5 percent or whatever of the difference between demand and supply. If all our other efforts fail, however, this authority to begin to cut down on imports could be the one way to force America to save energy and develop domestic sources.

It is the stated goal and purpose of this legislation to enable the United States to achieve a level of oil imports of no more than 6.5 million barrels per day by 1985. We think the legislative history would make it clear that this discretion would not be used unless the other measures in the various, recent energy laws were proving inadequate.

To control the level of imports and to have a standby system for allocating imports through the free market system, the legislation provides for a licensing system similar to the one we approved in 1975. The licensing system distributes the "right" to buy and import oil through a bidding process. As in the 1975 Act, special provisions are made to protect the small refiners and marketers and to guard against fraud in the bidding process. To the extent that the quota set by the President accurately reflects the difference between demand and supply, the value of the license "tickets" will be nominal. If, however, the quota is set lower so as to create a gap between demand and supply, the value of the license tickets will be bid up in the traditional market system—there will be no Government bureaucracy set up to allocate imports among users.

As in the 1975 bill, there is provision for the Government to insure that imports are fairly distributed throughout the Nation—and that no region, such as New England, suffers economically. Specifically, the bill provides that anytime the value of import licenses in a region rises to 1 percent of the value of imported oil—which will only happen when the import restrictions are set so tightly that they begin to limit the supply of oil—then the revenue raised from the sale of those import licenses in a region will be returned to the States in that region. The State governments can then rebate the increased cost of oil to consumers or help those consumers insulate and find other sources of alternative energy.

There may be other, better ways to guard against injury to a region or set of industries, and alternatives to this proposal can be discussed in the hearing process. It is clearly our intention, however, to insure that no one area of the country, such as New England, bears the major burden in our effort to obtain energy independence.

The 1975 bill also provided for a 2 percent ad valorem tariff on crude and a 5 percent ad valorem tariff on refined petroleum—tariffs which would have raised some $2 to $3 billion per year. Since under the new plan we do not want to further increase the world price of oil, the legislation we are offering provides only a deminimus tariff on crude designed to force the adequate monitoring of imports by the Customs Service. The tariff on refined imports would be 3 percent ad valorem, equivalent to the present license fee differential between crude and refined—a differential which is necessary to protect domestic refineries and to encourage the construction of new refineries in the Eastern United States.

Finally, this legislation is not effective until January 1, 1979. This will give the Government time to put into place the administrative structure for controlling oil imports. Adequate leadtime will avoid administrative confusion.●

PERSONAL EXPLANATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Maryland (Mr. BYRON) is recognized for 5 minutes.

● Mr. BYRON. Mr. Speaker. It has come to my attention that on April 18, 1978 I was recorded in the CONGRESSIONAL RECORD as having voted "no" on rollcall vote No. 233. This vote was a motion to reduce the authorization level for National Science Foundation biological, behavioral, and social science projects by $6 million. It was my intention to vote in favor of this amendment to cut these funds. I do not know whether the electronic voting machine malfunctioned or whether I accidentally pushed the wrong button, however I would like to state for the RECORD at this time my position supporting efforts to cut these funds and I will vote accordingly when the actual appropriations bill is considered.●

A TRIBUTE TO WILL GEER

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Florida (Mr. PEPPER) is recognized for 5 minutes.

● Mr. PEPPER. Mr. Speaker, in the annals of American history, there are a few individuals who have blessed our times with the passage of their lives. One such individual was Will Geer.

I am sure that many of my colleagues in the House were saddened, as I was, to learn that Mr. Geer, at the age of 76, passed away this last weekend.

As chairman of the House Select Committee on Aging, I had the opportunity to meet with Will Geer last fall when he came to Washington, D.C., to testify before an Aging Committee on "Active Americans Over 65." At that time, Mr. Geer shared with the committee and with all older Americans his belief that the later years can really be a beautiful and wonderful time of life and should not necessarily be connected with sickness, ill health, disability, inability to think and inability to provide.

Indeed, Mr. Geer personified what most older Americans hope to achieve—the capacity for involvement in life's affairs. Mr. Geer's competence as an actor is near legend, as well as his ability to perform many roles. Part of his strength, enthusiasm and vigor in the theater, as well as in life, was his understanding of the feelings of other actors and actresses and his compassion toward them.

Many have noted that although he appeared gruff, he was a soft touch to many aspiring actors and actresses who were looking for their first break. Certainly, his grasp of the history of both theater and television was something that set him apart from many performers.

Mr. Geer most recently portrayed Grandpa Walton in the CBS television program, "The Waltons." His acting career began over 50 years ago in riverboat shows, tent shows, repertory companies, and Shakespearean troupes. He appeared on Broadway in "Merry Wives of Windsor," "Unto Such Glory," "Cradle Will Rock," "Waiting for Lefty," "Of Mice and Men," and "Tobacco Road." He was in numerous films, including "In Cold Blood," "The Reivers," "Jeremiah Johnson," and "Fight for Life." In addition to all this, he somehow managed to find the time to appear on such television shows as "Bonanza," "Mission Impossible," "Gunsmoke," "Hawaii Five-O," and "The Bold Ones." Finally, he continued to tour in his "Americana" show which featured the poetry of Robert Frost and the music of Woodie Guthrie.

This was a great American, still extremely effective and great in what we call his latter years.

Mr. Speaker, I am sure many could benefit from the views and thoughts expressed by Mr. Geer on the subject of the need for involvement in life's later years. I would like to submit for the RECORD at this point the entirety of Mr. Geer's testimony before the Aging Committee on May 25, 1977:

STATEMENT OF WILL GEER, ACTOR

Mr. GEER. Thank you.

Up on "Walton's Mountain" we have a habit, whenever we sit down together, the young and the old, of holding hands and having a little blessing. I would like to give you one, paraphrased, of Robert Frost's.

You should all hold one another's hands, figuratively, or reach out to someone that you have known in the past, some teacher, some professor, some worker in a big industry, whose lives were completely destroyed when they retired, peripherally, at 65. All of you here have known one, or two, or a dozen such persons. Let's hold out our hands to them and wish for the good beginning to start with this committee

"Oh, give us pleasure in the flowers today; and give us not to think so far away as the uncertain harvest. Keep us here all simply in the spring of our years. Amen. Ah, women."

That was a paraphrase of Mr. Robert Frost, and all of us, in our memory, know when he stood out here on the steps of the Capitol as an old man in the eighties and the wind blew his manuscript away. Vice President Johnson held his hat to try to shield it. He couldn't think of the poem that he had written especially for that day. "So many artists who participate in august occasions of the State see something artists ought to celebrate. Today is for my cause a day of days,

and blessed be him who was the first to think of such a thing." Of course, he meant President Kennedy.

The wind blew his manuscript away and he couldn't complete the poem he wrote; but he stood there that day as a man who at the age of 40 was completely unknown as a poet. He came over here and when he got to be in his seventies everything in the world happened to him. His favorite daughter died in childbirth; his son killed himself; his daughter was in an insane asylum; his wife died. He picked himself up out of the gutter, literally, a professor up at Harvard helped him, dusted him off, and he rose to become that figure at President Kennedy's inauguration.

Nowadays, I am asked often to go out and talk to young people everywhere. What they are worried about is security, education, the lack of employment. I went to a university recently; they voted to get me. They said they didn't want a professor, or a politician, or a preacher, or a businessman from Kiwanis; they wanted Grandpa Walton to come and talk to them, because they were all graduating into a world where there was no work, and Grandpa Walton seemed to be able to live without any money. They wanted to find out how to build a new life.

It is my belief that it is criminal, absolutely criminal, that old people should be put on a shelf and told they can no longer work when they want to work, and they can. I think it is a criminal offense on the part of our democracy. I think it is equally criminal that we should believe, actually believe, that there isn't work enough for all of us here in this country, for those who are healthy and want to work. The good Lord upstairs, the "Man upstairs," your genes, your ancestors, and your own lifestyle determine how long you are going to keep on working and living. Retirement will come from all those forces together naturally, just as it does in mother nature, just as Justice Douglass finally went off in that wheelchair after doing wonderful, remarkable work for all those years. And those other senior citizens who retired, as Benjamin Franklin did when he came back from the courts of France, and finally retired gracefully under the little monument that he has in Philadelphia.

All of these things are important, but the important thing is we don't begin to realize the employment that can go on here. Young people themselves know that. For the first time, I believe, here in the Carter administration, and other administrations would gone toward that, we are beginning to see that the variation of employment is what is necessary in this country. In my time, as a young man, we depended upon others to give us work. Nowadays, the people are going along in a stream of democracy, the stream of life, and living it are those who are going to create employment for others. It is just beginning to start in this administration.

I, too. would like to go back to Chief Justice Holmes, when his wife Annie said to him, "We can't possibly employ all these people." Chief Justice Holmes said to his wife, Annie, "We've lived to a remarkable old age, Annie. I'm almost 90 and you are too. We've had many troubles, most of which never happened." The notion that unless old people retire, jobs will be taken away from young people coming along is ridiculous. I saw for myself—you don't have to do it the way they did in the Soviet Union. I was over there last year to do a second remake of the "Blue Bird," with Elizabeth Taylor, and a lot of us other old bags. In the picture itself I ran across a man who is head of the makeup department at Leningrad, and I worked with him 50 years before doing a picture called "Under the Circus Top." He is an old man in his nineties, and he was still working as head of the makeup department at the Linfield Studio in Leningrad. He didn't do much except go around and cock a little finger and say, "This eyebrow needs tilting here, and she needs a little more on this side of her face," but that was his work, and he was still working.

We can do it likewise. We do not have to do it the way it is in the Soviet Union. We can do it our way, the American way, and we are just beginning.

Too often I do not think we really realize how much it is we can do, and it is wonderful to see a committee like this stirring up things that have been criminal in our past, because it is criminal to put people on the shelf at the age of 65.

I think I have time to tell this. There was one incident in my life, and I would never be in this business, and would never be working perhaps as I am now if it had not been for a schoolteacher of mine, a principal of a high school in this little town in Indiana, Frankfort, Ind., Miss Catherine Howard.

I was sitting there one day in the sixth grade in an assembly, and was supposed to be studying geography, and I had it underneath the seat at that point. I was looking at all the pictures of the beautiful, big, bright red tomatoes planted in the garden, and underneath that I had a copy of Walt Whitman's "Leaves of Grass."

Miss Howard came up behind me and said, "What are you reading?"

I said, "Ah, ah."

"What is that book?"

I said, "That's Walt Whitman's 'Leaves of Grass.' "

"Oh, William, don't go any further when Mr. Whitman says, 'Oh, Captain, my Captain.' "

[Laughter.]

Mr. GEER. I said, "Why, Miss Howard?"

"Walt Whitman was a filthy, lascivious kind of writer. He was a socialist and a friend of George Sanders."

Immediately I read everything that Walt Whitman ever wrote.

[Laughter.]

Mr. GEER. Then 25 years later I came back to Indianapolis, playing leads in a show with Ethel Barrymore, and I went over to my old high school, and she had been retired, forced into retirement at age 65. She was in a little old cottage.

She said, "Oh, William. I knew that you would be the kind of person who would go and do these things. That is why I told you not to read Walt Whitman."

She had a double plan behind it all. That kind of woman knew the extra breath that it took in the performance of a show; a woman who knew everything, and at 65 she was put on the shelf.

She went out to Long Beach, got shook up by the earthquake, and went back, sat and died.

She said, "William, William, the saddest thing in life is that the best thing in it is courage, and, oh, what courage it takes for me to sit here with nothing to do, with no one to really talk to any more. They have all grown up and forgotten me. I have no prestige, and I have no recognition, and there is nothing for me to do but die, nothing but to die."

Put on the shelf at 65, a woman like that.

I do not want to wander on, because I know dozens of people like that. I think it is criminal to force retirement like that at this age. I also believe that when you ask questions about what the younger people are going to do if they do not have jobs to take over from the older, the point is, change our system in a democratic way so that we can create work.

I can only reiterate what Mr. Corcoran said, as a performer, or as a man, that a man does not really seriously start to work from dawn till dark until he is 70 years of age.

Thank you very much.

[Applause.]

Mr. PEPPER. Mr. Geer, could I ask you, in your experience, do you believe the criteria for job performance seem to change and become more difficult as persons get older? For example, are errors, such as, forgetting lines, treated differently when made by an older person than by a younger person?

Mr. GEER. Oh, we have all had that experience in our lives many times over. I know that 25 years ago I had a young man tell me on stage, "You've had it, old man; haven't you?"

I saw Richard Bennett, a marvelous actor. He got to be only 70 some odd years. He said, "You know, next year the Theater Guild decided that I was so old that I couldn't remember my lines."

We sat and talked about what this country had done to its older people. We ourselves are fortunate. We have no such age limitations in the theater, as long as you can walk and talk. But over and over again you hear people say, "He is not only going to be put on the shelf, he's slipping, he's slipping, he's slipping."

Part of our society says 65 is the limit, and part of our society will go on to say that 70 and 75 is the limit. So over and over again these people saying these things are bringing these things about.

Mr. PEPPER. In your work and numerous activities, I am sure you come into contact with many persons like yourself who have much to contribute after the normal retirement age. Have you noticed situations where employers in your own field or other have, subtly or openly, pressured capable persons to retire because of age, solely because of age?

Mr. GEER. I have seen that throughout my entire life. I have seen old character actors, Theodore Robinson, for instance, told that he was so old that he could not hold his water on stage, that he should not be employed, because doctors and people were not aware of the fact that it could be controlled.

I have seen people put down constantly, not by just younger people, but people pushing them along at the same time in their own field. It is a terrible thing. It is a great injustice. This jealously can be controlled. It can be controlled, and that is part of our democratic process, to do it.

Mr. PEPPER. Are there other questions?

Mr. Cohen.

Mr. COHEN. Thank you, Mr. Chairman.

Mr. Chairman, I was told that John Wayne sent a photograph to show how vigorous he is at his age, and I would simply say in this case that one picture of John Wayne is not the equivalent of a thousand words from you, because you are one of the most vigorous and dynamic people that I have ever come in contact with.

When you quoted from Robert Frost, it struck a note in my own heart, because I recall a quote from Robert Frost. He said, "Dear Lord, if you will forgive the little jokes I have played on thee, I'll forgive the big one you played on me."

It seems to me that Congressmen and the American people have had a big joke played on them when they reach that age of 65. They think that life is going to be a bit easier, and they find that they have a very low income, no job opportunities, and a policy which has become institutionalized in this country, that when you reach 65, you take one long step into old age, and all the abilities and disabilities that that entails, and I think that you are living proof that that is not the case.

One more quote from Robert Frost, and then I will stop. In one of his poems he said:

"I shall be telling this with a sigh somewhere ages and ages hence: Two roads diverged in a wood, and I—I took the one less traveled by, and that has made all the difference."

Mr. GEER. A very fortunate man; wasn't he?

Mr. COHEN. Yes.

Mr. GEER. Robert Frost's exact quote was, "Forgive, oh, Lord, my little jokes on Thee, and I forgive Thy great big one on me."

Mr. COHEN. Thank you, Mr. Geer.

Mr. GEER. Thank you very much.

Mr. PEPPER. Ms. Oakar, do you have a question?

Ms. OAKAR. Thank you, Mr. Chairman.

This is the Robert Frost day. Robert Frost also said, "The woods are lovely, dark and deep. But I have promises to keep, and miles to go before I sleep."

I am wondering, in the field of acting and in the arts as you mirror so well, what are the possibilities for older Americans? What about actor's equity and all of the unions? What are they doing for the older Americans who do find gainful employment in the arts? Do you know of any programs?

Mr. GEER. Not really. I can only state an example. The first year of the Waltons, 6 years ago, the first script I played in was of an old grandpa sitting in a rocking chair with the family, and he was so old he could not use his gun any more. He handed it over to John Boy, and he said, "You go out and get that bear and the turkey for supper."

I saw that if I did not do something about it myself, that I would be written out of the script in 3 weeks, that I would be retired by a falling tree.

(Laughter and applause.)

Mr. GEER. So I took advantage of all the old people that I had heard in the past, and I got a feeling about it. I took that gun and I went upon the hill to shoot the Thanksgiving Day turkey.

I think it is up to all of us to get out of our rockers and that's by being active after 65. It keeps you going, and keeps you contributing in the future.

Ms. OAKAR. Thank you, Mr. Chairman.

Mr. PEPPER. Thank you, Mr. Geer. Mr. Corcoran and I welcome you to the mid-seventies, and we congratulate you on the great years that lie ahead. Thank you very much.

Mr. GEER. Thank you very much.●

SCHOOL LUNCH

(Mr. PERKINS asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

● Mr. PERKINS. Mr. Speaker, today I am introducing for the administration its proposed legislation that would incorporate into one comprehensive law the provisions now contained in the National School Lunch Act and Child Nutrition Act of 1966. This bill, entitled "The Child Nutrition Assistance Act," represents a major effort on the part of the administration to streamline and to make more effective the existing child nutrition legislation.

The major thrusts of the administration's bill are to consolidate and revise the provisions contained in the two authorizing acts; to extend and amend the child care food program and the special supplemental program for women, infants, and children (WIC), whose authorizations are to expire at the end of this fiscal year; and to amend and strengthen certain ongoing child nutrition programs in an effort to make them more responsive to the needs of the target populations that they serve.

On March 21 I introduced for the consideration of the House H.R. 11699, a bill to consolidate, revise, and extend certain child nutrition programs as authorized by the National School Lunch Act and Child Nutrition Act of 1966, as amended. This bill was prepared by the National Coalition on Child Nutrition.

Although H.R. 11699 and the administration's bill are identical in their statement of purpose, they vary somewhat in their proposed legislative improvements. On Thursday, April 27, the Subcommittee on Elementary, Secondary, and Vocational Education is conducting a hearing focusing specifically on these two pieces of proposed legislation. At that time, the subcommittee will receive testimony from both the administration and the National Coalition on Child Nutrition, as well as from the American School Food Service Association. The purpose of this hearing is to educate the subcommittee members on the similarities and differences of the two bills and on the potential impact that each proposal would have on the child nutrition programs.

Mr. Speaker, to my mind, the legislation that I am introducing today is especially significant in that it represents a major statement of commitment on the part of the Carter administration to the child nutrition programs. At times during the past, Congress has had to force the hand of previous administrations to carry out their responsibilities in administering these programs; and I want to take this opportunity to commend this administration on its efforts in drafting this comprehensive piece of legislation.

Although I have reservations with regard to a few provisions contained in this bill, I do want to insure that it is on the public record for discussion purposes and for the consideration of my colleagues in the House.●

THE MIDDLE EAST ARMS SALES PACKAGE

(Mr. HAMILTON asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

● Mr. HAMILTON. Mr. Speaker, I would like to bring to the attention of my colleagues a statement on the Middle East arms sales package prepared by the National Association of Arab Americans and comments on that memorandum which I requested from the Department of State.

This exchange follows correspondence I had with the Department of State on a memorandum prepared by the American Israel Public Affairs Committee on the sale of 60 F–15 aircraft to Saudi Arabia which appeared in the CONGRESSIONAL RECORD of February 21, 1978, on pages 3900–3905.

In the memorandum prepared by the National Association of Arab Americans (NAAA), support is expressed for the administration's Middle East arms sales package but the Department of State takes issue with several comments made by the NAAA in the memorandum.

The NAAA memo and the State Department's comments follow:

SUMMARY OF NAAA POSITION PAPER ON MIDDLE EAST ARMS SALES

NAAA endorses the Administration's proposed "package" sale of aircraft to Israel Egypt, and Saudi Arabia because the Arab sales underscore the growing political and economic importance of the Arab World to the United States. The sales to Arab nations also serves as a reminder that Israeli arms requests are no longer considered in a vacuum.

NAAA also calls for development of a regional American arms policy that will take into account all of the principal Middle East actors and their legitimate defense needs. The new policy must include a systematic phase-down in total arms transfers to the region over a 5–10 year period, in cooperation with other principal international arms suppliers. The United States has no moral basis for asking others to reduce arms flows until it demonstrates leadership on its own.

Weapons for the Middle East are a troubling issue, reflected in NAAA's traditional opposition to large-scale arms transfers to the region. We believe that American political ideals are ill-served by our role as the principal international arms supplier. Furthermore, the Middle East conflict has been intensified by years of American over-supply of weapons to Israel.

The arms for Egypt and Saudi Arabia will not upset the "military balance" in the region, a term that has come to mean Israeli military domination of all its neighbors. Neither Egypt nor Saudi Arabia seeks a military solution to the Middle East Conflict.

The United States is dependent on Saudi Arabia for oil, and the Saudis believe that their moderating role within OPEC and the region, as well as their willingness to pump oil at a rate higher than revenue needs justify, warrants special consideration by the United States.

NAAA urges that Congress take no action that might jeopardize implementation of the proposed aircraft sale.

MARCH 8, 1978.

NAAA POSITION PAPER ON AIRCRAFT SALES TO THE MIDDLE EAST

I. BACKGROUND

On February 14 the Carter Administration announced its intention to sell a "package" of advanced aircraft worth $4.8 billion to Israel, Egypt, and Saudi Arabia. Following receipt of the official letter of intent on April 3, Congress will have thirty days in which it may disallow the sale by concurrent resolutions in both Houses. Secretary of State Vance said at a Congressional hearing on February 24 that the Administration would withdraw the entire package if any part of if were altered by Congress. Resolutions to block Arab portions of the sale have already been introduced in the House of Representatives.

The box below provides details on the package:

Country	Aircraft type/maker	Number	Individual cost	Total
Israel	F–16/General Dynamics	75	$7–9 mil.	$1.5 bil.
Israel	F–15/McDonnell Douglas	15	17 mil.	400 mil.
Egypt	F–5E/Northrop	50	5–8 mil.	400 mil.
Saudi Arabia	F–15/McDonnell Douglas	60	17 mil.	2.5 bil.

II. BASIC ISSUES

Arms transfers to the Middle East are a troubling issue. The Middle East has been the scene of four major wars and numerous other bloody exchanges in the past thirty years, and another war would likely result in higher levels of civilian casualties than in the past. President Carter campaigned for

office on a pledge to reduce America's role as the leading international arms supplier, yet last year American arms transfers abroad exceeded $11 billion, with the Middle East receiving some two-thirds of the total.

The United States has a variety of interests in the Middle East, and reconciling them is not easy. Although Israel plays a special role in American attitudes toward the Middle East, it is but one of America's interests in the region. The proposed arms sales to Egypt and Saudi Arabia should be interpreted politically, not militarily. They represent official acknowledgement of the growing political and economic bonds between America and the Arab World. It is inaccurate and misleading to characterize the arms for Egypt and Saudi Arabia as a security threat to Israel. They should, rather, be seen as indicative of changing American political relationships in the area in which Israel no longer plays the dominant role. The sales to Egypt and Saudi Arabia are symbols of American rediscovery of its ties to the Arab World, which stretch back 150 years and which were cordial until the introduction of the Arab-Israeli dispute and American "choosing of sides"; American officials fell into the habit of equating Israel's "enemies" with America's "enemies". The damage caused by this simplistic approach to a complex issue is slowly being repaired as American policy-makers begin to appreciate the extent to which America and the Arab World share interests in common.

III. NAAA POSITION

NAAA has traditionally opposed all large-scale arms transfers to the Middle East. This policy reflects the view that the Middle East, a volatile region with a history of violence in recent years, should be kept as weapons-free as possible. NAAA still holds to that policy but is making an exception in the case of the proposed arms sale for a compelling reason: the political significance of the sale to Egypt and Saudi Arabia. NAAA does not support the proposed sale of additional aircraft to Israel but accepts it as part of the package concept.

NAAA endorses the proposed package sale of aircraft to the Middle East and urges that Congress take no action to jeopardize it. NAAA believes that the current sale should set the stage for a different and more enlightened arms transfer policy in the future.

NAAA calls for the development of a regional approach to arms transfers to the Middle East which would take into account the principal actors and their legitimate defense needs. The package approach of the Administration in the present proposal is a useful, if unintentional, step in that direction.

NAAA calls on the Administration to build into its arms policy a schedule for systematic reduction in total transfers to the Middle East over a 5–10 year period and to seek commitments from other major manufacturers to do the same. There is no moral basis for our country asking others to reduce arms flows when we are the greatest arms supplier in history. It is encouraging that French President Giscard d'Estaing recently pledged the cooperation of France in restricting arms flow to the Middle East following political resolution of the conflict.

IV. "MILITARY BALANCE"

The allegation has been made that the proposed sales to Egypt and Saudi Arabia will upset the "military balance" in the Middle East. It is an open secret in Washington that the term "military balance" has been employed as political shorthand to justify the continuation of overwhelming Israeli military superiority, defined not only in terms of Israel's immediate neighbors but also the other Arab states and their combined military establishments, regardless of whether they could or would be brought to bear in a war with Israel. This approach has been effective in obtaining desired levels of arms for Israel, but it has ignored political and logistical realities in the Arab World. The Arab World is diverse, and not even the general antipathy toward Israel has ever been translated into the collective military threat invoked when Israel seeks arms from the United States. Dale Tahtinen, a military analyst quoted in *Newsweek* recently, observed that the proposed arms package *will* imbalance the region—but even further in Israel's favor because of its ability to utilize fully all weapons it receives.

It should also be pointed out that Israel, alone of the three proposed recipients of arms, maintains a military occupation of land belonging to its neighbors. The arms for Israel will serve to tighten Israel's hold on those areas and provide protection for the 90-plus settlements that President Carter and other Administration officials have repeatedly described as "illegal" and "an obstacle to peace"

The following is a country-by-country commentary on the proposed aircraft sales:

V. EGYPT

Egypt is to receive 50 F–5E fighters, an airplane designed principally for the export market. Military analysts rate it equivalent to the Soviet Mig–21. From 1955 until recently, Egypt received its military equipment from the Soviet bloc. President Sadat expelled the 20,000 Soviet advisers in 1972, and Egyptian relations with the Soviet Union began to deteriorate. The political break appears virtually complete at this time, and Defense Department officials confirm that Egypt has received no new aircraft deliveries since 1975. Egypt's turning to the United States for military equipment represents political intention as well as defense needs.

It should be recalled that Egypt's 20-year military involvement with the Soviet Union began in 1955 after President Nasser was rebuffed in his attempts to obtain military equipment from the United States following an Israeli attack on the Gaza Strip. (Subsequent developments included Secretary of State Dulles' withdrawal of American support for the Aswan High Dam, the nationalization of the Suez Canal, and the combined Israeli-British-French invasion of Egypt in the fall of 1956.) President Sadat requested American military assistance in the wake of the Sinai II accords in 1975 but was rebuffed by Congress.

President Sadat has taken bold steps toward Middle East peace, and President Carter referred to him publicly as "the world's foremost peacemaker". President Sadat has made clear his intention to seek a diplomatic, not a military, solution to the Middle East conflict.

The United States has an interest in supporting the goals of President Sadat and should be responsive to his defense needs as well. Rejection of the Egyptian request for aircraft might well be interpreted as rejection of President Sadat's path toward peace. It is in the American interest to strengthen bilateral relations with Egypt, the largest country in the Arab World. The United States has no quarrel with Egypt and should make this clear by pursuing a policy of cooperation and friendship.

VI. SAUDI ARABIA

Saudi Arabia is to receive 60 F–15's, one of America's most advanced jet fighters. The American national interest in Saudi Arabia is fast becoming one of this country's most important bilateral ties. The United States is the world's principal user of petroleum products; Saudi Arabia is the world's principal supplier. This reality, reaffirmed by rising levels every year, is the "bottom line" in the American-Saudi relationship, and the United States is more dependent on Saudi Arabia than the other way around. In the event of Saudi unwillingness or inability to ship oil to the United States, Saudi ability to keep functioning would be relatively unaffected in the short term while the American economy would be hard hit.

The United States has a major interest in helping Saudi Arabia sustain orderly economic and social development, since continuity within the country is also reflected in continuity in its vital role in the region as a whole. The United States also has an interest in maintaining access to Saudi markets for goods and services in its rapid economic development. American export of technology and services to Saudi industrial development is a sound way to help offset the cost of importing Saudi oil into this country.

The proposed sale of F–15's to Saudi Arabia should be viewed primarily as political symbolism and affirmation of the American-Saudi relationship. From the Saudi point of view these considerations may be greater than they are to the United States. Long promised access to an American aircraft of their choice to replace the aging fleet of British Lightnings, the Saudis chose the F–15 and now expect the promise to be honored. As one of America's most important allies, the Saudis feel entitled to more than routine treatment in an issue of great national concern. The Saudis see their role as a moderating influence politically and financially within OPEC, where other members consistently push for higher oil prices. It should be remembered that as recently as last December it was Saudi influence that kept OPEC from instituting a rise in the price of oil. The Saudis also believe that their decision to pump oil at a rate far exceeding national revenue needs, in order to meet western demand, is a gesture that warrants consideration in the United States. The Saudis believe that their national interest would be better served by a lower production rate that would conserve the oil by keeping it in the ground, where it has a higher value than it does once pumped and sold.

The Saudis view access to the F–15, the aircraft of their choice, as proof that the United States attaches importance to strengthened bilateral ties. Any attempt to divert or suppress the aircraft request would raise questions in Saudi minds about the seriousness of American intentions and could set in motion Saudi re-consideration of the premises upon which they have been acting in response to American needs.

Militarily, the F–15 in Saudi hands would not pose a security threat to Israel. Saudi Arabia has not played any significant role in previous Arab-Israeli wars. It knows that as a large country with a small population, it cannot afford to invite attack. It knows that its armed forces are no match for those of the Israelis and will not be into the foreseeable future. It knows that Saudi influence can best be expressed in political and financial terms, not military.

The F–15 is so complex and so difficult to fly that it could not be transferred readily to a "confrontation state" in the event of war even if the Saudis were willing to do so. Such a transfer would not only leave a dangerous gap in Saudi air defenses: it would also invite attack on the kingdom in its weakened state. Americans will be involved in training and maintenance roles for the F–15 and will be in a position to note unusual aircraft movement. Delivery dates estimated to start no earlier than 1981 or 1982 even further reduce any security threat to Israel. In fact, the role of Israel in the transfer of F–15's to Saudi Arabia is insignificant, either in terms of motivation or results. The F–15 sale to Saudi Arabia is in harmony with American strategic thinking about Saudi Arabia, a key nation in the crucial Arabian/Persian Gulf region.

VII. ISRAEL

Israel is intended to receive 75 F–16's and 15 F–15's in the package sale. NAAA believes that the delivery of additional combat aircraft to Israel will further over-arm the

country relative to its defense needs and does not support the sale.

Although the United States has no treaty obligation to Israel, a "special relationship" between the two countries has developed over the years. American political, military, and financial support has always been important to Israel's ability to function. International criticism of Israeli policies now has reached the point where the United States is its only major external supporter. It is time that the United States reassessed its open-ended support of Israel and analyzed Israeli policies and the extent to which they help or hinder American objectives in the Middle East and elsewhere in the world.

An important distinction must be made between assistance to Israel within its June 4, 1967 boundaries and Israel in its present configuration as an expansionist state. The commitment of the United States is to the former, not to the "Greater Israel" of Prime Minister Begin's plan which would necessitate permanent occupation of large amounts of Arab territory. One of the applications of American arms shipments to Israel since 1967 has been to extend the Israeli military "shield" deep into Arab territory.

American military assistance to Israel jumped from some $300 million in FY 1972 and 1973 to $2.5 billion in FY 1974 and is at the level of $1 billion for FY 1978 and the proposed FY 1979 request. It is disturbing to realize that part of the American "price" paid for Israeli acceptance of the Sinai II Accords of September 1975 was agreement to send even higher levels of military aid to Israel.

These levels of assistance should be assessed in conjunction with the recent Defense Department estimates that in terms of military strength at the time of the 1973 war, Israel is at a level of 160%, Syria at 100%, and Egypt to approximately 80–90%. Israel is stronger relative to its neighbors than at any time in its 30-year history. In addition to Israel's military arsenal, its air refueling capability has extended the effective combat range of every aircraft in Israel's possession. Anthony Cordesman, a military analyst writing in *Armed Forces Journal*, noted recently, "Israel is no longer a small state surrounded on all sides by neighbors with large forces. It is a militaristic state whose military buildup has gone far beyond the requirements of defense." Israeli Foreign Minister Moshe Dayan remarked in March 1977 that "Israel has more planes than Italy or Germany or France and a little less than England".

Other considerations that Congress should weigh in assessing the level of arms transfers to Israel are the following:

(1) Israel is the only country among the proposed arms recipients that refuses to become a signatory to the nuclear non-proliferation treaty. Israel is reported by authoritative American government sources to have a nuclear military capability.

(2) Israel is becoming a major arms exporter, with principal clients including South Africa and several Asian and Latin American countries. Israel is giving serious consideration to launching production of an advanced fighter similar to the F–15 or F–16 and has the technical capability to do so.

(3) American arms shipments to Israel while it occupies Arab lands are seen by the Arabs as evidence that despite what it says about illegal settlements, the American government tacitly supports Israeli military occupation of the Sinai Peninsula, the Gaza Strip, the West Bank, and the Golan Heights.

(4) American officials estimate that as the result of the buildup of forces since 1973, Israel has the capability to attack up to three of its neighbors and fight for 30 days without resupply—a need which gave the United States diplomatic leverage over Israeli actions during the 1973 war.

VIII. CONCLUSION

The Middle East conflict represents the overflow into neighboring parts of the region of the core Palestine issue. The American government and people have been more than generous in responding to Israel's fears of Arab intentions. The military realities have been all the other way, however, resulting in Israeli occupation of Arab lands, displacement of indigenous populations, and development of Israel into a modern-day Sparta.

Congress has made much of this possible through appropriation of funds, often exceeding Administration requests for arms to Israel. NAAA is of the opinion that much of the opposition to the Arab portion of the proposed arms sale is an attempt to thwart a shift in American political relationships in the region rather than fear for the military security of Israel.

At a time when American taxpayers are being pressed by rising government expenditures, we are being asked in the coming fiscal year to pay one-half billion dollars for arms to Israel and to absorb another one-half billion in loans at low interest rates over the next thirty years. American taxpayers are not, however, being asked to underwrite the cost of the aircraft for Egypt and Saudi Arabia.

NAAA is encouraged by evidence that the Carter Administration wants to serve the American interest and human rights in the Middle East. This approach is long overdue, and NAAA welcomes it.

America can regain credibility and a moral position with regard to the Middle East. We can protect Israel without subjecting the rest of the region to Israeli hegemony; Israeli security must not mean the utter insecurity of all its neighbors. We can develop American ties to the Arab World that reflect mutual interests. We must begin, and begin soon, however, to develop a regional, rational approach to arms transfers to the Middle East that incorporates phased reduction in cooperation with the other principal arms suppliers of the world.

MARCH 24, 1978.

Hon. CYRUS R. VANCE,
Secretary of State, Department of State, Washington, D.C.

DEAR MR. SECRETARY: I enclose for the detailed comments of the Department of State a memorandum prepared by the National Association of Arab Americans on the Middle East arms sales package.

I would like very much to have your comments on this memorandum in early April.

With best regards.

Sincerely yours,

LEE H. HAMILTON,
Chairman, Subcommittee on Europe, and the Middle East.

DEPARTMENT OF STATE,
Washington, D.C., April 20, 1978.

Hon. LEE H. HAMILTON,
Chairman, Subcommittee on Europe and the Middle East, Committee on International Relations, House of Representatives, Washington, D.C.

DEAR MR. CHAIRMAN: As you requested in your letter of March 24 to the Secretary, I am transmitting the comments of the Department of State on the memorandum of the National Association of Arab Americans on the Middle East aircraft package.

Sincerely,

DOUGLAS J. BENNET, JR.,
Assistant Secretary for Congressional Relations.

DEPARTMENT OF STATE COMMENTS ON MEMORANDUM PREPARED BY THE NATIONAL ASSOCIATION OF ARAB-AMERICANS ON MIDDLE EAST ARMS SALES

NAAA MEMORANDUM

"NAAA endorses the Administration's proposed 'package' sale of aircraft . . . because the Arab sales underscore the growing political and economic importance of the Arab world to the United States. The sales to Arab nations also serve as a reminder that Israeli arms requests are no longer considered in a vacuum."

DEPARTMENT OF STATE COMMENT

The proposed aircraft sales were not designed as a political gesture to any party, nor should one conclude that our arms sales to the region will in the future require the linking of transfers to different countries.

Each of the four proposed sales was considered on its merits in terms of the requesting nation's need for defensive aircraft. We shall continue to follow this practice, consistent with the guidelines of the President's arms transfer policy. The four sales will be presented to Congress as a "package" because of their interrelated implications for the regional military balance and the peace process. In deciding on arms transfers to the Middle East these factors have regularly been examined. Israeli requests have never been considered "in vacuum."

NAAA MEMORANDUM

"The Middle East conflict has been intensified by years of American over-supply of weapons to Israel."

DEPARTMENT OF STATE COMMENT

The sale of U.S. arms to Israel over the years has been motivated by our determination that Israel have the necessary equipment to deter and, if necessary, to defend itself successfully against aggression. Furthermore, the U.S. has consistently exercised restraint in an effort to avoid fueling arms races in the Middle East. It was not until the 1967 Arab-Israel war, when other sources were no longer available, that the U.S. assumed the role as the preponderant supplier of Israel's arms. We believe that our response to Israel's needs, both before and after 1967, had been appropriate to the circumstances of the military balance at the time, particularly in light of Soviet shipments to Arab states.

NAAA MEMORANDUM

" . . . American officials fell into the habit of equating Israel's 'enemies' with America's 'enemies.'

DEPARTMENT OF STATE COMMENT

Throughout the thirty years of Israel's existence, the U.S. has sought to maintain a balanced and fair approach in its relations with both sides of the Arab-Israel dispute. In addition to the intrinsic value of good bilateral relations in the region, we have recognized that friendly and productive ties with the Arab states are a necessary condition if the U.S. is to help in the search for an Arab-Israel settlement.

NAAA MEMORANDUM

"The arms for Israel will serve to tighten Israel's hold on those (occupied) areas and provide protection for the 90-plus settlements. . . ."

DEPARTMENT OF STATE COMMENT

The U.S. has sold arms to Israel to help assure its security. We have explicitly stated that we would not use the level of arms supply to pressure Israel in negotiations. Similarly, our arms transfers do not constitute approbation of all Israeli policies or actions, with some of which we disagree. The U.S. considers that it has a historic responsibility to assist Israel with its defense and that this responsibility overrides separate political questions. More importantly, it is clear that the peace settlement that Israel and most of the Arab states so earnestly desire will be achieved when both sides display the requisite understanding and flexibility. Israel's military strength should not form an impediment to successful negotiations. Rather, we believe all parties must have confidence in their individual security in order to make the difficult compromises necessary for peace.

NAAA MEMORANDUM

"The proposed sale of F–15s to Saudi Arabia should be viewed primarily as po-

litical symbolism and affirmation of the American-Saudi relationship."

DEPARTMENT OF STATE COMMENT

We agree that there is an important symbolism in this sale. Over the years Saudi Arabia has looked to the United States for support of the Kingdom's security and territorial integrity. Saudi confidence in this support has been based not only on the ability of the U.S. as a great power to work for global peace and order, but also on the reliability of the U.S. as supplier of equipment, advice and training for the development of Saudi Arabia's own defense capability. Saudi Arabia's confidence in our concern for its security needs is a key element in maintaining the broad relationship which has so well served major U.S. interests. The Saudis regard acquisition of the F–15 as a particularly significant element in their long-term effort to develop an adequate defense capability and hence regard our willingness to provide the aircraft as a test case of our willingness to meet legitimate Saudi security needs.

The Administration feels, however, that quite beyond this symbolic aspect there is a major US national security interest in providing the F–15 in order to enable the Saudis to create an effective air defense for their national territory. The importance of Saudi Arabia to key U.S. national interests is clear. It is in our own national interest that Saudi Arabia be safe from attack, capable of deterring aggression against its territory and equipped to provide for its legitimate defense needs. The Administration has determined that providing the F–15 to Saudi Arabia will play a most important role in responding to these interests.

NAAA MEMORANDUM

". . . last December it was Saudi influence that kept OPEC from instituting a rise in the price of oil."

DEPARTMENT OF STATE COMMENT

Saudi Arabia has on three occasions since 1975 been the leading force preventing or restraining an OPEC price increase, thus sacrificing billions of dollars in additional revenues. Iran joined Saudi Arabia in urging the price freeze that was approved by OPEC in December 1977.

NAAA MEMORANDUM

"The F–15 is so complex and so difficult to fly that it could not be transferred readily to a 'confrontation state' . . ."

DEPARTMENT OF STATE COMMENT

It is not accurate to describe the F–15 as "complex and so difficult to fly"; in fact, the F–15 is especially engineered for relatively simple maintenance and operation compared to other combat aircraft of the same class.

It is true, nevertheless, that a transfer of the F–15 to another country could not be accomplished without substantial training for the new ground and air crews, and extensive logistic support. This could not be provided by Saudi Aradia without observation by U.S. personnel assisting the Saudi Air Force. Saudi Arabia has stated unequivocally that it will not transfer U.S.-supplied arms, including the F–15, without U.S. approval as required by law.

NAAA MEMORANDUM

". . . Israel's . . . air refueling capability has extended the eeffctive combat range of every aircraft in Israel's possession.'

DEPARTMENT OF STATE COMMENT

Israel now has two KC–130 and two KC–97 tanker aircraft. These planes can refuel most of Israel's 228 A–4 aircraft and a limited number of its 152 F–4's. None of Israel's other aircraft (Mirage or Kfir) can be air-to-air refueled.

NAAA MEMORANDUM

"Israel . . . is a militaristic state whose military build-up has gone far beyond the requirements of defense."

DEPARTMENT OF STATE COMMENT

We disagree with the characterization of Israel as a "militaristic state." Despite its heavy security concerns, Israel is a flourishing democracy with freedom of debate totally unlike the restricted atmosphere in various states dominated by military elements. Israel's civilian economy is healthy and building new strength; it is geared to the production of higher levels of material well-being for the population. As indicated earlier, we do not believe that Israel's military capability is excessive to its requirements for deterrence and defense.

NAAA MEMORANDUM

"Israel is the only country among the proposed arms recipients that refuses to become a signatory to the nuclear non-proliferation treaty."

DEPARTMENT OF STATE COMMENT

Neither Israel nor Saudi Arabia has adhered to the Nuclear Non-Proliferation Treaty; Egypt, while it has signed the Treaty, has yet to ratify its acceptance. The Policy of the U.S. is to achieve the adherence of all states in the Middle East to the NPT, and we will continue to pursue this goal.

NAAA MEMORANDUM

"Israel is reported by authoritative American government sources to have a nuclear military capability."

DEPARTMENT OF STATE COMMENT

We have noted strong Israeli statements that Israel will not be the first to introduce nuclear weapons into the Middle East. This position was reiterated on October 25, 1977, by an Israeli Government spokesman. In December 1974 the Israeli Prime Minister publicly stated, "We have no nuclear weapons." Again in September 1975, the Prime Minister stated, "Israel is a non-nuclear country." These are authoritative statements of the Government of Israel on this matter.

NAAA MEMORANDUM

"Israel is becoming a major arms exporter * * *"

DEPARTMENT OF STATE COMMENT

For several years Israel's sales of military equipment have totalled a few hundred million dollars annually. According to ACDA, in 1976 Israel ranked 14th among 44 nations in terms of the value of its arms exports. Its arms exports are well below the levels of a number of Western and Eastern arms suppliers.

NAAA MEMORANDUM

"Congress has made much of this possible (i.e., "Israeli occupation of Arab lands, displacement of indigenous populations, and development of Israel into a modern-day Sparta.") through appropriation of funds, often exceeding Administration requests for arms to Israel."

DEPARTMENT OF STATE COMMENT

This statement is inconsistent with actual American policy and actions in the Arab-Israel dispute. The views of the Executive and Legislative Branches historically have been generally congruent on the main lines of U.S. policy on Israel. Consistent with our long-standing commitment to the security of Israel, the U.S. Government has been dedicated to the achievement of a just and durable peace in the Middle East, in accordance with the principles set forth in UN Security Resolution 242; the Executive Branch's efforts in that regard have had the support of the Congress. Finally, Congress and the Executive Branch have worked closely on appropriations legislation and generally have been in accord on the level of funding the Administration considered necessary for Israel.●

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted as follows to:

Mr. RISENHOOVER (at the request of Mr. WRIGHT), for today, on account of official business.

Mr. RODINO (at the request of Mr. WRIGHT), for today, on account of illness in the family.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special order heretofore entered, was granted to:

Mr. ASHBROOK, for 10 minutes, today, and to revise and extend his remarks and include extraneous matter.

(The following Members (at the request of Mr. WALKER) and to revise and extend their remarks and include extraneous matter:)

Mr. EDWARDS of Oklahoma, for 5 minutes, today.

Mr. WHALEN, for 5 minutes, today.

Mr. KEMP, for 10 minutes, today.

(The following Members (at the request of Mr. PEASE) to revise and extend their remarks and include extraneous material:)

Mr. ANNUNZIO, for 5 minutes, today.

Mr. GONZALEZ, for 5 minutes, today.

Mr. RONCALIO, for 5 minutes, today.

Mr. RICHMOND, for 5 minutes, today.

Mr. VANIK, for 5 minutes, today.

Mr. STOKES, for 15 minutes, today.

Mr. BYRON, for 5 minutes, today.

Mr. PEPPER, for 5 minutes, today.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. HARKIN, to insert his remarks immediately after the vote today on Senate Concurrent Resolution 573.

Mr. HAMILTON, and to include extraneous material notwithstanding the fact that it exceeds two pages of the RECORD and is estimated by the Public Printer to cost $1,150.

Mr. YOUNG of Florida, and to include extraneous material with remarks made during debate on Peace Corps Act Amendments of 1978.

(The following Members (at the request of Mr. WALKER) and to include extraneous matter:)

Mr. SARASIN.

Mr. BROWN of Ohio in two instances.

Mr. BOB WILSON in three instances.

Mr. REGULA.

Mr. DERWINSKI.

Mr. EMERY.

Mr. PURSELL.

Mr. ANDERSON of Illinois in two instances.

Mr. LEACH in two instances.

Mr. FISH.

Mr. RAILSBACK.

Mr. CRANE.

Mr. MICHEL.

Mr. LENT.

Mr. FINDLEY.

(The following Members (at the request of Mr. PEASE) and to include extraneous matter:)

Ms. MIKULSKI.
Mr. ADDABBO.
Mr. FISHER.
Mr. RICHMOND in two instances.
Mr. EDGAR in two instances.
Mr. GONZALEZ in three instances.
Mr. ANDERSON of California in three instances.
Mr. WIRTH.
Mr. CORRADA.
Mr. CONYERS.
Mr. MINETA in two instances.
Mr. SKELTON.
Mr. CARR.
Mr. LEVITAS.
Mr. SIMON in five instances.
Mr. HARRINGTON.
Mr. CARNEY.
Mr. RYAN.
Mr. OBERSTAR.
Mr. MAZZOLI.
Mr. MCDONALD.
Mr. LUKEN.
Mr. GIBBONS.

SENATE BILLS REFERRED

Bills of the Senate of the following titles were taken from the Speaker's table and, under the rule, referred as follows:

S. 1829. An act to provide for the establishment of the Jean Lafitte National Historical Park and Preserve in the State of Louisiana, and for other purposes; to the Committee on Interior and Insular Affairs; and

S. 2553. An act to authorize appropriations for the fiscal year 1979 for certain maritime programs of the Department of Commerce, and for other purposes; to the Committee on Merchant Marine and Fisheries.

SENATE ENROLLED BILL SIGNED

The SPEAKER announced his signature to an enrolled bill of the Senate of the following title:

S. 1617. An act to establish a program of ocean pollution research, development, and monitoring, and for other purposes.

ADJOURNMENT

Mr. HARKIN. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock and 51 minutes p.m.), under its previous order, the House adjourned until tomorrow, Wednesday, April 26, 1978, at 2 o'clock p.m.

EXECUTIVE COMMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

3950. A letter from the Acting Assistant Secretary of the Army (Manpower and Reserve Affairs), transmitting a draft of proposed legislation to amend section 6(d)(1) of the Military Selective Service Act (50 USC App. 456(d)(1)) to provide greater training flexibility for Reserve officers ordered to active duty for training for not more than 6 months by deleting the requirement that they be ordered to active duty for not less than 3 months; to the Committee on Armed Services.

3951. A letter from the Director, Defense Civil Preparedness Agency, transmitting a report covering the quarter ended March 31, 1978, on property acquisitions of emergency supplies and equipment, pursuant to section 201(h) of the Federal Civil Defense Act of 1950, as amended; to the Committee on Armed Services.

3952. A letter from the Secretary of Labor, transmitting a report on the Department's activities under the Freedom of Information Act during the calendar year 1977, pursuant to 5 U.S.C. 552(d); to the Committee on Government Operations.

3953. A letter from the Special Assistant for Management, Office of the Special Representative for Trade Negotiations, Executive Office of the President, transmitting a report on the Office's activities under the Freedom of Information Act during calendar year 1977, pursuant to 5 U.S.C. 552(d); to the Committee on Government Operations.

3954. A 1 etter from the General Counsel, Securities and Exchange Commission, transmitting notice of a proposed new records system, pursuant to 5 U.S.C. 552a(o); to the Committee on Government Operations.

3955. A letter from the Chairman, National Park Foundation, transmitting the first decade report and the 1977 annual report of the Foundation, pursuant to section 10 of Public Law 90–209; to the Committee on Interior and Insular Affairs.

3956. A letter from the Assistant Secretary of State for Congressional Relations, transmitting a report on political contributions made by Nancy Ostrander, Ambassador-designate to Surinam, pursuant to section 6 of Public Law 93–126; to the Committee on International Relations.

3957. A letter from the Assistant Secretary of State for Congressional Relations, transmitting notice of a proposed license for the export of certain defense equipment and services sold commercially to Argentina (MC–9–78), pursuant to section 36(c) of the Arms Export Control Act; to the Committee on International Relations.

3958. A letter from the Assistant Secretary of the Treasury (Legislative Affairs), transmitting various project performance audit reports prepared by the International Bank for Reconstruction and Development and a postevaluation report by the Asian Development Bank, pursuant to section 301(e)(3) of the Foreign Assistance Act of 1961, as amended (87 Stat. 718); to the Committee on International Relations.

3959. A letter from the Controller, American Chemical Society, transmitting the annual report and audit of the organization for calendar year 1977, pursuant to section 8 of Public Law 75–358 and section 3 of Public Law 88–504; to the Committee on the Judiciary.

3960. A letter from the Secretary of the Interior, transmitting the second annual report on the Tule elk herds in California, pursuant to section 3 of Public Law 94–389; to the Commitee on Merchant Marine and Fisheries.

3961. A letter from the Secretary of the Army, transmitting a report from the Chief of Engineers on the Seattle Metropolitan Urban Drainage Study-Cedar and Green River Basins, Washington, together with other pertinent reports, pursuant to section 209 of the Flood Control Act of 1962 (Public Law 87–874); to the Committee on Public Works and Transportation.

3962. A letter from the Assistant Secretary of Commerce for Economic Development, transmitting notice of a delay in preparation of the annual report of the Economic Development Administration for fiscal year 1977; to the Committee on Public Works and Transportation.

3963. A letter from the Federal Cochairman, Upper Great Lakes Regional Commission, transmitting the Commission's 1977 annual report, pursuant to section 510 of the Public Works and Economic Development Act of 1965, as amended; to the Committee on Public Works and Transportation.

3964. A letter from the Administrator of Veterans' Affairs, transmitting a draft of proposed legislation to amend title 38, United States Code, to provide readjustment professional counseling to Vietnam-era veterans and their families, and for other purposes; to the Committee on Veterans' Affairs.

3965. A letter from the Comptroller General of the United States, transmitting a report on work requirements of the food stamp program (CED–78–60) April 24, 1978; jointly, to the Committees on Government Operations, and Agriculture.

3966. A letter from the Comptroller General of the United States, transmitting a report on the status of the Air Force's F–16 aircraft program (PSAD–78–36, April 24, 1978); jointly, to the Committees on Government Operations, and Armed Services.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. MAHON: Committee on Appropriations. House Joint Resolution 859. Joint resolution making supplemental appropriations for the United States Railway Association for the fiscal year ending September 30, 1978, and for other purposes (Rep. No. 95–1083). Referred to the Committee of the Whole House on the State of the Union.

Ms. CHISHOLM: Committee on Rules. House Resolution 1149. Resolution providing for the consideration of H.R. 2222. A bill to amend the National Labor Relations Act to clarify the scope of its coverage (Rept. No. 95–1084). Referred to the House Calendar.

Mr. PEPPER: Committee on Rules. House Resolution 1150. Resolution providing for the consideration of H.R. 9400. A bill to authorize actions for redress in cases involving deprivations of rights of institutionalized persons secured or protected by the Constitution or laws of the United States (Rept. No. 95–1085). Refererd to the House Calendar.

Mr. THOMPSON: Committee on House Administration. House Resolution 1013. Resolution to provide for the expenses of investigations and studies to be conducted by the Committee on Science and Technology; with amendment (Rept. No. 95–1086). Referred to the House Calendar.

Mr. ZABLOCKI: Committee on International Relations. H.R. 12222. A bill to amend the Foreign Assistance Act of 1961 to authorize development and economic assistance programs for fiscal year 1979, to make certain changes in the authorities of that act and the Agricultural Trade Development and Assistance Act of 1954, to improve the coordination and administration of U.S. development-related policies and programs, and for other purposes (Rept. No. 95–1087). Referred to the Committee of the Whole House on the State of the Union.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. BROYHILL (for himself, Mr. PREYER, Mr. SCHEUER, Mr. FLORIO, Mr. MAGUIRE, Mr. OTTINGER, Mr. MARKEY, Mr. WALGREN, Mr. CARTER, Mr. BROYHILL, and Mr. MADIGAN):

H.R. 12326. A bill to amend the Developmental Disabilities Services and Facilities

Construction Act to revise and extend the programs under that act, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. ANDERSON of California (for himself and Mr. CRANE):

H.R. 12327. A bill to amend title 38 of the United States Code in order to provide for the payment of service pensions to veterans of World War I and for certain surviving spouses and certain children; to the Committee on Veterans' Affairs.

By Mr. BROYHILL (for himself, Mr. GINN, and Mr. EVANS of Georgia):

H.R. 12328. A bill to authorize a study for the purpose of determining the feasibility and desirability of designating the Overmountain Men Victory Trail as a national scenic trail; to the Committee on Interior and Insular Affairs.

By Mr. DELLUMS (for himself, Mr. WEISS, Mr. GARCIA, and Mr. GUYER):

H.R. 12329. A bill to amend the Internal Revenue Code of 1954 to provide that a taxpayer conscientiously opposed to participation in war may elect to have his income, estate, or gift tax payments spent for nonmilitary purposes; to create a trust fund (the World Peace Tax Fund) to receive these tax payments; to establish a World Peace Tax Fund Board of Trustees; and for other purposes; to the Committee on Ways and Means.

By Mr. DIGGS (by request):

H.R. 12330. A bill to restrict the possession and carrying of pistols, other firearms, and other dangerous weapons by members of the District of Columbia Department of Corrections to the periods of time when they are on duty and authorized by the Director of the District of Columbia Department of Corrections; to the Committee on the District of Columbia.

H.R. 12331. A bill to amend the Public Buildings Act of 1959 in order to restore the Pension Building in Washington, District of Columbia, to house the Museum of Building Arts, and for other purposes; jointly, to the Committees on Public Works and Transportation and Education and Labor.

By Mr. DRINAN (for himself, Mr. AMBRO, Mr. JACOBS, Mr. KEMP, and Mr. MCHUGH):

H.R. 12332. A bill to promote the development of methods of research, experimentation, and testing that minimize the use of, and pain and suffering to, live animals; to the Committee on Science and Technology.

By Mr. EDWARDS of Oklahoma:

H.R. 12333. A bill to amend chapter 5 and chapter 7 of title 5, United States Code, to improve and reform the administrative procedures of Federal agencies, and for other purposes; to the Committee on the Judiciary.

By Mr. FOLEY:

H.R. 12334. A bill to amend section 1001 of the Food and Agriculture Act of 1977; to the Committee on Agriculture.

By Mr. GIBBONS:

H.R. 12335. A bill to amend the Internal Revenue Code of 1954 to discourage the termination of certain multiemployer plans, and for other purposes; to the Committee on Ways and Means.

By Mr. GLICKMAN:

H.R. 12336. A bill to increase the target prices for the 1978 through 1981 crops of wheat; to the Comittee on Agriculture.

By Mr. KREBS (for himself, Mr. WHITEHURST, Mr. FRASER, Mr. TRAXLER, Mr. EILBERG, Mr. LAFALCE, Mr. SEIBERLING, Mr. HUGHES, Mr. BADHAM, Mr. MATHIS, Mr. ERTEL, Mr. THOMPSON, Mrs. SPELLMAN, Mr. TRIBLE, Mr. SIMON, Mr. PATTERSON of California, Mr. MCHUGH, and Mr. PANETTA):

H.R. 12337. A bill to amend the Internal Revenue Code of 1954 to allow any active participant in a retirement plan a deduction for amounts of retirement savings paid by such individual in any taxable year before such individual's retirement rights vest under such plan; to the Committee on Ways and Means.

By Mr. LEACH:

H.R. 12338. A bill to amend the Internal Revenue Code of 1954 to provide that certain farm buildings shall be eligible for the investment tax credit; to the Committee on Ways and Means.

By Mr. LEDERER (for himself, Mr. BURKE of Massachusetts, Mr. BURLESON of Texas, Mr. CRANE, Mr. DUNCAN of Tennessee, Mr. JENKINS, Mr. KETCHUM, Mr. PICKLE, Mr. WAGGONNER, Mr. ROSTENKOWSKI, Mr. ARCHER, Mr. FISHER, Mr. BRODHEAD, and Mr. VANDER JAGT):

H.R. 12339. A bill to amend section 118 of the Internal Revenue Code of 1954 to clarify the treatment of contributions in and of construction to regulated electric or gas public utilities; to the Committee on Ways and Means.

By Mr. MCEWEN (for himself, Mr. HANLEY, Mr. HANNAFORD, Mr. LAFALCE, Mr. DOWNEY, Mr. LENT, Mr. WALSH, Mr. GREEN, Mr. RICHMOND, Mr. EDWARDS of California, Mr. NOWAK, Mr. KEMP, Mr. LUNDINE, Mr. ADDABBO, Ms. HOLTZMAN, Mr. DORNAN, Mr. BOB WILSON, Mr. MURPHY of Pennsylvania, Mr. GOLDWATER, Mr. WINN, Mr. WHITEHURST, Mr. CARTER, Mr. STRATTON, Mr. ZEFERETTI, and Mr. CONABLE):

H.R. 12340. A bill to provide for the striking of national medals by the Lake Placid 1980 Olympic Winter Games, Inc., in commemoration of the XIII Olympic winter games; to the Committee on Banking, Finance and Urban Affairs.

By Ms. MIKULSKI (for herself, Mrs. SPELLMAN, and Mr. GILMAN):

H.R. 12341. A bill to amend title 39, U.S. Code, to prevent deceptive business solicitations by providing that any such solicitation which is designed to resemble a bill or statement of account shall be nonmailable matter; to the Committee on Post Office and Civil Service.

By Mr. MINETA (by request) (for himself and Mr. JOHNSON of California):

H.R. 12342. A bill to amend the act of October 19, 1965, to provide additional authorization for the Library of Congress James Madison Memorial Building; to the Committee on Public Works and Transportation.

By Mr. PERKINS:

H.R. 12343. A bill to amend, revise and consolidate the provisions of the child nutrition programs in the National School Lunch Act, as amended, and the Child Nutrition Act of 1966, as amended, and for other purposes; to the Committee on Education and Labor.

By Mr. RHODES (for himself, Mr. STUMP, Mr. RUDD, and Mr. UDALL):

H.R. 12344. A bill to modify a portion of the south boundary of the Salt River Pima-Maricopa Indian Reservation in Arizona, and for other purposes; to the Committee on Interior and Insular Affairs.

By Mrs. HOLT (for herself, Mr. BURGENER, and Mr. MICHEL):

H.R. 12345. A bill to improve the congressional budget process by the establishment in the House of Representatives of a two-step budget procedure for the consideration of a first required concurrent resolution on the budget; to the Committee on Rules.

By Mr. RICHMOND (for himself, Mr. BARNARD, Mr. BIAGGI, Mr. BONIOR, Mr. BRINKLEY, Mr. BUCHANAN, Mr. CLAY, Mr. CORRADA, Mr. FITHIAN, Mr. GREEN, Mr. HAMMERSCHMIDT, Mr. HARRINGTON, Mr. JEFFORDS, Mr. LE FANTE, Mr. MCCLOSKEY, Mr. MARKEY, Ms. MIKULSKI, Mr. MICHAEL O. MYERS, Mr. NATCHER, Ms. OAKAR, Mr. RODINO, Mr. ROONEY, Mr. THORNTON, Mr. YATRON, and Mr. YOUNG of Missouri):

H.R. 12346. A bill to provide an opportunity to individuals to make financial contributions, in connection with the payment of their Federal income tax, for the advancement of the arts and the humanities; to the Committee on Ways and Means.

By Mr. ROGERS (for himself, Mr. PREYER, Mr. SCHEUER, Mr. FLORIO, Mr. MAGUIRE, Mr. OTTINGER, Mr. MARKEY, Mr. WALGREN, Mr. CARTER, Mr. MADIGAN, and Mr. SKUBITZ):

H.R. 12347. A bill to amend the Public Health Service Act to revise and extend the programs of assistance for libraries of medicine and the programs of the National Heart, Lung, and Blood Institute and the National Cancer Institute, to revise and extend the program for National Research Service Awards, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. ROGERS (for himself, Mr. SATTERFIELD, Mr. PREYER, Mr. SCHEUER, Mr. FLORIO, Mr. MAGUIRE, Mr. MARKEY, Mr. WALGREN, Mr. CARTER, Mr. BROYHILL, Mr. MADIGAN, and Mr. SKUBITZ):

H.R. 12348. A bill to amend the Drug Abuse Office and Treatment Act of 1972 to extend the programs of assistance under that act for drug abuse prevention, education, treatment, and rehabilitation, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. RONCALIO:

H.R. 12349. A bill to provide for the DuNoir Basin Addition to the Washakie Wilderness; to the Comittee on Interior and Insular Affairs.

By Mr. RONCALIO (for himself, Mr. DUNCAN of Oregon, Mr. BAUCUS, and Mr. SIMON):

H.R. 12350. A bill to amend title 10, United States Code, to authorize the Secretary of the Army to establish an Army Reserve career interest program for persons between the ages of 14 and 18; to the Committee on Armed Services.

By Mr. RONCALIO (for himself, Mr. JOHNSON of Colorado, Mr. SANTINI, Mr. MCKAY, Mr. ARMSTRONG, and Mr. MARRIOTT):

H.R. 12351. A bill to amend the Federal Coal Leasing Amendments Act of 1975 (Public Law 94–377; 30 U.S.C. 181 et seq.); to the Committee on Interior and Insular Affairs.

By Mr. ROSTENKOWSKI:

H.R. 12352. A bill to amend the Internal Revenue Code of 1954 to provide that income from certain railroad rolling stock shall be treated as income from sources within the United States; to the Committee on Ways and Means.

By Mr. TEAGUE (for himself, Mrs. HECKLER, Mr. ROBERTS, Mr. HAMMERSCHMIDT, Mr. WOLFF, Mr. MOTTL, Mr. CORNELL, Mr. HANNAFORD, Mr. ALLEN, Mr. APPLEGATE, Mr. HEFNER, Mr. WYLIE, Mr. WALSH, Mr. SATTERFIELD, Mr. EDWARDS of California, Mr. MONTGOMERY, Mr. CARNEY, Mr. BRINKLEY, Mr. BEARD of Rhode Island, Mr. EDGAR, Mr. HALL, Mr. BARNARD, Mr. HILLIS, Mr. ABDNOR, and Mr. GUYER):

H.R. 12353. A bill to amend title 38, United States Code, to extend the period of eligibility for veterans readjustment appointments in the Federal Government for veterans of the Vietnam era; to the Committee on Veterans' Affairs.

By Mr. TEAGUE (for himself, Mr. HANSEN, and Mr. SAWYER):

H.R. 12354. A bill to amend title 38, United States Code, to extend the period of eligibility for veterans readjustment appointments in the Federal Government for veterans of

the Vietnam era; to the Committee on Veterans' Affairs.

By Mr. UDALL:

H.R. 12355. A bill to authorize appropriations to the Nuclear Regulatory Commission in accordance with section 261 of the Atomic Energy Act of 1954, as amended, and section 305 of the Energy Reorganization Act of 1974, as amended, and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. UDALL (for himself and Mr. RAHALL):

H.R. 12356. A bill to amend the Surface Mining Control and Reclamation Act of 1977 to raise certain authorized funding levels contained therein, to increase amounts authorized to be appropriated for the fiscal year 1979 and succeeding fiscal years to carry out the purposes of section 507(c) thereof, and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. ULLMAN:

H.R. 12357. A bill to amend the Internal Revenue Code of 1954 to provide that certain agricultural labor performed by individuals under the age of 16 will not be subject to the Federal unemployment tax; to the Committee on Ways and Means.

By Mr. WALGREN:

H.R. 12358. A bill to amend the Public Health Service Act to provide for the development of standards for provision of hospice care, to provide for studies and demonstration projects in the provision of hospice care, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. WEISS (for himself, Mr. ROE, Mr. BONIOR, Mr. MCCLOSKEY, Mr. ZEFERETTI, Mr. MARKEY, and Mr. DOWNEY):

H.R. 12359. A bill to provide that the Secretary of Housing and Urban Development may not approve any application for rental increases in federally assisted housing unless the amount of such increase is permitted under State and local law; to the Committee on Banking, Finance and Urban Affairs.

By Mr. WEISS (for himself, Mr. DRINAN, Ms. HOLTZMAN, Mr. BEDELL, and Mr. HARRINGTON):

H.R. 12360. A bill to provide that ionization smoke detectors containing any radioactive isotope shall be considered banned hazardous substances subject to the prohibitions of the Federal Hazardous Substances Act; to the Committee on Interstate and Foreign Commerce.

By Mr. WHALEN (for himself, Mr. STEERS, Mr. BINGHAM, Mr. BUCHANAN, Mrs. COLLINS of Illinois, Mr. DRINAN, Mr. EDGAR, Mr. GARCIA, Mr. GREEN, Ms. HOLTZMAN, Mr. MURPHY of Pennsylvania, Mr. OTTINGER, Mr. PEASE, Mr. RAHALL, Mr. RODINO, Mr. ROSENTHAL, and Mr. WOLFF):

H.R. 12361. A bill to provide for advisory safety standards for public playground equipment, and to provide that such equipment located in federally assisted playground facilities shall comply with such standards; to the Committee on Interstate and Foreign Commerce.

By Mr. WHITEHURST (for himself, Mr. BINGHAM, Mr. DERWINSKI, Mr. DUNCAN of Tennessee, Ms. HOLTZMAN, Mr. KRUEGER, Mr. PEPPER, Mr. RODINO, and Mr. WAXMAN):

H.R. 12362. A bill to establish a National Zoological Foundation; to the Committee on Merchant Marine and Fisheries.

By Mr. WIGGINS:

H.R. 12363. A bill to amend title 42, to provide for appropriate reimbursement for certain services provided by nonprofit rehabilitation clinics to crippled and aged persons covered by the medicare program; to the Committee on Ways and Means.

By Mr. WON PAT:

H.R. 12364. A bill to provide for the establishment of a National Seashore on the Island of Guam, and for other purposes; to the Committee on Interior and Insular Affairs.

H.R. 12365. A bill to establish War in the Pacific National Historic Park in Guam; to the Commitee on Interior and Insular Affairs.

By Mr. YATES:

H.R. 12366. A bill to provide for the conveyance of the property known as Mar-A-Lago from the United States to the Marjorie Merriweather Post Foundation of the District of Columbia; to the Committee on Interior and Insular Affairs.

By Mr. ASHBROOK:

H.R. 12367. A bill to provide for the seizure, forfeiture, and disposition of vehicles used to illegally transport persons into tne United States, and for other purposes; to the Committee on the Judiciary.

By Mr. KETCHUM (for himself, Mr. ARCHER, Mr. VANDER JAGT, Mr. STEIGER, Mr. FRENZEL, Mr. MARTIN, Mr. BAFALIS, Mr. SCHULZE, and Mr. GRADISON):

H.R. 12368. A bill to amend the Social Security Act and the Internal Revenue Code of 1954, to strengthen the financing of the social security system, to provide for a gradual increase in retirement age, to improve the treatment of women through the establishment of a working spouse's benefits and to eliminate gender-based discrimination, to provide coverage under the system for Federal employees, to increase and ultimately repeal the earnings limitation, and for other purposes; to the Committee on Ways and Means.

By Mr. LEACH:

H.R. 12369. A bill to amend the Farm Labor Contractor Registration Act of 1963 to provide that certain individuals employed in the detassling of hybrid seed corn shall not be considered migrant workers for purposes of such act; to the Committee on Education and Labor.

By Mr. ROGERS (for himself, Mr. MAGUIRE, Mr. MARKEY, Mr. OTTINGER, Mr. WALGREN, Mr. CARTER, and Mr. MADIGAN):

H.R. 12370. A bill to amend the Public Health Service Act and related health laws to revise and extend the programs of financial assistance for the delivery of health services, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. SYMMS:

H.R. 12371. A bill to amend the Federal Food, Drug, and Cosmetic Act to provide that drugs will be regulated under the act solely to assure their safety, to promote the efficient and fair treatment of new drug applications, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. WHITEHURST (for himself and Mr. TRIBLE):

H.R. 12372. A bill to amend the Internal Revenue Code of 1954 to provide tax-saving incentives for savings accounts established for the purpose of purchasing a home; to the Committee on Ways and Means.

By Mr. RICHMOND:

H.R. 12373. A bill to establish a task force within the Department of Agriculture to develop new beef-grading standards based on consumer needs and preferences, to require the posting of such standards in retail food stores, and to educate consumers with regard to the Department of Agriculture's beef-grading standards and their relation to the nutritional value and cost of beef; to the Committee on Agriculture.

By Mr. BYRON (for himself and Mr BAUCUS):

H.J. Res. 868. Joint resolution to authorize the President to issue a proclamation designating the Sunday following Fire Service Recognition Day as "Memorial Sunday" for firefighters who have been disabled or killed in the line of duty during the preceding year; to the Committee on Post Office and Civil Service.

By Mr. LATTA:

H.J. Res. 869. Joint resolution proposing an amendment to the Constitution of the United States to provide that appropriations made by the United States shall not exceed its revenues, except in time of war or threat of war as determined by the Congress; and to provide for the systematic paying back of the national debt; to the Committee on the Judiciary.

By Mr. MOORE (for himself, Mr. BAUMAN, Mr. BROYHILL, Mr. CARTER, Mr. CEDERBERG, Mr. DEL CLAWSON, Mr. COHEN, Mr. COLLINS of Texas, Mr. CONTE, Mr. GUYER, Mr. MARKS, Ms. MIKULSKI, Mr. MONTGOMERY, Mr. O'BRIEN, Mr. RHODES, Mr. ROBINSON, Mr. SANTINI, Mr. SIMON, Mr. STAGGERS, Mr. STANTON, Mr. STOCKMAN, Mr. TREEN, Mr. VAN DEERLIN, Mr. BOB WILSON, and Mr. WIRTH):

H.J. Res. 870. Joint Resolution designating July 1, 1978, as "National Free Enterprise Day"; to the Committee on Post Office and Civil Service.

By Mr. PRESSLER:

H.J. Res. 871. Joint resolution proposing an amendment to the Constitution of the United States for the protection of unborn children and other persons; to the Committee on the Judiciary.

By Mr. SYMMS (for himself, Mr. ROBINSON, Mr. CRANE, Mr. ARMSTRONG, Mr. DORNAN, Mr. QUILLEN, Mr. MOORHEAD of California, Mr. DEL CLAWSON, Mr. KETCHUM, Mr. JOHNSON of Colorado, Mr. MARLENEE, Mr. TAYLOR, Mr. LAGOMARSINO, Mr. ROUSSELOT, Mr. CUNNINGHAM, Mr. YOUNG of Florida, Mr. HAMMERSCHMIDT, Mr. HAGEDORN, Mr. QUAYLE, Mr. EDWARDS of Oklahoma, Mr. BADHAM, Mr. KELLY, Mr. YOUNG of Alaska, Mr. HANSEN, and Mr. TREEN):

H.J. Res. 872. Joint resolution disapproving proposed regulations of the Department of the Treasury requiring centralized governmental registration of firearms; jointly, to the Committees on the Judiciary, and Ways and Means.

By Mr. ASHBROOK (for himself, Mr. ALEXANDER, Mr. AMMERMAN, Mr. AUCOIN, Mr. BEVILL, Mr. DON H. CLAUSEN, Mr. CRANE, Mr. EDWARDS of Oklahoma, Mr. GUDGER, Mr. HEFNER, Mr. HIGHTOWER, Mr. MARRIOTT, Mr. MOORE, Mr. MOORHEAD of California, Mr. RAHALL, Mr. RHODES, Mr. RISENHOOVER, Mr. RUNNELS, Mr. RUPPE, Mrs. SMITH of Nebraska, Mr. TEAGUE, Mr. TUCKER, Mr. WALKER, and Mr. CHARLES WILSON of Texas):

H. Con. Res. 574. Concurrent resolution disapproving proposed regulations of the Department of the Treasury requiring centralized registration of firearms and other matters; jointly, to the Committees on the Judiciary, and Ways and Means.

By Mr. BONKER (for himself, Mr. PEASE, Mr. JENRETTE, Mrs. FENWICK, Mr. LEHMAN, Mr. OTTINGER, Mr. D'AMOURS, Mr. CARTER, Mr. BEILENSON, Mr. BONIOR, Mr. CORCORAN of Illinois, Mr. MCHUGH, Mr. DOWNEY, Mr. LAFALCE, Mr. EILBERG, Mr. LUKEN, Mr. BRODHEAD, and Mr. VENTO):

H. Con. Res. 575. Concurrent resolution providing that the President should implement measures to discourage activities which benefit the Government of the Republic of Uganda; to the Committee on International Relations.

By Mr. FISH (for himself, Mr. TREEN, Mrs. HECKLER, Mr. BLANCHARD, Mr. LEHMAN, Mr. EDWARDS of California, Mr. DORNAN, Mr. AMBRO, Mr. GREEN, Mr. KEMP, Mr. BINGHAM, Ms. HOLTZMAN, Mr. SOLARZ, Mr. KILDEE, Mr. EDGAR, Mr. TUCKER, Mr. FRENZEL, and Mr. MURPHY of New York):

H. Con. Res. 576. Concurrent resolution expressing the sense of the Congress that the President should direct the U.S. Ambassador to the United Nations to offer a resolution in the General Assembly which would remove the observer status of the Palestine Liberation Organization; to the Committee on International Relations.

By Mr. GAYDOS:

H. Con. Res. 577. Concurrent resolution disapproving proposed regulations of the Department of the Treasury requiring centralized registration of firearms and other matters; jointly, to the Committees on the Judiciary, and Ways and Means.

By Mr. WEAVER (for himself, Mr. ASHBROOK, Mr. ANDREWS of North Dakota, Mr. ARCHER, Mr. BADHAM, Mr. BAUMAN, Mr. CARTER, Mr. COLLINS of Texas, Mr. CUNNINGHAM, Mr. DAVIS, Mr. DINGELL, Mr. DORNAN, Mr. ENGLISH, Mr. HANSEN, Mr. KASTEN, Mr. KELLY, Mr. LAGOMARSINO, Mr. LUJAN, Mr. MARLENEE, Mr. MURPHY of Pennsylvania, Mr. MURTHA, Mr. ROUSSELOT, Mr. RUDD, Mr. SIKES, Mr. TRAXLER, and Mr. BOB WILSON):

H. Con. Res. 578. Concurrent resolution disapproving proposed regulations of the Department of the Treasury requiring centralized registration of firearms and other matters; jointly, to the Committees on the Judiciary, and Ways and Means.

By Mr. FINDLEY (for himself, Mr. BEVILL, Mr. GLICKMAN, Mr. HARKIN, Mr. TUCKER, and Mr. WATKINS):

H. Res. 1151. Resolution to maximize local nighttime radio service; to the Committee on Interstate and Foreign Commerce.

By Mr. FINDLEY (for himself, Mr. ADDABBO, Mr. BEVILL, Mr. BOLAND, Mr. BUCHANAN, Mr. CEDERBERG, Mr. DON H. CLAUSEN, Mr. COLEMAN, Mr. CORCORAN of Illinois, Mr. DAN DANIEL, Mr. DEVINE, Mr. DUNCAN of Tennessee, Mr. FARY, Mr. GOLDWATER, Mr. GUYER, Mr. HIGHTOWER, Mr. HORTON, Mr. HYDE, Mr. JONES of North Carolina, Mr. KEMP, Mr. KETCHUM, Mr. KINDNESS, Mr. LAGOMARSINO, Mr. LATTA, and Mr. LEACH):

H. Res. 1152. Resolution to recognize Bob Hope on his 75th birthday; to the Committee on Post Office and Civil Service.

By Mr. FINDLEY (for himself, Mr. LOTT, Mr. MICHEL, Mr. MOAKLEY, Mr. MONTGOMERY, Mr. MOORE, Mr. MURPHY of Pennsylvania, Mr. MICHAEL O. MYERS, Mr. NICHOLS, Mr. O'BRIEN, Mr. PANETTA, Mr. RINALDO, Mr. SCHULZE, Mr. SIKES, Mr. SNYDER, Mr. SPENCE, Mr. STEIGER, Mr. STRATTON, Mr. WINN, and Mr. YOUNG of Alaska):

H. Res. 1153. Resolution to recognize Bob Hope on his 75th birthday; to the Committee on Post Office and Civil Service.

By Mr. PATTISON of New York (for himself, Mr. STUDDS, Mr. FAUNTROY, Mr. DIGGS, Mr. RANGEL, Mr. DELLUMS, Mr. BLANCHARD, Mr. MOAKLEY, Mr. SCHEUER, Mr. MARLENEE, Mr. PANETTA, Mr. MAZZOLI, Mr. MANN, Mr. CARR, Mr. PURSELL, Mr. WALGREN, Mr. EILBERG, and Mr. KREBS):

H. Res. 1154. Resolution to authorize each Member of the House of Representatives to hire two additional Lyndon Baines Johnson congressional interns and to authorize payment of additional compensation for such interns from the clerk hire allowance; to the Committee on House Administration.

By Mr. PRESSLER:

H. Res. 1155. Resolution to provide that individuals attending or teaching at vocational schools shall be eligible to serve as congressional interns in the House of Representatives; to the Committee on House Administration.

MEMORIALS

Under clause 4 of rule XXII, memorials were presented and referred as follows:

378. By the SPEAKER: Memorial of the Legislature of the State of California, relative to control of the Japanese beetle; to the Committee on Agriculture.

379. Also, memorial of the Legislature of the State of Hawaii, relative to the base flood standard under the National Flood Insurance Act; to the Committee on Banking, Finance and Urban Affairs.

380. Also, memorial of the Senate of the State of Hawaii, relative to Federal insurance of mortgages on leasehold property; to the Committee on Banking, Finance and Urban Affairs.

381. Also, memorial of the Legislature of the State of Hawaii, relative to no-fault automobile insurance; to the Committee on Interstate and Foreign Commerce.

382. Also, memorial of the Senate of the State of Hawaii, relative to no-fault automobile insurance; to the Committee on Interstate and Foreign Commerce.

383. Also, memorial of the Legislature of the State of California, relative to revitalization of California's aerospace industry; to the Committee on Science and Technology.

384. Also, memorial of the Legislature of the State of California, relative to State and local government pension and retirement plan reports; to the Committee on Ways and Means.

385. Also, memorial of the Legislature of the State of California, relative to supplying water from imported Antarctic icebergs; jointly, to the Committees on Merchant Marine and Fisheries, International Relations, Interior and Insular Affairs, Public Works and Transportation, and Science and Technology.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. KRUEGER:

H.R. 12374. A bill for the relief of Ty Leslie McLean; to the Committee on the Judiciary.

H.R. 12375. A bill for the relief of Jack Faircloth; to the Committee on the Judiciary.

H.R. 12376. A bill for the relief of Carla K. Finch; to the Committee on the Judiciary.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

449. By Mr. SYMMS: Petition of the St. Joe Valley Association, St. Maries, Idaho, relative to the proposed designation of a portion of the St. Joe River, Idaho, as a component of the Wild and Scenic Rivers System; to the Committee on Interior and Insular Affairs.

450. By the SPEAKER: Petition of the Louisiana District Attorneys Association, Baton Rouge, La., relative to opposing proposed legislation to make States and local governments liable for certain deprivation of civil rights; to the Committee on the Judiciary.

451. Also, petition of the town council, Indialantic, Fla., relative to medical services for veterans in the Brevard County, Fla., area; to the Committee on Veterans' Affairs.

452. Also, petition of the Massachusetts Association of Contributory Retirement Systems, Inc., Watertown, Mass., relative to voluntary coverage of public employees under social security; to the Committee on Ways and Means.

AMENDMENTS

Under clause 6 of rule XXIII, proposed amendments were submitted as follows:

H.R. 8494

By Mr. KINDNESS:

On page 28, line 3, strike the comma after the word "value" and insert a semicolon.

On page 28, strike the language beginning with the word "but" on line 3 through to "teer" on line 5.

On page 28, line 3, strike the comma after the word "value" and insert a semicolon.

On page 28, strike the language beginning with the word "but" on line 3 through to the semicolon on line 5.

Page 29, insert after line 14 the following new paragraph (7) and redesignate the following new paragraphs accordingly:

(7) The term "franchisee" means a person who, pursuant to an agreement with one or more parties, has the right to distribute, sell, or provide goods, services, or facilities, within a specified area.

Page 33, insert after line 9 the following new paragraph (11) and redesignate the following paragraphs accordingly:

(11) The term "principal place of business" means—

(A) an office, production facility, or other establishment, in which an organization conducts its business or activities and which is located in a State in which such organization is incorporated, or

(B) any office, production facility, or other etabilshment, in which an organization conducts a substantial portion of its business or activities, but such term does not include an establishment of a franchisee.

On page 30, line 22, strike "or written".

On page 32, strike lines 6–17, and insert the following new subsection in lieu thereof:

(D) a communication on any subject directly affecting any organization to a Member of the Senate or of the House of Representatives, or to an individual on the personal staff of such Member, if such organization's principal place of business is located in the State represented by such Member.

On page 32, line 5, strike "or".

On page 32, line 16, insert "or" after the semicolon.

On page 32, after line 16, insert the following additional language:

"(E) a communication which deals only with the existence or status of any issue, or which seeks only to determine the subject matter of an issue."

On page 32, following line 16, insert the following new paragraph:

"(F) a communication by, or on behalf of, a candidate, as defined in section 301(b) of the Federal Election Campaign Act of 1971 (2 U.S.C. 431(b)) or by, or on behalf of, a candidate for a State or local office, made in his capacity as a candidate for Federal, State, or local office, including a communication or solicitation by, or on behalf of, an organization in its capacity as a political committee, as defined in section 301(d) of such Act (2 U.S.C. 431(d));".

On page 32, line 21, insert the following before the word "organization": "any Indian tribe,".

On page 33, line 1, strike "any Indian tribe,".

On page 39, strike lines 11–22, and insert the following new subsection in lieu thereof:

"(1) to develop a filing system to carry out the purposes of this Act;".

On page 40, strike the language beginning on line 16 through line 4 on page 41.

On page 40, line 15, strike the semicolon, insert a comma, and add the following language: "and to permit copying of such information by hand or by copying machine or, at the request of any individual or organization, to furnish a copy of such information upon payment of the cost of making and furnishing such copy; and".

On page 41, line 6, strike "(6)" and insert "(4)".

On page 46, strike lines 4–10, and insert the following new section:

"SEC. 15. This Act shall take effect on October 1, 1979."

Add the following new section at the end of the bill:

TERMINATION

SEC. 16. (a) This Act shall terminate at the end of the 5-year period beginning on the date of the enactment of this Act.

(b) The termination date specified in subsection (a) shall not affect any civil or criminal action commenced under section 8 of this Act before the termination date of this Act. In all such actions, proceedings shall be had, appeals taken, and judgments rendered in the same manner and effect as if this Act did not terminate.

(c) The termination date specified in subsection (a) shall not affect the requirements set forth in sections 5(c) and 7(a)(3) this Act.

By Mr. SANTINI:

Page 45, insert the following new section after line 10 and redesignate succeeding sections accordingly:

STUDY OF CERTAIN LOBBYING COMMUNICATIONS

SEC. 12. The Advisory Commission on Intergovernmental Relations shall conduct a study of lobbying communications made by Federal, State, and local elected officials, in order to determine whether the provisions of this Act should apply equally to all such entities. The Commission shall, not later than January 1, 1979, submit a report to the Congress containing the findings of such study and containing legislative recommendations in accordance with such findings.

Page 46, line 4, strike out "subsection (b)," and insert in lieu thereof "subsection (b) and (c),".

Page 46, insert the following new subsection after line 10:

(c) Associations of State and local elected officials shall be subject to the provisions of this Act on January 1, 1980.

SENATE—*Tuesday, April 25, 1978*

(Legislative day of Monday, April 24, 1978)

The Senate met at 10 a.m., on the expiration of the recess and was called to order by the President pro tempore (Mr. EASTLAND).

PRAYER

The Chaplain, the Reverend Edward L. R. Elson, D.D., offered the following prayer:

Draw nigh unto God, and He will draw nigh unto thee.—James 4: 8.

Let us pray:

"Spirit of God, descend upon our hearts,
Wean them from earth; through all their pulses move;
Stoop to our weakness, mighty as Thou art,
And make us love Thee as we ought to love."

GEORGE GROLY—Adapted.

O God, ever near and dear to us, we thank Thee for this hallowed moment and for prayers heard or read unspoken which lift our horizon, clarify our vision, and send us to our task renewed and strengthened.

We join our hearts in prayer for the President, so harried and harassed by unrelieved burdens. Lift him up and give him courage and wisdom.

Help us to grasp the lessons of history. Help us to read and understand what the past has to say to the present. Then help us to act with wisdom in our day and to be unafraid of the future. Give us a part in moving forward the kingdom of justice and truth, over which Thou dost rule eternally.

We pray in the Great Redeemer's name. Amen.

ALASKA'S D–2 LANDS

Mr. STEVENS. Mr. President, on April 19, I presented a brief summary of each of the d–2 proposals before Congress. It is my belief that all Americans should be aware of the various pieces of legislation concerning this issue. Since the insertion of those summaries another bill has been introduced concerning the final disposition of Alaska's d–2 lands. This bill was introduced by my colleague, Senator MIKE GRAVEL. At this time I ask unanimous consent to have printed in the RECORD a brief summary of this new legislation.

There being no objection, the summary was ordered to be printed in the RECORD, as follows:

S. 2944: Introduced by Senator Gravel provides for the establishment of approximately 50 million acres of national parks, refuges, forests and wild rivers. Federal lands not reserved for a specific purpose by legislation and state lands would be classified by a land classification commission.

NATURAL GAS COMPROMISE

Mr. STEVENS. Mr. President, I want to take a few minutes of my time this morning to talk about the natural gas compromise which I hope will be worked out very soon. I welcomed the news last Friday that a tentative agreement has been reached, as I know my colleagues have welcomed any indication we have received over the past 5 months that progress is being made toward a compromise.

But there are a few very important issues which have not been resolved. One of these is the pricing policy applicable to gas from the North Slope of Alaska.

Last fall, the Congress approved the President's selection of the Alaska highway pipeline route for bringing natural gas from the North Slope of Alaska to energy markets in the South 48 States. But the selection and approval did not guarantee that the project will be completed, or even started, on schedule.

The major hurdle facing the project at this time is financing. This pipeline will be the largest single project undertaken by private capital. Putting this much money together would be difficult under any circumstances. But the task is made more complicated by the fact that the market for the product—natural gas—is not assured. This is because of the uncertainties surrounding the Federal pricing policy which will be applied to this gas.

Unless these uncertainties are cleared up, gas sales contracts cannot be negotiated, the necessary financing cannot be obtained, and construction of the pipeline cannot begin on time to meet the January 1, 1983, startup target.

The legislation which is now before the conference committee must provide the appropriate pricing policy for this gas. Otherwise, it will be up to the Federal Energy Regulatory Commission to determine that policy under the Natural Gas Act, a process which could delay the project a year or two, or even longer.

The conferees have agreed on one part of that pricing policy—a wellhead price ceiling.

But another, and perhaps more important, element is still missing: rolled-in pricing. Rolled-in pricing is needed to assure that the gas shipped through the line can be sold. Although the gas would probably be marketable even if it were incrementally priced, rolled-in pricing—the method by which the costs of new sources of gas have traditionally been allocated to users—is needed to remove the last bit of uncertainty which prevents investors from getting involved in the project. This point cannot be overstated. Incremental pricing magnifies the uncertainty in future energy markets to the scale that investors would be driven away from a project of the magnitude of the Alaskan gas pipeline.

Incremental pricing would most likely postpone, and may even prevent, financing and construction of the gasline. This would be ironic, in light of the fact that the whole purpose of the natural gas legislation which Congress has been working on for more than a year is to establish a pricing policy to increase future gas supplies.

I have communicated my concerns to

the Senate conferees and to their chairman, Senator JACKSON, on several occasions. I appreciate their recognition of the importance of rolled-in pricing to the Alaska Highway pipeline and their unfailing support for this provision in negotiations with the House conferees. By my remarks this morning I mean to encourage them to stand firm until this issue is resolved.

I yield back the reminder of my time.

ORDER OF BUSINESS

Mr. STEVENS. Mr. President, I had assumed there was time available under the recognition of the leadership. I do have a special order for 15 minutes this morning. I ask unanimous consent that the time I have just taken not be deducted from that, and that that time be yielded to the Senator from Oregon (Mr. MARK O. HATFIELD).

The PRESIDENT pro tempore. Without objection, it is so ordered.

SPECIAL ORDER

The PRESIDENT pro tempore. Under the previous order, the Senator from Oregon (Mr. MARK O. HATFIELD) is recognized for not to exceed 15 minutes, plus the time yielded by the Senator from Alaska.

Mr. MARK O. HATFIELD. I thank the Senator from Alaska for yielding me his time.

Mr. President, I yield 2 minutes of my time to the Senator from Idaho (Mr. MCCLURE).

Mr. McCLURE. Mr. President, I thank the Senator from Oregon for yielding this time, and I appreciate particularly his allowing me to take this time ahead of his presentation.

CENSORSHIP AT NBC

Mr. McCLURE. Mr. President, the National Broadcasting Corp. has recently won well-deserved accolades for its presentation of "Holocaust," a gripping portrayal, in the lives of individual men and women, of the unspeakable tragedy unleashed upon Europe's Jews by Hitlerian madness. Many viewers found the program too terrible to watch, but most found it too compelling to ignore. The NBC Television Network can take pride in its courageous decision to bring to the American people four evenings of unforgettable drama that will have an impact upon our thoughts and actions for many years to come.

The National Broadcasting Corp.'s Radio Network, however, seems not to have the same taste for facing unpleasant realities. It recently banned from the airwaves a sermon by the Reverend Dr. Oswald Hoffmann. The sermon was scheduled for broadcast over "The Lutheran Hour," a distinguished religious program which, for more than 20 years, has brought thoughtful and inspiring entertainment to its listeners.

Dr. Hoffmann's sermon was not political. It was not offensive. It did not attack or demean anyone. It surely could not be faulted for improper language. Why, then, was it censored by NBC? Why did the network, which takes some $75,000 from the Lutheran Layman's League, sponsor of "The Lutheran Hour," refuse to air this one program?

Dr. Hoffmann, you see, was discussing abortion. And that, in the view of NBC, is not acceptable. The network complained that the sermon presented "one side of a controversial issue."

Will NBC executives now insist that every religious program present both sides of every issue: for and against racial discrimination, for instance, and the pros and cons of drunkenness?

Abortion is controversial. And I hope our country never sees the day when the taking of human life is not controversial. The way a democracy deals with controversial issues is to discuss them openly, to expose the facts of the situation, and to utilize instruments of public communication to allow the people to judge for themselves the proper course of public policy.

It is a pity that those who control the NBC Radio Network did not understand that when they kept Dr. Hoffmann's sermon off the air. And it is a special irony that they took their high-handed action only a few weeks before the NBC Television Networks "Holocaust" portrayed the awful consequences of the same kind of censorship and insensitivity in Germany some 40 years ago. If Dr. Hoffmann had been preaching in Berlin in 1938, would he have been required to present both sides of controversial issues: whether Jews have human rights, whether the authority of the State is supreme over individual liberties, whether life is sacred? Would his sermon have been banned unless it gave equal time to nazism?

While the NBC Network is congratulating itself for the success of "Holocaust," I hope its personnel will think on these things. And in order that we all may have a better understanding of the issues we face—not only abortion but freedom of speech—I ask unanimous consent that Dr. Hoffmann's censored sermon be printed in the RECORD, together with two press stories concerning it.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

THE SANCTITY OF LIFE

(By Dr. Oswald Hoffmann)

(Then God said, "Let us make man in Our image, after Our likeness; and let them have dominion over the fish of the sea, and over the birds of the air, and over the cattle, and over all the earth, and over every creeping thing that creeps upon the earth." (Genesis 1:26 RSV))

Today let me talk to you about a subject that troubles people all over the world: legalized abortion. And if I can, to bring you some help from the Word of God. There is a great, surprising and astonishing piece of news about God in the first chapter of the first book of the Bible. It tells us, "Then God said, 'Let us make man in Our image, after Our likeness; and let them have dominion over the fish of the sea, and over the birds of the air, and over the cattle, and over all the earth, and over every creeping thing that creeps upon the earth.' "

What is surprising about that? For one thing, it is a lot more surprising than many of the discoveries that have been made about humanity by any of the sciences. It tells us something about ourselves that can be discovered nowhere else in exactly the same way. It also tells us something about human life, that it is not only human but is especially important to God because it is human. The sanctity of human life comes directly from creation by God, and the sanctity of human life is of continuing concern to God. He did His part in the creation of human life. He did His thing in the redemption of human life through His Son, Jesus Christ, and He pursues His plan in the constant sanctification of human life by the power of His Holy Spirit.

There are plenty of people today, millions of them, who don't believe a word of this, of course. They have been terribly impressed with the "information," if that is what it can be called, developed by anthropologists, psychologists and other practitioners of the art of philosophy, which sometimes comes to be labeled science just because the philosopher happens to be a scientist. In the same way, the philosophy of a man comes to be thought of as having special significance just because that man happens to be a world renowned violinist.

I am talking today about a philisophy of life which regards human life as no different from animal life. All of us know, of course, that biologically human beings are very much like animals. There are many obvious and significant similarities. We have the same bodily structures many animals do. Both animals and humans have legs and lungs, flesh and blood, eyes, ears, nose and mouth. Many minerals and chemical reactions are common to both human beings and animals. When we die, this body of ours, like that of the beast of the field, returns to dust and dirt from which it sprang. That's a fact.

It is not a fact that human life is the same as animal life. That's fiction. At best it is philosophy, and at its worst it is fiction. The Bible discloses information about human life that has to be taken into account by any thinking person. Human beings and animals do have a single Creator. He did follow a plan of His own in creation. When God created other forms of life, the Bible tells us, He "let the waters and the earth bring forth living creatures—fish, birds, cattle, beasts and creeping things." When the Almighty was about to create man, He made it clear that He was going to do something special. God paused. He held a consultation with Himself, you might say, and said, "Let us make man in Our image, after Our likeness."

God did not say, "Let us make man in the image of the animals, after their likeness." Instead, He declared, "I shall make man to be someone like Myself."

If you keep telling people, "You are animals. You are nothing but animals. You are nothing but highly developed animals," there can be only one result. Believing they are animals, they will act like animals. Maybe that is why there is so much animal-like even sub-animal-like behavior in our time. People act out the philosophy they have been fed.

The Bible tells every human being, "You were created by Him, in His image." This stupendous disclosure is not calculated to make human beings conceited or to give them the big head. It is a necessary piece of information we must have if we are to be truly human. It is the basis for all self-respect and also for genuine modesty which keeps us from thinking that we have all the answers. This is not a discovery, it is a disclosure.

It can be a discovery for people who see themselves as something a good deal less than the image of God. Many younger and older people today, some of whom I have

known from personal experience, have a very poor self-image. Note that word "image." They tell themselves, "I am no good. Others are better than I am." There are people who do their level best to contribute to this low self-esteem which others have developed. They keep putting them down. They laugh at them. They ridicule them. They criticize them repeatedly. "You can't do anything right," they say, "that's what is wrong about you. You are no good. You are a dummy. You are nothing but a dunce." In time you begin to believe what others tell you: "If they say so, it must be true. I really am dumb. I am a good-for-nothing nobody."

Disclosure of the truth about humanity in the Bible is quite opposite. We are meant for better things, all of us. We are not to write ourselves off as of no account. We may be going the wrong way and even sliding down hill, but that is not God's plan for any one of us. In His sight, from the day of creation to this day, that is not God's plan for you. It is not God's plan for anyone.

God breathed, as the Bible puts it, into the nostrils of man the breath of life. He did not do this for the animals. There is something special about humanity. There is a spirit there which is not characteristic of animal life. There is an ability to communicate which goes far beyond any communication which any animals have ever possessed. The fact of the matter is humanity was created with the ability to communicate with God, to understand God and to speak to God.

I don't have to tell you that the likeness with God which enabled human beings at creation to understand Him and to speak to Him has been covered up by what the Bible calls sin. You don't understand God when you refuse to listen to Him, and you can't talk to God when you don't talk His language. People resent this fact. They will object to my even mentioning it. The Bible calls that attitude "enmity with God." The natural mind of humanity has a blanket of sin over it and just does not understand the things of the Spirit of God. When disaster comes, people shake their fists at God. When somebody points out the problems of humanity, people blame God for their troubles. They even demand of Him that He forget His justice and recognize their justice. For pride, you can't beat that. Essentially, human sin is human pride at work.

God Himself broke through all that pride with His own act of redemption. He did what only He could do: He sent His own eternal and unique Son, Jesus Christ, as a human being. As a human being, Jesus was born and lived and died. He walked through life and met death as a human being must. He did it all for us human beings, that we might be brought back again by His forgiveness and the gift of His Holy Spirit to understand Him again, to be able to speak to Him again. That's God, the Creator and Redeemer. Redemption is His act of re-creation through the good offices of His Son, Jesus Christ.

Let no one say that this disclosure of God and His action toward humanity, the humanity He created and redeemed, is only of academic interest today. It is the most practical thing in the world and has to do with the basic and deepest issues of life. It is the only thing that can save our world from its own inhumanity.

One of the basic issues of life now before people all over the world is legalized abortion. This is a real issue, like the scourge of world hunger and overpopulation, like the plight of the unwanted child and the unwanted senior citizen, along with the ethics of terminating or sustaining life in a hospital.

The sanctity of life has to do not only with abortion, but with every issue of human life. All too often anti-abortionists have identified themselves as sensitive only to the issue of abortion and have shown themselves to be very insensitive to other issues of human life. The sanctity of human life has to do with all the issues of human life.

In the area of abortion, we are dealing not only with a legal matter but with a moral and spiritual question. When people make a decision regarding abortion, regardless of what the law permits, they are making a moral and spiritual decision. The courts cannot help anyone of us on that score. That's where God comes in, and the Word of God speaks to us about that.

There is no reference to abortion as such in the Scriptures, although there are a number of references to life in the womb. It is quite clear that the Bible is on the side of life. Speaking to Jeremiah, God said, "Before I formed you in the womb I knew you, and before you were born I consecrated you; I appointed you a prophet to the nations." (Jeremiah 1:5) And the psalmist said, "Thou didst form my inward parts, and Thou didst knit me together in my mother's womb. I praise Thee for Thou art fearful and wonderful. Wonderful are Thy works. Thou knowest me right well; my frame was not hidden from Thee, when I was being made in secret, intricately wrought in the depths of the earth." (Psalm 139:13-14)

The pronouns used of the fetus in the womb are human, as they are in Psalm 51:5: "Behold I was brought forth in iniquity, and in sin did my mother conceive me." There is no question about the fact that the Supreme Court of the United States could not have told Elizabeth that her six month old fetus was anything but human when the baby jumped in her womb at the time that Elizabeth met Mary, who was to be the mother of Jesus. The classic statement about human life is still that casual remark in the book of Genesis: "The Lord God formed man of dust from the ground, and breathed into his nostrils the breath of life; and man became a living being."

There is no doubt that God is the source of our being through the entire process by which we become alive. Theologians have argued for centuries about the point when the soul is given to man, but that is philosophical and academic. The fact remains that we become what we are from the moment of conception. His inception is our conception. You may distinguish between a fetus and a grown adult, but in any case we are dealing with human life. It is life created by God and cared for by God and man, and to be fulfilled again one day by God.

Abortion seems to be well on the way to becoming an accepted part of modern life. The opposition is understandable. The Roman Catholic declaration on procured abortion of 1974 stated, for example: "Never, under any pretext, may abortion be resorted to, either by a family or by a political authority, as a legitimate means of regulating births." That statement has been echoed by many church bodies who are sincerely concerned about the abortion mentality developing in modern society which can only lead to a cheapening of human life.

These days, even secularists are coming to the same conclusion. Going on the basis of their own observation, secular thinkers are pointing out that abortion is not, as one of them says, a "practical solution to the blight of poverty or an answer to the burdens of a wasteful welfare program." Others have suggested that abortion is an attempt to commit genocide by reducing certain types of population in the world. Clearly, the issue of abortion is more than a problem a woman might have in deciding if a life is to be saved or whether embarrassment and inconvenience justify terminating a human life. A little human being who has committed no crime does not deserve that kind of treatment. If the world proceeds with such solutions to human problems, even in the enactment of law and the establishment of medical procedures, a life style and a social mentality will be established which in the long run will decrease rather than enhance the quality of life we all seek. Sanctity will become sordid, and meanness become the measure of our humanity.

The Bible comes out on the side of reverence for life. It extols humanity, even though it tells us we are not what we ought to be and we have not done what we ought to have done. The Bible keeps telling us who we are and who God is. He is the Creator of human life, which is special to Him as it must be to us. We human beings are the custodians of His grace and favor, from which we can turn away as we often do, or to which we can turn in repentance toward God and in faith toward the Lord Jesus Christ, whom God sent for our salvation.

It is the glory of God and He resists the proud and gives grace to the humble. There is probably no quality of life so characteristic of a child of God as humility. All the true saints have always been humble people. They always recognize themselves as sinners under the judgment of God but saints forgiven by the grace of God. No one can go that route without genuine humility, which is not the put on variety but the genuine article.

There are always agonizing decisions that have to be made in life in the spirit of humility. I feel with doctors who have to decide what to do when one of their patients, sometimes a personal friend of long standing, has a terminal illness. I feel with soldiers in wartime who have to kill when they have been taught the divine command, "Thou shalt not kill." I feel with people who have an insoluble family problem, when both of them know that all divorce is wrong. I feel with parents who have an unwed daughter about to have a child, and I feel with that girl in the agonizing problems she faces. The problems are not exactly exceptional, but they are real.

All of us have to wrestle with the issues of life all the time. All human people have agonizing decisions to make. As long as they are capable of making wrong decisions, the Gospel of God will be necessary to bring forgiveness and healing where life is impossible without that forgiveness and healing which comes from God Himself. It probably means suffering with people through their terrifying decisions both during and after, under the grace of God by faith in Jesus Christ through whom alone God forgives and sets consciences free.

It also means taking God's plan and His law seriously. Otherwise we only destroy ourselves. It means living as people freed by the grace of God are expected to live. It is living as St. Peter saw it: "Live as free men, yet without using your freedom as a pretext for evil; but live as servants of God."

The worth of a child, in the final analysis, is not determined by the emotional acceptance with which his parents may look upon his coming. That child, even under the most adverse circumstances, is the gift of God our Father, loving and caring, as someone has said, "infinitely concerned about the well-being of all His children, born and unborn."

It will take more than new laws to deal with the problems of mankind. There is no substitute for commitment to God and for living and keeping His commandments out of love for God who first loved us and gave, simply gave, His Son as a sacrifice in our place for our sins. There is a necessity for respecting the sanctity of life with which we have been endowed by God Himself. By the grace of God in Jesus Christ all of us are offered a golden and gracious opportunity to enjoy the sanctity of life with His blessing, with His forgiveness and also with the promise of His glory. Amen.

[From the Chicago Tribune, Mar. 15, 1978]

NBC Bars Sermon on Abortion

St. Louis.—A segment of the religious program, "The Lutheran Hour," that presents

an antiabortion view has been rejected by the NBC Radio Network, officials said Tuesday.

The program, produced in St. Louis for broadcast April 9, includes an antiabortion sermon by the Rev. Dr. Oswald Hoffmann. Lutheran officials said the network's refusal to carry the program is a violation of their constitutional rights.

A spokeswoman for the network, Helen Manasian, confirmed in New York that the script will not be aired because it deals with only one side of the issue.

"The Lutheran Hour" is sponsored by the Lutheran Laymen's League of the Lutheran Church-Missouri Synod.

A spokesman for "The Lutheran Hour," Tommy Thompson, confirmed that the sermon is pro-life but noted also that the Laymen's League pays $75,000 annually to air its weekly program to 32 stations on the NBC network.

"In the more than 20 years that "The Lutheran Hour" has been on NBC, we've never experienced this problem," said Thompson, who is manager of domestic radio for the league. "In our opinion, NBC's refusal to air the program is a clear violation of our right under the 1st Amendment to the U.S. Constitution."

"They're saying, in effect, that it is fine to have religion on the air as long as it doesn't say anything controversial," Thompson said.

In New York, spokeswoman Manasian explained NBC's position by noting that the network "does not sell time for the presentation of views on controversial public issues" but instead covers them in news discussion and interview programs.

The broadcasts began in 1930 and have been aired by NBC since 1956. In addition, about 950 other stations in the United States air the program free, a spokesman said. The Laymen's League is an auxiliary to the 2.7 million-member Missouri Synod.

Burt Sherwood, vice president and general manager of WMAQ, the radio network's local outlet, said he hadn't yet been notified of the network's decision, but since the program is fed to WMAQ from New York, he said, the April 9 program might never get to the local outlet.

Perry Straw, a program administrator at WMBI and WMBI-FM, stations owned by Moody Bible Institute which also air "The Lutheran Hour," said no decision has been made on whether to air the program because the stations have not yet received their copies of the taped broadcast.

[From the Washington Post, Mar. 24, 1978]

CENSORSHIP IS LAID TO NBC OVER SERMON ON ABORTION

NEW YORK.—The sponsor of the NBC network radio's "Lutheran Hour" and the Roman Catholic Archdiocese of St. Louis are attacking the network for censorship because it refused to carry an antiabortion sermon.

NBC says it rejected the sermon because it presents "one side of a controversial issue."

The 50-year-old program, on which the Rev. Dr. Oswald Hoffmann of St. Louis now is the speaker, is broadcast by about 1,000 stations in the United States, including about 50 NBC outlets for which time is paid.

The sermon was recorded for use April 9 and was entitled "The Sanctity of Life."

"I've never seen anything quite as heavy-handed as this," said Tom Thompson, manager of domestic radio for the International Lutheran Laymen's League, which sponsors the show.

Thompson said a network "does not have a right to censor the church . . . They're saying in effect that it's fine to have religion on the air so long as it doesn't say anything controversial. But the Christian gospel itself is controversial."

In the sermon, Hoffmann said legalized abortion is one of the "basic issues of life now before people all over the world."

Citing scripture, he said: "We become what we are from the moment of conception . . . You may distinguish between a fetus and a grown adult, but in any case we are dealing with human life."

In a letter of protest, John Cardinal Carberry of St. Louis said Lutheran teaching "proclaims numerous controversial positions, such as declaring that Jesus Christ is Messiah and Lord, a controversial position to many Americans.

The archdiocesan weekly, the St. Louis Review, called the NBC decision "shocking effrontery" that "violates freedom of speech."

"Lutheran Hour" officials said WBAL radio in Baltimore plans to broadcast the program. An NBC radio spokesman in Washington said that the program was offered to WKYS, a Washington FM station affiliated with NBC but that the station turned down the program because "the subject is inappropriate."

Mr. MARK O. HATFIELD. Mr. President, as a long-time friend of Dr. Oswald Hoffmann. I am glad to hear our colleague from Idaho make this presentation, and to associate myself with his remarks.

AMERICAN POLICY TOWARD UGANDA

Mr. MARK O. HATFIELD. Mr. President, this is the third time that I have taken the floor of the Senate to call attention to what I consider to be one of the great travesties and injustices of our times: The almost calmly accepted procedures and practices happening today in the country of Uganda.

No less an authority on terror than Joseph Stalin once said that "while one death may be a tragedy, a succession of them is only a statistic."[1] Each year the world's greatest proponent of human rights continues to import Ugandan coffee in increasing quantities. In so doing, the United States knowingly supplies Idi Amin with hundreds of millions of dollars to pay his Sudanese mercenaries. Hundreds of thousands of Ugandan citizens have been murdered in circumstances of wanton bloodlust under the direct orders of this madman, or at the hands of his monstrous henchmen.

It has been said that Uganda is an African problem, to be dealt with by Africans. But the reality is that Africa has chosen to ignore and even to praise Idi Amin. Last summer, he received a standing ovation at a meeting of the Organization of African Unity. Silence might be expected from nations who also abuse their citizens. Though they recognize that Uganda's genocidal policies are a case apart, they choose to ignore it out of fear that their own policies may also fall under scrutiny. Africans, however, are not the optimum instrument to use in order to bring pressure to bear on Idi Amin. Because, unlike the United States and the developed Western world, Africa has relatively little economic leverage to use against Uganda. They could only present a serious threat to Amin by armed attack, and that would result in further suffering for innocent Ugandans. It is the West, and the United States in particular that can alter the political situation in Uganda. Though our policy makers would like to separate the economic realm from the political, the truth is that they are inseparable. Unfair as it may be, while the world grows increasingly interdependent in many ways, economically the dominant trend is toward increasing dependence on the part of the smaller, less developed nations while simultaneously the largest powers grow more independent. The cost of disentanglement is the principal measure of dependence. The larger a country's trade is, the less severe the impact of individual economic occurrances will be. Relations between Uganda and the United States illustrate this point clearly. While U.S. purchases of coffee amount to over a third of Uganda's export earnings, they amount to less than 5 percent of our coffee imports. We are often criticized for this economic independence. But it is a political reality and I say it is time that we utilize our great economic power to alter what we can no longer deny is a country that rules by institutionalized genocide.

It has been said that the Soviet Union will come to Amin's rescue if the United States cuts off its supply of hard currency. To this I would say, first, that if they want to take on the label of Amin's savior, so be it. But this is unlikely for a number of reasons. The Soviets are sensitive to world opinion. They prefer reliable loyalists who will adhere to their ideology. Amin is an irrational madman who cannot be depended upon. Most importantly, due to Amin's mismanagement of this once prosperous economy, Uganda's currency is practically worthless. The Soviet Union demonstrates great benevolence in supplying nations with outmoded military equipment, but when it comes to delivering the hard currency that Amin needs to meet his mercenary payroll, the history of Soviet aid does not support such an argument. Any other regime anxious to rescue Amin would lack the resources necessary to cushion the impact of an American boycott. While the Soviets continue to become increasingly entangled in Africa with populations who do not welcome their presence, the United States could add to its list of allies a nation forever indebted for our efforts in removing a murderous tyrant from their lives.

While I have been greatly encouraged by enthusiastic support from the public, I have been disturbed at the attitude of firms engaged in trade with Uganda. Their arguments are reminiscent of the "when in Rome do as the Romans do" attitude that was frequently expressed by corporations under investigation for illegal payments to foreign governments. At least one corporation, the Lockheed Aircraft Co., has acted in a forthright and responsible manner by refusing to do business with Amin, and I commend them. But many others justify their behavior on the grounds that if they discontinue business relations with Uganda, a firm from Germany or Japan will simply fill the vacuum. Also, they argue that it is the U.S. Government's responsibility to determine where companies can do business and where they cannot. The

[1] Dr. Jeffrey L. Lant, professor, Boston College.

U.S. Government is not the sole depository of moral judgment. It rests with each and every one of us. These are the same companies who come eagerly knocking on Government doors when an issue provides them with an opportunity to promote their own interests. But when it comes to voluntarily terminating relations with a government which rules by genocide, they are silent. I pray that the judgment of history will not show that America was unable to learn from our mistakes of the late 1930's when we refused to listen to the Jewish community and continued to trade with Hitler's Nazi Germany.

Two weeks ago (on April 6, 1978), I testified before the Committee on International Relations to share my views on relations between the United States and Uganda. I was joined by representatives of several U.S. firms engaged in various kinds of trade with Uganda. Each firm had been asked to prepare a response to four questions submitted by the committee. Most of these companies expressed a willingness to obey the law if the U.S. Government adopts a new trade policy toward Uganda. However, statements made by some of these companies demonstrated a total disregard for the moral implications at stake in this matter. Of particular interest was the continuity of the positions these companies set forth in response to a request for their assessment of the political and social situation in Uganda and any particular responsibilities that may have with respect to the situation. Over and over again their responses read "we have no firsthand information of the political or social situation in Uganda." Folger Coffee Co. (John Lankaster, manager of coffee purchases) stressed that private firms simply do not have sufficient access to the necessary information nor the ability to make such decisions. They then went into a detailed assessment of the economic implications of a boycott on Uganda.

Folger also stated that—

> We do not have employees located in Uganda. As a result, we have no firsthand knowledge of the political situation in Uganda, or the actions of the Ugandan leadership.

The Harris Corp. (represented by former Congressman James Stanton), a company which operates an Earth satellite station in Uganda, and has also trained members of Idi Amin's central mercenary organization, the State Research Bureau, in communications technology, quoted an eloquent statement made by former President Kennedy on the benefits of a greater exchange of ideas between the many countries of the world, and concluded that their firm "believes that the impact of their program upon the general population of Uganda and the government is favorable."

Continuing, they stated that—

> Our people who work in Uganda are primarily technicians . . . the nature of their work does not give them any special opportunity to be involved in political or social situations by which they could reasonably make such assessments.

One of Page Gulfstream's vice presidents was appointed by Amin to be his personal representative in the United States with the rank of honorary consul at large and was also made an honorary citizen of Uganda.

Page Gulfstream, subsidiary of Page Airways:

> We sincerely feel poorly equipped to participate in any meaningful discussion of these pieces of legislation.

General Foods Corp. (Andrew S. Shroder, vice president, public affairs):

> Actions and decisions governing our country's relations with foreign countries must be the province of the U.S. government.

Grumman American Aviation Corp. (Corwin H. Meyer, president) blankly stated that it does not, "feel that it, through its trade, sales and subsequent support of the aircraft it sold, have particular responsibilities with regard to the political and social situation in Uganda."

The International Technical and Industrial Trade Co., (Robert Danning, president) took the most extreme view of conditions in Uganda, offering the rationale that when human rights are violated the proper response is not to reduce trade with the guilty country—but to increase it.

They stated that—

> Uganda is not really all that separate in context with many other countries of similar situations.
>
> . . . it behooves us to try to open doors rather than to close them if we are to affect the type of policy changes in countries such as Uganda that we wish to see.

I continue to believe that there is a moral base to American free enterprise, and that it is not within the boundaries of this moral base to acquiesce in the dark fear and bloodletting that pervades this small nation.

Mr. President, my office has been overwhelmed with requests from people all over the country to know the brand names of American companies which have bought or are buying Ugandan coffee and which have not yet implemented policies to insure that their products do not contain it. I would like to submit this list in the hope that it will accelerate the process of ridding the Ugandan people of Idi Amin. It is admittedly incomplete and so I would like to point out that the only way consumers can insure that they are not purchasing Ugandan coffee would be to seek out brands that are specifically labeled to indicate that their contents are 100 percent from a country other than Uganda. The following list, however, constitutes products which are manufactured by firms who buy the largest amounts of Ugandan coffee:

General Foods—Brim, Maxim, Max Pax, Maxwell House, Mellow Roast, and Sanka.
Folgers—Folgers Instant.
Nestles—Nescafe, Tasters Choice.

No one can say for sure that if a boycott is successful in removing Amin that it will insure a better future for the Ugandan people. But whoever Amin's successors may be, the chances are overwhelming that they will not be afflicted with the demented and vicious behavior that he has demonstrated. They have no way to go but up.

It is generally argued, and I am usually in agreement, that politics and economics belong on separate tracks. But, Mr. President, there are cases where the two are inseparable, and Uganda is such a case. Resolutions have been passed, aid has been cut off and embassies have been closed; but the slaughter continues. The truth is that our economic action has profound political consequences. "Amin is no more an internal matter for Uganda than was Hitler an internal matter for Germany."[2] The tacit decision to allow market forces to govern the amount of Ugandan coffee American firms purchase is also a tacit decision to wield our economic leverage in support of Amin. Clinging to this convenient argument makes a mockery of our human rights policy.

Recently, Congressman DONALD PEASE aptly defined the issue which faces us today when he drew fror the wisdom of one of the greatest men of our time:

> I am reminded that Albert Einstein once observed that it is a very dangerous world we live in. Not so much because of those who would do evil, but because of those who would do nothing about them.[3]

The telecast of the "Holocaust" series should remind us of the spiritual nature of this Hitleresque issue. How often does a clear demonic expression arise in the history of man's struggle toward God's Kingdom? Once or twice in a generation it would seem there are leaders of such diabolical proportions that all mankind should turn its prayer and efforts toward their defeat. The collective guilt we bear for our early support of Adolph Hitler will ever be upon our conscience as a nation. We again have before us a clear moral choice. Will we be inadequate for the demands of moral distinction once more? I trust that we will give evidence as a Congress, and as a Nation, that we still do have the "soul of a church" as deTocqueville stated.

I call for the support of my Senate colleagues to cosponsor the legislation that Senator WEICKER introduced on January 23:

> S. 2412, a bill to prohibit the importing of Ugandan articles into the United States;
>
> S. 2413, a bill to amend the Export Administration Act of 1969 to prohibit the exporting of goods to Uganda; and
>
> S. 2414, a bill to amend the Tariff schedules of the United States in order to prohibit the importation of coffee which is the product of Uganda.

I also, today, call upon the American people to buy no more Ugandan coffee. The list of corporate supporters of the Amin regime is now available so that choices can be made. We can no longer beg ignorance.

Further, I have requested that Mr. Treadwell, the Food Service Director for the Congress, cease purchasing products with Ugandan coffee. I also will be asking that all departments and agencies of the Federal Government do likewise.

In consultation with others of my colleagues will be deciding on further legis-

[3] *Ibid.*, February 21, 1978.

lation, hearings and initiatives to press this course.

A compelling statement attributed to German Pastor Martin Niemoller instructs us today as we face the Ugandan neo-Nazism:

First the Nazis came for the communists and I didn't speak up because I wasn't a communist. Then they came for the Jews and I didn't speak up because I wasn't a Jew. Then they came for the trade unionists. I didn't speak up because I wasn't a trade unionist. And when they came for the Catholics I didn't speak up because I was a Protestant. Then they came for me. And by that time there was no one left to speak up for anyone.

Mr. President, I ask unanimous consent that articles entitled "Pour One Down the Drain for Idi Amin," by William F. Willoughby of the Washington Star and "Uganda Tragedy of Today," by Tom Braden of the Washington Post be printed in full in the RECORD.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

[From the Washington Star, Apr. 8, 1978]

POUR ONE DOWN THE DRAIN FOR IDI AMIN

(By William F. Willoughby)

When big Daddy Idi Amin made the boast before the Organization of African Unity last year, "I have eaten my enemies before they could eat me," that was not merely a mouthful of rhetoric. It was a mouthful of substance. Substance with flesh and blood.

If you're reading this over a cup of coffee, I wish you'd pour the cup of coffee down the drain and then read it. I'll explain why later.

Amin's words before the conclave were the big bad man's religion being expressed. Not the Moslem faith which he professes. That is but a veneer. The truth of the matter is that Amin never has been fully converted to the tenets of the Moslem faith, but is motivated by tribal animistic religion. That is what makes him the incorrigible brute that he is.

Don't ask diplomats to tell you that what I have just said is so. They don't generally use that kind of language, the language of religion, to explain things. Too simplistic. Not sophisticated enough. Maybe so, but it's right on the money.

Diplomats are more content to use terms like left-wing or right-wing in an attempt to tell you what is going on in Uganda. Such language fits in well when talking about Portugal or Brazil or Chile. But you've got to look to religious motivations to understand the big man in Africa and once one understands those motivations, other things fall into place.

Amin is a member of the primitive Kakwa tribe, who, while professing to be Moslem, carry out animistic beliefs that run completely contrary to Islam, a most noble faith in its purer forms. The animistic eat the vital organs or flesh of their victims simply on the belief that in doing so they acquire the power of those whom they've killed. That's the essential religious philosophy behind cannibalism.

When Dr. John Kibukamusoke, who once was Amin's personal physician, related that an autopsy on murdered Foreign Minister Michael Ondoga showed there was an incision into the body and the liver was removed, there was no doubt in any Ugandan's mind who ordered the murder and what was done with the liver.

Amin makes no bones about the fact that he is a cannibal. Kefa Sempangi, a pastor in the Redeemed Church of Uganda, who miraculously escaped assassination, says Amin professes to be a Moslem because he needs the support of the country's 750,000 Moslems, but he practices witchcraft. In the meantime, he gives the Moslem faith an undeserved black mark.

The ritual murders that take place in Amin's prisons also are attributed partially to tribal religious customs. Kibukamusoke said that prisoners are lined up, "face to face, and the captives are forced to batter one another's head with sledgehammers . . . down the line, leaving only the last survivor to be shot."

Although in many areas Moslems and Christians attend the same meetings, with many Moslems interested in the open-air evangelistic services of the Christians, Amin personally is carrying out a *jihad*, or holy war, against Christians (and, until they left, Jews). Nearly 300,000 Ugandans have been murdered since Amin took over. That's a city the size of Richmond or Norfolk completely obliterated.

"The only being I fear is God," Amin said after shooting Anglican Bishop Janani Luwum in the mouth as he prayed. And better he had be fearful of God! The Day of Reckoning won't have enough hours in it to deal with that man.

Last year Amin ordered the murder of all Ugandans who wear glasses or who live in houses with tin roofs. The answer to that bit of capriciousness is that he reasoned such individuals had learned to read from Christian missionaries or, because they had tin roofs, were capitalists or agents of Western imperialism.

Chalk up the sweet nothings of the Communists in his ears for that carnage. The Day of Reckoning surely will have to be held over for those ideological darlings of this world's empty-headed, never-learn pseudointellectuals. Hitler, Amin's hero, will be let off easier than they in that Day of Judgment. Either that or justice doesn't originate with God.

We've got hope, though, that some time before that Judgment Day Amin will be purged from the earth. A dozen assassination attempts have failed, and he's really not too concerned, in a sense, how many more attempts are made. He'll live, he says, until he sires 200 children.

The magic number now is 34 or 35 that anyone knows about. That, too, is a result of his religious beliefs—visions and voices which come to him.

But Amin, according to Kibukamusoke, suffers from advanced stages of syphilis. The hypomanic paranoia which stems from that explains, in part, why he is suspicious of so many people and has outbursts of anger that result in the murder of tens of thousands of a particular type. As his brain deteriorates, worse things are to come.

He also suffers from insomnia, and refugees from government posts tell of him waking at night, entering coolers where he keeps the heads of murdered enemies, and lecturing the heads about their former owners' sins. This, the most popular man in Africa! Even the Devil is embarrassed over this man.

But all is not dark. It's quite bright despite Amin. The story of Kefa Sempangi, that pastor from the Redeemed Church of Uganda I mentioned earlier, is heartening, symptomatic of something wonderful that is going on in much of Africa. Despite the murder of tens and even hundreds of thousands of Christians in Uganda, God is moving in revival dimensions there.

Before the persecution began, 52 percent of the Ugandans professed faith in Christ—most of them a real fervid evangelical type of witness. That is an incredible number for a country that received its first Christian missionaries—notably the famous Henry M. Stanley—only 103 years ago.

Now the ratio has jumped to an astounding 65 percent, Sempangi said. The increase is within the span of six years.

The first effort to kill Sempangi came as he prepared to preach to thousands of people gathered for an Easter service in 1972. Five assassins surrounded him with guns and told him they had come to kill him. "What are your last words?" they asked him.

"I'm already dead—dead and buried in Jesus. But I would like to pray for you. Bow your heads."

Unlikely as it sounds, they lowered their guns and he prayed for their salvation. And what a prayer that humble man of God must have prayed!

God intervened, Sempangi said, and the would-be quintet of assassins surrendered their lives to Christ. As proof of their conversion, they became counter agents and helped save more than 1,000 marked people, including Sempangi and his family, from annihilation.

"There's something about persecution that's essential to the Christian life," the preacher said. "People flocked to the church, though they knew the price of commitment was death."

I never thought of it before, but as much as I drink coffee, I've probably been helping support Amin unwittingly. I think the least we could do as Christians and as people of good will is to back the measures in Congress calling for a boycott of Ugandan coffee. They say 32 American companies use it in their blends.

The likes of Idi Amin is too much to enjoy over a cup of coffee. I'm glad you poured yours down the drain.

[From the Washington Post, Apr. 22, 1978]

UGANDA: TRAGEDY OF TODAY

(By Tom Braden)

Is there a modern parallel to "Holocaust?" I asked myself that question the other night as I watched the first episode in the series and remembered that, during the days it pictured, we Americans could have rescued the people portrayed in the film and did not do so.

Not that it was a conscious decision on all of our individual parts. As a people, we didn't know how Jews were being treated in Germany. But our State Department knew at least to some extent and decided not to recommend action. We were at the time isolationist-minded. We were also going through a major depression. Was our government afraid to suggest that we take in large numbers of jobless immigrants?

In any event, as the story on the screen revealed, we did nothing. And it seems to me that there is a modern parallel. Something a little like what happened in Germany is taking place today in Uganda and, although we are more conscious of it, we are again doing nothing.

The parallel is not exact. Hitler set out to exterminate Jews. Idi Amin seems to have a preference for exterminating Christians, but he is by no means systematic—anybody will do. Recently a young man named Remigius Kintu, an escapee from Uganda, told me how it was done.

I don't suppose it matters how people are exterminated. But somehow the details make the reality as the word "exterminate" does not.

Kintu explained: Idi Amin's guards like to castrate prisoners; they like to force people to kill each other by hitting each other with hammers; they like to cut a small hole in a prisoner's intestines and then, while he is still conscious, insert fire crackers connected to a fuse, then stand back and watch what happens.

Kintu said Amin rewards his army for this sort of ingenuity. His chief of training in the army, for example, achieved rapid pro-

motion after publicly dismembering the body of a local mayor and then licking the sword.

I mention all this in connection with "Holocaust" because it seems to me that it's wrong for the children and young adults of America today to say to themselves, "Well, that happened before I was born, and people don't behave that way any more."

The fact is that people do behave that way, and are now behaving that way, and what people should be saying to themselves instead is, "What can I do about it?"

Kintu, who has formed a Committee on Uganda, to try to interest us in what is going on in his country, asks us to do a very simple thing. He asks us to stop buying Ugandan coffee, the revenue from which is the means by which Amin raises the hard cash to keep himself in power.

Amin confiscates the coffee from the farmers and sells it himself, retaining all profits. He sells it chiefly to U.S. companies. The brand names of the coffee you buy, part of which comes from Uganda—according to Kintu and confirmed by a congressional source—include Maxwell House, Sanka, Nescafé, Folger's and Mellow Roast.

These companies could go elsewhere for the Ugandan green coffee which they add to their mixture. But it would be troublesome for them to break off old and established trade relations, and they will certainly not take the trouble unless you and I complain.

I did not complain at the time of the Holocause because I was in junior high school.

But as the Bible says, "When I was a child, I understood as a child." We are old enough now to put away childish things.

(Mr. HARRY F. BYRD, JR., assumed the chair.)

Mr. MARK O. HATFIELD. A survivor of Auschwitz helps to put Uganda in perspective when he writes:

Perhaps it is the instinct of self-preservation that brings the Holocaust back to our attention. Yesterday the Jews were the victims, tomorrow perhaps another group. It may be that because this instinct for spotting danger failed, we still feel it in our bones.

The Holocaust, after 33 years, is emerging into the daylight like an iceberg, which has been floating until now, in the dark night sea of our lives. And our sense of life would be weaker without a knowledge of it.

It is in the range of the power of man, only of man, to change past errors into future achievements, a lost past into a future gained, past tragedies, into future life.[4]

Human rights are violated at every corner of the globe—fortunately genocide is not so commonplace. Fitting the world's tyrants and butchers into a neat package only serves to blur the essential differences between them. This is precisely why we cannot fail to act against Amin on the grounds that we have not moved against other human rights violators. Each must be condemned in a manner consistent with the level of its abuse, and according to the degree of involvement we share in their ability to implement such policies.

Knowing this, God forbid that we close our eyes and fail to speak out about and act upon the suffering of our African brothers who share our most unifying characteristic—the common spiritual heritage as children of the Creator.

[4] Arnost Lustig, "Solidarity to Warm the Sorrow," *Washington Post*, April 19, 1978.

Mr. McGOVERN. Mr. President, will the Senator yield to me just briefly?

Mr. MARK O. HATFIELD. I am happy to yield.

Mr. McGOVERN. Will the Senator include me as a cosponsor to the piece of legislation he mentioned, the boycott legislation involving Uganda?

Mr. MARK O. HATFIELD. I shall be very happy to include the distinguished Senator from South Dakota.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. McGOVERN. Mr. President, I commend the Senator from Oregon for the leadership he has taken in this field. I do think Uganda is a special case in point. With the possible exception of Cambodia, there is nowhere else in the world where such indiscriminate slaughter is taking place at the hands of the government as in Uganda. I had the same reaction the Senator from Oregon did in watching the recent "Holocaust" series on television. It brings back all of the raw memories of some 40 years ago, when the world stood by while 6 million of our fellow human beings were systematically exterminated. From all reports, something of the same kind of thing is now going on in Uganda.

We have read about special killing rooms that are set aside for the systematic slaughter of critics of the Uganda Government, or even those who, for reasons that are quite clear, have earned the disfavor of that government. I regard Idi Amin as a barbarian, as a man without conscience, without judgment, who is killing thousands of his fellow citizens, and I do not think this country or any other moral society can stand by and permit that to take place without action.

One of the things that kept going through my mind in watching this recent television series is a question why it was that the outside world stood by for so long and permitted this horrible slaughter and torturing to go on. The question is, are we going to do it again with reference to Uganda? Will, once again, a government in power be permitted, without serious action from the outside world, to kill its own citizens in what amounts to a form of genocide?

I commend the Senator from Oregon for the effort he has taken. Ordinarily, I do not like the idea of economic boycotts and economic sanctions, but when a government loses all sense of restraint, we have no recourse except to take measures of that kind. If that does not work, I think we shall have to consider seriously even stronger measures.

I do commend the Senator for his leadership in this field and I hope he will add me as a cosponsor to his legislation.

Mr. MARK O. HATFIELD. As always, I am grateful to the Senator from South Dakota for his comments. I appreciate the fact that the Senator did point up the common view that he and I hold about boycotts generally. So frequently, we have seen boycotts in the past really impact primarily upon the poor of the country rather than upon the powerful and those who are promulgating policies that we are hoping to change through the boycott. In this particular case, there is another distinction, which is that most of the people are involved in subsistence agriculture and, therefore, when you look at the economic base of the country, they have primarily one cash crop, that being coffee.

When you look at the political power base as it merges with the economic factor and reality of Ugandan life, that political power base is not Ugandan people, but imported mercenary Sudanese soldiers. They have to be paid off in cash in order to maintain the power base for Amin.

I thank the Senator, and I wish to be associated with him, as I expect to be later on today in another important issue.

COMMITTEE MEETING

Mr. MUSKIE. Mr. President, I ask unanimous consent that the Public Assistance Subcommittee of the Finance Committee be authorized to meet during the session of the Senate today to hold hearings on President Carter's welfare reform bill and other related legislation.

The PRESIDING OFFICER. Without objection, it is so ordered.

CONGRESSIONAL BUDGET, 1979

The PRESIDING OFFICER. Under the previous order, the Senate will now resume consideration of Senate Concurrent Resolution 80, which the clerk will state.

The legislative clerk read as follows:

A concurrent resolution (S. Con. Res. 80) setting for the Congressional budget for the United States Government for the fiscal year 1979.

The Senate resumed the consideration of the Senate concurrent resolution.

The PRESIDING OFFICER. The pending question is on the amendment by the Senator from South Dakota (Mr. McGOVERN). If the Senator will send his amendment to the desk, the clerk will state it.

Mr. McGOVERN. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. McGOVERN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

UP AMENDMENT NO. 1244

(Purpose: To decrease new budget authority and outlays for national defense and increase new budget authority and outlays for energy, transportation, community and regional development, and education, training, employment, and social services)

Mr. McGOVERN. Mr. President, I ask unanimous consent that Mr. John Holum and Mr. Alan Stone of my staff be granted privilege of the floor during consideration of this amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. McGOVERN. Mr. President, I now send my amendment to the desk and ask that it be stated.

The PRESIDING OFFICER. The clerk will state the amendment of the Senator from South Dakota.

The legislative clerk read as follows:

The Senator from South Dakota (Mr. McGOVERN) proposes an unprinted amendment numbered 1244.

Mr. McGOVERN. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 2, line 20, strike out "$129,800,000,000" and insert "$125,185,000,000".

On page 2, line 21, strike out "$116,600,000,000" and insert "$115,074,000,000".

On page 3, line 5, strike out "$10,200,000,000" and insert "$12,150,000,000".

On page 3, line 6, strike out "$10,100,000,000" and insert "$11,240,000,000".

On page 3, line 17, strike out "$19,500,000,000" and insert "$19,831,000,000".

On page 3, line 20, strike out "$10,400,000,000" and insert "$10,673,000,000".

On page 3, line 21, strike out "$9,000,000,000" and insert "$9,068,000,000".

On page 3, line, line 24, strike out "$31,600,000,000" and insert "$33,661,000,000".

On page 3, line 25, strike out "$31,200,000,000" and insert "$31,692,000,000".

Mr. McGOVERN. Mr. President, the reductions I would suggest in the 050 national defense function are a combination of modest foreign policy adjustments, realinements in the force structure, efficiency measures, and arms control initiatives.

In short, what I am proposing today is a reduction of some $4.6 billion in the military spending level suggested by the Budget Committee and the transfer of those funds to other functions in the budget, including the development of alternative sources of energy, the improvement of our transportation system, an attack on the problems of structural unemployment and support for students' families pursuing a higher education.

The military savings that I am suggesting in this amendment can be made without the slightest jeopardy to our national defense. I do not think there is any debate here in the Senate about the need to maintain a fully adequate national defense, and nothing involved in the modest transfer proposal that I am suggesting here today in any way jeopardizes the fundamental defense posture of this country.

But I also offer this suggestion for a broader reason. I think we need to renew in the Congress a serious debate on national defense and national security issues, and we need to be very mindful at all times of what those factors are that contribute to the overall strength and security of the United States and not measure it in terms that are too much restricted to military outlays alone.

I fear we are in the grip of a new orthodoxy on military spending—an approach in which the only debatable issue is which piece of hardware we should buy.

We rarely ask the more fundamental questions, whether our defense truly requires real growth in overall expansion of the budget, whether there are less costly alternatives that would buy us just as much in the way of national security, or whether substantial reductions in arms spending can, in fact, enhance our national safety, which I happen to believe.

I am concerned that this new orthodoxy will ultimately weaken the country. It may compel us to build new weaponry which can destabilize the nuclear balance and actually heighten the risk of war.

At the same time the burgeoning cost of the arms establishment can only undermine our economic vitality and rob our standard of living at home.

Let us be clear on one fundamental point. What we have before us in the recommendations of the budget committee is a mammoth increase in military spending.

I do not mean to imply that the Budget Committee is responsible for all of that, but the bill, as it emerges from the Budget Committee with the recommended increases that the administration has called for, plus add-ons in the committee itself, does represent a very substantial increase in military outlays if we approve it for the coming fiscal year.

The increases suggested by the Carter administration, and then expanded by the Budget Committee, may appear to be relatively modest at first glance—at least in this realm where anything less than a billion dollars seems hardly worth mentioning. But those increases are only the first installments on dramatically higher arms appropriations a few years hence.

To fund existing defense policy, without any new initiatives, would cost $126.6 billion in fiscal 1979 if we approved of no increases. The Budget Committee recommends $129.8 billion, an add-on of $3.2 billion more.

But by fiscal year 1983, that $3.2 billion that the committee proposes to add on for fiscal 1979 would have grown to a total budget of $167.4 billion to fund current policy and $183.8 billion, or $16.4 billion more, to pay for present policy plus the add-ons the committee proposes.

In other words, once we approve the beginning of a new expansion of a particular part of the military budget, we have to count the continuing cost that that add-on means in terms of the weapons systems envisioned by it.

There is a steadily widening difference between existing policy and the Budget Committee program. It is $3.2 billion now, it will be $7.3 billion next year, and then $9.9 billion, and then $13 billion, and finally $16.4 billion in the fifth year of the program.

So it is not a simple $3.2 billion addition we are called upon to support; it is a 5-year program that will cumulatively total nearly $50 billion more than our present, extremely formidable military establishment.

Further, our current declared defense policy is substantially more ambitious than existing law. If we simply funded existing law in this field it would cost $8 billion less than the committee recommends in fiscal 1979, expanding up to a $43 billion difference in 1983. Over 5 years the Budget Committee recommendation would cost $127.9 billion more than the current program.

This is what we are being drawn into if we approve the figure that is before us. Instead of dealing with a routine arms program, we are asked by the Carter administration and then by the Budget Committee to accept a huge leap upward for the military. And while we may have had a sharp escalation in the propaganda about dangers to the United States, I submit that there simply has been no escalation in the threat which would warrant these towering new figures.

On the contrary, I think these new arms spending figures grow primarily not out of a fear that the security risk has grown, but out of a concern over our international image.

While we go through the motions of considering individual programs, the underlying premise seems to be that we need to show real growth in arms spending as a demonstration that Vietnam notwithstanding, our power and our will remain undiminished. Regardless of where the money goes, there is this connection between total military spending and, say, Soviet activities in Africa, or between a 3 percent increase and the fear that Eurocommunists will come to power in France, Italy, or Spain. It has occurred to me that the proposed increase in the arms budget might, in fact, be the first year's political cost of the Panama Canal treaties—money spent to convince ourselves or others abroad that we are still tough even though we are "giving away" the canal.

If that is the case, then it is a sad way indeed to set national priorities or to provide for our national safety. It just will not work. There is no credible evidence that either the Soviet Union or third countries make decisions about their foreign policy in the short term based on decimal point calculations of the American military budget. Even if we were to double our arms spending this year, I would be willing to bet it would not produce the slightest change in Soviet policy in Africa. Indeed, in the long term I think it would add to the comparative strength of the Soviets—if they could muster the good sense not to copy us—by further weakening our economy and by depleting still further our limited resources for addressing such real threats as unemployment, inflation, and dwindling energy supplies.

That, in the end, is what is really wrong with spending these billions on our image. As we strive to impress the Russians and others around the world, all we accomplish is to punish the American people.

In contrast to the committee figure, I am proposing new budget authority of $125.18 billion. Now, I know this will be called a "slash" or a "meat ax" approach to our national security. It will likely be claimed that this amendment would, in a single act, strip us of our defenses and leave us standing helpless in a hostile world.

But to put it in perspective, what I am proposing is a $7 billion increase over spending in the same category in fiscal 1978. In constant dollars it is within about $100 million of last year's figure. And that comparison compensates the Pentagon fully for all the inflation since last year, a privilege most Americans and most other programs are, needless to say, denied.

The budget process deals in functions rather than specifics; therefore, my amendment does not specify the programs which would be reduced. The main question here today is one of priorities. If we decide to limit the national defense function, number 050, to $125.18 billion, then it would be the job of other standing committees—Armed Services and Appropriations to design the various specific elements of the Pentagon budget within that total.

Alternatively they could, of course, conclude it was impossible, and report totals in excess of the budget resolution. In that case, if the full Congress agreed, the second budget resolution would have to be adjusted accordingly.

I am confident, however, that those committees would not have any particular difficulty in fashioning a scale of defense priorities that would stay within this rather generous ceiling. Indeed, I note that two members of the Appropriations Committee—Senators EAGLETON and PROXMIRE—have already done substantial work along that line. In a separate statement submitted with the Appropriations Committee's views on the first budget resolution on March 15, Senators EAGLETON and PROXMIRE took note of the contrast between candidate Carter's plans for a $5 to $7 billion cut in defense spending and President Carter's recommendation for a $9.1 billion increase. They then recalled that they had—

> . . . discussed with the defense subcommittee a list of illustrative items where we believe it would be possible to make prudent reductions in the defense budget. As we stated, these items, which totaled to reductions of about $2.7 billion in budget authority and $2.1 billion in outlays, were meant to be only illustrative and not definitive.
>
> We do believe that some of the items on it were good candidates for reduction, if only because eight out of the twenty items on the list were virtually identical to cuts recommended by this committee and the Senate last year, and involved items that have reappeared in the 1979 budget.

Though I will, of course, let the authors of that statement speak for themselves, I understand that their studies have since been revised and that they have now isolated illustrative cuts of $3.376 billion in budget authority and $2.382 billion in outlays. In the first year, at least, those figures are larger than the cuts I have proposed in the transfer amendment.

It is also worthwhile to underscore in the statement by Senators PROXMIRE and EAGLETON that a number of the candidate items they propose for reduction or elimination are items that the Senate has eliminated in prior years but that have nonetheless been resubmitted by the administration. I cannot imagine better evidence that the Budget Committee recommendation is heavily laced with the problem I raised a few minutes ago of measuring our international worth by the total of our arms budget, instead of budgeting for legitimate security needs.

Last year, for example, the Appropriations Committee deleted a requested allowance for anticipated inflation in routine operations and maintenance purchases. This year the same request was back in the budget, now for $611 million in new budget authority. The Budget Committee made no downward adjustment for that figure, even though the Senate is virtually certain to do so. No other Federal agency is allowed to budget for inflation on routine operating supplies, and I cannot fathom how it will help our military readiness to allow the Pentagon to do so. Yet, it is allowed for in this resolution. Presumably, it will help show that we are not getting soft.

Indeed, the record on past appropriations for the military is most pertinent in the context of my amendment. Over the past 7 years, Congress has reduced Pentagon appropriations by an average of almost $4.4 billion each year below what the executive branch originally requested. The biggest cut, of $7.4 billion, was in 1976; the smallest, of $2.8 billion, was made last year. Yet, in the face of that record, the Budget Committee has now added $1.4 billion for fiscal 1979. It is a measure of how moderate my amendment is that it proposes a reduction that is less than the average that Congress has been taking out of this part of the budget ever since 1972.

I hope we can anticipate that the Congress will be equally skeptical in considering the current request. In either case, we will have an opportunity to consider specific reductions during the authorization and appropriations process.

In connection with my amendment I have, however, suggested one set of areas in which I believe these reductions might prudently be made. In my view they illustrate quite clearly that it is possible to reduce Pentagon spending on the order of magnitude I have recommended without jeopardizing our legitimate defenses in the slightest.

First, I believe it would be prudent to delete some $2.3 billion added by the Budget Committee mainly for an accelerated shipbuilding program. I agree with the committee's decision to defer the planned 1979 appropriation for the Trident submarine program. That offset some $900 million of the add-on, leaving a net of $1.4 billion. But I do not agree that any of the $2.3 billion additional funding is warranted, or, particularly, that we can justify new commitments for, in the words of the committee report:

> . . . enhancement of U.S. sea warfare forces, including potential actions associated with A.E.G.I.S. ships and mid-sized carriers.

In my view this addition amounts to pouring good money after bad, without accounting for either the dismal performance of the shipbuilding industry or for the urgent need for a serious look at the Navy's future.

The Carter administration has reacted understandably to the billions in cost growth, the delays of as long as 2 years in delivery dates, and other problems which continue to plague this industry. The President has proposed an interim 5-year program to build 70 new ships. In the meantime there is an expectation that some progress will be made on shipbuilding overruns and delays, and we will also have some time to study the Navy's C-Plan 2000 dealing with the longer term future of this branch of our Armed Forces. With those demands pending, it makes no sense at all to simply dump more money into this part of this budget.

The greatest problem for the Navy today is not to build more ships but to define its mission. In terms of foreign policy, the aircraft carrier has served historically as a platform for Vietnam-style interventions against Third World countries. I trust we have learned the lesson of the folly and self-defeating nature of such interventions. Nor does new carrier procurement make sense in terms of projecting military power against the Soviet Union.

It is generally recognized that the carrier in this mission would come under such intense threat that it would have to expend most of its resources simply to defend itself. The Carter administration is wisely moving away from this power projection mission. Since the AEGIS defensive system was designed primarily to protect the carrier in this high-threat environment, changing the carrier mission also means changing escort requirements. Therefore, it would not be wise to rush ahead with the AEGIS strike cruiser.

It should also be noted that this is not one of those areas in which we are under an intense and immediate challenge from the Soviet Union. At the end of fiscal 1978, the United States will have 510 active and reserve ships in the inventory, with an average age of 15.5 years. Beyond that, an additional 93 ships have been authorized but not yet delivered, and the administration program called for initiation of 15 more ships next year. Meanwhile the Soviet force of about 233 principal surface combatants, instead of growing, is actually expected to shrink over the next 10 years. We have come through the period of "block obsolescence," when many World War II vintage ships were retired within a short period of time. The Soviets, however, did not build any sizable Navy until after the war; for them, block obsolescence is just about to begin.

So we can well afford a more deliberate shipbuilding pace while we examine the performance of the major shipbuilders and debate appropriate roles and missions for the longer term.

Second, I have suggested that we delete $532 million from the budget for the SSN–688 *Los Angeles*-class nuclear attack submarine. The budget committee has already deleted the Trident money simply because the funds cannot be spent within the fiscal year. The same consideration prevails with respect to the attack submarine, except that it is worse. Our contractual relations with the submarine's manufacturer, Electric Boat, could not be worse. By way of illustration, the SSN–701 was originally contracted for delivery in February of this year. Electric Boat now estimates

that it will be delivered in October of 1980. SSN–702 was supposed to be delivered in July of this year, but it will not be completed until February of 1981. The entire SSN–688-class program is, in fact, running an average of 2 to 3 years delay per boat. If we add funds for an additional submarine this year we will simply be adding to the already unmanageable backlog of ships. The possibility of costly new delays will increase, and the producer will gain more leverage over the Government to reassess its claims for cost overruns.

It may not be commonly known that I have always supported the nuclear attack submarine program. In 1972, in an alternative to the Nixon administration's defense posture statement, this was one area in which I recommended an increase in the total program. Nevertheless, I cannot see any merit in rushing to reward an unsatisfactory performance by the builder. I would think all Senators could agree that it would be bad management to authorize contracting for another SSN–688 when construction could not possibly begin during the fiscal year.

Third, although the first year's savings would be relatively small—only $532 million—I have suggested reductions related to a cancellation of the three new NATO-dedicated divisions which were added in 1974.

This year's budget is widely called a "NATO budget" and the President has promised a 3-percent real growth increase in NATO accounts. The transfer amendment offers a more cautionary approach. Naturally, we should take into account the President's pledge of 3-percent real growth. But we should certainly not consider ourselves bound by it. The ERA of unilateral Presidential commitments is over. The Congress has a constitutional responsibility to determine budgetary levels and we should not repeat past errors of letting this authority disappear whenever national security is invoked.

The goal of my proposal is to end unilateral American initiatives to strengthen NATO, while at the same time allowing for the modernization of our basic NATO forces.

The major change from current policy would be deletion of the three divisions which were unwisely added to the force structure in 1974, and a corresponding reduction in procurement, strategic mobility, and logistics forces. This return to a more limited American role within NATO would affect such programs as the advanced tanker cargo aircraft, the utility tactical transport aircraft system, and the prepositioning of equipment (POMCUS) in Europe. Over the next 5 years, but not reflected in the fiscal 1979 reductions, would be a reduction in procurement of one F–15 wing and one F–16 wing.

We should not rush in to enlarge American forces in NATO at this time.

Only a few years ago, the distinguished majority leader at that time, Senator Mansfield, proposed an amendment to reduce U.S. forces in Europe, and it had, as I recall, something like 39 or 40 Senators cosponsoring that proposal. The Mansfield amendment to reduce U.S. forces in Europe was given a serious chance of success. Frankly, I simply do not see how overall political conditions in Europe or in the international environment in general have worsened to the extent that we should now be adding more soldiers to our Army in Europe. We need a more balanced assessment of security needs for Europe which takes into account not only how many tanks or aircraft each side possesses, but the political, economic, and historical factors as well.

After spending some time in Eastern Europe and the Soviet Union last summer, I am thoroughly convinced that the existing NATO force structure, including tactical nuclear weapons, and with a modest modernization program, is more than adequate to deter a conventional Warsaw Pact attack in Europe.

What is always left out of the equation in Europe is the fact that those countries have suffered far more from modern war on their territories than we have. I find it impossible to imagine goals for which the Soviet Union or any of its Eastern block allies would launch an aggressive war against the West, knowing that they would inevitably suffer far more destruction than that which crippled them so badly in World War II and World War I.

There are military reasons for a more cautious approach as well. Most experts agree that NATO's most serious military weaknesses are found not in the U.S.-defended sectors but in sectors defended by our European allies. Many of the administration's programs are designed to acquire the forces enabling the United States to reinforce and defend these other sectors.

Since we are not insisting upon full partnership—on the allies bearing their fair share of their defense requirements—I believe this policy represents an unwise expansion of our political role in NATO. Modest U.S. improvements for our own sectors coupled with greater pressure for a larger allied share makes military as well as economic sense.

I do not dispute the premise that the alliance has weaknesses. But it is absurd to contend that they exist because the United States has been deficient in supplying military manpower.

Beyond a contingent sufficient to guarantee our involvement should aggression occur, I continue to believe that the logical distribution of effort between us and our European allies is that they should provide the bulk of the manpower that is permanently stationed on European soil, that we should concentrate our support in the less manpower-intensive areas such as tactical air support and naval forces, and that we should stand ready to redeploy ground forces to Europe when and if an emergency does arise.

Fourth, I have proposed that we remove funds for a series of counterforce options—weapons with sufficience force and accuracy to pose a significant threat to the adversary's nuclear deterrent. They are the M–X ICBM, Minuteman III improvements including the MK–12A warhead and the NS–20 guidance system, advanced ballistic reentry systems (ABRES), and the Trident II missile. Savings would total another $396 million.

The Budget Committee indicates that its target for strategic forces will permit,

> Increased R&D activity on alternative ICBM technology associated with a hard target kill capability.

I firmly oppose both any increased commitment to this area made by the committee and the program recommended in the first place by the Carter administration.

The rationale for these counterforce programs is that several years down the road—unless we can prevent it in SALT—the Soviets may catch up with us in the accuracy needed to destroy hardened missiles in their silos. Then their ICBM's, with larger throwweights, will pose a serious threat to the survivability of our Minuteman ICBM's. So what we are doing is anticipating the Soviet counterforce capability by developing one of our own.

It is, in my view, a mistaken and dangerous strategy. For example, it is not often noted that aside from one feature of the M–X—mobility—none of these systems is designed to maintain what a Soviet counterforce capability would undermine, that is, the prelaunch survivability of our land-based deterrent. So it is a misnomer to argue that we are responding to a Soviet counterforce threat. Rather, we are simply taking the lead in another new wrinkle in the arms race.

Further, regardless of what the Soviets do, an American counterforce program is likely to increase the likelihood of the very nuclear war it is supposed to defend against. In testimony before the Budget Committee on March 1, Dr. Herbert Scoville, a former official of the Arms Control and Disarmament Agency, the Central Intelligence Agency, and the Department of Defense, offered some extremely sound advice on this score:

> Despite recent statements to the contrary, the acquisition of a U.S. counterforce capability is an irrational—not a security—response to a possible Soviet counterforce capability; it does not provide a deterrent against a Soviet attack and could provoke none.

Despite quantitative limits on nuclear weapons, counterforce capabilities and doctrines could well succeed both in putting a hair trigger on nuclear war and in extracting billions of dollars in arms spending from both sides without enhancing their security at all. Certainly we ought to contemplate this whole problem in more depth before we move into it more deeply. Otherwise I think we will be a party to another fateful decision similar to the 1969 decision to deploy multiple independently targetable reentry vehicles, or MIRV's, instead of seriously seeking to control them. That decision laid the foundation for much of what we fear the most now—including the potential for a Soviet counterforce program. This time we should exhibit more sense.

Fifth, I think we ought to delete the $105 million in additional funding for research and development on the B–1 bomber. I think everyone must have come to terms by now with the decision that the B–1 is not going to be built. That being the case, it does not seem to

me that we can justify spending more money on a dead program.

There is $10 million in the budget for investigating alternative manned strategic aircraft concepts. Therefore, this money for B–1 research and development seems similar to the money we spent to build and operate the ABM site in North Dakota after we had already agreed in SALT, that a nationwide program would not be built. It is superfluous spending.

Sixth, I propose that we cut out the sea-launched cruise missile, for a savings of $152 million. This is, in part, an arms control initiative. Since it could arguably transform every naval vessel into a potential strategic launch vehicle, the SLCM would render verification of an arms control agreement virtually impossible. Further, as many of our military experts have recognized, opening up a competition in this area would be of greater advantage to the Soviet Union because our coastal cities are more vulnerable than theirs to attack from the sea. Beyond that, I have yet to encounter anyone who can come up with an intelligent use for these missiles—one that would not detract fatally from the primary missions of our nonstrategic naval forces.

Finally, I have proposed several efficiency reductions. The Budget Committee suggests that the Department of Defense be required to absorb 20 percent of the cost of next year's pay increase; I would increase that slightly to 25 percent, for a cut of $112 million.

In addition, for reasons outlined earlier, I suggest that the operations and maintenance account absorb at least a portion of nonpay inflation. Forty percent absorption would save $232 million. Another $256 million would be saved if we required the research and development account to absorb the same proportion of its nonpay inflation, an approach which is not at all unreasonable considering that this is essentially a "level of effort" program.

Together, the adjustments I have outlined would total $4,615 billion in budget authority, which is the amount that I recommend be transferred to functions in the civilian sector. Aside from illustrating that these cuts can be accomplished, they can serve as one good standard for measuring priorities. I hope every Senator will weigh carefully whether the programs I have described are more urgent for the country than the domestic functions to which I would transfer these funds.

Let me repeat that the total of these proposed military outlays is some $4.6 billion. The budget process does not earmark them specifically as to where these funds should be spent but for illustrative purposes I have suggested ways in which the money could be more wisely invested in other sectors of the budget.

I proposed a $1.9 billion transfer to the energy functions of our budget including alternative energy research and development.

I propose some $331 million for railroad and railbed rehabilitation in the transportation sector of the budget; a $273 million transfer for economic conversion assistance to communities that may be losing defense contracts or military installations to help them convert to other job-creating enterprises and to tide them over during this conversion period; and, finally, some $2 billion for training employment and higher education money that is earmarked for dealing with the problem of structural unemployment and to deal with the necessity of assisting families who have children involved in higher education.

In any event Mr. President, I believe this range of alternatives will contribute more to the defense and security of the country and that, as a matter of fact, the $4.6 billion that I suggested in military reductions in no way jeopardizes the security of this country and does, in fact, open up the way for constructive expenditures that would add not only to our security but to the quality of life in our country.

So, Mr. President, I am very hopeful that, operating within the budget authority this modest transfer can be seriously considered and hopefully approved by the Senate.

A similar effort is being made in the other body and I hope it will succeed in the Congress as a whole.

ELECTRICAL WORKERS CITE INFLATION

Mr. McGOVERN. Mr. President, the United Electrical, Radio and Machine Workers of America (UE) have listed a reason for supporting the transfer amendment which I believe every Senator should find especially compelling.

In a statement endorsing the amendment, U.E. points out that:

Federal dollars poured into military production come back into the economy as claims on consumer goods and services, yet no consumer goods or services have been produced to back up this money. This is a guaranteed formula for inflation. The proposed military budget contains an increase even greater than the present rate of inflation—other categories, mainly human service sectors, contain no real growth. This can only exacerbate inflationary pressures.

That excerpt describes what I consider to be a central element in the punishing inflation all Americans continue to suffer. A hard-nosed examination of the military budget is an essential element in any program to combat inflation.

UAW BACKS TRANSFER

Mr. President, the breadth of support for the transfer amendment is demonstrated very clearly in a letter to all Senators bearing yesterday's date and signed by Howard G. Paster, legislative director of the United Automobile, Aerospace and Agricultural Implement Workers of America.

Mr. Paster writes:

We believe this transfer amendment is strongly in the public interest, aiding important domestic initiatives without any negative effect on our security interests. We hope you will agree with us and urge your support of the McGovern amendment.

I want to express my appreciation to the UAW both for that organization's help in designing this concept and especially for its leadership in pushing for an economic conversion component to assist workers and communities in shifting from military to civilian priorities.

ENVIRONMENTAL ACTION URGES SUPPORT

Mr. President, Environmental Action, a group here in Washington, has also written to Senators under date of April 21 urging support for the transfer amendment.

I ask unanimous consent that the statement of the United Electrical, Radio and Machine Workers, the letter from the United Automobile, Aerospace, and Agricultural Implement Workers, and the letter from Environmental Action be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

UE SUPPORTS THE TRANSFER AMENDMENT

The United Electrical, Radio and Machine Workers of America (UE) fully supports the Transfer Amendment to be offered in the House by Rep. Parren Mitchell and in the Senate by Sen. George McGovern. Rank and file delegates to the 42nd UE International Convention adopted a resolution in support of the Transfer Amendment. UE Districts and UE Local Unions around the country have also indicated support.

The Transfer Amendment this year proposes a less than $5 billion shift in Federal funds from wasteful military spending to useful and productive civilian-oriented projects. This compares to the $7 billion cut in military spending promised by President Carter in his election compaign, and to a more than $10 billion cut recommended by Townsend Hoopes and Dr. Herbert Scoville, two former Defense Dept. specialists.

THE TRANSFER AMENDMENT MEANS JOBS

Several independent studies make it indisputable that military spending, dollar for dollar, means less jobs than the same amount spent on civilian-oriented projects. The diversion of resources, of R & D efforts and of capital into the military budget lessens the productive capability of U.S. mass-production industries—steel, railroads, electronics, shoes, textiles, etc. It also detracts from high employment sectors such as health care, education and other social services.

THE TRANSFER AMENDMENT IS ANTI-INFLATION

Federal dollars poured into military production come back into the economy as claims on consumer goods and services, yet no consumer goods or services have been produced to back up this money. This is a guaranteed formula for inflation. The proposed military budget contains an increase even greater than the present rate of inflation—other categories, mainly human service sectors, contain no real growth. This can only exacerbate inflationary pressures.

THE TRANSFER AMENDMENT IS A TEST OF NATIONAL PRIORITIES

It is the responsibility of Congress to lay out the Nation's priorities in its budget deliberations. The national defense is secure. The country is at peace. At the same time, millions of unemployed, especially unemployed youth, face a bleak future. Energy and transportation, especially railroads, are in crisis. The housing stock, water and sewer systems, schools and other needs of the cities are in desperate condition. Adequate health services are available only to upper income steady-job-holding citizens, leaving millions without coverage or with deplorable service in city and county hospitals.

It is time for Congress to declare forthrightly that these human needs will get priority in the national budget.

UE urges a yes vote on the transfer amendment.

INTERNATIONAL UNION, UNITED AUTOMOBILE, AEROSPACE & AGRICULTURAL IMPLEMENT WORKERS OF AMERICA—UAW

Washington, D.C., April 24, 1978.

DEAR SENATOR: This year, before the Joint Economic Committee and the Senate Budget Committee, UAW President Douglas Fraser said "the military budget is the most expensive public service jobs program in existence." At the same time he called for a lowering of the defense budget "by at least $5 billion" to make additional funds available to fund domestic programs meeting human needs.

A report on the defense budget by Townsend Hoopes and Herbert Scoville recommends cuts in Pentagon spending of more than $10 billion without in anyway jeopardizing the national security. The money saved could then be spent on housing, jobs, energy and other national needs.

Senator McGovern will offer an amendment to the first concurrent budget resolution to transfer approximately $5 billion from defense spending to civilian needs, with a strong emphasis on conversion to counteract economic dislocation suffered by workers and communities as a result of defense contract termination. Senator McGovern's amendment will suggest reduction in defense spending of about $4.6 billion in budget authority and $1.5 billion in outlays which is less than the amount proposed by the UAW and more than 50% less than that suggested in the Hoopes-Scoville report.

We believe this transfer amendment is strongly in the public interest, aiding important domestic initiatives without any negative effect on our security interests. We hope you will agree with us and urge your support of the McGovern amendment.

Sincerely,

HOWARD G. PASTER,
Legislative Director.

ENVIRONMENTAL ACTION,

Washington, D.C., April 21, 1978.

DEAR SENATOR: We are writing to urge your support for the McGovern Transfer Amendment, which will be introduced in the Senate during floor debate on the First Budget Resolution. As you know, the McGovern Amendment calls for a transfer of approximately $5 billion in funds from the military budget to critical domestic programs—particularly in the areas of solar energy development and revitalization of our nation's rail system.

As environmentalists we believe that the McGovern Amendment is an important effort to focus attention on the question of priorities in national spending. The modest reductions in military spending called for in the McGovern Amendment would in no way endanger our national security. Our national security is threatened, however, by continued inattention to the issues of energy and the environment.

Increasing the availability of public transportation, improving energy-efficient rail transport, and moving toward safe, clean energy sources like solar are among Environmental Action's top legislative priorities. We strongly urge that you support the McGovern Transfer Amendment as a positive step in these directions.

Sincerely,

VICKI LEONARD,
Coordinator.

Mr. McGOVERN. Mr. President, I yield the floor.

The PRESIDING OFFICER. Who yields time?

Mr. MUSKIE. Mr. President, I yield myself 15 minutes.

The PRESIDING OFFICER. The Senator from Maine (Mr. MUSKIE).

Mr. MUSKIE. Mr. President, with some reluctance, I rise in opposition to the amendment of my good friend from South Dakota. I understand his motivations and his concerns, in fact, I share many of those concerns.

This so-called transfer amendment about which Senator McGOVERN alerted us in testimony before the Budget Committee is intended to put more Federal dollars, now allocated to defense, into domestic programs which, hopefully, will contribute to the cure of certain domestic yields currently existing in this Nation.

So there are really two basic parts to the amendment: First, the cut in defense spending; and, second, the proposed increase in spending in domestic functions of the budget.

As chairman of the Budget Committee, Mr. President, I am well aware of the pressures exerted in every single function of the budget. Members and interest groups want the maximum amount of the funds available for the missions that comprise the functions that are of direct concern to them.

The budget before us today is an attempt at allocating funds in a way to achieve the best balance between defense and nondefense needs.

The approach of the transfer amendment offered by Senator McGOVERN presumes that the total amounts in this recommended congressional budget are appropriate, but that the allocation within the functions is wrong. Such, I submit, Mr. President, is not the case.

To gain the proper perspective on the question of priorities, it might be useful to make a few observations about the nature of the budget process as we have tried to implement it on the Senate side.

First, in the development of the Budget Act in 1974 one proposal we considered writing into the act was the requirement that the budget resolution reported from the Budget Committees could not be amended except by amendments that undertook balance in the sense of a transfer amendment which had balance impacts on the resolution. In other words, if there was a proposal to increase spending the same amendment ought to propose cuts in spending or increases in revenue in order to leave the total intact.

The theory was that the budget resolution was an economic instrument as well as a programmatic instrument, and that the amendment or any amendment offered should be thus disciplined.

The authors of the Budget Act, Mr. President, decided not to do that because we thought that was too inflexible. Instead we created the reconciliation process with which the Senate is familiar. This process enables Congress, after it has amended and finally acted on the first budget resolution, and modified it in the second resolution examining the authorizing and appropriations legislation, to make a second judgment about what resources are to be devoted to what needs. So although the transfer amendment idea was considered, it was not made a part of the budget process.

The alternative of the reconciliation process has offered greater flexibility to all committees in resolving any reallocation problems.

Second, Mr. President, in the Senate we have adopted the practice of pursuing two rounds of votes on functional totals. The first round involves votes on each function separately without any advance judgments as to what the total will add up to when we are through. We really try in this round in the Budget Committee to nail down a reasonable estimate of the need.

Then, in the second round we look at the bottom line and determine its significance. If we think it is excessive in terms of the resources that ought to be available, and the fiscal policy needs of the economy, then we examine the whole budget for possible cuts.

Third, Mr. President, in its deliberations this year the Budget Committee had three paramount concerns: the programmatic needs, the size of the total budgt, and the size of the deficit. The committee, as a whole, is enormously concerned with the threat of inflation, given the present trend in the economy and the potential deficit that might result from enactment of these pending recommendations we received from other committees.

As we examined each function and each mission and the needs expressed by the committees and the President, we were watchful for any reduction or modification in programs that might lead to a reduction in the deficit.

Indeed, in an effort to find savings and to hold down the deficit, I took a hard look at the spending recommendations of the committee after our first round decisions. I examined not only defense spending, but nondefense areas as well. I came back to the committee with a proposal that cut $4.7 billion in budget authority and $4 billion in outlays from our original recommendation. I felt strongly that there were areas within the defense and nondefense budget where significant savings could be achieved without damaging our national security or impinging on essential Federal programs.

I believe this was a balanced cut that called for sacrifice in a number of different areas. Included in these cuts were programs with which I have had a special interest, including the emergency fuel assistance program, the EPA construction grant program, and countercyclical revenue sharing.

It was my hope that in demonstrating support for cuts in programs that I consider of vital importance that this would set an example for other members of the committee and, hopefully, the entire Senate, to support small sacrifices in other areas in which I was able to identify room for savings and program efficiency.

As I have indicated earlier, my principal motivation in offering these second round reductions in 17 functions of the budget was to send a signal to the American people that the Senate was serious in its anti-inflation efforts and in its drive to hold down the Federal deficit.

Adoption of the transfer amendment would not achieve these goals, as indeed its only purpose is to reallocate the same total spending levels and maintain the aggregate budget totals. Moreover, it is clear that the establishment of priorities should be based on national needs.

Mr. President, let us look closely at the transfer amendment. The purpose of the amendment is to reduce the national defense targets in the fiscal year 1979 first concurrent resolution by $4.6 billion in budget authority and $1.5 billion in outlays. The funds available from this reduction would be transferred to other functions of the budget in order to shift priorities away from national defense to education, employment, and other domestic and social needs. A major objective of this approach is to reduce unemployment and stimulate the economy.

Mr. President, I would like to outline my reasons for opposing this amendment:

First. There are many priorities that this country must decide upon in determining U.S. commitments throughout the remainder of this century. These priorities touch not only our commitments here at home, but also those that involve us in international matters.

It is a fact that the favorable balance in arms strength enjoyed by the United States and its allies since the end of World War II is threatened by the signficant increases in defense spending levels by the Soviet Union. These spending increases have resulted in the Warsaw Pact nations improving significantly the capabilities of their conventional forces that confront the NATO alliance.

It is also anticipated that Soviet ICBM gains may jeopardize the survivability of the U.S. ICBM force by 1983 to 1985. The Budget Committee's recommendations for fiscal year 1979 and the 5-year projections through fiscal year 1983 recognize this deterioration in the United States/Western Europe defense position. The committee seeks to rectify the situation by insuring that priorities are assigned for maintaining an overall military balance with our adversaries that is at least as favorable as the present balance.

Second. The defense programs which would be affected by the amendment include the following: The MX and ICBM technology improvements; sea warfare force modernizations such as Aegis ships; general R. & D. and O. & M. activities; the U.S. NATO force levels and rate of NATO force modernization; the sea-launched cruise missile; and the nuclear-attack submarine program.

Without specifically addressing each of these items, it should be stressed that the Budget Committee's recommendation is based on concerns and priorities that directly conflict with the meaning of the transfer amendment.

I repeat that the committee is concerned that the strategic warfare and tactical warfare missions deserve priority because of the probable vulnerability of the U.S. ICBM force in a few years and the need to counterbalance the growth in Warsaw Pact conventional arms capabilities. It is not possible to focus on these priorities and accept the amendment simultaneously.

Third. The budget functions dealing with domestic needs which would be modified by the transfer amendment include energy, transportation, community and regional development, education, training, employment, and social services. These functions have been recommended for increases by the Budget Committee of 24 percent from fiscal year 1978 to fiscal year 1979—with an allowance for inflation, this represents approximately a 17 percent increase in real terms. The Budget Committee recommendation for national defense is for 3-percent real growth from fiscal year 1978 to fiscal year 1979.

The committee recommendation provides for over $84 billion in Federal aid to State and local governments. This represents a $5.1 billion increase from fiscal year 1978 to fiscal year 1979. Moreover, the committee projects a $28 billion increase in this activity from fiscal year 1979 to fiscal year 1983.

Fourth. Supporters of the transfer amendment argue that it would stimulate the economy and create thousands of additional jobs. This argument is deficient on at least three counts:

First, transferring spending within the budget is not an effective instrument of macroeconomic policy, and should not be used as such. Government spending programs should be evaluated on their merits, both in relation to each other and in relation to alternative private sector uses of the same resources.

The size and distribution of Federal spending should be determined by national priorities and congressional decisions respecting the overall size of government. The level of economic stimulus may then be adjusted if necessary, as it has been historically, by changes in tax rates and in monetary policy.

The PRESIDING OFFICER (Mrs. HUMPHREY). The Senator's 15 minutes have expired.

Mr. MUSKIE. I yield myself another 5 minutes, Madam President.

If Congress wants more economic stimulus, it can enact more economic stimulus. If Congress wants more jobs programs, it can enact more jobs programs. But let us not pretend it is necessary to have transfer amendments, and to cut spending on national security, in order to conduct macroeconomic policy.

Second, the immediate economic impact of transferring spending from national defense to other areas would probably be to reduce stimulus and employment rather than to increase it. This is because there are inevitably lags and administrative delays in committing and spending new budget authority on new or rapidly increasing programs.

We have observed this recently in the persistence of the Federal spending "shortfall." We observe it also in the large surpluses currently being run by many State and local governments.

Transferring spending from existing programs to new initiatives in any portion of the budget is likely to result in reduced fiscal stimulus in the short-run.

Finally, even in the longer-run, no significant increase in employment would result from such a transfer of spending authority.

A significant portion of Federal grants to State and local governments will simply substitute for spending by these authorities in the longer term. Therefore $2 billion of outlays for economic conversion and jobs programs would certainly have much less than a $2 billion net impact on spending in the economy. Additional spending on energy research and development, whatever its merits in terms of national needs, would certainly not appear to be a very labor-intensive activity.

Again, let me say if the Congress wants more economic stimulus it should enact more economic stimulus. But let us not confuse the setting of national priorities with the setting of appropriate macroeconomic policies.

Madam President, in closing my remarks, I would like to restate my respect for the aims of this amendment. I wholeheartedly support the cause of improving the general welfare of U.S. citizens. I have stood before my colleagues innumerable times speaking out against human injustices and for the basic human dignities that this amendment addresses.

I would like to support this amendment, but I am not convinced that it solves our problems.

But, Madam President, this body must make choices. We cannot afford to commit the Federal budget in every direction at once. There are continually many attractive alternatives before us. It is up to us to determine our national priorities and to provide for our general welfare and security both here at home and abroad.

Let me illustrate my concern about some of the spending increases reflected in this transfer amendment in terms of specifics.

The transfer amendment would increase the function 450 targets by $0.3 billion in budget authority and $0.1 billion in outlays to accommodate a substantial expansion of "Title Nine" economic adjustment programs of the Economic Development Administration. These increases would help local communities adjust to the closing of military bases and defense plants.

Let us look at that justification.

Adoption of this amendment would result in a massive increase in EDA economic adjustment activities. In fiscal year 1978, this program is funded at about $63 million. The Senate Budget Committee's recommended targets already could accommodate the President's request to expand the program to over $450 million in fiscal year 1979. That would be a seven-fold increase in 1 year. Senator MCGOVERN'S amendment assumes the program would expand to about $730 million in fiscal year 1979. That would be almost a 12-fold increase. Clearly the program could not expand that rapidly without undermining program efficiency and effectiveness and the Budget Committee took that into account in justifying the increase from $63 to $450 million as representing the amount that could be efficiently used for this purpose in fiscal year 1979.

Let us look at the purposes for which this increase is justified by the transfer amendment.

The PRESIDING OFFICER. The Senator's 5 minutes have expired.

Mr. MUSKIE. I yield myself 2 additional minutes, Madam President.

Even if the Congress decides to reduce military spending in the amounts recommended by Senator MCGOVERN, heavy spending for economic adjustment would

not occur for a number of months. For instance, large bases are not closed until an environmental impact statement is prepared—a process which takes about a year. During this time, only planning money would be necessary and this involves only about 3 to 5 percent of total spending on an average project. The increases suggested in the transfer amendment would not be needed by EDA in fiscal year 1979.

So with respect to this particular increase in domestic spending, the budget resolution makes adequate provision, increased the provision over 1978, and could not efficiently use the added amounts presented by the transfer amendment.

In summarizing, Madam President, I repeat that the procedure adopted by the Senate Budget Committee has been to go through each of the 19 functions of the budget carefully, without carrying any total target for spending, to establish and to address needs, not only in terms of current law and the impact of inflation, but in terms of the additional recommendations we have been asked to consider.

Each function's total and, indeed, the missions within each function, are addressed in that fashion. There is no arbitrary ceiling imposed on domestic spending. There is an honest attempt to address legitimate needs in each function. I think the budget resolution does that.

When one takes into account additionally the threat to inflation represented by excessive spending or spending above actual needs, the pressures ought to be to reduce the deficit and not to increase domestic spending.

At this time, I reserve the remainder of my time and yield to my good friend from Oklahoma.

Mr. BELLMON. Madam President, I yield myself 5 minutes, if the Senator will yield.

The PRESIDING OFFICER. The Senator from Oklahoma.

Mr. BELLMON. Madam President, I rise to join with the distinguished chairman of the Senate Budget Committee in opposition to the McGovern amendment. The chairman has made many compelling arguments, especially in discussing the way the Senate Budget Committee has arrived at the defense figure, but there are some additional points I would like to make.

Mr. MUSKIE. Will the Senator yield for one moment?

Mr. BELLMON. I yield.

Mr. MUSKIE. Madam President, I ask unanimous consent that Mike Joy, of Senator HOLLINGS' staff, be granted the privileges of the floor during the consideration of this concurrent resolution.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BELLMON. In addition to the points Senator MUSKIE has made, there are one or two other arguments I would like to suggest.

In Senator MCGOVERN's amendment, he proposes to add funds to functions that have already been significantly increased by the Budget Committee. He wants to increase the domestic functions but we have already increased them by about 24 percent for the fiscal year 1979 budget as compared to fiscal year 1978. This is a major increase. Our increases amount to a 17-percent increase in real terms. I doubt very seriously if these programs could use large infusions of new money in a single fiscal year. This is the amount that the Budget Committee has already increased. We have already increased these programs by 17 percent and now Senator MCGOVERN's amendment would increase them significantly further.

The defense budget by contrast, Madam President, rose only 3 percent in real terms. Now Senator MCGOVERN would like to cut the defense budget and add even more money onto the programs that the Senate Budget Committee has treated very, very generously.

Again, to restate the case, the domestic functions which Senator MCGOVERN wants to increase further have already been increased by 17 percent in the budget resolution. The defense budget has risen only 3 percent in real terms. To me, this reflects a very realistic transfer of priorities which has been dealt with already by the Senate Budget Committee preparing the budget before us.

The second point is that the transfer which Senator MCGOVERN is proposing will not have the economic impact which he claims. Economists do not believe that macroeconomic policy can be effectively made by transfers within the Federal budget in gross terms of this order. Some regions may even be harmed by the way the Pentagon allocates the cut. Little real growth in employment can be reasonably expected from the additions to the domestic functions that Senator MCGOVERN's amendment proposes to increase.

A third point is that Senator MCGOVERN's amendment has ignored the very real danger to this Nation's strategic missile and submarine forces which has been posed by the impressive advances this year in Soviet ICBM missile accuracy.

Both university scholars and the intelligence community are now concerned about the dangers in the mid-1980's—1983–85—to our own nuclear missiles. Unless we spend the funds the McGovern amendment would cut to strengthen our strategic forces we are going to create a missile gap which the Soviets will know about immediately this year. This will undercut the SALT negotiations, which are now underway and which most of us in this body, including Senator MCGOVERN support.

The fact is that there is not a genuine arms race underway, so far as we can tell, at this time. The Soviets have been increasing their defense spending at the rate of about 4 percent per year on a regular basis over the last 12 years. We now propose to increase our spending by about 3 percent. This is not a sudden surge on the part of either the U.S.S.R. or the U.S. It simply is our reaction to ongoing Soviet policy they have been following in an effort to strengthen our defenses rather than let us fall behind.

These defense cuts would make it impossible for the United States even to come close to the pledge we made in May of 1977 to NATO. We would fall further behind the long-term spending that we have pledged and that will make it impossible for us to continue to meet our NATO commitments.

Senator MCGOVERN's proposed cuts are aimed at a defense budget that has been been cut already by $9 billion down from what President Ford would have proposed for this year. The Office of Management and Budget has cut $6 billion more out of the Secretary of Defense's request. This defense budget is really a kind of detente budget. It is so low that the Budget Committee has not cut any real military programs this year as Senator MCGOVERN is aware, the Budget Committee is usually not generous with the defense budget, but now we are restoring some of the administration cuts to show both our NATO allies and the Soviets that we are committed to a strong defense posture.

Senator MCGOVERN has made a point with which many of us agree, that the Soviets do not respond to gross increases in defense spending. It is one that we are perfectly aware of, that we should not spend just to show we are "tough." The $1.4 billion above the President's budget that the committee included here is carefully designed to meet specific needs in NATO and in our strategic missile forces. It is not just spending to show we are "tough."

It is spending for a definite purpose and one that I feel is well justified by the facts. Therefore, I join in opposing the McGovern amendment.

Mr. MCGOVERN. Madam President, I yield myself such time as I require.

How much time do I have remaining?

The PRESIDING OFFICER. The Senator has 21 minutes.

Mr. MCGOVERN. Mr. President, the distinguished Senator from Maine, the chairman of the committee, and the ranking minority member of the committee (Mr. BELLMON) have both questioned the impact on the economy and on our society of the transfer that I am suggesting here today, so I should like to take the remainder of my time to describe in more depth what I think could be the impact, in a constructive way, of making the kind of transfer that I propose.

Before I do that, I call the attention of the Senate to a report that was issued last year by two of our most eminent defense authorities on national security issues, Mr. Townsend Hoopes, former Under Secretary of the Air Force and the principal deputy Assistant Secretary of Defense in the Johnson administration; and Dr. Herbert Scoville, the former director of the Arms Control and Disarmament Agency and the past Deputy Director of the Central Intelligence Agency. In that report last year, these two men pointed out how $10.5 billion could be carved out of the then projected fiscal 1970 arms budget without any harm to our national strength. I realize that the budget we are talking about now is slightly different than the one that had been projected earlier for fiscal 1979, but, nevertheless, the fact remains that I am suggesting here a cut roughly half the size recommended by Mr. Scoville and Mr. Hoopes last year.

In their report, they outline a series of steps that could be taken in the Defense Department that would result in savings in excess of $10 billion. I think it is important that that report be made a part of the RECORD, so I ask unanimous consent that the report, entitled "Military Policy and Budget Priorities, Fiscal Years 1979–1982," be printed at this point in the RECORD.

There being no objection, the report was ordered to be printed in the Record, as follows:

MILITARY POLICY AND BUDGET PRIORITIES
FISCAL YEARS 1979–82

(By Townsend Hoopes and Dr. Herbert Scoville)

Summary of recommendations

(all figures in billions of FY 78 constant dollars)

	FY 1970
Strategic weapons	$2.784
Army	3.555
Air Force	1.045
Navy	2.860
Marine Corps	.220
Total	10.464
FY 1980	10,830
FY 1981	9,845
FY 1982	11,133

INTRODUCTION

The major social concerns of the country cannot be set aside, and if the government is to respond to them, it must provide the funds they require. The country needs an effective urban strategy to address the cyclical and structural problems of our older central cities; the goals of the Humphrey-Hawkins bill, endorsed by the President, must be implemented by effective programs; the health care system must be rationalized and reformed to insure that all individuals receive adequate health coverage; our educational system must remain the finest in the world. In addition, social security financing must be put on a sounder basis and welfare reform must be intelligently and humanely pursued.

Such programs will require substantial new outlays from the Treasury, but slow economic recovery and President Carter's goal of balancing the federal budget by 1981 have raised serious questions whether the necessary funds will be available for these new initiatives. The tax reform package, expected to reduce federal revenues by $20 billion, will compound the problem.

We therefore anticipate severe competition for federal funds in the coming years. As a result, the country's spending priorities will have to be scrutinized closely, not only to identify waste, but also to insure that the federal budget appropriately reflects the national commitment to social justice and a secure standard of living.

To help clarify the national priorities dilemma, we have invited Mr. Townsend Hoopes and Dr. Herbert Scoville, two former national security officials and current close observers of national defense issues, to review the nation's present and projected military budget. We asked them to determine whether the nation's genuine defense needs and national security can be adequately provided at lower levels of spending. The Carter Administration inherited from the Ford and Nixon Administrations a program of "real growth" expansion in the military force structure and in corresponding budget outlays, and a major test of President Carter's commitment to social concerns will therefore be his decisions on military spending—whether to pursue the force expansion or to make feasible reductions.

Mr. Hoopes and Dr. Scoville conclude that selective reductions can be made without risk to the national security. We do not necessarily endorse their specific recommendations. But we believe the magnitude of their proposals demonstrates that the range of alternates available to the Administration and Congress is much broader than the current defense debate would indicate. We believe that trimming unnecessary defense expenditures will generate an important source of funds for meeting our vital needs at home. Transferring these funds to the domestic budget will be an important first step to reorder our national priorities.

We emphasize in the strongest terms that this nation must look after the people who suffer as a result of a conversion from wasteful military expenditures to peaceful social expenditures. When the whole society benefits, one group should not bear the total cost. Along with other social programs, the government must provide the means so that those who formerly made swords can make plow-shares.

THE MILITARY BUDGET

The important military budget issues facing the American people today relate to force structure—how many active Army divisions should be deployed, how many Air Force wings should be procured and maintained, and how much military force should be "forward positioned" far from our shores. These are the basic questions. The new Administration has inherited and is carrying forward a planned expansion of U.S. military forces. In our view, such an expansion is not warranted at this time either by the general climate of international conditions or by the present and prospective state of US-Soviet or US-China relations. On the contrary, we believe that a number of our military deployments can be safely reduced, and that such actions would be in the national interest. They would produce desirable savings in the military budget and thus permit the transfer of funds to socially useful programs. Of equal importance, they would give us a military posture more appropriate to our national requirements in a period when the primary foreign policy problems are nonmilitary in nature.

If the military force structure is expanded, then it is certain that the longer term costs of manpower, procurement and operations will dwarf any short-term savings that may be realized through greater efficiencies. Decisions made now on force structure questions will determine the character and level of military spending for decades to come.

One principal aim of this paper is to broaden the debate over military alternatives, which has been confined within very narrow limits during the past several years. While the factor of the U.S.-Soviet military balance is fundamental in such a debate, there are many other considerations. President Carter has instituted a "zero-based budgeting" technique aimed in part at achieving a balanced budget by 1981. This technique forces government agencies to justify and "prioritize" their entrenched spending programs. Such a process requires the vigorous development and debate of alternative programs; nothing is regarded as sacred, everything is open to question. It is imperative that this "zero-based" technique be applied to our military spending and military commitments, for two reasons: First, there exists a powerful inertia in favor of the steady expansion of military programs, sustained by a powerful military-industrial constituency. Second, there exists in our society a strong tendency to accept new military technology, without examining whether it will produce greater or lesser security.

THE FOREIGN POLICY FRAMEWORK

If the United States has suffered foreign policy frustrations recently, none has been the result of U.S. military weakness. Larger military forces would not have enabled us to roll back the price of oil, manage the transition from minority white rule in Southern Africa, or effect a political settlement in the Middle East. Our decision not to intervene militarily in these situations did not follow from a judgment that our military forces were inadequate, but rather from a considered conclusion that none of these situations lent itself to a military solution—indeed that a U.S. military intervention could only have exacerbated the difficulties. In part, our sensible restraint was derived from the painful and sobering lessons learned in Vietnam—that there are inherent limits to the effectiveness of military power as an instructment of policy, even for a great power. An equally influential factor was the commonsense realization of our government and people that the critical problems that cut across the world today—ranging from food shortages, energy imbalances, rising national tariff walls, large-scale violation of human rights, and the precarious stability of democratic governments—cannot be ameliorated by military force.

Nor is there any significant element in present or prospective U.S.-Soviet relations that requires us, rationally, to expand our military forces. Unfortunately, reason and proportion have frequently conflicted with the picture painted by proponents of larger U.S. military spending. They have argued that the story of the past decade in world diplomacy is the story of Soviet gains and American losses—caused by rising Soviet military power. This seems to us a quite false picture of reality. Western frustrations and setbacks have been fundamentally unrelated to Soviet military strength. Moreover, there is abundant evidence that the Soviets have been seeking normalized relations with the West during this period, in part to gain the benefits of Western technology and even of Western foodstuffs, but even more basically to enhance the security of the USSR. And Soviet diplomatic forays in the Third World have been tentative and have not fared well. The Soviets face continuing dissension in Eastern Europe, are quarreling bitterly with the Euro-communist parties of Western Europe, have been expelled from Egypt and Somalia, have lost influence in Syria, and have been rebuffed by the new countries in Africa and Indochina in their efforts to establish military bases in those places. In our judgment, both superpowers have been forced in recent years to accept a greater accommodation to the indigenous dynamic of local events in an increasingly unmanageable world.

The overall U.S.-Soviet balance remains stable. Both the USSR and the United States possess enormous military power, and both countries have been expanding or modernizing their military forces beyond reasonable limits. Both have far more military capability in the aggregate than they can effectively utilize in conjunction with any foreseeable international crisis—including total nuclear war. The contention that whichever superpower spends more of its GNP on military procurement will automatically gain prestige or leverage in the Third World, or in foreseeable crisis situations anywhere, is a highly dubious proposition, as reference to the nonmilitary nature of the overriding global problems has suggested. It is well known, for example, that the Soviet Union spends a greater proportion of its GNP on agriculture than we do, but this does not make Russia the world's leading breadbasket; on the contrary, the Soviets must import huge quantities of wheat from us. The CIA recently doubled its estimate of the percentage of Soviet GNP devoted to military spending, but it did not change its estimate of Soviet military capability. The analysis showed, not that we are twice as threatened, but that the Soviet economy is twice as inefficient as we had originally thought. Finally, we see little indication in present and prospective Soviet policy of an aggressive drive carrying with it a willingness to run a serious risk of war.

We need to maintain significant military

power. But in an era of slow economic growth and scarce resources worldwide, the particular size and character of the U.S. defense budget does not send sensitive or even relevant "signals" of our intentions to either allies or potential adversaries. A "real growth" military budget is not therefore a prerequisite to effective U.S. efforts to confront, define and resolve major global problems facing the world today; nor is it a test of our internationalism, in the sense that a reduction in the military budget would be read as a return to isolationism. We are hardly an isolationist nation. The Carter Administration has launched a whole range of significant foreign policy initiatives—in the Middle East and Africa, in Latin America, on nuclear proliferation, on Western economic policy, on arms sales, and human rights. Success in these initiatives demands the concentrated attention of our best diplomats and government managers, and they need to be backed by significant resources, but it does not depend upon an expansion of U.S. military forces.

President Carter said recently, "It is a new world that calls for a new American foreign policy." We agree, and suggest that the military posture appropriate to underpin such a foreign policy is one sufficient to defend the United States and its principal strategic interests, but that we neither want nor need a capacity for extensive military interventions in the Third World.

STRATEGIC NUCLEAR POLICY

Our strategic forces are the quintessential element of our national security structure, since a nuclear attack on this country would kill tens of millions of our people and destroy our society. Therefore, there can be no compromise over the procurement of the weapons needed to maintain a secure deterrent and a stable strategic nuclear balance between and among the nuclear-armed powers. But more strategic weapons, possessing greater explosive yield, throw-weight, and accuracy do not necessarily make for greater security; indeed, the reverse is often the case.

There is no defense today against the kind of nuclear attack that we can launch or that can be launched against us by the USSR, and it is probable that there can be none. Therefore, security for all nuclear-armed nations must continue to depend upon a considered self-restraint based on the perception that a rash attack on a powerful adversary would also result in the virtually certain destruction of one's own society. This mutual restraint is called deterrence. We must continue to have strategic retaliatory forces capable of making nuclear aggression, upon us or our allies, a totally irrational act, but we should not pursue the illusory goal of nuclear superiority vis-a-vis the USSR.

Stable deterrence thus requires both the US and USSR to refrain from developing policies or forces that seem to threaten the deterrent forces of the other side, for such apparent threats increase the incentives for preemptive war or the likelihood of accidental nuclear war, and create tensions that decrease the security of all parties. The United States must retain secure retaliatory nuclear forces, but these forces should not include a threatening counterforce or first strike capability, for that would destabilize the strategic balance.

ARMS CONTROL

In our judgment, the current strategic nuclear balance is stable and cannot be easily upset, and it will be far better maintained by equitable arms control agreements (including especially arms reduction agreements) than by the development and procurement of new weapons systems. Certain aspects of the scope and pace of the Soviet strategic buildup are disturbing, but certain aspects of the U.S. nuclear program must also seem disturbing as seen from the Soviet viewpoint. While superior Soviet throw-weight worries some American defense planners, prospective improvements in the yield and accuracy of Minuteman (which would insure an impressive U.S. superiority in hard-target kill capability for at least five years) are equally alarming to Soviet defense planners.

Wisdom for the United States does not lie in following Soviet moves to improve the hard target kill capability of land-based missiles, for this would create the prospect of an increasingly tense and precarious relationship between mutually vulnerable land-based missile forces—like two adversaries facing each other with cocked pistols. In our judgment, the Soviets do not now possess a counterforce capability against our land-based missile forces. But even if they were to achieve it, we should not attempt to match it. On the contrary, we should continue to exercise restraint with respect to modernizing such forces, for our sea-based and bomber forces would remain secure and the ensuing situation would offer the Soviets no incentive for preemptive war. Accordingly, we should concentrate on taking whatever measures are necessary to ensure the invulnerability of our sea based and air-based forces, and on striving to persuade the Soviets not to develop a land-based counterforce capability. An effective SALT agreement would greatly assist this effort.

In our judgment, it is doubtful that the USSR is seriously seeking a capability to fight and win a nuclear war. The scenario that the USSR would launch a preemptive attack in the confidence that its civil defenses (including the evacuation of cities) were sufficient to protect most of the Soviet population from the thousands of surviving U.S. warheads is, in our judgment, paranoid. No rational Soviet leader would risk the fate of his nation—and 50 million to 100 million fatalities—on the basis of computer simulations about the theoretical course of a nuclear war or on the presumed effectiveness of civil defense measures. The notion that the Soviet leadership would initiate nuclear war in the hope that the USSR could "be ahead of the United States" ten to fifteen years after a mutually catastrophic nuclear exchange is not credible.

An effective agreement limiting strategic arms would be the most reliable way to maintain a stable deterrent, to reduce the risks of nuclear conflict, and also to reduce the present high costs of the arms race. A treaty establishing long-term ceilings on all strategic delivery vehicles at levels somewhat below those agreed to at Vladivostok (2400 bombers and missiles, of which 1320 could be MIRV'd) would give confidence that neither side would seek an advantage in numbers of delivery vehicles. A protocol restricting, even for three years, further development and deployment of MIRV'd ICBMs, strategic-range cruise missiles, mobile ICBMs, and the Backfire Bomber would slow down the present dangerous arms competition, help to establish a discernible momentum toward mutual trust, and improve the prospect for further reducing the levels of all strategic arms. We note with encouragement that the SALT II negotiations seem to be moving in this direction. Conclusion of a SALT II treaty along these lines should set the stage for a more ambitious effort to curb the testing and development of all new strategic weapons; this would have the beneficial effect of imposing genuine restraints on the military application of new technology.

STRATEGIC WEAPONS PROGRAMS

Beyond the possibilities of successful SALT agreements, there is in the present situation an opportunity for the Carter Administration to make progress in arms control by the practice of selective independent restraint. In our judgment, strategic forces capable of surviving a first strike and of retaliating effectively can be maintained at a level of expenditure and effort lower than the currently programmed level.

1. The following programs, which are designed to provide significant counterforce capabilities by greatly improving warhead accuracy, should be cancelled:

a. The MX mobile ICBM—the Soviets would accurately perceive the MX as a clear first strike threat to their land-based ICBM force. Its development and deployment would gravely complicate verification of any numerical limits on land-based strategic delivery vehicles, and would thus possibly preclude any further SALT agreements. The estimated FY 79 cost saving of the MX cancellation is $245 million; 4-year savings could reach at least $2 billion.

b. Minuteman improvements (MK 12-A warhead, NS-20 guidance system)—these will provide an unnecessary higher yield and improved accuracy in the immediate future, if not cancelled. Estimated cost savings in FY 1979: $100 million.

c. Advanced ballistic reentry systems (ABRES)—these would develop maneuverable reentry vehicles (MARV) which would be far more accurate than a free-falling ballistic missile. Estimated FY 79 cost saving: $125 million.

d. Trident II missiles—this would have a 6000-mile range and be fitted with a maneuvering reentry vehicle (MARV). Cost saving in FY 79: $110 million.

2. The following strategic programs are *not* required for the maintenance of a secure retaliatory force in the foreseeable future, and shoud be cancelled:

a. Cruise Missiles of Strategic Range—Our overriding interest in stable, verifiable arms control agreements and arms reductions makes it imperative that we limit cruise missiles to tactical ranges—i.e., not exceeding 600 km. If the U.S. were to deploy even air launched cruise missiles (ALCM) of strategic range this could, unless strigently controlled by an arms control agreement, create irresistible pressures for the future development of both land-launched and sea-launched cruise missiles of strategic range. It could also lead to a proliferation of cruise missiles (within each of the U.S. armed services and within allied and Third World armed forces) that could become dangerously unmanageable. Neither sea-launched nor land-launched cruise missiles of *any* range are necessary or even sound additions to the U.S. strategic retaliatory forces. It could be reasonably argued that U.S. deployment of air-launched cruise missiles exceeding 600 km could buy us certain advantages if aircraft were our sole or primary means of strategic retaliation. But the strategic bomber force is only one element of the deterrent triad. Bombers will be reaching the Soviet Union hours after our sea-launched ballistic missiles and surviving ICBM's will have devastated its air defenses. Therefore, it is hard to conceive of a realistic situation which will require ALCM's with ranges greater than 600 km.

In our judgment, the continued development and the deployment of all types of cruise missiles by both sides would pose new dangers to U.S. security, more than offsetting the advantages to be gained from U.S. deployment of long-range cruise missiles at this time. The result would be more weapons and less security for both countries, and would add further complications to the already perplexing arms control problem. FY 79 savings: at least $800 million.

b. Trident Submarines—Seven new Trident (Ohio class) submarines have already been fully funded by Congress. Six additional submarines are planned for the next four years. Procurement of this class should be reduced for several reasons. First, the Trident I (C–4) missile, which will be deployed in the Poseidon boat, will extend the operational range of Poseidon threefold, thus providing an enormous margin of protection against Soviet anti-submarine warfare technique. Second, if the lower MIRV sub-limits in SALT II (and expected further MIRV reductions in SALT III) become part of a treaty agreement, the Navy will not be able to fit all of its

planned Tridents under those ceilings. Third, it is still not too late to examine lower-cost alternatives to the enormously expensive Trident, which costs over $1 billion each.

For these reasons, Trident should be procured at a more modest rate than currently programmed. Procurement over the next four years should be reduced from 6 to 3, leaving an authorized force of 10 Tridents by 1982. FY 79 savings: approximately $1.2 billion. Four-year savings of at least $3.6 billion.

3. We should not continue to expend effort and money on strategic defense programs that cannot realistically provide meaningful protection, including the following:

a. Follow-on Interceptor Aircraft—we see no sense in spending large sums to develop an advanced interceptor aircraft against bomber attacks when there is no protection against the devastating effects of Soviet ballistic missile warheads and when the Soviet bomber force has a very limited intercontinental capability and can only penetrate the U.S. subsonically at high altitudes. FY 79 savings: $81 million; 4-year savings of $1.9 billion.

b. Civil Defense—whatever the size of the present Soviet civil defense program, it cannot protect the Soviet population or economy from devastating consequences in the event of a Soviet-U.S. nuclear exchange. By the same logic, no rational U.S. civil defense program can protect the American population or economy from the equally devastating consequences of a Soviet nuclear attack. In an era of powerful, plentiful and increasingly precise ballistic missiles on both sides, a serious effort to protect these assets through civil defense programs is by definition a waste of money. Worse than that, it might engender a false sense of security or give rise in the USSR to falsely-based fears of U.S. aggressive intent in the same way that the Soviet civil defense program has been perceived by some in this country. For both political and financial reasons, the proposed expenditures on civil defense are a mistake and should be cancelled. The estimated cost saving in FY 79 would be $123 million.

GENERAL-PURPOSE FORCES

U.S. general-purpose forces have four main purposes—to defend United States territory, support the NATO commitment, meet other treaty commitments and respond to a range of lesser contingencies in other parts of the world as may be necessary to protect U.S. interests.

Europe and the NATO alliance remain our highest priority security interest in the world today. The United States must continue to provide the forces necessary to give NATO both military and political credibility.

We find, however, two basic discrepancies between a credible NATO commitment and the current expansion of U.S. forces oriented to Europe. First, this expansion does not appear justified by either the military balance in Europe or the present state of U.S.-Soviet relations. Second, the ground forces in the United States that are programmed for European reinforcement are unusably large and inadequately ready to meet the requirements of the most likely European contingency—a short, intense conventional war which will end either in an urgently negotiated ceasefire or an escalation to a nuclear war.

While the U.S. and NATO planning assumptions increasingly emphasize the need for a rapid response at a high level of combat capability, the size and readiness level of our reinforcing forces and the plans for their movement to Europe (primarily via seaborne transport operating along sealanes protected by the U.S. Navy) appear to be geared to a relatively slow build-up and an extended conventional war.

These discrepancies need to be recognized and corrected. Expansion appears to be the wrong alternative, for the real need is for a smaller, more combat ready force tailored to a contingency demanding a quick response at acceptable procurement and maintenance costs.

The military forces we deploy in Asia, and maintain at home for Asian contingencies, are also unreasonably large in the post-Vietnam period. These forces, costing an estimated $30 billion per year, or about 20 percent of the total military budget, constitute a holdover from the era of confrontation in which the United States sought to exercise a tight strategic control over large areas of the region and stood poised to intervene directly and militarily in local situations. That era has passed. Our need now is to bring our Asian policy and our supporting military deployments into better alignment with new strategic realities in Asia and new political realities at home.

A. GROUND FORCES

Since 1975 the authorized U.S. Army ground forces have been expanded from 13 to 16 active divisions. In addition, there are 3 active Marine Corps divisions. Five Army divisions are in Europe (4 full divisions and 1/3 of each of 2 U.S.-based divisions, plus assorted independent units), 1 in South Korea, 1 in Hawaii, and 9 in the continental U.S. One active Marine division is based in North Carolina, 1 in California and 1 is split between Hawaii and Okinawa (on a 1/3-2/3 basis).

The Marine Corps active force structure is set by law at its present level. The Army active structure has been expanded by 3 divisions since 1975, but without significant increases in Army manpower ceilings—which has resulted in a lowered level of manning throughout the structure. In addition, the Army is converting two of the three new light infantry divisions into "heavy" armored divisions and is procuring new generations of tanks, attack helicopters, armored personnel carriers and other equipment. This combined expansion and modernization is very expensive. For example, the estimated five-year procurement, operations and maintenance costs of the three new Army divisions alone are $4.5 billion (up from the 1975 projection of $1.8 billion).

NATO CONSIDERATIONS

The offered rationale for this Army force expansion is a perception that the Soviet Union now has the capability to launch a successful "blitzkrieg" attack that could quickly defeat NATO forces and result in the Soviet occupation of Western Europe. There is no doubt that Warsaw Pact forces have improved significantly in overall strength and modernization improvements in the past ten years. At the same time, however, NATO forces have been comparably modernized and upgraded. Although both NATO and the Warsaw Pact appear to enjoy advantage over the other in individual aspects and categories, the overall military balance in Europe is stable. The Brookings Institution, which in recent years has sounded an alarm about NATO capabilities, stated in its 1977 report Setting National Priorities:

In side-by-side comparisons of similar weapons technology, NATO appears to have done rather well (since 1970) . . . It seems evident—within the limits of uncertainty surrounding any such assessments—that the modernization of Warsaw Pact forces has been effectively matched by NATO improvements . . . In effect the current balance of forces is such that neither side could be guaranteed a favorable outcome should war break out in Europe.

The Brookings report adds that the present logistical support structure of Soviet forces in Eastern Europe is insufficient for launching an immediate attack, and that large-scale preparations could not escape Western detection.

This purely military judgment is reinforced by the present state of political detente. There is little indication in Soviet policy of any aggressive intention to invade, occupy or rule Western Europe. Soviet policy tends to be concerned more with defending and gaining broader recognition for existing spheres of influence, and with taking measures to limit the cohesiveness of the Atlantic powers. USSR relations with the Euro-communists in the West are strained, and its continued position as an unwelcome occupier in Eastern Europe reinforces other existing deterrents to a Soviet attack on the West. On this reading, the Soviets face far too many uncertainties to make "blitzkrieg" a credible option.

An important consequence of expanding the U.S. ground force structure without significant manpower increases is a low level of manning, especially in the three new Army divisions. This weakness is aggravated by a heavy dependence on the effective mobilization of Reserve units in time of crisis, in order to bring the regular forces to combat readiness. The apparent rationale for these three new divisions is that they would be required for the reinforcement of NATO Europe in an extended conventional war. But given the far greater likelihood of a "short war scenario" in Europe, it seems to us doubtful whether substantial U.S. ground forces, including specifically the three new Army divisions, could be mobilized and transported to Europe in time to have any significant impact on the outcome of the conflict.

In our judgment, the situation does not call for carrying out the planned expansion of U.S. forces oriented to Europe. The need is to tailor the size of our ground forces to the realities of a short war scenario in Europe and to guarantee that these forces are maintained at a high level of combat readiness. Reducing the Army force structure should produce an improvement in manning levels, and will also ease the strain on the voluntary recruiting system.

We recommend against the withdrawal of any Army combat forces in Europe at this time, but we urge serious new efforts to negotiate mutual East-West force reductions. We do recommend, however, that the total active Army force structure be reduced from 16 to 10 divisions, worldwide, over four years. This would permit us to provide 10 highly ready and well-supplied divisions. Regular Army personnel strength would decrease by 160,000 while 18,000 civilian and 21,000 reserve component personnel would be added to upgrade the support and readiness capabilities. Manning percentages throughout the 10 divisions would be very high and their combat readiness would be less heavily dependent on reserve mobilization. (See "Deployments in Asia" p. 24 *infra.*)

Over the next four years, such an alternative Army structure would cost approximately $14 billion less than the programmed force expansion. FY 79 savings alone could approximate $3.6 billion. To achieve a comparable state of preparedness throughout a 16-division structure would cost $22 billion above the current program level.

As part of this realignment, we strongly support President Carter's efforts to improve readiness in and for NATO by increasing the stocks of prepositioned equipment and ammunition in Europe, constructing additional hardened airbase facilities in Europe and encouraging greater standardization and interoperability of NATO weapons systems.

B. TACTICAL AIR FORCES

The Air Force tactical forces, which constitute 22 wing-equivalents of aircraft within a 26-wing structure, are currently engaged in a simultaneous expansion and modernization program. The plan is to procure enough new aircraft and personnel to fully equip 26 wings; at the same time, nearly one-half of the units are being modernized. The net effect of this dual development is to drive procurement costs up dramatically. The plan is to procure 1600 new aircraft during the period FY 77–81 at a cost of $15 billion, re-

sulting in a net addition of 300 operational aircraft (17 percent) to the total inventory. For the first time, the Air National Guard will be supplied with new planes rather than those phased out of the active force structure.

We support the modernization program, but believe there is no justification for an expansion to the 26-wing structure. Consolidating the tactical air forces at the 22-wing level, and assuring their adequate modernization, is a much better choice and would be more consistent with the NATO short war scenario. Such a structure would still provide us with both massive and thoroughly modern tactical air power. Accordingly, we propose:

1. Cancellation of the procurement of two F–15 wings, at an estimated savings of $2.9 billion over 4 years;

2. Cancellation of the procurement of one A–10 wing, at an estimated 4 years saving of $750 million.

3. Deactivation of one wing of F–4 aircraft (located in the Philippines and Okinawa), at an estimated four-year savings of approximately $480 million.

Forgoing the 4-wing expansion would permit a reduction of military manpower spaces in the Air Force by at least 7,000 below the planned level.

The most important of these proposed actions is to halt procurement of the F–15. This gold-plated weapon was designed to replace the F–4 Phantom in the modernization program, but the costs have risen to a prohibitive $15 million per plane—a 40 percent increase above the original unit cost estimate. In addition, the F–15 lacks the cost-effective general-purpose versatility of either the F–4 or the F–16, being suited primarily for the "air superiority" mission.

Stabilizing the force at 22 wings on the basis of the proposed cancellations and deactivation would leave a modernized, highly capable force structure by 1981 composed of: 4 wings primarily for close air support and battlefield interdiction missions (1 A–7 wing, 3 A–10 wings); 4 wings primarily for air superiority (F–15); 4 wings primarily for battlefield interdiction (F–111); and 10 multipurpose wings (8 F–4 wings, 2 F–16 wings). Under this proposed force, mission priorities would be geared to the short war scenario to a greater degree than in the current force and to the same degree as in the programmed 26-wing force.

Savings in Air Force F–15 and A–10 production and F–4 deactivation in FY 79 would be $1 billion. The aggregate 4-year estimated savings would be $4.338 billion.

C. NAVAL FORCES

We find current U.S. naval policy lacking a rational conceptual framework (both political and military) and thus confused and wasteful of resources. In the absence of a clear, consistent view of naval missions, advocates of expanded U.S. naval power are increasingly prone to take intellectual refuge in exaggerated formulations of the Soviet naval threat. In our judgment, the great need today is not the procurement of more and larger U.S. warships, but rather an intensive, objective effort to define the future role of U.S. general purpose naval forces. (The submarine-based strategic deterrent force is a separate subject.)

Given the strategic nuclear forces available to the U.S. and the USSR, and the high stakes inherent in any confrontation between the two nations, it is not rational to build U.S. naval power on the assumption that it will be called upon to conduct an extended worldwide conventional fight against the Soviet navy. Instead, the U.S. Navy should be structured to carry out missions below the threshold of general war that will support uniquely American purposes in various parts of the world.

The current US–Soviet naval balance if seen in broad perspective is favorable. First, the decline in the number of U.S. naval vessels results from "block obsolescence" of World War II ships The Soviets will face the same problem in the near future. Overall, the U.S. has lost 45 percent of its naval vessels since 1958 to obsolescence; the Soviets have lost 27 percent. Both fleets have been shrinking. Moreover, overall trends in such areas as production of surface warships and nuclear attack submarines favor the United States. Second, the naval forces of the NATO allies are substantial additions to U.S. naval power, while the Warsaw Pact naval forces add little or no strength to the Soviet navy. Canada and the Western European allies (including France) provide substantial naval power. If Japan, Australia and other allied countries are added, the allied fleet total 8.1 million naval tons versus a Soviet bloc total of 2.8 million tons. It includes over 500 major surface combatant ships versus less than 250 for the Soviet bloc. Forty-five percent of the Soviet bloc vessels are small patrol class ships (1,000 ton displacement or less), while only 20 percent of the allied ships are in this category. Finally, in terms of relative efficiency, only one of every six Soviet ships is maintained on station compared to one of every three for the United States.

The character of Soviet naval forces has developed, in part, in an effort to counter U.S. carrier deployments. In some large part, however, Soviet efforts to develop a "blue water" navy seem to us an extravagant exercise in grandeur,; an attempt to develop a mirror image of the "naval power projection" concept which has been the essence of U.S. naval doctrine since World War II. It is doubtful whether these rather grandiose Soviet developments will prove to be useful supports for Soviet policy, particularly in a conflict situation. It is even more doubtful whether they should be used as serious reference points for the structuring of U.S. naval power in the coming era.

In keeping with the foreign policy framework we outlined at the outset of this paper, we see no need to identify or equate our national will with the weight of our naval tonnage. Without any new procurement, we will have, for a long time to come, more than adequate naval power to support a firm U.S. policy in local crisis situations, and it should be recognized that our general purpose naval forces will continue to be most relevant in relation to that kind of contingency. General purpose naval forces do not have a significant role to play in a European war that unfolds as a short, intensive conventional conflict followed by either negotiated cease-fire or escalation to general nuclear war. Accordingly, it is hard to conceive of a realistic need for a large naval force dedicated to maintaining control of the Atlantic sea lanes in order to assure a massive flow of reinforcement forces and materials to Europe, for such forces could not arrive in time to have a significant impact on the outcome of a short, intense European war.

Since World War II, our general purpose naval forces have been used primarily to project U.S. military power against Third World countries, including amphibious operations in Lebanon and the Dominican Republic, and carrier-based air attacks against Vietnam. Even in an era when U.S. foreign policy is likely to be less interventionist than in the past, it will be prudent to maintain such capabilities, but to do so will not require larger naval forces or new carrier platforms. For almost by definition, such operations will be carried out in situations where the small nations we are seeking to restrain will lack the means to seriously threaten our naval power.

Notwithstanding these relevant considerations, proponents of a larger U.S. Navy are trying to make the size and composition of the Soviet Navy and the Soviet naval threat the basic reference points and justifications of an expansion of U.S. naval forces. Indeed, they are even arguing that general-purpose naval forces (particularly the carrier task forces) have a "power projection mission" against the Soviet Union. We find this argument without military logic. On a purely tactical level, the closer an aircraft carrier moves toward Soviet shores, the more it is exposed to threat from sophisticated anti-ship defensive systems. And as the perception of this threat grows, so does the perception of the number and character of escort ships needed to protect the carrier. This adds heavily to cost without significantly reducing vulnerability. More basically, the mission itself makes little sense, for it is not realistic to believe the United States could conduct limited air strikes against the USSR without triggering a nuclear confrontation. Yet in such a confrontation, or in an ensuing nuclear war, aircraft carriers would play no necessary role. Thus the probability is that this proposed carrier mission might well trigger nuclear war.

What is our need for general purpose naval forces? They should provide us with the capacity to exercise effective control of the waters surrounding the United States and in other key strategic sea areas where we have definite commitments—especially Europe, the Mediterranean, Japan and Korea. However, such a capability must be developed and nurtured with the clear understanding that unchallenged control of the sea is no longer possible nor, in an era of intercontinental missiles and large numbers of nuclear warheads, can it be strategically decisive. Technology has changed the old conditions. Accordingly, we believe the present level of general purpose naval forces is more than sufficient, and that no significant increment of protection and security can be obtained by purchasing larger forces. Indeed, we believe that the number of carriers should be reduced from 12 to 9 (See "Deployments in Asia," p. 25 infra.).

By foregoing procurement of new carriers, and also of the AEGIS strike cruisers and destroyers necessary to protect and support them, we would realize savings of $6.7 billion over the next four years. Reducing operational carriers from 12 to 9 would realize additional savings of $3.1 billion over four years.

In addition, we believe the procurement of the F–14 should be halted immediately. The F–14 is a very expensive aircraft, can operate only from very large carrier platforms, is designed chiefly for an "air superiority mission" to protect the carrier task force, and has a notoriously low readiness rate. We believe that the F–18 should be used in place of the F–14 on the reduced number of naval carriers.

DEPLOYMENTS IN ASIA

Almost one-third of our total general purpose forces are deployed in or oriented toward Asia. These include two Army divisions (the 2nd in South Korea and the 25th in Hawaii), one Marine Division and one Marine Air Wing (two-thirds of each stationed in Okinawa-Japan and the remaining third in Hawaii), six aircraft carriers (two deployed west of Hawaii), 4 amphibious squadrons (at least 1 of which is always on station in the western Pacific, carrying two reinforced Marine battalions), nine Air Force tactical fighter squadrons (three in Korea, four in Okinawa, two in the Philippines), two forward based tactical airlift squadrons (one in Japan, one in the Philippines) and nine U.S.-based tactical airlift squadrons (Hawaii, the West Coast and Alaska), and also a number of other naval vessels. In the aggregate, these forces cost an estimated $30 billion per year and constitute about 20 percent of the total military budget.

In our judgment, U.S. forces in Asia are excessive when measured against the Soviet threat in the area or against other contingencies, including an attack by North Korea. Responsible analysts agree that most Soviet ground and air forces in the Asian area are positioned primarily against the

People's Republic of China and represent a remote threat to United States forces and interests. The Soviet Pacific fleet faces major geographical disadvantages, since its naval bases are located near "choke points" that could easily be cut off or isolated from supply bases and air support; moreover, it is relatively inactive and appears to receive low priority attention within the Soviet Navy. Finally, it is important to reiterate the central fact that the US-Soviet military balance is essentially a global one, based primarily on strategic rather than local forces and calculations. Both sides appear to recognize the global implications of any local US-Soviet confrontation.

The Chinese threat to U.S. forces and interests in the Asian area is highly remote. Since the renewal of our diplomatic contact with China, we have gained a more realistic view of the limited Chinese military capabilities. Moreover, aside from Taiwan and possibly Korea, there are very few places in Asia where our critical national interests might conflict militarily with those of Peking.

Accordingly, we see in the present situation an opportunity to define a new post-Vietnam Asian policy based on a firm adherence to present treaty obligations, but also on a national understanding that U.S. military intervention in other Asian situations would be unnecessary and unwise. U.S. interests are better served by a watchful accommodation to local political developments.

For all of these reasons, we believe the Carter Administration should move over the four-year period ahead (FY 79–82) toward a significant reduction in the deployment of U.S. general-purpose forces in Asia. Consultation with our friends and allies will be an essential concommitant of such reductions, for otherwise the proposed moves could be disturbing and misleading to those who have placed their trust in the United States. But if these consultations are carefully handled, there need arise no substantial Asian fears that the United States is abandoning the area. We recommend the following:

1. Withdraw and deactivate the two Army divisions now based in the Pacific—the 2nd Infantry in South Korea and the 25th Infantry in Hawaii.

ROK active ground forces are well armed and total 560,000 men; they face a North Korean army of 430,000 men. They possess significant capabilities against armored attack and are aided by mountainous terrain in Korea which generally restricts tank forces to corridors. Most responsible analysts believe that the balance of combat ground forces appears to be adequate to prevent a rational attack on South Korea, even without the combat contribution of the U.S. 2nd Division. While the ROK air force is more modern than its northern counterpart, it is smaller in size, but this disadvantage will continue to be balanced by a full U.S. Air Force tactical wing based in Korea. In terms of its contribution to the deterrence of conflict in the western Pacific, deactivation of the 25th Division in Hawaii would have the least impact upon the assessments and calculations of the Soviets, the Chinese, the Japanese, and the Koreans.

2. Withdraw and deactivate the two-thirds Marine Division and the two-thirds Marine air wing based in Okinawa-Japan, together with supporting elements, but maintain the one-third Marine Division and the one-third Marine air wing based in Hawaii.

Even without these Marine Corps units based in the western Pacific, a substantial "quick reaction" force would remain in the form of the two Marine battalions which are now kept constantly "on station" in the western Pacific aboard ships of the Amphibious Ready Squadrons. Savings in FY 79 of $220 million; 4 year savings of $1.240 billion.

3. Withdraw and deactivate three of the six carriers now based in the Pacific.

The estimated cost savings would approximate $3 billion over the next 4-year period. FY 79 savings would be $615 million.

4. Withdraw and deactivate three of the nine Air Force tactical fighter squadrons assigned to Asia—two F–4 squadrons at Clark Field in the Philippines and one F–4 squadron at Okinawa (see Tactical Air Forces section, p. 19).

Taken together, the aforementioned Asia force reductions and deactivations would result in an estimated savings of $8 billion for the four-year period.

Even if these reductions and deactivations were carried out, U.S. forces remaining in Asia would still be substantial. They would include three carrier task forces (supporting two wings of naval carrier aircraft); six Air Force tactical squadrons (three based in Korea, three in Okinawa); one-third Marine Division and one-third Marine air wing (based in Hawaii); two Marine battalions on station in the western Pacific as part of the Amphibious Ready Groups; and also substantial cruiser and destroyer strength, airlift squadrons and ASW ships. In our judgment, such a respectable force would be more than sufficient, under current and foreseeable conditions, to honor our commitments to Japan and South Korea, and maintain a general posture of readiness in the whole Pacific area.

MILITARY BUDGET SAVINGS

[All figures in billions of fiscal year 1978 constant dollars]

	Fiscal year—			
	1979	1980	1981	1982
I. Strategic weapons:				
1. M–X ICBM	0.245	[1] 0.688	[1] 0.688	[1] 0.688
2. Minuteman improvements	.100	[1] .190		
3. ABRES	.125	[1] .125	[1] .125	[1] .125
4. Trident II SLBM	.110	[1] .110	[1] .110	[1] .110
5. Strategic cruise missiles	.800	[1] .800	[1] .800	[1] .800
6. Trident submarine	1.200	1.200		1.200
7. Follow-on interceptor	.081	.110	.830	.870
8. Civil defense	.123	[1] .123	[1] .123	[1] .123
II. Army: 1. 10-division force structure	3.555	4.587	3.545	3.310
III. Air Force:				
1. F–15 procurement	.743	[1] .532	[1] .532	[1] .532
2. A–10 procurement	[1] .182	[1] .182	[1] .182	[1] .182
3. F–4 deactivation	[1] .120	.120	.120	.120
IV. Navy:				
1. Forego new carrier	1.213			
2. Forego strike cruiser (CSGN)	1.067			.800
3. Forego Aegis destroyer (DDG–47)		1.033	1.550	1.033
V. Asia deployments:				
1. Deactivate 2 divisions [2]	.610	.790	.890	.890
2. Deactivate 2/3 Marine division plus wing	.220	.300	.360	.360
3. Retire 3 carriers	.580	.730	.880	.880
4. Deactivate 1 tactical air wing [2]	.210	.120	.120	.120
Total	10.464	10.830	9.845	11.133

[1] Estimate.
[2] Forces listed twice but counted once.

Note: In several cases, fiscal year 1979 figures combine CBO fiscal years 1978 and 1979 savings.

Mr. McGOVERN. This report, incidentally, was endorsed by top officials of the U.S. Conference of Mayors, it was endorsed by the United Auto Workers, the National Urban League, the National Education Association, the International Association of Machinists, and the American Federation of State, County, and Municipal Employees.

I am also pleased to note that the Coalition for a New Foreign and Military Policy, made up of some 37 organizations, has expressed firm support for the transfer amendment now pending. I ask unanimous consent that a letter dated April 21 from that group be printed at this point in the RECORD, along with a list of the religious, peace, labor, professional, and social action organizations which are members of the coalition.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

COALITION FOR A NEW FOREIGN AND MILITARY POLICY,
April 21, 1978.

DEAR SENATOR: Soon you will have the opportunity to consider the First Budget Resolution for FY 1979.

The legislation that established the new Congressional Budget process, Public Law 93–344, Section 2(4) states: "The Congress declares that it is *essential to establish national budget priorities.*" In our judgment, this is a mandate to you as a Senator to examine carefully the Budget Resolution in the light of the priorities it sets for federal spending, and to debate fully with your colleagues the question of budget priorities appropriate to the nation's needs. The proper functioning of the Budget Process, and an adequate Congressional response to the pressing needs of the American people demand no less.

Toward that end, we wholeheartedly endorse the initiative by Senator George McGovern to offer a "Transfer Amendment" to the First Budget Resolution for FY '79 when it comes to the floor. The McGovern Amendment would reduce the ceiling in the National Defense (050) function of the Budget Resolution by $4.6 billion in budget authority, and $1.5 billion in FY '79 outlays; and raise spending ceilings by a commensurate amount in budget functions covering programs to address structural unemployment, to convert portions of the economy from military to civilian production, to step up development of solar energy, and to revitalize the nation's railroads and railbeds.

The McGovern Amendment thus raises the question of priorities in the federal budget in a dramatic and wholly appropriate way, consistent with the mandate of law. Equally important, it offers a creative and constructive response to our most urgent needs as a nation—needs which we believe are inadequately addressed by the Budget Resolution as proposed by the Senate Budget Committee. And finally, it constitutes a promising new approach to meeting our domestic needs without increasing deficit spending.

A recent report by former Under Secretary of the Air Force Townsend Hoopes and former Deputy Director of the CIA Dr. Herbert

Scoville recommends military budget savings of $10.464 billion for FY '79, which could be realized through reduction or elimination of specific programs which are not essential to the nation's security.

We agree with Mr. Hoopes and Dr. Scoville that "the debate over military alternatives . . . has been confined within very narrow limits during the past several years." In a time of peace, and when neither the Soviet Union nor any other power poses a real threat to the nation's security, we can ill afford such a narrow debate over military spending. In the current defense debate Congress has failed to address our nation's *true* security needs, and by allowing scarce dollars to be drained into unnecessary military programs, has precluded a badly needed assault on the nation's domestic problems.

The McGovern Amendment is a small but essential step to begin to redress the imbalance in federal spending priorities. We strongly urge that you support this measure.

Sincerely,

DAVID SAPERSTEIN,
Americans for Democratic Action, Priorities Working Group of the Coalition.
VICKI OTTEN,
Co-Director, Religious Action Center of Reform Judaism, Vice-Chair of the Coalition.

ORGANIZATIONS

The Coalition for a New Foreign and Military Policy unites religious, peace, labor, professional and social action organizations in an effort to develop a peaceful, non-interventionist, humanitarian and open U.S. foreign and military policy. Member organizations include:

American Friends Service Committee.
Americans for Democratic Action.
Argentine Commission for Human Rights.
Business Executives Move for New National Priorities.
Center for International Policy.
Chile Legislative Center.
Church of the Brethren, Washington Office.
Christian Church (Disciples of Christ), Department of Church in Society.
Clergy and Laity Concerned.
Episcopal Peace Fellowship.
Friends Committee on National Legislation.
FRIENDSHIPMENT.
Friends of the Filipino People.
International Longshoremen's and Warehousemen's Union.
Inter-University Committee to Stop Funding War and Militarism.
Jesuit Conference, Office of Social Ministries.
Mennonite Central Committee, Peace Section.
National Association of Social Workers.
National Center to Slash Military Spending.
National Council of Churches.
National Federation of Priests' Councils USA.

Women's International League for Peace and Freedom.
World Federalists Association.
Women Strike for Peace.

Mr. McGOVERN. Madam President, the oil embargo of 1973–74 and concommitant quadrupling of petroleum prices made the connection between energy policy and national security painfully apparent. However, 4 years later our position has not improved. In fact, it has markedly deteriorated. In 1977 the United States imported almost half of its petroleum—more than 20 percent of its total energy supply.

The effects have been devastating. In 1977, the United States accumulated a $44 billion balance-of-payments deficit—far greater than any other year in our history. The largest portion of this deficit is attributable to payments for imported oil. The imbalance of payments is singularly responsible for the precipitous decline in the strength of the dollar. These matters also touch on national defense, as well as the number of missiles that we are accumulating.

One year ago President Carter proposed a series of measures designed to reduce dependence on imported oil. There was considerable doubt at the time the legislation was proposed that the national energy policy, if implemented, would lead to the proposed reductions. What is more, it is highly unlikely that Congress will enact some of the significant features of the plan, as originally called for. Thus, even if energy legislation is passed, but no additional measures are taken, U.S. dependence on imported oil will be greater in 1985 than it was in 1977.

One of the things that I am urging in the transfer amendment is that we allocate additional funds for developing all alternative sources of energy and that we move on that problem with a greater sense of urgency.

Mr. President, everyone agrees that dependence on imported energy significantly undermines both our national security and domestic well-being. I am convinced that it makes far more sense to take action to reduce the necessity for imports than it does to continue to spend billions of dollars to prepare for military contingencies that arise from import dependence.

The energy measures that I have suggested in the transfer amendment will not, of course, lead to total energy self-sufficiency by next year, or even by 1985. They are, however, an essential first step in making an accelerated national commitment to development of renewable energy sources and energy conservation.

Escalating military budgets and emergency measures designed to cope with our dependence on imported oil are making it impossible to undertake the development of renewable energy sources that are essential to achieve real energy self-sufficiency. For example, more than half of the Energy Department's proposed budgetary authority for fiscal year 1979 is not allocated for either energy conservation or production. The single largest item is the $4.4 billion strategic petroleum reserve program, designed to pump 1 billion barrels of oil back into the ground by 1985. The second largest item is the $2.8 billion expenditure for atomic energy defense activities. With such allocations at the top of the list, is it any wonder that only 3 percent of DOE's proposed budgetary authority will be utilized for solar energy purposes?

Most of the programs that I am including in the transfer amendment will have a direct impact upon human welfare as well as energy use. For example, $400 million would be redirected to the low-income weatherization program—more than twice the proposed level.

Madam President, I have no doubt that expenditures of that kind can be efficiently and well spent.

This $400 million would allow for weatherization of an additional 1.5 million homes of those citizens who are hurt the most by rising energy prices. I believe it is more sensible to weatherize homes now than to implement costly emergency payment programs later to help pay for utility bills.

In related areas, this section of the transfer amendment would make funds available to advise middle income homeowners on how to add innovative solar and conservation measures to their homes; to pay for increased Federal purchases of solar equipment, which should quickly help to make this technology economically competitive; and, to involve States and local communities more extensively in the development of solar and energy conservation programs.

In the research, development, and demonstration area, the transfer amendment provides money for programs that are literally starved for funds.

In all due respect to the assurances of the members of the Budget Committee (Mr. MUSKIE and Mr. BELLMON), we have not adequately funded these programs for alternative energy development and for proper insulation of our homes and public buildings.

Initiatives will be made possible for the Office of Small Scale Technology, particularly the appropriate technology small grants program. Another $100 million would be made available for research and development into wind energy, as well as for small scale hydroelectric power.

These are the real possibilities for additional energy that will help us begin the process of reducing our dependence on foreign oil.

Substantial new moneys would be made available to produce energy from biomass and from "passive" solar sources. Each of these is a substantially underutilized clean energy source.

Department of Energy's budget, and that approved by the Budget Committee, is woefully weak in each of these areas, given the potential for gain.

I would like to emphasize that this kind of increased spending on alternative energy, in addition to attacking one of our most debilitating public problems, is basically spendable now. A February Government Accounting Office study done for the Senate Budget Committee on funding levels for solar energy looked at increased spending and concluded that the funds could be reasonably well spent. If that is the case, I think we would be foolish not to go ahead with greater vigor.

STRUCTURAL UNEMPLOYMENT—FULFILLING THE HUMPHREY-HAWKINS MANDATE

Briefly put, I am attempting with this section of my amendment to adequately respond to the problem of structural unemployment.

This is the first budget resolution to fall within the 5-year Humphrey-Hawkins time frame. Many now say Humphrey-Hawkins is without teeth. I disagree. I believe it provides very important policy guidelines and involves an important issue of principle. The budget resolution as it presently stands fails to meet the commitment of Humphrey-Hawkins legislation.

We must, with this resolution, set the course for future positive responses to the goals of the Humphrey-Hawkins measure.

In offering this transfer amendment, I am drawing on a very thoughtful investigation conducted by the House Budget Committee's task force on the distributive impact of budget and economic policies, who spent months studying the long-term outlook for those groups in the population who suffer disproportionately high rates of unemployment. The task force conducted a series of hearings, receiving testimony from the Council of Economic Advisors, the Department of Labor and the Congressional Budget Office. In addition, the Congressional Budget Office contracted with the Urban Institute to do a special study of the extent to which economic growth will mean lower unemployment rates for those groups who suffer most severely from unemployment.

These different lines of inquiry have tended to converge on one basic point:

Even if we achieve low overall rates of unemployment for the population as a whole, a major effort will have to be made in order to meet the needs of the structurally unemployed—a more major effort than that included in this budget.

In her testimony before the task force, Dr. Rivlin, Director of the Congressional Budget Office, underscored this point. She said:

> This (economic) recovery has not affected all population groups equally. Unemployment inequalities have not narrowed substantially in spite of large declines in the aggregate unemployemnt rate. Future declines in either the unemployment rates or unemployment inequalities are most uncertain for nonwhites, particularly nonwhite teenagers. In spite of projected declines in aggregate unemployment (from 7 to 4.8%) and projected growth in aggregate employment (11%) between 1977 and 1981, the employment level and the employment-to-population ratio for nonwhite teenagers may remain constant over the next few years.

Testimony from the Department of Labor shows that the unemployment rates of nonwhites will continue to be at least double those of whites.

And it should be remembered, this is on the assumption of very impressive economic growth throughout the period.

The most recent unemployment data (March 1978) merely confirms what we are expecting.

The House task force, understandably staggered by the implications of continued gross disparities in employment figures among young workers, especially young minority workers, which their study revealed, sought ways to correct these inequities. They requested that the Congressional Budget Office identify feasible levels of expansion that might be undertaken in the various Federal job and training programs. The Congressional Budget Office agreed to respond to the request.

The employment and training figures I am recommending today merely reflect what the Congressional Budget Office has shown to be feasible levels of expansion that we can implement now.

The transfer amendment would allow us to deal much more seriously with the disadvantaged young and old. It does not call for expansion in the 725,000 public service jobs funded under titles II and VI of the CETA program. The main components of the amendment are for title I, for the Youth Employment Demonstration and Project Act (YEDPA), and for older Americans.

Title I is a well-targeted program that provides training and work experience for the structurally unemployed. Title I targets specifically on low-income persons, youth, minorities, and those with less than a high school education—those who comprise the most serious unemployment problem in this country.

Another objective of my amendment is to expand the Youth Employment Demonstration and Project Act programs.

As part of its preparation for the fiscal 1979 budget, the House budget task force requested copies of the Labor Department's zero-based budget submissions to the Office of Management and Budget. These reports show that the Labor Department had requested approval of a more substantial youth program than ultimately emerged from the Office of Management and Budget. My proposal would help meet some of the Labor Department's original goals of 69,000 more youth slots. With 1.6 million teenagers currently unemployed and an additional 1.5 million young persons age 20 to 24 unemployed, it is not a large number.

Madam President, this entire amendment is a very moderate and modest transfer of funds that does not seriously dislocate the budget.

There has been some concern over the ability of the Labor Department to achieve this level of expansion before the end of fiscal 1979. Before offering my amendment, I sought information on this issue. The youth programs only began to enroll young people in January of 1978. However, by the end of March they had over 119,000 persons on board. They could easily reach their target of 157,000 persons by the end of fiscal 1978. An additional 80,000 during the 12 months of fiscal 1979 appears to be well within reason. The evidence is that we could absorb the kind of increased employment stimulus that this amendment calls for within fiscal 1979.

The transfer amendment would also allow an expansion of the Community Service Employment for Older Americans program. This is an excellent program for which the administration plans no expansion during fiscal 1979. Everyone I talk with supports the goals of this program, and urges its expansion. It does not suffer from the problem of "substitution" so frequently cited as a difficulty with public service employment programs. The program is currently up for reauthorization and, I am told, should be reauthorized at levels sufficient to accommodate the expansion I have urged in this amendment.

This part of the transfer amendment is not large. It will raise Federal spending in job and training areas by only 6 percent. By no means will it solve our unemployment problems. However, it will present steady progress in doing what we can.

The Joint Economic Committee recommended no less in its annual report, stating:

> Current Federal manpower training programs are inadequately funded. . . . Such programs should be expanded by about 1 to 1½ billion over the next two years."

RAILROADS AND SURFACE TRANSPORTATION

The third part of the proposed expenditure in the civilian sector goes to the railroads and surface transportation system.

Our railroad system is in chaos. Last year an incredible 8,000 derailments cost the system $600 million. In my State, 30 percent of all the railroad mileage ever constructed has been approved for abandonment, with almost 50 percent potentially eligible for abandonment shortly.

The track beds in our State are so bad that we had to slow the freight trains down to 7 or 8 miles an hour in order to keep them from falling off the track. Twice in the last 2 years we have had trains in South Dakota that fell off the track while they were standing still. This situation exists all over the country.

How many people can remember having a ride on a train anywhere in this country in recent years that was not rough? We have huge rolling stock shortages and dislocations, along with critical deterioration of railbeds.

I have introduced comprehensive legislation to make this system work better. But I believe this budget resolution could help things along considerably by adjusting itself upward modestly, principally to make more funds available for section 803 of the 1976 Railroad Rehabilitation Act. This would cover the cost of State and local assistance programs for rail-line purchase, rehabilitation, maintenance, upgrading, and modernization of railroads and railbeds.

I have heard the argument of the distinguished Senator from Maine that the railroad bureaucracy cannot at this time, or does not want to at this time, to spend more money than is being provided. I respect that argument. But I have talked to the States and believe that in some programatic areas the modest sums freed up by this transfer amendment could be well and quickly spent.

Last year $67 million was appropriated for section 803 of the Railroad Act of 1976, and all of it was expended. Much of this revenue went to States to develop State rail plans which are a prerequisite for States to receive program assistance moneys to acquire and upgrade lines. Last year, the majority of the States only received planning money. This year several States have completed or will be completing their planning and will be

applying for extensive program assistance grants.

However, the Federal Rail Administration has only requested $67 million again this year although it anticipates a substantial increase in applications. Part of the reason for this is that the northeastern States which have participated in the program for the greatest length of time, will be applying for less assistance. However, between 17 and 24 new States are anticipated to request program assistance under this program during fiscal year 1979. Consequently, adequate funding will not be available. Additionally, some of the six States already receiving program assistance moneys may make new applications this year. For example, while South Dakota has now received assistance for part of one line in the eastern part of the State, 50 percent of the State's rail lines are in trouble and over one-third of the existing lines are subject to abandonment in the immediate future. Several States have indicated that they would like to apply for additional moneys under this program if the funds became available.

Mr. President, I sincerely believe that by improving our rail-transportation network, we can open up new markets and expand our economy. In improving this network, we can take a major step toward energy efficiency, reduce our reliance on imported petroleum products, and reduce the trade deficit. We can also create a large number of diverse job opportunities for the unemployed. The need at the State and local level is desperate, and this amendment would help reach that need.

TUITION ASSISTANCE FOR MIDDLE-INCOME FAMILIES

Everyone agrees that something should be done to maintain traditional levels of support for students wishing a college education. The debate revolves around the best method of doing this: tuition tax credits or Federal grants and loans.

Without arguing the merits at this point, let me say that I believe the final response should and will include a considerable expansion of the present system of Federal grants and loans to college students, extending them for the first time to youngsters from families slightly higher in the middle-income range. And this is as it should be, because their parents are paying the bulk of the taxes.

But this first budget resolution does not provide the funds necessary to meet that challenge.

If the College Opportunity Act (S. 2539), which has been reported out of committee, becomes law, the funds in this amendment will be necessary to maintain, and slightly expand, our current system. I have no problem substituting an expenditure for guns to an expenditure for books. We should take this opportunity to do so. In any case, our first and final line of defense will ultimately depend on the intelligence and training of our young people. No nation's internal security is strengthened by pricing thousands of students out of college assistance.

ECONOMIC CONVERSION

This amendment includes a substantial amount of funds to meet the problems caused by the loss of defense contracts, base closings, and other economic dislocations connected with a cut in the defense budget.

I am very conscious of the argument made by some people of good faith that defense cuts may make good sense, but that we cannot afford to disrupt hundreds of communities and dislocate thousands of families. I agree, and could not in good faith offer such a cut unless the same legislation provided protection against just those kinds of situations.

By adding funds primarily but not exclusively to title IX of the Economic Development Act, affected communities could receive a range of benefits, including money for planning, rent subsidies, and relocation costs, as well as longer term kinds of assistance, such as turning closed military bases into industrial parks.

These laws are on the books. We do not need new ones. However, we do need a greater commitment of funds if we are to fully protect communities, and to allow a smooth conversion to a more peacetime-like economy.

CONCLUSION

Finally, I would like to address the fears many have that this transfer amendment is inflationary because it, strictly speaking, enlarges next year's deficit.

First of all, only the narrowest perspective, concerned only with next year's numbers, to the detriment of the economy as a whole, could maintain this posture. Because this is a transfer, there will be no increase in the deficit. Some short-term expenditures will quickly be balanced by other savings.

Also, given the current underutilized capacity of many of our critical industries and labor sectors, this is a good year to add a very small additional stimulus. It is needed.

And there is another compelling reason not to take a numbers only, short-term view of next year's deficit and this transfer amendment. If we do not invest more now in conserving energy, developing our own cheaper and cleaner energy sources, and providing jobs and training for those who need it, future budgets will make this one look splendid. These kinds of investments have to be made, and will only cost more next year, or the year after.

The problems are not going to go away, and I believe the prudent course is to face up to them now, lest we pay dearly later.

The PRESIDING OFFICER. The Senator's 21 minutes have expired.

Mr. McGOVERN. Madam President, I ask unanimous consent that the name of the Senator from Oregon (Mr. MARK O. HATFIELD) be added as a cosponsor of this amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MUSKIE. Madam President, I yield myself 2 minutes, and then I will yield to my good friend from Mississippi (Mr. STENNIS).

I have listened to the statement by the distinguished sponsor of this amendment, Senator McGOVERN. As I listen, I get two impressions which I would like to refute.

The first is that there is no concern in the Budget Committee for the priorities which Senator McGOVERN has described at some length. Let me assure the Senator that I have heard his speech repeated over and over again in the Budget Committee by various Senators, on both sides of the aisle.

Let me assure him, also, that with respect to each of these priorities, the budget resolution before us reflects increases which reflect, in turn, our concern about these priorities.

The third point I make is that the Budget Committee has a responsibility, across the board, for 19 functions of Government, to try to fit all priorities within a spending total that relates to our economic condition. We have the responsibility of splitting up the pie, and we have to be concerned with the rate at which spending can be applied usefully to a problem. And most important, the pie itself is not expanding.

There is an idea that if you are concerned about the condition of our railroad beds, you just throw a lot of money at it. The Budget Committee has pushed for progress in this area ever since it came into existence.

The amount of money we provide in this budget resolution for that purpose is enough, and I suspect more than can be spent efficiently, until national policy identifying the specific railbeds to be improved and the transportation goals to be met are established.

There is another implication in Senator McGOVERN's statement which I refute, and that is the idea that the Budget Committee writes the authorizing legislation.

I listened to his description, for example, of his proposal to increase other spending.

Madam President, the Budget Committee does not decide on the mix of technologies. We provide the overall functional totals. The authorizing committees decide on the mix.

In any case, I do not have the time, unfortunately, to get into all the areas touched upon by Senator McGOVERN specifically.

I ask unanimous consent to have printed in the RECORD, Budget Committee staff memorandums which undertake to respond to the transfer amendment in the light of what the Budget Committee actually did. These memorandums will put these matters in better perspective as part of the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

ARGUMENTS AGAINST SENATOR McGOVERN'S AMENDMENT TO INCREASE BUDGET TARGETS FOR TRANSPORTATION

PURPOSE OF AMENDMENT

To increase the budget targets for transportation by up to $0.5 billion in budget authority and $0.1 billion in outlays to allow for increased funding for national rail rehabilitation.

REASONS TO OPPOSE THE AMENDMENT

1. The Budget Committee targets already include $0.6 billion in both budget authority and outlays above current policy for Mission 2, Rail Transportation. This increase will permit additional Federal investment for the continued rehabilitation of Conrail.

2. The targets are adequate to accommodate the President's request of $279 million for

national rail rehabilitation (excluding Conrail), and it is not clear that even this amount will be fully utilized. It represents the balance of the $600 million authorized by Section 505 of the Railroad Revitalization and Regulatory Reform Act of 1976 (the 4R Act) for Federal equity investment in railroads requiring rehabilitation assistance. In the two years since the 4R Act was enacted, DOT has received only $400 million in applications for these funds and has approved less than $100 million.

3. The 4R Act provides additional financial assistance for rail rehabilitation which is not being used. Section 511 of the Act authorizes Federal loan guarantees of up to $1 billion. However, in two years DOT has received applications for less than $200 million, and has approved less than $50 million.

4. DOT has been very slow in completing its study of the rail rehabilitation problem and providing assistance to improve the nation's rail lines, but a shortage of funds is not the cause of the delay. It is likely that higher funding levels would only add to the backlog of unobligated funds.

ARGUMENTS AGAINST SENATOR MCGOVERN'S TRANSFER AMENDMENT TO INCREASE BUDGET TARGETS FOR EDUCATION

PURPOSE OF AMENDMENT

The amendment would transfer $4.6 billion in budget authority and $1.7 billion in outlays from defense to other spending purposes. The amendment transfers $2.0 billion in budget authority and $0.5 billion in outlays to function 500.

REASONS TO OPPOSE AMENDMENT

The amendment includes $1.3 billion in budget authority and $0.1 billion in outlays to provide for expanded spending for middle income tuition assistance.

The Committee mark for the Higher Education programs did not assume amounts necessary to fund the College Opportunity Act. Instead, the Committee voted to make room in the revenue floor for a modified version of the post-secondary education tuition tax credit portion of the Packwood/Moynihan Bill as reported by the Finance Committee. The Committee mark assumes $0.5 billion for enactment of the tax credit in revenue reductions in FY 1979, with the $0.1 billion refundable portion carried as spending in Function 500. The Committee voted to maintain current law in the existing higher education programs, which means continuation of the $1600 ceiling in BEOGs and no increases in the other programs. The spending proposal was rejected as the tax proposal and the spending bill serve the same purpose and the Congress cannot afford to enact both.

You should oppose the $1.3 billion transferred for middle-income tuition assistance on the grounds that it is inflationary and will most likely result in increased tuition rates. The spending will add to the budget deficit and the first year costs are only a foot in the door. Amounts assumed for the tax credit are sufficient.

The widespread support for middle class college tuition assistance is principally based on the perception that children of middle-income families are being squeezed out of the opportunity for higher education because of their inability to meet its high cost. A recent report of the Bureau of the Census has challenged this contention. The date show that overall enrollment rates for middle-income students were not different than enrollment rates in 1967 and that by last year the trend of declining enrollment of middle-income students had reversed and returned to the higher levels. In addition, growth in family incomes has more than kept pace with increases in tuition costs. For example, during 1967–76, median family income increased by 88.6 percent. Because of this growth in family income, student charges at public institutions decreased from 13.4 to 12.4 percent of median family income, while student charges at private institutions fell from 27.8 percent to 26.1 percent of median family income.

4. Add-ons proposed for employment and training programs will not spend in fiscal 1979. Both CBO and OMB agree that, at a minimum, $400 million of the $1.0 billion appropriated for new youth programs in the Economic Stimulus Appropriation in 1977 will remain unsent by the end of FY 1978. The Committee mark already presumes a $500 million increase over the original appropriation. Much the same is true for the Job Corps program which was doubled in size in fiscal 1978.

ARGUMENTS AGAINST SENATOR MCGOVERN'S AMENDMENT TO INCREASE BUDGET TARGETS FOR ENERGY

PURPOSE OF AMENDMENT

The transfer amendment would increase spending for energy (Function 270) by $2.0 billion for alternative energy research and development.

FUNCTION 270

In this function the Budget Committee is recommending $10.2 billion in budget authority and $10.1 billion in outlays. By mission, the Committee's recommendation is as follows:

	BA	O
Energy supply	3.9	4.8
Energy conservation	1.2	1.0
Emergency preparedness	4.3	3.5
Other energy programs	0.8	0.8
	10.2	10.1

Real growth—The Committee's recommendation for energy provides approximately, 21% real growth, by assuming $1.8 billion in budget authority and $0.9 billion in outlays over current policy, as shown below:

	BA	O
Current law	8.0	9.1
Full discretionary inflation	0.3	0.1
	8.4*	9.2
Real growth	1.8	0.9
	10.2	10.1

*Figure does not add due to rounding.

Increase over President—The Committee's recommendation for the energy function is $0.7 billion in budget authority and $0.2 billion in outlays above the President's request. This request is viewed by many as inadequate, and the Committee has responded accordingly.

Tools other than spending—The McGovern transfer amendment employs only direct spending to promote solar energy technologies and energy conservation. Yet these activities (which just about everyone supports) can be supported with tools other than direct spending. For example, solar technologies can be promoted by loans or loan guarantees. Energy conservation can be achieved by tax policies (such as the proposed Crude Oil Equalization Tax).

Committee does not specify technology mix—The McGovern transfer amendment implies that current energy programs emphasize nuclear and coal technologies at the expense of solar and conservation activities. Regardless of whether this view is correct, the Budget Committee's recommendation does not address the appropriate mix of energy programs. If the authorizing and appropriations committees, within the amounts recommended by the Budget Committee, wish to adjust funding for solar energy and conservation, they are free to do so.

(Mr. METZENBAUM assumed the chair.)

Mr. MUSKIE. Mr. President, I ask unanimous consent—and I understand that this has been cleared by the leadership on both sides—that the vote on the McGovern amendment take place at 2 o'clock or following the debate on the Eagleton amendment, so that the votes can be back to back. I ask unanimous consent at this point that the vote on the McGovern amendment be set for 2 o'clock this afternoon.

Mr. McGOVERN. With the understanding that it will come before the vote on the Eagleton amendment.

Mr. MUSKIE. That is my understanding. That is not in my instruction.

Mr. McGOVERN. With that understanding, I will not object. I think it is important that we vote on this amendment first. I am not concerned about whether it is now or 2 o'clock, so long as we have an opportunity to vote on this amendment in the order in which it was brought up.

Mr. MUSKIE. Let me make that clear.

I add to the unanimous-consent request the further request that any votes ordered in the interim will follow the vote on the McGovern amendment.

The PRESIDING OFFICER. Is there objection?

Mr. STENNIS. Mr. President, reserving the right to object, I ask the Senator this: Suppose the debate on the Eagleton amendment should conclude prior to 2 o'clock. What would be the situation? Could we vote, then, when debate has been completed on both amendments, or would we have to wait until 2 o'clock?

Mr. MUSKIE. I assume, from what I have been told—and I have not had opportunity to discuss this formally with the leadership—that the intention still is to schedule the votes for 2 o'clock, with the vote on the McGovern amendment coming first.

Mr. STENNIS. I have no objection.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MUSKIE. Mr. President, at this time I yield 10 minutes to the distinguished Senator from Mississippi.

Mr. STENNIS. Mr. President, first, I want to say a special word of thanks as well as commendation for the members of the Senate Budget Committee. These men have done much in a relatively short time in bringing some order and arrangement of priorities out of what have been more or less loose, uncertain, and at times chaotic situations that we would get into here in discussion of the annual budget of many hundred billions of dollars.

I certainly commend them highly. They have accomplished more than a great many of us thought they could, due to the fine, dedicated hard work of the chairman, the ranking minority member, and a number of other members of that important committee.

Mr. President, I am here this morning as chairman of the Armed Services Committee which authorizes about 70 percent of the military budget, and also I make some reference to what the appropria-

tions subcommittee has done on this same subject matter.

I think it is rather striking, Mr. President, that the Budget Committee now, with all their preparation and their splendid staff, has come up with a figure that is very close to the President's figure on what he thinks should be the military budget for the year and very close to what the membership of the Armed Services Committee has come up with, and also very close to what the Appropriations Committee thinks is the probable figure with reference to the priorities and the total amount that should be appropriated.

Mr. President, almost 4 months after the convening of this session, with a lot of work having gone into it already last fall by the staffs of these committees, the closeness of the final findings in dollars itself is tremendous argument in favor of the probability of the correctness of these figures.

More especially is this true now, at this stage of this Senate budget resolution, as it starts out on the floor here for the first time with actual figures in it. This is by no means the final appearance that it will have to make before it becomes valid and has the approval of this body. We will be back here May 15, or soon before, and everything will be open then for consideration and debate.

So I respectfully say that now is a time to make an overall rough estimate, so to speak, rather than have the final consideration of these hard figures. The work that has already gone into this matter by those who work on it from year to year to year certainly is prima facie evidence showing the approximate correctness for the Members of the body who have not had the chance to study as those whom I have referred to have.

To get down to the specific figures here, this massive defense budget of $128,400,000,000 as submitted by the President has been increased only $1.4 billion, just a little over 1 percent by the Budget Committee, just a slight amount more by the Armed Services Committee, $1.7 billion, and a similar increase by the Appropriations Committee. That is about as good a flying start as could be made with these estimates.

If there is a judgment of the body to reduce some of these military figures, I certainly will bow to that judgment, but I do not think to reduce the military budget is any argument for putting the money in another part of the budget. We are here to consider these segments in a tentative way, as I have said, but I do not believe it adds strength for putting the money in another part of the budget. I have great respect of the author of this amendment. He is consistent, diligent, honest and hard-working, and you better not discount him. If you do, those of us who handle bills here in the Senate will get into trouble if we do not take him seriously. That is Senator McGovern of South Dakota. I respect him very highly.

But now I respectfully submit that we must move on. We must move on now to the next steps. I hope that this military budget, with all the work that has been done on it, will continue as it is. Let us go and mark up the bill. That is what we will be doing starting tomorrow. This is a budget that has already been described by the Secretary of Defense as austere, and the Secretary of the Navy, a man of unusual ability, says that the austerity in the shipbuilding program for this budget request should not continue beyond this year. That itself shows some pressure for some additional shipbuilding. That is what it is. That is the main reason why the Armed Services Committee voted to make a little above 1 percent increase in the President's total budget. That was to make room for what the committee might do with reference to some increase, a stepping up of the shipbuilding program, with the possibility of laying the groundwork for different types of ships to come.

I have the vote here, if anyone is interested in seeing it, that we took—it was not just a leap in the dark—before our Armed Services Committee. We had rollcall votes on the President's budget and then the proposed increases. One proposal was for an increase—I believe the highest one ran to as much as $6 billion, and that was voted down by a very solid vote. Other smaller decreases were voted down, and we finally established the figure I have already referred to.

I wish to make clear that I hope we can hold this bill even below the President's budget, if reasonably possible. That is our committee recommendation.

Frankly, I do not expect now that can be done. But certainly we are going to try to hold it to the lowest possible dollar or the lowest reasonable dollar, because the time has passed when we can just throw away money right and left. I think our national debt and the deficits, and so forth, clearly give us that unmistakable warning that the days of free spending have to be brought to an end.

So, we want to go back now and work on this matter. We do not object to differences of opinion, but orderly processes are already in motion. A tremendous number of Members' minds have worked on these matters in detail. I think it is in fair shape.

The Senator from South Dakota referred to the fact of NATO increases. If we can find a place to decrease the amount the President recommended, we will certainly do it. He referred to the fact that a few years ago a great number of Senators were in favor of reducing NATO.

I remember when there were 44 Senators who offered a resolution here to very substantially reduce NATO—and 44 is almost half the membership—but that resolution did not pass. Here we are several years later with more support now in the body here, as I interpret it, for NATO than there has ever been since I have been handling these bills as floor manager.

So again with great deference to the author of this amendment, as a member of the Armed Services Committee, I submit these matters here on the basis of their merits and the work in which every member of this committee has actively participated and brought you this judgment. I hope it will not be upset.

I thank the chairman and I yield the floor, Mr. President.

Mr. MUSKIE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. MUSKIE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MUSKIE. I yield 5 minutes to the distinguished Senator from Oklahoma.

Mr. BELLMON. Mr. President, I have listened with great interest to the McGovern proposal, and have already commented to some extent on what the transfer would do. But there are another couple of points I believe need to be made before we vote on this important amendment.

The McGovern proposal to increase funding in the area of education, in my judgment, does not fully take into account the actions of the Budget Committee. Senator McGovern would add an additional $1.6 billion for tuition assistance to middle-income families and for youth unemployment. The Senate Budget Committee has already allowed room in the resolution for a refundable tuition tax credit for middle-income families.

Mr. President, to keep the record straight, I would like to make it clear that I opposed provision for this credit in committee, and it is my intention now to oppose the tax credit when the legislation is before the Senate. But, nevertheless, this resolution which we have before us, and which I support, recognizes the concern which Senator McGovern and others feel about providing funding for tuition assistance to middle-income families.

In addition, the Budget Committee has recommended a shift of $3 billion of the $6 billion requested by the administration for CETA public service jobs to service the needs of the structural unemployed. So this resolution deals with that concern which Senator McGovern has expressed.

Contrary to Senator McGovern's assertion, the resolution includes as much money for existing youth programs as the committee was advised could effectively be expended in fiscal year 1979.

One of the problems we have, Mr. President, is sometimes we push so much money into these programs that it cannot be used effectively, and the result is that in efforts to spend the money the agencies frequently allow waste and abuse to creep in and put the whole program into disrepute. We simply cannot allow that to happen in these areas, and our resolution, we feel, does include as much money as can be effectively expended in fiscal year 1979.

We have checked with CBO and with the Department of Labor on this point and we got the information before the Budget Committee reached its decision.

Naturally, we are all concerned about the levels of youth unemployment. It is one of the great problems we have in our country, and the Budget Committee's recommendation does include, we feel,

what should be the proper level of funding for youth unemployment programs in the maximum range we were told the money could be spent in existing programs.

Now then, Mr. President, in the energy function, the Budget Committee has added 19 percent of growth over fiscal year 1976 in budget authority, and a 65-percent growth in outlays over fiscal year 1976.

Let me repeat that. Our resolution, the resolution before us, which Senator McGOVERN would amend, already includes 19 percent growth in budget authority and 65 percent growth in outlays in the energy function for 1979 over 1978.

This is one of the most dramatic increases included in any function in the budget this year.

The McGovern amendment would add an additional $1.9 billion in budget authority, an additional $1.14 billion in outlays to the energy function, and that would make an increase of 20 percent in budget authority over the committee recommendation and would bring the total increase in projected outlays to a whopping 87 percent over fiscal year 1978.

In my judgment, it is an unreasonable addition to a function we all know is important. But again the Budget Committee has taken the need into account and, we feel, adequately addressed the need in the resolution we have before us.

I feel that information needs to be taken into account by Members before we vote on the McGovern amendment.

Mr. MUSKIE. Mr. President, yesterday in colloquy with the distinguished Senator from Virginia (Mr. HARRY F. BYRD, JR.) I had discussion relative to replenishment of the IDA IV and IDA V, so-called soft lending programs of the World Bank.

In response to questions put by Senator BYRD yesterday I have had a memorandum prepared which outlines the history of IDA IV and IDA V at length, and I think it would be useful information to include in the RECORD.

I ask unanimous consent that that memorandum be included in the RECORD at this point.

There being no objection, the memorandum was ordered to be printed in the RECORD, as follows:

U.S. SENATE,
COMMITTEE ON THE BUDGET,
Washington, D.C., April 24, 1978.

MEMORANDUM

To: Senator Muskie.
From: Committee Staff.
Subject: The Difference between IDA IV and V.

The terms IDA IV and IDA V refer to the fourth and fifth replenishments of the International Development Association (IDA), the soft-loan window of the World Bank. "Replenishment" is the technical term for a multiyear schedule of donations by the wealthier nations (mostly in North America, Europe, and East Asia) which belong to the World Bank and the regional development banks. The total amount, individual country shares, and length of each replenishment are decided at a special negotiating session by designated finance ministry officials. The results of the session are submitted to governments (and their legislatures) for approval; agreements go into effect only afterwards.

The authorization for the U.S. to enter into IDA IV was enacted in 1974 (P.L. 93-373). It committed the U.S. to provide $375 million a year for four years, for a total of $1.5 billion. The other donor countries extended their donations over three years, beginning in 1975. The U.S. insisted, however, on a four-year donation schedule starting in FY 1976. In part, this U.S. decision was due to a desire to prevent overlapping between IDA IV and the final installment of IDA III, due in FY 1975. For IDA IV, the other donor countries completed their contributions on schedule in FY 1977.

During the first two years of IDA IV, FY 1976–77, Congress met the U.S. commitment, but on a delayed basis, as shown on the following table:

(Dollars in millions)

	Enacted	Request
FY 1976 foreign assistance appropriation bill	320	375
FY 1977 foreign assistance appropriation bill	375	430
FY 1977 supplemental appropriation bill	55	55

The final two years' funding for IDA IV ran into trouble in Congress in FY 1978 when the Executive branch negotiated IDA V and asked Congress to begin the Fifth IDA Replenishment (IDA V). The final two installments of IDA IV were due in FY 1978 and FY 1979.

The IDA V replenishment, fully authorized in 1977 (P.L. 95-118), was for the first time formally made subject to subsequent appropriations action. The U.S. share of the $7.3 billion total replenishment was 31 percent, or $2.4 billion. The payments were spread over three years, for an annual request of $800 million. The other donor nations, led by the West Germans, structured the IDA V agreement so that if the U.S. failed to pay its share in any year, the agreement would lapse. For this reason, the Carter Administration has concentrated on securing funds for IDA V at the expense of the remaining installments of IDA IV. Every other donor has completed payment on IDA IV.

During the FY 1978 appropriation process, the Administration requested $1,175 million ($375 million, IDA IV and $800 million, IDA V), but received only $800 million for IDA V. The Senate Committee on Appropriations reported a foreign aid bill which included $950 million for IDA ($150 million IDA IV and $800 million IDA V). On the Senate floor, a threat by Senators Allen and Harry Byrd to offer and debate at length 39 amendments to the Foreign Assistance Appropriation Bill resulted in an agreement to cut the development banks. The two Senators mentioned above, the Committee, and the Leadership agreed to amend and lower the amounts for most of the development banks. For IDA, the decision was made to eliminate the remaining $150 million for IDA IV in the Committee bill. This is the Senate decision Senator Harry Byrd referred to on the floor today.

The floor manager did not strongly resist the elimination of IDA IV from the FY 1978 bill because he hoped to encourage the World Bank to accomplish management reforms and savings. The Inouye Subcommittee has held hearings in this session on the $375 million due to IDA IV in FY 1978 and the final $375 million due this year. Both are part of the President's total FY 1979 request for IDA, which also included the second $800 million for IDA V. If the Subcommittee is satisfied with World Bank management reforms and savings, all of IDA V due this year and at least part of IDA IV is likely to be reported by the Committee in the FY 1979 appropriations bill.

● Mr. METZENBAUM. Mr. President, I support the amendment offered by the Senator from South Dakota.

I do so because I believe that the Senator is correct in pointing out that this Nation cannot afford to pour ever-increasing amounts of money into ever more costly military hardware at the expense of urgently needed domestic programs.

But I also support this amendment because I am convinced that the Department of Defense is one of the least efficient of all of our inefficient Federal bureaucracies. I firmly believe that our Nation can have fully adequate military forces at a cost far below that which the American taxpayer is now required to bear.

The Department of Defense is, for example, required by law to go to the competitive market place to procure the goods and services it requires. Yet in fiscal year 1976, the DOD awarded over $23 billion in contracts without competition. This included the incredible total of 117,000 noncompetitive awards greater than $10,000. Of these, 31,000 exceeded $100,000.

As one who spent much of his life in business, I know that no private firm could possibly operate in this manner and hope to survive in our free market economy. I am certain that the DOD's unbusinesslike approach to procurement must inevitably result in an annual loss of staggering amounts of taxpayer funds. I believe that procurement reform alone could save far more money—and on a continuing basis—than will the amendment before us today.

I note that the Senator from South Dakota has made a number of suggestions about specific items that could be cut from the defense budget. I think that some of his suggestions are well-taken, though I would want to examine others in greater detail before reaching a position on them.

But the main issue, whether we approach it from the point of view of national priorities, of specic programs, or of proper management of public funds, is that we are clearly spending too much for military purposes. We can bring the bill down and we can do so without impairing our national security or that of our allies.

Mr. President, I am aware that this amendment has little chance of passage at this time. I believe, however, that it is an important step in calling public attention once again to the unresolved questions about the true extent of our need to devote scarce resources to the defense budget. I hope that this amendment will reopen the question of how much is enough and I congratulate my colleague from South Dakota for his courage and foresight in bringing this vital issue before the Senate and the American people.●

Mr. MUSKIE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. McGOVERN. Mr. President, I ask

unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 1802

Mr. EAGLETON. Mr. President, I call up my amendment No. 1802 and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Missouri (Mr. EAGLETON) proposs an amendment No. 1802.

Mr. EAGLETON. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 1, line 7, strike out "$443,300,000,000" and insert in lieu thereof "$443,800,000,000".

On page 1, line 11, strike out "$566,100,000,000" and insert in lieu thereof "$564,700,000,000".

On page 2, line 2, strike out "$498,900,000,000" and insert in lieu thereof "$500,100,000,000".

On page 2, line 5, strike out "$55,600,000,000" and insert in lieu thereof "$56,300,000,000".

On page 2, line 7, strike out "$853,800,000,000" and insert in lieu thereof "$854,500,000,000".

On page 2, line 9, strike out "$101,800,000,000" and insert in lieu thereof "$102,500,000,000".

On page 2, line 20, strike out "$129,800,000,000" and insert in lieu thereof "$128,400,000,000".

On page 2, line 21, strike out "$116,600,000,000" and insert in lieu thereof "$117,800,000,000".

Mr. EAGLETON. Mr. President, I ask unanimous consent that Skip Hayes be granted the privileges of the floor during the debate on Senate Concurrent Resolution 80.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. EAGLETON. Mr. President, I will begin my remarks with a quotation.

The elimination of waste, duplication, and outmoded or unjustifiable expenditure items from the Defense budget is a long and arduous undertaking, resisted by special arguments and interests from economic, military, technical and other special groups. There are hundreds of ways, most of them with some merit, for spending billions of dollars on defense; and it is understandable that every critic of this budget will have a strong preference for economy on some expenditures other than those that affect his branch of the service, or his plant, or his community.

But hard decisions must be made. Unneeded facilities or projects must be phased out. The Defense Establishment must be lean and fit, efficient and effective, always adjusting to new opportunities and advances, and planning for the future. The national interest must be weighed against special or local interest; and it is the national interest that calls upon us to cut our losses and cut back those programs in which a very dim promise no longer justifies a very large cost.

President John F. Kennedy spoke those words in his first defense budget message to the Congress 17 years ago. He recognized—as has every President since—that money must be saved in the defense budget, but not at the price of reduced national security. President Kennedy therefore tried to find the kind of balance he mentioned—a budget that would assure a lean and fit defense force, and would eliminate waste, duplication, and outmoded or unjustifiable expenditures.

Things have not changed much in our current perception of how the defense budget should be structured. However, I would remind my colleagues that there is one very significant difference between the defense budget of Kennedy's day, and the defense budget of fiscal 1979. Back in 1961, when the President spoke to Congress, he was discussing a defense budget of $47 billion, which in turn was part of a total Federal budget of $98 billion. Today, the defense budget alone totals some $30 billion more than what it cost to run the entire Government in 1961.

Mr. President, less than 2 weeks ago, President Carter gave a major address on inflation. He stated that "inflation has now become imbedded in the very tissue of our economy. It has resisted the most severe recession in a generation. It persists because all of us—business, labor, farmers, consumer—are caught on a treadmill which none can top alone." I subscribe fully to that view, and to the sentiment expressed by the President that we must do something to get a grip on the inflation which threatens us all, both in our domestic economy and in our international financial and trade dealings.

President Carter made some other very important points in his inflation speech. He said, for example:

Our first and most direct efforts are within government itself. Where government contributes to inflation, that contribution must be lessened. Where government expenditures are too high, that spending must be reduced . . . Wherever government can set an example of restraint and efficiency, it must do so. The budget that I propose for our next fiscal year is both tight and capable of meeting the nation's most pressing needs. The prospective deficit in the budget is as large as we can afford without compromising our hopes for a balanced economic growth and a declining inflation rate.

I applauded that statement. I kept applauding when President Carter went on in his inflation speech to warn that he would use every means at his disposal to head off potential outlay increases being seriously considered by the Congress. He cited defense for special attention. He said:

I will work closely with the Congress, and if necessary I will exercise my veto authority to keep the 1979 budget deficit at or below the limit that I have proposed.

I have been looking forward to taking the President up on his offer to work with us to curb spending growth. I was, therefore, disturbed by the President's proposed 1979 defense budget, which calls for a $10.6 billion increase in budget authority and a $10.2 billion increase in outlays over the comparable figures for 1978. Those figures, which represent almost a 10-percent increase, do not jibe very well with the President's well-remembered campaign pledge to reduce defense spending by $5 to $7 billion.

That campaign pledge obviously was on the President's mind when he submitted the budget. His budget message said:

Consistent with campaign pledges to the American people, it [the defense budget] is $8 billion below the defense budget projected for 1979 by the previous administration.

I prefer to let the figures speak for themselves. This budget represents no cutback and no reduction. In real dollars—those that this Congress appropriates—it represents a $10 billion increase over the highest defense budget that the Congress of the United States ever approved—the 1978 defense budget. The projections of the 1979 defense budget used in President Ford's budget message are a questionable yardstick for comparison. They were not not based on a detailed review of defense needs. Rather, they reflected President Ford's somewhat generalized notions of "where we should be going." Furthermore, these projections reflected major new outlay-increasing initiatives that the Congress never agreed to support and never voted on. These can be found on page 11 of the Ford budget message, which I ask be printed in the RECORD at this point.

There being no objection, the summary was ordered to be printed in the RECORD, as follows:

Outlay increases due to proposed new programs and program increases, 1977–79

(In millions of dollars)

Function and program	Outlay increases 1978	1979
National defense:		
Increase Defense Department purchases in real terms for supplies, fuel, training, recruiting, and other operations and maintenance activities	620	1,118
Increase Defense Department procurement in real terms for essential weapons systems acquisition	606	2,840
Increase Defense Department research, development, test and evaluation for new weapons systems development in real terms to provide for necessary future defense modernization	600	1,222
Increase military construction to permit accelerated modernization of domestic installations	-----	87
Increase funding for military housing to remove deficiencies, such as temporary World War II facilities	57	183
Increase funding for military assistance education and training	8	8
Increase nuclear weapons research and development, nuclear waste management projects, and related activities	88	216
Acquire potential shortage materials for strategic stockpile	183	265
Total	2,162	5,939

Mr. EAGLETON. The major initiatives proposed for fiscal year 1979 totaled some

$6 billion—and Congress never approved them, nor even agreed to support them. To use that kind of a baseline for comparison is simply wrong. We must use the only valid baseline available, and that is the congressional budget for 1978—the amount we appropriated after a careful and detailed review of the President's proposals.

I cannot bring myself to believe that the President's proposed major increase over that 1978 budget is justified. That being the case, I obviously believe that the Budget Committee's proposed further increase of $1.4 billion—which raises the President's $10.6 billion hike to the even higher figure of $12 billion—is even less warranted.

The Budget Committee's report accompanying Senate Concurrent Resolution 80 offers little to challenge this assumption. For example, the narrative implies that more money has been "assumed" in this resolution for new ships not in the budget, but the report never actually says this. There is a lot of idle chatter in the report about "program enhancements", but it is not clear whether it is the President's program that is to be "inhanced" or the current program that is to be enhanced. By taking a budget request that the Congress has been reviewing now for some 3 months, then breaking it down into mission areas different from those recognized in the President's budget, and then failing to show in their report what the President's request was for each mission area, they have made it virtually impossible to tell what their resolution seeks to add or delete. I truly regret that the Budget Committee's report failed to provide the President's budget baseline for each mission category so that at least the numbers would be somewhat recognizable to those of us who have been reviewing the President's budget now for 3 months.

I shall not belabor the point. Suffice it to say that I cannot understand why this resolution should be increasing defense spending, any more than I can understand why President Carter is boosting the defense budget by so much. As a member of the Defense Appropriations Subcommittee I have made a careful preliminary review of the 1979 defense budget. I find it similar in many ways to past defense budgets. It is so similar, as a matter of fact, that it includes numerous items that one House of Congress or the other, one authorizing committee or the other, one appropriations committee or the other, has been attacking for at least the past 2 or 3 years. It seems somewhat incredible that the Defense Department keeps sending these things up so Congress can keep cutting them out. But they do. So, I think it is time we got out our pruning shears and prepared to cut.

It only remains to decide where the cutting shall occur. Of course, this is simply a budget resolution, and we could easily defer decisions on specific cuts until later. But that would be too easy, and it would also allow our critics to charge us with "unspecified" cuts that will "hurt" our defenses. I believe that many of the items requested in the 1979 defense budget are so glaringly unnecessary, so patently flawed, and so totally ridiculous that they leap out as prime candidates for fiscal surgery. I have a long list of 27 such items, and I ask that my list be printed in the RECORD following these remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. EAGLETON. I think that my colleagues will find this list of illustrative cuts interesting, although I am afraid they will not find it very original. Nearly every item on it is one which has been recommended for cutting, at one time or another, by the Senate Armed Services Committee, the Senate Appropriations Committee, the House Appropriations Committee, the House Armed Services Committee, or the General Accounting Office. Agreement on cutting these questionable items—items that do little or nothing to enhance our national security—could produce a budget reduction of as much as $3.8 billion in budget authority and $2.3 billion in outlays for fiscal year 1979. That would actually take us back much closer to the level of actual defense spending for fiscal year 1978, and would not that be good news for inflation-weary taxpayers?

EXHIBIT 1

ILLUSTRATIVE OPERATING REDUCTIONS, FISCAL YEAR 1979 DEFENSE BUDGET

[Dollar amounts in millions]

Item no.	Item	Illustrative reduction: Budget authority	Illustrative reduction: Outlays	Explanation of rationale	References/citations
1	Military personnel on nonappropriated fund (NAF) activities (PX, golf courses, etc.). Eliminate 12,000 military personnel in NAF's; deactivate 8,000 and transfer 4,000 to military units in combat positions.	−$112	−$106	Elimination of military personnel in NAF's was recommended by Senate Appropriations Committee in fiscal year 1978, but was lost in conference. All military personnel would be eliminated and replaced by NAF civilians financed from PX profits.	Last year (fiscal year 1978 bill) Senate recommended transfer of all military personnel in nonappropriated fund activities to military units in combat positions. See pp. 48–58, S. Rept. 95–325, July 1, 1977.
2	Junior enlisted travel benefits	−102	−97	These benefits were eliminated by Congress when last requested in fiscal year 1975. Budget would result in reduced U.S. force readiness overseas, increase in the number of dependents in Europe, thereby complicating civilian evacuation plans in event of war, and be very costly (over $5,000,000,000) over next 5 yr.	See pp. 35–36 of S. Rept. 93–1104, Aug. 16, 1974. This recommendation was sustained in conference and junior travel benefits were deleted.
3	Operation and maintenance (O. & M.) account inflation.	−611	−580	Consistent with Senate actions on DOD budget in fiscal year 1977 and fiscal year 1978. This permits legitimate inflation in stock funds, but deletes anticipated inflation in routine O. & M. purchases (paint, supplies, typewriters, etc.), which Senate has consistently viewed as unjustified since they are unrelated to military readiness and since no other Federal agency is permitted to budget for inflation in these routine operating supplies.	For past 2 yr in fiscal year 1977 and 1978 bills, the Senate recommended deleting all nonreadiness related inflation. See pp. 67–69 of S. Rept. 95–325, July 1, 1977, and pp. 26–31 of S. Rept. 94–1046, July 22, 1976.
4	Retired military compensation	[1] −30	−30	Prohibits collection of retired pay until age of 55 reached. Includes grandfather clause. If no grandfather clause, saving would be $2,500,000,000.	Consistent with thrust of report of President's Commission on Military Compensation (Zwick Commission) April 1978 (see p. 3 of Zwick report). Also see p. 284 of Senate Rept. 95–325, July 1, 1977, which included a general provision limiting "double-dippers."
5	Base operating support (BOS)	[1] −120	−114	Consistent with Senate actions on BOS in fiscal year 1978 bill. Deletes those portions cut by Senate, but restored in conference (−3,570 military man-years; −4,400 civilian man-years) approximate.	See pp. 30–35 of S. Rept. 95–325, July 1, 1977 which recommended BOS cuts. Also see item 4, fiscal year 1979 budget decrement, DOD zero based budget package, which proposed a BOS reduction of $124,000,000. Also see pp. 113–115 and p. 130 of Senate Armed Services Committee Report (S. Rept. 95–129) which recommended a BOS reduction of 3,000 military and 3,700 civilians.
6	Commissary subsidies	−339	−322	Consistent with Senate actions of 2 previous occasions (1976 and 1977), and Senate Appropriations Committee recommendation in fiscal year 1978 bill.	See pp. 35–42 of S. Rept. 95–325, July 1, 1977.
7	Nonappropriated fund transportation, space required subsidy.	−76	−72	Eliminates subsidy for transportation of U.S. goods overseas on space-required basis. This has been recommended 2 yr in a row by the Senate. (This is prohibited by law, but DOD denies it.) PX's would need to increase prices by only 2 percent in order to make up the subsidy.	See pp. 58–59 of S. Rept. 95–325, July 1, 1977. Also see pp. 115–118 of S. Rept. 94–1046, July 22, 1976.
8	Aircraft maintenance personnel	−28	−27	Deletes aircraft maintenance personnel computed by GAO as not required using military services' own personnel standards. Fully consistent with Senate action on fiscal year 1978 appropriations bill—most of which was lost in conference. (2,000 man-years—includes mix of military and civilian.)	See pp. 62–64 of S. Rept. 95–325, July 1, 1977. Also see item 7, fiscal year 1979 budget decremen., DOD zero-based budget package, which proposed a reduction of $61,000,000 for aircraft maintenance personnel.
	Total, illustrative operating reductions	−1,418	−1,348		

[1] Estimate.

EXHIBIT 1—Continued

ILLUSTRATIVE PROCUREMENT AND RESEARCH AND DEVELOPMENT (R. & D.) REDUCTIONS—FISCAL YEAR 1979 DEFENSE BUDGET

[Dollar amounts in millions]

Item No.	Item (quantity)	Budget authority requested	Illustrative reduction	Explanation of rationale	References/citations
9	CTX (22): Procurement	$27.4	−$27.4	Senators Metzenbaum and Goldwater have questioned whether this is being competitively procured. Defer procurement 1 yr pending a competition between vendors.	See House Armed Services Committee Report (H. Rept 95–194) Apr. 7, 1977, p. 41. Also, see House Appropriations Committee Report (H. Rept. 95–451) pp. 241–242.
10	EF–111A (5):				
	Procurement	188.8	−197.6	High cost of system that is being bought in very small quantities makes this not very cost-effective. Defer procurement at least 1 yr pending study of alternatives or ways to improve EF–111A cost-effectiveness. GAO recommended a deferral.	See House Appropriations Committee Report (H. Rept. 95–451) June 21, 1977, which recommended denial of all procurement funding for EF–111 modification kit procurement. Also, see GAO report PSAD–77–25, Feb. 3, 1977, "Status of the EF–111A Electronic Warfare Aircraft Program."
	R. & D	8.8			
	Total	197.6			
11	Patriot:				
	Procurement	67.3	−307.1	Patriot (formerly SAM–D) has consistently been shown to be not cost-effective by GAO and other non-DOD groups. The system is far too expensive and too complicated, and should be eliminated, with "sunk" costs written off.	This is 1st yr procurement funds that are being requested See GAO report PSAD 78–15.
	R. & D	228.4			
	Milcon	11.4			
	Total	307.1			
12	Phalanx close-in weapons system (CIW's) (45):				
	Procurement	109.3	−109.3	Phalanx has never been demonstrated to work properly against realistic targets. Test and evaluation to date has been against targets that do not adequately simulate the threat. Defer procurement funding pending successful demonstration against realistic targets. House Appropriations Committee recommended cancellation 2 yr ago.	See House Appropriations Committee report (H. Rept. 94–517) Sept. 25, 1975, p. 227.
	R. & D	3.9			
	Total	113.2			
13	CH–53E, helicopter (14):				
	Procurement	168.1		Proposed buy of a total of 49 helicopters is not attractive from cost-effectiveness standpoint. It is also questionable if CH–53E is required for its stated mission. GAO did a recent highly critical report on this system.	See GAO report, PSAD 78–27 Mar. 23, 1978, "Is production of the CH–53E Helicopter Warranted?"
	R. & D	15.1			
	Total	183.2			
14	Tacfire (42):				
	Procurement	88.7	−89.4	System is 11 yr behind schedule and does not work, according to GAO. Eliminate and write off all funds spent to date.	Most recent GAO report in draft stage, a briefing provided to Senator Proxmire by GAO strongly recommended redesign cancellation based on shortcomings and vulnerability.
	R. & D	.7			
	Total	89.4			
15	SSN–688 submarine (1):				
	Procurement	458.8	−474.4	Large part of SSN–688 buy is for direct support roles, which GAO has questioned on grounds that more cost-effective systems are available to perform the surveillance function. Defer this buy, and reevaluate entire program buy.	See GAO report PSAD 78–21.
	R. & D	8.0			
	Milcon	7.6			
	Total	474.4			
16	T–AGOS (1) (SURTASS support ship):				
	Procurement	98.0	−98.4	Questionable requirements for the SURTASS surveillance system; it provides peacetime capability only, since ships required to make it work are to be manned by civilians.	
	R. & D	.4			
	Total	98.4			
17	3/E–3A advanced warning and control system (AWACS):				
	Procurement	245.5	−304.1	Additional procurement beyond the AWACS already procured is unwarranted. No more than 10 aircraft can be justified for non-NATO requirements.	See pp. 245–246 of House Appropriations Committee Report H.R. 94–517 of Sept. 25, 1975.
	R. & D	58.6			
	Total	304.1			
18	Ballistic missile defense (BMD) systems technology and advanced technology BMD program: R. & D.	227.5	−100.0	Consistent with previous reductions recommended by Senate Appropriations Committee in view of limitations on deployment in ABM treaty with U.S.S.R. Remaining $127,500,000 is adequate to advance state of the art and maintain technological lead over U.S.S.R. Current ABM treaty limits deployment in United States and U.S.S.R. to only 2 sites.	See p. 250, Senate Appropriations Committee Report (S. Rept. 95–325) July 1, 1977. Also see p. 232, Senate Appropriations Committee Report (S. Rept. 94–1046) July 22, 1976.
19	Seafarer—Extremely low-frequency communications: R. & D.	40.5	−40.5	Senate has consistently vetoed Seafarer money because of lack of justification and environmental hazards of system. Last year, House Appropriations Committee recommended cancellation.	See pp. 301–302, House Appropriations Committee Report (H. Rept. 95–451) June 21, 1977. Also, see pp. 93–94 of Senate Armed Services Committee Report (S. Rept. 95–129) May 10, 1978.
20	LAMPS helicopter (Light airborne multipurpose sensor—used for antisubmarine warfare): R. & D.	124.5	−124.5	Other alternatives for the mission may be more attractive. A GAO report indicates LAMPS can't meet the threat because of sensor limitations. Technical feasibility, as now proposed, is questionable. For most missions, S–3 and P–3 provide the greatest capability presently available or likely for the future.	See GAO report PSAD 78–30.
21	C–5 Airlift squadrons (Rewing): R. & D	37.2	−37.2	Not cost-effective. It is cheaper to buy new Boeing 747's than to rewing C–5 at a cost of $1,000,000,000.	
22	E–4 Advanced airborne command post (AABNCP): R. & D.	32.0	−32.0	There is no justification or need for advanced avionics—current E–4 equipment is more than adequate through mid–1980's.	See House Appropriations Committee Report (H. Rept. 94–1231) p. 29, June 8, 1976.
23	NAVSTAR global positioning system (GPS): R. & D.	129.0	−65.0	Highly questionable requirements. Present OMEGA and LORAN–D systems are adequate for Navy's needs and high cost of NAVSTAR makes it very low in cost-effectiveness.	See GAO report PSAD 77–23 Mar. 2, 1977, "Status of the NAVSTAR Global Positions System."
24	Precision location strike system (PLSS): R. & D.	86.8	−86.8	System is highly complex and not cost effective. It is cheaper to use other techniques to locate and destroy enemy radars and surface-to-air missiles. Senate Armed Services Committee questioned proliferation of PLSS-type systems in Air Force and Army.	See p. 24, Senate Armed Services Committee Report (S. Rept. 94–878) May 14, 1976.

Recap	Amount
R. & D. budget authority reductions	$933.2
Associated R. & D. outlays (75 percent)	700.0
Procurement budget authority reductions (excluding ships)	895.1
Associated outlays (25 percent)	223.8
Procurement of ship reductions—budget authority	556.8
Associated outlays (5 percent)	27.8
Total, procurement and research and development reductions:	
Budget authority	2,385.1
Outlays	951.6

EXHIBIT 1—Continued

SUMMARY TOTALS OF ILLUSTRATIVE DEFENSE BUDGET REDUCTIONS

[Dollar amounts in millions]

	Budget authority	Associated outlays
Illustrative operating account reductions	$1,418.0	$1,348.0
Illustrative procurement and research and development reductions	2,385.1	951.6
Illustrative military construction reductions	19.0	1.0
Grand total, illustrative reductions	3,822.1	2,300.6

POTENTIAL ADDITIONAL REDUCTIONS IN PERSONNEL

Item No.	Item	Rationale	Citations
5	Training personnel	Makes further reductions in accordance with recommendations of Senate Armed Services Committee, which recommended personnel cuts in training as follows: fiscal year 1978 —13,600 military, —900 civilians; fiscal year 1977 —1,300 military, —600 civilians.	Senate Armed Services Committee report (S. Rept. 95-129) pp. 112-115, pp. 130-131, May 10, 1977. Also pp. 123-129 and pp. 153-156 Senate Armed Services Committee report (S. Rept. 94-878) May 14, 1976. Also, see GAO report FPCD 78-13, Feb. 14, 1978 "Opportunities Exist for Substantial Savings in Administration of Military Skill Programs."
26	Headquarters/command personnel	Make further reductions in accordance with recommendations of Senate Armed Services Committee, which recommended personnel cuts in command/headquarters as follows; fiscal year 1978 —400 military, —4,400 civilians; fiscal year 1977 —2,700 civilians.	Senate Armed Services Committee report (S. Rept. 95-129) pp. 112-115 and pp. 130-131, May 10, 1977. Also, pp. 123-129 and pp. 153-156 Senate Armed Services Committee report (S. Rept. 94-878) May 14, 1976.
27	Civilian general reductions	Make further reductions in accordance with recommendations of Senate Armed Services Committee, which recommended cuts in "general schedule" civilians of 10,600 in fiscal year 1978.	Pp. 150-131, Senate Armed Services Committee Report (S. Rept. 95-129) May 10, 1977.

Mr. EAGLETON. Now, a word or two, Mr. President, on these 27 illustrative items. I said in my prepared remarks that this list was not all that terribly original. These are items that, in the most recent years, have been severely criticized by one or all four of the defense-related committees of both Houses. I mean by that the authorizing and the Appropriations Committee of the House and of the Senate. None of these items cuts out military muscle. None of these items, if cut, would constitute unilateral disarmament. They are all patent waste.

Cutting these things would not jeopardize our national security one whit. These are items that are unnecessary frills and unnecessary duplications. I shall not take the time of the Senate to read through each of these, one by one. I do wish that my colleagues would take the time to study this list, either now, during the debate, or perhaps after the debate appears in full in the RECORD.

I think a careful study of these 27 items will show that these need to be deleted just in the name of simple commonsense and efficiency and the prudent spending of the public purse. In fact, to do otherwise would be to fritter away precious Federal dollars at a time when there are so many worthwhile competing demands for dollars for such things as better education, better health, better housing, better transportation—the whole litany of unmet and unfilled domestic needs. We should not be squandering money on these items reflected in this illustrative budget reduction document. To waste money like this is sinful, Mr. President.

I did not prepare this list. Thus, I am free, not being the original author thereof, to compliment my staff, who pulled this together, giving, in the right-hand column, the reference citations of what committee recommended each cut. I think it is as good a compendium of military waste as has ever been put together in concise form.

Some of my colleagues have said, "Oh well, you fellows always talk about cutting the defense budget, but you will never say to cut it. All you do is talk about cuts, but you never specify anything. What is wrong with the spending levels in the defense budget?"

This 11-page, typewritten document, is the answer to that question if it is ever propounded to my colleagues. Here are 27 questionable items. Here are—does Heinz have 57 varieties? Heinz has 57 and Howard Johnson has a number of flavors and Wilson had 14 points and God had 10 commandments. Here are 27 glaring examples of waste.

I think this is as good a time as any for the Senate as a whole to say, "Enough. We are for a strong national defense, we are for whatever it takes to make our country secure against any threats, overt or covert; but we are not in favor of squandering money in the name of defense."

You know, you do not sanctify waste merely by saying it is defense waste. If it is waste, it is just that—waste. And if this waste is permitted to continue, then there will be less dollars available for things I deem important, like funding for the Older Americans Act, for instance, Mr. President.

Our Subcommittee on Aging marked up the Older Americans Act just this morning. Senator KENNEDY and Senator CHAFEE were both there. Each one of us had a certain area where we thought the Government ought to be of some needed and useful assistance to senior citizens in order to enhance the quality of their lives.

Some of us talked about nutrition for the elderly, others spoke of transportation programs for the elderly. Some talked about better in-home services for the elderly.

And the total amount, Mr. President, under the existing budget for the Older Americans Act, for the whole range of services that come under that act in this year's budget, the total amount is $697 million; $697 million is what the present budget says we can afford to spend to enhance and improve the quality of life for America's senior citizens. Contrast that $697 million with this list of $3.8 billion and we can see the great harm that we are doing to our country in perpetrating this kind of waste.

How great it would be for the country if this $3.8 billion of waste could be redirected to meeting needs of America's senior citizens. I think that is the point Senator MCGOVERN has made in his presentation earlier today and that I would underscore in this.

The McGovern amendment may not pass. What we are proposing here today is about as modest as can be. What we are proposing is that the Budget Committee go back to the figures President Carter recommended. Surely they are enough.

As I pointed in my speech, those were not very parsimonious figures. They were certainly not stingy figures from one who said he would cut the budget by $5 billion to $7 billion.

President Carter's budget is up by $10.6 billion in budget authority compared to last year.

So I can say that insofar as defense is concerned, the President has not been a pennypincher in his budget. I think it is the most significant single increase in any function of the entire 1979 budget. In real terms, a larger increase was made in the defense function of the budget than to any other function, with the single exception of the income security function which went up $12.4 billion.

So it cannot be said he is in any way stingy with the spending of Federal money on defense.

If there has been this kind of growth already recommended by the President, why do we have to sweeten the kitty? Especially when we read the Budget Committee report. Defense critics are attacked for not telling where to cut. I now am criticizing those who would add to the defense budget. I do not know where this additional $1.4 billion is going to be spent.

Why do we just have to add this frosting to an already sweetened cake?

So I urge my colleagues that, given the illustrative list we put in the RECORD, that they support my amendment. There

is an abundant number of items on that illustrative list of $3.8 billion where we can save some money.

Mr. President, I reserve the remainder of my time.

Mr. DECONCINI assumed the chair.

Mr. BELLMON. Mr. President, the Senator from South Carolina, who is a member of the Budget Committee and somewhat of an authority on armed services matters, will be here momentarily to discuss this matter.

I wonder if in his absence Senator EAGLETON will yield for a couple of questions I would like to raise?

Mr. EAGLETON. Certainly.

Mr. BELLMON. Let me say first of all, Mr. President, that I agree with some of the points Senator EAGLETON makes in the list of items where he feels savings are possible.

For instance, on page 3, he points out the commissary subsidies which could save $300 million in budget authority and the same amount, roughly, in outlays in fiscal year 1979, and savings even more significant in the out years.

I think the Senator will remember, I have joined in the past in efforts to try to remove this item from the budget. Our problem in the committee is that we do not deal with line items. We simply provide a total figure and hope that the appropriate subcommittee of the Appropriations Committee will go ahead and follow our lead.

So I would join with him on this one item, but some other items he raises cause me trouble.

One of them is the point that is made on page 8, item 21, which deals with the C–5 airlift squadrons.

The Senator seems to take the position here that the Boeing 747 is a suitable substitute or a suitable alternative to the C–5A.

I think the Senator will remember that during the most recent conflict in the Middle East, C–5's were used to bring in large quantities of military hardware, some tanks and heavy artillery pieces.

Is it his feeling the Boeing 747 is a suitable substitute for the C–5A and would the plan be to allow the C–5A to become inoperative?

Mr. EAGLETON. I do not know if it would become inoperative. The Air Force would simply have to stop flying it around so much in peacetime. This is a matter that Senator PROXMIRE has devoted a great deal of attention to. I have listened to him on this subject matter and I think it is an example of where $37 million could be saved without, again, in any way sacrificing our national security.

There are several thousand hours left on the present C–5A wings and, as a consequence, Senator PROXMIRE asked, and I in his stead asked, what is the necessity of this rewing item for $37 million. The C–5 was designed for a wing life of 30,000 hours. It is only good for 8,000. Even that 8,000, if properly conserved in peacetime, could last for many years. I would remind my colleague that there are only two outsize pieces of equipment that only the C–5 can carry. All other items fit in a C–141, and that is an airplane that will last a long time, and has no wing or engine problem that I have ever heard of.

Mr. GOLDWATER. Will the Senator yield?

Mr. EAGLETON. Yes.

Mr. BELLMON. I am glad to yield.

Mr. GOLDWATER. Mr. President, I have not been able to be here during the entire discussion. I came in just as the point was raised relative to the 747 versus the C–5A.

Taking it sort of in back order, it is true, if the wings of the C–5A were not modified, there is about 8,700 hours available. But the wings are being modified. In fact, we are about one-quarter of the way through. It was designed for 30,000 hours.

Getting into comparison between the C–5 and the 747, as far as being a cargo carrier, it is true the 747 cargo version is a very fine freight airplane for what I would call nominal, everyday freight, boxed and ready to go. But it has a very high point of entry into the fuselage that requires lift not available at most bases where the C–5 can be driven into.

In addition to equipment, it can carry complementary troops that are necessary.

It would be possible to move as high as a thousand men in the C–5A, any number of vehicles, and move them as close to the front lines as any aircraft could land, whereas the 747 does not have that strength built into it.

I say to the present floor manager of the bill that, to me, any suggestion that we strike the C–5 improvements would be a mistake, and we would wind up wasting money. I will have more to say on this as we go along.

Mr. EAGLETON. Mr. President, I ask the distinguishel Senator from Arizona if he will yield to me for a question.

Mr. GOLDWATER. I yield.

Mr. EAGLETON. I have put into the RECORD an 11-page document listing 27 items I consider to be wasteful. As the Senator from Arizona came into the Chamber, Senator BELLMON, quite properly, was inquiring about item No. 21 on my list.

Inasmuch as the Senator from Arizona is in the Chamber, I ask him to look at No. 9 on my list.

Mr. GOLDWATER. I am looking at it now.

Mr. EAGLETON. That is the CTX, $27.4 million. If I read correctly the hearing record of the Senate Armed Services Committee, both Senator METZENBAUM and Senator GOLDWATER have questioned the wisdom of this particular item.

Mr. GOLDWATER. I will answer by saying that I cannot say it is a waste. All I can say is that during the arguments between the House and the Senate conferees, during the writeup of the Senate bill, I insisted on language being included that would make the CTX type of aircraft—which we might call a small VIP carrier—subject to competitive flying and competitive bidding, because we have possibly manufacturers in this country who make an airplane that is similar to the Army's, one of which, I think, is the C–12, which is the Beechcraft Co.'s King Air, a very fine airplane.

We later debated this on the floor, and we had the absolute assurance of the chairman of the Armed Services Committee that it was to be competitive bidding. But, lo and behold, when the whole thing was over, there was language written into the House appropriations bill providing that there would be commonality. So the Navy, through practicing commonality, bought the same airplane the Army had and violated the express wishes of the Armed Services Committee, the conferees, and so forth. Whether or not bidding would have produced a cheaper price, I cannot say. The competitive airplanes in that category are all priced—I will not say close together, because I cannot call $50,000 close; but they are in the same general area.

Senator METZENBAUM and I then sued the Navy to make them stop buying this airplane, which they did. Later, the Cessna Aircraft Co., competitors of Beechcraft, entered the suit, after the judge ruled that a Senator does not have the right to intervene.

I congratulate the Senator for having chosen this. In fact, Senator MORGAN is chairman of the subcommittee, and I serve with him as the ranking member; and we are going to hold meetings this week, we hope, on how we can begin to improve our procurement methods.

One of the chief items of interest to both of us is to stop this business of buying off the shelf from a certain manufacturer who happens to have an "in."

The money involved in this is not a gigantic amount, but it is big. The Navy is back this year for about 30 more of the same aircraft, and I can promise my friend from Missouri that I am going to make darn sure this year that the language is plain, simple English, so that even the Navy can understand it.

Mr. EAGLETON. I thank the Senator from Arizona. I believe that is a very full and complete response to my question, and is very useful.

Mr. President, it points up the purpose I am trying to make in this speech and the purpose I am trying to make by the amendment now pending before the Senate.

There are 27 items in this 11-page document. Many are under $100 million. When you are talking about the Defense Department and you mention $100 million, you are talking about their "paper clip" account. Those fellows take $100 million out of the petty cash drawer. They have been known to round-off more than $100 million. We have many items on this list that are under $100 million.

As Senator GOLDWATER has pointed out, he has had some questions on at least one item.

I suppose he would not like to have to vote yes or no on the CTX at this moment, but he has raised some questions about it. I suppose there is no other Member of this body, on a personal basis, who knows more about aviation than does Senator GOLDWATER. Here is one of the items that struck his eyes. There are 26 other items on this list.

They total $3.8 billion. However, instead of offering a $3.8 billion amend-

ment, I said I will just put these in as illustrations, so that a group of reasonable men and women could sit around the room and, after pouring over this document showing illustrative cuts of $3.8 billion, in not a long period of time could come up with $1.4 billion—the amount the Senate Budget Committee is proposing to add above the President's request.

That really tells the story of this whole document.

Item No. 14, $89.4 million; Item 16, $98 million; Item 24, $86 million; Item 22, $32 million.

When you start adding up the 32's, the 69's, and the 98's, you are getting up to big money. Indeed, you can probably add them up and get to more money than we spend on America's senior citizens under the Older Americans Act.

So far as I am concerned, that is what we are debating in this amendment. Would you rather waste $1.4 billion on useless frills, including the commissaries, or would you rather spend that amount of money on needy senior citizens?

Senator BELLMON brought up the commissary item when Senator GOLDWATER came into the Chamber. This one always intrigues me, because the members of the House Defense Appropriations Subcommittee fight more strenuously about this than anything else.

If you cannot have those five commissaries that are down in San Antonio, six in Washington, three in Honolulu, four in Norfolk, and five in San Francisco, the country would crumble, and the Commies would take over. If they cannot get their discount canned goods and their discount wine the country is going to go to pot.

I am always bemused at the conference on the defense appropriations bill. The fiercest debate is usually on the commissary item.

I think that, in many respects, Senator STENNIS sympathizes with the point I am trying to make, but he knows that in many instances it is like talking to a stone wall.

Commissaries are as patriotic as apple pie. I have already said there are six in this metropolitan area. Our Nation's survival depends on the six commissaries in Washington, the four in Norfolk, and so forth, as I said before.

Mr. GOLDWATER. Mr. President, will the Senator yield?

Mr. EAGLETON. I yield.

Mr. GOLDWATER. Because the Senator has touched upon commissaries, I should like to comment on this subject. It is not as easy as the Senator might feel, to just stop a commissary or a PX or the privileges contained therein.

Mr. EAGLETON. Even eliminating the subsidy would not close a commissary. All this says is that a nice, cozy $300 million subsidy is going to be eliminated. Commissaries will be put on the same basis as the post exchanges and save $300 million of the taxpayers' money.

Mr. GOLDWATER. I remind the Senator that before the pay scales were revised a few years ago, before many benefits were improved in the armed services, we were dependent upon promises that had been made many years ago—in fact, it goes down through the whole 200-year history of our military—when pay to the military was totally inadequate, and we had to make promises, such as the ability for the military family to live in cheaper quarters, at cheaper rent, to buy food at cheaper prices.

It was only a few years ago that an amendment was adopted to the authorization bill that called for a scaling-down in the commissary prices of about minus 23 percent; or, to put it another way, a 23-percent discount in 5 years to 13 percent, in view of the change that had been made in the payment to the military.

So this is an item that we owe through promises. It is just like looking at tremendous increases in the cost of retired military—probably $400 million ahead of us if we do not take another man in uniform this afternoon.

But these were promises made by the people of the United States to men and women who want to serve their country in the military.

I hate to add up all the little perks that we in Congress enjoy and the members of the administration enjoy. I am sure it would come to a far greater figure than the men and women in the military enjoy.

I make that comment, because we catch it all the time on the Armed Services Committee, "Why not stop this and stop that," all of which were promises made by the American people to other American people.

Mr. EAGLETON. Mr. President, once again I say to my colleague I think perhaps unwittingly he has helped make the point I am trying to make. I would agree with the Senator if we were debating this issue back in 1935 or even up to 1959. The Senator would be absolutely correct. There used to be a song back in the thirties—I do not remember it firsthand—maybe the Senator does—but there was a song back in the thirties, "Twenty-one Dollars a Day Once A Month."

What that song portrayed was the fact that a buck private in the Army back in the depression era received a generous salary of $21 a month. Thus it was very necessary to try to supplement that meager stipend by such things as commissaries, PX's, medical services, and the like. That was a conscious public policy decision to buttress that very meager pay.

But now, as the Senator from Arizona knows, we have fully comparable pay scales in the military vis-a-vis private industry and vis-a-vis public service. The Senator from Arizona mentioned the pension issue, and that is the biggest ticking time bomb of all. I know the Senator is worried about it, and I know my colleague from Mississippi, Senator STENNIS, is mightily worried about it. The Zwick Commission report, the President's own commission, and this is the sixth study commission of the military pension system within the past 10 years—discuss comparability.

So these goodies, these sweeteners, albeit necessary back in the thirties, are, I think, totally unnecessary in this year of 1978.

Mr. GOLDWATER. Mr. President, will the Senator yield at that point?

Mr. EAGLETON. I yield.

Mr. GOLDWATER. I will admit that the pay for a man in uniform has gone up. I remember when I became a second lieutenant in 1930 I made $115 a month. But I cannot say that the pay to the man in uniform today can be called comparable. We pay a first-class private about $5,000, or a little more. I am not saying that every one of those first-class privates could go out and earn that much or even earn anything. But those of the same age groups start probably at $7,500 to $9,000.

I think, for example, of the great pay, or it seems like great pay, that we now pay our four-star generals, $45,000 a year. That is a lot of money. We get paid $57,000 a year. That is even more. But let us look at a four-star general, say the commander of the Air Force. He is responsible this year for spending $23 billion. One man has prime responsibility to handle an organization that spends $23 billion. And I read in the Wall Street Journal the other day a list of about 12 corporations and their presidents. None of these corporations were doing over $2.5 billion in business; yet the presidents were paid from $450,000 to over $700,000 a year.

So I do not see any comparability at all.

I will admit that the pay in the service is a lot better, and it should be a lot better and maybe it is too high in some cases. We are the highest paid military in the world. But I do not like to hear comparability talk between a man in uniform and a man out. It has gotten so bad, and the Senator knows this, that to get a doctor to go into the military he has to be made a major. I can remember the days when he was made a second lieutenant and if he ever got to be a major that would be like the second coming. But we have to put them in as majors now to get them started. Otherwise, we do not get doctors in the military, and we are short 20 percent throughout the military. It is one of the reasons that as to the CHAMPUS program, another item that is listed as a waste of money, we cannot fulfill the CHAMPUS program, because we do not have the doctors.

So do not use the term "comparable pay." You can compare any pay, but it is not equal to what the boys on the outside are making.

Mr. HOLLINGS. Mr. President, I ask unanimous consent, before the Senator loses the right to the floor, that Andy Hamilton be accorded the privilege of the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. EAGLETON. Mr. President, I do not intend to belabor this debate on the question of comparability, but I do want to put a couple of items in the RECORD.

First of all, let me point out to my colleagues that last year's Senate appropriations report on the defense bill, reported by Mr. STENNIS for Mr. McClellan from the Committee on Appropriations on July 1, 1977, included a comparison

table on page 28. This is not EAGLETON's comparison. This is not a dovish comparison. This is a pretty hawkish comparison made by the staff of Senator STENNIS' subcommittee, headed by Mr. Guy McConnell. He is here today, and he does not consider himself a dove.

But anyway, page 28, table 4, captioned "Comparison of Annual Military and Civilian Compensation and Benefits, October 1976, Pay Scales." And here is what that table does. It is very interesting. It starts with four-star generals and goes right down the line to buck privates. It sets out their pay and their fringe benefits and then compares that to civilians of comparable grades. It also shows the military advantage or disadvantage over the civilian counterpart. I ask that the table be printed at this point in the RECORD.

There being no objection, the table was ordered to be printed in the RECORD as follows:

TABLE 4.—COMPARISON OF ANNUAL MILITARY AND CIVILIAN COMPENSATION AND BENEFITS (OCTOBER 1976 PAY SCALES)[1]

Military grade and title	Military advantage (+) or disadvantage (−)	Military compensation and benefits	Civilian compensation and benefits	Comparable civilian grade
O-10—General	−$17,484	$73,792	$56,308	Executive V.
O-9—Lieutenant general	+12,424	68,732	56,308	GS-18.
O-8—Major general	+6,394	62,702	56,308	GS-17.
O-7—Brigadier general	+2,219	55,481	53,262	GS-16.
O-6—Colonel	−284	45,191	45,475	GS-15.
O-5—Lieutenant colonel	+539	36,317	35,778	GS-14/GS-13.
O-4—Major	+1,840	29,518	27,678	GS-12.
O-3—Captain	+2,700	24,911	22,141	GS-11/GS-10.
O-2—1st lieutenant	+707	19,006	18,299	GS-9/GS-8.
O-1—2d lieutenant	−345	15,441	15,786	GS-7.
W-4/W-3—Chief warrant officer	+10,386	28,685	18,299	GS-9/GS-8.
W-2/W-1—Chief warrant officer	+4,850	20,636	15,786	GS-7.
E-9—Sergeant major	+9,955	25,741	15,786	GS-7.
E-8/E-7—Master sergeant and sergeant 1st class.	+6,099	20,347	14,248	GS-6.
E-6/E-5—Staff sergeant and sergeant.	+2,067	14,890	12,823	GS-5.
E-4—Corporal	+1,246	12,428	11,182	GS-4.
E-3—Private 1st class	+132	9,846	9,714	GS-3.
E-2—Private	+1,040	9,438	8,408	GS-2.
E-1—Private	+1,375	8,678	7,253	GS-1.

[1] Where more than one military or civilian grade is shown, the amount for compensation and benefits is the average of the values shown on tables 2 and 3 for those grades.

Mr. EAGLETON. In every category—four-star general, three-star general, two-star general, one-star general, right on down the line to private, in every category, except two—second lieutenant and colonel—the military person is paid more in salary and benefits than a comparable civilian.

I did not prepare this table. The Committee for Peace Through Law did not prepare this table. This is just the hard data that came out of the Pentagon, as compiled by the Senate Appropriations Committee.

I mentioned the Zwick report. That is one that came out in April, just a few weeks ago. I will not read it all.

But I ask unanimous consent that pages 110, 111, 112, and 113 of the Zwick report be printed at the conclusion of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. EAGLETON. It states just what I have been saying here, that the pay in the military is very comparable and thus I say many of these fringes, such as commissaries, are not necessary. Not that this whole debate rises or falls on that one issue. I submit it as one item, as I stated at the outset, for purely illustrative purposes.

Mr. GOLDWATER. Mr. President, will the Senator yield?

Mr. EAGLETON. I yield.

Mr. GOLDWATER. The Senator wants to determine comparability. I am not going to accept anyone's figures, whether they are figures made up by my own bank or figures made up by a peace through law group. But you have to have something to compare it with.

I mentioned an example. For example, let us get down into the lesser grades. Let us take a tech sergeant who is the chief of maintenance of a fighter squadron, and a fighter squadron can have a couple of billion dollars worth of airplanes. This one man, who will probably be a master sergeant, has responsibility for maintaining more equipment in dollars and cents than the presidents of General Motors and Ford added together. And yet the presidents of General Motors and Ford added together make a lot more money than that master sergeant is going to make, and I am not complaining about it and neither is the master sergeant.

So when you talk about comparability, I do not look on it as just a station in life, or an age, but I look on the responsibility. How many people around this country complain, because the Members of Congress are paid $57,000?

I remember a little corporation that I left to come to this Congress which now pays its president over $100,000 a year, and he is responsible for about $30 to $35 million worth of business, whereas we sit here responsible for $500 billion.

So on the basis of comparability we might be able to argue that we are worth $5 million apiece. I would not agree to that, but if you want to get into an argument of comparability, we can have a ball with it, but we cannot pay income taxes on it.

Mr. EAGLETON. What the Senator is saying is that so far as he is concerned there is no adequate comparability study made by the Pentagon or his bank out in Arizona or by anybody. He just does not believe in this kind of comparison and, therefore, commissaries, like Old Man River, ought to just keep on rolling along.

Let me discuss the Senator's analogy of the master sergeant or the tech sergeant having supervision over a lot of priceless objects. Using that same criteria the museum guards at Florence, Italy, who were not watching when the 13 paintings were stolen ought to be paid more than anybody else in the world, because they are watching some of the most precious and priceless art work in the whole world. Surely there is comparability between museum guards—those who guard factories in Flint, Mich., and those who guard priceless works of art in Florence, Italy.

I just do not follow the Senator's rationale in saying that there is no way to make comparisons.

Mr. GOLDWATER. The Senator just agreed with me. In the instance of somebody stealing some valuable paintings, on that basis I do not know how you can judge what any man's job is worth when you really get down to it.

Mr. EAGLETON. I say to my colleague that we make that judgment every day here in the Senate. We make that judgment when we pass a minimum wage bill. We say what the minimum is that a person should work for. We make that comparison when we run out of the Chamber and say "How much are we worth?" And every few years we go through that embarrassing exercise of voting on just what we are worth.

Mr. GOLDWATER. We never get a direct answer.

Mr. EAGLETON. We made that judgment here in the District of Columbia when we tried to find out how big a police force we need, and how much a police sergeant should make. That does not mean we always make these judgments with infinite wisdom, but it means it is part and parcel of the governmental process. We make value judgments as to what a particular person's endeavors are worth. You surely cannot say that we will make comparisons in all these domestic areas—the RSVP employees, VA doctors, merchant sailors and all kinds of other individuals, but when we get to the military we just cannot make any comparison. I would venture to say that a C-5 or a C-141 pilot is not much different from a 747 or 707 pilot. Nor is the tech sergeant who fixes Air Force sedans much different from the corner garage mechanic. Surely there is some comparability there.

I have said about all I intend to say on this amendment, Mr. President, and I will reserve the remainder of my time.

EXHIBIT 1

EXISTING PAY LEVELS: THE NEED TO RESET THEM

One of the five basic issues we were asked to study was the need for a paysetting standard. To determine whether such a need exists, we chose to examine the concepts underlying the rise of standards, then to

assess the efficacy of existing pay levels. As the following discussion notes, most recent military compensation studies have addressed this issue; their findings differ. We conclude that the existing payline represents a suitable starting point from which to move toward a more efficient and responsive pay system.

COMPENSATION CONCEPTS

Unfailingly, military and Civil Service compensation studies begin with discussions of "comparability." This term is described variously as a principle, an approach, a process, and a model. The only term with more interpretations than "comparability" and "competitiveness," as the Defense Manpower Commission pointed out, is "equity." All studies seem to agree that comparability has to do with using wage surveys of other workers as a guide to setting the pay of a particular work force. But beyond that common frame of reference the meanings of comparability diverge.

Federal civilian pay is now set and adjusted according to comparability. The law states:

It is the policy of Congress that Federal pay-fixing be based on the principles that—

(1) there be equal pay for substantially equal work, and pay distinctions be maintained in keeping with work and performance distinctions; and

(2) Federal pay rates be comparable with private-enterprise pay rates for the same levels of work.

Pay levels for the several Federal statutory pay systems shall be interrelated, and pay levels shall be set and adjusted in accordance with these principles.

The following excerpt from a House of Representatives study on the comparability law provides some insight into why comparability is useful.

Adoption of the principle of comparability will assure equity for the Federal employee with his equals throughout the national economy . . . enable the Government to compete fairly with private firms for qualified personnel . . . and provide at last a logical and factual standard for setting Federal salaries.

Hence, comparability is discussed as a principle designed to achieve three ends: equity, competitive pay, and credibility. It is in achieving the second goal, competitiveness, that there has been much conflict. While comparability is generally thought of as having to do with setting pay through wage surveys, competitiveness is considered to emphasize setting pay according to labor market conditions, supply and demand. The two have been set up as competing principles.

But there are hints, besides those from the House study, that persons who adhere to the principle of comparability do so because they feel it helps achieve competitive compensation levels. Hence, the two concepts may well be complementary rather than conflicting. Both the Defense Manpower Commission (DMC) and the draft report of the Third QRMC espoused competitive pay levels as the desired product of comparability:

More importantly, this choice (comparability) will insure that military pay remains competitive with pay in the private sector, for without such competition a volunteer armed force would not be able to attract and retain the numbers and quality of personnel required.

The dominant principle is that compensation should be competitive. It should be adequate to attract and retain the desired quantity and quality of personnel, but it should not be more than is necessary for this purpose. In short, a compensation system should be efficient. Comparability, broadly defined, may be one means toward this end, but it is not an end in itself independent of manpower supply considerations. The (Manpower) Commission accepts the use of comparability as a guide to judgment, but not its present usage.

The Commission believes the lines of debate between the competitive and the comparability principles are not as rigid as they appear. Clearly, military compensation, like any Government expenditure, should be adequate to accomplish its purpose yet not waste the taxpayers' money. Advocates of both the comparability and competitive principles appear to have that goal at heart. Paying military personnel less than necessary is harmful to national security; paying more is wasteful. Unfair, inequitable, and capricious compensation policies can endanger achieving national security goals. Furthermore, even an equitable policy does not prevent waste. A perfectly efficient compensation scheme can generate its own inefficiency by its sheer administrative complexity. In the end, the system must be credible.

The following two points appear to be the essence of the debate between comparability and competitiveness.

OVERPAYMENT OF CERTAIN PERSONNEL

The use of a comparability standard, which sets and adjusts military pay according to the pay levels of nonmilitary employees, carries with it the potential for overpaying those military personnel who could be attracted and retained at a lower wage rate than that determined by the comparability measurement.

The wage rates necessary to attract and retain the required number and quality of manpower are determined not only by prevailing wage rates in other sectors, but also by unemployment rates, qualitative and quantitative military requirements, the conditions of service, and other pay and nonpay characteristics of military service. In short, a comparability process measures only one of many determinants of an efficient pay schedule and may result, therefore, in overpayment of certain personnel.

If nonpay factors strongly favor the military, a comparably set wage will cause lines to form at recruiting stations. If nonpay factors favor civilian employment, the comparably set wage will result in a decline in the quality of those who serve; in the extreme instance, it may result in recruiting and retention shortfalls. While comparability of total compensation (including benefits and retirement) comes a step closer to the ideal compensation by including two more factors in the survey, even that process is less than perfect. Significant nonpay attributes of military and civilian employment (the other conditions of service) are still lost in the comparisons.

Mr. HOLLINGS. Mr. President, do we have a time agreement?

Mr. MUSKIE. Yes; under the Budget Act there is a time limitation of 2 hours on amendments, may I say to the Senator. I will be happy to yield.

Mr. HOLLINGS. Will the Senator yield at this point, Mr. President?

Mr. MUSKIE. I will yield the time reserved to the opponents of the amendment to the distinguished Senator so that he may manage the time, and I know the distinguished Senator from Mississippi would like some time.

Mr. STENNIS. Let the Senator go first.

The PRESIDING OFFICER. The Senator from South Carolina.

Mr. HOLLINGS. I think, Mr. President, in an informal way we should join issue with our colleague's contention in his amendment, our colleague from Missouri.

I am sorry I had not been able to review the entire statement, but Senator EAGLETON starts off with a quote from our great friend, President John F. Kennedy, and then he says, "Things have not changed much in our current perception of how the defense budget should be structured."

Of course, that was 17 years ago. He was quoting President Kennedy, and he said it had not changed much, and I take sharp issue with that.

I happen to have been here 12 years ago, and I remember, I say to the distinguished Senator from Arizona now presiding (Mr. DECONCINI), we took up the defense budget under the distinguished Senator from Georgia's leadership. I say everything in admiration and affection for Dick Russell. He was sort of my idol. So there is no disparagement when I refer to the actual fact, and that is, that if you go back to 1967, that defense budget was taken up on a Friday; everyone was gone, and we finished it by about 2 or 3 o'clock, and hardly anyone was on the floor.

There were very, very few amendments, and I know the Senator from Mississippi would remember well how that was all drawn up on a yellow pad, and he would write everything on there, every explanation, and he could just give it from memory and go right down the items. Of course, in that day and time, in President Kennedy's day, when we were starting into Vietnam, and then with President Johnson and then President Nixon, of course, it would be outrageous to start cutting your defense budget in a time of war.

However, beginning in 1968–69 and, more particularly, in 1970, after the trauma of the sixties, which both the Senator from Missouri and we all experienced, there was veritably a rash and an outbreak of all kinds of amendments. The defense budget would come along and everybody would have his so-called tank or plane or flamethrower, whatever it was, he had his particular cut, and Peace through Law, and all the rest of them hit the floor in avalanches, cutting the defense budget to ribbons, hither and yon.

By that time I had gained a seat on the Appropriations Committee and I began to look at the overall debate about defense, and actually beginning in 1970 we started facing the defense budget in the light of the guerrilla warfare we would experience out on the floor of the Senate. We knew leading Senators were going to grab us on one piece of equipment or another. We were going to have to explain this, that, or everything else, and we became very sensitive, very concerned, and very alert to wasteful spending within the defense budget, even though we favored defense.

On balance we systematically, almost from 1970 down to 1976, cut about $5 billion each year out of the national defense budget—and that was at a time when our chairman was Senator McClellan, and before him Senator Ellender—each year we were cutting back. Senator Ellender, incidentally, was not a pro-defense budgeteer. You had to explain it to him, and if you had a good explanation for a cut in defense, he would go

along with you as the chairman of that Defense Appropriations Subcommittee.

My point is I am trying to bring into focus a tremendous change that has come about. Let us look at those actual figures before we look at the real treatment being given by the Budget Committee.

For example, aside from Vietnam spending, looking at what we call our baseline forces, we can compare how they fared in dollars and cents during the period 1962 to 1969, and 1970 to 1977, when we started cutting. Looking at then President Kennedy's days in 1962, to 1969, Army procurement—and these are the baseline forces in constant 1978 dollars—was $30.243 billion—and this is a budget thing, and I hope no one gets bored, I hope they are impressed by figures, because that is what we have toyed with for veritably 6 weeks, day and night, up in that Budget Committee.

Army procurement then was $30.243 billion, but in comparison, for that same period or rather for the same 8-year period from 1970 to 1977, we only appropriated $16.602 billion, or there was an actual cut during that period of some $13.641 billion or a cut of 45 percent; there was that big a change. That budget was decreased.

You get a Senator, and a very responsible Senator, coming along and saying there had not been any change, saying that just willy-nilly the military-industrial complex gets more every year. Somehow he relies on an old, broken record.

Let me say there have been all kinds of change conscientiously done by the Senate as a body, and this is what the U.S. Senate did in procurement of missiles and aircraft for the Navy. From 1962 to 1969 it appropriated $34.760 billion. But during the 1970–77 period the figure was $30.163 billion in constant dollars, or a cut over that 8-year period of $4.597 billion or again a 13-percent reduction.

For shipbuilding, over that 8-year Kennedy-Johnson period the Senator mentioned, saying there had been no change, we provided $36.485 billion, measured in 1978 dollars. But in the period 1970 to 1977 we reduced that each year, cutting back each year on various items, to $29.703 billion, or a reduction of $7.782 billion, a minus of 21 percent in shipbuilding.

Aircraft, Air Force, $25.432 billion during the 1962 to 1969 period, but from 1970 to 1977 it was $21.966 billion, for a reduction of $3.466 billion, or minus 14 percent.

The total appropriations for general purpose forces procurement during that period of 1962 to 1969 was $149.521 billion, but in 1970 to 1977, in constant 1978 dollars, we were down to $122.496 billion, a reduction, overall, of some $27 billion, or 18 percent in the last 7 years.

The average shipbuilding budget—I am going to address some other remarks toward shipbuilding when we conclude here, because we did get some increases over what the President had asked for in the shipbuilding area—but the average annual shipbuilding budget for 1962 to 1967 was $5.6 billion, for 1968 to 1969 was $1.9 billion, and for 1970 to 1977 was $3.7 billion. So we had, during the 1968-to-1967 period, from the previous average, a shortfall of some $22.6 billion. That is a $22.6 billion reduction there.

I want to emphasize the cost of weaponry, incidentally, as we try to replace it, which will be in my prepared remarks. And I ask unanimous consent that the table from which I have just recited be printed in the RECORD at this point.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

GENERAL PURPOSE FORCES PROCUREMENT (BASELINE FORCES) 1962–77 BUDGET AUTHORITY IN CONSTANT 1978 DOLLARS [1]

	1962–69	1970–77	Difference	Percent change
Army procurement	30,243	16,602	−13,641	−45
Missiles and aircraft, Navy	34,760	30,163	−4,597	−13
Shipbuilding [2]	37,485	29,703	−7,782	−21
Aircraft, Air Force	25,432	21,966	−3,466	−14
Total, general purpose forces (program 2)	149,521	122,496	−27,025	−18

[1] Baseline forces exclude forces added for Vietnam. Procurement for baseline forces excludes procurement for the Vietnam war.

[2] Average annual shipbuilding budgets: 1962–67, $5,600,000,000; 1968–69, $1,900,000,000; 1970–77, $3,700,000,000. 1968–77 shortfall, based on pre-Vietnam average: $22,600,000,000 (in 1978 dollars).

Source: Compiled from data supplied by Office of the Assistant Secretary of Defense, Comptroller.

Mr. HOLLINGS. Now, Mr. President, at the same time, all of us Senators should realize that the equipment that we are buying for our forces today costs significantly more than it did in the 1960's. In constant dollars F–14's cost three times as much as F–4's, XM–1 tanks cost twice as much as the M–60 series tanks, and naval vessels cost up to five times as much as the units they are now replacing. Even the low-cost option like the F–16 costs more than the weapons of the 1960's. So I want to correct the impression and idea floating around that somehow it has just been business as usual, willy-nilly, we just ipso facto take that defense budget and increase it.

What really occurred was the institution of the Budget Committee process. I think Senator MUSKIE and the budget process deserve not just the respect but the support of the entire Senate on this particular point, because what we have done under this process is to force the Armed Services Committee and the Defense Appropriations Subcommittee to look in a very reflective fashion over exactly what they intend to appropriate for that year at the very beginning of the year, so that it is targeted, it is bracketed, and we know what the figure is and where we are headed.

Incidentally, under the leadership of the Senator from Florida (Mr. CHILES) we initiated what we might call the mission budget approach. Instead of just the boring, input-oriented figures, we have examined—and I have traveled to many of these installations—take CINPAC, out in Honolulu, for example, and ask just exactly what the mission is there, and what would be the result of a larger attack, a smaller attack, a nuclear attack, and otherwise, and what would be the weaponry required, whether it will or will not go through the Panama Canal, and all those things.

Under the mission approach, we have produced an output-oriented budget. We have reduced it down to a common denominator, whereby the Armed Services Committee, the Appropriations Committee, and then hopefully the Senate itself will be speaking the same language, we will be using the same vocabulary and the same approaches, so that there will not be any slip between the cup and the lip.

Let me say a word or two about the committee composition, because I cannot start this discussion off with respect to just the Armed Services Committee, which has always had an outstanding composition under the various individual chairmen, but particularly under Senator STENNIS has it become what I call a balanced committee.

At lunch a while ago I said "balanced," and one of the colleagues said, "Balanced? Look at how many conservatives it has; with those old blue-nosed conservatives against us liberals we cannot blah, blah, blah," and we started off about conservatives against liberals.

It is interesting to note that last year the Armed Services Committee unanimously agreed on its armed services defense bill, and it is even more interesting again, whether you are conservative, liberal, Southern, Northern, Western, or whether you are prodefense or antidefense, that the Armed Services Appropriations Subcommittee unanimously reported out a figure that the Appropriations Committee as a whole agreed to. So I believe we have gotten rid of some of these shibboleths that they are totally Babylonian in their view, that they will just spend the country blind.

I think Senator STENNIS has called the hand on a lot of weaponry. For instance, he supported the abolition of the B–1. So it is not just a matter of a mind set with respect to the committees and a mind set with respect to the Senate.

I have a prepared statement but I can get into that later in the debate. Right now I want to bring out what has been projected by nothing less than the most liberal, if that is the way we want to approach things, customarily the most liberal of organizations, the Brookings Institution. Brookings, in January of last year, 1977—and this is what worried me. Do not mention to me about President Carter's pledges. I was trying to correct President Carter's pledges in the middle of the last campaign. And incidentally, on the second debate, we had a little meeting up here on the second floor. The campaign was not going good, and I advise Charlie Kirbo, "You better get Schlesinger and a few others together on the matter of defense and go down and get Jimmy at Plains, Ga., or he is going to bust his britches about this business of national defense, because he is going down one road and the people of America are going to have to go down a different road,"—anyway, the Brookings Institution found that "the budget implications cannot be measured precisely, but some real growth in the defense budget probably will be necessary."

This is quoted from "Setting National Priorities: The 1978 Budget" by Joseph Pechman; and the book has a particular chapter in which Barry Blechman goes into the hows and whys of that kind of how real growth is going to be needed.

Now, Mr. President, let us jump to the pledge made and what actually occurred. If you will remember, President Carter last year in May, almost a year ago, went to the NATO Conference, and he got together with the heads of state and said, "I wish we could find some way out of our NATO trouble." They were getting nervous over the accord. We had been to Vienna with MBFR, discussing the mutual, balanced force reductions, and the Warsaw Pact countries just come headlong along, building, building, building. We go to a force reduction conference and the action is otherwise.

So at the NATO Conference, the President said, "Let us go for 3 percent. Can we agree on that?"

They agreed on a 3-percent real growth in the overall defense budget. There was a question raised in our Budget Committee proceedings as to whether the reference was merely to the NATO counterpart, or the entire defense budget.

Secretary Harold Brown has answered that this pertains to the entire defense budget.

Well, you can give me some of the figures, but even with the strained interpretation of funding for the B-1, the President's figure that he uses himself is only 2.3 percent, rather than 3 percent growth; but the Congressional Budget Office—and I ask unanimous consent to have printed in the RECORD at this point, Mr. President, statements entitled "Real Growth or Decline by Major Mission in the President's Fiscal Year 1979 Budget Request for Department of Defense, Military Budget Function 051" as esimated by both the President and the Congressional Budget Office, so there will be no mistake about the CBO's assumptions and the President's assumptions.

There being no objection, the tables were ordered to be printed in the RECORD, as follows:

REAL GROWTH OR DECLINE BY MAJOR MISSION IN THE PRESIDENT'S FISCAL YEAR 1979 BUDGET REQUEST FOR DEPARTMENT OF DEFENSE MILITARY BUDGET FUNCTION 051: (TOTAL BUDGET)—ADMINISTRATION ECONOMIC ASSUMPTIONS

[Dollars in millions]

	President's fiscal year 1979 budget		Real growth or decline (−)	
	No growth [1]	Actual request	Amount	Percent
Strategic forces:				
Offensive forces	$8,659	$7,312	−$1,347	−15.6
Defensive forces	619	702	83	13.4
Control and surveillance	1,242	1,388	146	11.8
Total	10,520	9,403	−1,117	−10.6
General purpose forces:				
Ground forces	14,187	15,283	1,096	7.7
Naval forces	12,645	12,164	−481	−3.8
Tactical air forces	14,052	14,195	143	1.0
Mobility forces	1,647	1,606	−41	−2.5
Total	42,532	43,247	716	1.7
Auxiliary forces	15,122	16,242	1,120	7.4
Mission support forces	10,418	11,374	956	9.2
Central support forces	29,434	30,861	1,427	4.8
Miscellaneous	14,681	14,440	−241	−1.6
Total function 051	122,707	125,567	2,860	2.3

[1] By "no growth" is meant current—that is, fiscal year 1978—policy projections using the administration's economic assumptions for growth in wages and prices.

Note: Details may not add to totals because of rounding.

REAL GROWTH OR DECLINE BY MAJOR MISSION IN THE PRESIDENT'S FISCAL YEAR 1979 BUDGET REQUEST FOR DEPARTMENT OF DEFENSE MILITARY BUDGET FUNCTION 051 (TOTAL BUDGET)—FIRST CONCURRENT BUDGET RESOLUTION ASSUMPTIONS

[Dollars in millions]

	President's fiscal year 1979 budget		Real growth or decline (−)	
	No growth [1]	Actual request	Amount	Percent
Strategic forces:				
Offensive forces	8,725	7,312	−1,413	−16.2
Defensive forces	622	702	80	12.8
Control and surveillance	1,249	1,388	139	11.1
Total	10,596	9,403	−1,194	−11.3
General purpose forces:				
Ground forces	14,260	15,283	1,023	7.2
Naval forces	12,750	12,164	−586	−4.6
Tactical air forces	14,122	14,195	73	.5
Mobility forces	1,653	1,606	−47	−2.9
Total	42,785	43,247	462	1.1
Auxiliary forces	15,225	16,242	1,017	6.7
Mission support forces	10,457	11,374	917	8.8
Central support forces	29,575	30,861	1,286	4.3
Miscellaneous	14,732	14,440	−292	−2.0
Total function 051	123,371	125,567	2,196	1.8

[1] By "no growth" is meant current—that is, fiscal year 1978—policy projections using the economic assumptions for growth in wages and prices developed by CBO for the First Concurrent Resolution on the fiscal year 1979 budget.

Note: Details may not add to totals because of rounding.

Mr. HOLLINGS. The Congressional Budget Office estimated that real growth in the President's request is 1.8 percent. So the President did not include therein the entire 3-percent growth he had received in a mutual pledge from the other heads of state at the NATO Conference.

And we watch and see the Navy go down. For example during the period the Senator from Missouri was talking, about, way back in 1964—even subsequent to Kennedy's days—we had 917 vessels in the Navy. Now the Indian Ocean and all of those straits have become far more important with the oil crisis—all the oceans have become important, with the Soviets moving in and almost taking over the Mediterranean. Instead of there being no change in the Navy, we have come down in each year. In 1976 we had about 476 vessels, in 1977 about 470, and now in 1978 the actual figure is 462 vessels, citing, of course, the Chief of Naval Operations' historical budget data, March 1977.

We are going out of business. We have not rebuilt.

Along with Senator STENNIS I held hearings in the Defense Appropriations Subcommittee and I was impressed with Secretary Alexander and General Rogers, our Chief of Staff, about how we were replacing ammunition, how we were replacing tanks, how we were replacing the material used not just in Vietnam. I was in on that last particular $500 million and I favored it at that time, the last gasp for the troops in Saigon, to put in the $500 million, we just took from the stores. That is what we ended up doing that particular time.

What we want to do now is to replace the ammunition, material, and weaponry also transferred to our good friend Israel in the Yom Kippur war. So we are now beginning to replace.

I can go into each detail and each mission. The fact is we are just barely holding the line in both the Air Force and the Army. What really occurred in the add-ons from the figures used by the President's budget but somewhat less, if you please, Mr. President, than what was asked for by both the Armed Services and the Senate Appropriations Committee? We decreased the amounts sought by the appropriations and the Armed Services Committee by some $300 million in budget authority and $1.9 billion in outlays.

Since the Senator is directing his remarks and the amendment to the President's figure, we increased the President's figure in budget authority $1.4 billion. But I hasten to say that actually we decreased the outlays $1.2 billion.

There is no trickery here. There was a reassessment and reaccounting that I went into in my prepared statement. Perhaps the Senator did not sit and have it explained to him as I did on the Budget Committee. He may not have had the opportunity. We are not saying it is a real cut. But due to a slowdown in the rate of procurement dollars that were spent and the actual figures the President used in the reassessment, we came up with a lesser figure. We can talk about that.

Before I yield at this point and go into some of the other matters, let me talk about two things: One is the matter of pay.

This Senator, from the beginning of time, has been working on these defense budgets, trying my dead-level best to instill and install credibility into every facet of our defenses so that we would not have these guerrilla attacks each year and this misunderstanding by the public.

I heard part of the discussion between the distinguished Senators from Arizona

and Missouri. On comparability what really occurred is that we obtained it in 1967 when my former colleague, Mendell Rivers, was chairman of the House Armed Services Committee. Then in 1970 and 1971, with the voluntary army, we heaped upon the Army pay scale certain additional benefits. Some of the charts used by the Senator were also used by the Department of Defense Appropriations Subcommittee—and they were also reflected in U.S. News and World Report—and showed that at one time colonels and generals were getting more pay than Senators before their increase.

I play tennis with a colonel friend and I said, "Look at your pay and benefits and look at what I am getting paid."

Now our pay has been increased and the Army has held tight.

I opposed the 1-percent kicker which allowed the military and Federal civilians in retirement to increase their pensions faster than the rate of growth in inflation, and we eliminated that. I tried to cut back the subsidy to commissaries by putting them on the same basis as our post exchanges. But in essence, I would say that military pay is fair. It is not too much. There is only one reconciliation that will have to be made and that is in respect to the military pensions. They cannot just all retire in 20 years and make no contribution whatever. I suppose there will be about a $30 billion annual amount to pay for military pensions in the year 2000.

The Defense Appropriations Subcommittee and the Budget Committee are looking into that matter very thoroughly.

Next is my real point in defense of the budget process in the committee and what is being presented here. I have probably worked with it as intimately as anybody, but all of us worked on it, Senator DOMENICI, Senator BELLMON, as well as Senator MUSKIE. We received information from Senators ABOUREZK, MAGNUSON, ALLEN, and CRANSTON. We do not have a one-sided Budget Committee. We got into all the little facets.

Last year we went into the intelligence costs; the staff did so again this year. We are glad the Intelligence Committee is handling this aspect of the budget. We can find out what the real costs are, and they are not just scattered through the entire budget.

We went into personnel costs. We went into whether to have power projection forces or just sea control forces in the Navy's various missions; whether we were headed to the large carrier or to the V/Stol carrier, and all the other things.

This budget, I respectfully submit, is not the same old thing, as the Senator said in his statement, that since the Kennedy days nothing has changed. There has been a remarkable change. The bringing of this particular defense budget to the floor of the Senate represents a lot of work with numerous amendments. Evenings and afternoons were spent on trying to mark up this budget.

Mr. President, I shall include in the RECORD at this point the complete text of my prepared remarks:

Mr. President , I want to discuss the action of the Senate Budget Committee on the National Defense budget in preparing the First Concurrent Resolution on the Budget for fiscal year 1979. I would like to begin by taking notice of the fact that the President gave us a fairly tight federal budget to work with. Under our able chairman, the Committee made a few changes here and there. By and large we accepted the President's priorities, and we supported his efforts to exercise restraint while still taking care of our most pressing national priorities.

One important area where we felt the President's budget was too tight was the area of National Defense. We increased budget authority by $1.4 billion over his recommendation. While the Committee's recommendation on defense outlays is $1.2 billion below the President's budget, the reduction is entirely technical in nature. The Congressional budget office has estimated that the fiscal year outlays in defense will be $1.9 billion less than estimated by the President, due to a slowdown in the rate at which procurement dollars are spent. Setting aside this technical reestimate the Senate Budget Committee is recommending an increase in outlays of $700 million. My colleagues should be aware that the amounts we have recommended, while higher than the President's budget, nevertheless are below the amounts requested by the Appropriations and Armed Services Committees in their March 15 reports. These committees requested $130.1 billion in BA and $118.5 billion in outlays. The First Concurrent Resolution is below these amounts by $300 million in BA and $1.9 billion in outlays.

Why did we take the step of adding funds for defense in a year when, like most recent years, we face inflation, more unemployed than at any time since before World War II, and many unmet social needs? After all, inflation is real, and now. Unemployment is real, and now. Decaying, bankrupt cities are all around us. The list of present evils is long. And defense spending is preparedness for some future crisis.

Now I am worried by inflation, and I am worried by unemployment and poverty. These are real problems. But I am also worried that that future crisis, which we hope to deter with a strong national defense, may have come preceptibly closer in the last four years. One of the reasons why I am worried is that, from 1970 through 1977, we did not spend enough on defense procurement to sustain our present military forces over the next decade. In the near future we are going to pay the price in reduced defense capabilities unless we act now to increase defense spending. And I do not think the world today is one in which it is prudent to reduce our capabilities.

The Soviet Union has built up its military forces in the last ten years and now it is beginning to use them to expand its influence in the world. The Soviet Union is not behaving like a regional power with essentially defensive objectives, but like a nation with unsatisfied global ambitions.

I am sure you all are familiar with the litany, but let me repeat it again: Since achieving parity in strategic forces in the early 1970's, the Soviet Union has continued to make major improvements in its missile forces, with multiple warhead payloads and improved accuracies. CBO recently estimated that by the mid 1980's, the Soviet Union's presently planned strategic forces—allowable under SALT I—could destroy 90 percent of U.S. silo-based ICBMs in a first strike while using only about one fifth of their own ICBMs. According to a recent issue of Aviation Week, the Air Force now thinks that the Soviets may achieve this capability several years earlier. Whatever my colleagues may think about the advisability of developing a U.S. first strike counterforce capability, it is clear that the Soviet leaders care little whether their missile force is perceived as "de-stabilizing."

The Soviet Union has continued to improve all other dimensions of its armed forces. Real growth in the Soviet defense budget has averaged more than three percent a year for a decade. In Central Europe, the Soviet Union has increased the firepower of its ground forces with additional tanks and artillery, and with new armored personnel carriers and other equipment. According to the Brookings Institution publication, *Setting National Priorities: The 1978 Budget*, the strength of Soviet divisions in Europe has been increased by 20 percent in manpower, by 40 percent in the number of tanks in motorized rifle divisions, and by a doubling of artillery assets. It has added improved all-weather and ground attack capabilities to its tactical air forces. The Backfire bomber and SS–20 missile increase Soviet threats to our naval forces and to targets in Western Europe.

At sea, the Soviet Union is adding new, large air-capable ships to its inventory, while supporting operations on both the east and west coasts of Africa. Indeed, a growing part of Soviet military operations and investment spending is aimed at increasing the reach of Soviet forces through extended naval operations, the purchase of longer-range transport aircraft and the active pursuit of overseas bases.

Politically, the Soviet Union has been less conciliatory on U.S.-Soviet relations. For example, the growing Soviet counterforce capability poses a costly problem for the United States, but the Soviet Union has been unwilling to agree to an arms control treaty which would place limits on counterforce weapons. Also the Soviet Union has increased the scope of its intervention in Africa, and is supporting large Cuban armed forces in Angola, Ethiopia and elsewhere. It has continued to give support to hard-line Palestinian and other Arab groups opposed to a Middle East peace settlement.

According to the recent assessment of the international situation presented by Secretary of Defense Brown, the United States is becoming increasingly dependent upon the energy, raw materials, trade and political stability of the very areas of the world where the Soviet Union has for a decade been most active. And Soviet activity there appears to be on the rise. Soviet clients with expansionist ambitions now control both shores of the entrance to the Red Sea as well as two of the major oil producing states on which Western economies depend—Libya and Iraq. The Soviets are seeking additional allies in the region.

The United States remains the only power in the world with the resources and interests capable of checking Soviet expansion. As a result, a rivalry is inevitable. In the past 30 years, we have experienced many periods of alternating cooperation and competition. After each thaw has come a new confrontation. Some of the confrontations have ended favorably for the United States, while others have not. But it is not hard to imagine what the outcomes would have been—in the Berlin crises, the Cuban missile crisis, the Yom Kippur war—if the United States had lacked the military capability to defend its interests and assist its allies. And it is not hard to imagine that the United States will not be called upon to defend its interests again. The wide-ranging interests of the Soviet Union, no less than of the United States and its allies, make it difficult to predict the exact form the next crisis will take. Who would have predicted three years ago that the Soviets today would be supporting a Cuban expeditionary army in Africa? There is a clear danger, therefore, in planning military forces too narrowly focused on one or two military theaters.

In managing U.S. Soviet relations, it is of course desirable not to be drawn into wars. But a desire for peace will not make the potential for conflict recede. Failure to prepare for military contingencies could be taken as

a sign of weakness, and increase the potential for confrontations.

We all know that the President's defense budget is a pretty tight one. For example, it assumes a virtual ship-building holiday for fiscal 1979. A list of items which could have been included in this budget with good justification totals nearly $9 billion dollars.

Even so, we all know that we could find ways to trim this budget here and there by postponing procurements or cutting out missions which some might regard as marginal. I hope that we all know that if we did that, we would simply be postponing decisions which must be supported if we wish to maintain our military strength.

In the 1950's we tried to buy military forces cheaply by substituting nuclear firepower for divisions, wings and ships. Once the Russians acquired a large nuclear arsenal, however, that policy began to look shortsighted.

So in the 1960's we began to build up our conventional forces. That costs money and we spent it. Between 1962 and 1969, counting just what we bought for our "baseline" forces—excluding everything bought for our forces in Vietnam—we spent $150 billion on military procurement for conventional forces, measured in today's dollars.

By the same measure, between 1970 and 1977 we cut our military procurement spending by almost 20 percent, or more than $27 billion dollars spread over eight years. For example, we cut spending on Army procurement by $13.6 billion; on Navy aircraft and missiles by $4.6 billion; on shipbuilding by $7.8 billion, and on aircraft for the Air Force by $3.5 billion. If we take the average shipbuilding budgets for 1962–1967 as the standard, then in the past ten years the reduction in shipbuilding authorizations has totaled $22.6 billion, measured in today's dollars.

At the same time, the equipment we are buying for forces today costs significantly more than it did in the 1960s. In constant dollars, F–14s cost three times as much as F–4s, XM–1 tanks cost more than twice as much as M–60 series tanks, and naval vessels cost up to five times as much as the units they are replacing. Even "low-cost" options—like the F–16—cost more than the weapons of the 1960s.

The consequences are inevitable. Either we will have to spend more than we did in the 1960s on military equipment, or we will have much smaller forces in the future than we have today. In naval forces, we are already paying a price for past spending decisions. We entered the decade with a fleet of about 900 ships and unquestioned naval superiority. We will end the decade with a fleet that has been cut by 50 percent. And unless the President's shipbuilding plans are changed, the Navy will be even smaller in the 1990s.

There are large disagreements over the kind of Navy we should have—fewer bigger nuclear ships, or more smaller conventionally powered ships—but I sense a growing agreement that we cannot continue to let the nation's naval capability decline—not if we wish to be able to handle a range of unpredictable crises in areas of the world where our impressive nuclear forces and our impressive NATO-oriented forces would be largely useless. So we are going to have to increase spending on naval forces fairly soon. The authorizing and appropriations committees have told us they think these increases will be required this year.

There are other upward pressures on this budget. The SALT talks may fail to produce a limit on Soviet counterforce capabilities, and we will have to decide what to do about it. Recent currency re-valuations have cut the purchasing power of O&M funds for our forces in Europe and Japan by more than $200 million, and this shortfall will have to be made up unless we want to see their readiness impaired. There are still large backlogs in the maintenance of combat equipment and real property. Various Administration proposals to reduce the budget—by selling stockpile material, cutting wage board pay and reducing reserves—are not likely to be realized. They total over $300 million.

Mr. President, we have already made major shifts from defense spending to other national priorities in the past eight years. The share of the budget going to defense is down, while the share going to transfer payments, education, training, jobs, medical care, energy, agriculture, urban development and other non-defense functions has increased steadily. Last year's defense budget, excluding retired pay, was nearly $14 billion less than the fiscal year 1964 defense budget, measured in 1978 dollars. But—except for the Navy—the forces we are supporting are not very much smaller than in 1964. And their equipment costs a lot more, even when measured in constant dollars. We cannot continue to nibble away at the Navy and at the other parts of the defense budget in the name of reordered priorities or economy in government without eroding national security.

I think this is the appropriate time, before I go into further remarks, and with the constriction that I did not realize had been agreed to, to yield to our chairman or to try to answer any questions with respect to the 050 category.

Mr. EAGLETON. Do we have an agreement, Mr. President, to vote at 2 o'clock?

The PRESIDING OFFICER. Yes; that is correct.

Mr. MUSKIE. We will suspend the debate on the Senator's amendment for that vote and then resume after the vote.

Mr. STENNIS. Will the Senator yield for a half minute?

Mr. MUSKIE. I yield.

Mr. STENNIS. Mr. President, I will only take a half minute, in view of the fact that the Senator from Missouri wants to say a further word on his amendment.

As chairman of the Armed Services Committee I refer to the argument I have made on the previous amendment offered by the Senator from South Dakota. We have been through all of these items with a most minute examination by subsubcommittees.

We will start working on our bill tomorrow morning. On military procurement, we want it to be as near as possible to the President's budget. I must say that we cannot continue to work and make recommendations, as we do now, if listened with great attention to the re this amendment should be agreed to. I yield the floor.

Mr. EAGLETON. I thank my colleague, and I thank my colleague from Maine.

Mr. President, I will be brief. I believe we can have the votes back to back. I listened with great attention to the remarks of Senator HOLLINGS. He debated the sixties, he debated the seventies, he debated V/STOL.

Mr. STENNIS. Mr. President, may we have quiet? The Senator is entitled to be heard.

Mr. EAGLETON. He debated bits and pieces of a lot of things. But the main thing I learned—and I have been looking for the culprit and I think I have found him——

The PRESIDING OFFICER. The Senate will be in order. The Senator is entitled to be heard.

Mr. EAGLETON. I have been looking for about a year and a half for the person who converted President Carter's $5 to $7 billion budget cut into this year's $10 billion-plus increase. I have found the culprit. It was parsimonious Fritz. He had that meeting up there he talked about, Mr. President, with Charlie Kirbo. He said:

> Charlie, you better tell old Jimmy. You better stop talking about cutting that defense budget.

It worked. So a $5 to $7 billion cut is now a $10 billion increase.

That is the only figure the Senator from South Carolina did not mention. He did not mention that the Carter budget this year for defense is $10 billion over last year, and now he and his colleagues want to add another $1.4 billion. I say that is just too much. That is too much for Jimmy Carter, Charlie Kirbo, or anyone.

Mr. HOLLINGS. Mr. President, will the Senator yield about the $10 billion? Let us fix that accurately.

Mr. EAGLETON. I yield.

Mr. HOLLINGS. The Budget Committee the U.S. Senate, and the House all agreed last year on a budget level projected forward under the Ford Administration. On that particular level, President Carter's this particular budget submitted to you here, is a $10 billion cut. We are $10 billion below that budget that President Ford was talking about.

That disturbs me, quite frankly. I had other amendments. Old Parsimonious was not trying to cut; I was trying to fatten this thing and actually provide for the real defense. The Senator from New Mexico had other amendments. He disagreed.

The PRESIDING OFFICER. The hour of 2 o'clock——

Mr. EAGLETON. Mr. President, I ask unanimous consent that I may proceed for 1 minute. Then we can have both these votes back-to-back.

The PRESIDING OFFICER. Is there objection?

Without objection, it is so ordered.

Mr. EAGLETON. Let me ask a question of the Senator from Maine. Is it not correct that the Defense Department has reestimated the outlay figures and they have cut it by $2.1 billion?

Mr. MUSKIE. The Budget Office made those reestimates. We have included——

AMENDMENT 1802 (AS MODIFIED)

Mr. EAGLETON. Pursuant thereto, I send a modified amendment to the desk. Then we can vote on both the McGovern amendment and my amendment as modified.

The PRESIDING OFFICER. Without objection, the clerk will state the modified amendment.

The second assistant legislative clerk read as follows:

> The Senator from Missouri (Mr. EAGLETON) proposes an amendment numbered 1802, as modified.

Mr. EAGLETON. I ask unanimous consent that further reading of the amendment be dispensed with. It is the

same amendment, modified to eliminate the $2.1 billion in the reestimate.

The PRESIDING OFFICER. Without objection, it is so ordered.

The modified amendment follows:

On page 1, line 7, strike out $443,300,000,000" and insert in lieu thereof "$442,900,000,000".

On page 1, line 11, strike out "566,100,000,000" and insert in lieu thereof "$564,700,000,000".

On page 2, line 2, strike out "$498, 900,000,000" and insert in lieu thereof "$498,000,000,000".

On page 2, line 5, strike out "$55,600,000,000" and insert in lieu thereof "$55,100,000,000".

On page 2, line 7, strike out "$853,800,000,000" and insert in lieu thereof "$853,300,000,000".

On page 2, line 9, strike out "$101,800,000,000" and insert in lieu thereof "$101,300,000,000".

On page 2, line 20, strike out "$129,800,000,000" and insert in lieu thereof "$128,400,000,000".

On page 2, line 21 strike out "$116,600,000,000" and insert in lieu thereof "$115,700,000,000".

Mr. EAGLETON. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. EAGLETON. I ask unanimous consent that there be a 10-minute rollcall on my amendment, which will follow the McGovern amendment.

Mr. MUSKIE. I ask unanimous consent that there be a 10-minute rollcall on the Eagleton amendment——

Mr. STENNIS. A parliamentary inquiry, Mr. President.

The PRESIDING OFFICER. The Senator will state it.

Mr. STENNIS. Are the yeas and nays ordered on the McGovern amendment?

The PRESIDING OFFICER. No.

Mr. MUSKIE. I ask for the yeas and nays, Mr. President.

The PRESIDING OFFICER. It there a sufficient second?

There is a sufficient second.

The yeas and nays were ordered.

Mr. METZENBAUM. Mr. President, I have an objection to the 10-minute rollcall.

The PRESIDING OFFICER. The yeas and nays are ordered on the McGovern amendment.

An objection is heard on the 10-minute rollcall.

Mr. METZENBAUM. I withdraw my objection.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. EAGLETON. Mr. President, am I correct that this is a 10-minute rollcall?

Mr. DOMENICI. Parliamentary inquiry, Mr. President.

The PRESIDING OFFICER. The Senator will state it.

Mr. DOMENICI. Will the Chair restate the unanimous-consent request?

The PRESIDING OFFICER. That there be a 10-minute rollcall on the Eagleton amendment following the vote on the McGovern amendment.

Mr. DOMENICI. Both of which will occur now?

UP AMENDMENT NO. 1244

The PRESIDING OFFICER. Under the previous order, the hour of 2 p.m. having arrived, the pending amendment will be set aside temporarily and the Senate will proceed to a vote on the amendment offered by the Senator from South Dakota (Mr. McGOVERN), an unprinted amendment numbered 1244. The yeas and nays have been ordered.

Mr. MUSKIE. Mr. President, all time is yielded back on the Eagleton amendment so the votes may take place back-to-back.

The PRESIDING OFFICER. The Senator is correct.

The clerk will call the roll.

Mr. GOLDWATER. A parliamentary inquiry, Mr. President.

Mr. STENNIS. A parliamentary inquiry, Mr. President.

The PRESIDING OFFICER. The Senator from Arizona will state his parliamentary inquiry.

Mr. GOLDWATER. The yeas and nays have been ordered on the McGovern amendment. Is it necessary to order them for the second vote on the Eagleton amendment?

The PRESIDING OFFICER. They have been ordered on both amendments.

Mr. GOLDWATER. I thank the Chair.

Mr. STENNIS. Parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. STENNIS. Does not the present occupant of the chair think it is his duty at least to state the question that we are voting on?

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from South Dakota (Mr. McGOVERN).

Mr. STENNIS. To what? The bill? For how much?

The PRESIDING OFFICER. The clerk will state the amendment.

The second assistant legislative clerk proceeded to read the amendment.

Mr. STENNIS. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 2, line 20, strike out "$129,800,000,000" and insert "$125,185,000,000".

On page 2, line 21, strike out "$116,600,000,000" and insert "$115,074,000,000".

On page 3, line 5, strike out "$10,200,000,000" and insert "$12,150,000,000".

On page 3, line 6, strike out "$10,100,000,000" and insert "$11,240,000,000".

On page 3, line 17, strike out "$19,500,000,000" and insert "$19,831,000,000".

On page 3, line 20, strike out "$10,400,000,000" and insert "$10,673,000,000".

On page 3, line 21, strike out "$9,000,000,000" and insert "$9,068,000,000".

On page 3, line 24, strike out "$31,600,000,000" and insert "$33,661,000,000".

On page 3, line 25, strike out "$31,200,000,000" and insert "$31,692,000,000".

The PRESIDING OFFICER. The question is on agreeing to the McGovern amendment. The clerk will call the roll.

The legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from Minnesota (Mr. ANDERSON), the Senator from Indiana (Mr. BAYH), the Senator from Delaware (Mr. BIDEN), the Senator from Colorado (Mr. HASKELL), the Senator from Montana (Mr. HATFIELD), and the Senator from Hawaii (Mr. INOUYE) are necessarily absent.

I further announce that, if present and voting, the Senator from Minnesota (Mr. ANDERSON) would vote "nay."

Mr. STEVENS. I announce that the Senator from Tennessee (Mr. BAKER), the Senator from Utah (Mr. GARN), and the Senator from Kansas (Mr. PEARSON) are absent on official business.

The result was announced—yeas 14, nays 77, as follows:

[Rollcall Vote No. 130 Leg.]

YEAS—14

Abourezk	Hatfield, Mark O.	Metzenbaum
Clark	Humphrey	Proxmire
Cranston	Kennedy	Riegle
Eagleton	McGovern	Weicker
Gravel		Williams

NAYS—77

Allen	Griffin	Muskie

NOT VOTING—9

Anderson	Garn	Inouye
Baker	Haskell	Pearson
Bayh	Hatfield, Paul G.	
Biden		

So Mr. McGOVERN's amendment (UP No. 1244) was rejected.

AMENDMENT NO. 1802, AS MODIFIED

The PRESIDING OFFICER (Mr. RIEGLE). The question is on agreeing to the amendment of the Senator from Missouri, as modified. On this question the yeas and nays have been ordered, for a 10-minute vote, and the clerk will call the roll.

The second assistant legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from Minnesota (Mr. ANDERSON), the Senator from Indiana (Mr. BAYH), the Senator from Delaware (Mr. BIDEN), the Senator from Colorado (Mr. HASKELL), the Senator from Montana (Mr. HATFIELD), and the Senator from Hawaii (Mr. INOUYE) are necessarily absent.

I further announce that, if present and voting, the Senator from Minnesota (Mr. ANDERSON) would vote "yea."

Mr. STEVENS. I announce that the Senator from Tennessee (Mr. BAKER), the Senator from Utah (Mr. GARN), and the Senator from Kansas (Mr. PEARSON) are absent on official business.

The result was announced—yeas 21, nays 70, as follows:

[Rollcall Vote No. 131 Leg.]

YEAS—21

Abourezk	Heinz	Proxmire
Church	Humphrey	Riegle
Clark	Kennedy	Sarbanes

NOT VOTING—9

Anderson	Garn	Inouye
Baker	Haskell	Pearson
Bayh	Hatfield, Paul G.	
Biden		

So Mr. EAGLETON's amendment (No. 1802), as modified, was rejected.

Mr. PROXMIRE. Mr. President, I ask unanimous consent that Howard Shuman and Ron Tammen, of my staff, be accorded the privilege of the floor during votes on the next two amendments.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 1799

(Purpose: To decrease the appropriate level of new budget authority to $540,000,000,000)

Mr. PROXMIRE. Mr. President, I call up my amendment No. 1799 to the budget resolution and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The Senator from Wisconsin (Mr. PROXMIRE) proposes amendment No. 1799.

Mr. PROXMIRE. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 1, line 11, strike out "$566,100,000,000" and insert "$540,000,000,000".

Mr. SCHMITT. Mr. President, will the Senator yield?

Mr. PROXMIRE. Mr. President, I yield to the Senator from New Mexico.

Mr. SCHMITT. Mr. President, I thank the distinguished Senator from Wisconsin for his courtesy. I ask unanimous consent that Mark Edelman, of Senator DANFORTH's staff, be accorded the privilege of the floor during the remainder of this debate.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. President, I thank the distinguished Senator from Wisconsin for his courtesy.

(Mr. RIEGLE assumed the chair.)

Mr. PROXMIRE. Mr. President, this amendment would cut the level of new budget authority—and I stress this new budget authority—on page 1, line 11 from $546.1 billion to a level of $540 billion. This represents a decrease of $26 billion from the $566 billion proposed by the committee and somewhat more than the original budget authority request of $569 billion of the President.

Last year the budget authority was $502.9 billion. My amendment, therefore, would allow for a $37 billion or 7.4-percent increase over last year.

Mr. President, let me repeat that. This amendment would allow for an increase in budget authority over last year of about 7.4 percent.

I am sure this amendment may be attacked as a big amendment that is a tremendous cut, and so forth. The fact is I am astonished at my moderation.

The 7.4-percent increase in obligational authority, after all, is substantial. All indications are that that would be an increase in real terms because I know of no economist, certainly not in the Federal Government, or a prominent economist on Wall Street or in the academic area, who argues we will have more than a 7-percent inflation in the coming year—we could have it, but there is expectation we would and, therefore, this represents a permission to go above last year in real terms.

But it would cut it well below what the President recommended and what the committee has recommended.

Mr. President, we have had an interesting inflation program issued by the President of the United States, and I hope he can support it. It would be helpful.

Mr. President, the signal that the country is waiting for is a cut in the budget. We know that. I think all Members of the Senate have been told that over and over again by their constituents, and I think we understand that.

The huge increase we have in this budget is inflationary; certainly it is inflationary in the judgment of a very large number of citizens, including the overwhelming majority of businessmen. So a loud, clear anti-inflation signal would be the passage of this amendment.

This morning before the Banking Committee the Chairman of the Federal Reserve Board told us if we succeeded in reducing the budget deficit by $25 billion it would make it much easier to follow an easier monetary policy, making it easier to ease up on interest rates, to make it possible for the private sector to move in.

People say, "Well, if you cut this much out of the budget it means you are going to lose jobs." You are going to transfer jobs, in effect, out of the public sector into the private sector. Those jobs are much more likely to be productive as well as much more likely to be permanent.

Mr. President, in round numbers, this represents a $26 billion or about a 5-percent decrease in Federal Government budget authority for fiscal year 1979.

While the Budget Committee deserves great credit—Senator MUSKIE, Senator BELLMON, and the other members—in not increasing the estimate and not giving into the pressure to spend more—and there was pressure from virtually every committee, including my own, I regret to say, the Banking Committee—I believe a $499 billion or $500 billion figure in outlay and $566 billion in budget authority are too high and should be cut. It represents an enormous burden on the hard-pressed taxpayers of the United States.

As one who has served on the Senate Appropriations Committee for about 15 years, and has examined the budgets of at least 40 agencies, I can say without fear of contradiction that there is not a single agency in the Government which cannot absorb a 5-percent decrease in its funds, and that is what this is, a decrease below what the President recommends and, as I pointed out before, an increase, a 7.4-percent increase, over what was available last year.

Actually, this amendment would, in my judgment, increase the efficiency of the programs if it were determined to do so. This is true of defense, foreign aid, welfare, housing, education, law enforcement, public works, highways, reclamation, sugar subsidies, mineral subsidies, and even health.

Not every function could be cut an equal amount, especially in the short run, but over time many of them could, some could be cut as low as 5 percent.

Because of that fact, I am leaving the determination of specific cuts in specific aggregates this year to the Budget Committee.

I am aware that in any one year more than one-half of Federal spending is considered to be relatively uncontrollable. Too much of today's spending is determined by existing laws and contracts. That is, in fact, why I am proposing this amendment to the budget authority because that affects the future—not to outlays but to budget authority, because that does give more leeway. A cut of this proportion in outlays would have been a much deeper cut obviously in the controllables than this cut in budget authority.

Some of the so-called uncontrollables could be reduced or eliminated. Some of them cannot be cut and should not be cut. Among the first that can be cut was dramatized by the amendment offered by the Senator from Virginia (Mr. HARRY F. BYRD, Jr.). An HEW audit report found at least $6.4 billion in waste, mismanagement, and fraud in some HEW programs, some of which, like medicaid, are said to be uncontrollable. Obviously, that should be controlled.

We could reduce interest rates by cutting spending and lowering the deficit. This would bring lower interest rates and a smaller debt and less inflation. I personally would eliminate the revenue-sharing program. Some disagree with that, but it could be done.

On the other hand we could not and should not reduce social security or railroad retirement or Federal employees retirement or veterans' benefits which have all been established under law and

for which people have both qualified and have every proper reason to expect to receive.

As I say, my amendment would not cut those or similar items. But there is one way to cut the uncontrollables. If we can cut the budget and, hence, reduce the deficit and reduce inflation we can also reduce the cost of the so-called controllables in the budget. Each 1 percent in inflation that we can reduce would reduce social security payments by $300 million in the first year and by about $1.5 billion over time.

I do not think it is an exaggeration to expect this kind of reduction would provide a signal for the country that could result in a 1-percent reduction in inflation.

Mr. CURTIS. Mr. President, will the Senator yield for a question?

Mr. PROXMIRE. Yes, indeed. I am happy to yield to my friend from Nebraska.

Mr. CURTIS. Will the Senator tell us what he means by an uncontrollable?

Mr. PROXMIRE. I mean by uncontrollable those expenditures required by law and which are mandated and which are a matter of a great part of entitlement; also, of course, long-term contracts where the Government has signed a contract, for example, in procurement to procure an aircraft carrier or some other weapons system that takes 3 or 4 years to construct, we have signed the contract, we have committed ourselves to the contract, and we are going to have to lay out money for that in 1979, 1980, regardless of what we do here. I am saying we cannot control that.

Mr. CURTIS. Well, I am very much aware——

Mr. PROXMIRE. I beg the Senator's pardon, I am wrong in saying we could not control it. We could, but we would have to renege on our contracts to do it, and I am not proposing we do that.

Mr. CURTIS. I certainly would not be in favor of the United States failing to carry out its contracts. But if laws can be enacted could they not be modified or repealed?

Mr. PROXMIRE. The Senator is correct, the Senator is right. When we say "uncontrollable," it is a very, very free and easy word.

Mr. CURTIS. For instance, the disability program under social security is 500 percent beyond the original estimate. Is there any reason why that law could not be tightened up, any technical reason that the Senator knows of?

Mr. PROXMIRE. None at all; and I point out that I supported, as I think the Senator from Nebraska did, the Byrd amendment yesterday, which would have tightened the HEW budget up by some several billion dollars, and thereby extended control over the so-called uncontrollables.

Mr. CURTIS. I think practically all of the so-called uncontrollables involved matters of contract on which, for instance, if we required bonds, increases could be avoided. Moreover, there is a delayed effect which could require two actions, a change here and a change later. But if we say everything in the law now is an uncontrollable, and accept that presumption in our budgeting, the distinguished Budget Committee, instead of having the power to direct the financial affairs of our Government, becomes an administrative committee to run an adding machine.

Mr. PROXMIRE. That is a very helpful observation. I think the so-called uncontrollables are much too rigid and sacrosanct. There is no reason why we cannot make many cuts in them. I thank the Senator from Nebraska.

Mr. President, this cut that I am talking about would result from a reduction of inflation, for each 1-percent cut in inflation cuts all the uncontrollables by about $1 billion the first year and by 1 percent or $5 billion taking the lag in time into account.

This would be done without harming a single person because the savings are made out of inflationary costs which would not occur and would not hurt the real income of social security or retirement individuals one bit.

What I am talking about here is the fact that we have now in the social security law a provision that provides that as prices go up, as the consumer price index rises, the recipients of social security will get higher benefits, which of course is necessary to maintain their real income. To the extent that this amendment passes and does reduce real inflation, such requirements would be moderated, and I would say over the long pull there could be as much as $5 billion reduction.

If we say that about one-half of Federal spending is controllable either in the short run or changes in the law which could be enacted shortly, and we also say that cuts in the so-called uncontrollables could be effected because of the reduction in inflation, my proposal would mean that we would have to reduce the uncontrollables by less than 10 percent.

WOULD HELP FIGHT INFLATION

A cut of $26 billion in budget authority could also have a salutary effect on the economy and on our central problem of inflation. It could have this effect without harming employment and, indeed it could actually improve the employment picture and reduce unemployment.

How could this be done? Let me explain.

A reduction in budget authority and spending could reduce the Federal deficit. This in turn would allow us to do two things. First, we could return the funds to the people through tax cuts without adding to the deficit. Second, it would allow the Federal Reserve Board to have an easier monetary policy without adding to inflation, as Chairman Miller affirmed this morning before the Banking Committee.

Through such policies there would be additional funds in the private sector from both the reduction in spending and a reduction in taxes. Second, easier monetary policies should reduce interest rates, spur private spending and investment, and produce more jobs, greater economic growth, and a healthier economy.

Meanwhile, the reduced borrowing of the Federal Government to finance the deficit should reduce inflationary pressures. All of this would add to growth, to jobs, and to the reduction of inflation.

THE WAY TO SOLVE STAG-FLATION

It is the one prescription to stop "Stagflation" and to bring relatively full employment and stable prices which has not been tried.

FIVE-PERCENT IS AN ACHIEVABLE CUT

I believe a 5-percent or a $26 billion cut is achievable. What we need to do in the Senate is to set such a ceiling and then demand that the various agencies stay under it.

The only way Government or business can actually keep spending down is to set such ceilings. If done the other way around—first asking everyone what they are going to spend and adding up the totals—the totals will go higher and higher and higher.

Therefore, I believe that we should first set such a reduced ceiling in order to force Government agencies to cut back on waste, ferret out their marginal programs, and establish stricter priorities.

I want to make it clear that I am not calling for an arbitrary 5-percent across-the-board cut. I am calling for a 5-percent cut in the totals but some programs, as determined by the Budget Committees and the Congress, can take larger cuts and some, in the short run and without legislation, would be difficult to cut that much immediately.

TOO MUCH MACROECONOMICS

Modern economists for too long have merely looked at the "macro" or overall effects of spending. Very little attention has been paid to the genuine benefits of the proposed increase in outlays.

They are justified on such spurious grounds as necessary to "keep even" with inflation or to stimulate the economy to offset fiscal drags.

The general has overcome the specific. Spending is justified for these general purposes without any or few arguments justifying their specific benefits.

We are urged to keep wasteful military projects going to avoid cuts in jobs, to continue pork barrel public works programs because local communities want them, and to universalize spending because if all 50 States are not cut in on the proposal, it will fail of passage.

WE DO NOT NEED A BLOATED CIVILIZATION

It is true as Justice Holmes remarked that with taxes we buy civilization. But we are not required to buy a wasteful or bloated supercivilization.

Further, the totals proposed by the President this year are essentially unprecedented. As the distinguished financial analyst, Henry Kaufman, testified before the House Budget Committee, the fiscal 1978 outlays represent a record postwar high of 22.6 percent of the gross national product. The 1979 outlays proposed by the President would decline to 22 percent, but this would still

be the fourth highest in terms of the percenatge of the GNP in the last 25 years.

We have to face the hard tough facts and start to live within our means. We must use public funds wisely. The Government should not be required to subsidize almost everybody everywhere.

FOLLOW LINCOLN'S PRESCRIPTION

I believe we should carry out Lincoln's definition of the legitimate objects of government as doing for the people "whatever they need to have done, but cannot do at all or cannot so well do for themselves in their separate and individual capacities."

Even a generous interpretation of that sentiment would allow us to reduce Government spending by more than the $25 billion I have proposed.

Mr. President, I reserve the remainder of my time.

Mr. MUSKIE. I yield myself 10 minutes.

Mr. President, let me say at the outset that the amendment of the distinguished Senator from Wisconsin is consistent with his long record of concern about Government spending and the need for budgetary restraints and prudence, and I applaud the general thrust of his efforts over the years in this connection.

However, I must say with respect to his amendment that it goes to the very heart and the very life of the congressional budget process, because it is ambiguous, it is—and I say this is the most respectful way—arbitrary and indiscriminate. It is the kind of approach to budget cutting that we tried many times before the establishment of the congressional budget process. It never worked. It never succeeded, because it never identified the areas where real cuts were possible, and where cuts could be achieved without damaging essential and vital areas of governmental activity.

If we want to return to that form of budget cutting, and abandon the congressional budget process, that is all right with me. But after we have gone through the kind of trade-offs and balancing of judgments which the budget process requires, if we are then asked to subject ourselves to an across-the-board cut of this kind, we have wasted a lot of time on identifying priorities, balancing priorities, and undertaking to set them within a rational economic policy. The two approaches to budgeting just do not go together. We tried it the other way and it did not work; and frankly I am getting pessimistic about whether or not this budget process is going to work, because here, too, we are inclined to abandon the discipline when it serves our immediate interest.

But let me get down to this specific proposal, Senator PROXMIRE's amendment proposing a 5 percent across-the-board cut in budget authority in fiscal year 1979. I repeat, a cut in budget authority.

He would cut budget authority by $26.1 billion, from $566.1 billion recommended by the Budget Committee to $540 billion.

He jusitfies all of this as a contribution to the fight against inflation and as a contribution to reducing the deficit.

Unfortunately, Mr. President, one cannot judge either of those contributions because one is not told where the cut in budget authority will come. Budget authority does not all spend out at the same rate. Budget authority for housing, for example, requires up to 40 years to spend out. As a matter of fact, in this present budget there is $25.5 billion in budget authority for housing assistance.

(Mr. MOYNIHAN assumed the chair.)

Mr. MUSKIE. If we were to apply the Senator's amendment to housing assistance, and there is nothing in the amendment to prevent us from doing so, we would eliminate the housing program from the budget. But how much of a contribution would that make to inflation? When one considers that the spend-out from this program is spread over 40 years, it is very little. There would be almost no reduction in this year's deficit from such a budget authority cut. That $25.5 billion will not spend out in fiscal year 1979 to any measurable degree.

The budget does include outlays of $4.4 billion in housing assistance, but that is driven by budget authority which we provided in previous years.

So if we were to take the proposed $26.1 billion cut out of the housing assistance program, we would hardly make any contribution to reducing the deficit. We would make no contribution to reducing inflation. The size of the deficit which worries the business community and others in the country who are concerned about Government spending, would remain essentially unchanged.

If, on the other hand, one took the cut from budget authority that spends out in 1 year, where would we go?

Well, the Defense Department spends out a lot of budget authority in 1 year, much of it in the form of salaries. So if we wanted to make a maximum impact on the deficit and a maximum signal against inflation, we would cut the $26.1 billion from the defense function and mandate that it be taken out of salaries, which would probably mean that we would decimate the Armed Forces of the country.

That is the range we can consider, but the Senator does not tell us how he would distribute his cut in budget authority. It is for that reason that I call his amendment an arbitrary and undiscriminating approach to budgeting.

Mr. President, the budget process was designed to enable the Congress to make individual spending and revenue decisions in the context of the budget as a whole.

The discipline provided by the process forces Congress to make hard choices among competing national priorities after careful consideration of the issues which are involved and deliberate decisions on how our limited resources will be allocated.

Senator PROXMIRE's amendment proposes, in contrast to this, an anonymous cut of $26.1 billion in budget authority. He does not tell us which areas of the budget he would cut. He does not tell us which national priorities would be affected. He says only that—

> There is not a single agency of government which could not absorb a 5-percent decrease in its funds and actually increase the efficiency of its programs if it were determined to do so.

Well, attractive as that proposition is on its face, when one looks into the facts of individual functions and agencies and programs, one finds it to be debatable.

Rhetoric such as this was common in the Congress prior to the Budget Act. We established a congressional budget process because we found that such rhetoric did not provide effective budgetary control.

The Budget Committee recommends, Mr. President, a carefully crafted spending plan for fiscal year 1979. Of course, there is room for increases or decreases in that plan as the Senate wills. We have just acted on two proposals to cut defense spending and one proposal to increase spending in domestic programs, out of the savings in defense spending. Those are perfectly appropriate amendments. Whichever way the Senate acted upon them, the Budget Committee would live with the result.

But what would Senator PROXMIRE's amendment do to that plan? It is not focused on specific functions or programs.

The Budget Committee recommended total budget authority for fiscal year 1979 of $566.1 billion. Where did we get that? The authorizing committees requested of us $603 billion in budget authority. We cut those requests, not by $26.1 billion, as proposed by the Senator, but by $36.9 billion. The Senator now says—

> That is not good enough. You ought to add another $26.1 billion in cuts to that $36.9 billion so that we would have a total of $63 billion in cuts.

Where would we get those cuts? From what programs should we get them?

Within the total of $566.1 billion that the Budget Committee recommended, $535 billion—mark the number, $535 billion—is required simply to carry out laws currently on the books. That $535 billion total provides for no new or expanded programs and for only those inflation adjustments that are mandated by law.

Senator PROXMIRE's amendment would cut total budget authority to $540 billion, which is just slightly more than the current law level.

Laws on the books should not be regarded as sancrosanct. Indeed, the Budget Committee recommendation assumes that some reductions through changes in current law can and should be made. But the simple fact is that achieving savings from changes in existing law is a longer term business, and the savings in the first year are small. This is especially true when we realize that within that $535 billion current law estimate there is some $300 billion for entitlement programs. An entitlement program means just that: States, local govern-

ments, or individuals are entitled to receive payments under current law.

In the short run, Mr. President, savings in these programs are especially difficult to achieve.

So the truth is that the bulk of Senator PROXMIRE's budget authority cut in fiscal year 1979 would have to come from those areas of the budget where the Budget Committee recommends carefully considered increases over current law. These increases recommended by the Budget Committee are, as I have said before, considerably less than the increases recommended to us by the other Senate committees.

Mr. CURTIS. Will the Senator yield for a brief question?

Mr. MUSKIE. Yes, for one, and then I would like to finish my statement.

Mr. CURTIS. Does the distinguished chairman agree that to do the job that many in the country feel should be done on the budget, we ought to change some laws?

Mr. MUSKIE. Well, I think there is a recognition that in order to make the kind of cuts some would wish, we would have to change the laws. There is no question about that. The Senator understands that perfectly, and especially in the entitlement area, which is $300 billion.

Incidentally, there is one entitlement program that one should never forget. That is interest on the public debt. The obligation to pay that goes back to legislation which was enacted in the middle of the last century. It amounts to $53 billion in the fiscal year 1979 budget.

That is uncontrollable. That is a contractual obligation.

Mr. CURTIS. It is a contract, yes.

Mr. MUSKIE. And of course, there are defense and nondefense contracts, and other commitments made in prior years totaling, possibly, as much as $80 billion a year which are uncontrollable unless the Government reneges on its promises. Then there are the entitlements. Those commitments plus the entitlement programs form the so-called uncontrollable portion of the budget.

Interest on the debt we cannot reduce by changing the law without breaching a contract, and we would not want to breach other contracts and commitments. So when we talk about reducing the budget by changing existing law, we are talking about changing entitlement programs or changing other programs prior to the time commitments are made.

Of course, if we want to reduce that spending, we have to change the law, the Senator from Nebraska is absolutely correct.

Mr. President, I have a table showing the major increases over current law recommended by the Committee on the Budget. I ask unanimous consent that this table be printed in the RECORD at the conclusion of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. MUSKIE. Let me discuss a few salient elements of that table. The Budget Committee recommends a total increase in budget authority of about $32 billion over current law. One-fourth of this increase, $8 billion, is in the area of national defense. Does Senator PROXMIRE mean to eliminate all or most of this increase, which would actually cause the defense budget to decline in real terms and cause us to renege on our NATO commitment?

Agriculture programs, Mr. President, account for $5 billion of the increase. Does Senator PROXMIRE mean to reduce or eliminate this support for America's farmers? I emphasize that this number is significantly below the agriculture bill that was recently passed by the Senate and defeated in the House. So when I say there is an increase, that is not the increase that was mandated by the Senate, and a substantial majority of the Senate, not too long ago.

Energy programs account for $2 billion of the increase. Would Senator PROXMIRE have us cut back on our efforts in this critical area?

Education, employment, and veterans programs together account for $4 billion of the increase in budget authority. Would Senator PROXMIRE recommend that these increases be eliminated?

International affairs programs account for $3 billion of the increase, much of it related to U.S. commitments to the multilateral banks. Does Senator PROXMIRE suggest that these commitments be scaled back or eliminated? I am asking these questions not to prejudge the answer. It is a perfectly legitimate objective for any Senator to propose, by appropriate amendment, the elimination of any of these increases. I identify them so that we may have an answer to them from the author of this amendment, who simply gives us the overall cut of $26 billion and asks us to find the places to cut.

Community and regional development programs account for $2 billion of the increase, much of it related to the President's new urban initiatives. Would Senator PROXMIRE have us send a signal to our distressed cities that the Federal Government is not interested in their plight?

So, Mr. President, I ask the Senator, in the spirit of an effective budget process, to tell us what programs of the budget he proposes to cut and what national priorities he wishes to affect. When we have the answer to that, we shall have a better answer to the question of how fast the outlays from the proposed cuts in budget authority would flow. When we know how fast the outlays would materialize, we can judge better what the economic impact of those outlay cuts would be in 1979, 1980, or future years.

In other words, as of this moment, the Senator's amendment does not tell us what programs to cut or how fast there would be a reduction in outlays, or when, if ever, the deficit would be affected or what the economic implications would be. We cannot have the answers to those questions until and unless he tells us what programs he would cut. We cannot have an effective debate, indeed, Mr. President, unless we know more clearly the effects of his proposal in these terms. The days are over when we can simply suggest anonymous cuts without spelling out their consequences.

I know my colleagues in the Senate will agree with me on the need to make spending choices after careful consideration of the issues that are involved. The congressional budget process is the instrument for making hard choices with respect to national priorities. Arbitrary spending cuts, as in this proposal, fall unevenly on different areas of the budget, deal capriciously with national priorities, and demonstrate once again the difficulty of attempting to affect the budget in a one-year time frame.

I urge the Senate to reject this amendment. I would like to close as I began, praising Senator PROXMIRE for his long-held commitment to budget restraint and budget prudence. I hope I have said nothing to denigrate his reputation in that respect. With respect to this amendment, I have tried to be as candid as I can be.

EXHIBIT 1

Increases above current law proposed in S. Con. Res. 80 as reported

[Dollars in billions]

	Fiscal year 1979 budget authority
Current law estimate	534.5
National defense	+8.0
International affairs	+3.1
Energy	+2.2
Agriculture	+5.1
Transportation	+4.2
Community and regional development	+2.2
Education, training, employment, and social services	+2.5
Veterans' benefits and services	+1.4
All other	+2.9
S. Con. Res. 80 as reported	566.1

Mr. MUSKIE. I yield to the distinguished majority leader.

UNANIMOUS-CONSENT AGREEMENT—S. 743

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that on S. 743, the dealer's day in court bill, there be a time limitation of 2 hours, to be equally divided between Mr. DURKIN and Mr. HANSEN, 1 hour on any amendment, 30 minutes on any debatable motion or appeal, 20 minutes on any point of order if such is submitted to the Senate; that the Senate proceed to the consideration of this bill tomorrow morning at 10:30 a.m.—this is conditioned on completing the action on the pending business—that if S. 743 is taken up there be a final disposition of the measure not later than 4 p.m. tomorrow; and that the agreement be in the usual form.

The PRESIDING OFFICER. And that rule XII, paragraph 3, be waived?

Mr. ROBERT C. BYRD. Yes.

The PRESIDING OFFICER. Is there objection?

Without objection, it is so ordered.

Mr. ROBERT C. BYRD. I thank the distinguished Senator from Maine.

The text of the agreement is a follows:

Ordered, That at the hour of 10:30 a.m. on Wednesday, April 26, 1978, or when the Sen-

ate proceeds to the consideration of S. 743 (Order No. 671), a bill to provide for the protection of franchised distributors and retailers of motor fuel; to encourage conservation by requiring that information regarding the octane rating of automotive gasoline be disclosed to consumers; and to prevent deterioration of competition in gasoline marketing, and that debate on any amendment be limited to 1 hour, to be equally divided and controlled by the mover of such and the manager of the bill, debate on any debatable motion or appeal shall be limited to 30 minutes, to be equally divided and controlled by the mover of such and the manager of the bill, and debate on any point of order which is submitted or on which the Chair entertains debate shall be limited to 20 minutes: Provided, That in the event the manager of the bill is in favor of any such amendment or motion, the time in opposition thereto shall be controlled by the minority leader or his designee: Provided further, That no amendment that is not germane to the provisions of the said bill shall be received.

Ordered further, That on the question of final passage of the said bill, debate shall be limited to 2 hours, to be equally divided and controlled, respectively, by the Senator from Wyoming (Mr. HANSEN) and the Senator from New Hampshire (Mr. DURKIN): Provided, That the said Senators, or either of them, may, from the time under their control on the passage of the said bill, allot additional time to any Senator during the consideration of any amendment, debatable motion, appeal, or point of order.

Ordered, further, That the vote on final passage of the said bill occur no later than 4:00 p.m., Wednesday, April 26, 1978, if the Senate considers it on that day.

CONGRESSIONAL BUDGET, 1979

The Senate continued with consideration of the Senate concurrent resolution.

Mr. PROXMIRE. Mr. President, I am going to yield to the distinguished Senator from Delaware in a moment. Before I do that though, I should like to reply briefly to the Senator from Maine.

I very much appreciate his viewpoint. As I have said before, I think he has done a remarkable job, he and Senator BELLMON, in the Budget Committee in holding down spending. They did make big cuts, as he pointed out, a cut of $37 billion, roughly, in what the authorizing committees requested.

The Senator from Maine argues that this amendment is ambiguous, arbitrary, and undiscriminating. I reply that there is no way, and I think the Senator knows it better than anybody in the Chamber, that a Senator can come in and duplicate the work of the Budget Committee. After all, I have a limited staff. I have two or three people who work on this kind of thing. They work on many, many other things, too. The best that an individual Senator can do, in reality, is to indicate on the basis of the most careful analysis he can give what the level of spending ought to be. To go into meticulous detail on each one of these programs to indicate where the cutback ought to be is something that really is asking too much. If we did it, I think we would be subject to tremendous criticism, because it would be irresponsible.

I am not in a position to hold hearings and to explore in great detail with the Office of Management and Budget and with the various agencies where the cuts could be made. We have some ideas where it is possible. But to do this in detail in this enormously complex budget would be doing far more than would be responsible.

Furthermore, Mr. President, I have great faith in the Budget Committee. I think if we tell them this—after all, this is the first budget resolution; there are three—they will have the opportunity to consider where a reduction should be made in order to comply with this $26 million cutback in obligational authority.

It will not be easy, there is no question about that. It will be difficult, extraordinarily difficult, very painful. There is no way we can make this kind of cut without great difficulty.

Mr. MUSKIE. Will the Senator yield?

Mr. PROXMIRE. Yes, indeed.

Mr. MUSKIE. I do not think it would be difficult at all if the Senator wanted to do it. With respect to spending mandated by current law, you know, you could not do it easily.

But if the Senator wanted to offer an amendment that reflected the table I put in the RECORD this afternoon, it would be very simple to draft the amendment.

National defense, reduce $8 billion; international affairs, $3.1; energy, $2.2; agriculture, $5.1; transportation, $4.2; community and regional development, $2.2; education, training, employment, and social services, $2.5; veterans' benefits and services, $1.4; all other, $2.9.

There is the easiest and quickest way to make the cuts the Senator proposes to, unless he wants it out of housing assistance.

Mr. PROXMIRE. As the Senator knows, there are many ways these cuts can be made and there is a long time to do it.

Mr. MUSKIE. The Senator likes to say that.

Mr. PROXMIRE. It is true.

Mr. MUSKIE. It is not true.

Mr. PROXMIRE. Of course, it is.

Mr. MUSKIE. It is not true and I have given the reasons. These are the only increases in this budget above current law. I want to make that clear.

Mr. PROXMIRE. May I make it clear to the Senator from Maine, there is nothing written in the wind that tells us we have to make the cuts only in areas that have been increased. We can make cuts in old programs.

Mr. MUSKIE. Will the Senator yield so I may make an observation?

Mr. PROXMIRE. I yield.

Mr. MUSKIE. I have been put in as chairman of the Budget Committee in order to acquire some knowledge about how Government money is spent, where it is spent, how fast it spends out. I am saying to the Senator that, when we are talking about this budget, $535 billion of it is mandated by current law.

I am not saying current law cannot be changed, but I am recognizing that it takes some time to change current law when your objective is to run against some of these constituencies built up here in the Senate in support of programs.

So the quickest way to achieve the kind of cut the Senator is talking about is to eliminate the increases over current law that the Budget Committee proposed, and I have given him the areas.

So if the Senator wants to bite the bullet, bite the bullet and make the cuts where they could be effectively made, that is the place.

Mr. PROXMIRE. Mr. President, the Senator from Maine is right. There is no question this is the quickest way to make the cut, but it is not the only way to make the cut.

Let me take the place that is the most difficult of all the issues and examples the Senator gave, that I think every Senator and everybody in the country, almost, would immediately, instinctively say he is absolutely right on—interest on the debt.

He says that cannot be reduced. The fact is that this is something that can be reduced, not much, but it can be reduced some, and because it is so big, it is over $50 billion a year, or $56 billion a year, something of that kind, I think any reduction here is helpful.

How can this amendment possibly result in cutting interest on the debt? We do not have long-term contracts. These are not 20-year bonds. It turns over in about a year. We have a very short term Federal debt, very short term.

The result is that to the extent a cut of this kind results in reduced inflation, results in reduced interest rates, the interest on the debt is reduced.

Now, as I say, it is not a massive reduction, but it is a limited reduction that can be taken into account.

The same thing is true——

Mr. MUSKIE. Well, now——

Mr. PROXMIRE. Let me finish on this point—on a number of contracts. A number of the contracts we have written have an inflation clause in them. Almost all do. Almost all our procurement contracts provide, to the extent there is inflation tied to some index, the Federal Government will have to pay more in 1979.

If this amendment results in a lesser rate of inflation, it means the expenditures required under those uncontrollable, apparently, contracts will, in fact, be reduced.

And, of course, Government salaries also are tied to an inflation index, as is the social security tied to the inflation index.

So I do not think it is quite true to say the only way we can make any cuts is to cut the increases that have been proposed.

Mr. MUSKIE. I do not believe that I said that.

I said that when we are talking about cutting what is mandated by current law, we have to change the law. Indexing is in current law and it is reflected in this budget resolution. If we want to propose eliminating indexing for social security benefits, we have to change the law.

Mr. PROXMIRE. I do not propose that.

Mr. MUSKIE. I am not saying the

Senator proposed it. But he keeps talking about these other places and every time I come to a specific place, he says, "I am not talking about that." So that every time I come to a specific place, he says, "I am not talking about that." So that every time the Budget Committee mentions specific places, tries to identify a specific place and identify the difficulties of cutting in a specified place, the Senator says, "Well, I don't mean that specific place, I mean some other places."

Well, what other places? Every specific place I suggest, "Oh, I don't mean that."

In the table I put in the RECORD, there are specific places, and all we have to do is reject the increases proposed by the Budget Committee. They have not yet been approved by the Congress, they are not a part of law.

So, here is the easiest target. But the Senator says, "I don't want the easiest target, there are some other places."

Then he talks about indexing and I remind him that it is part of current law. He says, "I don't mean that."

Mr. PROXMIRE. No; the Senator misunderstands.

Mr. MUSKIE. I would like to know what the Senator means.

Mr. PROXMIRE. I understand indexing is part of the law. I do not say we should change the index. But I say we will have a lesser rate of inflation, in my judgment, if this amendment passes. If we have a lesser rate of inflation, it means we have a reduction in the amount to be paid out under indexing, without changing the law at all.

Mr. MUSKIE. Let me ask this——

Mr. PROXMIRE. That we have to pay out of interest. It means we have a lesser rate we have to pay out in salary increases, because there is a moderation in inflation.

Mr. MUSKIE. Let me ask the Senator this, he has not told us what budget authority he proposes to cut.

I assume without asking that he does not mean to cut $25.5 billion in budget authority from housing assistance. That spends out over as much as 40 years. If we were to cut that, the contribution to the inflation fight would be virtually zero because we do nothing to save outlays in the short run. But if we cut budget authority that spends out in 1 year, like salaries in the defense function, then we could reduce the deficit by $26 billion and that might have an impact on inflation.

It might also trigger unemployment, but, in any case, there we would make a positive impact on inflation if we wanted to cut salaries in the defense function by $26 billion.

But until the Senator tells us where he is going to cut budget authority, we cannot possibly estimate the outlays or the economic effects.

Mr. PROXMIRE. My time is almost up.

Mr. MUSKIE. Well, charge the last 10 minutes to my time, I do not need it.

He may have an estimate in his mind, but we cannot estimate how much reduction in outlays that would mean, and in the national deficit, how much less borrowing that would mean, and how much downward pressure on interest rates that would produce.

How will we provide answers like that when the Senator does not tell us where the budget authority is to be cut?

Mr. PROXMIRE. Mr. President, the gist of the argument by the Senator from Maine is that we cannot do it. It cannot be done.

I say it can be done. He says that we can do all right, but only if we eliminate all of the increases that the administration has proposed.

Mr. MUSKIE. Will the Senator yield?

Mr. PROXMIRE. Well, that is what I understood him to say.

Mr. MUSKIE. I have not mentioned cuts from the administration. I have told the Senator of cuts and increases included in this budget resolution, and when he interprets my remarks saying that cuts cannot be made, I say we cut $36.9 billion from recommendations by committees, including the committee of which the Senator from Wisconsin is chairman.

Mr. PROXMIRE. I said that.

Mr. MUSKIE. So do not interpret what I say as meaning it cannot be done. We have done it, but we have done it in a thoughtful, careful, rational way, in which we try to give people the facts about what we have done and the implications of what we have done. We have not given the Senator a meat ax. We have given him specific facts.

Mr. PROXMIRE. Mr. President, do I have the floor?

The PRESIDING OFFICER. The Senator from Wisconsin has the floor.

Mr. PROXMIRE. Mr. President, I have indicated that we are making an amendment that would cut obligational authority. We have a right to make that amendment. The Senator from Maine, of course, has indicated that he disagrees with the amendment very strongly.

He has pointed out, and I have agreed with him, that he has made a cut of $36.9 billion, including a cut in what the Banking Committee recommended over my objection. I wanted the committee to recommend a reduction lower than what the President had called for. But the Budget Committee has indeed made those reductions.

It is my position that we can make a 5-percent cut in obligational authority and we can do so responsibly.

The Senator has raised the question as to where cuts of this kind could be made. One is in the nonmilitary personnel in the Pentagon. The Pentagon has almost a million employees. It is proposed that they cut that number by at least 50,000. That would be $500 million. That would be a cut that would have an effect on outlays almost completely, because the military personnel and the pay of nonmilitary personnel would be reflected about 97 percent in an outlay reduction.

Any cut in operation and maintenance would be about 86 percent, reflected in a reduction in outlays.

Procurement would be a much lesser reduction. The cut there, I am told, would result in about a 14-percent cut.

Mr. President, almost every element of the budget is subject to a variation in the percentage of reduction that you get in outlays if you cut obligational authority. We recognize that. We recognize that it would be very difficult, in our view, for us to put together a specific listing of areas we might reduce.

Furthermore, if we did that, I am sure there would be no way we could get reasonable consideration. I think it is perfectly proper—I know that other Senators may not think so, including the Senator from Maine—for a Senator to come on the floor and indicate that he would like to put a limit on obligational authority and make this kind of recommendation. That is what I propose, and that is all I propose.

I think the function of the Budget Committee, if this amendment is adopted, would be extraordinarily difficult; but I think they could do it, and do it in a responsible way.

Mr. President, I yield 15 minutes to the Senator from Delaware.

Mr. ROTH. Mr. President, I ask unanimous consent that Bruce Thompson, of my staff, and Joan McEntee, of the Government Affairs Committee staff, be accorded the privilege of the floor during the remainder of the debate.

The PRESIDING OFFICER. Without objection, it is so ordered.

ON CONTROLLING FEDERAL SPENDING AND REDUCING THE DEFICIT

Mr. ROTH. Mr. President, my colleague Senator PROXMIRE has introduced legislation which will have a major impact in reducing excessive Government spending by decreasing the budget authority. I wholeheartedly support this attempt in exercising fiscal responsibility and am confident that ways can be found where substantial savings of taxpayers' money can be made.

I point out that much of my comments are directed not only at budgetary authority but also outlays, as I was earlier of the belief that the proposal was going to deal with outlays as well.

Recognizing that controlling the budget and reducing the deficit are not easily managed tasks. I am nonetheless certain that suggestions as to how these goals may be achieved would be welcome. Thus, the following suggestions should be described as "areas of promise"—not necessarily programs which should be eligminated precipitiously but rather programs certainly worthy of careful exploration and evaluation by the appropriate committees.

Mr. President, the American economy is in serious trouble, far greater trouble than the administration is either aware of—or willing to admit. Only three short years since this country suffered the severe effects of a destructive recession signs are beginning to appear that rising unrestrained inflation is about to push us right back into the violent jaws of recession once again.

Consumer prices are skyrocketing.

Financial markets are in disarray.

The dollar's value has collapsed on foreign exchange markets, disrupting trade and raising serious questions about the overall safety of the dollar.

By proposing and accepting one inflationary program after another, the administration is giving up the opportunity to put the country back on the road to real noninflationary growth.

Looking for a "quick-fix" to solve our economic problems, the administration is proposing programs which advocate artificial growth—cosmetic fixes that stimulate the economy with huge injections of Government spending.

Perhaps the greatest tragedy of the administration is its inability to make tough choices—to set priorities—and to follow through. Halting inflation was a stated goal of an administration which has shown tremendous "profile" but little "courage" in coming up with the "no's" that are necessary to enforce responsible spending.

THE PROBLEM OF THE DEFICIT

The administration's budget calls for launching the Government into deficit spending to a degree that is neither warranted nor justifiable in light of today's economic conditions. The enormous deficit the Government is now carrying coupled with the 1979 proposed estimate will almost certainly trigger a violent inflationary reaction.

The administration projected Federal spending of $500 billion for fiscal year 1979, which is an 8-percent increase of the revision of the 1978 Ford budget. Using the Ford budget as a base, this year's budget is increased 13½ percent.

In addition to this gigantic increase the administration has built in requests for new budget authority which total over $100 billion more than that of the previous administration.

Early optimism over zero based budgeting must now give way to alarm as almost all Federal programs have increased.

Most alarmingly, the deficit estimated at $60 billion, is dangerously high in light of today's economic recovery.

This expansion of Government growth and deficit spending has too often been ignored or even contributed to by Members of Congress. The time has now come, however, for Congress to awaken to this danger and attempt to control it, for the implications of inaction are too torrendous to contemplate.

Once again, the Budget Committee has attempted to resolve one of the most difficult problems the Senate must face each year. That problem is to sift through the requests of all of the substantive committees and to recommend to the Senate budget authority and budget outlays for fiscal year 1979. It is not an easy task, but is one that is absolutely necessary. Prior to the implementation of the budgetary process, we had little knowledge about the impact of our actions on the economy.

But I am concerned that some of the budget proposals create problems. I think we are all agreed that our major battle today is against inflation. President Carter and Federal Reserve Chairman Miller readily acknowledge this. For that reason, I question the recommendation to increase outlays in 1979 which exceed current policy by $7.5 billion. Both former Chairman Burns and current Chairman Miller have said the key to attacking inflation is to reduce the Federal deficit. By holding 1979 outlays to current policy levels, Federal spending, taking into account increased inflation, would be at the same level as last year.

Instead of the committee's recommended deficit of approximately $55.6 billion, the deficit could be reduced to approximately $48.1 billion. What is the alternative if Congress does not try to hold down its penchant for spending? The answer is easy. The Federal Reserve Board will try to reduce inflation on its own, which means tighter money and higher interest rates. These tight measures will have the effect of off-setting any expectations of growth that might be embodied in the budget resolution. Such action would tend to decrease housing production and make capital spending in the private sector more costly. I think there is a better way to combat inflation.

The basis for the committee's decision to increase current policy outlays by $7.5 billion is found on pages 11–12 of its report. It says the increased spending is necessary, because without it, the economy is expected to grow at a slower rate. This is because consumer spending and housing production will be reduced. It states that the decrease in housing production will occur, because there will be tighter money and higher interest rates.

This is a "Catch–22" argument. The only reason money will be tighter is because the Fed must attack inflation and this is its most potent tool. The only reason the Fed must fight inflation is because Congress refuses to reduce the deficit. Congress' providing large deficits forces the Fed to tighten the money supply which results in high interest rates which reduces housing production.

So the primary premise of the committee that housing production will be reduced next year, therefore we must spend more Federal dollars to spur the economy, is subject to challenge. If the deficit is reduced and the Fed sees no need to raise interest rates by tightening the Money supply, this can be achieved.

ACROSS-THE-BOARD REDUCTION

As a first step toward again achieving some control over spending I have been suggesting that we hold down the rate of Government growth by reducing all outlays by 5 percent. Recognizing such a proposal would naturally exclude the items in the budget which are considered "uncontrollable" such as social security, my suggestion would decrease Federal outlays by approximately $6 to $10 billion. I acknowledge this perhaps is not the most popular method of reducing spending since every program—good or bad—is affected. Yet the time has come when such strong measures should be employed as a means to show both administration and the American taxpayer that we are truly serious about reducing inflation.

I also firmly believe that not even the best run Federal agency would contend there is at least that amount of waste within its programs that a serious, effective management system could find and correct without destroying worthwhile programs. In addition, by such legislation most agencies would be put on notice to track the effectiveness of all their programs and set priorities as to the most valuable.

I was extremly disappointed yesterday to see the amendment offered by the Senator from Virginia rejected. The Inspector General of the Department of Health, Education, and Welfare has presented well documented proof of an over $7 billion waste of taxpayers money in the administration of the Department's programs. That is 5 cents out of every dollar spent by HEW and yet we cannot bring ourselves to apply the discipline which would weed out such waste and mismanagement and, unfortunately, HEW is probably not alone with this problem.

SPECIFIC REDUCTIONS

Realizing that though Congress should respect those programs vitally necessary to the well-being of its citizens, and at the same time, it is incumbent to reduce costs in those areas which are unnecessary and ineffective, I suggest the following specific programs should be examined as to the possibility of achieving reductions.

(1) CETA

Under the Comprehensive Employment and Training Act of 1973 popularly called CETA, the administration was provided with $9.7 billion in fiscal year 1977 to increase public service jobs from 310,000 to 600,000 and $9.6 billion for fiscal year 1978 for 725,000 jobs and other employment and training programs. Though the authorization for CETA was set to expire in 1978 the administration has proposed its extension and indeed an increase in this $12 billion-plus-program which is fraught with problems and misuse. Under a separate welfare program, the administration currently is also proposing an additional 1.4 million public service jobs for welfare recipients.

CETA, contrary to its purpose, has been shown to provide merely a holding action for those already equipped to deal with the labor market and has done little to address the persistently high levels of unemployment among youth, minorities, and the structurally employed.

Rather than creating new jobs, lower level governments either substitute or displace regular employees for federally funded personnel, with some displacement estimates reaching as high as 60 to 90 percent in the long run. If CETA prime sponsors can demonstrate a severe fiscal need, they were permitted to lay off regular employees for 30 days and rehire them using CETA funds. In attempting to control substitution, a plethora of regulations have created horrendous bottlenecks. In addition, State and local governments have only a limited capacity to absorb or supervise extra workers, resulting in many demoralizing make-work projects.

Though I applaud the Budget Committee's recognition of the reduced need for employment subsidies and its recommendation that half the spending of CETA funds be directed for the structurally unemployed, I nonetheless believe it does not go far enough in reducing such inappropriate spending.

In the short run it may well prove impossible to eliminate or phase out most of the 725,000 jobs currently under CETA. Too many large cities are now too heavily

dependent in providing essential public services on their skilled CETA employees to tolerate a replacement of these positions with ones using welfare recipients.

Therefore, I suggest a substantial reduction in funds allocated—a figure which would allow for a much smaller scale experimental program—yet designed to eliminate this horrendous waste and misuse of public funds. This would allow those programs actually aimed at assisting minorities and youth to continue.

COUNTERCYCLICAL REVENUE SHARING

Countercyclical revenue sharing is a program enacted primarily for two purposes: First, to keep State and local governments from cutting services and increasing taxes during recession both of which are actions which tend to nullify Federal stimulative efforts, and two, to stimulate the economy through the public sector and prevent State and local governments from suffering severe fiscal distress. Approximately $3.5 billion has been authorized for the countercyclical revenue sharing program and the President has requested a reauthorization of the program for 1979 at $[illegible] billion.

Mr. President, there are several problems with countercyclical revenue sharing:

It has not acted to stimulate the economy. State and local governments have often used the added revenue to pad surpluses or to provide programs they would have provided anyway.

The philosophy behind the program is faulty. The economy should be stimulated through the active, productive sector of our economy, the private sector, rather than through the public sector. Economic stimulation of the private sector is the key to substantial job growth, because the jobs provided by American businesses are productive and personally rewarding. Adequate job growth cannot be stimulated through the public sector. Thus, countercyclical assistance has been a failure in achieving this important objective—aiding employment in the private sector.

The program has increased the dependency of State and local governments on Washington. It has encouraged their growth, because they do not have to tax to spend, they can merely spend using Federal cash.

Therefore, I would suggest that this program be eliminated.

CONTINGENCY FUND

The administration has proposed a major new urban initiative that would bloat Federal spending by another $2.4 billion. The administration urban policy is one of restoration. Under this approach, the objective is to restore our cities to their former glory. Those who have fled are to be induced back. Block after block of vacated housing must be replaced with occupied housing. Jobs must be plentiful once again.

Actually, as noted by the Washington Post, if the administration could conceivably reduce inflation, this "would have more to do with saving distressed cities than any of the special aid projects envisioned in Mr. Carter's policy statement."

Therefore, I suggest awaiting the implementing legislation to properly evaluate the administration's proposed urban initiatives. In addition, I suggest reducing the contingency fund through which the administration plans to establish its new urban policy.

Mr. President, how much time do I have remaining?

The PRESIDING OFFICER. The Senator's 15 minutes have expired.

Mr. PROXMIRE. Mr. President, I yield the Senator what additional time I may have.

The PRESIDING OFFICER. The Senator from Wisconsin has an additional 21 minutes.

Mr. PROXMIRE. I yield such time as I may have to the Senator from Delaware.

Mr. ROTH. I thank the distinguished Senator from Wisconsin for his generosity.

Finally, I suggest that the following areas in the budget should be closely examined for the purpose of further reducing inflation and the Federal deficit.

FRAUD

Daily news accounts describe the $7.4 billion annual cost of fraud in the Department of Health, Education, and Welfare; attempts to control fraud in the Veterans' Administration and Labor Department are described as incredibly "meager." One can only speculate what the cumulative costs of such deceit within all the Federal agencies actually totals.

Thus I suggest Congress immediately notify the administration to direct each agency to allocate whatever portion of its budget necessary to eliminate immediately any such practices.

IMPROVE MANAGEMENT

Consideration should be given to some form of legislation which would compel review and evalution of Federal programs. During the last months of the Ford administration, the Office of Management and Budget proposed such review and evaluation to circular A–113. By tying the review and evaluation to the expiration of certain wasteful programs, there may be some chance of rationalizing them—or, with a great deal of luck, ending some of them—when they come up for renewal.

"Sunset legislation" which requires Federal Government programs to go out of existence every 6 years unless specifically reenacted by Congress should be enacted. The "Sunset" bill would assure all spending decisions are reconsidered at least once every 6 years by Congress. The chief virtue of this process is seen in its scheduling of programs in the same functional area to be reconsidered during the same Congress.

ADVISORY COMMITTEES

We have heard a great deal about how the administration has drastically reduced spending for independent agencies and commissions. Yet we note in the President's budget increases for agencies such as ACTION, the Board for International Broadcasting, Consumer Product Safety Commission, and Community Services Administration and others, in which the appropriateness of an increase is questionable.

I, therefore, urge that a thorough accountability be requested of each agency and commission to insure that such allocations are truly necessary.

REDUCING SUBSIDIES

Fiscal irresponsibility is best exemplified by the Government's subsidizing tobacco prices while at the same time launching a major program to reduce smoking. Unnecessary and outdated programs such as those supporting tobacco, sugar, and peanuts should be eliminated.

TRAVEL

Superfluous travel in the guise of bringing Government closer to the people adds millions of dollars to the Federal budget each year.

Since we presently are in a particularly distressing economic situation the need to curb spending is obviously acute.

I would thus suggest holding the level of travel for Government employees at last year's level—$2.8 billion.

Other areas which should be further examined as to the possibility of arriving at additional decreases are:

Elimination or delay of nonessential public works projects at possible savings of several hundred million dollars.

Inequities in impact aid assistance—subsidizing those children in affluent suburbs—such as Washington, D.C.—while those located in poverty areas are not covered.

Closing or consolidation of nonessential military bases and commands maintained merely for political expediency.

Finally, Mr. President, as you may recall, in the President's budget for fiscal year 1978, the Ford administration for the first time attempted to show the effects of its budget proposals for a 4-year period following the fiscal year for which the budget was submitted. For the first time, we had the opportunity to see the implications in future years of the decisions we took that year.

Mr. President, I would like to commend the Committee on the Budget and its distinguished chairman for similarly addressing the implications of the decisions we make this year on the budget on the years that lie ahead. Chapter III of the committee's report for the first time lays out economic and bugetary objectives for the 5-year period, fiscal year 1979 through fiscal year 1983.

However, Mr. President, the committee's budgetary objectives for the 5-year period reveals a very disturbing decision. The committee tacitly accepts virtually the entire administration recommendation for budget authority of $568 billion for fiscal year 1979. Using the administration's calculation, the committee's recommendation of $566 billion would mean that approximately $679 billion would be available for spending beyond fiscal year 1979.

Mr. President, why is there need for such a large carryover into future years? $679 billion is a startling increase of $110

billion or 20 percent over the amount recommended for fiscal year 1978 by the prior administration. By contrast, the recommended increase between fiscal year 1977 and fiscal year 1978 by the prior administration was $14 billion or a 3-percent increase.

Mr. President, I fail to see the need for budget authority available for expenditure after fiscal year 1979 of $679 billion. Accordingly, I strongly suggest the budg- duced from its recommended $566 billion. Budget Committee be substantially reduced from its recommended $566 billion. Presumably, this will reduce the amount available for future spending and the concomitant pressures to spend that money. Locking ourselves into a 20-percent increase in the budget for future years would be unwise and fiscally unhealthy.

I yield back the remainder of my time.

Mr. BELLMON. Mr. President, will the Senator yield 5 minutes?

Mr. MUSKIE. Yes.

Mr. BELLMON. Mr. President, I want to begin by commending both Senator PROXMIRE and Senator ROTH for their efforts to be fiscally responsible.

The objective as outlined is very closely parallel to the objectives of the Budget Committee. We go at it in a little different way, but I would remind him we have made significant cuts in the requests made by the authorizing committees, and we have also reduced the budget figures significantly below the requests made by the Appropriations Committee, so we are more or less on the track here, perhaps traveling at slightly different speeds.

But I hope in both Senator PROXMIRE and Senator ROTH we have allies who will help us as time goes on and we try to bring the budget into balance, and I am particularly impressed this year that Senator PROXMIRE is offering an amendment to cut budget authority, when last year at this time he was offering an amendment that added $6.2 billion in budget authority in the housing function. He won that amendment by a vote of 57 to 39.

Senator PROXMIRE also added $500 million in budget authority for community and regional development, and he won that by 68 to 28. So I think we made a very significant step forward in getting allies when last year we were having the opposite problem.

I would also point out to Senator ROTH that the budget authority figures in the Senate resolution are significantly under the figures that have been offered by either the House or the President. As I have already mentioned, they are significantly under the figures suggested by the authorizing and appropriations committees. So we are, we think, being very responsible in the figure we have brought forth.

So far as the deficit being too high, I believe the distinguished Senator from Delaware mentioned $60 billion. Our deficit is $55.6 billion, which is about $7 billion under the President's figures. So we have also reduced that figure.

We have done it, as the Senator will probably point out, by postponing the date for the tax cut.

We have also cut some of the spending figures. But I would hope that both Senators PROXMIRE and ROTH would help us hold the deficit down to the level we have set rather than having it go up either by increasing spending or increasing the tax cut or by changing the date that is in the resolution.

I feel, as has been said here, that Congress must continue its efforts to reduce the deficit, and I hope both the Senators will join us as we continue in this direction.

In some of these specific points which have been raised, on CETA and the distinguished Senator from Delaware mentioned this fact, we have switched the emphasis from countercyclical over to the structural area, and in the outyears, if he will look at the figures up to 1983, this becomes even more apparent. We feel that this program can help probably more than any other in reducing structural unemployment, and we are trying to place the emphasis in that area.

We have also taken several specific steps to cut back on the impact of inflation. We have recommended a 5-percent pay cap on both the civilian and military employees of the Federal Government. This is a half percent lower than the figure the President has now recommended. The House has no pay cap at all in their resolution. So again the Senate budget resolution is significantly better than either the administration or our colleagues on the House side have presented.

We have also undertaken, by working with the Chairman of the Federal Reserve, to make sure that monetary policy will be responsible. This is a difficult situation for the Federal Reserve because of the international situation. But we feel they are going to adopt policies that will accommodate whatever actions Congress takes in fiscal policy so we will not be working at cross purposes.

There is a great need, as I am sure every Member of the Senate knows, for Congress to continually reexamine and, possible, greatly amend some of the regulatory legislation that has the effect of constantly raising our prices. So this is another area where the Budget Committee would like to enlist the support of the authorizing committees in an effort to bring inflation under control.

Let me conclude, Mr. President, by saying that the Budget Committee is not at all opposed to, but rather we are very much in support of, the objective that Senators PROXMIRE and ROTH have outlined this afternoon. We feel we have already moved as far in that direction as we can go this year. For that reason I personally cannot support the Proxmire amendment.

Mr. PROXMIRE. Mr. President, I yield 3 minutes to the Senator from Delaware.

Mr. ROTH. Mr. President, I would, first of all, again like to commend both the Senator from Oklahoma and the distinguished Senator from Maine for I know the very competent and difficult job they have done in cutting back the requests that have been made of them by the various committees.

I, for one, feel that there are, however, as I indicated in my principal statement, areas where further savings can be made. As I said in that statement, I pointed out and did commend the Budget Committee for what it did in the CETA area.

My feeling is, however, that there are substantial funds that can be saved in that program as well as in some of the other areas I outlined. One of my concerns, and I plan to offer an amendment later, is that much of the saving that is coming about would be through reducing the tax cut that has been proposed by this administration. I am greatly concerned that it appears that we are substantially increasing Federal spending and throwing much of the burden of meeting the threat of inflation on the taxpayer back home. What I seek is ways and means to hold down the spending.

I think there are further savings that can be made, so that we can give the private sector a chance to operate and create the meaningful jobs we want there. But I want to make clear, Mr. President, that I think that the Budget Committee is doing an outstanding job in bringing about budgetary responsibility in Congress, despite the problems I know it faces from time to time.

● Mr. McINTYRE. Mr. President, I support the amendment offered by the senior Senator from Wisconsin, Mr. PROXMIRE. In the past I have voted against across-the-board proposals to lower the Federal budget. I have felt that such action severely limits the options that must be considered in assembling our Federal spending priorities. I believe, however, that we are facing a critical situation that must be addressed promptly. Furthermore, the amendment offered by Senator PROXMIRE is not a simple across-the-board cut. While the amendment represents a decrease of $26 billion in budget authority it provides for the Budget Committee to make specific determinations on individual cuts in the budgetary aggregates.

We simply must deal with this continuing expansion of the Federal deficit. This amendment, in my opinion, is not a budget cut, it is rather a deficit cut. I believe that the lowering of the Federal deficit is needed at this time if we are to effectively deal with our greatest economic problem today—inflation. This reduction in budget authority and its corresponding reduction in the Federal deficit will provide the means by which Congress could support a tax reduction without increasing the already bloated deficit. Also, it would allow chairman Miller and the other Governors of the Federal Reserve Board to move to a more expansive monetary policy, thereby lowering interest rates without adding to inflationary pressures. This cut will also mean that the Federal Government can avoid borrowing an additional $26 billion which would be a clear signal of our commitment to reduce inflation. I believe a lowering of the Federal deficit is essential if we are to reduce our present rate of inflation, increase our national economic growth, and provide additional employment. We simply cannot afford to continue to add deficit on top of deficit and expect our economic problems to be solved.

There is no way we can minimize the impact of continuing budget deficits in the $60 to $70 billion a year range. Over the last 5 fiscal years total deficit spending will amount to nearly $180 billion. This means that since 1974 the Federal Government has been forced to turn to the private capital markets with the result that interest rates have been pushed upward and available credit sources have been restricted. I believe that we can no longer afford to continue to accept deficit after deficit and if we do not take action immediately we are certainly setting the pattern for a credit squeeze in the future.●

Mr. PROXMIRE. Mr. President, if the Senator from Maine is willing to yield back the remainder of his time, I am willing to yield back the remainder of mine.

Mr. MUSKIE. I am willing to yield back the remainder of my time.

The PRESIDING OFFICER. All remaining time having been yielded back, the question is on agreeing to the amendment of the Senator from Wisconsin.

Mr. PROXMIRE. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Wisconsin. The yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from South Dakota (Mr. ABOUREZK), the Senator from Indiana (Mr. BAYH), the Senator from Delaware (Mr. BIDEN), the Senator from Montana (Mr. HATFIELD), and the Senator from Hawaii (Mr. INOUYE) are necessarily absent.

Mr. STEVENS. I announce that the Senator from Michigan (Mr. GRIFFIN) and the Senator from Oregon (Mr. PACKWOOD) are necessarily absent.

I also announce that the Senator from Tennessee (Mr. BAKER), the Senator from Utah (Mr. GARN) and the Senator from Kansas (Mr. PEARSON) are absent on official business.

The result as announced—yeas 33, nays 57, as follows:

[Rollcall Vote No. 132 Leg.]

YEAS—33

Allen	Hatch	Nelson
Byrd, Harry F., Jr.	Hatfield, Mark O.	Nunn
Church	Hayakawa	Proxmire
Curtis	Helms	Roth
Danforth	Huddleston	Sasser
DeConcini	Leahy	Schweiker
Domenici	Lugar	Scott
Durkin	McClure	Stone
Ford	McGovern	Thurmond
Hart	McIntyre	Wallop
Haskell	Metzenbaum	Zorinsky

NAYS—57

Anderson	Cranston	Humphrey
Bartlett	Culver	Jackson
Bellmon	Dole	Javits
Bentsen	Eagleton	Johnston
Brooke	Eastland	Kennedy
Bumpers	Glenn	Laxalt
Burdick	Goldwater	Long
Byrd, Robert C.	Gravel	Magnuson
Cannon	Hansen	Mathias
Case	Hathaway	Matsunaga
Chafee	Heinz	Melcher
Chiles	Hodges	Morgan
Clark	Hollings	Moynihan
Muskie	Sarbanes	Stevenson
Pell	Schmitt	Talmadge
Percy	Sparkman	Tower
Randolph	Stafford	Weicker
Ribicoff	Stennis	Williams
Riegle	Stevens	Young

NOT VOTING—10

Abourezk	Garn	Inouye
Baker	Griffin	Packwood
Bayh	Hatfield, Paul G.	Pearson
Biden		

So, Mr. PROXMIRE's amendment No. 1799 was rejected.

TIME-LIMITATION AGREEMENTS

(Senator HART assumed the chair.)

Mr. MUSKIE. Mr. President, I should like to get some indication of where we stand this afternoon. The next issue will be presented by Senator CURTIS, a motion to recommit which he will offer. The next issue will be an amendment by the distinguished Senator from Delaware (Mr. ROTH). I understand that Senator TOWER may have an amendment.

Mr. CURTIS. Will the distinguished Senator yield?

Mr. PROXMIRE. If the Senator will yield, I have an amendment that would cut $5 billion from the budget authority at this time.

Mr. MUSKIE. I should like to find out right now. Senator CURTIS has agreed to 30 minutes to be equally divided.

Mr. CURTIS. I shall be glad to limit this to 30 minutes, 15 minutes on each side, assuring the Senate that we shall make up in quality of debate what we yield in length.

Mr. MUSKIE. Mr. President, I ask unanimous consent that there be a time agreement of 30 minutes, equally divided, on the Curtis motion; and 1 hour, equally divided, on the Roth amendment.

Mr. ROTH. Will the Senator yield for a moment?

Mr. MUSKIE. I yield.

Mr. ROTH. I understand that the Senator from California would like some time. I am not sure how much he wants.

Mr. MUSKIE. May we have unanimous consent on the Curtis motion, 30 minutes equally divided?

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. ROTH. Mr. President, as far as my amendment is concerned, I am satisfied to set it at 1 hour, to be equally shared, but the junior Senator from California would like 15 minutes prior to my resolution to give a statement.

Mr. MUSKIE. Mr. President, I ask unanimous consent that the distinguished Senator from California have 15 minutes' time following the Proxmire amendment, to be followed by an hour on the Roth amendment, to be equally divided.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. HARRY F. BYRD, JR. Will the distinguished Senator from Maine yield?

Mr. MUSKIE. Yes, I yield.

Mr. HARRY F. BYRD, JR. I wonder what the rush is. We are dealing with vast amounts of money here. I should like to have a chance to speak on the proposal to recommit. I might want to speak on the Roth amendment. I might want to speak on the Proxmire amendment. I might want to speak on other matters. I do not see why we have to get unanimous consent for 15 minutes on very important and vital issues.

Mr. MUSKIE. Any Senator may object, of course.

Mr. HARRY F. BYRD, JR. I do not like to object. I may object.

Mr. MUSKIE. The unanimous-consent requests have been put and agreed to.

Mr. DOMENICI. Mr. President, I may have an amendment of selective cuts. I should agree to 30 minutes, 15 minutes on a side.

Mr. MUSKIE. May we have the attention of the Senator from Virginia? I put the unanimous-consent request that on the Domenici amendment, there be 30 minutes equally divided.

Mr. HARRY F. BYRD, JR. I heard the request. I did not object. I have no objection to any of the requests. All I am wondering is why we have to have such limited time on the vast sums of money which are involved. These amendments seem to me to be important amendments or they would not have been offered. I shall not object to the time limitation.

Mr. MUSKIE. I can only say to the Senator that, as far as I am concerned, the Budget Act provides for 50 hours of debate, 2 hours on every amendment. That is fine with me. There are, I think, possibly six amendments that are pending or about to be offered and, under the Budget Act, that would require 12 hours unless shortened.

It is the authors of those amendments who are suggesting the time agreements. If that is the will of the Senate, that is fine with me. I am willing to stay here all week on this resolution if that is the will of the Senate. But as these amendment sponsors seek to get time agreements, I put them to the Chair, as I am willing to do. I am not going to exercise unilateral opposition to them. If any Senator wishes to object, I certainly accept that. I am anxious to serve the will of the Senate.

Frankly, I hope that we will give this budget resolution enough attention so that, if and when we finally approve it, we will honor it and support it afterwards. If it takes a week to do that, I am willing to do that. I am not sure that time alone is the measure of the Senate's will. But if time alone will do it, I shall stay here 2 weeks on this resolution. I understand what the Senator is saying.

Mr. HARRY F. BYRD, JR. You cannot get a very good understanding of something in 15 minutes, I will tell you that.

Mr. MUSKIE. I agree; I have difficulty myself.

Mr. SCOTT. Mr. President, reserving the right to object, I am in sympathy with what the floor managers are attempting to do to dispose of this. At the same time, I have the same concern as my colleague. I am wondering if the leadership on both sides, the Senator from Oklahoma and the Senator from Maine, would indicate that if some Senator wants to speak, they have no objection to unanimous consent for that Senator to speak a few extra minutes. Maybe that would be a solution.

Mr. MUSKIE. It would not be necessary because we do have time on the bill. I assure Senators that if time has run out on any of these amendments or motions and any Senator wishes to speak, I would yield time on the bill. I would certainly do that.

Mr. SCOTT. I thank the Senator.

Mr. MUSKIE. I say that to the senior Senator from Virginia as well.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. BELLMON. Mr. President, it is my understanding that the distinguished senior Senator from Texas has an amendment, on which a 1-hour time agreement would be agreeable.

Mr. MUSKIE. I ask unanimous consent that there be an hour on the Tower amendment to be equally divided.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. CURTIS. Mr. President, I yield myself 10 minutes.

Mr. MELCHER. Will the Senator yield?

Mr. CURTIS. I cannot yield on my time. I shall yield if he wishes to make a request.

Mr. MELCHER. Will the distinguished chairman of the Budget Committee yield me 3 minutes on the bill?

Mr. MUSKIE. Yes, of course. I yield 3 minutes to the distinguished Senator from Montana.

Mr. MELCHER. I thank the distinguished chairman and the distinguished senior Senator from Nebraska.

Mr. President, in this resolution, there is an item of $3.9 billion for budget authority for energy supply. I want to draw the attention of the Senate to a small portion of that. It is the magnetohydrodynamics, or MHD, program.

Magnetohydrodynamics (MHD) is a national program with involvement of a score of private and public research and engineering centers in almost as many States. The late Senator Lee Metcalf, Senator Mike Mansfield, and myself sponsored a symposium on November 6 and 7, 1969, at Eastern Montana College. With our State's vast coal reserves, we were advocating a crash program to develop an environmentally cleaner method such as MHD to generate electricity from coal. The MHD environmental advantages are no air pollution problems and very little water required. This technology further indicated an increase in efficiency of 40 to 50 percent.

At that time little or no Federal funds were being allocated for MHD research. However, in the early 1970's Federal involvement began to grow, and by 1975 the Energy Research and Development Administration had developed the "national open cycle MHD power development program." It has never been a crash program; in fact, many of us believe it has been underfunded. But we are now at a critical point when a policy decision must be made on whether the potential of MHD justifies an acceleration in the program.

The component development and integration facility will be operable in 1979. Although it is in Butte, Mont., the various component parts that will be tested at this facility are being developed at the score or more of centers scattered across the country. Only 9 percent of the total funds appropriated for the program have been spent in Montana. The bulk of the funds were for contracts let by ERDA for component parts, or "hardware." Avco, Westinghouse, General Electric, and others advocate an immediate acceleration of the program to acquire different components of different engineering for testing at the CDIF as quickly as possible. Two successes they point out justify the acceleration. These are development of the "super magnet" and Avco's test of a generator this past March which operated successfully for 250 hours before being shut down on schedule.

The advice of the engineers and scientists in these centers—loosely called the "MHD community"—is to accelerate the program this year to save not only time but also money. They firmly believe the development of another complete hot flow train, enlargement of the CDIF to rapidly test the various components and a determined start toward successful development of other components such as the air heater are essential for fiscal year 1979 funding of the program. They believe the MHD program can reach a point of successful design 18 to 24 months sooner by this acceleration.

I concur with their judgment, and I stress again it is a policy decision on the part of the committee which I hope will be affirmative.

Mr. TALMADGE. Will the distinguished Senator yield to me 1 minute on a privileged matter?

Mr. MUSKIE. I am happy to yield to the Senator from Georgia.

EMERGENCY AGRICULTURAL ACT OF 1978

Mr. TALMADGE. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on H.R. 6782.

The Presiding Officer laid before the Senate the following message from the House of Representatives:

Resolved, That the House insist upon its disagreement to the amendments of the Senate to the bill (H.R. 6782) entitled "An Act to permit marketing orders to include provisions concerning marketing promotion, including paid advertisement, of raisins and distribution among handlers of the pro rata costs of such promotion", and ask a further conference with the Senate on the disagreeing votes of the two Houses thereon.

Ordered, That Mr. Foley, Mr. Poage, Mr. de la Garza, Mr. Jones of North Carolina, Mr. Jones of Tennessee, Mr. Mathis, Mr. Bowen, Mr. Rose, Mr. Richmond, Mr. Wampler, Mr. Sebelius, Mr. Johnson of Colorado, and Mr. Moore be the managers of the conference on the part of the House.

Mr. TALMADGE. Mr. President, I move that the Senate insist on its amendments and agree to the further conference requested by the House on the disagreeing votes of the two Houses, and that the Chair be authorized to appoint the conferees on the part of the Senate.

The motion was agreed to and the Presiding Officer appointed Mr. TALMADGE, Mr. EASTLAND, Mr. MCGOVERN, Mr. ALLEN, Mr. HUDDLESTON, Mr. DOLE, Mr. YOUNG, and Mr. CURTIS conferees on the part of the Senate.

Mr. TALMADGE. I thank my distinguished friend from Maine.

CONGRESSIONAL BUDGET, 1979

The Senate continued with the consideration of the concurrent resolution.

MOTION TO RECOMMIT

(Purpose: Motion to recommit the report back within 3 days with a resolution calling for a balanced budget)

Mr. CURTIS. Mr. President, I have a motion to recommit at the desk and I ask that it be read at this time.

The PRESIDING OFFICER. The motion will be stated.

The legislative clerk read as follows:

The Senator from Nebraska (Mr. CURTIS) moves to recommit the resolution to the Committee on the Budget with instructions that they report back within three (3) days a resolution which provides that the total outlays of the Government during the fiscal year 1979, not including any outlays for the redemption of bonds, notes, or other obligations of the United States, shall not exceed the total receipts of the Government during the 1979 fiscal year not including any receipts derived from the issuance of bonds, notes, or other obligations of the United States.

Mr. CURTIS. Mr. President, with all sincerity, I hope the time will arrive that the Committee on Budget will be the most powerful committee in the U.S. Senate.

I think the procedure should be reversed; instead of the Budget Committee asking other committees, "What do you want?" they should bring in an orderly budget and say, "This is what you get."

The purpose of this motion to recommit is to ask them to bring in a balanced budget and let us see what it would look like.

Very frankly, it could not be done without changing some laws. So it would be expected that they would have an accompanying statement recommending what we have to do to bring that about.

Mr. President, are we going to let procedural and technical reasons stand in the way of balancing the budget?

There are not any untouchables except the interest on Government bonds and other contractual arrangements. Any law that provides for benefits that has passed can be modified, changed, or repealed.

Mr. President, I hold in my hand a document called "Balancing the Budget" and it shows that it is projected that the budget will balance in 1983. In the meantime, the debt will increase by $170 billion.

I do not doubt the sincerity nor the dedication of those who projected those figures. But I am here to say that what they project will never come to pass.

We have not inaugurated a President in the memory of man who has not advocated the same thing, "You give me what I want, we'll have a Utopia, the economy will boom, and the budget will balance down the road."

It will just never happen.

Mr. President, if this committee were allowed to recommend changes in law, there are many places it could be done. I will start out with the Department of Agriculture. They have a budget of $14

billion. Five billion dollars could be knocked off.

We are facing a deficit of over $50 billion. Instead of compromising a pay cut, why not let us postpone it? Why not have a pay raise of zero until the budget is balanced?

The injury we are doing to people and to units of Government by uncontrolled inflation is worse than we can make up for by sending them a pay increase.

Mr. President, a budget could be balanced now if we had the will to.

In the Carter budget, there is approximately $9 billion for food. There are not that many hungry people in the country. There are not that many people unable to buy their food to require $9 billion.

The school lunch program feeds everybody, whether they can afford to pay for their lunch or not.

Everyone knows of the errors and abuses in food stamps.

Education, $19.6 billion.

Well, I will tell you how it works out in Nebraska. The Federal Government pays 10 percent of the cost of education and they have 100 percent of the say as to how every school district is run.

They would be better off, since they have to pay the bill anyway, if the Federal Government would get out of that business.

Stop the inflation and the people would have to pay less to provide better schools.

The idea here is that we have to start a new program to teach people to read, then somebody researches and finds they cannot spell and we start another program.

What are schools for?

I say this, not because I am against education; I am for education. However, Federal interference in education is lessening the quality of it.

Here is one item, aid to State and localities, which alone totals $81 billion.

What business have we with revenue sharing when we have no revenue?

We have done more damage to every city, county, township, and State by the uncontrolled inflation we have set into motion in the last 20 or 30 years than we could possibly make up for with these funds.

Carter did not think of it. It has been happening right here on this floor for several decades, increasing the costs of Government, increasing the cost of doing something.

I talked to a county commissioner. He said, "I'm getting weary of my job. It used to be a little repair job around the courthouse, maybe, would cost us $20. Now we are lucky if we get out for $150."

Inflation. Inflation. Then we talk about revenue sharing when we have no revenue.

A cut of 81 billion right there would wipe out the deficit.

Do not say the budget could not be balanced now. All it takes is the will to do it.

Here are some other figures: Medical and health programs, $56 billion, when we have a deficit; when social security taxpayers are carrying an unbearable burden.

What do you have to do to get free hospital care and free medicine? Just prove you are 65 years of age. That is all you have to prove. You can take two or three vacations. You can acknowledge the fact that your home is paid for, that your insurance is paid for, that your kids are educated. But if you are 65, you will get free medicine, and it is charged to the social security taxpayers.

I want all people who cannot provide adequate medicine for themselves to have Government help, but we have gone much beyond that.

Again I say that the budget can be balanced, and all we need is the will to do it. I would like to see this committee assert the right to do that. That is what it was created for. A great grass roots organization sprang up to urge Congress to go to a budget system, centralize authority, and create a committee. Why? To bring the budget in balance.

Another thing: There is no such thing as a controlled or restrained deficit. It is like someone trying to be approximately honest or nearly intellectually honest. You either are honest or you are not.

When we try here to control deficits and somebody says a deficit of $55 billion is acceptable, and someone else comes on the floor with a program in which they believe a great deal and they say that $55.5 billion also should be accepted, how are you going to decide that? When we get into those relatives and abandoned absolutes, we get into quicksand.

This budget never will be balanced, according to this chart. The budget of the United States never will be balanced until individuals decide they are going to assert the will to do it.

Mr. President, I am not suggesting a single cut for which I have not voted previously. My party inaugurated revenue sharing and I opposed it. The idea of revenue sharing, when we have no revenue to share! Where can you find anybody who knows anything about government who says it is a good proposition to have somebody raise some money and give it to some politicians to spend, who do not have to face their own people to raise it? Is that the path to good government and responsibility? Removing that one item would balance the budget.

We are paying unemployment compensations totaling $10.6 billion. There is ample room for a saving there. Does anyone contend there are not abuses in unemployment compensation?

Here is another item: Retirement and disability, $122.4 billion. I am one of those who believe that we must not renege on the social security retirement payments. They have to be met in real dollars. But how about the disability? It exceeds the original estimates by 500 percent. We should examine the law that requires that.

As long as the Budget Committee asks the other committees, "How much do you want?" and they run an adding machine and bring the figures in here, the Budget Committee is going to be scolded and held up to ridicule, and they are going to have headaches and sleepless nights. I would like to have them assert the power to bring in a balanced budget. Let the Senate assume the responsibility to vote for it or against it. They can bring in an accompanying statement and tell us what we have to do in order to put that budget in balance.

Mr. President, there are many, many places to cut. We talk about welfare reform, and then we are presented with a plan to expand welfare.

The program of aid for families with dependent children takes care of families in which there are children. What does the administration recommend? The administration recommends that we extend that to couples who have no children and to single persons.

If we follow all this nonsense that somewhere down the road the budget accidentally is going to be balanced, we may be kidding ourselves, but the eighth graders back home are better at arithmetic than that. We could do some welfare reform, if we wanted to. At the present time, you project what your needs are going to be and how much money you have and get on welfare. It is estimated by responsible people that if we required a retrospective accounting of 1 month, it would save $1.9 billion.

If we revised what they call the earned income disregard, which is the means by which people with substantial income still stay on welfare, we could save $5.25 million.

Mr. President, I hope that everybody who believes that we should have a balanced budget will vote for this motion to recommit. Then let the committee bring it in and see what it is. If they took it all out, or a significant part, any significant part of it, I would not complain. But I believe that the Senate has a right to vote on a balanced budget.

Let us draw the line. I hope the Budget Committee will assert all the power they can. They have the biggest job in Congress, and they should not be asking—they should be telling—what the budget would permit. Then they could give us a prescription for the medicine as to what laws we had to change.

Mr. President, I reserve the remainder of my time.

Mr. BELLMON. Mr. President, will the Senator yield me 5 minutes?

Mr. MUSKIE. I yield.

Mr. BELLMON. Mr. President, the Senator from Nebraska raises a very interesting concept. Frankly, it is one that has interested the Senator from Oklahoma from the beginning of the budget process.

Each year since we have started, I have asked the staff to put together what a balanced budget would look like. I ask unanimous consent that this document be printed in the RECORD at the conclusion of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. BELLMON. Mr. President, here is what it would take for a balanced budget for fiscal year 1979. It would take an across-the-board tax increase of 12.5 percent. This means that a taxpayer in the $5,000 to $10,000 income

bracket would have his taxes go up $170. A taxpayer in the $10,000 to $15,000 income tax bracket would have his taxes increased by $470. A taxpayer in the $15,000 to $20,000 income tax bracket would have his taxes increased by $800. For taxpayers with incomes over $20,000, the average would be increased $2,450 per year.

Mr. President, if we chose to balance the budget by increasing taxes to that extent, even then we would not have a balanced budget, because this increase in taxes would reduce the level of economic activity, and we would have to have another tax increase and would succeed only in slowing the economy down, throw a large number of people out of work, and would never get the budget balanced by that route.

Finally, to balance the budget by cutting our spending down to the level of our anticipated revenues, we would find ourselves having to cut—if we did not cut the entitlement programs, which we could not do unless the laws were changed—we would have to cut all these nonentitlement programs by 22.5 percent.

I would like the Senator from Nebraska to listen to this: There would have to be a cut in national defense of $26.2 billion.

Mr. CURTIS. Mr. President, will the Senator yield?

Mr. BELLMON. I listened to the Senator from Nebraska until he finished, and I should like to finish before I yield.

We would have to cut back on agricultural research by $300 million. The interstate highway program and all others would be cut almost $5 million. The cut in education would be almost $6 billion.

We also would have cuts all up and down the line in revenue sharing, and it would be $2 billion.

The total of those would be $56 billion.

Mr. President, we could cut the entitlement programs if we could get the committees that have jurisdiction over those programs to help us. But when we tried to do that in the past, we got nowhere, particularly with the Finance Committee. We came in here one year recommending a $200 million cut in one program, and we were promptly told that this was none of our business, and the cut was rejected.

I also point out that last year, on the Senate floor, after we had approved the first budget resolution, 11 proposals were made to add spending to that resolution, and the total added was $6.6 billion, if my memory is correct.

And on those 11 votes which added spending the Senator from Nebraska voted to add spending in 9 out of 11 cases. The Senator from Nebraska voted to add spending nine times and voted to hold the line only twice.

Also, Mr. President, very recently when we had the emergency farm bill on the floor, the bill which the Senator from Oklahoma voted against and the Senator from Nebraska voted $5 billion to add spending on that bill. To me, it is inconsistent to come here today to say balance the budget when only a few days ago we were in here trying to hold the line against large increase in the agricultural function. The Senator from Nebraska voted the other way.

To me it is unrealistic and would be a waste of time to go back to the drawing board on this budget, and I strongly hope the Senator's motion will fail.

EXHIBIT 1

TRYING TO BALANCE THE FISCAL YEAR 1979 BUDGET

The attached tables illustrate three approaches to balancing the FY 1979 Budget of the Federal Government. Table I shows the impact of raising taxes to close the gap between revenues and spending. Table II assumes that all spending programs (including Defense) which can be cut under current law are all cut equally to reduce spending to the level of revenues. Table III assumes that all spending programs except Defense which can be cut under current law are all cut equally to reduce spending to the level of revenues.

It should be noted that these tables do not take into account any budgetary impact on the economy by substantially raising taxes or cutting spending. For example, in Table I, even after raising taxes $55.6 billion, the Budget would not be balanced due to the negative economic impact—income would obviously be reduced, investment would be reduced, unemployment would be increased, and tax revenues would be down.

CONCLUSION FROM TABLES

Table I.—A tax increase of 12.5 percent would be needed to raise revenues to the FY 79 spending level in the Budget Resolution. A taxpayer with adjusted gross income over $20,000 would find his taxes increased by $2,450.

Table II.—To balance the Budget by cutting spending in all programs (including Defense) down to the expected level of revenues a cut of 22.5 percent would have to be imposed on all Non-Entitlement Programs (Entitlement programs can not be cut unless Congress changes current law). This cut would amount to $26.2 billion in Defense. A list of the cuts is attached.

Table III.—To balance the Budget by cutting all programs (except Defense) down to the expected level of revenues, a cut of 42.6 percent would have to be imposed on all Non-Entitlement Programs. A list of these cuts is attached.

TABLE I.—BALANCING THE BUDGET BY RAISING TAXES

	Billions
Fiscal year 1979 outlays under recommended 1st concurrent resolution	$498.9
Revenues under recommended 1st concurrent resolution	443.3
Additional revenue needed to balance budget	55.6

SOURCE OF ADDITIONAL TAX REVENUE

[In billions of dollars]

	Existing law	Tax increase	Total tax
Individual income tax	$197.8	$38.9	$236.7
Corporate income tax	63.6	10.8	74.4
Social insurance and other taxes	181.9	[1] 5.9	187.8
Total	443.3	55.6	498.9

[1] Not an increase in social security taxes.

MAGNITUDE OF TAX INCREASE EQUALS 12.5 PCT IMPACT OF TAX INCREASE ON VARIOUS INCOME CATEGORIES OF TAXPAYERS

Annual adjusted gross income:	Average annual additional tax per taxpayer
0 to $5,000	
$5,000 to $10,000	$170
$10,000 to $15,000	470
$15,000 to $20,000	800
Over $20,000	2,450

TABLE II.—Balancing the budget by cutting spendng down to level of expected revenues

[Billions of dollars]

1. FY 1979 expected revenues	$443.3
2. But must fund mandatory entitlement programs (unless Congress changes Current Law). Therefore, subtract funds for "entitlements" mandated by current law:	
Interest expense	46.8
Social security (OASDI), railroad retirement, and disabled coal miners benefits	109.2
Federal retirement and disability	12.0
Unemployment compensation	11.1
Medicare and medicaid	44.5
Agriculture (price supports, farm income stabilization)	6.4
Veterans benefits and services compensation, pensions, readjustment benefits, health care, etc.)	20.8
Food stamps	5.5
AFDC	6.7
Supplemental security income	6.1
"Total entitlements"	−269.1
3. Add back additional receipts (undistributed offsetting receipts)	+17.2
Dollars available for all other federal programs (nonentitlement programs)	191.4

4. But these "All Other Federal Programs" are funded in the Budget Resolution at $247.0 billion—requires a cut of 22.5 percent to get to the $191.4 billion level calculated above.

5. Conclusion: To balance the FY 79 Budget without raising taxes requires a cut of 22.5 percent in all Non-Entitlement Federal Programs, including Defense, a cut from $247.0 billion to $191.4 billion.

6. Necessary cuts—Cut all non-entitlement programs by 22.5 percent.

[In billions of dollars]

	Level recommended in FCR, fiscal year 1979	Amount of cut	Budget balance level
National defense	$116.6	$26.2	$90.4
International Affairs (foreign military sales, economic assistance, financial programs)	7.2	1.6	5.6
General science and space	5.0	1.1	3.9
Energy	10.1	2.3	7.8
Natural Resources and Environment	12.5	2.8	9.7
Agriculture research and other services	1.4	.3	1.1
Highways, air, rail, mass transit, Postal Service, and other commerce/transportation	21.1	4.8	16.3
Community and regional development (urban renewal, public works, community development block grants)	9.0	2.0	7.0
Education, CETA training and other labor services	25.3	5.7	19.6
Social services grants	5.9	1.3	4.6
Health research and other services	5.0	1.1	3.9
Child nutrition, other food programs	3.7	.8	2.9
Other income security programs	5.6	1.3	4.3
Law enforcement and justice	4.2	.9	3.3
IRS, GSA, legislative and other general government	4.1	.9	3.2
Revenue sharing and general fiscal assistance	9.6	2.2	7.4
Allowances—Civilian agencies pay increases	.7	.2	.5
Total	247.0	[1] 55.6	[1] 191.4

[1] Numbers do not total due to rounding.

TABLE III.—Balancing the budget by cutting spending (except defense) down to level of expected revenues

[Billions of dollars]

1. Fiscal year 1979 expected revenues	$443.3
2. But must fund mandatory entitlement programs (unless Congress changes current law). Therefore, subtract funds for "entitlements" mandated by current law:	
Interest expense	46.9
Social security (OASDI), railroad retirement, and disabled coal miners benefits	109.2
Federal retirement and disability	12.0
Unemployment compensation	11.1
Medicare and medicaid	44.5
Agriculture (price supports, farm income stabilization)	6.4
Veterans benefits and services (compensation, pensions, readjustment benefits, health care, etc.)	20.8
Food stamps	5.5
AFDC	6.7
Supplemental security income	6.1
Total "entitlements"	−269.1
3. Add back Additional Receipts (Undistributed Offsetting Receipts)	+17.2
4. Subtract dollars needed to fully fund defense programs in budget resolution	−116.6
Dollars available for all other federal programs (non-defense and non-entitlement programs	74.8

5. But these "All Other Federal Programs" are funded in the budget resolution at $130.4 billion—requires a cut of 42.6 percent to get to the $74.8 billion level calculated above.

6. Conclusion: To balance the fiscal year 1979 budget without raising taxes or cutting Defense requires a cut of 42.6 percent in all other Non-Entitlement Federal Programs, a cut from $130.4 billion to $74.8 billion.

7. Necessary cuts—Cut all programs by 42.6 percent.

[In billions of dollars]

	Level recommended in FCR, fiscal year 1979	Amount of cut	Budget balance level
International Affairs (foreign military sales, economic assistance, international financial programs)	$7.2	$3.1	$4.1
General science and space	5.0	2.1	2.9
Energy	10.1	4.3	5.8
Natural resources and environment	12.5	5.3	7.2
Agriculture research and other services	1.4	.6	.8
Highways, air, rail, mass transit, Postal Service and other commerce/transportation	21.1	9.0	12.1
Community and regional development (urban renewal, Public works, community development block grants)	9.0	3.8	5.2
Education, CETA training and other labor employment	25.3	10.8	14.5
Social service grants	5.9	2.5	3.4
Health research and other services	5.0	2.1	2.9
Child nutrition, other food programs	3.7	1.6	2.1
Other income security programs	5.6	2.4	3.2
Law enforcement and justice	4.2	1.8	2.4
IRS, GSA, legislative, and other general government	4.1	1.7	2.4
Revenue sharing and general fiscal assistance	9.6	4.1	5.5
Allowances—Civilian agencies pay increases	.7	.3	.4
Total	130.4	[1] 55.6	[1] 74.8

[1] Numbers do not total due to rounding.

Mr. MUSKIE. Mr. President, I yield myself 5 minutes.

I think the distinguished Senator from Oklahoma, my good friend, Senator BELLMON, has touched on the heart of the problem posed by the Curtis motion.

May I say that the longer I find myself in this responsibility as chairman of the Budget Committee, the more frustrations I accumulate, and the more inclined I am to support the kind of approach that the Senator from Nebraska proposes here.

One would like to think that there should be someone or some committee who could be given sufficient clout in order to achieve a balanced budget by simply forcing everyone into line. As I say, I wish that that kind of result could be achieved.

I have found it impossible to get Senators to support even the little we have done in the Budget Committee. What we have done has been so much less than what we need to achieve that I speak of it as little in this year of 1978.

But, addressing myself to this motion specifically. In the first place it is not clear how Senator CURTIS would accomplish the outlay reduction he proposes without changing budget authority, since the outlay figures in the resolution are simply estimates of the rate at which budget authority will be spent.

We control the budget by controlling budget authority. Budget authority spends out at widely ranging, widely differing rates, from 40 years for a housing assistance budget authority to 1 year for salaries in the defense and other budget functions. So there is no way of controlling deficits by simply controlling outlays. There is no way of controlling spending by controlling outlays. We control spending by controlling budget authority.

But the second point that I make is that an outlay reduction of the size proposed by Senator CURTIS would not balance the budget since it does not take into account the effect of reducing outlays on the economy and on receipts. The outlay reduction, if we could achieve, it would reduce incomes and employment which would produce a loss of Federal tax revenues and an increase in outlays for programs such as unemployment compensation, unless we were simply to repeal such programs. This revenue loss and outlay gain could be as much as 40 percent of the initial outlay reduction.

So the 1979 deficit would be about $22 billion after we had reduced outlays by the $55 billion reflected in the deficit number in the pending resolution. That deficit would be $22 billion even though 1.8 million jobs would be sacrificed by the end of 1979.

How much further in the way of outlay reductions would we have to have in order to achieve Senator CURTIS' objective of a balanced budget?

Frankly, at this point we are dealing with something that would have such a shock on the economy that I am not sure the econometric models could accurately predict what would happen. I see the Senator smiling and I understand what his reaction is. But a rough estimate of it, given the innerplay between budget reductions and the effect on the economy and the effect on revenues, outlay reductions of over $900 billion and not $55 billion probably would be required to balance the budget. Since entitlement programs cannot be reduced much in the first year, even if we change the law, this would necessitate the major reductions to be in defense spending, grants to State and local governments and other areas.

The PRESIDING OFFICER. The Senator's 5 minutes have expired.

Mr. MUSKIE. Mr. President, I yield myself 4 additional minutes.

This outlay reduction would cause a severe recession. Real GNP would fall, the unemployment rate would rise above 8 percent, and about 3 million jobs would be lost by the end of 1979. Moreover, those effects would grow in 1980, unless substantial stimulative measures were taken which would result in a larger fiscal year 1981 deficit.

These are projections of the kind of traumatic economic effects that could flow from the kind of measures that the Senator from Nebraska proposes.

Having said that, I still wish there were a single step of this kind that might be taken to achieve a balanced budget as quickly as possible. But frankly, I cannot willingly assume the responsibility for the economic consequences that, as we are told by economists across the range of political philosophies, who testified before our committee, would flow from this kind of dramatic reduction in Government outlays.

I remember the first year that I was chairman of the Budget Committee. Two of our first witnesses were Joseph Pechman, of the Brookings Institution, and Charls Walker, a conservative, who was an Assistant Secretary of Treasury in the Nixon and Ford administrations. At that time President Ford had proposed a budget with a deficit of around $50 billion, and he decried the deficit.

So I put this question to these two experts, Pechman and Walker. I said: "If the deficit is such a bad thing, why do we even consider it? Why don't we eliminate it? We are just beginning as a Budget Committee to consider the budget, and this is the first Presidential recommendation we have received. And the President says we must have a deficit of $50 billion even though he does not like it. If he does not like it, I do not like it, and I am asking you gentlemen why we have to have it."

Mr. Pechman's reply went into the kind of macroeconomic implications and budgetary implications that I have tried to describe here this afternoon. He said: "It is impossible to get rid of the deficit that way."

When he was finished, I then turned to Mr. Walker. I said: "What is your answer?"

He said: "I agree with Mr. Pechman." He said something like that was tried at the beginning of the 1932 depression. Members of Congress on both sides, with the Hoover administration, undertook to balance that budget by increasing taxes by the amount of the difference. The result was an exacerbation of the economic problems which led to the deficit in the first place.

Mr. President, I ask unanimous con-

sent that that coloquy with Mr. Pechman and Mr. Walker be included in the RECORD at this point. It is a more informed answer than I can possibly give to the Senator from Nebraska's motion.

There being no objection, the colloquy was ordered to be printed in the RECORD, as follows:

COLLOQUY

Chairman MUSKIE. The question I wanted to ask is back to back with Senator Bellmon's. What would be the economic consequences if we would follow the householder's prudent guide, and seek to avoid that $52 billion budget deficit? I am not talking about program implications. I am talking about economic implications.

Mr. PACKER. I think if one took $50 billion out of the budget, one might expect that the economy would be 3 or 4 percent higher than it would be under these projections.

Chairman MUSKIE. And the GNP?

Mr. PACKER. The GNP would be somewhat lower. If you took $50 billion out you would still find that you are——

Mr. PECHMAN. The $50 billion has a multiplier, too. You would reduce the GNP by about $100 billion, which is about 7.5 percent for the present GNP. And that would increase unemployment by 2.5 percentage points, from 7.5 you can expect unemployment to go up about 10.

Chairman MUSKIE. What would that do for the Government revenues?

Mr. PECHMAN. Government revenues would melt away, and the deficit would be increased.

Chairman MUSKIE. So you would have to take out more than $52 billion?

Mr. PECHMAN. If that is all that happened, the GNP would go down about $100 billion, and you could figure that the Federal Government revenues would decline by 20 or 25 percent, or $20 to $25 billion. Unless you economize, the debt would go higher by that amount.

Senator BELLMON. So you are chasing your tail then.

Mr. PECHMAN. If you tried to balance the budget in the face of a declining economy, yes.

Mr. WALKER. I very much share Senator Bellmcn's distaste for dificit. I have been coming up here now for 15 or 16 years, and it seems like we keep moving the decimal over to the right all the time, spending revenues, increasing deficits and so on. And I find myself in a very uncomfortable position saying that I think we have got to stay somewhere in the range, hopefully closer to the $52 billion deficit in the coming fiscal year, in order to get back into a position where, in the long run, we can get away from deficits as a way of life.

The point I wanted to make that would support what these gentlemen have said, about the tail chasing thing, you said, what if you cut spending? You can look at it the other way: What if you tried, as crazy as it sounds right now, to raise taxes in order to balance the budget? That might sound crazy in 1973. It did not sound crazy in 1931 and 1932. That is precisely what the Federal Govcrnment tried to do. It was a bipartisan effort. President Hoover and Mr. Garner and the whole crowd wanted to balance the budget. That was the fiscal orthodoxy of the day. So they sent a message to the Treasury, let's raise taxes—and they raised practically every tax they could get their hands on. In fact, that was the birth of our highly progressive income tax. And I believe the Treasury calculated—Joe, you remember the figures, not because you were there then but because you are a better historian than I am—I believe the deficit was running in the general horrifying range of a billion dollars, and they tried to raise taxes about a billion dollars, maybt around $800 million.

They did not get anything back. They raised the taxes, and that further exacerbated the deflationary pressures.

Incomes dropped, and profits dropped, and it just did not work. This is just the other side of the same coin we are talking about.

Chairman MUSKIE. I think that story, prompted by Senator Bellmon's story that I tried to follow up, is a very important one to get out to the public. The public does not understand that. And a lot of Senators that do not understand it that I have run into, they said. "What are we going to cut?" And I think we need to know the economic conditions of that from this committee's point of view.

Mr. MUSKIE. All I can say to the Senator is bless him, I wish I could find it possible to agree with him. But I have sufficient reservations, for the reasons I have outlined, that I do not really think it will work.

Mr. CURTIS. Mr. President, all I can say to my dear friend from Maine is have a little more faith. Do not believe those pessimists who say that free government and private enterprise fail, that they cannot carry on, we have to run a deficit; we have to inject the Government in it or there will be a depression, there will be more people unemployed. That is nonsense, and history proves it. That sort of nonsense was talked up and down the country from 1933, and we never got rid of the unemployment until World War II came along.

It does not work. Oh, these machines are great things. But if you put trash in there you are going to get trash out. It is just that simple.

There is nothing sacred or unerring about their charge that if you do thus and so, you are going to add so many jobs or subtract so many jobs. They cannot predict world events at all. That is nonsense.

I happen to take an opposite view. I believe if the U.S. Government sets its house in order financially, people everywhere will be so encouraged that our economy will boom and we will have jobs and jobs, plenty of them. I believe if we set our house in order the nations of the world will see and they will decide that the American dollar is sound after all, and they will not need to charge so many dollars for a barrel of oil or whatever it is.

I want to get my version of what the distinguished Senator from Oklahoma said as to what they would have to do to balance the budget. They do not have to raise everybody's taxes by 12.5 percent; you do not have to cut defense by a dime. Why, you can do it in one program. All we would have to do is say to our States and local governments, "We are going to have no revenue-sharing until we have some to share." Eighty billion dollars——

Mr. BELLMON. Mr. President, will the Senator yield at that point?

Mr. CURTIS. In just a moment, yes, I would be happy to, after I finish my thought.

In reference to some 11 votes where people came in here and wanted to waive the budget requirements, I did not research that. I do not know, I am sure his report is correct, but it is only part of it. As the year goes along new things happen and they come in here, a committee comes in, and asks that the budget be waived or increased a little bit. Oftentimes the Committee on Budget goes off. We have got to expect that, that there will be new things that have to be met as the year goes along. You cannot always predict the future.

So I want to say to the Senator from Oklahoma—and I voted against the authorization of more programs that have given this Government such a huge Government, so many bills to pay, so many obligations—that I yield to no man on my voting record.

As a matter of fact, the Senator also singled me out in reference to my vote on the agricultural bill. The Senator knows that in that agricultural budget of about $14 billion that $9 billion of it has nothing to do with agricluture. It is welfare, and I stood on this floor with seven amendments to the food stamp program. I am happy to say that, as I recall, the distinguished Senator from Oklahoma supported me on those, many of them, maybe all of them.

So I do not deprecate the fact that a few isolated votes are mentioned here to insinuate that the Senator from Nebraska is a spender. I criticized certain programs here. I criticized medicare, I never voted for it.

I criticized revenue sharing, I never voted for it.

I criticized public housing, I did not vote for it. Why do we tax people who live in very unimproved little cottages to build a house for somebody else? I did not vote for it.

I never voted to put the Federal Government into education.

I did not expect to stand here and defend myself or brag about my voting record until I was attacked on this floor with a few isolated votes. But I have opposed the expansion of government.

The PRESIDING OFFICER (Mr. JOHNSTON). The time of the Senator from Nebraska has expired.

Mr. BELLMON. Mr. President, will the Senator yield me 2 minutes?

The PRESIDING OFFICER. The Senator from Maine has 2 minutes remaining.

Mr. BELLMON. I only wanted to set the record straight, Mr. President, on the cost of general revenue sharing which the Senator from Nebraska has been talking about.

If the Senator will turn to page 156 of the report, it lists revenue sharing, and it shows that the cost in fiscal year 1979 in both budget authority and outlays is $6.9 billion. The figure the Senator has been using earlier is a figure that includes many other items than revenue sharing. It includes such things as water treatment, sewage disposal, highways, and a raft of other programs.

Mr. CURTIS. I meant to use the general term revenue sharing, in the sense of general aid to States and localities.

Mr. BELLMON. I understand. That is all I have to say.

Mr. MUSKIE. I yield back the remainder of my time.

Mr. CURTIS. I yield back the remainder of my time. I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Nebraska to recommit. The yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from Indiana (Mr. BAYH), the Senator from Delaware (Mr. BIDEN), the Senator from Montana (Mr. HATFIELD), and the Senator from South Dakota (Mr. ABOUREZK) are necessarily absent.

Mr. STEVENS. I announce that the Senator from Arizona (Mr. GOLDWATER) and the Senator from Michigan (Mr. GRIFFIN) are necessarily absent.

I also announce that the Senator from Tennessee (Mr. BAKER), the Senator from Utah (Mr. GARN), and the Senator from Kansas (Mr. PEARSON) are absent on official business.

The result was announced—yeas 19, nays 72, as follows:

[Rollcall Vote No. 133 Leg.]

YEAS—19

Allen	Hayakawa	Scott
Bartlett	Helms	Stone
Byrd, Harry F., Jr.	Laxalt	Talmadge
Curtis	Lugar	Thurmond
Hansen	Nunn	Wallop
Hatch	Proxmire	Zorinsky
	Roth	

NAYS—72

Anderson	Hart	Morgan
Bellmon	Haskell	Moynihan
Bentsen	Hatfield, Mark O.	Muskie
Brooke	Hathaway	Nelson
Bumpers	Heinz	Packwood
Burdick	Hodges	Pell
Byrd, Robert C.	Hollings	Percy
Cannon	Huddleston	Randolph
Case	Humphrey	Ribicoff
Chafee	Inouye	Riegle
Chiles	Jackson	Sarbanes
Church	Javits	Sasser
Clark	Johnston	Schmitt
Cranston	Kennedy	Schweiker
Culver	Leahy	Sparkman
Danforth	Long	Stafford
DeConcini	Magnuson	Stennis
Dole	Mathias	Stevens
Domenici	Matsunaga	Stevenson
Durkin	McClure	Tower
Eagleton	McGovern	Weicker
Eastland	McIntyre	Williams
Ford	Melcher	Young
Glenn	Metzenbaum	
Gravel		

NOT VOTING—9

Abourezk	Garn	Hatfield, Paul G.
Baker	Goldwater	Pearson
Bayh	Griffin	
Biden		

So the motion to recommit was rejected.

Mr. MUSKIE. Mr. President, for the information of my colleagues—we are getting more information about amendments all the time—it is apparent that we cannot finish tonight. We would like to finish the Roth amendment. Senator HAYAKAWA has a 15-minute speech preceding it. The Roth amendment has 60 minutes allotted to it. With those two items completed, we will break for the night and come back tomorrow.

Mr. PROXMIRE. Will the Senator yield?

Mr. MUSKIE. Yes.

Mr. PROXMIRE. Is it possible to take up my amendment? It is only 10 minutes.

Mr. MUSKIE. We will try to do that, too. Perhaps they can yield back some time on the Roth amendment.

That will give us until 7 o'clock or earlier than that, to the extent that time is released on these two amendments.

Mr. NELSON. Mr. President, I could not hear the Senator.

Mr. MUSKIE. Could I ask the distinguished Senator from California a question? Would he have any objection to changing the order, so that the Proxmire amendment will be next, to be followed by the Roth amendment, with a 60-minute time limitation, and then to be followed by the Senator's speech either tonight or tomorrow?

Mr. HAYAKAWA. I would just as soon postpone it until tomorrow, in that case.

Mr. MUSKIE. That would be all right with me. That would get these two votes out tonight.

Mr. DOMENICI. Reserving the right to object, what time would we convene tomorrow, in light of the unanimous-consent agreement about another bill tomorrow?

Mr. MUSKIE. I can ask the majority leader to respond to that.

The leadership suggests 9:30 tomorrow morning to resume action on this bill.

Mr. DOMENICI. How many amendments will be left at that point?

Mr. MUSKIE. Well, there is a Domenici amendment, the Tower amendment, two Byrd amendments, and two other amendments.

Mr. DOMENICI. I have no objection.

Mr. HOLLINGS. Will we vote tonight on the Proxmire amendment?

Mr. MUSKIE. We will vote 10 minutes from now.

The next vote will be in about 10 minutes, to be followed by the Roth amendment for 60 minutes, with a vote on that in approximately an hour and a half.

Mr. NELSON. Will there be two more votes this evening?

Mr. MUSKIE. That is correct.

Mr. NELSON. And I will be able to call up the amendment that the Senator is familiar with for a discussion tomorrow?

Mr. MUSKIE. The Senator is correct.

I yield the floor, Mr. President.

Mr. HART. I wonder if the floor manager will yield 5 minutes to me on the bill?

Mr. MUSKIE. Yes, I am happy to yield 5 minutes.

Mr. BUMPERS Mr. President, will the Senator yield to me for a unanimous-consent request?

Mr. HART. Yes.

Mr. BUMPERS. I ask unanimous consent that Grace Rice, of my staff, be granted the privilege of the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HART. Mr. President, the distinguished manager is not only chairman of the Budget Committee, but he also serves on the Environment and Public Works Committee. In his capacity as a member of the Environment and Public Works Committee, he will recall that that committee, in its report to the Budget Committee, made very emphatic reference to its intention and desire to enact legislation that would provide economic development assistance or so-called energy impact assistance to the States that are being called upon to provide most of the energy for the rest of the country. That recommendation by the Environment and Public Works Committee was at the level of $200 million.

As a principal sponsor of that legislation, I want to indicate to the floor manager and the chairman of the Budget Committee the seriousness of the Senate Environment and Public Works Committee's intention to proceed to markup on the legislation. Hearings having been held and the administration indicates that it will very, very shorlty provide its support for this impact assistance. Of course, there is widespread support in our own committee for this very badly needed legislation, as is evidenced by the fact that the subcommittee's recommendation of $200 million was the only recommendation that was accepted, without reduction, by the full Environment and Public Works Committee as it prepared its recommendations for the Budget Committee. All other programs were cut to some degree by the full committee.

I am, therefore, concerned, as is the chairman of the committee (Mr. RANDOLPH), whether or not the budget resolution we are considering today will be able to accommodate this proposal when it is reported at the level of funding I have mentioned.

I know the Senator from New Mexico also is concerned about this. He is one of the cosponsors.

Mr. DOMENICI. I join in the concern and in the question that is being propounded. I believe the issue, Mr. President, is whether or not the amount of money that is found in function 450 is adequate to accommodate the proposal that the Senator from Colorado has just discussed. When we consider the various programs that are within it and the amounts that have been added for them, I think the question is whether or not that would accommodate the impact assistance program at the $200 million level in the event that is chosen by the committee and by the Senate as an appropriate legislative addressing of the issue we are discussing.

Mr. MUSKIE. Let me answer the question in this way: The budget function involved is function 450. Targets in function 450 in the budget resolution are $10.4 billion in budget authority and $9.0 billion in outlays. In budget authority, that is $2.2 billion above current law, or $1.7 billion above current policy. Those targets, in the judgment of the Committee on the Budget, permit significant expansion for programs of community, area, and regional development, many of which are under the jurisdiction of the Environment and Public Works Committee. The specific detail of programs to be approved, of course, will be decided by the authorizing committees and the Appropriations Committee.

As the Senator from New Mexico knows as a member of the Budget Com-

mittee, and as the Senator from Colorado understands from his exposure to this process, there is to some extent competition within functions for the authority provided by the budget resolution, since the Budget Committee does not line item in any way. It seems to me that, given that expansion above current law and current policy, we are talking about a reasonable amount of budget authority to deal with programs likely to be approved by the authorizing and Appropriations Committees.

We do not preclude this program or any other program, but we do not, at the same time, decide the ultimate priorities to be established by the authorizing committee and the Appropriations Committee.

Mr. HART. I thank the distinguished floor manager. His response indicates that the answer to my question is in the affirmative, that this program could be accommodated if, in fact, the authorizing committee so recommends. It is my understanding that the committee will.

I thank the Senator from Maine.

Mr. DOMENICI. I join the Senator from Colorado in thanking the chairman.

I also remind the chairman and ask him if it is not correct that in the energy function, as distinguished from function 450, there is sufficient latitude for the moneys that the conservation bill carries by way of land acquisition within the energy conservation conference. I believe that figure is $60 million. That is not the total impact assistance that the Senator from Colorado is asking about, but a completely different approach, or part of it. That is in there also, is it not, or would accommodate it?

Mr. MUSKIE. Yes, I believe that is a relatively small amount, but I believe it could be accommodated.

Mr. DOMENICI. I thank the Chair.

UP AMENDMENT 1245

(Purpose: to decrease the appropriate level of new budget authority to $561,100,000)

Mr. PROXMIRE. Mr. President, I call up my amendment that is at the desk and ask that it be stated.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Wisconsin (Mr. PROXMIRE) proposes an unprinted amendment numbered 1245.

On page 1, line 11, strike out "$566,100,000,000" and insert $561,100,000,000.

Mr. PROXMIRE. Mr. President, I ask for the yeas and nays on this amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. PROXMIRE. Mr. President, this amendment reduces the total budget authority in the first concurrent resolution by $5 billion from $566.1 billion to $61.1 billion.

Five billion dollars is less than a 1-percent reduction. One percent. Is there any Senator that will argue that our $566.1 billion budget cannot be reduced by less than 1 percent?

What is more, this amendment would permit a 10-percent increase in obligational authority over last year. So there is plenty of leeway here.

The Senator from Maine properly pointed out that the first amendment that I offered, the $25 billion cut, would have left much less leeway. This leaves a tremendous amount of leeway for the Budget Committee.

This 1 percent represents what the productivity increase should be for the Federal Government. Right now we make no formal allowance for productivity increases.

Or the 1 percent can be accounted for by the admitted mismanagement and fraud occurring in just one Government agency—HEW—$6.3 to $7.4 billion range.

Or the 1 percent could be accounted for just by the amount the Congress has increased the President's agriculture function (+$5.2 billion).

Or the 1 percent could be accounted for by the additions of the Budget Committee over the President's budget for national defense ($1.4 billion), energy ($0.7 billion, natural resources and environment $1 billion), and transportation ($0.9 billion).

There is not one Government agency that cannot stand a 1-percent decrease in budget authority. Why, that amount alone is wasted each year in mismanagement, inefficiency, misplaced priorities, and duplication.

Mr. President, it took from 1789 until 1962—174 years—for the budget to break the $100 billion barrier. Then 9 years passed before we broke the $200 billion mark. Four years later we hit $300 billion still running fast. And 2 years later, this year, we go over $400 billion. At this rate of increase we soon will be adding $100 billion annually—an unthinkable rate of increase. At the present deficit rate, our Government will be spending $1 billion a week more than it takes in. Or another way of looking at the issue is that the current deficit of this year and last would have financed the entire cost of the Federal Government for budget year 1965.

Why should we be concerned about the deficit and the national debt? If the standard economic arguments do not persuade, then just look at one simple fact. In this concurrent resolution, the fourth largest item in budget authority is interest at $46.8 billion. Only income security, national defense, and health rank higher.

We now are spending more on interest than for international affairs; general science, space and technology; energy; natural resources and environment; agriculture; commerce and housing credit; transportation; community and regional development; education, training, employment, and social services; veterans benefits; justice; general government; and fiscal assistance. Interest payments are one of our largest obligations.

Interest, of course, is the result of the enormous deficits we have been running and this $5 million would help in a small way, but at least indicate our sentiment in trying to cut back the size of that deficit.

Mr. President in fiscal year 1976 the official estimate for total annual outlays was in error by $6.6 billion. We overestimated the amount of money that would or could be spent by 1.8 percent.

In fiscal year 1977, the estimating error for outlays was $14.7 billion or 3.5 percent. We again could not spend as much as estimated.

The point to keep in mind about these figures is that a $5 billion reduction in budget authority and its consequent outlay reduction would be within the estimating error of last year. In the past 2 years we have been trying to spend more money than actually was possible.

From this perspective, the $5 billion reduction is very modest indeed.

Mr. President, I ask unanimous consent that the distinguished Senator from North Carolina (Mr. HELMS) be added as a cosponsor of the amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HARRY F. BYRD, JR. Will the Senator yield?

Mr. PROXMIRE. I yield to my good friend from Virginia.

Mr. HARRY F. BYRD, JR. I salute the Senator from Wisconsin. I think it is an excellent amendment. I do not know how anyone could oppose such a small reduction in the proposed new obligational authority.

As the Senator pointed out, it amounts to less than a penny on each dollar that is proposed to be spent, and every department of Government wastes at least that much.

I might say to the Senator from Wisconsin, he underestimated or understated the case in regard to the interest on the national debt. The interest on the national debt actually is $53 billion.

Mr. PROXMIRE. The Senator is correct, I gave the net figure.

Mr. HARRY F. BYRD, JR. He gave the net figure.

Mr. PROXMIRE. Yes.

Mr. HARRY F. BYRD, JR. But the cost is substantially higher than that.

Mr. President, I ask unanimous consent I be added as a cosponsor.

Mr. PROXMIRE. Mr. President, I ask unanimous consent the Senator be added as a cosponsor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. PROXMIRE. I yield the floor.

Mr. MUSKIE. Mr. President, may I say to my good friend from Wisconsin, there is no answer to an amendment like this. The only one I can suggest is this. Let us approve this one, $5 billion, and then let us have Senator MUSKIE offer an amendment to reduce another $5 billion using the same argument.

After all, on a budget of $561 billion, who is to say we cannot possibly save another $5 billion?

Then the Muskie amendment is approved and then Senator BELLMON, who also is a prudent fellow, gets up and says, "Well, my heavens, who is to say you can't cut $5 billion from $556 billion?"

I can see that exercise going on for each of 100 Senators.

Mr. CHILES. And then CHILES would like to have one.

Mr. MUSKIE. Senator CHILES would like to have one, Senator CANNON would like to have one, and so on.

Then Senator HELMS would like one, Senator DOLE would like one, Senator HATCH would like one, and there is no rebuttal to any one of those. None whatsoever.

I do not know to what level we would have to go before we could begin to say in response to the amendment that it would cut too deeply, because the response to any one of them cannot be that we have already approved 5, 10, or 15 of these $5 billion cuts.

I mean, obviously, that is not an argument, because the Budget Committee has already approved seven $5 billion cuts, and that does not satisfy the Senator.

We have cut $37 billion from committee requests. To the Senator, that is not an argument in answer to his amendment, because he says, "Well, of course, with the $566 billion budget, who is to say you can't cut another 5. Heavens, you have already cut 37."

But what kind of budget making is that? Where are we to take the $5 billion?

Mr. CHILES. Will the Senator yield?

Mr. MUSKIE. This budget resolution provides $25.5 billion in budget authority for housing assistance. I will say to the Senator, if this amendment passes since I will have the responsibility for recommending where that ought to come from, I will recommend taking it from housing assistance.

There is $5 billion. There is the place.

The Senator seems reluctant to identify places to cut. He says, "Oh, it ought to be possible somewhere." All right, let us begin right there.

I do not know where Senator CHILES' cut will come from, but he can name his own.

What I mean is, if we want to propose a specific cut, a specific priority, a specific place, that is legitimate, and the Senate can vote up or down on it. But when we say cut $5 billion in budget authority without saying where it is going to come from, who is to do the dirty work, may I ask the Senator?

I guess the best place for me to suggest where the dirty work is going to be done is in a program that the Senator is interested in. Since the Senator thinks it can be found somewhere, let us take it out of housing assistance. If we get that kind of restraint demonstrated by everybody who has a pet program, let us have them stand up one at a time.

Where is the $5 billion coming from, and so on? And I do not mean somebody else's pet program. I mean each Senator's pet program.

Mr. LONG. Will the Senator yield?

Mr. MUSKIE. Then maybe we can get somewhere.

I offered in the Budget Committee, after the first round of deliberations, an aggregate cut of $4.7 billion in budget authority and $4 billion in outlays. This is almost the amount the Senator is now proposing, but I specified the 17 functions of the budget that would be cut. I specified defense and other functions, all across the board.

Do Senators know what happened to me, the all-powerful chairman of the Budget Committee? I lost, by a vote of 9 to 7 in the Budget Committee, which is hardly a great radical group of Senators in this institution. I lost, because I was specific.

The Senator is trying to cut by not being specific, and that is the difference.

The PRESIDING OFFICER. All time on the amendment has expired.

Mr. MUSKIE. There is time on the bill.

Mr. HOLLINGS. Will the Senator yield?

Mr. MUSKIE. Yes.

Mr. HOLLINGS. Is it not a fact the distinguished chairman in his committee actually cut $37 billion from the request by this Senate?

Mr. MUSKIE. I have already said so.

Mr. HOLLINGS. Well, let us emphasize that. We did not walk in there. We had a struggle to get down to the House, and we did better than the President. I think Senators ought to know that.

Mr. MUSKIE. Cutting $5 billion at a time is painless. The Senator knows that.

Mr. HOLLINGS. Oh, yes.

The PRESIDING OFFICER. The question is on agreeing to amendment No. 1799 of the Senator from Wisconsin. The yeas and nays have been ordered, and the clerk will call the roll.

The second assistant legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from South Dakota (Mr. ABOUREZK), the Senator from Indiana (Mr. BAYH), the Senator from Delaware (Mr. BIDEN), the Senator from Alaska (Mr. GRAVEL), the Senator from Montana (Mr. HATFIELD), and the Senator from Wisconsin (Mr. NELSON) are necessarily absent.

Mr. STEVENS. I announced that the Senator from Arizona (Mr. GOLDWATER), and the Senator from Michigan (Mr. GRIFFIN) are necessarily absent.

I also announce that the Senator from Tennessee (Mr. BAKER), the Senator from Utah (Mr. GARN), and the Senator from Kansas (Mr. PEARSON) are absent on official business.

The result was announced—yeas 43, nays 46, as follows:

[Rollcall Vote No. 134 Leg.]

YEAS—43

Allen	Haskell	Moynihan
Bentsen	Hatch	Nunn
Bumpers	Hatfield, Mark O.	Percy
Byrd, Harry F., Jr.	Hayakawa	Proxmire
Chafee	Heinz	Roth
Church	Helms	Sasser
Curtis	Huddleston	Schmitt
Danforth	Johnston	Schweiker
DeConcini	Laxalt	Scott
Domenici	Lugar	Stone
Durkin	McClure	Talmadge
Eagleton	McGovern	Thurmond
Eastland	Metzenbaum	Wallop
Ford	Morgan	Young
		Zorinsky

NAYS—46

Anderson	Cranston	Inouye
Bartlett	Culver	Jackson
Bellmon	Dole	Javits
Brooke	Glenn	Kennedy
Burdick	Hansen	Leahy
Byrd, Robert C.	Hart	Long
Cannon	Hathaway	Magnuson
Case	Hodges	Mathias
Chiles	Hollings	Matsunaga
Clark	Humphrey	McIntyre
Melcher	Riegle	Stevenson
Muskie	Sarbanes	Tower
Packwood	Sparkman	Weicker
Pell	Stafford	Williams
Randolph	Stennis	
Ribicoff	Stevens	

NOT VOTING—11

Abourezk	Garn	Hatfield, Paul G.
Baker	Goldwater	Nelson
Bayh	Gravel	Pearson
Biden	Griffin	

So Mr. PROXMIRE's UP amendment No. 1245 was rejected.

Mr. MUSKIE. Mr. President, I move to reconsider the vote by which the amendment was rejected.

Mr. CRANSTON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. MUSKIE. Mr. President, I ask unanimous consent that the vote on the Roth amendment be taken not later than 7 o'clock tonight. The Senator from California (Mr. HAYAKAWA) has a 10-minute to 11-minute speech. Senator ROTH and I will divide the time remaining equally. I doubt that I will need all my share of the time, so the vote may take place before 7. In any case, I ask unanimous consent that the vote take place not later than 7 o'clock.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

The Senator from California is recognized.

Mr. HAYAKAWA. Mr. President, I once again feel compelled to speak against a budget proposed by the Senate Budget Committee. One of my major concerns has been the framework within which economic policy decisions are made. I have also been dismayed by the priorities illustrated by the spending decisions. But I would prefer in these remarks to focus on the problems with the economic policy decisions made by the committee.

Despite all of the recent controversy about the reliability of making economic policy decisions based upon the projections of the conventional econometric models, the budget committee continues to place "blind faith" in these models. This year the committee has compounded this problem. This year, for the first time, the committee has discussed spending and taxing decisions for 5 years, based on economic projections for these years. In other words, we were told that if we made certain spending or revenue decisions for these 5 years, they would have certain implications for the economic health of the Nation over that time. There are many problems with this approach.

First, all of the conventional models are short-term models. This means that their projections are only good for 2 to 3 years into the future. This has been one of the problems of basing economic policy decisions upon the output of these models. We have continued to pursue policies because they seem to stimulate the economy in the short run, but the models have not been able to show us the long-term impacts of our policies. Often the policies that seemed to be stimulative in the short run have harmed the economy in the long run. Perhaps

in an attempt to correct for this short-term bias in policymaking, the committee decided to look at longer term implications of its decisions. But you cannot do so with models that do not even claim to be accurate for long-term forecasting.

Many of the considerations that are important to long-term economic growth are not taken into account in the conventional econometric models.

The most important factor that these models ignore is the effect that Government policy decisions have on incentives—incentives to work, to produce, to save, to invest, and to avoid Government regulations and taxes by looking for loopholes. Incentives are the key to a free market economy.

Mr. President, may we have order.

The PRESIDING OFFICER (Mr. HODGES). The Senate will be in order.

Mr. HAYAKAWA. If Government policies continuously encourage people to "live for today" by trying to stimulate consumer demand, Government will destroy tomorrow. Today's savings fuel tomorrow's economic growth and provide real increases in our standard of living. But the conventional econometric models consider saving to be undesirable. Greater saving implies lower consumer spending. Since a healthy economy is assumed to depend on strong consumer spending, anything that encourages saving is thought to be bad. Therefore, the Congressional Budget Office advised the committee that a savings rate in excess of 7 percent of consumers' disposable income is bad for the performance of the economy, and that the economy will be strong if the savings rate is less than 6 percent.

I have never been able to understand why savings are bad for the economy. It is our savings that are used by businesses to invest in new and modern plant and equipment. This in turn creates productive, private sector jobs for more people. If the logic of the CBO is accurate, why do countries like Japan, with a personal savings rate of 24 to 26 percent, grow so much more rapidly than the United States? This rate of savings allows Japan to invest twice as much of its GNP as the United States, and has resulted in an increase in real wages and fringe benefits of almost 140 percent over the period 1965 to 1975. In contrast, real wages and fringe benefits in the United States grew only 16 percent over the same period.

I therefore cannot accept the advice of the CBO that economic policy should be designed to hold the rate of personal savings below or close to 6 percent. But the fallacious assumption that this would be good for the economy was a significant assumption in the economic framework within which the committee worked.

In deciding what kind of spending and revenue policies to recommend, the Budget Committee had to make assumptions about how the non-Federal sector of the economy would perform over the next 5 years. Two different scenarios were presented to the members of the committee in the markup materials. First, we set certain economic goals for the 5-year period. Next we were shown how much extra stimulus would be needed above current policy spending and revenues to attain these goals, assuming either a moderate or weak non-Federal sector. Weak non-Federal demand is characterized by the CBO as having higher non-Federal consumption, a higher saving rate, and lower investment spending. It characterizes moderate non-Federal demand as having lower non-Federal consumption, a lower saving rate, and higher investment spending. The CBO projections for these alternatives are included in this table. I ask unanimous consent that it be included in the RECORD at the end of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. HAYAKAWA. I find it hard to understand how we can have a greater level of investment spending under the moderate non-Federal demand alternative while, at the same time, the rate of saving is lower. What will we be investing? If people save a smaller amount of their income, how can businesses invest a greater amount? This makes no sense to me. But these projections were used by the Budget Committee to judge the implications of their decisions.

Finally, in order to be able to discuss economic policies in a framework acceptable to all, the members of the committee reached an unrealistic compromise on the stimulative effects of tax cuts versus spending increases.

The two conflicting opinions are these: One is that spending, Federal Government spending, is more effective than tax cuts in stimulating the economy. The other opinion is that tax cuts are more effective in stimulating the economy than spending. Neither side of this controversy believes that tax cuts and spending are of equal value in stimulating the economy.

Nevertheless the committee, in establishing its economic framework, assumed that tax cuts and spending increases stimulate the economy equally. Therefore, whenever it was determined that additional stimulus would be needed above current policy to achieve the economic goals, our framework showed that this stimulus could take the form of either tax cuts or spending increases in identical amounts. Predictably, no distinction was made among different types of spending programs or tax cuts.

Last year we had a lengthy but productive debate on this subject when we considered the second concurrent resolution on the fiscal year 1978 budget. Evidence was presented that the conventional wisdom was in error. One of the three major econometric modeling companies had stated publicly that its model did not account for the incentive effects I mentioned earlier, and that this created a bias against the stimulative effect of tax cuts. Their further analysis also indicated that after the first year or two, properly structured tax reductions would be twice as stimulative to the economy as spending increases. Reductions in corporate taxes would be even more stimulative.

This evidence should have prompted the committee to examine more closely the econometric models upon which it bases its policy decisions. But instead of investigating these leads, the committee tried to paper over this profound dispute in economic theory by making a meaningless compromise. Unfortunately, this has serious implications for economic policy.

The fallacies in the economic framework affected most heavily the committee's discussion of the appropriate revenue figure for the 5-year period. The committee assumed that we would confront moderate non-Federal demand over the 5 years. But I do not see how we can expect the non-Federal sector to continue to grow at a moderate rate with our present tax structure. Each year, inflation pushes people into higher marginal tax rates while their real income is not increasing at all.

Let me take a minute to explain the importance of marginal tax rates. A marginal tax rate is that rate of tax paid on the next dollar of income. People base their decisions to work more or save more on these marginal tax rates. In many cases, marginal tax rates are so high as to discourage a person from working and earning additional income. If you can only keep 50 cents of each extra dollar, you might prefer to enjoy your leisure time, put your feet up and order a highball instead of working so hard. These are the choices before us.

Higher marginal tax rates on any real level of income destroy people's incentives to work and to save and invest their money. In other words, higher marginal tax rates destroy incentives to produce. They encourage present consumption at the expense of future growth. An economy that discourages work, saving, and investment cannot continue to grow. I believe that without significant reductions in tax rates to compensate for inflation and the recently enacted increases in social security taxes, the private sector of the economy will stagnate even more. We cannot expect moderate growth in the non-Federal sector without a significant tax cut.

Because the true stimulative effects of a reduction in income tax rates could not be demonstrated within our economic framework, the committee's discussion of the revenue figure was biased against a significant tax reduction, such as proposed in the Kemp/Roth bill. The amount of money that would flow back into the Treasury as a result of such tax cuts was underestimated by the committee. These revenue reflows would be greater for three reasons.

First, the across-the-board reductions in income tax rates found in the Kemp/Roth bill would increase the after-tax reward for work effort and saving. By increasing incentives to produce, it would stimulate economic growth more than a tax cut or spending increases designed merely to increase consumer demand.

Both the tax rate reduction and spending increase would stimulate consumer spending. However, the tax cut would also stimulate saving, investment, and work effort. It is these stimulative effects on production that will increase the rate of real economic growth. The increased level of economic activity will expand

the tax base and thereby the revenues flowing into the Treasury. It is obvious this is the way it is going to work.

A tax rate reduction will also increase revenues by bringing a great amount of untaxed economic activity under taxation. This is a very, very important fact that people do not discuss very widely, but there is at the present time an increasing subterranean economy that exists all through our country, and by that I mean business transactions that are not recorded at all because people are paying wages or they make their transactions in cash. It is an off-the-books economy that subsists through undocumented cash transactions and barter. Some such economic activity has always existed, for example, illegal activity, but recently it has become extraordinarily much bigger and the size of this cash subterranean economy has been estimated recently to have become quite significant.

Anyone who does business in cash can easily join the subterranean economy. Transactions in service industries are often made in cash. How many of us have paid a cleaning lady in cash when asked, or paid a painter or carpenter in cash to get a better price for his services? Examples are widespread.

The size of the subterranean economy has been estimated recently by looking at the proportion of currency made up of cash. In our increasingly sophisticated financial world, cash has become less and less useful in making transactions. The trend over the last several decades has been for cash to make up a smaller and smaller proportion of our currency. However, because of tax avoidance, this trend has reversed itself sharply in recent years. This extra cash is used to finance more and more economic activity that takes place off-the-books.

It is obviously risky to avoid taxation by transacting business in cash. This risk, as well as the additional cost of doing business in this fashion, must be balanced against the rate of taxation. As the marginal rate of tax on additional income rises, it balances off more and more of the risk. A point is finally reached where the person perceives that the risk is more than compensated for by the extra profit available from avoiding taxes. Others participate in the subterranean economy because Government regulations and laws, such as the minimum wage, prevent them from finding jobs in the official economy.

If the subterranean economy is indeed operating at a level equal to 10 percent of official GNP, then the economy is operating much closer to capacity than the official data and statistics indicate. If this is true, then policymakers should refocus their attention away from stimulating employment and economic activity and toward bringing the subterranean economy under the tax laws. The most efficient way to do this is to destroy the incentive to participate in the subterranean economy by lowering tax rates. It has been estimated that if taxes had been collected from the subterranean economy in fiscal year 1977, the budget would have been in rough balance instead of having a $45 billion deficit.

Finally, a reduction in tax rates across-the-board will shift savings to more efficient and productive uses. In spite of the fact that average tax rates have not fluctuated very much since 1964, marginal tax rates have risen substantially. Increases in the standard deduction and the adoption of the general tax credit have held down the average rate of tax, while real nominal income has been taxed at higher marginal rates. A broad tax base with low tax rates is less disruptive of economic growth than a narrow base with high rates which can reduce the aftertax reward to saving and investment.

When a taxpayer moves into the 30-percent marginal tax bracket, it becomes profitable to look for tax shelters. Since 1965, the percentage of tax returns experiencing a 30 percent or greater marginal tax rate has increased from 2 to 10 percent. Since taxpayers in those brackets have income about three times the median, they are likely to save about three times as much of their income as their percentage of tax returns would indicate. Consequently, the percent of total personal saving which could potentially be lured into tax shelters has increased from about 10 to 30 percent since 1965.

The amount of income being directed into certain types of tax shelters has risen several hundred percent in the last few years. Demand for common stock has fallen off while it has surged for tax-exempt mutual funds and bonds. If this money were directed into common stock and other more productive areas, it would also become taxable and increase Government revenues. A reduction of one-third in all tax rates would solve much of this problem.

Almost everyone in the marginal tax brackets of 30 to 50 percent would find their marginal rate reduced to between 30 and 35 percent under this plan. They would then find that it did not pay to use tax loopholes. The number of tax returns in those brackets accounts for two-thirds of the saving done by people above the 30-percent bracket. This saving will now find its way into more productive, unsheltered private investment. It will also become taxable.

Individuals in the 50- to 70-percent tax brackets are those who use the most outrageous tax shelters—those that actually lose money in order to benefit the taxpayer. The widespread use of tax shelters by people in these brackets can be demonstrated by the fact that, at the present time, less than $3 billion is collected in tax revenues on existing taxable income that falls within these brackets. Much of the potentially taxable income in these brackets is either sheltered or has just not been earned. With a one-third reduction in the rates, the money put into these shelters would find its way into more productive, taxable activities or into sheltered municipal bonds which have greater social value.

Also, any increase in the deficit resulting from a tax rate reduction would be less harmful than a comparable increase in the deficit from spending increases. The increased aftertax reward to saving would stimulate an increase in the supply of savings which could be used to purchase any Treasury bills that might have to be issued to finance a temporary increase in the deficit. Therefore, the supply of savings for private investment would not be diminished. But under a comparable amount of spending increases, there would be no increase in saving and therefore the increase in the deficit would have to be financed from the existing supply of savings.

But the economic framework of the committee precluded these considerations. Because of this, I believe the committee's deliberations were biased against including room in 5-year revenue figures for enactment of a phased-in, substantial reduction in income tax rates, such as that proposed in the Kemp/Roth Tax Reduction Act.

I would like to add one final comment on tax cuts. The committee determined that decisions about tax cuts would be made on an annual basis. However, this 1 year at a time approach to cutting taxes is very bad for business and consumer confidence in the economy. If businesses knew that they would receive a reduction in their tax rates over a period of 3 years, they would immediately increase their investment based on the greater future aftertax profitability that would result from these investments under the lower tax rates. This increased investment would spur economic activity and would lead to the real growth in our productive capacity that we must have to create new jobs, to increase our standard of living, and to modernize our outdated plant and equipment to compete with our trading partners.

I am disappointed that the committee did not see fit to recommend a tax cut such as that contained in the Kemp/Roth bill. Our tax system is creating a crisis in this country. A tax revolt is brewing across our Nation. In light of the projected increases in taxes resulting solely from inflation and increased social security taxes, the Kemp/Roth proposal seems modest.

For instance, the gross cost of the Kemp/Roth bill for fiscal year 1983 is projected to be $150 billion. However, by that time, assuming inflation at an annual rate of 6 percent, personal income taxes will be $40 to $50 billion higher than they would with no inflation. The increased social security taxes will yield $35 billion in additional revenues in 1983. Therefore, after offsetting the increased revenues brought about by inflation and increased social security taxes, the gross cut is only $70 billion. And since under the most pessimistic projection, one-third of the tax cut would be recouped from the increase in economic activity, we can reduce the net tax reduction to no more than $20 billion. If the revenue reflows are greater, as I believe they would be, the net reduction in revenues would be even less. Including room in the 5-year revenue figures would have been a sign for the American taxpayers that we in Congress intend to do something to relieve a tax burden which has become overwhelming, which is killing the vitality of our economy, and which will become even worse. It is unfortunate that

the committee did not make this recommendation. I hope the full Senate will ignore its recommendation, made from a faulty economic framework, and leave room in the revenue figures for a substantial tax rate reduction.

Finally, I would like to comment on some points not directly related to the economic decisionmaking of the committee. First, I believe the committee makes a mistake in leaving the revenue decision to last in its deliberations. In our meetings, all spending decisions are made before the revenue figure is set. This allows our spending decisions to lock us into a revenue decision. I believe that the revenue number should be decided upon first. We should decide how much we can afford to tax our people without destroying economic incentives, and then work from there to determine spending priorities. The taxpayer should not always come last. In the Budget Committee's approach, the spending constituencies are taken care of first, and if anything is left, it is given to the taxpayer. More often than not, little or nothing is left. It is time that the taxpayer came first, and perhaps the spending constituencies will have to come up short of their demands for a change.

I am also disappointed that the committee has recommended to delay the effective date of a tax cut. Over the past year, the committee has complained about other committees juggling the effective dates in their legislation to remain within the spending ceilings or revenue floors of the effective budget resolution. It seems that the Budget Committee is playing the same kind of games with the budget process that it has complained about in the past.

The only reason for postponing the effective date of the tax cut is to reduce the size of the fiscal year 1979 deficit. There is no economic reason to postpone the tax cut. It is merely delaying its implementation to make the deficit appear smaller than last year's deficit and that suggested by President Carter. It represents no real change in policy.

I believe that this artificial reduction in the deficit by postponing the tax cut will be detrimental to our economy. The economy is long overdue for a tax cut. Our present progressive tax structure combined with our recent rates of inflation has been a drag on the economy for the past few years. Reducing taxes in the proper fashion is the most stimulative measure we can take. Postponing the tax cut will only postpone our return to a vigorous economy. I believe that, if we were interested in playing games with the deficit number, we could have more productively postponed some of the spending included in the Budget Committee recommendations.

The PRESIDING OFFICER. The Senator's 15 minutes have expired.

Mr. HAYAKAWA. I ask unanimous consent to take 1 minute to wind up my case.

The PRESIDING OFFICER. Without objection, the additional 1 minute is granted.

Mr. HAYAKAWA. I thank the Chair.

Mr. President, I must therefore encourage my colleagues to vote against this budget resolution as reported from the Budget Committee. I encourage them to make important changes, such as increasing the size of the tax cut which could be accommodated by lowering the revenue figure. I encourage them to recognize the faulty economic framework within which the Budget Committee has decided to work and to support economic policies that will increase incentives to work and produce. I encourage them to reject the big spending policies of the past that have promised prosperity, but produced only inflation. And, Mr. President, I encourage them not to rely on the faulty economic evaluations of the CBO, but instead to make their own economic judgments based upon sound economic theory and commonsense.

EXHIBIT 1

WEAK NONFEDERAL DEMAND

[Expenditures at a specified fraction of GNP or current policy levels, whichever is higher]

Year	GNP	Cons.	Sav. rate	Invest.	Fed. purch.	S & L purch.	Net exports
1979	2,271.7	1,438.1	5.6	359.2	167.7	311.0	−4.3
1980	2,517.2	1,587.7	5.9	406.2	183.2	343.2	−3.2
1981	2,782.6	1,746.4	6.3	458.0	198.2	379.2	.6
1982	3,061.0	1,911.0	6.6	513.8	218.0	419.2	−1.2
1983	3,346.6	2,076.9	6.6	572.1	236.9	462.6	−2.0

MODERATE NONFEDERAL DEMAND

[Expenditures at a specified fraction of GNP or current policy levels, whichever is higher]

Year	GNP	Cons.	Sav. rate	Invest.	Fed. purch.	S & L purch.	Net exports
1979	2,271.7	1,438.1	5.6	359.2	167.7	311.0	−4.3
1980	2,517.2	1,585.4	5.8	408.5	183.2	343.2	−3.2
1981	2,782.6	1,740.4	6.2	463.2	198.2	379.2	1.4
1982	3,061.0	1,896.9	6.3	522.2	218.0	419.2	4.5
1983	3,346.6	2,055.8	6.2	584.1	236.9	462.6	6.9

● Mr. BELLMON. Mr. President, I congratulate Senator HAYAKAWA on his insightful analysis. There is much in his statement that is convincing and helpful in our considerations.

Senator HAYAKAWA makes three points:

First, that economic models used by the Budget Committee are short term in nature and therefore not suited to 5-year budgeting. I agree with the Senator that such results should be met with healthy skepticism. In fact this committee rejected straight projections by the commercial models and instead chose to rely upon the prudent and "middle-road" path suggested in the Budget Committee report. The projection may prove to be in error, yet it is the best forecast we can construct given information presently available. Can the Senator from California suggest a "better" forecast or would he eliminate 5-year budgeting?

The second point the Senator makes is that it is erroneous to give equal weight to tax cuts and spending increases. I am told that most economists would weigh expenditure increases more heavily. Economists may have been unable to adequately capture in their models the incentive and stimulative effects of a tax reduction. Giving equal weight to tax and spending decisions is an adequate reflection of these effects.

The third point relates to reflows (increased tax revenues resulting from a stimulated economy) from a tax cut. Senator HAYAKAWA says there are three sources of reflows:

First. Increased business activity and work incentive.

Second. Increased usage of nonmonetary nontaxed trade (barter, which is a recent estimate indicated amounted to 15 percent of GNP), and

Third. Reduced incentives for nonproductive tax avoidance and evasion.

Mr. President, I would hope that the effect of a tax cut would be this productive. Recent studies by the Congressional Research Service and the Congressional Budget Office find no evidence of such large reflows in the 1964 tax cut, however:

CRS concludes that—

The feedback effects of the 1964 tax cut were not unanticipated; in fact they were an integral part of the consideration of the tax cut in Congress. Analyzing the magnitude of the feedback effects is difficult and ambiguous because of other economic influences during this era, primarily the Vietnam war buildup, however, it is clear that the feedback effects were not of a different order or magnitude that were anticipated by Congress or the Treasury.

CBO concludes that—

It is true that total revenues, unchanged from 1963 to 1964 (calendar years), rose by $9 billion from 1964 to 1965 and by $18 billion and $8 billion, respectively, in the two succeeding years. But most of this rise was due to economic growth that would have taken place even without the tax cut . . . the gain in GNP from 1964 to 1967 was by no means all or even mainly attributable to the tax cut. GNP rose by $155 billion from the first quarter of 1964 to the first quarter of 1967, and there is no model or economist who would attribute all, or anything approaching all, of this increase to a $12 billion cut in personal taxes.

Thus, Mr. President, though I agree with much that the Senator from California has said, I believe the Budget Committee adequately considered the implications of his discussion and would caution against large tax decreases that would vastly increase the deficit.●

UP AMENDMENT NO. 1246

Mr. ROTH. Mr. President, I send to the desk an unprinted amendment for immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The second assistant legislative clerk read as follows:

The Senator from Delaware (Mr. ROTH) proposes an unprinted amendment numbered 1246.

Mr. ROTH. Mr. President, I ask unanimous consent that the amendment be considered as read.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 1, line 7, delete the numeral and insert in lieu thereof "$438,400,000,000".

On page 1, line 9, delete the numeral and insert in lieu thereof "$34,800,000,000".

On page 2, line 5, delete the numeral and insert in lieu thereof "$60,500,000,000".

On page 2, line 7, delete the numeral and insert in lieu thereof "$858,700,000,000".

On page 2, line 9, delete the numeral and insert in lieu thereof "$106,700,000,000".

Mr. ROTH. Mr. President, I am offering an amendment to the budget resolution to reduce the recommended revenue level by approximately $5 billion, from $443.3 billion to $438.4 billion.

This amendment would allow room in the budget to accommodate the enactment of a tax cut of approximately $25 billion, effective October 1, 1978.

The Budget Committee's recommended revenue target assumes the enactment of a $19.4 billion tax cut for fiscal 1979. As the committee report states, this figure represents a $25 billion tax cut on an annual basis, but assumes the tax cut would be delayed until January 1, 1979, and be effective for only 9 months of fiscal 1979.

Mr. President, the only rationale for postponing the tax cut is to reduce the apparent size of the budget deficit. While the Budget Committee's recommended budget deficit is $5 billion lower than the administration's proposed budget deficit, virtually all of the reduction in the deficit is obtained by delaying and reducing the tax cuts.

In other words, instead of reducing Federal spending to reduce the budget deficit, the Budget Committee is making the American taxpayers pay for Congress spending excesses by reducing and delaying their tax cuts.

I believe substantial tax reductions are needed to both offset the social security and inflation-induced tax increases and to reduce the total tax burden on the economy.

Because of the higher social security taxes and the impact of inflation pushing taxpayers into higher tax brackets, smaller tax cuts will only result in a tax increase on the American people.

Under the budget resolution as it now stands, the Budget Committee is recommending that Congress reduce the budget deficit by raising the tax burden on the American people.

I believe this is wrong. I believe Congress must enact substantial, across-the-board tax reductions to offset the social security and inflation-induced tax increases and to provide real tax relief for all Americans.

Furthermore, I believe Congress must reduce the budget deficit by reducing the growth rate of Federal spending, not by increasing the tax burden on working Americans.

Mr. President, my amendment does not set forth the type of tax cut that is to be enacted. This amendment would merely allow Congress to adopt a tax cut of up to $25 billion, effective October 1, 1978.

As the Budget Committee's report states, many economic forecasters anticipate a sharp slowing of economic growth in late 1978 and early 1979 if tax reductions are not enacted before that time. In addition, both the Senate Finance Committee and the Joint Economic Committee urged the adoption of larger tax cuts than the Budget Committee recommends in this budget resolution.

The heavy tax burden on working Americans has reached the breaking point, and unless taxes are reduced substantially, I believe we face the dangers of a taxpayers revolt.

The heavy tax burden on our economy has resulted in sluggish economic growth, rising prices, persistent unemployment, and reduced productivity.

And unless taxes are reduced substantially, we face continued economic stagnation, inflation, and high unemployment.

Mr. President, I want to emphasize again that substantial tax cuts are needed to offset the increased social security taxes and the inflation-induced tax increases. Because of these huge tax increases, smaller tax cuts will only result in substantial tax increases on working Americans.

We must not try to reduce the budget deficit by raising taxes on the American people.

This budget imposes no restraints on Government. It is merely a continuation of the same old pattern of more spending and higher taxes, and it is asking the American taxpayer to pay for its higher spending levels. In effect, this budget is asking the American taxpayer to make sacrifices rather than the Government.

Mr. President, let me again emphasize that this amendment does not mandate the type of tax cut that is to be enacted. This amendment does not even mandate the enactment of a $25 billion tax cut, nor does it mandate the enactment of a tax cut on October 1. This amendment merely allows Congress to preserve its flexibility to enact the tax cuts by October 1. It will give us the flexibility to retain the timetable for implementing tax cuts as recommended by President Carter and many economic forecasters.

The economy is faced with a great deal of uncertainty, and we must maintain our flexibility to act. This amendment gives us that necessary flexibility to act quickly if the economy experiences a sharp downturn in the next few months, while still retaining the flexibility to delay the tax cuts if the economy overheats.

Mr. President, we should not shut the door on our tax cut options.

I urge the Senate to adopt this amendment. I yield the floor.

The PRESIDING OFFICER. The Senator from Maine.

Mr. MUSKIE. Mr. President, I must say I was certain I was not hearing accurately when I heard the Senator say we should not reduce the deficit by raising taxes. I fail to understand that comment. The action of the Budget Committee was simply to delay by 3 months the effective date of the very tax cut the Senator from Delaware is supporting, a $25 million tax cut on an annual basis. He proposed to assume its effective date to be 3 months earlier. How that translates into reducing the deficit by raising taxes escapes me.

I strongly urge the Senate to reject Senator ROTH's amendment to reduce the budget resolution revenue floor to allow for general tax rate reductions beginning on October 1, 1978, instead of on January 1, 1979, as provided in the budget resolution.

The Budget Committee took its action for very specific, legitimate, and sound reasons. I will undertake to explain them.

The Roth amendment is unrealistic.

The Roth amendment would raise the deficit to an unacceptable and unnecessarily high level.

It would raise the deficit for fiscal year 1979 to a level of $60.5 billion which the Senator earlier in remarks on the floor described as dangerous. I heard him say so.

And the Roth amendment could result in substantially increased future year budget deficits as well as a loss of fiscal discipline.

The Roth amendment would allow for a $25 billion general tax reduction to be implemented on October 1, 1978, for all of fiscal year 1979. By comparison, the budget resoluton assumes a $19.4 billion general tax reduction. This amount represents a $25 billion reduction on a full-year basis, but assumes the rate reductions would become effective on January 1, 1979, for only 9 months of fiscal year 1979. The Roth amendment would allow an additional $5.6 billion of tax reductions in fiscal year 1979, but does not specify the type of reductions to be enacted, nor the extent of reductions in future years. Under the Roth amendment, the fiscal year 1979 budget resolution revenue floor would be reduced by $4.9 billion; and the deficit would be increased by $4.9 billion from $55.6 to $60.5 billion.

The Roth amendment should be rejected because it is unrealistic. Why do I say that? It is highly unlikely that the tax reduction legislation which the Ways and Means Committee has just begun to mark up can be completed early enough to be reflected in lower withholding rates by October 1.

That is the first assumption of the Budget Committee.

According to the Internal Revenue Service, it takes approximately 6 weeks from the time congressional tax bill conferees agree to new tax reductions until these changes are widely reflected in actual lower withholding. As a result, Congress would have to agree upon tax reductions by August 15, in order that they be implemented by October 1.

Based upon the numerous time-consuming issues likely to be considered as part of this legislation, as well as the relatively slow chronology of past major tax bills, it is highly unlikely new tax reductions will be agreed to as part of

the pending tax bill by August 15. This tax bill, for example, is likely to be the forum for considering general financing of social security, as well as all the numerous contentious tax proposals made by the administration.

I cannot imagine that those issues will be quickly resolved, in time for both Houses of the Congress to agree by August 15.

Recent tax legislation containing comparable numbers of major issues have taken at least an entire year to proceed through the legislative process. This was true for the Tax Reform Act of 1969, and also true for the recent Tax Reform Act of 1976.

For example, the 1976 tax bill required 9 months from the beginning of the Ways and Means markup until the completion of the conference. The Ways and Means markup required 2 months. One more month was spent in the House between rules committee consideration and floor debate. Three months were required in the Senate from the time the finance committee began hearings on the bill until floor debate began. Floor debate consumed 2 months. Another month was spent preparing for, and completing, the conference. The bill now in the Ways and Means Committee surely could not be completed before October of this year if it follows the timetables of the past.

The Roth amendment would increase the fiscal year 1979 deficit from $55.6 billion to $60.5 billion.

Assume that we make room in the budget for the Roth amendment and the tax bill is not completed in time for implementation on October 1. That would mean that the additional room that we would be making available for that 3-month period would be added to the room available in the 9 months remaining in fiscal 1979. That would support a tax cut of $32 billion. It would support rate reductions aimed at a $32 billion tax cut on an annual basis instead of the $25 billion that is the ostensible purpose of the Roth amendment, and the $25 billion on a full-year basis that the Budget Committee recommended.

The Budget Committee was well aware of that and did not want to make that room available, either for the purpose of increasing the 1979 deficit or subsequent deficits, or for still another alternative.

If that additional $7 billion is not used for general tax reduction totaling $32 billion, it would be available for special tax legislation of the kind we so often see around this place.

So the Budget Committee had three considerations in mind:

One, we cannot, realistically, enact a tax cut that will be effective October 1.

Two, that being the case, there is an inflation problem confronting this country to which we ought to try to make a contribution. Reducing the deficit to $55.6 billion, which is less than the President's deficit, less than the House deficit, is a strong signal that we could send to the business community, and to all Americans, that we are concerned about the size of the deficit.

The fact that the tax bill probably cannot be made effective October 1 gives us an opportunity to send that signal, and we ought to take it. We ought to send that signal and hold to that $55.6 billion deficit figure.

Finally, Mr. President, the Budget Committee did not think it sound, now that we are beginning to budget in terms of 5 years, to make room in the budget for a possible $32 billion tax cut on an annual basis.

That is exactly what we would be doing if we approve the Roth amendment and if my prediction that the tax bill cannot be implemented October 1 materializes. The $55.6 billion deficit reported by the Budget Committee is more than $5 billion lower than the deficit now recommended by the administration. This reduction is an important signal to the American people that the Senate is serious in its efforts to control budget deficits and inflation. Acceptance of the Roth amendment would reverse this signal.

The reduction in the deficit proposed by the committee, but vitiated under the Roth amendment, could have a favorable impact on inflation. This would occur if the reduction were reflected in reduced inflationary expectations and subsequently in reduced wage and price demands in the private sector.

The Roth amendment could result in substantially increased budget deficits in future years as well as a loss of fiscal discipline. For example, if the reduction advocated by Senator Roth were approved, Congress could adopt a $32 billion annual tax reduction effective January 1, 1979, for only 9 months of fiscal year 1979. Alternatively, under the Roth amendment, Congress also could enact a $25 billion annual tax reduction effective January 1, 1979, as well as up to $7 billion of unspecified special tax benefits. In neither case, would the budget resolution be violated, yet control over the revenue side of the budget would be lost.

There is no reason to provide the flexibility to enact earlier tax reductions that will almost certainly not be enacted.

Those, Mr. President, and not some cosmetic approach to the deficit, are the reasons why the Budget Committee assumed an effective date of January 1, 1977 rather than October 1, 1978. At that time we did not know about a Roth amendment. All we knew about was a Presidential recommendation. And even though this was the recommendation of a President of my own party, I still said it was sound to delay the effective date from October 1 to January 1 in order to reap these additional benefits.

So, Mr. President, I urge my colleagues to reject the Roth amendment.

Mr. BELLMON. Mr. President, will the Senator yield to me for about 2 minutes?

Mr. MUSKIE. Yes, I yield.

Mr. BELLMON. Mr. President, I think the chairman has made a highly eloquent and certainly sound argument against the Roth amendment. There is one additional argument I would make.

In the final months of the Ford administration, the Ford administration came to Congress with a tax package similar to the Carter package. It consisted of a tax decrease just before an election and a tax increase in January, just after the election. That is what we have now.

If we put in a tax reduction in October, this may make the voters think they are getting a kind of election day present from the Congress, only to find out that, in January, when the social security taxes come on, we will take back more than we gave them.

To me, it seems politically dishonest to come along with a tax reduction just before an election, knowing full well that the voters are going to get hit with a tax increase in January. That is another reason I voted to put off the effective date of the tax reduction until January 1 of 1979.

Mr. ROTH. Mr. President, I yield myself 3 minutes.

As I sit here listening to the arguments made against the so-called Roth amendment, I realize they are the same tired old arguments we hear year in and year out. In earlier debate today, when amendments were proposed to reduce Federal spending, the argument was, oh, no, this was a tight budget, there is no place to cut Federal spending. In other words, the Senate was unwilling to cut Federal spending to reduce the budget deficit and ease inflation. But now, when an amendment is proposed to reduce taxes we learn we dare not give the taxpayer a break back home because of it inflationary impact.

Ladies and gentlemen, it is about time we stopped ripping off the middle-class people of this country. I am only asking what the President himself has asked to be retained in the budget resolution. I am not asking today that we establish a tax cut on October 1. I am asking that the Senate have that option, just as President Carter has asked.

The distinguished chairman says that this is unrealistic, that the timetable would not permit it to be accomplished. I find it hard to believe, Mr. President, that the Treasury Department so advised the President that he would make recommendations that are unrealistic. In any event, if we find we cannot accomplish it, there is no harm, because it will not happen.

But notwithstanding what was said by the opposition, the people of this country face a substantial tax increase because of what we have done on social security taxes and because of the fact that, through inflation, almost every American faces an automatic tax increase if he is lucky enough to get a cost-of-living increase in his wages.

I want to stress again that this amendment does not mandate the type or the date of the tax cut. I intend to argue another day when a tax cut should take place, and I intend to argue another day what the makeup of that tax cut should be. What I am seeking to retain here is freedom of action, the option of considering the President's own proposal of a $25 billion tax cut October 1. If this amendment is defeated, it means that we will lose the flexibility to act quickly in this area of tax cuts if we experience a sharp downturn in the economy in the next few months.

Mr. President, I think that it is about time that we remember the campaign

promises of 2 years ago, when there was great talk about less Washington, less Federal spending, less Government regulation, and more freedom of choice on the part of the American people. The one way we can do that, the one way we can provide options to the Senate during the coming months when it considers tax cuts, is to adopt the Roth amendment, which would enable us to adopt, if we choose to do so, the President's own program.

● Mr. CRANSTON. Mr. President, as one involved from the start in helping create and implement the congressional budget process, I believe that now is a good time to examine some of its strengths and a few of its weaknesses.

Under the very strong leadership of the Senator from Maine (Mr. MUSKIE) and the Senator from Oklahoma (Mr. BELLMON), this process developed from tentative beginnings in fiscal year 1975 to become a serious exercise in congressional fiscal discipline.

It has attempted to link that discipline to an appropriate economic policy to insure a moderately paced recovery, while avoiding the rekindling of double-digit inflation.

Over these years, this process has often successfully turned back attempts to spend additional taxpayers' dollars totaling billions by rejecting proposals to authorize or appropriate more than the congressional budget would permit.

While many of us occasionally have played significant roles in assisting the budget process to achieve its objectives, no single force has been more important than the force and fervor brought to the Senate floor debates on these matters by the distinguished and dedicated chairman of the Senate Budget Committee.

He has done an outstanding job and I applaud him for it.

We have all learned much over these several years.

Each year, largely as a result of the statutory scheme of the Congressional Budget Act of 1974, we have seen new refinements in the process.

This year, for example, the budget includes an expanded number of spending categories so as to identify more precisely the national priorities for which funds are to be spent. These categories, for the first time, are divided into "missions," to point up the objectives of Federal spending within each category.

But in my view not all of this year's alterations are progressive.

One change is a series of projections—extending 5 years into the future—for each budget function and the missions within it.

Supposedly, these numbers give us some idea where the budget will be 5 years from now.

But one great lesson we have learned from our experience of the past several years is the variable quality of the numbers upon which the whole budget process depends.

When, for example, someone proposes to cut $5 billion from the defense budget next year, we now know enough to ask, "From which defense budget?"

This year's Presidential budget?

This year's congressional budget?

Next year's current policy estimate?

Next year's current law estimate?

The previous administration's budget projection for next year?

We have learned about "reestimates," which start the day after a budget is prepared—either by the President or by the Congress—and continue until the end of the fiscal year to which the budget applies.

We have observed the tactics Presidents use to keep their budget deficits lower—and the countertactics that congressional committees use so as not to be outdone by the President.

And we have learned about some of the incredible number of assumptions staff must make to provide us with any usable numbers at all.

The use of 5-year projections is premised on the admirable desire to avoid committing Congress to approval of multiyear programs with sizable future-year costs, after examining the cost implications only for the first year.

I, too, believe strongly in nailing down the tent flap, lest what appears to be the camel's nose probing under the tent turns out to be a large camel.

Of course, we should take into account the long-term consequences of our legislative and budget decisions, using the best information available at the time.

But after we have done so, we should beware giving our rough estimates a standing or credibility they do not merit, or using them as standards for actions the Senate will consider later.

I believe there are grave dangers in giving undue formal recognition to these 5-year estimates.

If taken too seriously, they may lead us into fiscally irresponsible or politically absurd postures, and thus discredit the whole budget process.

I raised some of these points in committee and in a letter to the chairman, published in the committee's report.

Mr. President, I submit for the RECORD my letter of April 12, 1978, to Chairman MUSKIE regarding 5-year projections.

LETTER FROM SENATOR CRANSTON TO SENATOR MUSKIE

U.S. SENATE,
Washington, D.C., April 12, 1978.

Hon. EDMUND S. MUSKIE,
Chairman, Committee on the Budget,
Washington, D.C.

DEAR ED: As I mentioned during the Committee mark-up session the other day, I am very concerned about the weight the Committee intends to give to the five-year projections we have been using.

Before we commit ourselves too deeply to the procedures suggested by the staff, I want to comment on them.

It is, of course, very appropriate for this Committee to try to understand the long-term consequences of our one-year budget decisions.

The Congressional Budget Act itself provides for, and encourages that kind of procedure as to the major functional categories themselves; and I support the notion of having long-term, five-year projections available for informational purposes as we consider the fiscal year 1979 figures.

But, I think it may be a mistake to give undue formality to five-year projections—as though they were real—without a thorough understanding and complete disclosure and discussion of how these numbers are derived, what assumptions go into them, to what extent those assumptions are controversial, and how likely all these estimates are to be accurate.

For the five-year projections properly to be included in the budget resolution, I believe that the Committee and then the Senate would have to consider carefully all of these factors individually, and vote to adopt not only figures but also assumptions for fiscal years 1980 through 1983.

To attempt this necessary formal consideration and adoption of five-year projections is too unwieldy and too time consuming. I believe they should be identified in the report as CBO projections of out-year implications and the underlying assumptions should be expressly stated.

Let me quickly explain why I am concerned.

Estimates by OMB and CBO often differ by hundreds of millions of dollars in a single program—not over several years, but in one year's budget. When these differences are projected out five years, they can become multi-billion dollar differences.

Assumptions have been made in all of the entitlement programs, such as veterans' programs, about the "Participation Rate"—the predicted number of eligible persons who, in the forthcoming budget year, will take advantage of the program.

Assumptions have been made about the "Suction Effect"—that is, by what increment an increase in benefits will supposedly induce a higher rate of participation. These assumptions are speculative at best.

Assumptions have been made about the unemployment rate—about the inflation rate, not only of the economy in general but of particular segments of it.

In many functions, we make assumptions about "Substitution Rates"—about interest rates—about investment rates—about spend-out rates—about the ability of agencies to implement new or old programs—about the mix of kinds of housing we expect—about the number of natural disasters we will have—about the market prices of commodities (which fluctuate daily)—and even about the weather (in the agriculture function, to name one).

The uncertainties inherent in assumptions like these and in estimating techniques make it extremely difficult to make reliable estimates even for one year. And in each subsequent year the problems become geometrically more difficult.

Finally, we are making hypothetical assumptions about legislative actions and future policy directions we cannot presume to know. The one thing we know for certain when we project current law or current policy for five years is that we will be wrong!

Thus, I have two serious problems with the five-year projections.

First, I don't see any reason to give them such credibility that we should debate them and vote on specific figures. Let me say emphatically that I think this Committee has a fine, dependable staff. And I am particularly impressed by the quality of the economic advice we have received over the past four years.

I just don't have any faith in the ability of economics or any other science to predict with any reasonable degree of accuracy the elements and the state of our economy five years in the future, based as it is on such unmeasurable elements as the state of business and consumer confidence. No person or profession can have that ability.

This problem is compounded by the non-economic assumptions which are hidden in these numbers. In the past two years, we have missed accurately predicting the rate of Federal outlays—presumably the most controllable of all the uncertain assump-

tions I have mentioned—by $12 billion and by $8 billion respectively, creating our so-called "shortfall." And these were the result of one-year—not five-year—projections.

The "pressures" created on the Budget by these out-year numbers are misleading and false. There is adequate pressure created by the real competition among programs and budget functions for the dollars we can afford to spend in any year.

Second, this Committee, the Senate, and, ultimately, the Congress, as a whole, is charged, under the Budget Act, with adopting the budget.

That is not a responsibility that can be delegated to our staff, or to the staff of CBO.

Moreover, a few instances—of which the Committee's staff are aware—have surfaced of CBO-supplied numbers which contained hidden assumptions reflecting a bias of the analyst who prepared them, as to whether a congressionally approved program would work, and in what way.

Once published, our numbers acquire a life of their own—no matter how often we explain or revise them. Often they are used as a standard against which our future work is evaluated.

While even our one-year numbers need to be constantly revised and re-estimated, the estimating errors compound themselves over a five-year period to make the resulting numbers extremely tenuous and render them of little utility as formal standards for judging present decisionmaking.

In summary, I believe it a serious mistake to give these numbers more credibility than they deserve. I, therefore, urge they be identified as CBO or Committee staff projections and that the underlying assumptions be fully and expressly stated, differentiated from the current budget year numbers.

I request that this letter containing my views be included in the Committee's report.

Cordially,

ALAN CRANSTON.

Mr. CRANSTON. Mr. President, in essence, my letter reaches two main conclusions:

First, that so many assumptions, both economic and noneconomic, are built into these future-year projections that their inaccuracy is virtually guaranteed.

Second, that neither the Senate as a whole, nor even the Budget Committee, has the time, patience or fortitude to examine each debatable assumption, determine its accuracy or applicability, and resolve the various policy questions implicit in choosing one set of numbers over others. Yet, without such detailed scrutiny, the Senate will not see the policy implications hidden in the future-year numbers, or insure that these numbers reflect the Senate's intentions.

I am well aware that this year the future-year numbers are not in budget resolution, but merely in the committee's report. I, for one, hope they never show up in the resolution. But once these numbers have been printed, they acquire a life of their own, against which the Senate's future performance will be measured.

Yet no Senate committee—not even the Budget Committee, and certainly not the Senate as a whole—will have determined whether these future-year numbers are soundly based.

Five-year projections are difficult, if not impossible to validate. Yet a Senate which simply accepts them as reasonable budget estimates lends itself to being misled by invisible judgments involving assumptions which may be inaccurate, biased or ill-conceived.

The Budget Committee adopted lump sum cumulative totals, allocated by mission but not by year, for the period fiscal year 1980–83. But in the committee report "committee recommendations" appear for each year fiscal year 1980–83.

My understanding of the cumulative totals on which the committee voted without significant discussion was that they were projections supplied by staff to reflect the considered judgments which the committee made for fiscal year 1979.

Yet when the "committee recommendations"—which the committee neither considered nor made—are closely scrutinized, it is apparent that they do not conform with the policies implicit in the fiscal year 1979 budget figures.

For example, in function 700 (veterans' affairs and services) mission 3 (hospital and medical care for veterans), the committee recommended a total slightly above current policy for fiscal year 1979, but the totals for each future year fall below current policy significantly, apparently based on some invisible policy judgments which the committee neither discussed nor made. Certainly, nothing in the record of the committee deliberations supports severe cutbacks in the level of funding for veterans' hospital and medical care that these out-year numbers would require.

All of these assumptions are built into calculations to produce a single set of numbers which the committee believes is better than no numbers at all. I am not sure that belief is well-founded. And I am deeply troubled by the possibility of having imputed to me, as a member of the Budget Committee, assumptions and recommendations with which I disagree, and which the committee never made.

Systematic reductions of future-year estimates produces what has been called "pressure on the numbers".

It is my belief that taxpayer concern about high Federal spending, and our own desire to be bound by appropriate fiscal discipline and economic policy, create sufficient "pressure on the numbers" to eliminate any need for artifically created pressure. I'm sure there is a need for other means to reduce the budget. I just question this artificial numbers game.

While there are, as I have noted, certain judgments that I believe ultimately belong to the Senate and not to the staff, I cannot leave this subject without mentioning the tremendous job I believe the staff of the Budget Committee has done over these several years, and particularly this year, in preparing materials for the consideration of the committee and the Senate, and in helping to make this budget process work. There are many very talented people on the staff of the committee who have made a major contribution to this process. I deeply appreciate that contribution.

One final point, Mr. President, it is not "fiscal extravagance" to propose alternatives to the Budget Committee's recommendations, as though the committee's actions were definitive on how the priorities of the budget should be arranged.

There are fiscally responsible alternatives. I was somewhat dissatisfied with many of the functional totals arrived at by the committee—and my votes in committee reflect that.

But to have different priorities is not to be fiscally irresponsible. My own recommendations would reflect the totals I supported in committee and a slightly deeper tax cut than the committee recommends, and still provide for a lower deficit than the one specified by the resolution before us.

My own preferences include small increases in a number of other functions of the budget where I believe the Budget Committee's recommendations would do injustice to particular programs.

Our fiscal policy can be maintained by offsetting these increases with what I believe is an appropriate decrease:

I do not support the level of military spending endorsed by the Budget Committee—which is $11.6 billion more than the generous amount of budget authority provided for fiscal year 1978 and $1.4 billion higher than the President's request for fiscal year 1979.

That kind of increase in a year of strict budgeting and peace is my idea of fiscal irresponsibility. For that reason, I have supported the McGovern transfer amendment, and other responsible attempts to reduce the defense budget this year.

To the extent that the Senate as a whole takes the time to refine the work product of the Budget Committee to reflect the will of the Senate, the budget process will continue to provide a fiscal discipline with which the Senate can live.

That is an objective well worth achieving.●

The PRESIDING OFFICER. Who yields time?

Mr. MUSKIE. We are ready to vote.

Mr. ROTH. I am ready to yield back my time.

The PRESIDING OFFICER. Is the remainder of the time yielded back on both sides?

Mr. ROTH. I ask for the yeas and nays, Mr. President.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. MUSKIE. Mr. President, I yield back my time.

The PRESIDING OFFICER. All time has been yielded back. The question is on agreeing to the amendment of the Senator from Delaware. The yeas and nays have been ordered. The clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from Indiana (Mr. BAYH), the Senator from Delaware (Mr. BIDEN), the Senator from Montana (Mr. PAUL G. HATFIELD), the Senator from Minnesota (Mrs. HUMPHREY), the Senator from South Dakota (Mr. ABOUREZK), and the Senator from Mississippi (Mr. EASTLAND) are necessarily absent.

I further announce that, if present and

voting, the Senator from Minnesota (Mrs. HUMPHREY) would vote "nay."

Mr. STEVENS. I announce that the Senator from Nebraska (Mr. CURTIS), the Senator from Arizona (Mr. GOLDWATER), the Senator from Michigan (Mr. GRIFFIN), and the Senator from North Dakota (Mr. YOUNG) are necessarily absent.

I also announce that the Senator from Tennessee (Mr. BAKER), the Senator from Utah, (Mr. GARN), the Senator from Kansas (Mr. PEARSON) are absent on official business.

The result was announced—yeas 22, nays 65, as follows:

[Rollcall Vote No. 135 Leg.]

YEAS—22

Cranston	Laxalt	Roth
Danforth	Long	Schweiker
Ford	Lugar	Stevens
Hansen	McClure	Thurmond
Hatch	McIntyre	Tower
Hayakawa	Packwood	Wallop
Heinz	Percy	
Helms	Proxmire	

NAYS—65

Allen	Glenn	Moynihan
Anderson	Gravel	Muskie
Bartlett	Hart	Nelson
Bellmon	Haskell	Nunn
Bentsen	Hatfield,	Pell
Brooke	Mark O.	Randolph
Bumpers	Hathaway	Ribicoff
Burdick	Hodges	Riegle
Byrd,	Hollings	Sarbanes
Harry F., Jr.	Huddleston	Sasser
Byrd, Robert C.	Inouye	Schmitt
Cannon	Jackson	Scott
Case	Javits	Sparkman
Chafee	Johnston	Stafford
Chiles	Kennedy	Stennis
Church	Leahy	Stevenson
Clark	Magnuson	Stone
Culver	Mathias	Talmadge
DeConcini	Matsunaga	Weicker
Dole	McGovern	Williams
Domenici	Melcher	Zorinsky
Durkin	Metzenbaum	
Eagleton	Morgan	

NOT VOTING—13

Abourezk	Garn	Pearson
Baker	Goldwater	Young
Bayh	Griffin	
Biden	Hatfield,	
Curtis	Paul G.	
Eastland	Humphrey	

So Mr. ROTH's amendment was rejected.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the amendment was rejected.

Mr. MUSKIE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

MIDDLE-INCOME TUITION ASSISTANCE

Mr. CULVER. Mr. President, I wish to inquire of the distinguished chairman of the Budget Committee.

One issue which Congress will undoubtedly address in this session is how to provide some additional financial assistance to middle-income families hardpressed by the rising costs of higher education. What does the resolution assume for middle-income tuition assistance?

Mr. MUSKIE. I appreciate the Senator's question, and we have had some discussion about it.

The first concurrent resolution includes $0.5 billion in revenue losses for a college tuition tax credit targeted on full-time undergraduate students. The resolution also includes $0.1 billion in spending for the refundable portion of the credit.

Mr. CULVER. I am told that the House Budget Committee has assumed an alternate program of expanded scholarship, loan, and work study assistance targeted to middle-income students. If the tax credit is not enacted, would the $0.5 billion in revenue reductions and $0.1 billion in spending, assumed in this budget resolution for the tuition tax credit, be available for such a spending program?

Mr. MUSKIE. I cannot commit myself, nor the Budget Committee, to a position with regard to any specific legislation which was not assumed in this resolution. However, assuming the budget resolution conference agrees to the tax credit, but the Congress subsequently rejects it, an alternative form of tuition assistance for college education which did not increase the total size of the Federal budget beyond the $600 million included for the tax credit would not do violence to the spirit of the budget resolution. This assumes, however, that the Finance Committee would not use for other purposes the $500 million in tax reductions and $100 million in increased spending that it would have available under the budget resolution for the tax credit approach. The revenue, outlay, and budget authority levels contained in the budget resolution would also have to be adjusted in the second budget resolution in order to take account of this change. And, I am sure the Senator realizes that this $0.6 billion is only about 40 percent of what is necessary to fund the spending proposal advanced by the President or the Human Resources Committee.

Mr. CULVER. In other words, in both Houses of Congress, the budget resolutions envisage additional financial assistance to middle-income students for the costs of higher education. Whether it will come in the form of tuition tax credits as the Senate resolution predicts, or as expanded scholarship, loan, and work-study programs as the House resolution envisions, remains to be determined.

Mr. MUSKIE. Yes.

Mr. CULVER. The resolution of that question, as I understand it, will begin in the conference committee on the first concurrent budget resolution and then continue later in the session as the two Houses make decisions on the substance of the alternative approaches.

Mr. MUSKIE. Yes.

Mr. CULVER. I thank the Senator.

THE 1979 BUDGET RESOLUTION—ALL BLOAT, NO BALANCE

Mr. HELMS. Mr. President, it is not only wrong for the Federal Government to spend more than it takes in year after year, it is destructive to the economy, and ultimately to our society.

For this reason, I oppose the budget resolution before the Senate. A more proper and constructive resolution would provide a substantial reduction from the proposed fiscal 1978 deficit of $51.1 billion and would point the Federal Government in the direction of a balanced budget by 1980—one of President Carter's goals.

BUDGET SHOULD MOVE TOWARD ZERO DEFICIT

The only stated reason—and it is often stated—not to propose a resolution calling for a balanced budget in the coming year is the claim that the disclocations that would be required would be costly and would be unfair to individuals who would have to make great changes on short notice. In fact, I believe it can be shown that the "cost" to the Nation in terms of economic dislocation and the disruption caused by the effects of Federal deficits is massive. It is not, however, as easily quantifiable as the obvious beneficial changes that would be required by a significant shift away from a $50 billion annual deficit.

I am aware of some of the arguments against a change toward a balanced budget.

First, it has been said that the resolution before the Senate is a result of requests from the various "committees of jurisdiction" which plan to submit legislation or have already submitted legislation calling for spending massive amounts of money. I can sympathize with the dilemma confronting anyone trying to juggle various requests. But, is not the purpose of the budget process to force hard choices on the Congress?

Our first priority should be the determination of a figure within which we must work. That figure should not be one that proposes an addition to the Federal debt of $55.6 billion.

It seems that if the budget process has merit, then it should entail a pledge that Congress will work within the framework of strict limits on Federal spending. Those limits must be determined and limited by expected revenues.

Now, a related argument would be that any resolution providing for a smaller deficit would require massive cuts in various programs or massive increases in taxes. The advocates of the resolution before the Senate might ask which program or programs might I wish to name as candidates for any particular budget cut.

My response is this: The debate should not now be on which programs to cut or which taxes to raise. The debate should be whether or not we are going to continue down this path of massive deficits. That must be the first question.

If the Federal Government is going to spend $500 billion next year, the question is how is it going to be financed. Honestly, through taxes or surreptitiously, through borrowing and inflation.

Finally, the argument is that any move to balance the budget would have adverse economic effects. I admit that it is impossible to wean a calf in a day. It is impossible to change massive allocations of resources instantly without great cost. But, in fact, great costs are imposed by deficit spending every day and every year we continue to spend profligately.

ADVANTAGES OF A BALANCED BUDGET

What the proponents of the status quo do not discuss are the salutary effects a balanced budget would have on our

economy. With less government demands in the capital market, interest rates would go down and it would be cheaper for businesses to make investments in job-creating plant and machinery.

With a balanced budget, lower interest rates could be expected on mortgages and more people would enter the housing market.

With a balanced budget, the inflation rate would decline and added incentives would be given for savings and investment, further stimulating the economy. A lower inflation rate and a balanced budget would give the businessman a reason to believe that government was going to cause less dislocation and disruption in the economy. That alone would have the effect of creating confidence enough for investment resulting in added hundreds of thousands of jobs. Such a commitment would result in higher levels of economic activity which in itself would create added Federal revenues.

The stagnant economy cannot provide for the improvement in the status of those who most desire economic success. It cannot provide the tax revenues to pay for the programs Congress has already authorized, let alone ones in the minds and on the drawing boards of some of those in Congress.

Only a growing economy can provide the society we want. Only a balanced budget—and proper tax policies—can provide an atmosphere in which the economy can approach the rate of growth of which it is capable.

ECONOMICS OF A FEDERAL DEFICIT

Mr. President, it is a grave error for Congress to ever intentionally and consciously adopt spending and taxing programs that result in Federal deficits. Even in times of grave national emergencies, there is reason to say that budget deficits are not justifiable. There may be cases in times of war that the Federal Government would do the extreme—would spend more than it takes in. On the other hand, war time should be a time of sacrifice for all citizens, and not merely our armed services personnel.

Inevitably, however, a deficit is not just a means of financing Federal spending. A Federal deficit is a prevarication to the people for whom government exists. It is a statement that the people are going to get more government than they are paying for: That government will provide the proverbial free lunch.

That even the powerful Federal Government can accomplish the miracle of loaves and fishes is just not true. In any economy or any system, there is just so much output. Government consumes such output of that economy as represented by total Federal outlays. Whether or not it taxes people to pay for those outlays, it consumes them. Last year it consumed 22.7 percent of the Nation's GNP. Whether or not taxes pay for that consumption, it is consumed.

The Federal "take" is there regardless of the means of financing it. When there is a deficit, it means that instead of taxes—instead of things lawmakers vote on—the money is raised through borrowing. The $55 billion proposed deficit in the coming year would be paid for by borrowing from people who would otherwise be spending that money themselves, or who would be lending it to others in the private sector to do what they—free individuals—would do with those funds.

But it is not just the duplicity of refusing to tax for spending that deeply disturbs me, it is the effects of Federal borrowing. It is inflation. It is a tax that no Member of Congress would support, and yet the majority of Congress forces it down the throats of the American people via massive deficit spending.

The inevitable takes place like this: The Treasury acts as Congress' agent and must raise the difference between income and outlays by selling securities. The private market reacts by increases in the interest rate brought about by added competition from Treasury securities. The Federal Reserve Board comes under pressure by those who feel that higher interest rates are a result of too small a money supply, and usually the Federal Reserve Board relents. It buys the Treasury securities and thus adds to the reserves of its members. It effectively increases the money supply by this act by making member banks more able to make loans. The money supply is increased above and beyond the normal needs of the economy, and inflation results.

Too much money chasing to few goods is inflation. It is a direct result of Federal money creation. It is a direct result of deficit spending.

THE EFFECTS OF INFLATION

And for a moment let me mention the effects of inflation. Let me reiterate what should be common knowledge in the press, in the universities, and in all centers of policymaking.

Inflation is a means of transferring resources from one party to another. In the case of the biggest debtor in the world, the Federal Government, it is a case of transferring resources from the holders of the Federal debt to the Federal Government.

For example, on April 20, the Federal debt stood at $740,145,019,139. Inflation means that the amount of goods and services represented by that many dollars is constantly declining. It means that every year we have 6 percent inflatino, the Federal Government rips off $44 billion. It means that the holders of savings bonds, the pension funds with Treasury securities, the college endowments holding Federal securities are "taxed" through inflation of tens of billions of dollars.

John Davenport, former associate editor of Fortune magazine put it this way. Inflation is equivalent of a huge income tax no legislature would ever pass. If a person invested $100 in a savings account and was promised 5-percent interest, the income on that $100 investment would be $5. But, inflation at 6 percent per year takes away $6 of purchasing power every year from that $100 investment. In other words, the "tax" of inflation is greater than the income. In fact, the income is being "taxed" at 120 percent per year. And, in face of this we wonder why savings and investment is down. We wonder why job-creating capital is hard to come by and why mortgages are scarce.

The impact of inflation on the elderly in our Nation alone should make every political officeholder give his vote and his every action—not just lip service—to fighting inflation. It makes the savings and pensions of the elderly inadequate. It makes the elderly dependent on relatives, or worse, on welfare. Inflation hits hardest at those least able to afford it.

Inflation is a great disruptor in other ways, but it nonetheless is both the stealthiest tax and the most unfair.

For Congress to talk about inflation and decry its dangers and then adopt massive spending programs is the worst form of double dealing. It is simply wrong to say that inflation can be curbed when the Government spends $50 or $60 billion more than it takes in.

Mr. President, this is fact. It is not a matter serious men should have to debate any longer. Can anyone, at this late day, with any confidence at all, say that inflation is not inevitable given this kind of budget?

It is time that Congress admit the truth. Inflation is not caused by coal strike settlements. Inflation is not caused by oil price increases. Inflation is not caused by automobile price increases. Inflation is caused by Government: our Government.

INFLATION IN THE BUDGET

Inflation is not a line item in anyone's annual budget, but perhaps it should be. Unfortunately, the inflation caused by one year's budget deficit does not hit in the year Congress approves inflation-causing spending. It hits 18 months or so after the debt is incurred.

Because it is not directly related in time, it has been a convenient if objectionable way of paying for spending programs.

I believe, however, that the American people are now coming to the conclusion that inflation is a direct result of Government mismanagement of its financial affairs. The great majority of Americans consider inflation to be our major economic problem. In fact, even liberal economists like Arthur Okun are now coming to the conclusion that for years the adverse effects of inflation have been underestimated.

As I mentioned, a strict, harsh approach to this problem would be a balanced budget in the next year. Unfortunately, Government has acquired too many dependents of various kinds and it would be harmful to the economy and to the lives of many thousands of individuals to change overnight. I believe that change away from the ultimately destructive path of massive deficits is of critical importance. It is crucial.

It is with regret that I must say that the resolution before us does not provide for a change away from the path of more and more deficits, more and more economic disruption, and more inflation and more unemployment.

● Mr. JACKSON. Mr. President, I fully support the national budgetary goals set forth in Senate Concurrent Resolution

80. The proposed budget for fiscal year 1979 is designed to promote continued expansion of our national economy with an accompanying reduction in unemployment at the lowest possible risk of inflation.

However, in light of current balance-of-payments deficits, achievement of these goals will be difficult. As the Budget Committee's report indicates the United States balance of payments have swung from a surplus of $11.6 billion in 1975 to a record deficit of $20.1 billion in 1977, an outflow of an estimated $31.7 billion. This change has been caused in large part by the rapid expansion of oil imports. The critical nature of this capital outflow emphasizes the need for a strong national energy policy based upon the reduction of oil imports and the greater utilization of domestic energy supplies.

The budgetary needs for implementation of such a national energy policy were considered by the Committee on Energy and Natural Resources in the formulation of its recommendations to the Budget Committee. In the committee's judgment the recommended budget authorities and outlays were viewed as necessary to achieve national energy program goals. The committee's recommendations also reflect anticipated enactment of the conference agreement on energy legislation associated with coal utilization, energy conservation, utility rate reform, and natural gas legislation.

In order to adequately provide for the implementation of this energy legislation, the Energy Committee recommended that the total budget authority for the energy function be increased by $1,531,000,000 above the President's proposed budget of $9.5 billion. The Energy Committee's recommendations were viewed as necessary to implement current law as well as agreements reached by the Senate-House conference on national energy plan legislation. The committee's recommendations do not reflect anticipated supplementary funding requests from the administration for major new energy supply initiatives. Such initiatives may require subsequent adjustments in the second budget resolution.

Mr. President, adequate funding for these energy programs is essential if we are to reduce oil imports without accompanying adverse impacts on our economy. Thus I am disturbed by the action of the Budget Committee in recommending a fiscal year 1979 target of $10.2 billion in budget authority for the energy function. This is $500 million below the $10.7 billion target recommended by the authorizing committees. Adoption of this ceiling is likely to preclude full implementation of the National Energy Act and the initiation of major new energy supply initiatives. For example, there is insufficient flexibility for the Congress to authorize significant additional projects for the early commercialization of coal gasification, oil shale and solvent refined coal.

Mr. President, in formulating its views and recommendations the Committee on Energy and Natural Resources gave major consideration to emerging national needs and priorities. Our concern was for the effective maintenance of ongoing programs of proven importance within the requirement for strict fiscal responsibility. The greatest possible emphasis was placed upon economic and fiscal restraint. The Energy Committee's recommendations thus were conservative. Therefore, I am deeply concerned for the potential impact of the Budget Committee's recommendation.

Mr. President, before continuing I wish to ask the distinguished chairman of the Budget Committee (Mr. MUSKIE) for a clarification of the numbers for the energy function as set forth on page 74 of the report on Senate Concurrent Resolution 80. My question concerns the figure of $10.7 billion in budget authority as recommended by the authorizing committees.

The President's budget request for the energy function anticipated a refund of $500 million in "gas guzzler" taxes. However, I understand this refund is not assumed for in the Budget Committee's recommendation of $10.2 billion for the energy function. Am I correct?

REVISED MUSKIE COMMENTS FOR JACKSON COLLOQUY

Mr. MUSKIE. Mr. President, let me respond to the distinguished chairman of the Energy Committee by first noting that the Budget Committee does not line-item specific programs and projects. We do not attempt to establish programmatic detail in the functional targets we recommend. That is the task of the authorizing and appropriation committees.

In formulating the functional targets this year, we employed for the first time the concept of missions as a means to construct our recommendations. Use of these missions, which are displayed in the committee report accompanying the budget resolution, enable us to provide further explanation of our recommendations, without impinging upon the jurisdiction of the other committees. In formulating our recommendations, we must, of course, consider major spending proposals such as the gas guzzler tax refund.

The chairman of the Senate Energy Committee is correct in his interpretation of the committee's assumption regarding a refund of the proposed gas guzzler tax. The Budget Committee recommendation of $10.2 billion in budget authority does not assume enactment of legislation providing for these refunds, as the President's budget request proposes. The committee did not do so because the Senate Committee with legislative jurisdiction over the tax, the Finance Committee, made no mention of the tax or refund in its March 15 report, and because enactment of this refund, at this time, seems most unlikely. The refund is not part of either the Senate or House version of the energy bill now in conference.

Should the refund be enacted, funding for other programs would be affected. By the passage of an item not contemplated in the budget resolution, the competition for funds is increased. There are more claims placed upon the same number of dollars. Items that otherwise could be funded within the targets of the resolution might well be displaced if an unforeseen item, such as this proposed refund, were to require funding. This is one of the benefits of the new budget process. It forces related programs to compete, squarely and openly, for the limited dollars available.

Mr. JACKSON. I thank the Senator for his clarification of this point.

Mr. President, as chairman of the Senate Committee on Energy and Natural Resources, I am disturbed by testimony and comments of administration officials indicating that the President's proposed budget consciously underfunded various programs in the expectation of major supplementary appropriation requests. This was of sufficient concern to the Energy Committee that its report to the Budget Committee states:

> The President's proposed budget has consciously underfunded various programs in the expectation of submitting major "supplemental" appropriations requests later in fiscal year 1979. To the extent that the committee has discovered such inadequacies in the proposed budget, this report recommends that the First Concurrent Budget Resolution for fiscal year 1979 and the relevant authorization and appropriations acts provide for adequate funding at this time.
>
> The sizeable increases recommended by the Committee are, to a significant extent, occasioned by anticipated "supplemental" budget requests which will be necessary to carry out program activities currently anticipated by the Executive Branch, but not fully provided for in the President's proposed budget for fiscal year 1979.
>
> The Budget Committee may wish to give its serious attention of this practice of deferring funds requests into "supplemental" appropriations measures. The adverse effects upon the budgetary process of such an approach are self-evident.
>
> The Congressional process of annual authorizations and the First Concurrent Budget Resolution cannot be effective or rational if major policy decisions which will impact on the current and next fiscal year are habitually withheld by the Administration until initial budget decisions have been completed by the Congress.

Mr. MUSKIE. I welcome this comment by the distinguished chairman of the Energy Committee, and I share his concern.

If an administration consciously reduces its January budget request by not including funds for programs it fully intends to initiate and fund during the fiscal year, then its proposed budget is but an interim document that misleads the public, mocks the congressional budget process, and is an affront to those of us in the House and Senate who are working for budgetary discipline.

I cannot say this forcefully enough. Budgetary proposals must be presented in the beginning of the year, prior to the first budget resolution. The section of the Energy Committee's report quoted by Senator JACKSON is exactly right:

> The congressional process of annual authorizations and the first concurrent budget resolution cannot be effective or rational if major policy decisions which will impact on the current and the next fiscal year are habitually withheld by the administration until initial budget decisions have been completed by the Congress.

Let me advise those in the executive branch responsible for budgetary matters that we expect the President's January budget to be a full and complete document. This administration, or any administration, no longer can simply send up major budgetary proposals whenever it suits them, and expect the Congress to wrench its budgetary process accordingly.

This year, the January budget does not contain funding requests for either the urban policy or for phase two, the new energy supply initiatives now under review in the Department of Energy. If the administration wants to fund phase two in fiscal year 1979, it should have so advised the Congress and presented its proposals in time for the Energy Committee to comment upon them in the March 15 report to the Budget Committee and in time for the Budget Committee to consider them in the context of the first budget resolution.●

● Mr. HANSEN. Mr. President, I would like to take a few minutes of the Senate's time to discuss the funding in Senate Concurrent Resolution 80 for function 270, the energy programs in the budget for fiscal year 1979. Function 270 provides the new budget authority and estimated budget outlays for energy programs in the Federal Government. The concurrent resolution before us would include $10.2 billion for new budget authority and $10.1 billion for estimated budget outlays in fiscal year 1979 for the energy programs.

Mr. President, the energy budget submitted in January by President Carter included many seriously underfunded programs. For instance, the solar budget for fiscal year 1979 was essentially the same as that eventually appropriated in fiscal year 1978, thereby accommodating no growth in this important, congressionally mandated research program The President also recommended a significant cutback in the solar heating and cooling demonstration program, which has been the underlying foundation for much of the progress made to date in this exciting new technology. Other major cuts occurred in the nuclear fission and fusion programs, and, of course, the President again included no continued funding for the Clinch River breeder reactor project. Also, many of the new funding initiatives included in the conference bills for the National Energy Act were not included in the President's request. As a result, it is clear that the President's request seriously underfunded the required activities of the Department of Energy and many vital programs.

Function 270 primarily consists of the programs in the new Department of Energy, but there are some other programs of significance, such as those of the Nuclear Regulatory Commission. Within the areas of the jurisdiction of this committee, function 270 included a total of $9.5 billion in the President's budget request. As a result of the committee's analysis and the factors ennumerated above, the committee recommended an increase of that funding authority for fiscal year 1979 to a total of $11.1 billion. Because of some differences in the accounting procedures used by the two committees, the Budget Committee reflected the estimates of all of the authorizing committees at $10.7 billion.

The budget resolution before the Senate today includes a total of $10.2 billion in new budget authority and $10.1 billion in estimated budget outlays for fiscal year 1979 in function 270. It is noteworthy that the Appropriations Committee estimated a total of $10.5 billion in budget authority by comparison to the $10.7 billion estimated by the authorizing committees and the eventual $10.2 billion recommended by the Budget Committee in this resolution. As a consequence, this budget resolution sets a target of $500 million below the estimate of the authorizing committees. Additionally, it is likely that a total of $160 million in new uranium enrichment revenues included in the President's budget will not be authorized by the Congress in this session. As a result, there has been a net reduction in this committee s estimate of nearly $700 million. Consequently, the new budget authority available to the Energy Committee in its consideration of the Department of Energy budget is very constrained under this resolution. Despite that severe constraint, it has been the intent of the bipartisan leadership of the committee to make every effort to report an authorization bill within that budget resolution target.

It is particularly noteworthy that the budget estimate report from the Energy Committee, Senate publication 95–95, dated March 15, 1978, anticipated that there may be further requests for new budget authority forthcoming from the administration to fund a series of new energy supply initiatives. In fact, the report included the following statement at page 1.

> As the report was being prepared, several comments and testimony by representatives of the administration implied that a "Second Phase" to the President's National Energy plan is under active consideration. Because there presently is no substantive information concerning these potential administrative or legislative proposals, they are not reflected in this committee's estimates and recommendations. To the extent that the new proposals are inconsistent with the actions already anticipated by the Congress, the incorporation in the fiscal year 1979 budget may present significant difficulties both in the authorization and appropriation processes.

This paragraph makes clear the Energy Committee's position that any such new initiatives would cause a serious budgetary problem in terms of any eventual budget targets and related authorizations and appropriations. It also is clear that the committee took the required action to place the Budget Committee on notice of this potential eventuality, and its impact on the budget resolution process.

Importantly, we now have become aware of the so-called phase II energy supply initiatives, which the President is supposed to release on or about May 1. The initiatives will be released in the form of a budget amendment which at least in draft includes well over $300 million in additional new budget authority and over $150 million in increased budget outlay estimates. For instance, one project alone would involve at least $150 million in budget authority this year and a total of at least $0.5 billion over time. It also is clear that many of these new energy supply initiatives will have the strong support of many Members in the Senate, and there will be intense pressure to authorize those new initiatives in the Energy Committee or on the floor of the Senate. Consequently, it is clear that these new supply initiatives may cause the Energy Committee and the Senate to significantly exceed the target in the pending budget resolution, perhaps by as much as $0.5 billion. As noted above, the situation was not unanticipated by the committee, and appropriate notice had been given to the Budget Committee.

Normally, we might be persuaded to offer an amendment to the pending Senate Concurrent Resolution 80 to increase the new budget authority and the estimated budget outlays in function 270 to accommodate the phase II energy supply initiatives. The leadership of the Energy Committee, including Chairman JACKSON, myself, subcommittee chairman CHURCH, and ranking subcommittee minority member HATFIELD, have agreed to defer any budget resolution action at this time. It is our collective feeling that it would be premature to force the Budget Committee and the Senate to consider these new supply initiatives which have not yet been formally presented by the administration, and which have not been formally reviewed and considered by the committee. Also, these new initiatives will have to be the subject of similar reviews within the Appropriations Committee in the weeks ahead. We, therefore, will make no effort to offer an amendment to this budget resolution to increase the targets for function 270 to include these inevitable budget-breaking increases.

It, however, is important that the Senate and our Budget Committee be fully cognizant of these forthcoming budgetary actions. It also is important that due consideration be given to the forthcoming actions in the subsequent Senate–House conference on this budget resolution with the other body. The leadership of the Energy Committee would hope, and will strive to achieve, an appropriate resolution of the requirements of the budget process and the budgetary actions which will be taken to authorize any of these new energy supply initiatives. Accordingly, we seek the understanding and support of the Budget Committee leadership as this situation develops.●

● Mr. BROOKE. Mr. President, it is important to keep in mind what this first concurrent resolution does and does not do. It does set targets, or guidelines, for the other committees of the Senate to use as they proceed over the next few months to act on authorization and appropriation bills. "Target" is the operative word in this context.

In its report on the first concurrent

resolution, the House Budget Committee states explicitly that the measure "establishes targets" and adds that, "These targets will guide Congress in its fiscal year 1979 spending and revenue decisions."

Thus it is clear that the first concurrent resolution does not set mandatory ceilings beyond which the other committees may not go. There are good reasons for taking this approach. Congress does not want to deprive itself of flexibility in meeting the Nation's needs. And at this stage "targets"—but not mandatory ceilings—permit the authorization and appropriations committees, the Congress' traditional source of expertise on individual program spending requirements, the flexibility necessary to do the job expected of them.

Thus our Labor-HEW Appropriations Subcommittee put its tremendous knowledge and experience to work when it developed its recommendations for the first concurrent resolution. The subcommittee has been in business for a long time and is well aware of the need for fiscal restraint. But it is equally aware of the many segments of our society which are dependent upon the Federal Government for assistance in meeting even minimal needs.

More particularly, they are dependent on the Labor-HEW appropriations bill—which directly or indirectly touches every one of our citizens—for the many forms of assistance it provides. I speak of assistance for the jobless, for those lacking in adequate health care and educational opportunity, for the aged, the handicapped, the poor and especially for our children.

The assumptions we developed took these needs into consideration. I believe our assumptions are realistic and necessary to permit the Congress to provide the funding that is needed for such vital programs as community health centers, family planning, home health care, sudden infant death, lead-based paint poison prevention, mental health centers and mental health training, and the training of health professionals.

In the area of biomedical research, I am convinced our subcommittee will want not only to continue but to step up the battle against cancer, heart disease, arthritis and the other diseases which kill or afflict mankind. And I am hopeful that our subcommittee will act to begin implementing the important recommendations made by both the commission on Huntington's disease and the commission on epilepsy.

In education, I believe that we will wish to do more for the educationally deprived, for the handicapped and for efforts to ease the course of school integration. I believe, for instance, that Follow Through is an excellent program which should not be ended as the President's budget proposes. I also believe that Head Start is a major national resource which should be further strengthened.

In the area of poverty, I know that the weatherization program helps the poor and helps to conserve our precious energy supplies. It should be kept in the antipoverty program and it should be expanded. I have announced plans to see to it that both steps are taken.

And I am extremely disappointed with the funding levels for housing and urban mass transit programs in the administration's fiscal year 1979 budget which are reflected in the first budget resolution. In housing for low and moderate income families and elderly, the funding provided for represents only a very modest gain in activity from 1978 levels, and is not even enough to keep pace with the rate of inflation. For example, this resolution would support HUD's request for funding for 400,000 units of assisted housing. However, an analysis by the congressional budget office indicates that only 375,000 units of assisted housing could be provided at that level of funding since the budget unrealistically assumes no inflation between 1978 and 1979. Even at the 400,000 unit level, only 180,000 units of new and substantially rehabilitated housing would be provided under the section 8 program. That program level would not even begin to meet the critical housing needs of our low income people.

I had hoped that the President's urban policy which was announced on March 27 would have recognized the importance of housing as an essential element of an urban strategy. But the urban policy provides no additional funding for urgently needed programs for new and substantially rehabilitated housing for lower-income families and the elderly, for maintenance and management of our existing public housing stock, and for subsidies to assist financially distressed HUD-insured multifamily housing projects. Instead, only $150 million in new funding for housing programs are included in the urban policy, and those funds will be used only for a new small multifamily rehabilitation loan program.

Similarly, with regard to urban mass transit, the funding levels provided for operating and capital assistance to mass transit systems are inadequate. I am particularly concerned that the low level of funding for operating assistance to existing transit systems will result in serious hardships for those cities with a substantial local commitment to transit. In addition, the levels of funding would allow for virtually no new money for capital commitments to mass transit over the next 5 years. It seems to me that this budget resolution does not adequately respond to the needs of our existing urban mass transit systems and raises serious questions about this Administration's commitment to future development and growth of urban mass transit. Again, I had hoped that the President's urban policy would have provided additional funding for urban mass transit. But sadly, it has not. I believe that a stronger Federal commitment to mass transit is essential to support our broader national energy and urban goals.

I could go on and on cataloguing the important programs we deal with, but it should be clear that we feel very strongly about them. We regard it as our duty to the Senate and the Nation to make recommendations which reflect the human needs and concerns of our society. We believe it would be an abdication of our responsibility to do otherwise.

Thus we have laid our plans for fiscal 1979 and in the weeks and months ahead we shall flesh these out with a series of funding decisions on each of the programs within our jurisdiction.

The Budget Act anticipates our making these decisions. While it gives us "targets" to work with, it provides an environment of flexibility within which we may work. For the Budget Act is not an instrument to promote only the status quo or worse, but rather one through which the needs of the Nation may be met with intelligence and with the utmost compassion for our less fortunate citizens.

The process has been structured to provide us with this flexibility and we accept it. Once we have made decisions that are in the Nation's interest, it then becomes the responsibility of the Congress to rationalize these decisions within the second concurrent resolution that is adopted in September. The purpose of the second concurrent resolution is not to destroy what Congress has done over the intervening months, but rather to develop a measure that takes cognizance of needs as well as resources.

Meantime, it is important to remember that we are only at the beginning of the budgetary process. The measure we are acting upon today is purely advisory. We still have a long way to go—and many important decisions to make—before we bind ourselves to mandatory ceilings for fiscal 1979.●

● Mr. WILLIAMS. Mr. President, I would like to take strong exception to the levels established by Senate Concurrent Resolution 80 as reported by the Budget Committee in one particularly important area: the Federal public transportation program. The committee's action established a 1979 budget level of $3.2 billion for this program, below even the Carter administration's recommendation for fiscal 1979 of a program level of $3.34 billion. If this inadequate level is maintained through the conference with the House of Representatives, the Congress of the United States would be turning its back on the mass transportation program and exacerbating the problems this Nation faces on the environment, in arresting urban decay, and of course, promoting alternatives to the unnecessary private use of the automobile which accounts for so much of our energy problem. Mr President, I submit this is no time for the Senate or the Congress to signal a retreat from the strong federal commitment to public transportation.

I have been a sponsor and supporter of Federal assistance for public transportation programs for almost 20 years now. As a Senator from a State with extensive and vitally important public transportation systems, I have fought to develop an effective program of Federal assistance to give much needed help to areas which had long been dependent on a good public network and to interest other cities in the benefits of public transportation.

Since the passage of the landmark Urban Mass Transportation Act of 1964, the country has developed effective and successful programs to improve existing transit systems as well as to develop new systems and programs in many parts of the country where the automobile was once the only available form of transportation.

Our developing recognition of the environmental and energy problems caused by the automobile has underscored the importance of an adequate public transportation program. It is not enough to encourage development of alternate energy sources; or to require more fuel-efficient and less-polluting automobiles, or to promote a 55-mile-an-hour speed limit. We must act to get the people of this country—to get ourselves—out of our cars wherever possible and on to an efficient, usable, and attractive public transportation system. This "transit psychology" has been developed in many areas already, such as New York, New Jersey, Philadelphia, Boston, and Chicago. We have seen new rail systems built and become accepted ways of life in Washington and San Francisco. We have seen cities like Los Angeles and Denver take major steps to improve bus service and make significant improvements in ridership.

To build on the progress we have already made, we must have a program that will provide sufficient financial assistance to improve and maintain existing systems, while fostering the development of new services in those places where public transportation has not played as effective a role as it could and one day will.

In the hearings the Banking, Housing, and Urban Affairs Committee held last month on S. 2441, the administration's transit bill, I was very impressed by the testimony about the effectiveness of our public transportation programs, and the potential they have to play an even more significant role in solving our energy, environmental, and urban problems. But the message was driven home very clearly—the local officials who are developing and operating these programs need an assured and adequate Federal financial commitment. This is not, however, a request for the Federal Government to simply pay for the entire program. State and local effort continues to underwrite the bulk of program costs, especially operating costs. In New York and northeastern New Jersey, for example, since the start of the section 5 program, Federal assistance has covered only about 6 percent of operating costs. Almost 94 percent of the $1.5 billion annual cost of operating these systems is paid by the people of the area either through fares or tax subsidies. In other major cities the figures are also substantial. In Chicago, 16 percent of operating costs are paid out of section 5; Philadeldelphia 9 percent; Washington, D.C., 12 percent; Cleveland 15 percent; and St. Louis, 19 percent.

Over the years this program has developed a partnership at all levels of government. As costs rise, as more services are provided, the Federal share of this partnership should keep pace. This is not, after all, a giveaway program. It is not a windfall for special interests. Millions of people in this country are dependent on public transportation, and it is a vital national interest to get millions more out of their cars and onto buses and trains.

The concerns clearly stated in our hearings were that the administration did not go far enough in its proposals. To the dismay of public officials and transportation experts all over the country, the administration's proposals simply held the line on growth for a program that can and does make a significant difference in our use of energy and the effect on our environment. We cannot afford the indirect costs of increasing our dependence on the automobile. We can well afford to keep working toward more effective public transportation systems.

The following excerpt from the testimony presented by the National League of Cities and the U.S. Conference of Mayors summarizes the weight of the testimony:

> The funding levels for the discretionary program are of deep concern to the League and the Conference. A five year authorization of $3.7 billion for Fiscal Years 1979–1983 for major capital projects means project delays and stretchouts which will inhibit the growth of public transportation in our cities to a great degree. Existing commitments will total $1,962 billion at the beginning of Fiscal Year 1979. This will mean that only $1,738 billion, or some $350 million per year for the five year authorization period covered by S. 2441 will be available to finance new commitments. This will mean delays until 1982 or beyond for major projects now being considered in our largest urban areas. Indeed, Mr. Chairman as you well know. Richard Page, Administrator of the Urban Mass Transportation Administration informed this Committee. . . that at the proposed discretionary funding level only one start of a new system could begin during the five year period.
>
> The Conference and the League have consistently called for growth in funding for operating assistance. S. 2441 fails to accomplish this much needed objective by providing for only a continuation of the $900 million a year level presently in the law. This is net decrease in the program when inflation is considered.

In fact, Mr. President, cities whose rail projects could be delayed by the budget constraints include Atlanta, Los Angeles, Baltimore, Chicago, New York, and New Jersey, Philadelphia, Honolulu, Boston, San Francisco, and others. Some of these localities are trying to extend existing systems; others are trying to develop the initial stages of rail systems.

Mr. President, I am extremely disappointed by the action of the Senate Budget Committee. The budget level for public transportation does not even sustain the program at current levels when inflation is factored into the Budget Committee's levels.

The Senate has already expressed its willingness to make a commitment to an effective and growing public transportation program. Last year the Senate passed S. 208, which provided program levels higher than either the administration's request or the Budget Committee's report—and the levels in the passed version of S. 208 were significantly lower than I thought necessary when I introduced the bill. The average funding levels under S. 208 as introduced were approximately $4.5 billion a year, including amounts for interstate transfer transit projects. These proposals were based on a careful analysis of the projected needs of the transit program. At Transportation Secretary Adams' request, we made S. 208 into an interim bill, designed basically to assure continuation of the program as the minimum acceptable level while the administration had an opportunity to devise its transit policy. The final S. 208 levels, adjusted to levels "acceptable" to DOT called for a program level—inclusive of interstate transfer—of about $3.5 billion a year. Now, Mr. President, we have the administration come in at $3.14 billion for 1979, which they raised to $3.34 billion through the urban initiative. Then we have the Budget Committee which decides it won't even meet the administration's level, and comes in at $3.2 billion for fiscal 1979. I am particularly concerned that these actions were taken with the specific intention of deemphasizing this important program.

We need only to look to the language of the Budget Committee's report on the first concurrent resolution to see exactly what the problems are with both the President's proposed funding levels, and the levels proposed by the Budget Committee. Regarding the President's initial proposed funding level:

> Current policy would cost an additional $3.4 billion in budget authority and $1.1 billion in outlays. This could permit construction starts on one or two additional new rail systems, although Federal grant assistance would continue to emphasize less capital-intensive projects such as rail rehabilitation and modernization, bus replacement, restricted traffic lanes, improved traffic management, and the like. Financial pressures on local transit systems would be eased somewhat, but it still would not be certain that Federal assistance would be adequate to both continue the current rate of bus fleet expansion and pay an average of 16 percent of transit operating expenses.

Regarding the Budget Committee proposals:

> The Committee recommendation would permit funding slightly in excess of the President's January budget request, and thus would approximately maintain current activity levels for programs providing assistance for mass transit construction, extension and rehabilitation, bus purchases, other capital assistance, and operating subsidies. Without reductions in other programs, however, it is unlikely that the recommended targets would be adequate to fund construction of any major new rail systems or to implement any sizable new grant programs such as that recently proposed by the President for construction of multi-modal transportation terminals in central cities.

In effect the Budget Committee has taken a stand against building new rail systems, or implementing any new grant programs. This attitude demonstrates a lamentable lack of serious, long-range concern for the future of our cities, and the impact of our energy problems. The short-range results just do not seem to be impressive enough to the Budget Committee. The fact that after almost 30 years of steady decline, our efforts at the Federal, State, and local level have

turned the problem around. On a national basis, ridership figures have been increasing for the last 4 years. While the percentage increases on a national level may not be spectacular, the mere fact that the decline of public transit ridership has been reversed is spectacular in itself. It shows me that our efforts have not been wasted, and that the American people can be attracted out of their cars.

Mr. President, the efforts made under this program, and the results achieved, convince me that transit offers a strategic alternative to both our energy problems and our urban problems. Reduction in nonessential automobile travel and increased use of transit for essential travel will preserve our urban mobility and reduce energy consumption. Aggressive expansion of transit services as part of a comprehensive urban revitalization policy will promote concentration of urban activities and will result in a significantly more energy efficient urban form over the next 20 to 30 years. The potential energy savings from medium-range urban strategies which channel our cities' growth potentially will influence energy consumption far more than any short-range strategy. To achieve this long-range success, we must work to develop our systems now. We need to start the phased construction of rail systems in cities that can truly benefit from these systems. We have to build extensions onto many systems to make them more effective, and we have to make a solid commitment to modernizing systems in areas which are heavily dependent on effective rail rapid transit. The challenge of meeting the long-term needs for effective public transportation will not be met by a budget that would, as the report says:

. . . approximately maintain current activity levels.

In the next few days, I expect the Banking Committee to report a transit bill that will provide a responsible and adequate funding level for this program. I hope that the progress made by the Banking Committee toward meeting our public transportation needs will not be thwarted.●

ROUTINE MORNING BUSINESS

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that there now be a period for the transaction of routine morning business not to extend beyond 30 minutes with statements limited therein to 5 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Chirdon, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session, the Presiding Officer laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the Committee on Armed Services.

(The nominations received today are printed at the end of the Senate proceedings.)

WITHDRAWAL

As in executive session, the Presiding Officer laid before the Senate a message from the President of the United States withdrawing the nomination of Col. Junior Henry Burkhead, for appointment as brigadier general in the Adjutant General's Corps, Army National Guard, sent to the Senate on April 6, 1978, which was laid on the table.

MESSAGES FROM THE HOUSE

ENROLLED BILL SIGNED

At 3:21 p.m., a message from the House of Representatives delivered by Mr. BERRY, one of its reading clerks, announced that the Speaker has signed the following enrolled bill:

S. 1617. An act to establish a program of ocean pollution research, development, and monitoring, and for other purposes.

The enrolled bill was subsequently signed by the President pro tempore.

The message also announced that the House insists upon its disagreement to the amendments of the Senate to the bill (H.R. 6782) to permit marketing orders to include provisions concerning marketing promotion, including paid advertisement, of raisins and distribution among handlers of the pro rata costs of such promotion; requests a further conference with the Senate on the disagreeing votes of the two Houses thereon; and that Mr. FOLEY, Mr. POAGE, Mr. DE LA GARZA, Mr. JONES of North Carolina, Mr. JONES of Tennessee, Mr. MATHIAS, Mr. BOWEN, Mr. ROSE, Mr. RICHMOND, Mr. WAMPLER, Mr. SEBELIUS, Mr. JOHNSON of Colorado, and Mr. MOORE were appointed managers of the conference on the part of the House.

COMMUNICATIONS

The PRESIDING OFFICER laid before the Senate the following communications, together with accompanying reports, documents, and papers, which were referred as indicated:

EC-3421. A communication from the Acting Director, Defense Security Assistance Agency, reporting, pursuant to law, concerning the Department of the Navy's proposed Letter of Offer to the Federal Republic of Germany for Defense Articles estimated to cost in excess of $25 million; to the Committee on Armed Services.

EC-3422. A communication from the Deputy Assistant Secretary of Defense (Military Personnel Policy), reporting, pursuant to law, concerning the administration of Officer Responsibility Pay; to the Committee on Armed Services.

EC-3423. A communication from the Acting Assistant Secretary of the Army (Manpower and Reserve Affairs), transmitting a draft of proposed legislation to amend section 6(d)(1) of the Military Selective Service Act (50 USC App. 456(d)(1)) to provide greater training flexibility for Reserve officers ordered to active duty for training for not more than six months by deleting the requirement that they be ordered to active duty for not less than three months; to the Committee on Armed Services.

EC-3424. A communication from the Director, Defense Civil Preparedness Agency, reporting, pursuant to law, on property acquisitions of emergency supplies and equipment; to the Committee on Armed Services.

EC-3425. A communication from the Assistant Secretary of the Army (Manpower and Reserve Affairs), transmitting a draft of proposed legislation to provide for the advance payment of station housing allowances for members of the uniformed services assigned overseas; to the Committee on Armed Services.

EC-3426. A communication from the Secretary of the Navy, transmitting a draft of proposed legislation to approve the sale of certain naval vessels, and for other purposes; to the Committee on Armed Services.

EC-3427. A communication from the Acting Assistant Secretary of the Army (Manpower and Reserve Affairs), transmitting a draft of proposed legislation to modernize the permanent faculty structure at the United States Military Academy; to the Committee on Armed Services.

EC-3428. A communication from the Assistant Secretary for Economic Development, Department of Commerce, reporting, pursuant to law, that the report of the Economic Development Administration for fiscal year 1977 has been delayed in processing; to the Committee on Commerce, Science, and Transportation.

EC-3429. A communication from the Vice President, Government Affairs, National Railroad Passenger Corporation, transmitting, pursuant to law, a report on the average number of passengers per day on board each train operated and the on-time performance at the final destination of each train operated by route and by railroad, for the months of October, November and December, 1977; to the Committee on Commerce, Science, and Transportation.

EC-3430. A communication from the Vice President, Government Affairs, National Railroad Passenger Corporation, transmitting, pursuant to law, a report on total itemized revenues and expenses, revenues and expenses of each train operated, and revenues and total expenses attributable to each railroad over which service is provided, for the months of November and December, 1977; to the Committee on Commerce, Science, and Transportation.

EC-3431. A communication from the Director, Office of Management and Budget, Executive Office of the President, proposed legislation providing for the designation of chairmen and vice chairmen of the United States International Trade Commission; to the Committee on Finance.

EC-3432. A communication from the Deputy Secretary of the Treasury, transmitting a draft of proposed legislation to implement the Customs Convention on Containers, 1972; to the Committee on Finance.

EC-3433. A communication from the Chairman, Interstate Commerce Commission, transmitting, pursuant to law, the annual report of the ICC; to the Committee on Governmental Affairs.

EC-3434. A communication from the Secretary of Housing and Urban Development, transmitting, pursuant to law, two reports of the Department's intention to establish new systems of personal records; to the Committee on Governmental Affairs.

EC-3435. A communication from the Chairman, Civil Service Commission, transmitting a draft of proposed legislation to amend chapter 87 of title 5, United States Code, to increase the amounts of regular and optional group life insurance available to Federal employees and provide optional life insurance on family members; to the Committee on Governmental Affairs.

EC–3436. A communication from the Comptroller General of the United States, transmitting, pursuant to law, a report entitled "Audit of Commodity Credit Corporation for Fiscal Year 1977," April 14, 1978; to the Committee on Governmental Affairs.

EC–3437. A communication from the Chairman, Council of the District of Columbia, transmitting, pursuant to law, an act adopted by the Council on March 7, 1978, which would require, by statute, the installation of smoke detectors in dwelling units, hotels, motels, hospitals, nursing homes, jails, prisons and residential-custodial care facilities in the District of Columbia; to provide regulations for installation of smoke detectors, and for other purposes (Act 2–178); to the Committee on Governmental Affairs.

EC–3438. A communication from the Chairman, Council of the District of Columbia, transmitting, pursuant to law, an act adopted by the Council on March 21, 1978, which would amend the District of Columbia Teachers' Salary Act of 1955, and for other purposes (Act 2–177); to the Committee on Governmental Affairs.

EC–3439. A communication from the Acting Chairman, United States Nuclear Regulatory Commission, transmitting, pursuant to law, the Commission's first annual report on the administration of the Government in the Sunshine Act for the one year period of March 12, 1977 through March 12, 1978; to the Committee on Governmental Affairs.

EC–3440. A communication from the Comptroller General of the United States, transmitting, pursuant to law, a report entitled "Management of Security Assistance Programs Overseas Needs to be Improved," April 21, 1978; to the Committee on Governmental Affairs.

EC–3441. A communication from the Comptroller General of the United States, transmitting, pursuant to law, a report entitled "Status of the Air Force's F–16 Aircraft Program," April 24, 1978; to the Committee on Governmental Affairs.

EC–3442. A communication from the Comptroller General of the United States, transmitting, pursuant to law, a report entitled "Food Stamp Work Requirements—Ineffective Paperwork or Effective Tool?", April 24, 1978; to the Committee on Governmental Affairs.

EC–3443. A communication from the President of the United States, relating to 1979 requests for appropriations totalling $1.2 billion for the proposed Middle Income Student Assistance program; to the Committee on Human Resources.

EC–3444. A communication from the U.S. Commissioner of Education, Department of Health, Education, and Welfare, transmitting, pursuant to law, an updated summary of the activities of each State currently considering either the establishment of a guarantee agency program or participation in the program through a private nonprofit organization; to the Committee on Human Resources.

EC–3445. A communication from the Acting President, Overseas Private Investment Corporation, transmitting, pursuant to law, a report pertaining to the Freedom of Information Act; to the Committee on the Judiciary.

EC–3446. A communication from the Chief Counsel Designate, National Telecommunications and Information Administration, Department of Commerce, transmitting, pursuant to law, a report pertaining to the Freedom of Information Act; to the Committee on the Judiciary.

EC–3447. A communication from the Secretary of Labor, transmitting, pursuant to law, a report pertaining to the Freedom of Information Act; to the Committee on the Judiciary.

EC–3448. A communication from the Assistant Director for Information, Department of Agriculture, transmitting, pursuant to law, a report pertaining to the Freedom of Information Act; to the Committee on the Judiciary.

EC–3449. A communication from the Administrator, Veterans Administration, transmitting a draft of proposed legislation to amend title 38 of the United States Code to require that veterans receiving hospital, nursing home or outpatient medical care from the Veterans Administration for nonservice-connected disabilities be charged for such care to the extent that they have health insurance or similar contracts or rights with respect to such care, or have entitlement to private medical care under workers' compensation or automobile accident reparation statutes of any State, and for other purposes; to the Committee on Veterans' Affairs.

EC–3450. A communication from the Administrator, Veterans Administration, transmitting, pursuant to law, the report of a study to determine the most effective specific methods of using the programs carried out under Chapter 37 of title 38, United States Code or by amending the aforesaid Chapter 37, title 38, United States Code, in order to aid and encourage present and prospective veteran homeowners to install in their homes solar heating, solar heating and cooling or combined solar heating and cooling, and to apply residential energy conservation measures; to the Committee on Veterans' Affairs.

PETITIONS

The PRESIDING OFFICER laid before the Senate the following petitions, which were referred as indicated:

POM–601. A joint resolution adopted by the Legislature of the State of California; to the Committee on Environment and Public Works:

"SENATE JOINT RESOLUTION No. 28

"Whereas, There are demands exceeding supplies of high-quality water in most of California and extending beyond its borders to the east and south, now and in the foreseeable future; and

"Whereas, Studies indicate an abundant renewed supply of icebergs of appropriate size and characteristics, accessible for acquisition during the daylight thawing season in the Antarctic (January through March of each year), which could be a possible supplemental source of freshwater supply for the State of California; and

"Whereas, The icebergs can be harnessed and brought slowly to deep water near areas of use with less energy required per unit of delivered water than for desalting or for transfer from any source requiring the energy equivalent to a pumping lift of more than a few hundred meters above sea level; and

"Whereas, the icebergs must be protected from melting loss to moving seawater for efficient use at any location, and this can be done for a total delivered cost well below those for desalting or other long distance transfers at sea level; and

"Whereas, The icebergs while moored at terminal locations serve as unique reservoirs, relatively invulnerable to earthquakes and other disasters and not threatening to the surroundings, accruing significant net condensation gain over evaporation loss, and having benign impact of most environments in which they would be converted for freshwater and cooling benefits; and

"Whereas, The least costly way of resolving the remaining technological uncertainties appears to be to initiate a pilot program immediately to test and demonstrate alternatives in an operational environment so that more efficient designs can be selected for operational applications; and

Whereas, There are others (private and governmental) interested in participating in a pilot program and in absorbing major portions of the costs and benefits in an early program; and

Whereas, It could be important to provide a technology assessment of this new water supply where the feasibility is demonstrated in a pilot program under strict monitoring of all environmental impacts to satisfy all local and global concerns before significant commitment is made to operational investment; now, therefore, be it

"Resolved by the Senate and Assembly of the State of California, jointly. That the Legislature of the State of California respectfully memorializes all federal agencies with approval responsibilities to support a pilot program for technology assessment of promising a water supply from imported Antarctic icebergs for Carolina and global interests; and be it further

Resolved, That federal approval include, among others, the following:

1. Coast Guard monitoring of operations outside of local jurisdiction for safety and environmental impact.

2. State Department and National Science Foundation with respect to Antarctic treaty obligations.

3. Army Crops of Engineers.

4. Environmental Protection Agency.

5. Pertinent federal energy agencies; and be it further

"Resolved, That the Secretary of the Senate transmit copies of this resolution to the President and Vice President of the President of the United States, to the Coast Guard, the Department of State, the National Science Foundation, the Department of the Interior, the Bureau of Reclamation, the Army Corps of Engineers, and the Environmental Protection Agency, to the Speaker of the House of Representatives, and to each Senator and Representative from California in the Congress of the United States."

POM–02. A joint resolution adopted by the Legislature of the State of California; to the Committee on Commerce, Science and Transportation:

"SENATE JOINT RESOLUTION No. 32

"Whereas, The State of California possesses an abundance of aerospace experts unmatched in this country; and

"Whereas, Space exploration and development are critical to the country and to California; and

"Whereas, The space shuttle inaugurates a new era of possibilities for the planet and the exploration of Jupiter by the orbiter probe, as well as conversion of the sun's rays to electricity by means of space solar power satellites which represent challenges that the people of the State of California are eminently qualified to undertake; and

"Whereas, Governor Brown has strongly endorsed space development and California's commitment to the aerospace industry with emphasis on the skill and quality of the state's labor force; and

"Whereas, Despite the layoff of workers caused by cancellation of the B1 bomber, the state's aerospace industry has a bright future; and

"Whereas, The aerospace industry has developed new technology which has a practical application in many other sectors of the state's economy; now, therefore, be it

"Resolved by the Assembly and Senate of the State of California, jointly, That the Legislature of the State of California respectfully memorializes the President and the Congress of the United States to revitalize the California aerospace industry through usage of the state's aerospace economy; and be it further

"Resolved, That the Secretary of the Senate transmit copies of this resolution to the President and Vice President of the United States, to the Speaker of the House of Representatives, and to each Senator and Representative from California in the Congress of the United States."

POM–603. A joint resolution adopted by the Legislature of the State of California; to the Committee on Agriculture, Nutrition, and Forestry:

"SENATE JOINT RESOLUTION No. 30

"Whereas, The Japanese beetle (Popillia japonica) is a voracious pest that feeds on hundreds of ornamental plants and agricultural crops, which is harmful in both the adult and larval states, and poses a threat to both the urban and rural environment of this state, including field and orchard crops, floriculture and nursery stock, and backyard plantings; and

"Whereas, The Japanese beetle heavily infests all of the states along the Atlantic seaboard but does not occur in the western half of the United States; and

"Whereas, This pest has not yet become entrenched in California, due to the natural land barriers, but continues to be introduced by aircraft; and

"Whereas, Millions of dollars would be required to control this pest in California, resulting in consumer price increases, if it gets out of control; and

"Whereas, It is more efficient to pursue a course of action whereby an infestation of Japanese beetles is arrested at points of origin of well-known hazard or heavily infested areas; and

"Whereas, The United States Department of Agriculture has conducted an eradication program in those states known to be infested, which has included insecticidal treatment of pest-hazardous airports and aircraft leaving those airports for the West Coast, thus protecting California from infestation from this pest; and

"Whereas, The United States Department of Agriculture has determined that it cannot eradicate Japanese beetles and, thus, had not provided any funds for the eradication of this pest including airport and aircraft treatment; and

"Whereas, The United States Department of Agriculture consented to do some airport and aircraft treatment this year, only after considerable pressure had been brought; and

"Whereas, The United States Department of Agriculture has made no commitment to resume such treatments in the coming fiscal year or thereafter; and

"Whereas, This year, as a sample, a total of three hundred and fifty-six Japanese beetles have been taken from aircraft arriving in California from the eastern pest-hazardous airports; now, therefore, be it

"Resolved by the Senate and Assembly of the State of California, jointly, That the Legislature of the State of California respectfully memorializes the President and Congress of the United States and the Secretary of Agriculture to take all the necessary actions to raise the priority of, and to substantially increase expenditures indefinitely for, pest-hazardous airport treatment and California-bound aircraft treatment and to continue existing quarantine programs; and be it further

"Resolved, That the Secretary of the Senate transmit copies of this resolution to the President and Vice President of the United States, to the Secretary of Agriculture, to the Speaker of the House of Representatives, and to each Senator and Representative from California in the Congress of the United States."

POM–604. A joint resolution adopted by the Legislature of the State of California; to the Committee on Human Resources, and the Committee on Finance, jointly:

"SENATE JOINT RESOLUTION No. 31

"Whereas, The Internal Revenue Service is interpreting Public Law 93–406, the Employee Retirement Income Security Act of 1974, as requiring all state and local government pension and retirement plans to file certain annual returns and reports provided for in ERISA; and

"Whereas, ERISA indicates a clear congressional intent that state and local government plans not be regulated or file returns as interpreted by the Internal Revenue Service; and

"Whereas, Such interpretation by the Internal Revenue Service threatens the integrity and future of state and local government pension plans by exposing them to potential tax on investment income, as well as the loss of deferred tax treatment granted beneficiaries of qualified plans; now, therefore, be it

"Resolved by the Senate and Assembly of the State of California, joint'y, That the Legislature of the State of California respectfully memorializes the President and the Congress of the United States to reiterate the intent contained in the Employee Retirement Security Income Act of 1974 that state and local government pension and retirement plans are not required to file annual returns and reports under that act, and to cancel or refund any penalties imposed on such plans in the past for late filing or failure to file those returns or reports; and be it further

"Resolved, That the Secretary of the Senate transmit copies of this resolution to the President and Vice President of the United States, to the Speaker of the House of Representatives, and to each Senator and Representative from California in the Congress of the United States."

POM–605. A joint resolution adopted by the Legislature of the State of Wisconsin; to the Committee on Agriculture, Nutrition, and Forestry:

"SENATE JOINT RESOLUTION 53

"Whereas, the current level of corn prices is at an alarmingly low level of $1.68 per bushel, which is 32 cents per bushel less than the $2 per bushel cost of production to the farmers who raised it; and

"Whereas, the price of corn, in the opinion of leading grain market experts, is being controlled by grain monopolies such as Cargill, Continental Grain and Ralston-Purina; and

"Whereas, the domination of the market by these and other conglomerates causes a disruption of the laws of supply and demand which imposes unacceptably low prices on Wisconsin farmers for their corn and other produce; and

"Whereas, the loss of income to farmers will destroy their ability to produce vital grain and foodstuffs, thus putting food production under the control of the corporate farms, a development that will result in higher prices for the consumers; now, therefore, be it

"Resolved by the senate, the assembly concurring, That congress initiate an investigation of the grain market to determine if the market is being controlled by these conglomerates and that congress explore methods of eliminating that control including the divestiture of the grain conglomerates; and, be it further

"Resolved, That congress explore means of guaranteeing the small family farms an honest return on their crops, through such devices as price supports, opening of foreign markets and other measures to guarantee the family farmer a competitive profit in the market place."

POM–606. A resolution adopted by the Legislature of Guam; to the Committee on Commerce, Science, and Transportation:

"RESOLUTION No. 285

"Be it resolved by the Legislature of the Territory of Guam:

"Whereas, U.S. international air carriers presently have departure rights from many different cities among the fifty states of the United States, with international flights often stopping at several U.S. cities prior to leaving the United States; and

"Whereas, present regulations prohibit U.S. international air carriers from accepting on their international flights domestic passengers traveling from one state to another; and

"Whereas, on October 6, 1977, U.S. Congressman Norman Y. Mineta introduced H.R. 9472 authorizing U.S. international air carriers to carry domestic 'fill up' traffic between U.S. cities in the various states; and

"Whereas, H.R. 9472 reads in part, 'that on scheduled flights in foreign air transportation, each certificated air carrier is authorized to transport persons, property and mail between points served on such flights in any state or the District of Columbia.'; and

"Whereas, the territory of Guam must remain vitally interested in the economic health of Pan American World Airways so long as Pan American World Airways is the sole airline permitted to service Guam directly to and from the United States; and

"Whereas, allowing Pan American World Airways to transport domestic air traffic would increase their revenues while utilizing costly and depleting fossil fuel to the fullest; and

"Whereas, permitting domestic travel on international air carriers will increase the number of passengers flying Pan American World Airways and thereby substantially increase the awareness of Guam within the continental United States; now, therefore, be it

"Resolved, that the Fourteenth Guam Legislature does hereby, on behalf of the people of Guam, endorse H.R. 9472 and further urges the President of the United States, the U.S. Congress and the Civil Aeronautics Board to support H.R. 9472 as introduced by Congressman Norman Y. Mineta; and be it further

"Resolved, that the Speaker certify to and the Legislative Secretary attest the adoption hereof and that copies of the same be thereafter transmitted to the President of the United States; to the President of the U.S. Senate; to the Speaker, U.S. House of Representatives; to Representative Norman Y. Mineta; to the Chairman of the Civil Aeronautics Board; to the President of Pan American World Airways; to Guam's Washington Representative; and to the Governor of Guam."

POM–607. A joint resolution adopted by the Legislature of the State of Colorado; to the Committee on Energy and Natural Resources:

"HOUSE JOINT RESOLUTION No. 1021

"Whereas, The 'Reclamation Act of 1902', containing a provision limiting to one hundred sixty acres the amount of land persons may own for which project water may be supplied, is outdated; and

"Whereas, The objective of this limitation to provide opportunity for a maximum number of farmers on the land has been achieved; and

"Whereas, In most cases the objective of promoting family-sized farms is not economically feasible on one hundred sixty acres with modern agricultural practices; and

"Whereas, Soil conditions, climate, types of crops, and farm management vary from farm to farm and in all parts of the country; and

"Whereas, In many cases, federally funded water projects increase productivity of the land, thus providing additional tax revenue to the federal government which more than offsets the subsidy for building the projects; and

"Whereas, The owners of such lands are subject to differing rules and regulations, including residency requirements, family relationships, sale of excess lands, and other administrative rules and regulations, depending upon the attitude of the United States Department of the Interior; and

"Whereas, The agricultural industry should be provided the latitude to efficiently produce abundant supplies of food for this country and to make sufficient amounts of food available to the hungry people of the world; now, therefore,

"Be It Resolved by the House of Representatives of the Fifty-first General Assembly of the State of Colorado, the Senate concurring herein:

"That the General Assembly supports a Congressional legislative moratorium on the enforcement of the one-hundred-sixty-acre limitation as provided in the 'Reclamation Act of 1902' and supports the subsequent repeal of the one-hundred-sixty-acre limitation.

"Be It Further Resolved, That copies of this Resolution be transmitted to the President and Vice President of the United States, the Secretary of the United States Department of the Interior, and each member of Congress from the State of Colorado."

POM–608. A resolution adopted by the Board of County Commissioners of St. Louis County, Minnesota, relating to State or Federal acquisition of privately owned lands within St. Louis County; to the Committee on Energy and Natural Resources.

POM–609. A joint resolution adopted by the Legislature of the State of Virginia; to the Committee on Energy and Natural Resources:

"HOUSE JOINT RESOLUTION NO. 134

"Whereas, the Commonwealth of Virginia has long recognized the great blessings with which it is endowed by nature, and has regularly sought to protect those natural resources for the continuing benefit of the people; and

"Whereas, an opportunity has been called to the attention of the General Assembly of Virginia to permanently assure to the people the continuing benefits now available on publicly-owned wild land which possesses extraordinary natural values in the way of scenery, sparkling clear streams, native trout fishery, wildlife habitat, rare mountain bogs and forested mountains offering high-quality outdoor recreation; and

"Whereas, this tract of land, identified as the St. Mary's River Watershed, consisting of approximately 10,695 acres, is located entirely within the George Washington National Forest in Augusta County, Virginia and involves no privately owned lands; and

"Whereas, this tract of land contains the St. Mary's River which has been studied and recommended to the Virginia General Assembly for inclusion in the State's Scenic River System, due to its outstanding scenic, natural and recreation values; and

"Whereas, by placing this area in the National Wilderness Preservation System under the Wilderness Act (while remaining a part of the National Forest System and administered by the U.S. Forest Service), we can assure that the outstanding natural values of the area will be maintained unimpaired for present and future generations, which at the same time permitting their free use by citizens in ways which neither consume these values, nor interfere with the normal processes of nature; and

"Whereas, encroachment on this area by the construction of roads, buildings, dams and logging or any other works of man prohibited under the Wilderness Act, could severely damage its existing high-quality natural values and so deprive the public of their increasingly scarce, natural benefits; and

"Whereas, the protection of the Wilderness Act will enhance the valuable scientific study of nature's process in this area, by preventing intrusions upon, or interruptions of such studies, and will assure a genetic reserve of plant and animal species which elsewhere are being altered or destroyed; and

"Whereas, wilderness, being the unique heritage of the American nation, the character of its people having been forged in the wilderness, it is fitting that appropriate portions of our remaining wilderness be preserved as a reminder of that heritage, just as we commonly preserve other historic shrines for the benefit and enjoyment of the people; now, therefore, be it

"Resolved by the House of Delegates, the Senate concurring, That the Virginia General Assembly hereby endorses the placement in the National Wilderness Preservation System under the Wilderness Act, the St Mary's River Watershed, located within the George Washington National Forest, in Augusta County, on the west slope of the Blue Ridge Mountains, about twenty miles south of Staunton, consisting of approximately 10,695 acres; and, be it

"Resolved further, That the Clerk of the House of Delegates is hereby instructed to send copies of this resolution to the members of the Virginia Congressional Delegation and all other members of the 95th Congress, to actively support and vote for appropriate legislation to this end."

POM–610. A resolution adopted by the Legislature of the State of New York; to the Committee on Foreign Relations:

"RESOLUTION NO. 217

"Whereas, This Legislative Body is shocked and horrified by the abduction of former Prime Minister Aldo Moro of Italy and the wanton slaying of five of his bodyguards by the terrorists known as the Red Brigades, an urban guerrilla group; and

"Whereas, This kind of moral malaise internationally is, indeed, a contagion that affects the whole fabric of our world society and breeds a sense of mental and moral ill-being that ought to be eradicated at all costs whatsoever, otherwise we will witness the decline and fall of our Twentieth Century world; and

"Whereas, It is the sense of this Legislative Body that it should express its sense of outrage and serve notice on all democratic legislative and parliamentary bodies of the free nations of the world at all levels of government, ranging from local to national, that there should be a concerted effort to eliminate terrorism and its attendant despair, instilling a new sense of survival, by enacting meaningful laws to discourage this dreadful violence; now, therefore, be it.

"Resolved, That this Legislative Body pauses in its deliberations and deplores and denounces the kidnapping of former Prime Minister Aldo Moro of Italy and the wanton slaying of five of his bodyguards by the terrorists known as the Red Brigades, an urban guerrilla group; and be it further

"Resolved, That copies of this resolution, suitably engrossed, be transmitted to the President of the United States, to the Italian Ambassador to the United States, to the Secretary General of the United Nations, to the Speaker of the House of Representatives of the United States, to the President Pro Tempore of the Senate of the United States and to each member of the Congress of the United States from the State of New York."

POM–611. A resolution adopted by the city commission of the city of Margate, Fla., relative to foreign policy of the United States; to the Committee on Foreign Relations.

POM–612. A joint resolution adopted by the Legislature of the State of Tennessee; to the Committee on the Judiciary:

"HOUSE JOINT RESOLUTION NO. 21

"Be it resolved by the House of Representatives of the Ninetieth General Assembly of the State of Tennessee, the Senate concurring, That pursuant to Article V of the Constitution of the United States, application is hereby made to the Congress of the United States to call a convention for the purpose of proposing an amendment to the Constitution of the United States to make the federal judiciary more accountable to the citizenry by requiring (1) that judges of all United States courts be subject to appointment for a fixed term, such as six years or eight years, at the end of which their continuance in office would be subject to the results of balloting by the voters of the geographical jurisdiction served by such judges, with the voters voting yes or no on the question: 'Shall (name of justice or judge) be retained in office as (justice or judge) of the (name of court)?' and (2) that judges of all United States courts be required to retire at age seventy (70) and no person who has attained that age would be eligible for appointment as a justice or judge.

"Be it further resolved, That this application shall constitute a continuing application for such convention under Article V of the Constitution of the United States until the legislatures of two-thirds (2/3) of the several states shall have made like applications and such convention shall have been called and held in conformity therewith, unless the Congress itself propose a similar amendment within the time and the manner herein provided.

"Be it further resolved, That proposal of a similar amendment by the Congress and its submission for ratification to the legislatures of the several states in the form of the article hereinabove specifically set forth, at any time prior to the sixty (60) days after the legislatures of the two-thirds (2/3) of the several states shall have made application for such convention, shall render such convention unnecessary and the same shall not be held; otherwise such convention shall be called and held in conformity with such applications.

"Be it further resolved, That as this application under Article V of the Constitution of the United States is the exercise of a fundamental power of the sovereign states under the Constitution of the United States, it is requested that receipt of this application by the Senate and the House of Representatives of the Congress of the United States be officially noted and duly entered upon their respective records, and that the full context of this resolution be published in the official publication of both the Senate and the House of Representatives of the Congress.

"Be it further resolved, That certified copies of this Resolution be transmitted forthwith to the Senate and the House of Representatives of the Congress of the United States, to each Senator and Representative in the Congress from this state, and to each house of the legislature and the Secretary of State of each of the several states, attesting the adoption of this resolution by the legislature of this state."

POM–613. A joint resolution adopted by the legislature of the State of Tennessee; to the Committee on the Judiciary:

"HOUSE JOINT RESOLUTION NO. 22

"Whereas, each year this nation becomes more deeply in debt as its expenditures grossly and repeatedly exceed available revenues so that the legal public debt limit has exceeded 437 billion dollars; and

"Whereas, attempts to limit spending, including impoundment of funds by the President of the United States, have resulted in strenuous objections that the responsibility for appropriations is the constitutional duty of the Congress; and

"Whereas, nonetheless, the annual budget repeatedly demonstrates an unwillingness or inability to curtail spending to conform to available revenues; and

"Whereas, the federal budget never reflects actual spending because of the exclusion of special outlays which are neither included in the budget nor subject to the legal public debt limit; and

"Whereas, knowledgeable planning requires that the budget reflect all federal spending and that the budget be in balance; and

"Whereas, believing that fiscal irresponsibility at the federal level, with the inflation which results from this policy, is the greatest threat which faces our nation, we firmly believe that a constitutional restraint is necessary to bring the fiscal disciplines needed to reverse this trend; now, therefore,

"Be it resolved by the House of Representatives of the Ninetieth General Assembly of the State of Tennessee, the Senate concurring, That pursuant to Article V of the Constitution of the United States, application is hereby made to the United States Congress to call a convention for the purpose of considering and proposing an amendment to the Constitution of the United States to require that, in the absence of a national emergency, the total of all federal appropriations made by the Congress for any fiscal year may not exceed the total of the estimated federal revenues for that fiscal year, such amendment to read substantially as follows:

" 'The total of all federal appropriations made by the Congress for any fiscal year may not exceed the total of the estimated federal revenues for that fiscal year; and this prohibition extends to all federal appropriations and all estimated federal revenues without exception. The President in submitting budgetary requests and the Congress in enacting appropriation bills shall comply with this article. If the President proclaims a national emergency, suspending the requirement that the total of all federal appropriations not exceed the total estimated federal revenues for a fiscal year, and two-thirds (⅔) of all members elected to each house of the Congress so determine by joint resolution, the total of all federal appropriations may exceed the total estimated federal revenues for that fiscal year.'

"Be it further resolved, That this application shall constitute a continuing application for such convention under Article V of the Constitution of the United States until the legislatures of two-thirds (⅔) of the several states shall have made like applications and such convention shall have been called and held in conformity therewith, unless the Congress itself proposes such amendment within the time and the manner herein provided.

"Be it further resolved, That proposal of such amendment by the Congress and its submission for ratification to the legislatures of the several states substantially in the form of the article hereinabove specifically set forth, at any time prior to sixty (60) days after the legislatures of two-thirds (⅔) of the several states shall have made application for such convention, shall render such convention unnecessary and the same shall not be held. Otherwise, such convention shall be called and held in conformity with such applications.

"Be it further resolved, That as this application under Article V of the Constitution of the United States is the exercise of a fundamental power of the sovereign states under the Constitution of the United States, it is requested that receipt of this application by the Senate and the House of Representatives of the Congress of the United States be officially noted and duly entered upon their respected records, and that the full context of this resolution be published in the official publication of both the Senate and the House of Representatives of the Congress.

"Be it further resolved, That certified copies of this Resolution be transmitted forthwith to the Senate and the House of Representatives of the Congress of the United States, to each Senator and Representative in Congress from this state, and to each house of the legislature and to the Secretary of State of each of the several states."

POM-614. A resolution adopted by the legislature of the State of Pennsylvania; to the Committee on the Judiciary:

"JOINT RESOLUTION

"The General Assembly of the Commonwealth of Pennsylvania hereby resolves as follows:

"Section 1. The General Assembly of the Commonwealth of Pennsylvania (the Senate concurring) hereby makes application to the Congress of the United States, in accordance with the provisions of Article V of the Constitution of the United States, to call a convention for drafting and proposing an amendment to the Constitution of the United States to guarantee the right to life to the unborn fetus by doing the following:

"(a) With respect to the right to life guaranteed in the United States Constitution, provide that every human being subject to the jurisdiction of the United States or any state shall be deemed from the moment of fertilization to be a person and entitled to the right to life.

"(b) Provide that Congress and the several states shall have concurrent powers to enforce such an amendment by appropriate legislation.

"(c) The purpose of the Constitutional Convention shall be to only consider the above and no other business.

"(D) Nothing in this article shall prohibit a law permitting only those medical procedures required to prevent the death of the mother.

"Section 2. The Secretary of the Commonwealth shall transmit certified copies of this resolution to the President of the Senate of the United States and to the Speaker of the House of Representatives of the United States and to the President of the Senate and Speaker of the House of Representatives of the Legislatures of each of the other forty-nine States of the United States."

POM-615. A resolution adopted by the city commission of the city of Cocoa Beach, Fla., relating to a demographic study of Brevard County, Fla., to confirm the need for a U.S. Veterans' Administration Satellite Clinic in Brevard County; to the Committee on Veterans' Affairs.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. DECONCINI, from the Committee on the Judiciary, with an amendment:

S. 2016. A bill to establish fees for services performed by U.S. marshals (Rept. No. 95-755).

S. 2049. A bill to establish fees and allow per diem and mileage expenses for witnesses before U.S. courts (Rept. No. 95-756).

S. 2075. A bill to amend the Jury Selection and Service Act of 1968, as amended, by revising the section on fees of jurors and by providing for a civil penalty and injunctive relief in the event of a discharge or threatened discharge of an employee by reason of such employee's Federal jury service (Rept. No. 95-757).

By Mr. DECONCINI, from the Committee on the Judiciary, with an amendment and an amendment to the title:

S. 2074. A bill to amend title 28, United States Code, to provide in civil cases for juries of six persons, to amend the Jury Selection and Service Act of 1968, as amended, with respect to the selection and qualification of jurors, and to extend the coverage of the Federal Employees Compensation Act to all jurors in U.S. district courts (Rept. No. 95-758).

By Mr. DECONCINI, from the Committee on the Judiciary, with amendments:

S. 2072. A bill to amend the Jury Selection and Service Act of 1968, as amended, to make the excuse of prospective jurors from Federal jury service on the grounds of distance from the place of holding court contingent upon a showing of hardship on an individual basis (Rept. No. 95-759).

By Mr. DECONCINI, from the Committee on the Judiciary, with amendments and an amendment to the title:

S. 2411. A bill to amend chapter 315 of title 18, United States Code, to authorize payment of transportation expenses by U.S. marshals for transportation expenses for persons released from custody pending their appearance to face criminal charges before that court or any court of the United States in another Federal judicial district (Rept. No. 95-760).

By Mr. BUMPERS, from the Committee on Energy and Natural Resources, with an amendment and an amendment to the title:

H.R. 9757. An act entitled "Grazing Fee Moratorium of 1978" (Rept. No. 95-761).

By Mr. LONG, from the Committee on Finance, with amendments and an amendment to the title:

H.R. 7581. An act to amend the Internal Revenue Code of 1954 to provide that certain income from a nonmember telephone company is not taken into account in determining whether any mutual or cooperative telephone company is exempt from income tax (Rept. No. 95-762).

By Mr. WILLIAMS, from the Committee on Banking, Housing, and Urban Affairs, with amendments:

H.R. 8331. An act to amend the Securities Investor Protection Act of 1970 (Rept. No. 95-763).

EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. SPARKMAN, from the Committee on Foreign Relations, without reservation:

Ex. K, 94-2. Tax Convention with the United Kingdom of Great Britain and Northern Ireland;

Ex. Q, 94-2. First Protocol to the Tax Convention with the United Kingdom; and

Ex. J, 95-1. Second Protocol to the Tax Convention with the United Kingdom (Ex. Rept. No. 95-18).

Ex. P, 94-2. Tax Convention with the Republic of Korea (Ex. Rept. No. 95-19).

By Mr. PROXMIRE, from the Committee on Banking, Housing, and Urban Affairs:

Anita Miller, of New Jersey, to be a member of the Federal Home Loan Bank Board.

(The above nomination from the Committee on Banking, Housing, and Urban Affairs, was reported with the recommendation that it be confirmed, subject to the nominee's commitment to respond to requests to appear and testify before duly constituted committees of the Senate.)

INTRCDUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first time and, by unanimous consent, the second time, and referred as indicated:

By Mr. EASTLAND (by request):

S. 2980. A bill to facilitate the work of the U.S. Department of Agriculture; to protect the confidentiality of information furnished to the Department by individuals, establishments, and enterprises and for other purposes; to the Committee on the Judiciary.

By Mr. CANNON (for himself, Mr. PEARSON, and Mr. CLARK) (by request):

S. 2981. A bill to amend the Department of Transportation Act as it relates to the local rail services assistance programs, and for other purposes; to the Committee on Commerce, Science, and Transportation.

By Mr. HEINZ (for himself and Mr. BAKER):

S. 2982. A bill to authorize the States to use certain unobligated allocations for the Federal-aid highway systems for the repair of certain weather related damage to highways and urban mass transportation systems due to severe weather in the winter of 1977–78; to the Committee on Environment and Public Works.

By Mr. CRANSTON (by request):

S. 2983. A bill to amend section 3103 of title 38, United States Code, to extend the time period within which the board of review concerned, on its own initiative, shall determine whether a person who has been awarded a general or honorable discharge under revised standards for the review of discharges as specified in clause (A) (i), (ii), or (iii) of paragraph (2) of subsection (e) of such section 3103 would be entitled to an upgraded discharge under standards meeting the requirements of paragraph (1) of such subsection; to amend section 5 of Public Law 95–126 to extend the time during which a former serviceperson may continue to receive Veterans' Administration benefits pending such determination; and for other purposes; to the Committee on Veterans' Affairs.

By Mrs. HUMPHREY (for herself, and Mr. ANDERSON):

S. 2984. A bill to amend the Great Lakes Pilotage Act of 1960 in order to relieve the restrictive qualification standards for U.S. pilots on the Great Lakes; to the Committee on Commerce, Science, and Transportation.

By Mr. HATHAWAY:

S. 2985. A bill to amend the tariff schedules of the United States to provide for an increase in the duties on imports of potatoes, and to reduce the quota for potatoes subject to the lower of the two rates of duty; to the Committee on Finance.

By Mr. CHAFEE (for himself, Mr. DANFORTH and Mr. BELLMON):

S. 2986. A bill to provide that the salaries of the Vice President; Members of Congress; justices, judges, commissioners, and referees; and positions in the executive schedule shall not be increased by the next comparability pay adjustment; to the Committee on Governmental Affairs.

By Mr. CULVER (for himself and Mr. WALLOP):

S. 2987. A bill to extend the authority for carrying out conservation and rehabilitation programs on military reservations and certain public lands; to the Committee on Environment and Public Works.

By Mr. HANSEN (for himself and Mr. WALLOP):

S. 2988. A bill to authorize the Secretary of the Interior to engage in a feasibility investigation for the modification of the Riverton Reclamation Project in Wyoming, and for other purposes; to the Committee on Energy and Natural Resources.

By Mr. HELMS:

S. 2989. A bill to provide procedures for review of the conduct of each justice and judge of the United States to determine that such conduct is consistent with the good behavior required by article III, section 1 of the Constitution, and for other purposes; to the Committee on the Judiciary.

By Mr. CHURCH (for himself, Mr. STONE, Mr. LONG, Mr. DOLE, Mr. CURTIS, Mr. MATSUNAGA, Mr. YOUNG, Mr. HANSEN, Mr. HAYAKAWA, Mr. WALLOP, Mr. ANDERSON, Mr. MELCHER, Mr. INOUYE, Mr. JOHNSTON, Mr. CHILES, Mrs. HUMPHREY, Mr. BAYH, Mr. MARK O. HATFIELD, Mr. MCCLURE, Mr. TOWER, Mr. ZORINSKY, Mr. RIEGLE, Mr. BURDICK, Mr. BENTSEN, Mr. DECONCINI, Mr. DOMENICI, Mr. GRIFFIN, and Mr. SCHMITT):

S. 2990. A bill to implement the International Sugar Agreement between the United States and foreign countries; to protect the welfare of consumers of sugar and of those engaged in the domestic sugar-producing industry; to promote the export trade of the United States; and for other purposes; to the Committee on Finance.

By Mr. BARTLETT:

S.J. Res. 131. A joint resolution to change the name of Copan Dam and Lake in the States of Oklahoma and Kansas to Copan Dam and the Lake of the Delawares; to the Committee on Environment and Public Works.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. EASTLAND (by request):

S. 2980. A bill to facilitate the work of the U.S. Department of Agriculture; to protect the confidentiality of information furnished to the Department by individuals, establishments, and enterprises, and for other purposes; to the Committee on the Judiciary.

● Mr. EASTLAND. Mr. President, I am introducing, by request of the Department of Agriculture, a bill to exclude certain agricultural statistical information from the provisions of the Freedom of Information Act in order to facilitate the collection of this needed information. I ask unanimous consent that the bill and Secretary Bergland's letter be printed in the RECORD.

There being no objection the bill and the letter were ordered to be printed in the RECORD, as follows:

S. 2980

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That as used in this Act—

(a) The term "Secretary" means the Secretary of Agriculture;

(b) The term "Department" means the U.S. Department of Agriculture.

SEC. 2. The Secretary is authorized to collect statistics pertaining to all aspects of agriculture in the United States, its possessions and territories in order to provide insofar as practicable, quantitative information to serve the needs of the general public for agricultural statistics and those of the Congress, the Department, and other Federal agencies, in developing and implementing programs relating to agriculture.

SEC. 3. The Secretary shall use information obtained pursuant to this Act solely to provide statistical information relating to agriculture.

SEC. 4. (a) Neither the Secretary, nor any officer or employee of the Department shall make any publication or other disclosure except as authorized in subsection (b) of this section, of any information whereby a particular individual or business entity can be identified as the source thereof. The Secretary shall limit access to the identity of these sources within the Department to those officers and employees who require such knowledge for the performance of official duties relating to the implementation of this Act.

DEPARTMENT OF AGRICULTURE,
Washington, D.C., December 16, 1977.

Hon. WALTER F. MONDALE,
President of the Senate,
Washington, D.C.

DEAR MR. PRESIDENT: Enclosed for the consideration of the Congress is a draft bill "To facilitate the work of the United States Department of Agriculture; to protect the confidentiality of information furnished to the Department by individuals, establishments, enterprises and for other purposes."

This Department recommends enactment of the proposed legislation.

Traditionally, all data compiled by the Statistical Reporting Service have been gathered through the voluntary cooperation of respondents with individual confidentiality guaranteed by Department regulations. Provisions of the Freedom of Information Act, however, endanger this guarantee, and specific protection of confidentiality is needed to assure continued voluntary cooperation by reporters. Passage of the proposed bill is also expected to allay suspicion of many farmers and businessmen that their reports to the Statistical Reporting Service may be made available to other Government agencies including the Internal Revenue Service and used punitively.

By strengthening confidentiality protection, the Statistical Reporting Service will be better able to continue its mission of providing timely, reliable agricultural statistics to the Congress, the Department, and the general public.

Enactment of the proposed legislation would not require additional funds. An identical letter and draft bill are being submitted to the Speaker of the House of Representatives.

The Office of Management and Budget advises that there is no objection to the presentation of this proposed legislation from the standpoint of the Administration's program.

Sincerely,

BOB BERGLAND,
Secretary.●

By Mr. CANNON (for himself, Mr. PEARSON, and Mr. CLARK) (by request):

S. 2981. A bill to amend the Department of Transportation Act as it relates to the local rail services assistance programs, and for other purposes; to the Committee on Commerce, Science, and Transportation.

RAILROAD AMENDMENTS ACT OF 1978

● Mr. CANNON. Mr. President, I am introducing today, a bill to amend section 5 of the Department of Transportation Act, as it relates to the local rail services

assistance program. The bill is being introduced, at the request of the Department of Transportation and provides for the expansion of the category of rail lines eligible for funds for rehabilitation, deferred maintenance, and various alternative facilities, such as, intermodal terminals.

In addition, the bill would make this program, which under existing law expires in 1981, permanent and set the Federal share of the matching program at 80 percent.

The Department's bill also places a 2-year limitation on operating subsidies, sets the State rail planning entitlement to $100,000 per State, with a provision for the transfer of up to 5 percent of such entitlement to a consolidated planning fund at the discretion of the Secretary of Transportation, and provides for assistance for cooperative action programs developed by States and localities in conjunction with shipper and industry representatives.

Finally, the bill proposes to make certain amendments to the Railroad Revitalization and Regulatory Reform Act of 1976 to correct several defects in the redeemable preference share program, the details of which are stated in Secretary Adam's transmittal letter. The bill was transmitted as part of a package of proposals which also contained a series of amendments to the Railroad Safety laws and the Rail Passenger Service Act which has been the subject of separate legislation. The bill I am introducing today contains the provisions included in Secretary Adams letter of transmittal as title I and II. This legislation represents an attempt to address a number of problems facing the railroad industry which have been identified since passage of the Railroad Revitalization and Regulatory Reform Act that I anticipate the Committee on Commerce, Science, and Transportation will be able to review during public hearings in the near future.

Mr. President, I ask unanimous consent that the bill, along with the Secretary's transmittal letter and the section-by-section analysis, be printed in the RECORD.

There being no objection, the bill and material were ordered to be printed in the RECORD, as follows.

S. 2981

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Railroad Amendments Act of 1978".

TITLE I—LOCAL RAIL SERVICES

DECLARATION OF POLICY

SEC. 101. (a) Purpose. It is the purpose of the Congress in this Title to amend the local rail service assistance program authorized in section 5(f)-(o) of the Department of Transportation Act (49 U.S.C. 1654(f)-(o)) to enable the Secretary to provide assistance to States for:

(1) short-term rehabilitation or other assistance which provides tangible economic benefits to the community and which enables the parties involved to continue to provide adequate transportation service without further Federal assistance.

(2) short-term transitional operating subsidies to mitigate the effects of an abandonment while the affected shippers arrange for alternate means of transportation.

(b) Policy. It is declared to be the policy of Congress in this Title that the Government shall assist in the provision of adequate transportation service to shippers and communities now served by light density lines. Federal funds shall only be used to assist transportation services where such assistance provides tangible economic benefits to the affected communities without placing a financial drain on the carriers providing that service.

Congress believes, however, that the parties benefiting from a Federal investment on a light density line must act to preserve the benefits of the Federal investment. Accordingly, Congress, expects the States and local communities, shippers and all elements of the railroad industry to commit themselves to long-term solutions which will enable the continued provision of adequate transportation service after the completion of the federally assisted projects.

EXPANSION OF ASSISTANCE

SEC. 102. Section 5(f) of the Department of Transportation Act (hereinafter referred to as the "DOT Act"), 49 U.S.C. 1654(f), is amended—

(1) by striking the semicolon at the end of paragraph (1) and adding the following: "which, as determined in accordance with section 1a of the Interstate Commerce Act (49 U.S.C. 1a), shall cover the difference between the revenues which are attributable to a line of railroad and the avoidable cost of providing rail freight service on such line, together with a reasonable return on the value of such line·"

(2) by striking "purchasing a line of railroad or other rail properties" in paragraph (2) and inserting in lieu thereof "acquiring, by purchase, lease or in such other manner as the State considers appropriate a line of railroad or other rail properties or any interest therein";

(3) by striking "and" immediately after the semicolon in paragraph (3);

(4) by striking the period at the end of paragraph (4) and inserting in lieu thereof a semicolon; and

(5) by adding the following new paragraphs at the end thereof:

"(5) the cost of constructing rail or rail related facilities (including new connections between two or more existing lines of railroad, intermodal freight terminals, and sidings), for the purpose of improving the quality and efficiency of local rail freight service; and

"(6) the cost of developing, administering, and evaluating innovative experimental programs that are designed to improve the quality and efficiency of service on lines of railroad eligible for assistance under this section and which involve cooperative action between State and local communities and railroad industry representatives or shippers."

COST SHARING

SEC. 103. Section (5)(g) of the DOT Act (49 U.S.C. 1654(g)) is amended to read as follows:

"(g) The Federal share of the costs of any rail service assistance program for any fiscal year is 80 percent. The State share of the costs may be provided in cash or through either of the following benefits, to the extent the benefit would not otherwise be provided: (1) forgiveness of taxes imposed on a common carrier by railroad or on its properties; or (2) the provision by the State or by any person or entity on behalf of a State, for use in its rail service assistance program, of reality or tangible personal property of the kind necessary for the safe and efficient operation of rail freight service by the State. If a State provides more than 20 percent of the cost of its rail service assistance program during any fiscal year, the amount in excess of the 20 percent contribution shall be applied toward the State's share of the costs of its program for subsequent fiscal years."

FORMULA ALLOCATION

SEC. 104. Section 5(h) of the DOT Act (49 U.S.C. 1654(h)) is amended to read as follows:

"(h)(1) Every State is entitled annually to a sum from available funds as determined pursuant to this subsection. Available funds are funds appropriated for rail service assistance for that fiscal year and any funds to be reallocated for that fiscal year in accordance with paragraph (2) of this subsection. Subject to the limitations contained in paragraph (3) of this subsection, the Secretary shall calculate each State's entitlement as follows:

"(A) Each State is entitled to $100,000 to be used in accordance with subsection (i) of this section. If available funds are not sufficient to enable each State to receive $100,000, each State shall receive an equal share of available funds.

"(B) Each State is further entitled to an additional amount from available funds remaining after the completion of the calculation under paragraph (1)(A) of this subsection which shall be used by the State, subject to the requirements of subsection (j) of this section, for any project eligible for assistance under subsection (k) of this section. This amount is to be calculated as follows:

"(i) two-thirds of the balance of available funds remaining after the completion of the calculation under paragraph (1)(A) of this subsection multiplied by a fraction whose numerator equals the rail mileage in the State which, in accordance with section 1a(5)(a) of the Interstate Commerce Act (49 U.S.C. 1a(5)(a)), is described as 'potentially subject to abandonment' or is identified as a line with respect to which a carrier plans to submit, but has not yet submitted, an application for a certificate of abandonment or discontinuance; and whose denominator equals the total of such rail mileage in all the States; and

"(ii) one-third of the balance of available funds remaining after the completion of the calculation under paragraph (1)(A) of this subsection multiplied by a fraction whose numerator equals the rail mileage in the State for which the Interstate Commerce Commission, within two years prior to the first day of the fiscal year for which funds are allocated or reallocated under this section, has found that the public convenience and necessity permit the abandonment of, or the discontinuance of rail service on, the rail mileage, and including, until September 30, 1981, (1) the rail mileage in the State which was eligible for assistance under section 402 of the Regional Rail Reorganization Act of 1973 (45 U.S.C. 762) and (2) the rail mileage in the State which, prior to the enactment of this amendment, had been included for formula allocation purposes under this section; and whose denominator equals the total rail mileage in all the States for which the Interstate Commerce Commission has made such a finding within the time period, and including until September 30, 1981, (1) the rail mileage in all the States which was eligible for assistance under section 402 of the Regional Rail Reorganization Act of 1973 and (2) the rail mileage in all the States which, prior to the enactment of this amendment, had been included for formula allocation purposes under this section. For purposes of the calculation directed by this paragraph, no rail mileage shall be included more than once in either the numerator or the denominator.

"(2) For purposes of this subsection, rail

mileage shall be measured by the Secretary as of the first day of each fiscal year. Entitlement funds are available to a State during the fiscal year for which the funds are appropriated as well as the two fiscal years following the fiscal year for which the funds were appropriated. In accordance with the formula stated in this subsection, the Secretary shall reallocate to each State a share of any entitlement funds which have not been the subject of an executed grant agreement between the Secretary and the State before the end of the second fiscal year following the fiscal year for which the funds were appropriated. Reallocated funds are available to the State for the same purpose and for the same time period as an original allocation and are subject to reallocation if not made the subject of an executed grant agreement between the Secretary and the State before the end of the second fiscal year following the fiscal year for which the funds were reallocated. No part of the funds available for reallocation shall be subject to transfer to the consolidated planning fund pursuant to paragraph (3) of this section.

"(3) If a consolidated planning fund is authorized to be created within the Department of Transportation for the purpose of enabling grants to be made to States and designated Metropolitan Planning Organizations to develop transportation plans and programs under the Urban Mass Transportation Act of 1964, and under Title 23 of the United States Code, the Secretary may, in his or her discretion, prior to the calculation of each State's entitlement under this subsection, transfer to the consolidated planning fund up to five percentum of the total amount of the funds appropriated for any fiscal year under subsection (r) of this section. These transferred funds shall be allocated and granted to the States in the same manner and under the same limitations as any other funds in the consolidated planning fund and shall no longer be subject to the provisions of this section. The Secretary may, in his or her discretion, include in or exclude from a transfer to the consolidated fund, the planning entitlement of each State under paragraph (1)(A) of this subsection.

PLANNING ASSISTANCE

SEC. 105. Section 5(i) of the DOT Act (49 U.S.C. 1654(i)) is amended to read as follows:

"(i) During each fiscal year, regardless of its current eligibility under subsection (j) of this section, a State may expend its annual entitlement under subsection (h)(1)(A) of this section solely to meet the cost of establishing, implementing, revising, and updating the State rail plan required by subsection (j) of this section, unless the Secretary has included such funds in any transfer to the consolidated planning fund under subsection (h)(3) of this section."

PROJECT ELIGIBILITY

SEC. 106. Section 5(k) of the DOT Act (49 U.S.C. 1654(k)) is amended to read as follows:

"(k)(1) A project is eligible for financial assistance under paragraph (1) of subsection (f) of this section only if—

"(A)(i) the Interstate Commerce Commission has found since February 5, 1976, that the public convenience and necessity permit the abandonment of, or the discontinuance of rail service on, the line of railroad related to the project; or (ii) the line of railroad or related project was eligible for financial assistance under section 402 of the Regional Rail Reorganization Act of 1973 (45 U.S.C. 762); and

"(B) the line of railroad or related project has not previously received financial assistance under paragraph (1) of subsection (f) of this section for more than twenty-four months, provided, however, that a line of railroad or related project which was eligible for financial assistance under section 402 of the Regional Rail Reorganization Act of 1973 or under this section prior to the enactment of this amendment is eligible only until September 30, 1981.

"(2) A project is eligible for financial assistance under paragraph (2) of subsection (f) of this section only if—

"(A)(i) the Interstate Commerce Commission has found since February 5, 1976, that the public convenience and necessity permit the abandonment of, or the discontinuance of rail service on, the line of railroad related to the project; or (ii) the line of railroad related to the project is listed for possible inclusion in a rail bank in Part III, Section C of the Final System Plan issued by the United States Railway Association under section 207 of the Regional Rail Reorganization Act of 1973 (45 U.S.C. 717); or (iii) the line of railroad related to the project was eligible to be acquired under section 402(c)(3) of the Regional Rail Reorganization Act of 1973 (45 U.S.C. 762(c)(3)). A line of railroad or related project which was eligible for financial assistance under section 402 or under this section prior to the enactment of this amendment is eligible only until September 30, 1981; and

"(B) the Secretary finds that the project satisfies benefit/cost criteria developed by the Secretary under subsection (o) of this section.

"(3) A project is eligible for financial assistance under paragraphs (3) and (5) of subsection (f) of this section only if—

"(A) the line of railroad related to the project is, in accordance with section 1a(5)(a) of the Interstate Commerce Act (49 U.S.C. 1a(5)(a)), described as 'potentially subject to abandonment' or is identified as a line with respect to which a carrier plans to submit, but has not yet submitted, an application for a certificate of abandonment or discontinuance; and

"(B) the Secretary finds that the project satisfies benefit/cost criteria developed by the Secretary under subsection (o) of this section.

"(4) A project is eligible for financial assistance under paragraph (4) of subsection (f) of this section only if—

"(A)(i) the Interstate Commerce Commission has found since February 5, 1976, that the public convenience and necessity permit the abandonment of, or the discontinuance of rail service on, the line of railroad related to the project; or (ii) the line of railroad or related project was eligible for financial assistance under section 402 of the Regional Rail Reorganization Act of 1973 (45 U.S.C. 762), provided, however, that a line of railroad or related project which was eligible for financial assistance under section 402 or under this section prior to the enactment of this amendment is eligible only until September 30, 1981; and

"(B) the Secretary finds that the project satisfies benefit/cost criteria developed by the Secretary under subsection (o) of this section.

"(5) A project is eligible for financial assistance under paragraph (6) of subsection (f) of this section only if—

"(A) there is a reasonable likelihood that it will improve the quality and efficiency of local rail freight service by increasing operating efficiency, reducing the cross subsidization of unprofitable portions of a system by profitable portions of a system, or increasing productivity of workers; and

"(B) the cooperative action project shall not exceed eighteen months in duration."

TECHNICAL AMENDMENTS

SEC. 107. Section 5(o) of the DOT Act (49 U.S.C. 1654 (o)) is redesignated as section 5(r). The references to former subsection (o), which appear in redesignated subsection (r) and in subsections (g) and (m)(1), are redesignated as subsection (r). Redesignated subsection (r) is amended by inserting into the third sentence, "and of section 810 of the Railroad Revitalization and Regulatory Reform Act of 1976", after "Regional Rail Reorganization Act of 1973".

BENEFIT-COST CRITERIA

SEC. 108. Section 5 of the DOT Act (49 U.S.C. 1654) is amended by adding after subsection (n) a new subsection (o) as follows:

"(o) The Secretary, after consultation with representatives chosen by the States, shall promulgate regulations establishing criteria to be used by the Secretary to determine the ratio of benefits to costs of proposed projects eligible for financial assistance under paragraphs (2)–(5) of subsection (f) of this section."

REHABILITATION ASSISTANCE

SEC. 109. Section 5 of the DOT Act (49 U.S.C. 1654) is amended by adding after subsection (o), as added by section 108 of this Act, a new subsection (p) as follows:

"(p) A State shall use financial assistance provided under paragraph (3) of subsection (f) of this section as follows:

"(1) The funds shall be used to rehabilitate or improve rail properties in order to improve local rail freight service within the State.

"(2) The State, in its discretion, shall grant or loan funds to the owner of rail properties or operator of rail service related to the project.

"(3) The State shall determine all financial terms and conditions of a grant or loan.

"(4) The State shall place the Federal share of repaid funds in an interest-bearing account or, with the approval of the Secretary, permit any borrower to place such funds, for the benefit and use of the State, in a bank which has been designated by the Secretary of the Treasury in accordance with 12 U.S.C. 265. The State shall use such funds and all accumulated interest to make further loans or grants under paragraph (3) of subsection (f) of this section in the same manner and under the same conditions as if they were originally granted to the State by the Secretary. The State may at any time, pay to the Secretary the Federal share of any unused funds and accumulated interest. After the termination of a State's participation in the local rail service assistance program, established by this section, it shall pay the Federal share of any unused funds and accumulated interest to the Secretary."

EFFECTIVE DATE

SEC. 110. Title I of this Act is effective on October 1, 1978.

TITLE II—AMENDMENTS TO THE RAILROAD REVITALIZATION AND REGULATORY REFORM ACT OF 1976

THE RAIL FUND

SEC. 201. Section 502 of the Railroad Revitalization and Regulatory Reform Act of 1976 (hereinafter referred to as the "4R Act"), 45 U.S.C. 822, is amended by adding the following new subsections:

"(j) INTEREST.—No part of the proceeds from the issuance and sale by the Secretary of Fund anticipation notes shall be used to pay interest on such notes.

"(k) APPROVAL IN APPROPRIATIONS ACTS.—No money in the Fund, regardless of source, shall be obligated, expended or otherwise committed to any purpose from the Fund without prior approval thereof in an annual appropriations Act. The Fund shall not qualify as one of the exceptions provided in section 401(d) of the Congressional Budget and Impoundment Control Act of 1974 (31 U.S.C. 1351(d))."

RATE OF RETURN ON TOTAL CAPITAL

SEC. 202. Section 505(b)(2) of the 4R Act (45 U.S.C. 825(b)(2)) is amended—

(1) by striking "(2)" in the first sentence;

(2) by inserting "average" between "railroads" and "rates" in the third sentence; and

(3) by striking "for fiscal year 1975" in the third sentence and inserting in lieu thereof "credits, for the three fiscal years preceding the date of submission of the application".

SALE OF FUND ANTICIPATION NOTES AND PURCHASES OF PREFERENCE SHARES

SEC. 203. Section 505(d)(3) of the 4R Act (45 U.S.C. 825(d)(3)) is amended by striking the last sentence.

SEC. 204. Section 505(e) of the 4R Act (45 U.S.C. 825(e)) is amended by striking "purchase under this title after September 30, 1978" and by inserting in lieu thereof, "after September 30, 1979, make commitments to purchase under this title".

SEC. 205. Section 507 of the 4R Act (45 U.S.C. 827) is amended by striking subsections (a), (b), and (d), by relettering subsection (c) as subsection (b), and by inserting new subsections (a) and (c) to read as follows:

"(a) TERMS AND CONDITIONS.—For the purpose of providing such financial assistance to railroads as the Secretary may approve pursuant to this title, the Secretary may issue and sell in such amounts as are provided in appropriations Acts, in an aggregate principal amount of not more than $600 million, Fund anticipation notes to the Secretary of the Treasury, in such forms and denominations, bearing such maturities, and subject to such terms and conditions as the Secretary of the Treasury may prescribe. Such notes shall bear interest at a rate determined by the Secretary of the Treasury, which shall not be less than a rate determined by taking into consideration the current average market yield on outstanding marketable obligations of the United States with remaining periods to maturity comparable to the average maturity of the preference shares to be purchased with the proceeds of such notes. The Secretary of the Treasury shall purchase any such notes, and for such purpose he or she may use as a public debt transaction the proceeds from the sale of any securities issued under the Second Liberty Bond Act, as now or hereafter in force. The purposes for which securities may be issued under such Act are extended to include any purchase of notes under this subsection. The Secretary of the Treasury may sell any such notes at such time and price and upon such terms and conditions as he or she shall determine in his or her discretion. All purchases, redemptions and sales of such notes by such Secretary shall be treated as public debt transactions of the United States."

"(c) REMITTANCE AND TERMINATION.—If Congress does not, on or before September 30, 1979, enact legislation of the type referred to in subsection (b) of this section, the Secretary shall upon the expenditure of all funds committed prior to September 30, 1979, to purchase redeemable preference shares, and the receipt into the Fund of all shares purchased by such funds, hold in trust all redeemable preference shares issued by railroads which are held in the Fund and the Fund shall thereupon terminate."

AUTHORIZATIONS

SEC. 206. Section 509 of the 4R Act (45 U.S.C. 829) is repealed.

OTHER AMENDMENTS

SEC. 207. Section 511(j) of the 4R Act (45 U.S.C. 831(j)) is amended by striking "subsection (i) or (j)" and inserting in lieu thereof "subsection (h) or (i)".

SEC. 208. Section 512(a) of the 4R Act (45 U.S.C. 832) is amended by inserting "of the Treasury" between the words "Secretary" and "may" at the end of the first sentence.

SEC. 209. Section 810 of the 4R Act (45 U.S.C. 1653(a)) is repealed.

THE SECRETARY OF TRANSPORTATION,
Washington, D.C., March 15, 1978.

Hon. WALTER F. MONDALE,
President of the Senate,
Washington, D.C.

DEAR MR. PRESIDENT: Transmitted herewith is a bill "To amend the Federal Railroad Safety Act of 1970 and the Rail Passenger Service Act to authorize additional appropriations and for other purposes, and to amend other rail safety Acts, the Railroad Revitalization and Regulatory Reform Act of 1976, and the Department of Transportation Act."

TITLE I—LOCAL RAIL SERVICES

Background and need

Under existing law (section 5 of the Department of Transportation Act ("DOT Act") and section 402 of the Regional Rail Reorganization Act of 1973 ("the 3R Act")), the Department is authorized to provide assistance to States to preserve local rail services that would otherwise be lost because the Interstate Commerce Commission ("ICC") has permitted such service to be discontinued, or because the line in question was excluded from the Final System Plan adopted under title II of the 3R Act. On April 1, 1978, the section 402 program under the 3R Act lapses, and the program becomes part of the nationwide five-year program under section 5 of the DOT Act. The section 5 program expires on June 30, 1981.

When the restructuring of the northeast and midwest rail system was originally conceived, it was recognized that the abandonment at one time of some 6000 miles of line throughout the northeast and midwest States could have unforeseen results, and could cause severe short-term local dislocations involving service, employment and other implications. Accordingly, a transitional program of assistance was provided to States under the 3R Act, to help them protect service for up to two years on lines excluded from the Final System Plan. Later, State-owned and operated lines, and those permitted to be abandoned by the ICC, were made eligible. When the 4R Act was passed, the five-year nationwide program under section 5 of the DOT Act was added.

Based on our experience to date, we have serious concerns with the existing program. The States, the industry, and, we believe, the Congress share this concern. Except for a few State-owned and operated lines, which were included in the section 402 program in the northeast, the only lines eligible for assistance are those excluded from the Final System Plan, because they were not considered essential, or those allowed by the ICC to be abandoned because the public convenience and necessity does not require their preservation. In both situations, only the worst and least needed railroad lines can be assisted, while more important and valuable lines owned by the railroads continue to deteriorate for lack of private investment because the return on such investment is too low to attract private capital. Thus this legislation will assist railroads in providing needed funds for valuable lines and will at the same time facilitate rationalization of the overall rail system through discontinuance of redundant lines.

Principal changes proposed in existing law

The most important change proposed in the law is the expansion of the category of eligible lines to include certain lines which while still part of the private rail system, are vulnerable to future abandonment. Railroads are now required to show such lines in their system diagram maps filed under section 1a(5)(a) of the Interstate Commerce Act. Such lines would be eligible only for rehabilitation, to overcome deferred maintenance, or for certain types of alternative facilities, such as, intermodal terminals, and only if they meet a benefit/cost test. They would not be eligible for operating subsidies.

Other key changes are as follows:

1. The program would be made permanent and the Federal share set at 80 percent.

2. Operating subsidies would be provided for lines allowed to be abandoned by the ICC, but only for two years, except that all lines which are now eligible would remain eligible until 1981. No benefit/cost test would be applied to subsidies. However, any alternate facilities constructed in lieu of service on such lines or any acquisition of such line for present or future use would have to meet benefit/cost tests.

3. The formula for the allocation of funds would be revised so that the new lines eligible for rehabilitation would control the allocation of two-thirds of the available funds while those eligible only for subsidy, including all those now eligible, would control the allocation of one-third of such funds. Thus, the lines of greatest importance to the States would have the greatest formula impact. In addition, each State would receive a minimum of $100,000 for planning and the one percent minimum entitlement of each State would be removed. The Secretary would have discretion, however, to transfer up to 5 percent of appropriated funds including the $100,000 to each State, to the new consolidated planning fund proposed under the "Highway and Public Transportation Improvement Act of 1978", when such fund is created.

4. The administrative costs of developing and measuring new and innovative management and marketing techniques would be eligible for assistance. Such activities, called cooperative action programs, would be developed by States and localities with shippers or industry representatives, and would have to be of a short-term nature not exceeding 18 months in duration. The cost of implementing a cooperative action program would not, however, be eligible for assistance.

TITLE II—AMENDMENTS TO THE RAILROAD REVITALIZATION AND REGULATORY REFORM ACT OF 1976 ("4R ACT")

Title II of the bill would amend the 4R Act to correct several defects in the redeemable preference share program under title V of the Act, and to more accurately reflect the cost to the Government of providing such assistance under this program. These changes are as follows:

1. The Secretary would be provided with a more accurate basis for evaluating an applicant railroad's financial condition by being able to look at the applicant's rate of return on total capital over the three year period preceding the submission of the application. The Act currently restricts the Secretary of examining the rate of return for fiscal year 1975.

2. The Secretary would be authorized to sell Fund anticipation notes and to purchase redeemable preference shares after the program's termination date where the Secretary makes a commitment to purchase such shares before that date. This change would avoid the problem of having to supply funds to a carrier prior to the time when project expenditures would be made, thereby resulting in interest cost savings to the Government.

3. The program would be extended for one year to September 30, 1979, to provide both the Executive and the Congress with more time to consider the need for a more permanent financing program in light of the Department's soon to be issued report under sections 504 and 901 of the 4R Act.

4. The mechanism of funding the purchase of Fund anticipation notes would be changed to allow the Secretary of the Treasury to use the proceeds from debt transactions rather than appropriated funds, and to allow the Secretary of the Treasury to establish the terms and conditions of such purchases in

order to more clearly reflect the cost to the Government.

5. Lastly, the $100,000,000 ceiling on purchase of trustee certificates by the Secretary would be removed. This would give the Secretary the needed flexibility to meet the financial needs of the bankrupt railroads.

Title II would also repeal section 810 of the 4R Act (the Federal rail bank program), which would be merged into the local rail services program by title I of the bill. Finally, several technical errors that are currently present in the 4R Act would be corrected.

TITLE III—AMENDMENTS TO THE FEDERAL RAILROAD SAFETY ACT OF 1970 AND OTHER RAIL SAFETY ACTS

Title III of the bill would amend the Federal Railroad Safety Act of 1970 in the following respects:

1. The Secretary would be provided with a greater period of time (90 days after receipt of a notice of a violation) within which to assess a civil penalty, before a participating State could seek injunctive relief for such a violation. The Act currently provided the Secretary with an insufficient period of time (90 days after a violation occurs) to assess a penalty.

2. It makes clear that the enactment of the Independent Safety Board Act of 1974 (49 U.S.C. 1901 *et seq.*), which established the National Safety Board as an independent agency, did not remove the Department's authority to investigate railroad accidents.

3. Private agents of the Department, who assist in inspecting and examining rail facilities and equipment, would, during the course of such inspections, be considered employees of the government for purposes of the Federal Tort Claims Act. This amendment would eliminate the need to acquire expensive liability insurance to protect the Department from claims arising from the conduct of its safety activities when private agents are used.

4. Authorization language would be inserted to allow appropriations for fiscal years 1979 and 1980, for the Department's rail safety program. The bill would permanently authorize funds appropriated for research and development, automated track inspection and the State safety grant program to remain available until expended. The separate authorizations and limitations for the Office of Safety, are eliminated as unnecessary, as they would be included in the basic authorizations.

Title III would also amend the Hours of Service Act to extend the hours of service limitations of this Act to common carriers engaged in interstate or foreign commerce by railroad. The Act presently does not cover hours of service of employees during intrastate movements, even though the carrier is otherwise engaged in interstate and foreign transportation. Excessive time on duty of employees during purely intrastate movements directly affects safety in interstate and foreign transportation. The amendment will make the Act apply to common carriers engaged in interstate or foreign commerce by railroad irrespective of whether an employee's period of service in question was actually involved in interstate or foreign commerce.

Finally, the penalty provisions of several related rail safety Acts would be amended to allow FRA to assess penalties for violations within the penalty range established by law. Presently, these Acts provide that after FRA determines that a violation has occurred, and a settlement is not reached, a suit must be brought in a Federal district court for recovery of a penalty within the penalty range ($250–$2,500). This present procedure creates an incentive for carriers to refuse administrative settlements at amounts higher than $250.

TITLE IV—AMENDMENTS TO THE RAIL PASSENGER SERVICE ACT

Title IV of the bill would amend the Rail Passenger Service Act to authorize additional appropriations for Amtrak for the fiscal years ending September 30, 1979 and September 30, 1980, to pay for the cost of operating expenses, including those incurred in connection with the Northeast Corridor Project, capital improvements, and for payment of principal on guaranteed obligations. To simplify this section, the separate provision for Northeast Corridor expenses has been deleted. Such expenses would be included in the provision for expenses in operating the basic system and 403(b) service.

The importance of the railroad industry as a transporter of freight and passengers requires a continuing effort to improve the local rail services program, improve railroad safety, and provide financial assistance for the revitalization of the industry. We believe that favorable action on the enclosed draft bill will substantially improve the ability of the Department to carry out its responsibilities in the foregoing areas, and will enable Amtrak to provide rail passenger service through fiscal year 1980.

The proposed legislation will not have an adverse impact on the environment, nor will it have an inflationary impact on the economy.

The Office of Management and Budget has advised that the submission of this proposed legislation to the Congress is in accord with the Administration's program.

Sincerely,

BROCK ADAMS.

SECTION-BY-SECTION ANALYSIS OF THE RAILROAD AMENDMENTS ACT OF 1978

TITLE I—LOCAL RAIL SERVICES

Section 101. This section states that it is the purpose of the Congress in enacting Title I of the Railroad Amendments Act of 1978, (1) to provide assistance to States for short-term rehabilitation or other assistance which provides tangible economic benefits to the community and which enables the parties involved to continue to provide adequate transportation service without further Federal assistance, and (2) to mitigate the effects of an abandonment by providing short-term transitional operating subsidies while the affected shippers arrange for alternate means of transportation.

The section also declares it to be the policy of the Congress that the Government will assist in the provision of adequate transportation service to those now served by light density lines only when that assistance provides tangible economic benefits to the affected communities without placing a financial drain on the carriers providing that service. It is further declared that the parties benefiting from the Federal investment must act to preserve the benefits of that investment by committing themselves to long-term solutions, enabling the continued provision of adequate transportation service after the completion of the federally assisted project.

Section 102. This section amends section 5(f)(1) of the Department of Transportation Act ("DOT Act") to clarify that rail service continuation payments are determined in accordance with section 1a of the Interstate Commerce Act and implementing Interstate Commerce Commission regulations (49 CFR Part 1121 Subpart D) and cover the difference between the revenues attributable to rail service and avoidable cost of providing that service together with a reasonable return on the value of the line of railroad. These payments include ordinary maintenance to maintain existing levels of service but does not include rehabilitation or improvement other than the amounts necessary to enable the line to meet Federal Railroad Administration Class 1 safety standards (49 CFR 213). In addition, it amends section 5(f)(2) of the DOT Act as a conforming change in connection with the proposed repeal of section 810 of the Railroad Revitalization and Regulatory Reform Act of 1976 ("4R Act") by section 209 of Title II. It would permit a State to use financial assistance under subsection 5(f)(2) to acquire any kind of property interest in a rail property.

Section 810 of the 4R Act requires the Secretary of Transportation to establish a rail bank to preserve certain rail properties for future use. Under subsections 5(f)(2) of the DOT Act, a State is currently permitted to use rail service assistance to purchase rail properties in order to preserve them for future use (hereinafter referred to as "rail banking"). A State is not, however, permitted to acquire less than a fee interest (such as a lease or easement) in a rail property for rail banking. The purpose of the conforming change is to assure that with the repeal of section 810 the States will have the same flexibility in acquiring a rail property or any interests therein as the Secretary had under section 810.

The section also adds two new paragraphs to section 5(f) of the DOT Act. New paragraph (5) permits States to construct new connections, sidings, intermodal freight terminals, and similar facilities but only in connection with the lines of railroad made newly eligible by amended subsection 5(k)(3). It is intended that any sidetrack or other facility constructed with Federal assistance will be built in accordance with standard industry practices. In the case of sidings, we understand the standard industry agreement to require the shipper to pay for any part of the facility not located on railroad property. Consequently, it is anticipated that Federal assistance would be available to construct only the part of a siding located on railroad property.

New paragraph (6) permits States to pay the cost of developing, administering, and evaluating the benefits of cooperative action projects. A cooperative action project is an innovation involving cooperation between the State or localities and railroad management, labor, or shippers in order to improve the quality and efficiency of local rail freight service on lines of railroad eligible for assistance under the program. The State is authorized to provide financial assistance to cover the costs of planning, administering, and measuring the benefits of a project. Except with respect to any part of a cooperative action project eligible for assistance under any of paragraphs (1)–(5) of subsection (f), the State may not provide financial assistance to actually implement a cooperative action project.

Section 103. This section revises section 5(g) of the DOT Act to provide that the Federal share of a State's program is 80 percent for each Federal fiscal year and to eliminate the five-year limit on the program. Unlike the present law, in which the Federal share declines over four years from 100 percent to 70 percent, the bill proposes to maintain the Federal share at the same level each year. The State may provide its share in cash, but not a cash equivalent, or by forgiveness of any kind of taxes owed to the State by a common carrier by railroad, or through the provision by the State, or by any person or entity on its behalf, for use in its rail service assistance program, of tangible personal property or realty of the kind needed for safe and efficient operation of rail service. A State's contribution to the program which exceeds its matching share for the fiscal year may be carried forward for subsequent fiscal years.

Section 104. This section amends section 5(h) of the DOT Act to revise the allocation

formula and the reallocation requirements. Subject to the limitation contained in new paragraph (3), new section 5(h) provides that each State shall receive an entitlement of $100,000 to be used for planning. If available funds are insufficient to enable each State to receive $100,000, each State is entitled to an equal share of the available funds. Each State is also entitled to a second sum to fund eligible projects. This amount is calculated as follows: Two-thirds of the balance of the available funds remaining after each State has received its planning funds multiplied by the State's proportion of rail mileage included in accordance with 49 U.S.C. 1a(5)(a) and implementing regulations (mileage which the railroad anticipated will be the subject of an abandonment or discontinuance application and mileage potentially subject to abandonment), in a railroad system diagram filed with the Interstate Commerce Commission; plus one-third of the balance of the available funds remaining after each State has received its planning funds multiplied by the State's proportion (i) of all rail mileage for which the Commission, within two years prior to the first day of the fiscal year for which funds are allocated or reallocated has found that the public convenience and necessity permit the abandonment of, or the discontinuance of rail service on, the line of railroad related to the project, and (ii) including until September 30, 1981, the mileage which was eligible for assistance under section 402 of the Regional Rail Reorganization Act of 1973 ("3R Act") and section 5 of the DOT Act prior to the enactment of the amendment. Available funds include funds appropriated for the fiscal year and any funds available for reallocation for the fiscal year. All mileage eligible under section 402 and all mileage included in formula calculations under section 5 prior to the enactment of this amendment, regardless of the eligibility under section 5(j) of the State in which the mileage is located, are included in the formula computations and will continue to be eligible and included in the formula calculations until 1981. In order to be eligible to receive funds for any purpose other than planning, States continue to be required to meet all of the requirements of section 5(j) of the DOT Act and implementing regulations. Although 49 CFR 1121.20(b) requires a railroad to include five categories of rail mileage in its system diagram, only mileage included in category (b)(1) or category (b)(2) is included in the entitlement formula.

Funds are available to a State during three fiscal years—the fiscal year or which funds are appropriated and the following two fiscal years. Any funds which at the end of that period have not been granted to a State by the Secretary, by means of an agreement executed by both parties, are reallocated to all of the States including States from which funds have been reallocated. Funds which are reallocated are again available during three fiscal years and are also subject to reallocation.

If a consolidated planning fund is authorized to be created in the Department of Transportation for the purpose of enabling grants to be made to States and designated Metropolitan Planning Organizations to develop transportation plans and programs under the Urban Mass Transportation Act of 1964, as amended, and under Title 23 of the United States Code, the Secretary in his or her discretion is authorized to transfer to the consolidated fund up to five percent of the total amount of funds appropriated for any fiscal year under section 5(r) of the DOT Act as redesignated by section 107 of the bill. If the Secretary chooses to transfer appropriated funds to the consolidated fund, he or she may in his or her discretion include in or exclude from the funds to be transferred the planning entitlement which each State is authorized to receive under subsection 5(h)(1)(A). If the Secretary chooses to include the planning entitlement in the funds to be transferred, a State may not expend funds granted under section 5 of the DOT Act for rail planning and the formula calculations omit the process contained in paragraph (1)(A) of new section 5(h). Funds which are available for reallocation are not subject to transfer. Transferred funds are available to be allocated and granted to States under the same conditions and in the same manner as any other funds in the consolidated planning fund and are no longer subject to the provisions of section 5 of the DOT Act.

Section 105. This section amends section 5(i) of the DOT Act to substitute a new provision therefore. Subject to the authority of the Secretary under subsection 5(h)(3) to transfer all rail planning funds to the consolidated planning fund when that fund is established, section 5(i) authorizes $100,000 for each State for planning for each fiscal year beginning with the 1979 fiscal year. No change is made in the second sentence of section 5(r) as redesignated by section 107 below. Thus, the funds available under existing authorizations for planning would be unaffected by the new law.

Section 106. This section amends section 5(k) of the DOT Act to set out the different kinds of projects which are eligible for assistance under each paragraph of section 5(f) of the DOT Act. As amended by the bill, section 5(f) of the DOT Act directs the Secretary to provide assistance for six classes of projects. Section 5(k) of the DOT Act sets out the eligibility criteria for the different classes of projects. Under present law, the eligibility criteria are the same for each class of project. Under the proposed bill, however, because each class of assistance is provided to solve a different kind of problem, the same eligibility criteria are not appropriate for all six kinds of projects. Consequently, the bill proposes to amend section 5(k) of the DOT Act to establish distinct eligibility criteria for each class of project.

Subsection 5(k)(1) of the DOT Act provides that a project is eligible for assistance under subsection 5(f)(1) of the DOT Act if the line of railroad which is related to the project has an Interstate Commerce Commission finding under section 1a of the Interstate Commerce Act or was eligible for assistance under section 402 of the 3R Act. New subsection 5(k)(1) authorizes a State to provide rail service assistance under subsection 5(f)(1) of the DOT Act, i.e., rail service continuation payments, for twenty-four months. A line of railroad or related project which was eligible for assistance under section 402 of the 3R Act or under section 5 of the DOT Act prior to the enactment of this amendment, continues its eligibility to receive rail service continuation payments until September 30, 1981.

Under present law, a project is eligible for assistance until June 30, 1981. Since the enactment of the present law, the Federal fiscal year has been changed to end on September 30 of each year. Consequently, the amendment extends until September 30, 1981, the eligibility of projects which were eligible for assistance under section 402 or under subsection 5(f)(1) of the DOT Act prior to the enactment of the amendment, to conform the program year to the Federal fiscal year. Subsection 5(k)(2) provides that a project is eligible for assistance under new subsection 5(f)(2) if the project (1) satisfies benefit/cost criteria developed by the Secretary under new section 5(o), and (2)(i) if the line of railroad has an Interstate Commerce Commission finding issued since sections 5(f)–(o) were added to the DOT Act by section 803 of the 4R Act (on February 5, 1976), (ii) if the line of railroad was listed for inclusion in Part III, Section C of the United States Railway Association's Final System Plan issued under section 207 of the 3R Act, or (iii) if the line of railroad was eligible for acquisition assistance under section 402(c)(3) of the 3R Act. A line of railroad which was eligible for acquisition assistance under section 402(v)(3) or under section 5 of the DOT Act prior to the enactment of this amendment is eligible only until September 30, 1981.

Subsection 5(k)(3) provides that a project is eligible for assistance under subsections 5(f)(3) and 5(f)(5) only if, at the time assistance is provided, the line of railroad related to the project is mileage which the operating railroad anticipates will be the subject of an abandonment or discontinuance application or is potentially subject to abandonment within the meaning of section 1a(5)(a) of the Interstate Commerce Act and thus included in a railroad system diagram filed with the Interstate Commerce Commission in accordance with 49 CFR 1121.20(b)(1) or (b)(2) and the project satisfies benefit/cost criteria. Although 49 CFR 1121.20(b) requires a railroad to include five categories of rail mileage in its system diagram, only mileage included in categories (b)(1) or (b)(2) is eligible for assistance under subsections 5(f)(3) and 5(f)(5). A project becomes ineligible for assistance if the line of railroad related to the project is included in an application for abandonment or discontinuance of service thereon. If, however, an application is withdrawn or denied and the railroad subsequently includes the line in its diagram as a category (b)(1) or (b)(2) line, the project would again be eligible.

Subsection 5(k)(4) provides that a project is eligible for assistance under subsection 5(f)(4) only if the project satisfies benefit/cost criteria and the line of railroad which is related to the project has an Interstate Commerce Commission finding or was eligible for assistance under section 402 of the 3R Act. A project which was eligible for assistance under section 402 or under section 5 of the DOT Act prior to the enactment of the amendment is eligible only until September 30, 1981.

Subsection 5(k)(5) provides that a State may assist a cooperative action project only if the project is reasonably likely to improve local rail freight service by improving operating efficiency, decreasing cross subsidization of the unprofitable portions of a rail system by its profitable portions, or improve worker productivity. In order for a cooperative action project to be eligible for financial assistance, its implementation must last no more than eighteen months.

Section 107. As the bill adds three new subsections to section 5 of the DOT Act, section 107 redesignates section 5(o) as section 5(r) and provides that all references to it are also redesignated.

Section 107 also amends redesignated section 5(r) to provide that after the repeal of section 810 of the 4R Act any funds which were appropriated for purposes of section 810, are available to the Secretary for purposes of sections 5(f)–(r) of the DOT Act, that is that local rail service assistance program.

Section 109. This section adds a new subsection (o) to section 5 of the DOT Act. The new subsection directs the Secretary to develop benefit/cost criteria to be used by the Secretary, in accordance with section 5(k), to determine whether a project is eligible for Federal assistance. It is intended that the criteria measure only tangible, quantifiable economic benefits and costs. Additionally, it is intended that the criteria address the costs and benefits of alternate mode service. Only the mode which can be shown

to produce the greater benefit to the community will be assisted. Before issuing criteria, the Secretary shall consult with representatives of the States.

Section 109. This section adds a new subsection (p) to section 5 of the DOT Act. New subsection (p) sets out the procedures under which a State spends assistance provided under subsection 5(f)(3) to rehabilitate or improve rail properties in order to improve local rail freight service within the State. The State has the option to either grant or loan funds to a railroad which then performs the work involved in the project.

The State may set all of the financial terms of a loan or grant. However, it is intended that in entering into agreements with railroads, the States will ensure that the railroad is committed to providing service at the level to which the line is rehabilitated for at least the economic life of the investment. In any case, it is intended that the railroad commitment should be no less than five years and that the Federal assistance will not result in a decrease in the overall level of railroad capital investment.

The State may use repaid funds to make an unlimited number of loans or grants to rehabilitate or improve other eligible projects. A State shall use the repaid funds including interest thereon to make loans and grants in the same manner and subject to the same Federal conditions as loans and grants made with funds which were granted to the State by the Secretary. With the Secretary's approval, the State may permit the railroad to retain the Federal share of the funds in an interest bearing account in a bank, which has been designated by the Secretary of the Treasury, for the use and benefit of the State in its program. The Federal share of any funds not used or needed by the State in its program may be returned to the Secretary at any time and the Federal share of the funds remaining after the termination of the program are to be paid to the Secretary.

Section 110. This section makes these new amendments effective on October 1, 1978.

TITLE II—AMENDMENTS TO THE 4R ACT

Section 201. This section would add two new subsections to section 502 of the 4R Act. Subsection (j) would provide that no proceeds from the issuance and sale of Fund anticipation notes shall be used to pay interest on such notes. Subsection (k) would provide that no moneys in the Rail Fund can be obligated or expended without prior approval thereof in an annual appropriations Act. This latter provision is currently contained in section 509 of the 4R Act which would be eliminated under amendments made by section 206 of this bill.

Section 202. This section would amend section 505(b)(2) of the 4R Act to make the use of the applicant's rate of return on total capital in the section 505 evaluation process consistent with the use of that concept in determining, under section 506, the yield on redeemable preference shares used solely to reduce the level of deferred maintenance on facilities. By providing for the use of a three year average rate of return on total capital, the change also eliminates the potential use of information that is not typical for the applicant due to extraordinary events that may have occurred in fiscal year 1975. In short, the amendments provides a broader indicator of the applicant's normal rate of return on total capital and thus permits more meaningful analysis.

This section would also correct two technical errors that are currently present in the 4R Act. The first error resulted from the failure to delete the reference to paragraph (2) of subsection 505(a) in the first sentence of section 505(b)(2) of the 4R Act when paragraph (2) of section 505(a) was eliminated by the Rail Transportation Improvement Act, Pub. L. No. 94-555. The second error is omission of the word "credits" after the phrase "accumulated deferred income tax" in the third sentence of section 505(b)(2) of the 4R Act.

Section 203. This section eliminates the present $100 million ceiling on the purchase of trustee certificates under section 505 of the 4R Act. Given the recent bankruptcy of the Chicago, Milwaukee, St. Paul and Pacific R.R., raising to three the number of railroads in reorganization, and the marginal condition of other railroads, the $100 million ceiling is no longer appropriate.

Section 204. This section makes it clear that September 30, 1979, is the date on which the Secretary's authority to commit funds under Section 505 shall terminate. Railroad rehabilitation and improvement projects funded under section 505 will often be long, complex projects entailing work that will not be accomplished for many months after the commitment for Federal funding has been given. Under the existing language of the 4R Act, the Secretary would be required to sell, and the Secretary of the Treasury to buy, Fund anticipation notes prior to September 30, 1979, which may be substantially in advance of the time when the actual expenditures by railroad recipients would be made. During this interim period the Treasury would have to bear the interest cost incurred in purchasing the notes without any prospect for recoupment from the ultimate recipient of the funds. By allowing for the purchase of preference shares after September 30, 1979, these amendments will permit drawdowns for work accomplished after September 30, 1979, by a method which is both least costly to the United States and preserves control of the funds until they are actually required to be expended by the railroad recipient.

Section 205. This section would amend section 507 of the 4R Act to authorize the Secretary of Transportation to issue and sell to the Secretary of the Treasury, Fund anticipation notes, as approved in appropriation Acts, in an aggregate principal amount of $600 million. The Secretary of the Treasury, for budgeting reasons and to more clearly reflect the cost to the Government of the purchase of the redeemable preference shares, is authorized to establish the terms and conditions, including interest rate, of the notes. The payment of interest on such notes could not be made out of the proceeds of the Fund anticipation notes authorized by this section. Section 507(d) presently provides that if the Congress does not, on or before September 30, 1978, enact legislation authorizing the Secretary to redeem the Fund anticipation notes, the Secretary would hold in trust all redeemable preference shares which are then in the Fund and the Fund would terminate. This amendment would require the Secretary to await receipt of all preference shares before taking them in trust and terminating the Fund. The amendment would thus facilitate purchases of shares after September 30, 1979, to fund projects approved prior to that date.

Section 206. This section strikes the authorization language of section 509 of the 4R Act which is no longer needed in light of sections 201 and 205 of the bill. Sections 201 and 205 will permit the Secretary of the Treasury to purchase out of proceeds from public debt transactions Fund anticipation notes which the Secretary offers for sale to finance projects approved prior to September 30, 1979, to the extent such purchases are authorized by an annual appropriations Act.

Sections 207 and 208. Section 207 would correct an error in the numbering of subsections in section 511 of the 4R Act. Section 208 would conform section 512(a) of the 4R Act to reflect the authority of the Secretary of the Treasury with respect to Fund anticipation notes established by section 205 of the bill.

Section 209. This section would repeal section 810 of the 4R Act for the reasons set forth in the analysis.●

● Mr. CLARK. Mr. President, I am pleased to join in cosponsoring this important piece of legislation. Many communities face the possible termination of essential rail service because the railroads which serve them simply are not in a position to pay for necessary track repairs. In my home State of Iowa alone, 1,511 of the State's 7,547 miles of track—20 percent of the railroad track in the State—has been targeted for abandonment by the railroads. Nationwide, some 16,516 miles of track have been targeted for abandonment and the railroads have already been given permission by the Interstate Commerce Commission to abandon another 2,750 miles of track.

Abandonment of railroad lines can be a devastating problem for a community This is particularly true for communities in States such as Iowa which are dependent for their livelihood on the efficient transportation—in bulk—of agricultural commodities to market here and abroad. Adequate rail transportation is the lifeblood of many of these local communities.

Mr. President, present law makes a stab at dealing with the abandonment problem, but quite frankly, it is inadequate. Under the Railroad Revitalization and Regulatory Reform Act's branch line assistance program, States are currently eligible for temporary transitional assistance to help them protect service on lines which the Interstate Commerce Commission has cleared for abandonment. This assistance is not available, however, on those lines which the railroads are contemplating abandoning, but for which no application to abandon has yet been made with the Interstate Commerce Commission.

Mr. President, this simply does not make sense. What we have here is a system that makes operating subsidies and capital grants available where lines have been determined by the Interstate Commerce Commission to be "losers" but denies rehabilitation assistance to lines which have a better chance of being saved. Commonsense suggests that this is an inefficient way to spend the taxpayers' money.

Among other things, our bill would broaden the categories of track which are eligible for assistance under title VIII of the 4–R Act to include lines in ICC categories 1 and 2. These are lines which the carriers expect they will seek to abandon within 3 years (category 1) and lines under study which may be subject to future abandonment attempts (category 2). It is our hope that by broadening the branch line assistance program we would be able to head off the termination of essential rail service to many communities. Lines which might not remain profitable if they continued to deteriorate, could be rehabilitated before communities turned to more expensive and less efficient modes of transportation.

I should emphasize that our bill does

not call for the expenditure of more Federal dollars. It simply expands the categories of track for which rehabilitation grants could be made available under the branch line assistance program. The legislation is the product of many months of work by Federal and State transportation planners and has the enthusiastic support of the Iowa Department of Transportation, one of the most progressive State transportation departments in the country.

Mr. President, as chairman of the Senate Agriculture Committee's Rural Development Subcommittee, I have been carefully following the Federal Railway Administration's efforts under section 401 of the 4–R Act to develop some realistic solutions to the Midwestern rail crisis. The hope is that if we act now we can avoid the irreversible deterioration in the system that led to the establishment of ConRail in the Northeast. Undoubtedly one solution to the Midwest's problems will be the abandonment of lines which everyone—shippers, railroads, local communities, State planners—believes are nonessential.

The tough problem will be what to do about the essential light-density lines which are deteriorating and therefore less profitable, but which the railroads simply cannot afford to repair given their current financial straits. These are the lines for which Federal assistance is necessary. And it is for this reason that I believe the amendments contained in our bill are necessary if we are going to engage in a meaningful search for solutions under section 401. State and Federal transportation planners need the kind of flexibility that expanding the State branch line assistance program will bring.

Mr. President, I sincerely hope the Senate will give this bill serious and expeditious consideration.●

By Mr. CRANSTON (by request):

S. 2983. A bill to amend section 3103 of title 38, United States Code, to extend the time period within which the board of review concerned, on its own initiative, shall determine whether a person who has been awarded a general or honorable discharge under revised standards for the review of discharges as specified in clause (A) (i), (ii), or (iii) of paragraph (2) of subsection (e) of such section 3103 would be entitled to an upgraded discharge under standards meeting the requirements of paragraph (1) of such subsection; to amend section 5 of Public Law 95–126 to extend the time during which a former serviceperson may continue to receive Veterans' Administration benefits pending such determination; and for other purposes; to the Committee on Veterans' Affairs.

● Mr. CRANSTON. Mr. President, I am introducing today, at the request of the administration, S. 298, a bill to amend section 3103 of title 38, United States Code, to extend the time period within which the board of review concerned, on its own initiative, shall determine whether a person who has been awarded a general or honorable discharge under revised standards for the review of discharges as specified in clause (A) (i), (ii), or (iii) of paragraph (2) of subsection (e) of such section 3103 would be entitled to an upgraded discharge under standards meeting the requirements of paragraph (1) of such subsection; to amend section 5 of Public Law 95–126 to extend the time during which a former serviceperson may continue to receive Veterans' Administration benefits pending such determination; and for other purposes. I ask unanimous consent that the letter of transmittal and the bill be printed in the RECORD.

There being no objection, the bill and the letter were ordered to be printed in the RECORD, as follows:

S. 2983

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) paragraph (1) of subsection 3103(e), title 38, United States Code, is amended to read as follows:

"(1) Notwithstanding any other provision of law, (A) no benefits under laws administered by the Veterans' Administration shall be provided, as a result of a change in or new issuance of a discharge under section 1553 of title 10, except upon a case-by-case review by the board of review concerned, subject to review by the Secretary concerned, under such section, of all the evidence and factors in each case (i) under published uniform standards (which shall be historically consistent with criteria for determining honorable service and shall not include any criterion for automatically granting or denying such change or issuance) and procedures generally applicable to all persons administratively discharged or released from active military, naval, or air service under other than honorable conditions; or (ii) prior to publication of such uniform standards, under standards (which shall be historically consistent with criteria for determining honorable service, as determined by the Secretary concerned, and shall not include any criterion for automatically granting or denying such change or issuance) and procedures as required in (i) of this paragraph; and (B) any such person shall be afforded an opportunity to apply for such review under such section 1553 for a period of time terminating not less than one year after the date on which such uniform standards and procedures are promulgated and published.".

(b) clause (B) of paragraph (2) of subsection 3103(e), title 38, United States Code, is amended to read as follows:

"(B) such determination shall be made by such board (i) on an expedited basis after notification by the Veterans' Administration to the Secretary concerned that such person has received, is in receipt of, or has applied for such benefits or after a written request is made by such person for such determination, (ii) on its own initiative within one year after the date of publication of the uniform standards as required by paragraph (1) of this subsection in any case where a general or honorable discharge has been awarded on or prior to the date of enactment of this paragraph under revised standards referred to in clause (A) (i), (ii), or (iii) of this paragraph, or (iii) on its own initiative at the time a general or honorable discharge is so awarded in any case where a general or honorable discharge is awarded after such enactment date.".

(c) clause (A) of section 5(2) of Public Law 95–126 is amended to read as follows:

"(A) with respect to any person who, on such enactment date is receiving benefits under laws administered by the Veterans' Administration, (i) such benefits shall not be terminated under paragraph (2) of section 3103(e) of title 38, United States Code, as added by section 1(a)(2) of this Act, until (I) the day on which a final determination not favorable to the person concerned is made on an expedited basis under paragraph (2) of such section 3103(e), (II) the day following the expiration of ninety days after a preliminary determination not favorable to such person is made under such paragraph, or (III) the day following the expiration of one hundred and eighty days after the date of publication of the uniform standards as required by paragraph (1) of subsection (e), section 3103 of title 38, United States Code, as amended by this Act, whichever day is the earliest, and (ii) the United States shall not make any claim to recover the value of any benefits provided to such person prior to such earliest day;"

SEC. 2. This Act shall take effect on the date of its enactment.

WASHINGTON, D.C.,
April 7, 1978.

HON. WALTER F. MONDALE,
President of the Senate,
Washington, D.C.

DEAR MR. PRESIDENT: There is transmitted herewith a draft of a bill "To amend section 3103 of title 38, United States Code, to extend the time period within which the board of review concerned, on its own initiative, shall determine whether a person who has been awarded a general or honorable discharge under revised standards for the review of discharges as specified in clause (A)(i), (ii), or (iii) of paragraph (2) of subsection (e) of such section 3103 would be entitled to an upgraded discharge under standards meeting the requirements of paragraph (1) of such subsection; to amend section 5 of Public Law 95–126 to extend the time during which a former serviceperson may continue to receive Veterans Administration benefits pending such determination; and for other purposes." It is requested that the draft bill be introduced and considered for enactment.

The purpose of the proposed bill is to allow more time for the discharge review boards of the services concerned to make a determination, on their own initiative, whether, in a given case, a discharge upgraded under revised standards would have been awarded under the uniform standards required by Public Law 95–126. The draft bill is also designed to extend for a limited time, the period during which persons may continue receiving Veterans Administration benefits on the basis of a discharge upgraded under revised standards pending the determination as to whether an upgraded discharge would have been awarded under the uniform standards required by Public Law 95–126.

The proposed bill would also preserve the Veterans Administration benefits of those persons whose discharges were upgraded or may be upgraded on a case-by-case basis in accordance with standards of the particular military services from the date of enactment of Public Law 95–126 until publication of the uniform standards required by paragraph (1) of subsection 3103(e) of title 38, United States Code.

It is estimated by the Department of Defense that a minimum of 6 months will be required from the date of publication of the uniform standards and procedures mandated by Public Law 95–126 to insure timely reconsideration of approximately 5,097 cases expected to be referred to the discharge review boards of the military departments by the Veterans Administration. These are the cases involving approximately 1,105 individuals who are currently receiving, and approximately 3,991 individuals who have applied for benefits on the basis of a discharge upgraded under the Presidential memorandum of January 19, 1977, or the Special Discharge

Review Program (SDRP) implemented on April 5, 1977. In addition, extention of the deadline for a period of 1 year from date of publication will provide additional time for the consideration of the approximately 15,000 other discharges upgraded under either the aforementioned Presidential memorandum or the SDRP. This will enable the discharge review boards to resume consideration of normal caseload, yet provide for completion of those special program cases in a timely manner, which do not currently involve payment of veterans benefits.

The relaxation of the time limitations of Public Law 95–126, as embodied in the proposed amending bill, will provide additional and valuable opportunity for the submission and careful consideration of the many significant comments and queries concerning the required uniform standards for reconsideration of discharges previously upgraded under temporarily revised standards and thereby assure fairness to both the Government and the individuals concerned.

Additional cost resulting from enactment of this measure is difficult to estimate but is not anticipated to be significant.

The Department of Defense joins in recommending the introduction and favorable consideration by the Congress of the enclosed draft bill.

Advice has been received from the Office of Management Budget that there is no objection to the presentation of this letter of justification from the standpoint of the Administration's program.

Sincerely,

MAX CLELAND,
Administrator.●

By Mrs. HUMPHREY (for herself, and Mr. ANDERSON):

S. 2984. A bill to amend the Great Lakes Pilotage Act of 1960 in order to relieve the restrictive qualification standards for U.S. pilots on the Great Lakes; to the Committee on Commerce, Science, and Transportation.

PROVIDING MORE PILOTS FOR GREAT LAKES SHIPS

● Mrs. HUMPHREY. Mr. President, I am introducing legislation today that would help to alleviate a potential shortage of qualified pilots on the Great Lakes. This bill amends the Great Lakes Pilotage Act of 1960 by changing the definition of "U.S.-registered pilot" to include a mate or pilot license as a qualifying prerequisite to performing pilot's duties on the Great Lakes. Currently, a "U.S.-registered pilot" requires a master's license. The bill also will give the Secretary of Transportation discretion to require additional training and experience as deemed necessary to meet safety needs. The ultimate goal of this legislation is to relieve the growing shortage of qualified applicants for pilots' positions, while insuring the continued safe conduct of both foreign and registered U.S. vessels on the Great Lakes.

Prior to 1960, there was no requirement for ocean-going vessels, either foreign or U.S. registered, to utilize the services of officers with federally recognized piloting skills when navigating U.S. waters, while vessels sailing exclusively on the Great Lakes were required to utilize such pilots. With the opening of the St. Lawrence Seaway in 1959 and the subsequent increase in traffic, the need for such qualified pilots began to be recognized. This need eventually resulted in passage of the Great Lakes Pilotage Act of 1960 which requires the services of a U.S.-registered pilot for all vessels sailing in restricted or designated waters and a registered or otherwise qualified officer upon the open or "undesignated" waters of the lakes. While mates on U.S. interlake vessels are now licensed as first-class pilots, the prerequisite to service as pilots for ocean-going vessels in the same region is status as a U.S.-registered pilot. Currently, a "registered pilot" on the Great Lakes is defined as the holder of an unlimited master's license. It is this requirement that has given rise to the concern for the future availability of qualified pilots on the Great Lakes. After obtaining the first-class pilot's license, mates on the lakes generally sail for 10 years before obtaining a master's license and another 10 years before obtaining a master's berth. Thus, with a substantial number of years invested in qualifying experience and with seniority and retirement benefits accrued with one organization, these pilots are understandably reluctant to transfer to a new position with another organization.

In view of the threatened shortage of qualified registered pilots to serve ocean-going vessels navigating designated waters of the lakes, the future of Great Lakes shipping is seriously threatened. It is imperative, therefore, to not only liberalize the qualifications for U.S.-registered pilots for the immediate needs, but also to provide an attractive career program for the young lake officer candidates and the young but skillful officers currently engaged in Great Lakes service.

Mr. President, this bill would accomplish two noteworthy and much needed objectives. First, it makes the holders of mate, pilot, or master licenses eligible for service under the Great Lakes Pilotage Act of 1960, thus facilitating the availabilty of pilots when required by the increasing traffic on the lakes.

Second, it enables the Secretary of Transportation to require additional training and experience when necessary, thus insuring the safety of navigation on the Great Lakes. Safety, after all, was the primary motivation behind passage of the Pilotage Act of 1960.

Mr. President, I am, therefore, introducing this legislation today and hope that it will receive prompt, favorable consideration by the Senate.

Mr. President, I ask unanimous consent that my proposed amendment to the Great Lakes Pilotage Act of 1960 be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2984

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Great Lakes Pilotage Act of 1960 (74 Stat. 259; 46 U.S.C. 216) is hereby amended as follows:

(1) By deleting section 2(c) and inserting in lieu thereof the following:

"(c) 'United States registered pilot' means a person, other than a member of the regular complements of a vessel, who holds an appropriate license issued under the authority of the provisions of Title 52 Revised Statutes, in the capacity of master, mate, or pilot, as determined by the Secretary, authorizing navigation on the Great Lakes and suitably endorsed for pilotage on routes specified therein, and who is registered by the Secretary as provided in section 4 of this Act";

(2) By deleting in section 2(d) the words "a master's certificate or equivalent" and inserting in lieu thereof "an appropriate";

(3) By deleting in section 4(a) the word "master's" in the second sentence; and

(4) By deleting in section 4(a) the words "which matters shall remain the responsibility of the Coast Guard" in the fourth sentence and inserting in lieu thereof "except that the Secretary may require additional training and experience as a prerequisite to registration as a United States registered pilot".●

By Mr. HATHAWAY:

S. 2985. A bill to amend the Tariff Schedules of the United States to provide for an increase in the duties on imports of potatoes, and to reduce the quota for potatoes subject to the lower of the two rates of duty; to the Committee on Finance.

● Mr. HATHAWAY. Mr. President, under present tariff statutes, up to 114,000,000 pounds of seed potatoes are allowed to be imported into this country at 37.5 cents per hundredweight duty and, at the same rate of duty, table stock may enter until a tariff-quota of 45,000,000 pounds is attained.

After those limits have been reached, the duty doubles to 75 cents per hundredweight for the over-quota.

In times when potatoes are in abundant supply in places like New Brunswick and Prince Edward Island, there is tremendous pressure on the farmer, as winter ends, to empty his bins and clear his potato house to prepare for the new season.

This year is one of those years and the quota on table stock potatoes for 1977 (the quota year runs from September 15 to September 15) was filled by early February 1978. At that point, the duty on table stock imports rose from 37.5 cents a hundredweight to 75 cents.

A problem has arisen in that when the table stock tariff-quota is filled, as it early is, there is a surge of potato imports in the seed category. That classification does not fill up as early because it is more than twice as large as the table classification and, of course, most imports of seed potatoes are not brought in until late winter and early spring when farmers are preparing for the next crop year.

Because seed potatoes are indistinguishable from table stock potatoes, it is difficult or impossible for our customs agents to know which is which. Consequently, we rely upon agreements between the United States and the exporting country that potatoes exported as seed will be officially certified as such.

However, during periods when the seed tariff-quota is unfilled and where the table stock classification at 37.5 cents duty per hundredweight has been filled, potatoes enter as seed at the lower duty, but become table stock.

There is nothing wrong with eating seed potatoes. But there is something wrong in cheating the Government of the revenue it should have had had the

potatoes entered as table stock. There is also something wrong in glutting the fresh potato market in the United States with potatoes which entered as seed potatoes for planting.

Accordingly, Mr. President, I am pleased to introduce legislation to give our farmers better access to domestic potato markets by moderating imports of fresh and seed potatoes, and to make it easier for our hard-working Customs Service to control imports.

Present law allows, as I have said, 114 million pounds of seed and 45 million pounds of table potatoes at 37.5 cents per hundredweight. Thereafter, the duty rises to 75 cents.

My bill eliminates the distinction made as to the use of the potato and instead allows up to 100 million pounds of fresh potatoes to be imported at a duty of 75 cents per hundredweight.

Once the 100-million-pound level is reached, the duty would rise to $1 per hundredweight.

For Communist countries, the duty would be $1.50 per hundredweight up to 100 million pounds and $2 per hundredweight thereafter.

My bill also repeals the provision of law which provided that any time the level of domestic production fell below 21 billion pounds, such deficiency could be added to the 45 million pounds importable for table stock at 37.5 cents per hundredweight.

Mr. President, I believe that this bill will reduce imports by a moderate amount, will set duties at more realistic levels and will simplify enforcement of the fresh potato tariff schedules at all our borders.

I ask unanimous consent that my bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2985

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) subpart A of part 8 of schedule 1 of the Tariff Schedules of the United States (19 U.S.C. 1202) is amended by striking out the matter between item 137.11 and item 137.40 and inserting in lieu thereof the following:

	Potatoes, white or Irish:			
"137.20	For not over 100,000,000: Pounds entered during the 12-month period beginning September 15 in any year	Cwt	75¢ per 100 lbs.	$1.50 per 100 lbs.
137.25	Other	Cwt	$1.00 per 100 lbs.	$2.00 per 100 lbs.".

(b) The headnotes for such subpart are amended by striking out headnote No. 2.

SEC. 2. (a) The rate of duty prescribed in rate column numbered one of the Tariff Schedules of the United States, as amended by this Act, shall be considered to have been proclaimed by the President as necessary or appropriate to trade agreements to which the United States is a party, not as a statutory provision enacted by the Congress.

(b) The amendments made by this Act shall apply with respect to articles entered, or withdrawn from warehouse, for consumption after the date of enactment of this Act.●

By Mr. CHAFEE (for himself, Mr. DANFORTH and Mr. BELLMON):

S. 2986. A bill to provide that the salaries of the Vice President; Members of Congress; justices, judges, commissioners, and referees; and positions in the Executive Schedule shall not be increased by the next comparability pay adjustment; to the Committee on Governmental Affairs.

● Mr. CHAFEE. Mr. President, last week, in announcing the Government's fight against inflation, President Carter called for voluntary wage restraints by all sectors of our economy, from assembly line workers to corporation presidents. Today I am introducing legislation that would enable Congress to make a meaningful response.

My bill would exempt all Members of Congress, along with the Vice President, certain members of the Judiciary, and persons on the Executive pay schedule, from any cost-of-living pay raise in 1978.

The President's call for voluntary restraints must be heeded by all groups of wage earners. Accordingly, it is the responsibility of Congress to set a firm example for those who look to Washington for guidance. This is a role that naturally falls to us, since we perhaps are the most visible single group of wage earners in the country. Our salary of $57,500 now places us in the top 2 percent of wage earners in the Nation.

Already, the President has taken the initiative to propose no more than a 5.5-percent pay increase for most Federal employees, and a freeze on the salaries of Presidential appointees and senior White House staff. I think that a 1-year pay freeze is a sacrifice Congress would also do well to make.

There is another reason why it is so fitting for us to take this voluntary step. That reason is the unique relationship between Congress and inflation, a link that goes much deeper than the question of how much American taxpayers must pay for congressional salaries. While Members of Congress may earn a rather insignificant portion of the national income, they are in the position of having greater influence and control over the national economy—and the rate of inflation—than any other single group of people. Indeed, Congress could probably take the blame for being the primary cause of inflation.

There is another point here which I think must be made. Since 1975, law has provided that Congress shall receive an automatic cost-of-living pay increase every year, as recommended by the President, without our having to lift a finger to get it. In fact, we cannot even turn it down short of passing a law.

I do not think that we should be automatically inflation proof. I firmly believe that Congress should be required to vote each year, up or down, on the necessity of a cost-of-living increase. This is not to say that these increases are not always justified. Executive, legislative, and judicial salaries must always be viewed in the light of private sector pay scales.

However, we have a situation now where the very group that is so responsible for the problem of inflation has insulated itself from its effects. The average American worker has neither control over the prices that are going up all around him, nor automatic protection of his wages from spiraling costs of living. Why should we take the easy road?

For so many years now inflation has been such a part of our economy that we seem to have forgotten that there are things we can do about it. Inflation is not some invisible hand over which we have no control, but rather it is the combined result of many independent actions. As each group within the economy fights and wins its own little battle against rising costs by demanding cost-of-living increases, we as a nation together are losing the war.

The bill I am introducing today lets Congress put itself on record, as we were able to do last year, on the question of a cost-of-living increase. We decided against it last year for some excellent reasons. Now, a year later, we have some very different, but equally persuasive arguments for doing the same.

Let us show that we are willing to do our part, with a voluntary sacrifice, in the battle against inflation. Let us follow in the example of the President, in the hopes that our fellow Americans will do the same.●

By Mr. CULVER (for himself and Mr. WALLOP):

S. 2987. A bill to extend the authority for carrying out conservation and rehabilitation programs on military reservations and certain public lands; to the Committee on Environment and Public Works.

SIKES ACT AMENDMENTS OF 1978

● Mr. CULVER. Mr. President, I am introducing today, along with my distinguished colleague from the State of Wyoming, Senator WALLOP, legislation to extend the authorization for appropriations for the Sikes Act.

This law, first enacted by Congress in 1960, authorized the Secretary of Defense to join with the Secretary of the Interior and appropriate State conservation agencies in conducting fish and wildlife conservation and public recreation programs on over 25 million acres of military lands located throughout the Nation. In 1974, Congress significantly expanded the scope of the act by directing the Secretaries of Agriculture and the Interior to develop similar Federal-State cooperative arrangements for conservation plans on lands under the jurisdiction of the Forest Service, the Bureau of Land Management, the National Aeronautics and Space Administration, and the Department of Energy. Included were specific requirements for improvement of wildlife habitat, range rehabilitation, and protection of endangered species.

This act was significant because it, for the first time, gave the States an equal

partnership with the Federal Government in developing recreational and conservation programs on Federal lands. However, during hearings by the Subcommittee on Resource Protection last November, it became apparent that, unfortunately, implementation of this program has fallen far short of congressional expectation. For instance, a study by the General Accounting Office concluded that neither the Defense Department nor the Interior Department has fully met the objectives of the law for military lands. Similarly, testimony by State fish and wildlife officials and national conservation groups indicated that the Forest Service and the Bureau of Land Management (BLM) hase also not devoted the necessary attention to this program.

Despite the problems with the implementation of the Sikes Act, the purposes of the law are nonetheless laudible, and funds for its implementation, which expire at the end of fiscal year 1978, should be renewed. Therefore, Senator WALLOP and I are introducing legislation to extend the authorization for the act through fiscal year 1982.

This legislation provides an annual authorization of $1.5 million to the Secretary of Defense and $4.5 million to the Secretary of the Interior for cooperative fish and wildlife conservation and public recreational programs on miiltary lands. In addition, a total of $70 million is provided for cooperative programs on BLM lands, and $170 million for programs on Forest Service lands.

During the subcommittee's hearings, we learned that a major factor impeding the successful implementation of the Sikes Act has been a lack of willingness on the part of the Office of Management and Budget to support the program. Accordingly, a provision of this reauthorization bill requires that in the event funds requested by an agency under the act are less than those authorized, the Secretary shall specifically set forth reasons for requesting the lesser amount.

The Subcommittee on Resource Protection is scheduled to consider this measure in the near future, and I believe it properly addresses many of the existing problems with the implementation of the Sikes Act.●

● Mr. WALLOP. Mr. President, today I am introducing a bill, along with Senator CULVER, which will reauthorize Public Law 93–452, commonly known as the Sikes Act. This program expires at the end of fiscal year 1978, and the Committee on Environment and Public Works must, therefore, reauthorize it prior to May 15, 1978.

Last year the Resource Protection Subcommittee of the Senate Environment and Public Works Committee held oversight hearings to decide if the Sikes Act should be reauthorized, and to examine the need for changes in the law. Those hearings brought a number of problems associated with this law to light, and also evinced strong support for reauthorization of the law. The bill being introduced today attempts to rectify some of the past problems with its implementation and to serve notice to the involved Federal agencies to implement, in conjunction with their other mandates, the necessary fish and wildlife conservation programs on certain Federal lands.

In 1960 Congress passed the Sikes Act to provide for fish and wildlife conservation programs on military lands operated by the Department of Defense. Title I authorized the Secretary of Defense to work with the Secretary of the Interior and appropriate State agencies to carry out a program of planning, development, maintenance, and coordination of wildlife, fish and game conservation, public recreation, and rehabilitation on military reservations. Today, that directive stands out as a farsighted move in accord with the increasing appreciation of the value of wildlife and recreation. The Department of Defense controls approximately 26 million acres of land. It should and does have an important role in fish and wildlife management and other nonconsumptive uses of its lands.

In 1974 Congress amended the original Sikes Act to include public lands under the jurisdiction of the U.S. Forest Service, Bureau of Land Management, National Aeronautics and Space Administration, and the Atomic Energy Commission. The law provided sound and specific direction for those agencies to develop Federal-State cooperative agreements for conservation plans. It included plans for improved wildlife habitat, range rehabilitation, and protection of endangered species.

During the course of our hearings, it became apparent that the full fish, wildlife and recreation potential of the 26 million acres of lands in military reservations has not been realized. This is probably because the administration has never requested any appropriations for the Secretary of Defense or the Secretary of Interior to carry out their duties under the Sikes Act. The Secretary of Interior has been able through his general appropriations budget to provide limited technical assistance to DOD installations, but these funds have been insufficient. Because DOD has never requested or received any appropriations for Sikes Act programs, it has had to rely on revenues accruing from hunting and fishing fees on military bases. While those fees are sizable, they fall far short of what is needed to enhance wildlife and recreation opportunities. According to a recent GAO report, there is an estimated $2 million backlog in unfunded fish and wildlife projects on military bases. While some military bases do have good fish and wildlife programs, generally DOD's fish and wildlife effort falls short of its potential. The American public could benefit greatly from increased wildlife and recreation opportunities on these bases.

Regarding title II, the State game and fish agencies testified that progress has been made since 1974 in developing cooperative management plans with the Forest Service and BLM, but that no Federal funds have ever been requested or provided under the Sikes Act. Fish and wildlife habitat management programs on public lands have historically been either underfunded or not funded at all, despite Federal laws recognizing the need for these resources. The State agencies and conservation groups all support the Sikes Act, and the States have worked long and hard formulating acceptable management plans in cooperation with the Forest Service and BLM. However, all of them expressed dismay over inadequate funding requests and appropriations for the Sikes Act. The original act was expected to mainly benefit BLM since BLM did not have the direction and authority to seek cooperative management agreements with State wildlife agencies as the Forest Service had. However, little has been done to implement these plans because the Administration has not requested and Congress has not appropriated adequate funds. In fiscal year 1978 the BLM was given $6.4 million for fish and wildlife research and management on more than 450 million acres of public lands, while the Forest Service received $34.6 million for 187 million acres of land. At the time of our hearing, 40 States had signed cooperative management agreements with the Forest Service, at an estimated cost of $30 million to implement in the first year. Eleven States had completed 52 habitat management plans in BLM, and estimated it would cost some $10 million to implement those the first year.

Title I of the reauthorization bill would provide funding authorization for the Department of Defense and the Department of Interior. The latter reauthorization amount is increased from present lands to provide for public recreation programs on DOD lands, to be developed in conjunction with HCRS. Title I provides the funding levels indicated as necessary by both the BLM and the Forest Service to implement the cooperative agreements signed to date. While the budget increases are significant, they reflect needs identified by both the States and Federal agencies. Since it became obvious during the course of hearings that sufficient funds for these programs are not available under other laws, this authority should prove adequate for implementing the purposes of this law. Since Federal agencies have in the past not requested funding under this law, this bill provides that the agency shall report to the Environment and Public Works Committee and the House Merchant Marine Committee whenever its appropriations are less than those authorized under the act. Furthermore, the bill has incorporated provisions suggested by the Federal agencies which would coordinate the BLM and Forest Service Sikes Act programs with planning undertaken for other Federal mandates, notably the Federal Land Policy and Management Act. The agencies for their part have stated they recognize the importance of the Sikes Act in providing specific direction for cooperative wildlife programs, and are in full agreement with that direction.

Mr. President, Federal lands are and will continue to be under increasing pressure as the desire and support for both outdoor recreation and wildlife preservation grows as anticipated. We

need to provide more and better recreational and hunting opportunities, and to coordinate our resource management programs. The Sikes Act is intended to create the means by which State wildlife agencies and Federal land management agencies can cooperatively maintain and improve wildlife and fish habitat, and recreational opportunities in the case of the military. Since it is the responsibility of the Federal Government to provide suitable habitat, and the responsibility of the States to manage and protect wildlife species and license sportsmen, a cooperative approach is essential. The Sikes Act wisely makes the States full partners in developing its goals, and has prompted at least some initial steps toward fulfilling its goals. I hope that Congress will see fit to reauthorize this bill and insure that it is carried out in the full spirit of the law.●

By Mr. HELMS:

S. 2989. A bill to provide procedures for review of the conduct of each justice and judge of the United States to determine that such conduct is consistent with the good behavior required by article III, section 1 of the Constitution, and for other purposes; to the Committee on the Judiciary.

JUDICIAL INDEPENDENCE AND INTEGRITY ACT OF 1978

Mr. HELMS. Mr. President, the independence of the judiciary is a fundamental premise of a just legal system in a democratic society. However, under our constitutional system of separation of powers, independence does not mean complete insulation from all criticism or review. No stronger defender of judicial independence among the founding fathers can be found than Alexander Hamilton in the Federalist. Yet Hamilton was quick to point out that the independence of the judiciary was dependent not only on a system of separation of powers, but upon the good character of the judges themselves.

Under the plan of the Constitution, the judiciary was to be a separate and equal branch of Government, and judges themselves were to be free from the corrupting influences of society. Not only was the judiciary to be independent, but the individual character of the judges was to be guarded. Judges receive a substantial compensation which cannot be diminished, they enjoy life tenure in office, and they are protected from civil liability when an error in their judgment may prove disasterous to an innocent party. However, the greatest protection of the Federal judiciary is the respect and good standing in which the judiciary is held by the American people. The foundation of this respect is the fine character and good behavior of our Federal judges.

While the Founding Fathers provided that Justices of the United States and later all Federal judges were to enjoy lifetime tenure in their offices, such tenure was conditioned upon each judge's "good behavior." The "good behavior" standard was for the Founding Fathers a two-edged sword that would protect the judiciary from the encroachments of other branches of Government and also protect the people from a biased, arrogant, or corrupt judiciary. As Hamilton wrote in the Federalist:

> The standard of good behavior for the continuance in office of the judicial magistracy is certainly one of the most valuable of the modern improvements in the practice of government. In a monarchy it is an excellent barrier to the depotism of the prince: In a republic it is a no less excellent barrier to the encroachments and oppressions of the representative body. And it is the best expedient which can be devised in any govcrnment, to secure a steady, upright, and impartial administration of the laws.

Mr. President, the most important aspect of the legislation which I am introducing today is the procedure by which the conduct of every judge and justice of the United States will be periodically reviewed. The knowledge that each judge's conduct in office will be open to examination will in itself do much to prevent abuse of office. I do not have any illusions that the legislation I am introducing will suddenly make impeachment a less cumbersome or time-consuming procedure than the Founding Fathers intended. Nor is it my intention that the number of impeachments be increased as a result of my bill. But, the fact that a judge's conduct on the bench will be examined should beneficially reduce the potential necessity to implement the impeachment process itself in the future.

The advice of former U.S. Circuit Court of Appeals Judge Maris regarding review of judicial conduct and the independence of the Federal judiciary is worth noting. Judge Maris stated:

> I believe it is perhaps salutary from time to time to have somebody looking over your shoulder. I don't see how any judge need fear any such provision if he is conducting himself properly. As a matter of fact, it seems to me our history teaches that judges receive great consideration in their conduct and in their work. They are regarded highly, as a group, and perhaps too often derelictions which may well be small are overlooked by the public. I just don't fear that this would be any real threat to the independence of the judiciary.

I have, therefore, introduced legislation that would maintain the traditional responsibility of the House of Representatives regarding the removal of members of the Federal judiciary. My legislation provides that the House Judiciary Committee undertake a survey of the official conduct of every judge and Justice of the United States at the conclusion of each 8 years such judge serves in office. The review would be automatic and not dependent upon any prior showing that the judge has violated any judicial standard of good behavior. Should the House Judiciary Committee in its routine investigation of a judge, determine that he has violated the standard of good behavior, the committee would undertake a hearing into the matter at which the judge would be entitled to be present with counsel.

Both the Senate and the House Judiciary Committees would be empowered to receive complaints regarding judicial behavior from the public. If the Senate Judiciary Committee found that a complaint was not frivolous, it would refer the matter to the House Judiciary Committee for action under its rules governing impeachment proceedings. Although my legislation sets up procedures to conduct such an inquiry it is not intended as a substitute for existing procedures. Rather, it is intended to serve as an additional mechanism for the constitutional oversight responsibility of the House of Representatives and Senate.

Mr. President, the Congressional Research Service of the Library of Congress has prepared an excellent analysis of the impeachment power in regard to members of the judiciary. In the interest of brevity, I ask unanimous consent that the following portion of "The Constitution of the United States of America: Analysis and Interpretation" be printed in the RECORD at this point and that following it the text of the "Judicial Independence and Integrity Act of 1978" be printed in the RECORD.

There being no objection, the excerpt and bill were ordered to be printed in the RECORD, as follows:

EXCERPT

Judges.—Article III, § 1, specifically provides judges with "good behavior" tenure but the Constitution nowhere expressly vests the power to remove upon bad behavior; it has been assumed that judges are made subject to the impeachment power through being labeled "civil officers." The records in the Convention make this a plausible though not necessary interpretation. And in fact nine of the twelve impeachments reaching trial in the Senate have been directed at federal judges. So settled apparently is the interpretation that the major arguments, scholarly and political, have concerned the question whether judges, as well as others, are subject to impeachment for conduct which does not constitute an indictable offense and the question whether impeachment is the exclusive removal device with regard to judges.

IMPEACHABLE OFFENSES

The Convention came to its choice of words describing the grounds for impeachment after much deliberation but the phrasing derived directly from the English practice. The framers early adopted, on June 2, a provision that the Executive should be removable by impeachment and conviction "of malpractice or neglect of duty." The Committee of Detail reported as grounds "Treason (or) Bribery or Corruption." And the Committee of Eleven reduced the phrase to "Treason, or bribery." On September 8, Mason objected to this limitation, observing that the term did not encompass all the conduct which should be grounds for removal; he therefore proposed to add "or maladministration" following "bribery." Upon Madison's objection that "[s]o vague a term will be equivalent to a tenure during pleasure of the Senate", Mason suggested "other high crimes and misdemeanors", which was adopted without further recorded debate. The phrase in the context of impeachments has an ancient English history, first turning up in the impeachment of the Earl of Suffolk in 1388.

Treason is defined in the Constitution: bribery is not but it had a clear common law meaning and is now well covered by statute. High crimes and misdemeanors, however, is an undefined and indefinite phrase, which, in England, had comprehended conduct not constituting indictable offenses. In an unrelated action, the Convention had seemed to understand the term "high misdemeanor" to be quite limited in meaning, but debate prior to adoption of the phrase and comments thereafter in the ratifying conventions were to the effect that the President at least, and all the debate was

in terms of the President, should be removable by impeachment for commissions or omissions in office which were not criminally cognizable. And in the First Congress' "removal" debate, Madison maintained that the wanton removal from office of meritorious officers would be an act of maladministration which would render the President subject to impeachment. Other comments, especially in the ratifying conventions, tend toward a limitation of the term to criminal, perhaps gross criminal, behavior. While conclusions may be drawn from the conflicting statement, it must always be recognized that a respectable case may be made for either view.

Practice over the years, however, insofar as the Senate deems itself bound by the actions of previous Senates, would appear to limit the grounds of conviction to indictable criminal offenses for all officers with the possible exception of judges. . . .

With regard to federal judges, however, several successful impeachments in this Century appear to establish that the constitutional requirements of "good behavior" and "high crimes and misdemeanors" may conjoin to allow the removal of judges who have engaged in seriously questionable conduct although no specific criminal statute may have been violated. Thus, both Judge Archbald and Judge Ritter were convicted on articles of impeachment which charged questionable conduct which probably did not amount to indictable offenses.

S. 2989

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Judicial Independence and Integrity Act of 1978".

SENATE PROCEDURES FOR COMPLAINTS REGARDING THE CONDUCT OF A JUDGE OR JUSTICE

SEC. 2. (a) Any person may file a written complaint with the Committee on the Judiciary of the Senate alleging that the conduct of a judge or justice of the United States is inconsistent with the good behavior required by article III, section 1, of the Constitution.

(b) The Committee on the Judiciary of the Senate (hereinafter in this section referred to as the "Committee") shall return to the complainant any complaint which it finds outside its jurisdiction, frivolous, insufficient in law or fact, or which relates to the contents or merits of any substantive or procedural ruling of that judge. The returned complaint shall be accompanied by a brief letter of explanation over the signature of the Chairman as to why no further action by the Committee is warranted.

(c) The Committee shall make a preliminary investigation with respect to any complaint not returned under subsection (b) and shall make a written report of the results of that investigation. The judge or justice who is the subject of the complaint shall be notified of the commencement of the investigation and of his right to submit to the Committee a written statement on his own behalf.

(d)(1) If, after completion of the preliminary investigation and review of the report, the Committee determines that there is sufficient cause to believe that the conduct of the judge or justice may be inconsistent with the good behavior required by article III, section 1, of the Constitution, it shall refer the complaint, a copy of the written report, and any statement submitted by the judge or justice on his own behalf, to the Committee of the Judiciary of the House of Representatives for further investigation in accordance with section 3.

(2) Any complaint not referred to the Committee of the Judiciary of the House of Representatives under paragraph (1) shall be returned to the complainant, accompanied by a brief letter of explanation over the signature of the Chairman as to why no further action by the Committee is warranted.

(e) The contents of any complaint investigated under subsection (c), the contents of any report made by the Committee and the contents of any statement submitted by a judge or justice under subsection (c), shall remain confidential until the Committee refers such materials under subsection (d) (1) to the Committee on the Judiciary of the House of Representatives for further investigation.

(f) The Committee shall adopt such rules and procedures as are necessary to carry out the expeditious processing of complaints under this section.

HOUSE OF PROCEDURES FOR COMPLAINT REGARDING THE CONDUCT OF JUDGE OR JUSTICE

SEC. 3. (a) Upon receipt of any complaint, report, and accompanying statement referred to it under section 2(d)(1), the Committee of the Judiciary of the House of Representatives (hereinafter in this section referred to as the "Committee") shall give the judge or justice who is the subject of such complaint and report notice of the commencement of its investigation, and of his right, upon request, to a hearing before the Committee. Such hearing shall be a matter of public record.

(b) Whenever any judge or justice requests a hearing under subsection (a), he shall be given adequate notice of the place and date of such hearing, shall be admitted to such hearing, may be represented by counsel, offer evidence on his own behalf, and confront and cross-examine any witness against him.

(c) After completion of its investigation and hearing, if any, the Committee shall make a written report which shall include the results of its investigation, a transcript of the hearing, if any, and a recommendation as to what action, if any, the House should take pursuant to article I, section 3 of the Constitution.

EIGHT YEAR REVIEW BY HOUSE JUDICIARY COMMITTEE

SEC. 4. (a) The Committee of the Judiciary of the House of Representatives (hereinafter in this section referred to as the "Committee") is authorized and directed to review the conduct of each judge and justice of the United States to determine that such conduct is consistent with the good behavior required under article III, section 1 of the Constitution. Such review shall be conducted once every eight years each such judge or justice serves in office.

(b)(1) Whenever the Committee, after review under subsection (a), finds that the behavior of such judge or justice is consistent with the good behavior required by article III, section 1 of the Constitution, the Committee shall file a report with the Speaker of the House of Representatives and the President of the Senate stating such findings.

(2) Whenever the Committee, after review under subsection (a), determine that there is sufficint cause to believe that the conduct of such judge or justice may be inconsistent with the good behavior required by article III, section 1 of the Constitution, it shall notify such judge or justice of the commencement of an investigation into such conduct, and of his right, upon request, to a hearing before the Committee. Such hearing shall be a matter of public record. The Committee shall then proceed according to the provisions of section 3 (b) and (c) of this Act.

(c) The Committee shall adopt such rules and procedures as are necessary to carry out the provisions of this section and section 3 of this Act.

DEFINITIONS

SEC. 5. (a) Conduct which may be deemed to be inconsistent with the good behavior required by article III, section 1 of the Constitution includes, but is not limited to, willful misconduct in office, willful and persistent failure to perform duties of the office, abuse of the powers of office, habitual intemperance, or other conduct prejudicial to the administration of justice that brings the judicial office into disrepute.

(b) The term "judge or justice" means a judge or justice of the United States as defined in section 451, title 28, of the United States Code.

VACANCIES

SEC. 6. Whenever a vacancy results due to the resignation or removal of a judge or justice, the President shall be notified of such vacancy. The President shall, by and with the advice and consent of the Senate, appoint a successor to fill such vacancy.

EFFECT UPON OTHER PROCEDURES

SEC. 7. The provisions of this Act shall be in addition to, and not in lieu of, any rules or procedures of either House of Congress established pursuant to the Constitution with respect to the impeachment and removal from office of a judge or justice of the United States, and shall not be construed to limit or abridge such rules or procedures.

APPLICABILITY

SEC. 8. The provisions of this Act shall apply to any judge or justice of the United States holding office on the date of the enactment of this Act, or any individual appointed to hold the office of judge or justice of the United States after the date of enactment of this Act.

By Mr. CHURCH (for himself, Mr. STONE, Mr. LONG, Mr. DOLE, Mr. CURTIS, Mr. MATSUNAGA, Mr. YOUNG, Mr. HANSEN, Mr. HAYAKAWA, Mr. WALLOP, Mr. ANDERSON, Mr. MELCHER, Mr. INOUYE, Mr. JOHNSTON, Mr. CHILES, Mrs. HUMPHREY, Mr. BAYH, Mr. MARK O. HATFIELD, Mr. MCCLURE, Mr. TOWER, Mr. ZORINSKY, Mr. RIEGLE, Mr. BURDICK, Mr. BENTSEN, Mr. DECONCINI, Mr. DOMENICI, Mr. GRIFFIN, and Mr. SCHMITT):

S. 2990. A bill to implement the international sugar agreement between the United States and foreign countries; to protect the welfare of consumers of sugar and of those engaged in the domestic sugar-producing industry; to promote the export trade of the United States; and for other purposes; to the Committee on Finance.

SUGAR STABILIZATION ACT OF 1978

● Mr. CHURCH. Mr. President, I am joined today by 27 of my colleagues in introducing the Sugar Stabilization Act of 1978. Hopefully, the introduction of this legislation will lead to the adoption of a workable domestic sugar program which will complement the International Sugar Agreement (ISA).

The ISA was negotiated among more than 70 sugar producing and consuming countries in an effort to stabilize world sugar prices. The gyrations of the world market over the past few years—as high as 70 cents a pound a few years ago and recently as low as 7 cents—led many countries to agree to a cooperative effort to bring some order to the chaotic world sugar market.

The ISA is designed to keep world sugar prices within a price corridor of from 11 to 21 cents per pound, raw sugar equivalent. United States prices would be somewhat higher due to transportation costs and other expenses. When the world price for sugar is below 15 cents per pound, participating countries would be required to reduce their basic export quotas, established under the ISA, on a percentage basis and build reserve stocks of sugar. A fee is to be collected on each international sugar transaction to finance the accumulation and storage of these reserve stocks. When the world price is between 15 and 19 cents, the free trade range under the ISA, each nation may export its full quota plus any sugar not in reserve stocks.

Should the world price of sugar exceed 19 cents, one-third of the reserve stocks may be exported for each penny the price rises above the free trade range. The ISA is now being considered by the Senate Foreign Relations Committee.

On the domestic front, many will recall the ill-fated direct payments program instituted by the administration in an attempt to aid domestic sugar growers. Congress later replaced the payments program by adopting legislation, similar to that which I first introduced in the Senate, which established an import management program. That provision, known as the de la Garza amendment in honor of its House sponsor, expires at the end of the 1978 crop year.

Since it is clear that the ISA will not reach the floor price of its price corridor, much less the free trade range objective, before the de la Garza amendment expires, some action must be taken during this session of Congress to prevent our sugar growers from being caught in the void. The bill I am introducing today will prevent that from happening.

When the ISA was finally negotiated last fall, I pointed out to administration officials that our sugar growers could not put all their eggs in the ISA basket. The track record of international commodity agreements is not one that instills confidence. In order to assure U.S. growers a dependable price, I suggested that the administration propose a domestic sugar program to back up the ISA and replace the expiring interim program contained in the de la Garza amendment.

This February, I held hearings of the Senate Foreign Relations Committee on the ISA and U.S. sugar policy in Burley, Idaho, in the heart of Idaho's beet country. Sugar beet growers and processors from across the country uniformly endorsed the ratification of the ISA by the Senate—but only on one condition. They wanted a domestic backup program in place should the ISA fail.

Administration witnesses from the Departments of State and Agriculture were not prepared at those hearings to offer proposals for a domestic sugar program or even to endorse the concept of a backup program. As a result, I postponed further hearings on the ISA until such time as the administration came up with a proposal. Over 5 months have passed. To date, no such proposal has been forthcoming.

It is apparent that Congress must again take the initiative on behalf of our Nation's sugar growers and refiners.

Mr. President, the problems facing our domestic sugar growers are clear. The need to maintain a viable domestic sugar industry is well understood. The fact that there are no simple solutions should not prevent us from seeking to develop a workable domestic sugar program.

The Senate Agriculture Committee recognized the need to address the problems of the sugar grower by devoting a full day's hearings to sugar during the committee's extended consideration of the overall farm problem. As a corollary to the hearings held by the Agriculture Committee and the Senate Foreign Relations Committee, Senator STONE, chairman of the Subcommittee on Foreign Agricultural Policy, helped organize a series of open meetings for all interested parties to discuss various options for a domestic sugar program. Senator STONE's initiative is to be commended for it led, in large part, to the introduction of this legislation.

In addition, the U.S. International Trade Commission recently culminated a 5-month investigation on sugar at the request of the President, their second such investigation in the last 18 months. The Commission concluded that imports of sugar are materially interfering with our domestic sugar industry and the Commissioners unanimously agreed that refinements in our management of sugar imports are called for.

Mr. President, if this problem is analyzed any longer, without action, our sugar industry will waste away. Then, the sugar problem will reappear with a vengeance, once we become totally dependent on foreign countries for our supply of sugar.

Mr. President, I am pleased that our distinguished colleagues on the Senate Finance Committee have announced that hearings on the Sugar Stabilization Act of 1978 will be held on May 8. Many members of the committee have joined as cosponsors of this legislation and look forward to working with the able chairman of the full committee, Senator LONG, and the distinguished chairman of the Subcommittee on Sugar and Tourism, Senator MATSUNAGA, in an effort to pass a workable domestic sugar program during this session of Congress. Their strong commitment to helping our beleagured sugar growers is commendable.

Mr. President, the Sugar Stabilization Act of 1978 establishes a price objective for sugar equal to the midpoint of the free trade range defined in the ISA, around 17 cents per pound, raw value. This figure would be adjusted periodically to reflect changing economic conditions. The price objective for domestic producers is to be achieved through: First, the collection of import fees on imports entering at prices below the midpoint of the free trade range, and second, the establishment of import quotas, adjusted periodically, to meet U.S. sugar demands.

The program involves no payments to producers and no controls on the domestic production of sweeteners from sugarbeets, sugarcane, or corn. In a year in which the U.S. imports 4 million tons of sugar, a 1-cent per pound import fee would add $80 million to the U.S. Treasury. The cost of the act will be borne by sugar purchasers, primarily industrial users, and will not cost taxpayers any money. Moreover, consumers are provided added protection in the proposal by a provision suspending all import controls and fees if the domestic price exceeds the price objective by 20 percent for 20 market days.

Mr. President, I ask unanimous consent that a section-by-section analysis of the Sugar Stabilization Act of 1978 be printed at this point in the RECORD, together with the text of the bill.

There being no objection, the bill and analysis were ordered to be printed in the RECORD, as follows:

S. 2990

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Sugar Stabilization Act of 1978."

DECLARATION OF POLICY

SEC. 2. It is hereby declared to be the policy of Congress—

(a) To maintain a viable domestic sugar producing industry capable of continuing to provide the larger part of the sugar consumed in the United States;

(b) To protect the welfare of consumers and producers by providing such supplies of sugar as will be consumed at fair prices in the United States and in the world market;

(c) To achieve these prices and supply objectives through cooperation with sugar producing and consuming countries under the export quota system of the International Sugar Agreement and the operation of a complementary import management program for the United States market; and

(d) To promote the export trade of the United States with sugar producing countries of the world.

TITLE I—INTERNATIONAL SUGAR AGREEMENT

SEC. 101. The President is hereby authorized—

(a) To prohibit the importation into the United States of any sugar from any country, territory or area which is not a member of the International Sugar Organization;

(b) To prohibit the entry into the United States of any quantity of sugar which is not accompanied by a valid certificate of contribution to the stock financing fund and other documentation as may be required by the International Sugar Agreement;

(c) To require the keeping of such records, statistics, and other information, and the rendering of such reports, relating to the importation, distribution, prices, and consumption of sugar as he may from time to time prescribe;

(d) To take such other action and issue such rules and regulations, which shall have the force and effect of law, as he may consider necessary or appropriate to implement the obligation of the United States under the International Sugar Agreement; and

(e) To exercise any of the powers and duties conferred on him under this Title I through such department, agency, or officer of the United States as he may direct.

SEC. 102. Any person failing to make any report or keep any record as required by or pursuant to section 101, or making any false report or record or knowingly violating any rule or regulation issued by the President

pursuant to section 101, shall, upon conviction, be punished by a fine of not more than $1,000 for each such violation.

SEC. 103. The President shall submit to the Congress an annual report on the International Sugar Agreement. Such report shall contain full information on the operation of the Agreement, including full information with respect to the general level of prices of sugar and relationship to any domestic program of the United States for sugar. The report shall also include a summary of the actions the United States and the International Sugar Organization have taken to protect the interests of United States consumers and producers.

TITLE II—DOMESTIC SUGAR PROGRAM

SUBTITLE A—DEFINITIONS

SEC. 201. For the purpose of this Act—

(a) The term "person" means an individual, partnership, corporation or association.

(b) The term "sugars" means any grade or type of saccharine product derived from sugarcane or sugar beets, which contain sucrose, dextrose, or levulose.

(c) The term "sugar" means raw sugar or direct-consumption sugar.

(d) The term "raw sugar" means any sugars, whether or not principally of crystalline structure, which are to be further refined or improved in quality to produce any sugars principally of crystalline structure or liquid sugar.

(e) The term "direct-consumption sugar" means any sugar principally of crystalline structure and any liquid sugar which are not to be further refined or improved in quality.

(f) The term "liquid sugar" means any sugars (exclusive of sirup of cane juice produced from sugarcane grown in continental United States) which are principally not of crystalline structure and which contain, or which are to be used for the production of any sugars principally not of crystalline structure which contain, soluble nonsugar solids (excluding any foreign substances that may have been added or developed in the product) equal to 6 per centum or less of the total soluble solids.

(g) Sugars in dry amorphous form shall be considered to be principally of crystalline structure.

(h) The "raw value" of any quantity of sugars means its equivalent in terms of ordinary commercial raw sugar testing ninety-six sugar degrees by the polariscope, determined in accordance with regulations to be issued by the Secretary. The principal grades and types of sugar and liquid sugar shall be translated into terms of raw value in the following manner:

(1) For direct-consumption sugar, derived from sugar beets and testing ninety-two or more sugar degrees by the polariscope, by multiplying the number of pounds thereof by 1.07;

(2) For sugar, derived from sugarcane and testing ninety-two sugar degrees by the polariscope, by multiplying the number of pounds thereof by 0.93;

(3) For sugar, derived from sugarcane and testing more than ninety-two sugar degrees by the polariscope, by multiplying the number of pounds thereof by the figure obtained by adding to 0.93 the result of multiplying 0.0175 by the number of degrees and fractions of a degree of polarization above ninety-two degrees;

(4) For sugar and liquid sugar, testing less than ninety-two sugar degrees by the polariscope, by dividing the number of pounds of the "total sugar content" thereof by 0.972;

(5) The Secretary may establish rates for translating sugar and liquid sugar into terms of raw value for (a) any grade or type of sugar or liquid sugar not provided for in the foregoing and (b) any special grade or type of sugar or liquid sugar for which he determines that the raw value cannot be measured adequately under the provisions of paragraphs (1) to (4), inclusive, of this subsection.

(i) The term "total sugar content" means the sum of the sucrose and reducing or invert sugars in any grade or type of sugar or liquid sugar.

(j) The term "quota" means that quantity of sugar or liquid sugar, or that quantity of sugar-containing products, which may be brought in or imported into the United States, for consumption therein, during any calendar year, from foreign countries.

(k) The term "International Sugar Agreement" means the agreement entered into between the United States and foreign countries in 1977 and ratified by the United States Senate.

(l) The term "price range for free trade sugar" means the range between the price at which all quota restrictions must be suspended and the price at which special stocks of sugar must first be made available for sale and delivery to the free market, in accordance with the provisions of Article 44 of the International Sugar Agreement as in effect on the date of ratification of such agreement by the United States Senate.

(m) The term "Secretary" means the Secretary of Agriculture.

(n) The term "United States" means the States, the District of Columbia and Puerto Rico.

SUBTITLE B—QUOTA PROVISIONS

ANNUAL ESTIMATE OF CONSUMPTION IN CONTINENTAL UNITED STATES

SEC. 202(a) The Secretary shall determine for each calendar year the amount of sugar needed to meet the requirements of consumers in the United States, to maintain and protect the domestic sugar-producing industry, and to attain on an annual average basis the price objective set forth in subsection (b). Such determination shall be made during October of the year preceding the calendar year for which the determination is being made and at such other times during the calendar year as may be required to attain the objectives of this subsection: *Provided*, That the determination for the calendar year 1978 shall be made and published in the Federal Register within fifteen days after the effective date of this Act.

(b) The price objective referred to in subsection (a) is a price for raw sugar equal to the median of the price range for free trade sugar under the International Sugar Agreement. Such price objective shall be adjusted for each calendar quarter within thirty days after the end of such quarter, so as to maintain the same ratio between the price objective and the average of the parity index (1967=100) and the wholesale price index (1967=100) for the quarter ratio that existed between (1) the price objective, and (2) the simple average of such indices for the 12 calendar months immediately preceding the date of enactment of this Act.

(c) For purposes of subsection (b)—

(1) The term "parity index (1967=100)" means the Index of Price Paid by Farmers for Commodities and services, including Interest, Taxes, and Farm Wage Rates, as published monthly by the Department of Agriculture.

(2) The term "wholesale price index" means such index as determined monthly by the Department of Labor.

QUOTA FOR FOREIGN COUNTRIES

SEC. 203. (a) Whenever a determination is made, pursuant to section 202, of the amount of sugar needed to meet the requirements of consumers, the Secretary shall establish a global sugar quota, or revise the existing quota, for foreign countries as a group. The amount of such quota shall be the amount by which such determination exceeds the amount of domestically produced sugar which the Secretary determines will be available for marketing during the calendar year: *Provided*, That the quota for the calendar year 1978 shall be reduced by (1) the excess carryover stocks of sugar from 1977 and (2) the amount of sugar imported into the United States from foreign countries during 1978 prior to the establishment of such quota.

(b) Notwithstanding any other provision of this Act, the Secretary is authorized to limit, on a quarterly basis, the importation of sugar within the quota for foreign countries during any year if he determines that such limitation is necessary to achieve the price objective of the Act: *Provided*, That the Secretary shall so limit the importation of sugar within such quota at any time during the calendar year when the simple average of prices of raw sugar, adjusted for freight to New York and the applicable tariff and fees, for twenty consecutive market days is 5 per centum or more below the price objective determined pursuant to section 202.

(c) The quantity authorized to be imported from any country under this section may be filled only with sugar produced from sugar beets or sugarcane grown in such country.

ADJUSTMENTS IN QUOTA FOR FOREIGN COUNTRIES

SEC. 204. The Secretary shall, whenever the facts are ascertainable by him, determine whether, in view of the current inventories of sugar, the estimated production from the acreage of sugarcane or sugar beets planted, and other pertinent factors, the quantity of domestically produced sugar available for marketing during the calendar year will be less than the quantity determined in establishing the quota for foreign countries under section 203. Whenever the Secretary makes such determination, he shall increase the quota for foreign countries under section 203 by the amount of such deficit. In determining and allocating such deficits the Secretary shall act to provide at all times throughout the calendar year the full distribution of the amount of sugar which he has determined to be needed under section 202 of this Act to meet the requirements of consumers.

IMPORT FEE

SEC. 205. Whenever the simple average of the daily prices for raw sugar, adjusted for freight to New York and the applicable tariff and fees, is below the price objective determined pursuant to section 202 for twenty consecutive market days, the Secretary shall, as a condition for importing sugar under section 203, establish an import fee as provided in this section: *Provided*, That the Secretary may establish such fee at any time during the first twenty market days after the date of enactment of this Act. The fee shall be such amount as the Secretary determines will, when added to the daily price for raw sugar, adjusted as provided above, achieve the price objective determined pursuant to section 202. The fees shall be adjusted from time to time, but not more frequently than once each quarter as may be required to achieve the purpose of this section. Such fee shall be imposed on a per pound, raw value, basis, and shall be applied uniformly. Any funds collected as import fees pursuant to this section shall be covered into the Treasury as miscellaneous receipts.

IMPORTATION OF DIRECT-CONSUMPTION SUGAR

SEC. 206. (a) Except as provided in subsection (c) of this section, none of the quota established for foreign countries may be filled by direct-consumption sugar.

(b) The limitations imposed by this section, and the enforcement provisions of Title II applicable thereto, shall continue in effect and shall not be subject to suspension pursuant to the provisions of section 306 of this Act unless the President acting thereunder specifically finds and proclaims that a

national economic or other emergency exists with respect to sugar or liquid sugar which requires the suspension of the direct-consumption limitation of this section.

(c) Notwithstanding any other provisions of this Act, whenever the Secretary, after public rulemaking procedure, makes a finding that a lack of raw sugar refining capacity within the United States has created an imminent shortage of direct-consumption sugar for consumers in the United States, he may permit as much of the quota for foreign countries established under this Act to be filled on a temporary basis with direct-consumption sugar as is necessary to meet such imminent shortage.

SUSPENSION OF QUOTA AND FEES

SEC. 207. Whenever the Secretary finds that the simple average of the daily prices for raw sugar, adjusted for freight to New York and the applicable tariff and fees, exceeds by more than twenty per centum the current price objective determined pursuant to section 202 for twenty consecutive market days, he shall suspend the quota and any import fee established pursuant to section 203. Whenever the Secretary finds that the simple average of the daily price of raw sugar, adjusted as provided above, is less than twenty per centum above the current price objective determined pursuant to section 202 for twenty consecutive market days, he shall thereupon reestablish such quota and import fees as may be required to achieve such price objective.

SUGAR-CONTAINING PRODUCTS

SEC. 208. (a) If the Secretary determines that the prospective importation or bringing into the United States of any sugar-containing product or mixture or beet sugar molasses will substantially interfere with the attainment of the objectives of this Act, he may limit the quantity of such product, mixture, or beet sugar molasses to be imported or brought in from any country or area to a quantity which he determines will not so interfere: *Provided*, That the quantity to be imported or brought in from any country or area in any calendar year shall not be reduced below the average of the quantities of such product, mixture, or beet sugar molasses annually imported or brought in during such three-year period as he may select for which reliable data of the importation or bringing in of such product, mixture, or beet sugar molasses are available.

(b) In the event the Secretary determines that the prospective importation or bringing into the United States of any sugar-containing product or mixture or beet sugar molasses will substantially interfere with the attainment of the objectives of this Act and there are no reliable data available of such importation or bringing in of such product, mixture, or beet sugar molasses for three consecutive years, he may limit the quantity of such product, mixture, or beet sugar molasses to be imported or brought in annually from any country or area to a quantity which the Secretary determines will not substantially interfere with the attainment of the objectives of the Act. In the case of a sugar-containing product or mixture, such quantity from any one country or area shall not be less than a quantity containing one hundred short tons, raw value, of sugar or liquid sugar.

(c) In determining whether the actual or prospective importation or bringing into the United States of a quantity of a sugar-containing product or mixture will or will not substantially interfere with the attainment of the objectives of this Act, the Secretary shall take into consideration the total consideration the total sugar content of the product or mixture in relation to other ingredients or to the sugar content of other products or mixtures for similar use, the costs of the mixture in relation to the costs of its ingredients for use in the United States, the present or prospective volume of importations relative to past importations, the type of packaging, whether it will be marketed to the ultimate consumer in the identical form in which it is imported or the extent to which it is to be further subjected to processing or mixing with similar or other ingredients, and other pertinent information which will assist him in making such determination. In making determinations pursuant to this section, the Secretary shall conform to the rulemaking requirements of section 4 of the Administrative Procedure Act.

(d) Notwithstanding the foregoing provisions of this section, the Secretary shall each year, beginning with the calendar year 1979, limit the quantity of sweetened chocolate, candy, and confectionery provided for in items 156.30 and 157.10 of part 10, schedule 1, of the Tariff Schedules of the United States which may be entered, or withdrawn from warehouse, for consumption in the United States as hereinafter provided. The quantity which may be so entered or withdrawn during any calendar year shall be determined in the fourth quarter of the preceding calendar year and the total amount thereof shall be equivalent to the larger of (1) the average annual quantity of the products entered, or withdrawn from warehouse, for consumption under the foregoing items of the Tariff Schedules of the United States for the three calendar years immediately preceding the year in which such quantity is determined, or (2) a quantity equal to 5 per centum of the amount of sweetened chocolate and confectionery of the same description of United States manufacture sold in the United States during the most recent calendar year for which data are available. The total quantity to be imported under this subsection may be allocated to countries on such basis as the Secretary determines to be fair and reasonable, taking into consideration the past importations or entries from such countries. For purposes of this subsection the Secretary shall accept statistical data of the United States Department of Commerce as to the quantity of sweetened chocolate and confectionery of United States manufacture sold in the United States.

PROHIBITED ACTS

SEC. 209. All persons are hereby prohibited—

(a) From bringing or importing into the United States from foreign countries, or any other area outside the United States, any sugar or liquid sugar, or sugar-containing product, after the applicable quota has been filled.

(b) From bringing or importing into the Virgin Islands for consumption therein, any sugar or liquid sugar in excess of one hundred pounds in any calendar year produced from sugarcane or sugar beets grown outside the United States;

(c) From exporting to any foreign country any sugar or liquid sugar produced from sugar beets or sugarcane grown in the United States or imported into the United States within the quota for foreign countries, except as provided in section 211.

SUBTITLE C—QUOTA—RELATED PROVISIONS

DETERMINATION IN TERMS OF RAW VALUE

SEC. 210. (a) The sugar determinations provided for in section 202 and all sugar quotas shall be made or established in terms of raw value.

(b) For the purposes of this title, liquid sugar shall be included with sugar in making the determinations provided for in section 202 and in the establishment or revision of sugar quotas.

EXPORTATION OF SUGAR

SEC. 211. (a) Sugar or liquid sugar entered into the United States under an applicable bond, established pursuant to orders or regulations issued by the Secretary for the express purpose of subsequently exporting the equivalent quantity of sugar or liquid sugar as such, or in manufactured articles, shall not be charged against the quota for foreign countries.

(b) Exportation within the meaning of sections 309 and 313 of the Tariff Act of 1930 shall be considered to be exportation within the meaning of this section.

INAPPLICABILITY OF QUOTA PROVISIONS

SEC. 212. The provision of this title shall not apply to (1) the first ten short tons, raw value, of direct consumption sugar or liquid sugar imported from any foreign country in any quota year; (2) the first ten short tons, raw value, of liquid sugar imported from any foreign country in any quota year for religious, sacramental, educational, or experimental purposes; (3) liquid sugar imported from foreign countries in individual sealed containers of such capacity as the Secretary may determine not in excess of one and one-tenth gallons each; or (4) any sugar or liquid sugar imported into the United States for the distillation of alcohol, including all polyhydric alcohols, or for livestock feed, or for the production of livestock feed, or for the production (other than distillation) of alcohol, including all polyhydric alcohols, but not including any such alcohol or resulting by products for human food consumption.

TITLE III—GENERAL PROVISIONS

REGULATIONS AND DETERMINATIONS

SEC. 301. (a) The Secretary is authorized to make such rules and regulations, which shall have the force and effect of law, as may be necessary to carry out the powers vested in him by this Act. Any person knowingly violating any rule or regulation of the Secretary issued pursuant to this Act shall, upon conviction, be punished by a fine of not more than $1,000 for each such violation.

(b) Each determination issued by the Secretary in connection with quotas under Title II shall be promptly published in the Federal Register and shall be accompanied by a statement of the bases and considerations upon which such determination was made.

JURISDICTION OF COURTS

SEC. 302. The several district courts of the United States are hereby vested with jurisdiction specially to enforce, and to prevent and restrain any person from violating the provisions of this Act or of any order or regulation made or issued pursuant to this Act and to review any regulation issued pursuant to this Act in accordance with chapter 7 of title 5, United States Code. If and when the Attorney General shall so request, it shall be the duty of the several district attorneys of the United States, in their respective districts, to institute proceedings enforce the remedies and to collect the penalties, fees and forfeitures provided for in this Act. The remedies provided for in this Act shall be in addition to, and not exclusive of, any of the remedies of penalties existing at law or in equity.

CIVIL PENALTIES

SEC. 303. Any person who knowingly violates, or attempts to violate, or who knowingly participates or aids in the violation of, any of the provisions of section 209 shall forfeit to the United States the sum equal to three times the market value, at the time of the commission of any such Act, of that quantity of sugar or liquid sugar by which any quota is exceeded, which forfeiture shall be recoverable in a civil suit brought in the name of the United States.

FURNISHING INFORMATION TO SECRETARY

SEC. 304. All persons engaged in the manufacturing, marketing or transportation or industrial use of sugar and other sweeteners, including those not derived from sugar beets

or sugarcane, and having information which the Secretary deems necessary to enable him to administer the provisions of this Act, shall, upon the request of the Secretary, furnish him with such information. Any person willfully failing or refusing to furnish such information or furnishing willfully any false information, shall upon conviction be subject to a penalty of not more than $2,000 for each such violation. All information required to be furnished to the Secretary under this section shall be kept confidential by all officers and employees of the Department of Agriculture.

INVESTMENTS BY OFFICIALS PROHIBITED

SEC. 305. No person shall, while acting in any official capacity in the administration of this Act, invest or speculate in sugar or liquid sugar, contracts relating thereto, or the stock or membership interests of any association or corporation engaged in the production of manufacturing of sugar or liquid sugar. Any person violating this section shall upon conviction thereof be fined not more than $10,000 or imprisoned not more than two years, or both.

PRESIDENTIAL QUOTA ACTIONS

SEC. 306. Whenever pursuant to the provisions of this Act the President finds and proclaims that a national economic or other emergency exists with respect to sugar or liquid sugar, he shall by proclamation suspend the operation of the provisions of title II, and, thereafter, the operation of such title shall continue in suspense until the President finds and proclaims that the facts which occasioned such suspension no longer exist. The Secretary shall make such investigations and reports thereon to the President as may be necessary to aid him in carrying out the provisions of this section.

SURVEYS AND INVESTIGATIONS

SEC. 307. (a) Whenever he determines such action is necessary to effectuate the purposes of this Act, the Secretary from time to time shall conduct such surveys and investigations as he deems necessary regarding the manufacturing, marketing, transportation, or industrial use of sugars. In carrying out the provisions of this subsection, information shall not be made public with respect to the separate operations of any person or company for whom such information has been derived.

(b) The Secretary is authorized to conduct surveys, investigations, and research relating to the conditions and factors affecting the methods of accomplishing most effectively the purposes of this Act. Notwithstanding any provision of existing law, the Secretary is authorized to make public such information as he deems necessary to carry out the provisions of this Act.

(c) The Secretary shall, whenever the New York Coffee and Sugar Exchange is prevented for any reason from quoting daily spot prices for raw sugar, determine and announce a daily spot price for raw sugar, adjusted for freight to New York and the applicable tariff.

TERMINATION

SEC. 308. The powers vested in the Secretary under this Act shall terminate on December 31, 1982.

SUGAR STABILIZATION ACT OF 1978

(A section-by-section analysis with explanatory notes)

DECLARATION OF POLICY

Sec. 2. Describes Congressional policy to: (a) maintain a viable domestic sugar industry; (b) protect consumer welfare by assuring sugar supplies at fair prices; (c) cooperate with other sugar importing and exporting nations; and (d) promote export trade.

TITLE I—INTERNATIONAL SUGAR AGREEMENT

This Title is simply authorizing legislation to enable the United States to participate in the International Sugar Agreement. It empowers the President, in accordance with the terms of the Agreement to:

Sec. 101. (a) prohibit importation of sugar from any country not a member of the International Sugar Organization, the body which administers the Agreement;

(b) prohibit importation of foreign sugar not accompanied by certain documentation (showing fees have been paid, etc.) prescribed in the Agreement;

(c) require record keeping and rendering of reports as may be prescribed by the Agreement;

(d) take other action appropriate to implement obligations of the U.S. under the Agreement;

(e) use whatever agencies or departments of the Government necessary to comply with the above.

Sec. 102 establishes a civil penalty for anyone violating Presidential rules and regulations set forth under Sec. 101 above.

Sec. 103 requires the President to make an annual report to the Congress on the Agreement, how it is working and what actions he has taken under this Act.

TITLE II—DOMESTIC SUGAR PROGRAM

Subtitle A. Definitions of some fourteen terms used in subsequent sections of the Act. They are reasonably simple, except where they are necessarily technical, and in virtually every instance have long legal and historic precedence in previous Sugar Acts. The only real exception is (1) the term "price range for free trade sugar" which refers to Article 44 of the International Sugar Agreement. The basic thrust of the ISA is the establishment of world sugar prices between 11¢ and 21¢ per pound, raw value, and the assignment of Basic Export Tonnages (BETs: quantitative controls on sugar exports) for each member country. When the world sugar price is in the 11¢–15¢ range, each exporting country's BET is reduced by a prescribed percentage and fees are collected on each sugar transaction to help finance the accumulation and storage costs of sugar held off the market. When the price of sugar reaches 15¢, each participating country may export its full BET and, should the price exceed 19¢, one-third of each nation's accumulated reserve stocks of sugar may be put on the market for each cent the price goes above 19¢. Thus, as currently agreed to, the "price range for free trade sugar," according to the International Sugar Agreement Article 44, is 15¢ to 19¢—that range where stocks of sugar are neither being accumulated nor released on the world market.

Subtitle B. Quota Provisions. Annual Estimate of Consumption in United States.

Sec. 202. (a) Directs the Secretary to determine the amount of sugar that will be needed to (1) meet domestic consumer requirements, (2) maintain and protect the domestic sugar industry and (3) attain the price objective on an annual average basis. This determination is to be made in October of each year for the next calendar year and may be adjusted as required during the year to meet the objectives of this section. This section also contains a proviso that, for calendar year 1978, the Secretary will make and publish the above outlined determination within 15 days of the effective date of the Act.

(b) Describes the price objective noted above as a price for raw sugar equal to the median of the price range for free trade sugar under the International Sugar Agreement. It also mandates that the price objective shall be adjusted each calendar quarter (within 30 days after the end of each quarter) so that it will maintain the same relationship to the average of the parity index and the wholesale price index as it had to the twelve-month average of those indices preceding the date of enactment.

(c)(1) Describes the parity (1967=100) as the index of Prices Paid by Farmers for Commodities and Services, including Interest, Taxes and Farm Wage Rates as published monthly by the Department of Agriculture.

(2) Describes the wholesale price index (1967=100) as the index determined monthly by the Department of Labor.

Quota for foreign countries

Sec. 203. (a) Prescribes that, whenever the Secretary determines pursuant to Sec. 202, the amount of sugar needed to meet domestic requirements, he shall establish a global sugar quota, or revise the existing quota for foreign countries as a group. The quota shall be equal to the amount the Secretary determines sugar consumption demands will exceed the amount of domestically produced sugar that will be available during the year. For the calendar year 1978, this section provides that quota shall be reduced by (1) the excess stocks of sugar carried over from 1977 in this country and (2) the amount of sugar imported into the U.S. from foreign countries during 1978 prior to the establishment of such quota.

(b) Authorizes the Secretary to adjust the quota, on a quarterly basis, if he determines it is necessary in order to achieve the price objective of the Act, and, further, requires an adjustment in the quota anytime the average price for raw sugar, adjusted for freight to New York and applicable tariff and fees, is 5% or more below the price objective for twenty consecutive market days.

(c) Provides that sugar exported to the U.S. must be the product of the exporting country.

Adjustments in quota for foreign countries

Sec. 204. Directs the Secretary, when he ascertains that the domestic sugar supply will not be available in the amount previously determined, to add the amount of such deficit to the foreign quota.

Import fee

Sec. 205. Directs the Secretary to establish an import fee on sugar when the price of sugar, delivered in New York, duty paid, is below the price objective for twenty consecutive market days. The fee is to be an amount that, when added to the New York delivered, duty-paid price, will achieve the price objective and may be adjusted from time to time, but not more often than once each quarter. It also authorizes the Secretary to establish this fee within twenty market days after the date of enactment and provides that all fees collected will be covered into the U.S. Treasury.

Importation of direct-consumption sugar

Sec. 206. (a) Prohibits the importation of refined (ready for consumption) sugar, except:

(b) If the President finds and proclaims a national economic or other emergency exists with respect to direct consumption sugar, or

(c) If the Secretary determines there's not enough refining capacity in the country to meet sugar consumption demands.

Suspension of quota and fees

Sec. 207. Directs the Secretary to suspend quota and import fees any time the price of sugar in New York, freight, tariff and fees paid, averages 20% or more above the price objective for a period of twenty consecutive market days. Subsequently, when the price, as adjusted above, averages less than 20% above the price objective for a twenty-consecutive-market-day period, the Secretary shall reestablish such quotas and fees as may be required to achieve the price objective on an average annual basis.

Sugar-containing products

Sec. 208. Authorizes the Secretary to limit the quantity of sugar-containing products or mixture of beet sugar molasses to be imported into this country, if he determines that they are, or may be, imported in such quantities to interfere with the attainment

of the objectives of the Act. In addition, it mandates that the Secretary establish each year a quota on sweetened chocolate, candy and confections beginning with calendar year 1979. This provision is for the protection of confectionary manufacturers, or the processors of other foods high in sugar content. In the event implementation of this Act causes sugar prices in this country to be substantially higher than elsewhere in the world, their foreign competitors would have undue advantage.

Prohibited acts

Sec. 209. Prohibits (a) importation of sugar or sugar-containing products after the applicable quota is filled, (b) importation of sugar (over 100 pounds) from foreign countries into the Virgin Islands for consumption, and (c) exporting domestically produced sugar to foreign countries.

Subtitle C—quota-related provisions

Sec. 210. (a) Prescribes that all sugar quotas shall be made or established in terms of raw value, and (b) liquid sugar shall be included with sugar insofar as quotas are concerned.

Exportation of sugar

Sec. 211. Provides that sugar brought into the U.S. under bond to be reexported as sugar or as an ingredient in a manufactured product, will not be counted as part of the quota.

Inapplicability of quota provisions

Sec. 212. Provides that the quota provisions will not apply to the first ten short tons, raw value of sugar or liquid sugar imported (1) from any country, (2) for religious, educational or experimental purposes, (3) in liquid form in sealed containers not in excess of one and one tenth gallons each; or (4) for livestock feed or the production of alcohol not for human consumption.

TITLE III—GENERAL PROVISIONS

Regulations and determinations

Sec. 301. (a) Authorizes the Secretary to make rules and regulations necessary to carry out this Act and provides for a fine of up to $1,000 for conviction of anyone violating these rules.

(b) Requires the Secretary to publish each quota determination he makes in the Federal Register and, at the same time, give the basis for his determination.

Jurisdiction of courts

Sec. 302. Requires the Attorney General to initiate proceedings against violators of this Act and gives enforcement powers to the Federal District Courts.

Civil penalties

Sec. 303. Provides that any person violating the prohibited acts (Sec. 309) shall be fined three times the market value of the sugar involved at the time of the violation.

Furnishing information to the Secretary

Sec. 304. Provides information-gathering authority to the Secretary as he deems necessary for the administration of the Act and sets a civil penalty for non-compliance.

Investments by officials prohibited

Sec. 305. Makes it illegal for individuals involved in the administration of this Act to speculate on the sugar market or own stock in sugar companies. Violation of this provision carries a $10,000 fine and/or up to two years in prison.

Presidential quota action

Sec. 306. Allows the President to suspend the provisions of this Act by proclamation in event of a national economic or other emergency with respect to sugar. The Act would remain inoperative so long as the President determines that situation exists.

Surveys and investigations

Sec. 307. (a) Authorizes and directs the Secretary to conduct such surveys and investigations as he finds necessary to carry out the provisions of this Act and provides that the information he gathers with respect to the separate operation of any person or company will not be made public.

(b) Authorizes the Secretary to conduct survey and research relating to the conditions and factors affecting the methods of accomplishing most effectively the purposes of this Act and to make this information public as he deems it necessary.

(c) Requires the Secretary to determine and announce a daily "spot" price for sugar, raw value, adjusted for freight to New York and applicable tariff whenever the New York Coffee and Sugar Exchange is prevented from doing so. (The Exchange is currently under restraint by the Justice Department from quoting these daily prices.)

Termination

Sec. 309. The powers vested in the Secretary under this Act end December 31, 1982, which is the same date as the International Sugar Agreement expires. The ISO may extend the ISA for up to two more years.●

Mr. DOLE. Mr. President, I am cosponsoring today the Sugar Stabilization Act of 1978. This bill enjoys the support of all segments of the sugar and corn sweetener industry from the farmer to processor. I am confident that the consumer will benefit from the price stability this act will produce.

Sugar beets are grown in 19 States from Michigan and Ohio to California, from the Canadian border to the Mexican border. Sugarcane is grown in Florida, Louisiana, east Texas and, of course, Hawaii. These crops fill some 55 percent of this Nation's annual sugar consumption demands. Some 18,000 farm families are involved in the production of U.S. sugar crops and more than 27,000 workers are employed by sugar-processing plants.

Sugar beet growers, who produce more than 60 percent of the domestic crop, have what is called a participating contract with processors and are paid in accordance with the marketplace earnings of the sugar they produce each year.

THE CURRENT SUGAR SITUATION

Since the demise of the 40-year-old Sugar Act in 1974, the price of sugar on the world market has dictated sugar prices in the United States. This world market is, in reality, a very "thin" residual market where only 15 to 18 percent of the world's sugar production is sold and, as a result, it is subject to drastic price swings. In November 1974, for instance, the world sugar price peaked at 66 cents per pound, raw value, and in September 1977, it was down to 6.4 cents per pound. This price is currently in the 7 to 8 cents range, well below production costs anywhere.

In virtually every sugar exporting country, the national government exercises controls over sugar ranging from price setting policies up to and including outright ownership of sugar production and marketing facilities. By setting high prices for sugar consumed "at home" and entering into long-term trade agreements—such as the Cuba-Eastern European Pact—these nations are able to dump any remaining sugar on the world market at depressed prices. Twice in the last 18 months, the U.S. International Trade Commission—after lengthy investigations—has determined that the impact of this cheap, heavily subsidized sugar being brought into this country constitutes a serious threat to the viability of the domestic sugar industry. Indeed, four U.S. sugar beet processing plants and an equal number of sugarcane mills have closed in the last year—bringing to 10 the total closed since January 1, 1975.

THE INTERNATIONAL SUGAR AGREEMENT

The uncertainties of world sugar supplies and price upheavals prompted approximately 72 sugar importing and exporting nations to negotiate an International Sugar Agreement (ISA) in 1977 under the auspices of the United Nations. This agreement, signed conditionally by the United States and now awaiting ratification by the Senate, is scheduled to be in "operation" July 1, 1978.

Briefly, the agreement sets a world price "range" for sugar of 11 to 21 cents per pound, raw value, and establishes "basic export tonnages" (BET's) for each sugar exporting nation. When the world price for sugar is between 11 and 15 cents, the BET for each country is reduced and a fee is to be collected on each pound of sugar marketed to finance the accumulation of stocks in exporting countries.

When the price is between 15 and 19 cents, the full amount of each nation's BET may be made available for sale on the world market. This is called the free trade range.

For each cent the price might rise above 19 cents, one-third of the accumulated stocks are to be put on the market. It is through this mechanism that negotiators of the agreement hope to protect importing nations, and consumers in general, from spiraling sugar prices.

Given the dismal track record of previous international commodity agreements, it is difficult to predict if the ISA will be successful. Producers and consumers, alike, have a genuine stake in its success, as the United States remains the world's largest importer of sugar.

SUGAR STABILIZATION ACT OF 1978

The main feature of the Sugar Stabilization Act of 1978 is that it overlays the ISA, enhancing the likelihood that it will be effective for the benefit of producers and consumers around the world and, at the very least, make sure it will be effective in this country.

Central to the proposal is the establishment of a price objective for sugar, landed in New York, duty-paid, at the midpoint of the free trade range provided for in the ISA. The price objective, to be adjusted periodically in a manner similar to the options available to the International Sugar Organization which administers the ISA, is to be achieved through collection of fees—payable to the U.S. Treasury—or quantity controls on sugar imports. Quantity controls, if they are invoked, will be applied on a global basis, not country-by-country.

If the price of sugar on the world market exceeds the free trade range ceiling, any fees and/or quantitative controls in effect would be removed.

The basic tenet of the proposal is that U.S. consumers can expect that adequate supplies of sugar should remain available at all times at a stable, reasonable price without jeopardizing our domestic production.

Mr. President, in recent years corn sweeteners have become more competitive with sugar especially as a sweetener for beverages and processed convenience foods. It is important to note that the national corngrowers and the corn refiners are supporting this legislation and it will, therefore, add to the overall acceptance of this legislation. This legislation, therefore, perhaps enjoys more broad support than any agricultural legislation we have offered in many years.

I am pleased to see that the cosponsors of the bill reflect this broad support throughout the Nation from Hawaii to Michigan, and there is a good balance of support from both sides of the aisle. Eleven Republicans and 19 Democrats are cosponsors.

I ask unanimous consent that the following be inserted in the RECORD at this point.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

EFFECT OF THE PROPOSED ACT ON U.S. CONSUMERS

The average price for foreign sugar in New York City, freight, duty and fees paid, in 1977 was 14.3 percent above 1973, the year before worldwide shortages sent sugar prices to a record high. This slightly higher price in 1977 is due to the increased duty on sugar in the latter part of the year, since the world price for sugar actually averaged 14.5 percent below the 1973 level.

Meanwhile, the composite price of 14 sugar-containing products, traced by the U.S. Bureau of Labor Statistics, increased 22.4 percent in 1974, was 44.6 percent higher in 1975, and by 1977 was 48.6 percent above the 1973 level.

Thus, it is clear, processors of sugar-containing products, purchasers of some 85 percent of all sugar consumed in the United States, raised their prices in response to the sugar cost spiral of 1974–1975—but have never reduced them as sugar prices receded to near 1973 levels.

In light of this fact, the clear conclusion is that the proposed slight increase in sugar prices can be easily absorbed by the industrial users of sugar and, for the most part, never passed on to consumers.

EFFECT ON CONSUMERS IF THE PROPOSED ACT IS NOT ENACTED

Failure to enact the Sugar Stabilization Act of 1978 will severely endanger the likelihood the ISA will succeed. (If the Act is passed, of course, and the ISA works as envisioned by its architects, then the provisions of the domestic program will never have to be implemented.) Without the ISA, sugar consumers will be exposed to the instability of supply and extreme price gyrations that have characterized the world sugar market for many years.

Meanwhile, the ability of this nation to produce a substantial portion of its own sugar demands will continue to be reduced and, in the not very distant future, disappear completely. As U.S. consumers become more and more reliant on foreign sugar suppliers—and our demands on the world market become greater, sugar prices will undoubtedly increase—and there will be no means of controlling them—a situation not unlike this nation's experience with foreign suppliers of cocoa, coffee and crude oil.

SUMMARY OF THE BILL

It provides enabling legislation to implement U.S. ratification of the International Sugar Agreement.

It provides for domestic support program for producers and processors of sugar crops, with these main features:

(1) A support price of 17¢ per pound, raw sugar basis, to be adjusted quarterly on the basis of changes in the average of the parity index and the wholesale price index.

(2) The support price would be achieved by a combination of import quotas and fees on raw sugar.

(3) The quota would be the difference between estimated consumption requirements and domestic production of sugar and could be adjusted quarterly.

(4) The import fee would be established as the difference between the landed cost of imported raw sugar and the support price, and could be adjusted quarterly.

(5) The domestic support provisions would be suspended any time the market price exceeds the support price by an amount to be specified by the Secretary of Agriculture.

● Mr. BAYH. Mr. President, I am pleased to join today as a cosponsor of the Sugar Stabilization Act of 1978.

Like many of my colleagues, I have been disturbed about some of the policy decisions that have been made regarding the domestic sugar industry in the past several months. Between the passage of the 1977 Agriculture Act and the actual implementation of the sugar provisions of that act, under a program of doubtful legality, large payments were made by the Department of Agriculture to sugar processors. The payments amounted to millions of dollars apiece to a few large sugar corporations.

This legislation will prevent such direct payments and also correct a flaw under the old law through which insufficient distinctions were made between duties on raw and refined foreign sugar coming into this country. Before this oversight was corrected, tons of foreign refined sugar had flooded the market as a result of low duties compared to those on raw sugar.

One factor which allows many countries to sell sugar so cheaply is the subsidization by their governments of the sugar industry. This cheap sugar can then be sold to the United States at prices that domestic sugar producers cannot match. It is because of this situation that I am cosponsoring this legislation. The bill should solve many of the problems that arose under old programs and inaugurate a comprehensive sugar policy for the benefit of both the sugar industry and, without widely fluctuating prices, for the American consumer. At the same time, this bill should not hurt other domestic competitors such as the corn sweetener industry which has shown a great capacity to produce low-cost sweeteners competitively.

This bill will stipulate that no imported sugar can be sold in this country below the median price set by the International Sugar Agreement. If foreign sugar falls below this price for 20 days a duty will be imposed upon it to bring the price up to the median price. This provision will insure that American sugar producers will not be undersold in their own market by foreign subsidized sugar. I believe that this provision will help the consumer also by stabilizing the sugar market and preventing the wild price fluctuations of recent years. The bill should have the long range effect of helping to keep American sugar producers competitive so that we will not have to rely solely upon foreign sugar production in the future.

It is extremely important that our domestic farm markets be stabilized as much as possible so that American producers can be assured of receiving a fair return on their investments of time and money. It is also important to make sure that domestic industries are not undercut by foreign competitors who are themselves receiving a subsidy in their own countries which enables them to undersell American producers. I think that the bill is a reasonable step in this direction and I hope that the Senate will quickly act upon it.●

ADDITIONAL COSPONSORS

S. 1575

At the request of Mr. HUDDLESTON, the Senator from Hawaii (Mr. MATSUNAGA) was added as a cosponsor of S. 1575, a bill to establish a voluntary program to provide farmers protection against loss of farm production when natural or uncontrollable conditions adversely affect such production.

S. 1835

At the request of Mr. HUDDLESTON, the Senator from Nebraska (Mr. ZORINSKY) was added as a cosponsor of S. 1835, a bill directing the Secretary of Agriculture to compile and publish certain information relating to the adequacy of a transportation system to meet the needs of agriculture and rural development in the United States.

S. 1836

At the request of Mr. HUDDLESTON, the Senator from Nebraska (Mr. ZORINSKY) was added as a cosponsor of S. 1836, a bill to provide an 18-month moratorium on certain abandonment of rail lines and discontinuance of rail service and to postpone the reduction of certain local rail service assistance.

S. 2388

At the request of Mr. PACKWOOD, the Senator from Pennsylvania(Mr. HEINZ) was added as a cosponsor of S. 2388, a bill to amend the Internal Revenue Code of 1954 to provide for the exclusion from gross income of certain employee educational assistance programs.

S. 2405

At the request of Mr. LUGAR, the Senator from Kentucky (Mr. HUDDLESTON) was added as a cosponsor of S. 2405, a bill to authorize an intermediate term Commodity Credit Corporation credit program for the purpose of financing the sale and export of agricultural commodities produced in the United States.

S. 2412

At the request of Mr. MCGOVERN, he was added as a cosponsor of S. 2412, a bill to prohibit the importing of Ugandan articles into the United States.

S. 2413

At the request of Mr. MCGOVERN, he was added as a cosponsor of S. 2413, a bill to amend the Export Administration Act of 1969 to prohibit the exporting of goods to Uganda.

S. 2414

At the request of Mr. MCGOVERN, he was added as a cosponsor of S. 2414, a bill to amend the tariff schedules of the United States in order to prohibit the importation of coffee which is the product of Uganda.

S. 2583

At the request of Mr. DOLE, the Senator from South Dakota (Mr. McGOVERN) and the Senator from New Hampshire (Mr. McINTYRE) were added as cosponsors of S. 2583, a bill to provide for the temporary transfer of the U.S.S. *Sanctuary* to Life International, a nonprofit corporation.

S. 2598

At the request of Mr. JAVITS, the Senator from Hawaii (Mr. INOUYE) was added as a cosponsor of S. 2598, a bill to amend title XI of the Public Health Service Act.

S. 2645

At the request of Mr. WILLIAMS, the Senator from Iowa (Mr. CLARK) and the Senator from Massachusetts (Mr. KENNEDY) were added as cosponsors of S. 2645, a bill to establish an Art Bank.

S. 2691

At the request of Mr. WILLIAMS, the Senator from Maryland (Mr. MATHIAS) and the Senator from Colorado (Mr. HART) were added as cosponsors of S. 2691, a bill to provide for the furnishing of congregate housing services under the United States Housing Act of 1937.

S. 2727

At the request of Mr. STEVENS, the Senator from South Carolina (Mr. THURMOND) was added as a cosponsor of S. 2727, the Amateur Sports Act of 1978.

S. 2730

At the request of Mr. WILLIAMS, the Senator from Ohio (Mr. METZENBAUM) and the Senator from South Carolina (Mr. HOLLINGS) were added as cosponsors of S. 2730, a bill to establish a Hubert H. Humphrey Fellowship in Social and Political Thought at the Woodrow Wilson International Center for Scholars at the Smithsonian Institution and to establish a trust fund to provide a stipend for such fellowships.

S. 2825

At the request of Mr. BARTLETT, the Senator from Oklahoma (Mr. BELLMON) was added as a cosponsor of S. 2825, a bill to amend the Internal Revenue Code of 1954 with respect to certain charitable contributions.

SENATE JOINT RESOLUTION 21

At the request of Mr. WILLIAMS, the Senator from New Hampshire (Mr. DURKIN) was added as a cosponsor of Senate Joint Resolution 21, to authorize the President to proclaim annually the last Friday of April as "National Arbor Day."

AMENDMENTS SUBMITTED FOR PRINTING

CONGRESSIONAL BUDGET RESOLUTION—SENATE CONCURRENT RESOLUTION 80

AMENDMENT NO. 1804

(Ordered to be printed and to lie on the table.)

Mr. DOMENICI submitted an amendment intended to be proposed by him to Senate Concurrent Resolution 80, setting forth the congressional budget for the U.S. Government for the fiscal year 1979.

AMENDMENTS NOS. 1805 AND 1806

(Ordered to be printed and to lie on the table.)

Mr. DURKIN submitted two amendments intended to be proposed by him to Senate Concurrent Resolution 80, supra.

AMENDMENT NO 1807

(Ordered to be printed and to lie on the table.)

Mr. HARRY F. BYRD, JR. (for himself and Mr. HODGES) submitted an amendment intended to be proposed by them, jointly, to Senate Concurrent Resolution 80, supra.

● Mr. HARRY F. BYRD, JR. Mr. President, this amendment, which will be called up Wednesday, makes a reduction in HEW programs amounting to one-third of the lowest estimate of misspending in those programs made in the recent report of HEW's own Inspector General.

His low estimate of HEW misspending, caused by waste, mismanagement and fraud, was $6.3 billion. Our amendment would make a cut of $2.1 billion.

In calculating the reductions in the three budget categories which are affected by this amendment, we disregarded the waste which the Inspector General attributed to excess hospital beds in communities as it could be argued that this is basically a State and local problem.

The resulting reduction, to eliminate one-third of the misspending reported by the Inspector General, is distributed among the budgetary functions in the same proportions as the waste and mismanagement.

Mr. President, I ask unanimous consent that the amendment submitted by the distinguished Senator from Arkansas (Mr. HODGES) and myself be printed in the RECORD.

There being no objection, the amendment was ordered to be printed in the RECORD, as follows:

AMENDMENT No. 1807

On page 1, line 11, delete "$566,100,000,000" and insert in lieu thereof "$564,000,000,000"
On page 2, line 2, delete "$498,900,000,000" and insert in lieu thereof "$496,800,000,000"
On page 2, line 5, delete "$55,600,000,000" and insert in lieu thereof "$53,500,000,000"
On page 2, line 7, delete "$853,800,000,000" and insert in lieu thereof "$851,700,000,000"
On page 2, line 9, delete "$101,800,000,000" and insert in lieu thereof "$99,700,000,000"
On page 3, line 24, delete "$31,600,000,000" and insert in lieu thereof "$31,497,000,000"
On page 3, line 25, delete "$31,200,000,000" and insert in lieu thereof "$31,097,000,000"
On page 4, line 2, delete "$52,700,000,000" and insert in lieu thereof "$50,924,000,000"
On page 4, line 3, delete "$49,500,000,000" and insert in lieu thereof "$47,724,000,000"
On page 4, line 5, delete "$192,500,000,000" and insert in lieu thereof "$192,279,000,000"
On page 4, line 6, delete "$159,900,000,000" and insert in lieu thereof "$159,679,000,000"●

AMENDMENT NO. 1808

(Ordered to be printed and to lie on the table.)

Mr. TOWER submitted an amendment intended to be proposed by him to Senate Concurrent Resolution 80, supra.

PETROLEUM MARKETING PRACTICES ACT—H.R. 130

AMENDMENT NO. 1809

(Ordered to be printed and to lie on the table.)

Mr. BUMPERS (for himself and Mr. MARK O. HATFIELD) submitted an amendment intended to be proposed by them to the bill (H.R. 130), to provide for the protection of franchised distributors and retailers of motor fuel and to encourage conservation of automotive gasoline and competition in the marketing of such gasoline by requiring that information regarding the octane rating of automotive gasoline be disclosed to consumers.

FEDERAL BANKING AGENCY AUDIT ACT—H.R. 2176

AMENDMENT NO. 1810

(Ordered to be printed and to lie on the table.)

Mr. BROOKE (for himself, Mr. TOWER, Mr. McINTYRE, Mr. STEVENSON, and Mr. JAVITS) submitted an amendment intended to be proposed by them, jointly, to the bill (H.R. 2176) to amend the Accounting and Auditing Act of 1950 to provide for the audit, by the Comptroller General of the United States, of the Federal Reserve System, the Federal Deposit Insurance Corporation, and the Office of the Comptroller of the Currency, and for other purposes.

● Mr. BROOKE. Mr. President, I am joined by Senators TOWER, McINTYRE, STEVENSON, and JAVITS in submitting today an amendment that I plan to offer to H.R. 2176, a bill to provide for an audit of the Federal bank regulatory agencies by the Government Accounting Office. This amendment would seek to assure the privacy of information concerning individual banks or individual bank customers obtained by GAO in the course of their audits. The amendment would require the deletion from H.R. 2176 of subsection (d)(5)(D), which provides that, when requested, GAO must furnish such audit information to a duly authorized congressional committee or subcommittee sitting in executive session. While I believe Congress should have ready access to GAO audit reports and information, I believe that financial information which identifies an operating bank or an individual bank customer should not be accessible without the issuance of a congressional subpena to the appropriate bank regulatory agency. In my opinion, this amendment would protect the privacy of individuals and banks, without unduly burdening congressional committees in their oversight of Federal banking agencies.

The amendment would also clarify the definition of the term "agency" contained in subsection (d)(2) of the bill, by inserting language therein which would more clearly indicate that the Federal Reserve, the Federal Deposit Insurance Corporation, and the Office of the Comptroller of the Currency are the agencies covered by the bill. Presently, the term "agency" is defined to mean an agency listed in subsection (d)(1), which mentions the Comptroller General—head of the General Accounting Office—as well as the three banking agencies. Thus, this change is to insure that the word "agency" refers only to the banking agencies and not be misinterpreted to refer also to the GAO.

The proposed Federal Banking Agency Audit Act would provide Congress for the first time with audit information regarding the operations of the Federal Reserve, the Office of the Comptroller of the Currency, and the Federal Deposit

Insurance Corporation. At present, these agencies are the only Federal agencies which are not subject to audit by GAO. In view of the importance of these agencies within the Government and of their impact on the Nation's financial and economic structure, it is certainly appropriate to improve congressional oversight of their effectiveness. However, I also believe that the audit bill should not jeopardize the financial privacy of individuals or banks or inhibit the bank examination function of the bank regulatory agencies by requiring that financial information about individual or specific banks be provided to Congress without subpenas. Requiring congressional committees to issue subpenas for such financial information imposes what I believe is a more appropriate safeguard than allowing congressional committees to receive in executive session any audit information they desire.

The amendment I am proposing has been endorsed by G. William Miller, Chairman of the Federal Reserve Board, and by former Chairman Arthur F. Burns. In view of their interest in this matter, I ask unanimous consent their letters to Senator RIBICOFF as chairman of the Committee on Governmental Affairs, proposing the deletion of subsection (d)(5)(D) of H.R. 2176. be printed in the RECORD.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

MARCH 29, 1978.

Hon. ABRAHAM RIBICOFF,
U.S. Senate,
Washington, D.C.

DEAR ABE: I tried to get in touch with you last week but you had left the country. Next week, I'll be off on a foreign trip and that is why I am communicating with you by letter.

I continue to be concerned about the GAO audit legislation which has not been reported out of your Committee and soon will be considered on the Senate floor.

While I have numerous questions about this legislation, one provision in the bill reported by your Committee is of particular concern to me—namely, the provision relating to access to and protection of the confidentiality of bank examination reports.

Section 5(A) of the bill wisely provides that no GAO official shall disclose to any person any information that would "identify a specific customer of an open or closed bank or bank holding company, or identify a specific open bank or open bank holding company."

Section 5(D) then waives this provision for Committees and Subcommittees of the Congress sitting in Executive session. Thus, any Committee or Subcommittee of the Congress would have access to the very sensitive information concerning individual banks or individual bank customers simply by going into Executive session I feel that this procedure may seriously endanger some of our financial institutions and their customers as well The protection of the identity of banks and their customers is essential if the Board is to carry out conscientiously its mandate to examine State member banks and bank holding companies.

Last fall, when the various agencies commented on the GAO audit legislation then pending before your Committee, the U.S. Treasury and the Comptroller of the Currency joined us in urging that all possible steps be taken to protect the confidentiality of information concerning banks and bank customers.

None of their pronouncements, however, was as direct and to the point as Chairman Proxmire's comment on February 5, 1976, when his Committee held hearings on "how well the regulatory agencies are managing their supervisory and regulatory authority to assure a safe and sound banking system." Chairman Proxmire stated *inter alia* . . . "I don't think the Committee should have access to examination reports. I think it's a mistake. I think that we have a fine staff, and fine responsible members of this Committee, but there is a long record of leaks and I think this would be very unfortunate if there were any leaks involved at all. So I would be against having the staff have access to that or members having access to it."

I strongly urge that Section 5(D) of the legislation be deleted. As you well know, if needed, Congressional Committees and Subcommittees would still have access to bank examination reports by voting a subpoena. Any additional liberalization such as that contemplated in 5(D) just increases the risk of future abuses.

I am forwarding copies of this letter to Senator Sasser, Senator Percy, Chairman Proxmire, and Senator Brooke.

Sincerely yours,

ARTHUR F. BURNS.

APRIL 3, 1978.

Hon. ABRAHAM A. RIBICOFF,
Chairman, Committee on Governmental Affairs, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: Shortly before he left the Board, Arthur Burns wrote you to express his concern over Section 5(D) of the GAO audit legislation which is presently pending on the Senate floor.

I share Arthur's concern over this provision and would appreciate your careful review of the points made in Arthur's letter.

With best wishes,

Sincerely,

G. WILLIAM MILLER.●

NAVIGATION DEVELOPMENT ACT—H.R. 8309

AMENDMENT NO. 1811

(Ordered to be printed and to lie on the table.)

Mr. CRANSTON submitted an amendment intended to be proposed by him to the amendment No. 1688 intended to be proposed to the bill (H.R. 8309) authorizing certain public works on rivers for navigation, and for other purposes.

NOTICES OF HEARINGS

COMMITTEE ON ENERGY AND NATURAL RESOURCES

● Mr. JACKSON. Mr. President, I wish to announce for the information of the Senate and the public the scheduling of a public hearing before the Senate Committee on Energy and Natural Resources.

The hearing is scheduled for May 19, 1978, beginning at 8 a.m. in the Petro-West Theater of the Student Union Building on the campus of the Eastern Montana College in Billings, Mont. Testimony is invited regarding S. 2080, the proposed Pacific Northwest Electric Power Supply and Conservation Act, related amendments, and issues associated with electric power planning and production in the Pacific Northwest.

Mr. President, the committee has just concluded 2 days of successful hearings in Seattle, Wash., and Portland, Oreg., and we are looking forward to the opportunity to gain further insight into the concerns of the people in the Pacific Northwest.

For further information about the hearings, you may wish to contact Russell Brown, professional staff of the committee, telephone 224–2366. Those wishing to testify or submit a written statement for the hearing record should write to the Committee on Energy and Natural Resources, U.S. Senate, Washington, D.C. 20510.●

COMMITTEE ON GOVERNMENTAL AFFAIRS MARKUP

● Mr. RIBICOFF. Mr. President, I wish to announce that the Committee on Governmental Affairs will hold a markup on May 10 and 11, 1978, to consider reform of the lobbying disclosure laws and the Antiterrorism Act. Both meetings will begin at 10 a.m. in room 3302, Dirksen Senate Office Building.●

SUBCOMMITTEE ON INTERGOVERNMENTAL RELATIONS

● Mr. MUSKIE. Mr. President, on April 26, the Subcommittee on Intergovernmental Relations of the Committee on Governmental Affairs, will hold a hearing to examine the "Public Attitude Toward Congressional Review of Programs."

The hearing will begin at 10 a.m. in room 6202, Dirksen Senate Office Building.●

COMMITTEE ON GOVERNMENTAL AFFAIRS

● Mr. RIBICOFF. Mr. President, on Thursday, April 27, the Committee on Governmental Affairs will continue hearings on S. 2640, the Civil Service Reform Act of 1978. The hearing will be held at 9 a.m. in room 3308 of the Dirksen Senate Office Building. The following witnesses will appear before the committee:

Mr. Kenneth A. Meiklejohn, legislative representative, AFL–CIO.

Mr. William H. McClennan, president, public employee department, AFL–CIO.

Mr. Paul Burnsky, president, metal trades department, AFL–CIO.

Mr. Kenneth Blaylock, president, American Federation of Government Employees.●

COMMITTEE ON GOVERNMENTAL AFFAIRS

● Mr. ROTH. Mr. President, on behalf of the Governmental Affairs Committee, I would like to announce a hearing on S. 1990, the International Trade and Investment Reorganization Act, to be held at 10 a.m., in room 3302, on Monday, May 1. Witnesses will include William J. Barton, president of International Business-Government Counselors, Inc., and a panel of American businessmen operating overseas.●

RURAL TRANSPORTATION

● Mr. HUDDLESTON. Mr. President, the Subcommittee on Agricultural Production, Marketing, and Stabilization of Prices of the Agriculture, Nutrition, and Forestry Committee will hold another series of hearings on rural transportation problems. The hearings are scheduled for May 9, 10, and 11. They will begin at 9 a.m. on each day in room 324 of the Russell Senate Office Building.

We intend to hear from representatives of the Department of Transportation, Department of Agriculture, Interstate Commerce Commission, the National Transportation Study Policy Commission, and invited public witnesses. In addition, any others interested in testi-

fying should contact Mr. Reider Bennett-White of the committee staff at 224-6917.

The subcommittee will continue its investigation of rail car shortages and the possible effect that peak season pricing might have had on these shortages. We also will be looking at the future of the bankrupt and trouble Granger railroads.

Other important questions to be taken up during our 3 days of hearings include:

The relationship between proposed railroad abandonments and the elimination of thousands of miles of rural roads from the Federal-aid highway system;

Rail transportation safety for both passengers and freight—including the impact recent rail disasters have had on the affected communities; and

The question of transit of people in rural areas.●

ADDITIONAL STATEMENTS

PUBLIC BROADCASTING NOT FOR PARTISAN POLITICS

● Mr. McCLURE. Mr. President, in January President Carter sent to the Congress his plan for changing the Nation's public broadcasting system. The Public Broadcasting Financing Act of 1978 has many problems, in my opinion, but clearly its worst feature is the proposal to permit federally funded radio and television stations to editorialize and even endorse political candidates.

Under present law all public radio and TV licensees must adhere strictly to "objectivity and balance" in their public affairs programing. They are not free to advocate specific points of view or endorse canditates for public office. The reason for this prohibition is clear: A noncommercial, public broadcasting service should not become enmeshed in partisan politics.

Mr. President, I am alarmed by the prospect that the people's tax moneys could be used to support a form of advocacy by the country's public broadcasting stations.

In a statement accompanying his legislation, the President contended that—

Public broadcasting should have an equal opportunity with commercial broadcasters to participate in the free marketplace of ideas.

In my opinion, the Carter proposal would threaten that free marketplace of ideas by subjecting public broadcast outlets to potential political pressures, such as from Congressmen seeking editorial endorsement for reelection in return for a vote for additional Federal grants to the station. The mere suggestion that a federally supported communications medium would go into the propaganda business could be enough to permanently harm the viability of a public broadcasting service.

The distinguished columnist Roscoe Drummond has written a thoughtful criticism of the Carter plan which I am pleased to bring to the attention of my colleagues. I agree with Mr. Drummond that—

Congress will be killing public broadcasting if it lets stations install editorial writers or even permits such stations to be publicly financed.

Mr. President, I ask that the text of the column "Should Public TV Tell Us How To Vote?" be printed in the RECORD as it appeared in the Christian Science Monitor on March 15, 1978.

The column follows:

SHOULD PUBLIC TV TELL US HOW TO VOTE?

(By Roscoe Drummond)

WASHINGTON.—I venture to put this question to you because you can do something about it:

Do you think your tax money should be used to enable television and radio stations partly funded by the government to tell their local audiences what they should think and how they should vote?

If you don't want this to happen, then you better tell your representatives and your senators because a bill to authorize it is now on the congressional agenda.

When the United States Information Agency was brought into being, the law specifically prohibited it from carrying on any propaganda within the U.S. Now President Carter is proposing that federally funded TV and radio stations shall be free to do what the U.S. Information Agency is wisely prevented from doing.

The proposed legislation, which the Carter administration is advocating, would expressly authorize nongovernmental public stations to "editorialize" on issues of public importance as commercial stations are allowed to do.

I can see no reason whatsoever why the public should support stations permitted to advise us what they believe is good for us to think or to do.

Can you?

Fortunately the law presently bans public stations from doing just that. This prohibition is imbedded in the Public Broadcasting Act of 1967. It requires "strict adherence" to objectivity and balance "by all public stations" in controversial programming. And the language of the law explicitly forbids both editorials and endorsements.

I ask you: how are the public stations going to adhere to "strict objectivity and balance" by editorializing? Surely Congress was right the first time. But now the President and some members of Congress want to relax the law and let a little editorializing get its nose under the tent.

Not all the way, but far enough to imperil the future of public broadcasting. Congress will be killing public broadcasting if it lets stations install editorial writers or even permits such stations to be publicly financed.

Even the reservations which the Carter plan attaches to its bill show its inconsistency. It proposes to continue the ban against editorializing by public stations run by state and local governments and by tax-supported colleges.

If it is improper for state and local government stations to use tax money to support public broadcasting which editorializes, how in the world can one justify using tax money to finance nongovernmental licenses permitted such editorializing? The almost perfect model of public TV and radio is the British Broadcasting Company which shows how government-financed broadcasting can achieve balance free of bias and keep editorializing out of its programming.

The American PBS (Public Broadcasting Service) is coming of age. It is beginning to find its distinctive role so that it renders a public service not covered by the commercial stations. It is producing quality performances of plays, concerts and controversial debates which cater to large but not necessarily mass audiences. It is valuable, it is needed. It would be a grievous mistake to imperil and probably immobilize this service by plunging it into partisan politics.

It just doesn't make sense for the government to inject politics of the most flagrant kind into publicly financed television. But that hasn't kept the President from proposing to do so. The public ought to help Congress say no.●

LAW OF THE SEAS NEGOTIATIONS

● Mr. MUSKIE. Mr. President, on March 15, I discussed the current draft text of the Law of the Seas Treaty. Subsequent to my speech, U.S. Ambassador Elliot Richardson established, within the U.S. delegation, an environmental task force for the purpose of reviewing the marine environment and science sections of that interim negotiating text.

Ambassador Richardson invited a member of my staff to meet with that task force in Geneva during the first weeks of the current negotiating session. As a result of this initiative, the U.S. delegation to the Law of the Seas has developed a proposal for improving the marine environment and science sections of the proposed treaty. Ambassador Richardson discussed these proposals in a statement to the Marine Environment Committee on April 28. I shall submit for the RECORD at the conclusion of my statement the text of Ambassador Richardson's remarks.

Mr. President, I am pleased with the effort that the U.S. delegation is making. I realize the difficulty that confronts these negotiations; the range of issues involved; and that any effort of this magnitude must necessarily represent compromise on the part of all parties. However, the areas which are outlined in the Ambassador's speech seem to me to be minimum items for an acceptable international environmental accord. Agreement on these issues would make these aspects of the treaty much more acceptable to the Senate. I commend the Ambassador for this effort and look forward to the results of this endeavor.

The statement follows:

STATEMENT BY AMBASSADOR ELLIOT L. RICHARDSON AT MEETING OF COMMITTEE III ON APRIL 28

Mr. Chairman, during the discussions in the general committee on the organization of work for this session, my delegation proposed that the third committee consider further negotiations where necessary on scientific research and preservation of the marine environment. As this is the first meeting of the committee at the current session, we welcome the opportunity to explain our reasons for making that proposal.

Mr. Chairman, the objective of this conference is to produce a widely ratified convention generally accepted as law. Considerable work has been done in the third committee to further this objective. Nevertheless, after careful review, we must conclude that unless the environmental and scientific research texts are improved, they will not promote this objective and might well impede it.

We hasten to add that this may be a case where the illness is more serious than the remedy. The overall integrity and balance of interrelated texts and packages, and the large majority of articles, can and should be respected on both subjects. We seek informal means to cooperate with others in effective efforts to produce improved texts at this session. With such cooperation, we are persuaded that there is no significant risk of a

general unravelling of our work. Without such cooperation, the efforts of many years may be in serious and unnecessary jeopardy.

Mr. Chairman, this conference has no more important substantive challenge before it than elaborating an adequate legal regime for protection of the marine environment. The lesson of the tragic accident involving the Amoco Cadiz is that we must protect all coasts against pollution damage. Much of that effort must be conducted elsewhere; but none of us here can shirk our duty to make our own contribution by improving the relevant rules of the law of the sea regarding pollution from ships.

Several clarifications and improvements are needed to better protect both environmental and navigational interests. Unnecessary ambiguities and restrictions have been introduced with respect to the rights of the coastal state in the territorial sea. If these are clarified, it would be easier in our view to avoid reopening old contentious issues.

For example, it is our understanding that this committee long ago decided that the coastal state has the right to apply its own discharge standards to vessels in innocent passage in the territorial sea, that these standards, and that this right is not limited by any requirement that the discharge be "wilful and serious." This committee ought to look with sympathy upon the reasonable request of those who have not participated in its work for reaffirmation of this conclusion. In addition, it is possible to interpret the ICNT to permit neighboring coastal states to pool their rights in the territorial sea to ensure compliance with environmental conditions for port entry, including conditions relating to design, construction, manning, and equipment. Since there is no doubt in any case that a state has complete discretion to fix port entry requirements, reasonable clarification of the right to neighboring states take joint preventive measures in the territorial sea might better promote both environmental and navigational interests than a situation involving conflicting interpretations. At the same time, the ICNT's elimination of coastal state rights to impose punishments other than monetary penalties for pollution violations in the territorial sea should be reviewed.

With respect to the economic zone, the theory of the ICNT is that protection of navigation is best served by the maintenance of exclusively international and internationally approved standards, while the protection of the environment is best served by rigorous enforcement of those standards. If this system is to be fully accepted, we must proceed not only on the assumption that maritime countries are already committed to seeking ever higher international standards in the competent international organization, and that all States must respect those standards, but that the system itself is fairly and unambiguously set forth in the text.

The enforcement system in the economic zone seems, as presently drafted, insufficiently protective of both navigation and environmental interests. The provisions regarding arrest in the economic zone elaborate subjective standards that may lend themselves to confusion and abuse. It is important that an objective set of circumstances be present before an arrest can occur. Subjective criteria are not likely to protect shipping adequately from abuse of discretion, nor are they likely to give any real guidance to coastal States attempting to conform their actions strictly to requirements of the treaty. We also agree that further clarification of the coastal State's right to intervene in cases of a maritime casualty is desirable.

Similarly, while we recognize that the concept that the flag state could pre-empt proceedings in the courts of other States is a part of the overall package produced in this committee, the manner of its elaboration has caused considerable concern. For example, we have been asked whether a coastal State may be required to suspend proceedings in its own courts with respect to discharges that threaten the resources of its own economic zone. Clearly, a sensible answer to this question would be no. The point is of sufficient importance with respect to the reaction to the overall concept of flag state pre-emption that any ambiguity in the text ought to be clarified. Since the ICNT system relies heavily on the duty of all States to respect international rules and standards, particularly in the economic zone, we believe some further specificity with respect to the scope of those international rules and standards would be helpful. Thus, we might consider express references in the text to the adoption of appropriate routing systems and to requirements to notify the coastal State in the event of discharge.

Mr. Chairman, turning to the question of scientific research, my delegation has repeatedly stressed the importance of free and open scientific research to all mankind. We had hoped that a regime considerably more favorable to scientific research could be negotiated at this conference. Nevertheless, our proposals for clarification and improvement at this session are quite circumscribed and modest. Taking into account our own commitment to the integrity of the negotiating process, we propose that the results of arduous package negotiations presented to the second and third committees at the last session be more precisely reflected in the part XIII texts on scientific research, as they were in the part V texts on the economic zone. Accordingly, we trust that this committee and the conference will be able to effect the changes in a similar spirit of accommodation and restraint.

Mr. Chairman, this committee can and must act at this session. It must act to avoid unnecessary restrictions on our means for learning more about the marine environment; and it must act to strengthen the rights of States to take action to protect the marine environment. This is not the time for formal proposals and formal meetings. We can join other delegations in opposing any general reopening of the present text.

What is needed are improved texts in parts XII and XIII at this session developed in accordance with our procedural decisions. The best means for achieving this would be informal and flexible procedures under your guidance. To this end, we pledge our fullest cooperation.

Thank you, Mr. Chairman.●

TRAFFIC DIVERSION AND WATERWAY USER FEES

● Mr. DANFORTH. Mr. President, the CONGRESSIONAL RECORD of October 28, 1977, page 35808, contains an exchange of letters between Senator DOMENICI (October 21) and Secretary of Transportation, Brock Adams (October 27) concerning the amount of traffic which would be diverted from the inland waterways to other modes of transportation as a result of the imposition of waterway user fees. Senator DOMENICI writes:

During hearings by the Senate Committee on Finance there was much discussion on the degree to which waterway user charges might cause a 'diversion' of traffic from the waterways to other modes of transportation. It was argued that this diversion might reach 20% under the language adopted by the Senate last June 22nd.

It would be most helpful to me to have an evaluation of this assertion by your department, particularly in view of the phased-in nature of the waterway user charge contained in the Senate-passed bill and my Amendment No. 1460.

It should be noted that Senator DOMENICI and I had the following colloquy during the hearings referred to above:

Senator DOMENICI. * * * I believe it would be foolhardy for me to try to say that there won't be some diversion but I don't really think that is the issue as I see it. * * *

DOT says that if the Domenici user fee system was imposed in toto that the maximum diversion that could be expected is 10% and I think you know from your studying that the growth is rather exceptional when contrasted with either railroad or truck in the same general area of delivery. I think that is the issue.

Senator DANFORTH. * * * DOT says 10% for recovery of operating and recovery maintenance cost alone.

You want to go further than that, you want to recover 50% of the (capital) improvements which in dollars is about the same amount. So we are really talking about a (20%) diversion.

Senator DOMENICI. I will correct the record and say that the Senator is correct but that also is if you include the cost of the Coast Guard and other operational things that are not necessarily contemplated in my bill.

I want to share with my colleagues the basis for my concern that under Senator DOMENICI's proposal, inland waterway user charges will cause a significant diversion of traffic from waterborne commerce to other modes of transportation. On page 7 of a staff study by the Department of Transportation's Systems Center entitled "Modal Traffic Impacts of Waterway User Charges," volume 1, March 1977, it states:

Recovery of 100% of the federal OM&R (operations, maintenance and repair) expenditures on the inland river system of the U.S. is unlikely to result in traffic losses in excess of 10% of system ton miles under either a fuel tax or segment toll.

The 10 percent diversion figure referred to is an average for all types of shipments on all segments of the inland waterway. For example, the same study in volume 2 at page VII–25 states:

Traffic diversion estimates vary widely depending on the characteristics of each market region. Based on information acquired from producers, the following reductions in sand and gravel tonnage on each river have been predicted:

Arkansas and Kanaw Rivers, 10–50% loss in tonnage;

Ohio, Columbia, and Willamette Rivers, along with the upper Mississippi, 25–30% diversion;

Missouri, Illinois, Allegheny, Monongahela, Cumberland, Tennessee, Gulf Intra-Coastal Waterway, and Alabama-Coosa Rivers, 50% loss in tonnage; and

100% of the sand and gravel traffic would probably be diverted from the Kentucky River, the Kaskakia and the Apalochicola, Chattahoochie, and Flint.

To comprehend the effect of recovering Federal expenditures on the inland waterway system under Senator DOMENICI's proposal, the following schedule printed in the committee report on S. 790 (report 95–215) is helpful. The schedule is based on Corps of Engineers' estimates that in 1976 the corps spent $140 million for O.M. & R. and $240 million for new construction on the inland waterway system. Added to the estimated dollar recovery under Senator DOMENICI's proposal is my estimate which takes into consideration a 6 percent rate of inflation applied to O.M. & R. and a 10 percent rate of inflation applied to construction expenditures:

	Operations maintenance repair (percent)	Capital construction costs (percent)	Domenici proposal	Inflation
1978			0	0
1979			0	0
1980	20		28,000,000	28,168,000
1981	40		56,000,000	61,854,000
1982	60		84,000,000	96,480,000
1983	80		112,000,000	133,186,000
1984	100		140,000,000	172,694,000
1985	100	10	164,000,000	209,455,000
1986	100	20	188,000,000	252,115,000
1987	100	30	212,000,000	292,795,000
1988	100	40	236,000,000	332,887,000
1989 et. seq.	100	50	260,000,000	387,494,000

At the seventh year, when 100 percent recovery of O.M. & R. is reached, $140 million is recovered. By the 12th year, when recovery of 50 percent of new construction costs is achieved, an additional $120 million is recovered. The ratio of O.M. & R. and new construction costs to total recovery—($260 million)—is 54 and 46 percent, respectively. Recovery of both O.M. & R. and new construction costs, could cause a diversion of up to 20 percent. Each would bring about a diversion of up to 10 percent. The effect of inflation adds an additional $120 million to the total recovery of costs which would produce yet another 10-percent diversion.

Under Senator DOMENICI's waterway proposal, user charges are prohibited from exceeding 1 percent of the delivered value of any particular shipped commodity. The argument that such a provision would hold down any substantial amount of diversion is a ruse. The March 1977 DOT study concludes that the price of delivered commodities resulting from proposed user charges would rarely exceed 1 or 2 percent for a recovery of 100 percent of operating expenses and would more commonly be only a fraction of 1 percent.

The evidence therefore is overwhelming that in fact significant diversion of waterborne traffic will occur. Having previously argued that diversion would be minimal, the Department of Transportation is now arguing that it will occur only from future growth on the inland waterway system.

In his letter of October 27, Transportation Secretary Adams states:

As a result of our analysis, I can tell you that all of the diversion would come out of future traffic growth, none out of current traffic. Taking the barge traffic growth of the last ten years, we get an annual growth rate of approximately 5.2 percent. If this rate continues for the next ten years and there is 15 percent diversion ten years out, then barge traffic at that time will be 41 percent greater than it is now. Even with the maximum diversion, then, barge traffic would still be growing at an annual rate of 3.5 percent.

Senator DOMENICI's letter of October 21 asks for the DOT assumptions which forecast that diversion will occur out of future growth. Yet the Department of Transportation has provided none. I can only assume that the Department realizes there is no basis in fact for such a conclusion.

Further, it is interesting to note that Secretary Adams forecast of an annual growth rate of 5.2 percent is challenged by a March 1977 Department of Transportation study entitled "An Interim Report of the U.S. DOT to the Subcommittee on Water Resources of the Senate Public Works Committee." The report discusses replacement of lock and dam 26 at Alton, Ill. This report takes lightly a Corps of Engineers estimate on the future traffic growth of the inland waterway system, specifically through lock and dam 26. The report states on page 19:

The annual growth rate through 1985 would have to equal 3.4 percent in order for the Corps' most likely forecast to be met.

Lock and dam 26 is the most crucial lock and dam facility on our inland waterway system. Why does the Department of Transportation claim that a growth rate of 3.4 percent is excessive for lock and dam 26 while concurrently arguing that a growth rate of 5.2 percent is appropriate for the whole system?

The most important point about diversion is not when its effect will be felt but rather who and what will be affected. The lives and livelihoods of people are at stake. It has been estimated by the National Waterways Conference that inland waterway industries, barge lines, terminals and ship building industries employ 415,000 people. In the relatively short span of 25 years, approximately 10,200 plants have located or expanded at waterway sites by making capital investments of approximately $177 billion. The direct impact of waterborne commerce on the economies of our Nation's river valleys is estimated to be $5.5 billion annually with indirect revenues adding an additional $11 billion.

Mr. President, the Rivers and Harbors Act of 1884, as amended in 1909, provides that—

No tolls or operating charges whatever shall be levied or collected on any vessel, dredge or other craft for passing through any lock, canal or channelized river.

The effect that this national policy has had on the growth of communities and industries along the inland river valleys of our Nation is obvious. If we are to change this policy suddenly, it is my hope that the imposition of user fees will be set at a level which will cause the least amount of economic disruption to the people in the communities and industries involved. I believe the user charges established in H.R. 8309 are set at a reasonable level. Senator DOMENICI's proposal is totally unacceptable.●

CHIEF JUSTICE HOUSE RETIRES

● Mr. RIBICOFF. Mr. President, April 24, 1978, the chief justice of the Connecticut Supreme Court, Charles S. House, retired. He has had a distinguished career in the Connecticut judiciary and has been an active leader in judicial affairs at the national level. We were both admitted to the Connecticut Bar in 1933. Our friendship continued from that day on.

Charles was a man of great warmth, dignity, and personality. He had an unblurred and perceptive mind that saw the problems of human nature and the law with deep clarity. In addition to his judicial and legislative career, he was active in the civic affairs of his home town, Manchester, Conn.

We served together in the Connecticut General Assembly in 1941. In the late 1940's he became minority leader in the State senate and was voted "ablest legislator" by the press. The Democrats had a large edge in those days and Charlie's job was to maintain an effective opposition.

In 1953 Chief Justice House began his 25th year judicial career on the Connecticut Superior Court. He joined the supreme court in 1967 and became chief justice in 1973. He earned the reputation of being a scholarly and solid writer of opinions, including several landmarks in Connecticut law. While chief justice of Connecticut he served as chairman of the National Council of Chief Justices for a year and cochaired the National Council of Causes of Dissatisfaction with the judiciary.

The increase in litigation and the sheer volume of judicial business in recent years have underscored the need for a strong and effective judicial system at the State level. Charles House has provided that leadership for Connecticut and I wish him well during his next career as State referee.

I ask that a recent article by Gerald Demeusy from the Hartford Courant about Chief Justice House be printed in the RECORD.

The article follows:

CHIEF JUSTICE RECALLS REFUSING NEW TRIAL FOR SLAYER

(By Gerald Demeusy)

It's difficult to picture Charles S. House of Manchester as an iceman. But that was his part-time job a half century ago before he decided on a law career that took him all the way to Connecticut's highest judicial office.

He will retire as 29th chief justice of the State Supreme Court when he reaches the mandatory retirement age of 70 April 24, but will continue in black robes as a state referee, presiding over assigned civil cases on a per diem basis.

He spent 12 years on the Superior Court bench before he was elevated to the Supreme Court in 1965. He presided over thousands of civil cases and celebrated criminal trials. His decisions and rulings almost invariably were

upheld, but he will never forget one reversal that cost the lives of seven people.

He refused to grant a new trial for the late Joseph Taborsky of Hartford, who spent seven years in "death row" awaiting execution for the 1949 robbery-slaying of a West Hartford package store operator. Taborsky said he was entitled to a retrial on grounds that his brother, an admitted accomplice in the murder, was insane at the time he testified against him as a state's witness.

Taborksy appealed and House's decision was overturned. However, a new trial couldn't be held because the state's case against Taborsky collapsed without the brother's testimony. Taborsky was set free.

A year later, a series of robbery-murders terrorized Connecticut. Two men, dubbed "mad dog slayers," struck small business establishments and shot their victims in the head in "Chinese style" slayings.

It took state police seven months to catch the killers. One of them was Taborsky, who was promptly tried, convicted and sent to the electric chair.

House said his most nervous moment on the trial bench was in his first year as a judge when he sentenced a man to death for the killing of a New Haven lawyer during a house burglary.

He should have been hardened to death and serious crime before he donned black robes. He was an assistant state's attorney for Hartford County from 1942 to 1946 and helped prosecute and convict many criminals, sending at least four of them to the electric chair.

His four-year stint as a prosecutor interrupted his Republican legislative career. He was a representative from Manchester in the 1941 session of the General Assembly. He ran successfully for the state Senate from the 4th District in 1946, representing the towns of Manchester, East Hartford, Glastonbury, Marlborough, Newington, Rocky Hill, South Windsor and Wethersfield in the 1947 and 1949 sessions.

He was Republican minority leader of the Senate in the 1949 session when Democrat Chester Bowles was governor and House repeatedly blasted the administration for its spending policies and revenue proposals he labeled "double taxation."

Articulate and persuasive in face of a Democrat-controlled Senate, House occasionally was able to check a runaway vote with logical argument and warnings of consequences.

"He did his homework on issues so he knew his stuff and he had the respect of the Democrats," recalls a veteran newsman.

House was voted "ablest legislator" by the press in 1949 because he impressed reporters with his sedate but effective manner of dealing with almost hopeless Democratic odds.

Shortly after he decided not to run for re-election in 1950, he was promoted as a lieutenant governor candidate for the Republican ticket headed by John Lodge. That bandwagon never got rolling, but Lodge appointed House his legal adviser soon after taking over as governor.

It was Lodge who started House on his judicial career by appointing him a Superior Court judge in 1953. House was 45.

Son of a well-to-do family that owned the House and Hale department store in Manchester, House didn't decide to be a lawyer until after he entered Harvard and took a summer job delivering ice.

"Those were the days before refrigerators and everybody had an icebox," he said. "I used to pull blocks of ice out of the wagon with tongs and lug them, sometimes up three flights of stairs, to customers on the east side of Manchester."

He handled some minor cases after he hung out his shingle in Manchester after passing the bar in 1933, but he didn't begin making real headway until he landed a position with the Hartford law firm of Day, Berry and Howard at a starting salary of $15 a week.

House was a member of the charter committee that drafted Manchester's council-manager form of government. He is a former town counsel, assistant prosecutor, deputy town court judge and was chairman of the Manchester school board until he became a judge.

House was appointed chief justice in 1971. In the past seven years, he has written all major opinions of the high court, most of them involving complex constitutional questions.

The full implication of his opinion that property taxes alone cannot be used to support local school budgets on grounds it could result in "grossly unequal educational opportunities" will be felt by the state and its communities as alternative financing solutions are sought.

He wrote opinions—invalidating Connecticut's traditional mechanics lien laws; ruling a governor lacks power to veto portions of a legislative non-appropriation act; upholding the constitutionality of the 1971 redistricting plan to conform to the one-man, one-vote principle; and sustaining the legality of taxing lawyers.

House said he is perturbed by vacillating rulings on criminal rules of procedure by the U.S. Supreme Court. In a succession of opinions involving the rights of accused persons, the high court has forced Connecticut and other states to revise their rules on the admissibility of confessions, police searches and seizures, self-incrimination and right to counsel.

Although some legislators say they have avoided seeking House's advice on pending bills because they regard him as rigid, too conservative and intensely jealous of the authority of the courts, others find him personable with a good sense of humor. In contrast to his precise written opinions, House writes poetry as a hobby and once penned limericks for a satire on the judiciary.

He created "Judge Les Doless" and put these words in his mouth as he took the judicial oath:

"I may make my rulings by hunch or by guess,

But other judges can straighten out the mess.

I may be stupid, not very keen,

But I'll look lovely in my long black crepe de chene."

Pictures and decorations on the walls of his second-floor office in the Supreme Court building reflect his love of the law and appreciation of a joke, including a collection of satirical English sketches of judges in distress on the bench.

House was chairman of the National Conference of Chief Justices and headed its reform seminar in Minnesota two years ago when Chief Justice Warren E. Burger analyzed causes of public dissatisfaction with justice.

He worked with Burger again in 1976 as vice chairman of a national advisory committee to draft standards for dealing with criminal violence, terrorism, organized crime, private security and juvenile delinquency. He was the only state chief justice invited by former President Ford to attend a White House dinner for the judiciary in 1976.

House is looking forward to retirement "because it will give me some time to think." He said most of his time off the bench is spent researching the law, studying the views of fellow justices and turning out opinions.

He manages to break away for a few hours on weekend to work on the grounds of his home in Manchester or help his wife, the former Virginia Brown of Harrisburg, Pa., with her floral gardens. His year-to-year project is building a stone wall with boulders dug from his 16-acre hillside tract.

The Houses have three grown children—Arthur House, an aide to U.S. Sen. Abraham Ribicoff in Washington; Carolyn House Simmons of Denver, a professor of psychology at the University of Colorado; and Elizabeth House, studying for her doctorate at the University of North Carolina.●

SENATOR MATHIAS SPEAKS ON FAIR HOUSING

● Mr. BROOKE. Mr. President, on April 18 the distinguished Senator from Maryland (Mr. MATHIAS) delivered a thoughtful and enlightening address at the National Fair Housing Conference sponsored by the Department of Housing and Urban Development and the National Committee Against Discrimination in Housing.

I share many of the concerns expressed by Senator MATHIAS in that speech. We have just not made sufficient progress toward meeting the goal of eliminating housing discrimination since the Fair Housing Law was enacted in 1968. And an adequately funded and continuing Federal commitment to housing construction and rehabilitation is essential if we are to begin to make decent housing available in a variety of neighborhoods and at rent levels which low-income families can afford. Another element of a fair housing strategy is the effective implementation and enforcement of the fair housing laws. S. 571, which was introduced by Senator MATHIAS, would provide additional powers for the Department of Housing and Urban Development and the Justice Department to insure compliance with these laws.

Mr. President, this speech reflects the great interest and insight of the distinguished Senator from Maryland in the area of fair housing. I commend these remarks to my colleagues and ask that they be printed in the RECORD.

The remarks follow:

FAIR HOUSING: AFTER A DECADE

It is a pleasure to address this Fair Housing conference and to join you in marking the tenth anniversary of the passage of the National Fair Housing Law, Title VIII of the 1968 Civil Rights Act.

When I say it's a pleasure, I really should qualify that. It's a pleasure to be among friends in the fight to make fair housing a reality. But, it is painful to consider how much still needs doing 10 full years after it became the law of the land "to provide . . . for fair housing throughout the United States."

It is true that we've made some progress since 1968. You don't see crosses burning on suburban lawns these days, or read the words "white only" in real estate ads. But we are still very far from providing "fair housing throughout the United States." In fact, sometimes it looks as if we've merely exchanged blatant forms of discrimination for subtler, more insidious ones.

Yesterday you reviewed the survey done for HUD by the National Committee Against Discrimination in Housing. I'm sure you found it as discouraging as I did that the

study uncovered acts of racial discrimination in housing in American cities from coast to coast, north and south.

Another recent study—this one by the American Bar Association—concludes that exclusionary zoning and other local governmental action "have prevented access to decent housing and have reinforced and aggravated patterns of racial and economic segregation." The ABA study also finds that "courts and legislatures have done far too little to prevent this governmental abuse of power."

So, painful though it is to admit it, on this 10th anniversary of the Fair Housing Act, we haven't licked discrimination by a long shot. We may just have driven it underground.

That great civil libertarian Henry Ward Beecher maintained that "Laws and institutions are constantly tending to gravitate. Like clocks they must be occasionally cleansed, and wound up, and set to true time."

I think the time has come to wind up the Fair Housing Act and set it to true time. And I think I've got the right key to do that job.

Last Monday I chaired hearings of the Senate Judiciary Subcommittee on the Constitution on my bill to improve HUD's enforcement powers in fair housing disputes. During those hearings, I heard cases of housing discrimination based not only on race, but on sex, marital status, children, physical disability and age. The terrible pervasiveness of discrimination which these hearings disclosed convinces me that we need to put some sting into HUD's enforcement powers.

As a longtime observer of our disarmanent negotiations, I have come to appreciate just how powerful a weapon the threat of force can be. The importance of some weapons systems lies more in their deterrent power than in the likelihood that we will use them. And I think there's a lesson to be learned here and applied elsewhere.

I would like to get a little deterrent threat into HUD and behind the Fair Housing Act. And Senator Glenn and I have introduced a bill which I think will do the job. S. 571, which has been cosponsored by Senator Bayh and Senator Humphrey, puts the federal government squarely on the side of the individual complainant seeking a fair chance to rent or buy housing.

At present, as most of you know, HUD may only attempt to conciliate between landlord and prospective tenant, or between seller and buyer in cases of discrimination. The track record of HUD under this procedure has not been outstanding. Only 25 percent of the cases ever get to the conciliation stage. About half of the individual complainants are not represented by counsel during the proceedings and, not surprisingly only one-half of the cases are successfully resolved.

Those whose cases do not get to conciliation in a timely fashion, or whose conciliation agreements are not adhered to, may take their case to court. But, few choose to pursue this route because of the time and costs involved.

My bill provides HUD with the power to refer to the Justice Department for prosecution individual complaints of discrimination which it considers substantive. It empowers the Justice Department to enter suit on behalf of those individuals, thus sparing them the expense of attorneys and reducing the amount of personal time they must spend on their case. Additionally the bill provides for the awarding of attorneys' fees to the successful party.

I suspect people won't be half as quick to discriminate against the poor or the elderly or anyone else, if they run the risk of being zapped with a court suit and costs. I think S. 571 will provide just the sting HUD needs for effective enforcement.

I hope I can count on your support for this legislation because I believe it will be an effective weapon in the struggle to erase discrimination from the face of America. It will help make certain that when we come together ten years from now to mark the 20th anniversary of the Fair Housing Act, we won't have to say, "Yes, we've made some progress, but . . ."

Now, because a long talk sits heavily on full stomachs, I want to touch on just two other aspects of discrimination before I close.

First, there are certain bedrock realities we must bear in mind in the drive for equal housing opportunity. Equal opportunity is meaningless without an adequate supply of housing at prices and rents all can afford. In many of our communities today the distinction between racial and economic discrimination in housing is blurred. Congress and HUD must ensure that sufficient low and moderate income housing is provided throughout regional housing markets to alleviate the pressures which give rise to economic discrimination.

When we begin in earnest to view housing dynamics in a broad market area context, without regard to local jurisdictional boundaries, then, at last, we will be on our way to an enlightened policy and practice in fair housing.

Finally, I have talked about setting our laws and institutions to "true time," but I think we all know, deep in our hearts, that prejudice and discrimination cannot be overcome by laws alone or by pressure from institutions.

There are Archie Bunkers; there does exist a mind-set among certain people in this country; prejudices die slowly. And changing attitudes is a very delicate process. It requires time and patience and quiet determination.

We must all exert ourselves to promote attitudes which accept equal opportunity for all and which will ultimately become a positive force for affirmative action.

The change of mind and heart we need will likely come through public education and exposure to the different ethnic, racial, and other groups that are targets of discrimination. I have spoken of putting some sting in enforcement, but the adversary process can only be a technique of last resort, when other methods of persuasion have failed.

The surest guarantee to fair housing and equal opportunity will be the sturdy, widely held conviction that they are right.

In my lifetime, with each succeeding generation, I have seen that conviction spread and take deeper root, and I honestly believe that we are not far from the day when America's clocks will be set to true time.●

TUITION ADVANCE FUND

● Mr. McGOVERN. Mr. President, many of us are concerned about the rising cost of college tuition. We are struggling to find ways to lift the burden from parents and students who cannot afford to pay tuition and other college expenses, and yet are not "poor enough" to qualify for assistance.

Every effort should be made by the U.S. Senate to insure that students, a most valuable national resource, are given every opportunity to develop knowledge, skills, and talents which will enrich their lives and enable them to become productive members of society.

The president of Boston University, John R. Silber, was recently interviewed in the Washington Star. President Silber endorses a bill sponsored by Representative MICHAEL HARRINGTON of Massachusetts, called the tuition advance fund. This bill provides students an advance from the Federal Government of their total tuition costs, and up to $1,000 for other college expenses such as room and board. Students are to pay the money back after graduation at a rate of 2 percent of their gross national income. This means that no one would be denied the opportunity to attend college for lack of funds. In addition, the legislation places the responsibility of paying the bill on those people receiving the education.

Whether or not this legislation is feasible and should be adopted remains to be seen. In any case, I urge my colleagues to read President Silber's remarks and to consider the tuition tax fund as a means of aiding those in need of tuition assistance.

Mr. President, I ask that this interview appearing in the Washington Star of April 21, 1978, be printed in the RECORD.

The interview follows:

AN EDUCATOR ON PAYING FOR COLLEGE

(John R. Silber has been president of Boston University, one of the nation's largest urban institutions of higher learning, for more than seven years. He was interviewed by Washington Star Staff Writer Gloria Borger.)

Question: The high cost of a college education is on the minds of many people. Do you feel that the cost of a college education is zooming out of control for most middle-class students?

Silber: I don't think it's zooming out of control compared to the cost of automobiles, or houses, or food, or anything else. The price that is charged for a college education—the tuition price—has gone up at about the same rate that there have been increases in all these other goods. We've tracked them over a period of a number of years. Herbert Hollman at MIT did a study over about a 30- or 40-year period and he found that the prices of many of these basics have gone up about the same rate as college tuition.

Q: How do you feel about President Carter's estimation that the tuition tax credit proposal is unconstitutional?

A: I don't know that it's unconstitutional. I rather think that it probably is constitutional. If his statement is based on the notion that it involves providing tax credit for people who send their children to parochial schools. I think he'd better consider that it still says "In God We Trust" on coins. If it's constitutional to print "In God We Trust" on coins, I know that the separation of religion and state cannot be as absolute as some people interpret it to be.

Q: Do you prefer the tax credit plan to Carter's plan?

A: No. I think the Carter proposal, which is an enrichment of the programs of Senator (Claiborne) Pell (D-R.I.) and Congressman (William) Ford (D-Mich.) and Congressman (John) Brademas (D-Ind.) and others, a basic enhancement of BEOG-SEOG (Basic Educational Opportunity Grants-Secondary Educational Opportunity Grants) college work-study program. I think there is a bet-

ter proposal. The tuition tax credit proposal answers to a fundamental need; there's no doubt about it that middle-class parents are simply unable to meet this increased cost. To say that the cost is no greater than the cost of an automobile is not to say that it's not too high. There are a lot of people who would have trouble buying the kind of car that they once bought. They now move down to a compact car, and that's fine from the standpoint of fuel consumption, but it's not so good a car as they used to have. They may find the same pressures on them with regard to education. Now, the tuition tax credit proposal responds to a very important need, but it does not respond effectively, because the maximum relief under the tuition tax credit proposal so far as college education is concerned would amount to about $250 a year while the parent may be facing a tuition bill of $5,000. So actually, that tuition tax credit would be consumed in the tuition increase that would happen a year after it's passed.

Q. What about this bill to be sponsored by Rep. Michael Harrington of Massachusetts, and supported by yourself, called the "Tuition Advance Fund"?

A. The "Tuition Advance Fund" is designed to provide a systematic and comprehensive answer to the financing of higher education in both the state and independent sectors. Under this plan, any student who has successfully completed his freshman year would be eligible to receive—as an advance from the federal government—the full price of his tuition at any accredited college or university to which he was admitted. That means that the financial barrier to education would be effectively removed. BEOG and SEOG would be continued. He could apply in addition under this proposal for up to $1,000 for room and board charges or other things. Once the "Tuition Advance Fund" is passed, no student in America could be denied education because of financial barriers.

Q. Would the student have to show financial need?

A. No. Financial need would be evidenced by his presentation of his tuition bill; that would be all the need the student would need to show, because it will be his need, and not the parents' need, that we would be trying to assess. Under this plan, it would also fulfill another American value, and that is that the person who receives the benefit should be the one who pays for it.

Q. How would he pay it back?

A. He would pay it back by a repayment of approximately 2 percent of his gross annual income, over his working lifetime. If he had a very high salary, he might pay it back in 10 years or 15 years; if he had a moderate income he might pay it back over a period of 20 or 25 years; if he had a very low income—let's say he had an income of $7,500 a year—he probably wouldn't pay back the advance in his entire lifetime.

Q. How much would this cost to get started?

A. It depends on how much people decide to use it, but our best estimate is that it would cost somewhere in between $3.5 and $4.5 billion dollars. And then, within about 20 years, the repayments into the fund, and the interest on the fund, will equal the amount that has to be paid out. Beyond that time, it would be a self-perpetuating system. We will have, in effect, a national educational endowment.

Q. If a plan is not adopted, what is the future of great institutions like Boston University, which will have to increase their tuitions?

A. There are 1,500 independent universities in the United States, and we educate about 25 percent of those educated in this country. If there is not some relief of this sort, a large number of these institutions will simply go out of business. I think, unfortunately, that the greatest toll will be taken among the small liberal arts colleges, that provide an invaluable educational alternative in this country, because there are some things that are done best on a small scale. Boston University is a relatively large university, with 24,000 or 25,000 students, so I imagine Boston University is going to be able to survive this demographic decline that we're going to face. But there will be a very large number of independent colleges that will go out of business, and a few will be the large ones.

Q: What is the quality of students you feel are applying to colleges now?

A: Our applications at Boston University have increased in quality. Our SAT scores have risen over the last four years, but the national averages on the SAT scores have declined. That's because we've raised our standards of admissions, not because the quality of high school graduates is on the increase. I think the quality of teaching in high school has declined substantially, especially in the areas of English and history, and in the areas of writing skills, over the last 25 years. All you have to do is compare the number of writing assignments that a high school student has now over what he would have had 25 years ago, and you find out that they do far less writing. They don't write so much, and consequently they don't write so well, because writing is something that one learns by practice.

Q: There's been a lot of talk recently about Harvard University's new core curriculum, and the tradition is: As goes Harvard, so goes the rest of the country. Is Boston University thinking of going back to basics, the same way that high schools may be?

A: I think the basics we need to go back to are the fundamental modalities of human life. It is what was taught under the copybook headings of elementary schools 50 years ago. The fundamentals, the basics, that need to be understood today: that water will wet, that fire will burn; that wishes are not horses. There are the basics. Some basic education into the finitude of human life: the morality of human beings; basic truths about life—"All that glitters is not gold." These are examples of copybook headings. If you're talking about basic education, it is that basic education that is missing. That's the curriculum that has been removed and replaced with the television injunction "Enjoy yourself!" and the instruction that pleasure-seeking is the only moral requirement imposed upon man.●

PASSIONATE POLITICS

● Mr. GOLDWATER. Mr. President, the eminent columnist, Mr. George Will, paid a fellow Senator such a compliment in this week's Newsweek that I think all of my colleagues should be aware of it. He has printed it so the public could see what I have long, long known to be true about this young Senator from Nevada. I have had the rare privilege of knowing him and his family for many, many years, and I like to think I had a small part in getting him into politics. His honesty, forthrightness, and courage have always been the marks of this man which were given to him by a father and mother of the same stripes. Even though Senator LAXALT was on the losing side, as I was in the Panama Canal debate, he came out of it respected and honored by every one of us who serve in the Senate of the United States. Therefore, I ask that this article be printed at this point in my remarks.

The article follows:

PASSIONATE POLITICS

(By George F. Will)

Paul Dominique Laxalt got his middle name and his slightly olive complexion. from his father, a Basque who emigrated from France to be a sheepherder in the American West. Laxalt's round face is as placid as a mountain lake, without the lines that life has etched on most men 55 years old. From his closely cropped graying hair to his black cowboy boots, he is a blend of true grit and amiableness. And no other current first-term senator has earned from colleagues the amount of respect and affection enjoyed by this Nevada Republican.

Laxalt had been in the Senate less than a year when he became campaign chairman for a challenger against an incumbent President of his party. Laxalt fought at Ronald Reagon's side to the bitter end, but never felt or provoked bitterness. He has just spent two months on the Senate floor battling supporters of the Panama Canal treaties, and as leader of the opposition to the treaties he never uttered or received a rancorous remark. A supporter of the treaties did ask Laxalt how Nevadans would feel if a foreign government owned a 10-mile-wide strip of land through Nevada. The questioner was leading with his chin. Laxalt replied, laconically, that 87 percent of Nevada is owned by the Federal government and Nevadans have reasons for regarding it as a hostile presence.

FEDERAL SPACE

The Federal government owns a substantial percentage of the land of Western states: Alaska 96, Arizona 44, California 45, Colorado 36, Idaho 67, Montana 30, New Mexico 34, Oregon 52, Utah 65, Washington 29, Wyoming 48. (East of the Mississippi, the highest Federal ownership is in New Hampshire, 12 percent.) It is commonly thought that people in industrialized, urbanized states must feel more closely bound up with government than do the people who live in the wide-open spaces. But a lot of those spaces are Federal property. Nowhere is the government more important, conspicuous or frequently irritating than it is in the Mountain West, where it has so much to say about land use, water, timber, grazing, mineral rights and many other things that matter. That is one reason why the Mountain West has replaced the South as the region with the strongest sense of identity, and the most pronounced truculence about the central government.

Of course, nothing is quite like Nevada. Even the severe geometry of its borders suggests strangeness rather than rationality. When the Comstock Lode was exhausted, so was Nevada, or so it seemed. Between 1880 and 1900, while other mountain states tripled their populations, Nevada's declined from 65,000 to 45,000, and some Easterners suggested depriving Nevada of statehood on the ground that it was a "rotten borough." But Nevada had a glittering, not to say gaudy, future in what Daniel Boorstin, the historian, calls "exploiting the Federal commodity": "In the womb of the Federal system itself there lay hidden some remarkable moneymaking opportunities. . . . The most spectacular scene of these unpredictable opportunities was Nevada. . . . Nevadans showed how enterprise and ingenuity could make a new resource out of statehood itself."

DIVORCE AND GAMBLING

The Federal system gave rise to the practice of "migratory" divorce, with people traveling around the Republic to take advantage of liberal states' laws. But Nevada was determined to crush the competition. In 1931,

it enacted a six-week residency requirement for divorce, and legalized gambling to boot. The marriage, so to speak, of divorce and gambling produced a growth industry. And it came to pass that a man who had spent much of his youth herding sheep in the Sierra Nevada mountains became senator from a state in which the economy is based on the soft fall of cards and chips on green baize.

Laxalt is always mild, so he is only mildly perturbed by what is causing sleeplessness among his colleagues. Wherever two or more senators or congressmen are gathered, there you will find anxious discussion of the apparent multiplication of "one-issue constituencies." These are groups of voters who say they will vote against any legislator who votes "wrong" on a particular issue.

The canal was such an issue. And now Congress turns to another, the proposed "package" that links aircraft for Israel with aircraft for Saudi Arabia and Egypt. Some legislators count seven other issues that demonstrate the troubling "intensity factor" in today's politics, issues that attract persons who describe themselves as "one-issue voters. These include such durable issues as gun control, abortion and the Equal Rights Amendment. The more seasonal issues include 100 per cent parity for farmers, the bill for labor-law reform; the proposal to lift the arms embargo imposed against Turkey after the Cyprus invasion (a proposal that is opposed by Greek Americans), and the bill to provide a credit on income taxes for a portion of tuition paid to schools, including sectarian schools.

On some issues there is no "safe" vote: there are passionate blocs on both sides of the ERA and abortion disputes. But few people are intensely for selling jets to Saudi Arabia, or for gun control. It is not certain how many tough-talking one-issue voters mean what they say. But it is significant that so many people talk so fiercely about so many issues. One reason they are stirred up is that there is a new class of stirrers. These are quasi-political entrepreneurs who have discovered commercial opportunities in merchandising discontent, and have refined the art of direct-mail fund raising. Furthermore, many people believe that talking to a legislator is the only alternative to talking to a stone-deaf bureaucracy, or cussing the television set. So to ward off a sense of impotence, they talk to their legislator about a single headline issue, and they threaten him with the only weapon they have, their vote. They do that for the same reason a farmer hits a mule with a 2-by-4: to get his attention.

ESSENTIAL SERVICE

But when some motives have been appropriately discounted, the fact remains that most "intense" constituencies bring a leavening moral seriousness to the political process. It may be argued that any of them is mistaken; but few are venal. However turbulent they make politics, they do also elevate it above the common preoccupation with bending public power for private economic gain. Intense activists, like the ones who fought so ferociously against the canal treaties, perform an essential service. They help create a truly *public* opinion, and give a voice to persons who lack political assets and who otherwise would feel, and be, inarticulate and impotent.

So as the dust settles and the nation moves on to other arguments, and other intense constituencies mobilize, I, who think the opponents of the treaties were mistaken, salute them, and especially their leader. Laxalt gave to the nation, not for the first or last time, the gift of good example: tenacity for principle, civility under pressure, graciousness in disappointment.●

U.S. CHAMBER OF COMMERCE "STATE OF SMALL BUSINESS" REPORT

● Mr. NELSON. Mr. President, an important new survey of small business economic conditions has recently been reported to President Carter by the Center for Small Business of the U.S. Chamber of Commerce. This report, based partly on a poll by the Gallup organization and partly on seven "grassroots" meetings held around the country, notes broad areas of concern voiced by the Nation's small business entrepreneurs.

It makes sobering reading.

Small businesses identified Government actions as their greatest source of difficulty—more so than market competition or any other private sector difficulty. For example, over 90 percent of the small business owners surveyed reported spending more employee time on regulatory compliance now than 2 years ago.

In four major policy areas—taxation, regulation, paperwork, and inflation—the report offers a series of recommendations for positive action to aid small business.

Already many of the recommendations in the report have become bills in the 95th Congress. It ought to be noted particularly the emphasis the report places on the need to hold a White House Conference on Small Business, a recommendation which will become a reality. The President announced on April 5 that such a conference will be held in late 1979.

In addition, the decision recently reached by the Securities and Exchange Commission to initiate a sweeping review of the investment barriers faced by small business—a subject treated in the report—also reflects many findings presented to the Senate by the Small Business Committee.

Although the findings presented in the report reflect disquieting threats to the health of small business, there are optimistic notes as well. The survey found a refreshing spirit of determination among small business owners—determination to stay in business, to survive the tough struggles, and to beat the odds by succeeding. In that spirit of dynamism lies our best hope for the economic future of our country.

I ask that the report be printed in the RECORD.

The report follows:

THE STATE OF SMALL BUSINESS: SUMMARY OF FINDINGS AND RECOMMENDATIONS

FINDINGS

Small business today is in a state of declining economic strength. Actions of government are more important causes of declining strength, especially the adverse effects of taxation, regulation, (with its accompanying paperwork) and inflation, than are private market forces. Despite these conditions, a determination and optimism prevails among a high proportion of small business executives.

RECOMMENDATIONS

Tax Revisions. Changes should be made in the tax code to provide:

Increased corporate surtax exemption;

Tax reduction for individuals and corporations;

Liberalized depreciation;

Permanent and expanded investment tax credit;

Improved capital gains treatment;

A higher minimum accumulated earnings credit;

More favorable operating loss carryover;

A "rollover" deferral of tax on small business investments;

Prompt refund of overpayment of estimated income tax; and

Increased limits on Section 1244 stock investments.

The deduction for non-business interest should be retained.

Reducing Regulatory Burdens. Laws, regulations and management procedures should:

Provide systematic review of all existing regulations, combined with sunset legislation;

Face up to the real costs of regulation by advance analysis of all proposed regulations to show costs of compliance;

Take into account the limited resources of small business when drawing up regulatory and reporting requirements;

Reduce the number of regulations, and simplify those which remain;

Eliminate uneven and inequitable enforcement; and

Make agencies, and the government at large, accountable for the effects of regulations.

Reducing Paperwork Burdens. Closely linked to easing of regulatory burdens, steps should be taken which will:

Implement the recommendations of the Commission on Federal Paperwork;

Strengthen and coordinate federal program and agency management;

Encourage the Congress to make government responsible for the paperwork it creates; and

Support adoption by the House of Representatives of a rule similar to the McIntyre Amendment approved by the Senate.

Controlling Inflation. With the assistance of the steps proposed above, each of which will help reduce inflationary pressures, the Administration should give strong leadership to:

Maintain an independent Federal Reserve System;

Balance the federal budget; and

Hold federal spending to a fixed percentage of GNP.

CONVENING OF A WHITE HOUSE CONFERENCE ON SMALL BUSINESS

The President should convene such a conference promptly to develop research on the economic status of small business, particularly as that status is affected by government actions, along with recommendations to strengthen small business in the future.

REPORT ON THE STATE OF SMALL BUSINESS BY THE CENTER FOR SMALL BUSINESS, CHAMBER OF COMMERCE OF THE UNITED STATES

The state of small business today should be a source of concern for all Americans and especially for national leaders of government and business. More significant to the economy than most citizens realize, small business faces conditions today which threaten its vitality and its capability to contribute the creative, growth-generating and consumer-serving functions on which the nation has long depended.

The state of small business can be characterized by three conditions: a declining economic strength; a direct sapping of strength by excessive government, especially by taxation, inflation and regulation; and (in spite of these) a determination to survive and optimism about growth among small business owners.

DECLINING ECONOMIC STRENGTH

Small business has been declining as a proportion of all business over a long period of time. A variety of explanations can be offered for the trend, but the trend itself is

a great source of concern for small business owners.

While numbers of firms continue to increase, their relative strength has dropped significantly. Shares of total employment, assets and earnings contributed to the economy by small companies have declined dramatically in the last two decades.

Normal market competition causes a high mortality rate among new and inexperienced managements in recent years new forces have emerged which cut profitability and success rates of small enterprises.

Many small companies short of capital cannot grow because government-induced costs and tax burdens prevent accumulation of earnings for growth. Small companies able to grow are practically foreclosed from the public securities markets, in large degree because of new government controls. As a result, even these more fortunate and aggressive managements may find themselves in desperate need of equity capital and with no favorable means of acquiring the capital except by merger into a large company.

SAPPING OF STRENGTH BY EXCESSIVE GOVERNMENT

Actions of government are identified by small business as the greatest source of difficulty for small business, more so than market competition or any other private sector difficulty.

Small business meeting groups and survey respondents reached by the Chamber identify their top three problems as taxation inflation and regulation—all brought on by government. The order of these three may vary, but the three consistently outrank other problems.

Taxation affects small businesses as producers and employers in the way it affects employees. It is a cost. In addition, current federal taxation shrinks the general availability of investment funds; prevents the small entrepreneur from retaining the earnings of his company for growth; treats capital costs less favorably than do most industrialized nations. Payroll taxes have grown to a level that stifles development, with frightening increases ahead. Estate taxes all too often cripple or force the sale or closing of successful family owned businesses and farms when the founders retire or die. It is imperative that relief be provided.

Inflation is more insidious. At a 6 percent annual rate, inflation adds $10 billion each year to federal tax collections—and to the tax costs borne by Americans. Inflation puts the small business in the middle between rising supply costs beyond its control and the resistance of a market beyond its control. Inflation erodes and discourages savings. Inflation cannot be stopped by an individual entrepreneur or by all small business acting in concert. Government must attack inflation more effectively if it is to be controlled.

Government regulation, for all its intended public good, too often becomes a perverse and victimizing process for small business, which is most vulnerable to damage from such controls. Small business owners lack the personal expertise, or the resources to employ expertise, necessary to combat or comply with the maze of regulatory requirements. Until costs of meeting federal standards have been shown to run consistently higher in small operations than in larger units. Faced with unbearable requirements, small firms are far less likely to challenge a law in court than is the case with larger companies.

A facet of regulation which surfaced especially in face-to-face meetings with small business owners is the extent to which actions of government invade the most minute operating details of individual firms.

Meeting participants related case after case of rigid and overly-detailed regulations which seem to have strayed from protecting the public interest and instead now focus on trivial flaws that can be construed as violations. The net effect of such over-regulation is to force law-abiding owners to turn their primary attention away from running their businesses and to focus instead on avoiding penalties for petty violations.

Discussion of regulations brought forth displays of outright fear: fear of the regulator, fear of the power given agency staffs by the law, fear that one detailed requirement will be used as a hunting license to find other violations

Understandably, owners of small business in these circumstances react with feelings of outrage, not to mention loss of respect for individual regulations and for the governing process in general. Such experiences of small business flash a warning signal for the leaders of government.

DETERMINATION AND OPTIMISM

Along with the generally negative condition of small business, there is evident a determination and personal optimism on the part of many owners that seems to ignore, or to defy, difficulties. Small business owners who have expressed themselves to the National Chambers often show more concern for small business in general than for their own companies. "It will be tough, but we will make it," is the sentiment. True, the people with whom the Chamber has talked are often executives of the more successful companies. Even so, this characteristic seems worth stressing. It tells a great deal about the dynamism and future potential of small business if this nation will provide a healthful economic climate in which it can operate.

EVIDENCE OF THE STATE OF SMALL BUSINESS TODAY

This report makes extensive use of information gathered through personal contacts in meetings, but many other sources of information were used, each one of which appears to produce similar findings about the state of small business.

GRASS ROOTS MEETINGS

The National Chamber's Chairman of the Board began a grass roots meeting series in September 1977, which has taken him to numerous cities around the United States. In each city visited by the Chairman, groups of small business executives are invited to discuss issues they consider most important to their companies. Through the first seven meetings, in Tulsa, Dallas, San Antonio, St. Paul-Minneapolis, Des Moines, Indianapolis and Louisville, more than 60 subjects were raised by executives. The broad categories of concern are listed below in the order of frequency with which they were mentioned:

Government regulatory problems;

Other governmental problems (taxation, government contracting, minimum wage, social security, government spending, national health insurance, inflation);

Need for better small business organizational efforts;

Inadequate economic education programs;

Product liability problems;

Foreign competition, shortage of investment capital, loan difficulties, minority enterprise difficulties.

For 1978, similar meetings are scheduled in Spokane, Richmond (Va.), Mobile, Philadelphia, and Syracuse, with other cities to be added.

Full records are being kept on all the 1977–78 meeting series for a formal report to the National Chamber at the end of April, 1978.

GALLUP/CHAMBER BUSINESS CONFIDENCE SURVEY

A new cross-section series, conducted by the Chamber with the Gallup Organization, assesses business attitudes periodically. Survey methods allow the Chamber to distinguish responses by executives of small firms from those of larger companies. The first survey results were made available at the end of 1977. Among the most notable findings are these:

Executives of small business are very concerned about government handling of economic policies; a majority (56 percent) expects the government will do "a poor job" in the next two years, and 42 percent expect "only a fair job." Two percent expect "a good job" by the government.

More than 90 percent of small business owners say federal regulations require more employee time and company money than was the case two years ago, and they expect regulation to be one of the two most serious problems they will encounter during the next two years.

Among small business respondents, 58 percent expect employee health and safety regulations to be either a "serious" or "very serious" problem; 49 percent expect environmental regulations and 70 percent expect other governmental regulations to be "serious" or "very serious" problems.

Taxation is the only other type of problem which small business expects to be more troublesome than regulation. Payroll taxes alone are expected to be a serious problem for 85 percent of small business; "high or rising state and local taxes" by 84 percent and "high or rising federal taxes" by 70 percent.

More than 80 percent of small companies expect energy costs to be a serious problem, and a majority (57 percent) expects energy availability to be a problem.

Fifty percent of small companies look for labor and wage negotiations to present greater difficulties than in the past, and an equal proportion expects minimum wage laws to be a serious problem. By contrast, only one in three large firms expects labor negotiations to present greater difficulties than in the past and only one in four ranks minimum wage laws as a serious problem.

SURVEY ON SOCIAL SECURITY FINANCING

A National Chamber survey of member firms in September sought to identify preferences for methods of financing future social security costs. It also explored how these companies would alter their practices to absorb rising future payroll tax costs.

Responses vividly explain why so many individual owners feel that rising governmental requirements on small business result in damage to the public and to employees even more than to the companies involved.

In order of the frequency of response, here is how how the small companies expect to compensate for newly-enacted payroll tax increases:

68 percent plan to increase prices;

55 percent plan to hold down increases in wages and other benefits for employees;

54 percent will be forced to cut profit margins;

46 percent will hold off hiring new employees;

38 percent will invest in labor-saving equipment to replace present and future employees;

35 percent will be forced to delay planned expansion of their firm;

28 percent will actually lay off present employees;

16 percent will be forced to reduce services to customers.

SURVEY OF EFFECTS OF FEDERAL MINIMUM WAGE

Small business owners feel that minimum wage laws fall especially hard on their companies, which tend to be less profitable and generally more labor intensive than larger firms.

Attempts to delay or reduce a rise in the federal minimum wage standard ranked high among small business priorities for several years.

In September the Chamber presented to Congress a survey of several thousand of its smaller member companies aimed at determining the impact of minimum wage laws, including legislation then being considered and later enacted.

As with Social financing, respondents report a substantial direct effect on their companies from increased minimums, but they feel even more strongly that the public and their employees are hurt by the effect on the economy from increased minimums.

In order of frequency, here is how the Chamber's small member companies expect to adjust to the increases which became effective January 1:

82 percent will increase prices;

79 percent will hold off hiring new employees;

65 percent will reduce their profit margins;

48 percent will cut back on number of hours their employees work;

48 percent will invest in labor-saving equipment;

46 percent will cut present work forces;

36 percent will reduce customer services.

OTHER SURVEYS OF SMALL BUSINESS CONDITIONS

Periodic surveys in the last year confirm the attitudes displayed in the meetings and surveys summarized above.

Polls taken during National Chamber Annual Meetings provide a good sampling of local business leadership opinion from around the nation. In the most recent meeting in May, 1977 small business owners identified regulation as their number one problem and inflation as their second most important problem.

Participants in a session on regulation identified the following among specific problems of the regulatory process with which they had personal experience:

Bias on the part of inspectors or investigators;

Questionable competence of agency personnel;

Confusing explanations when government seeks information;

Frequent requests for the same information from two or more agencies;

A primary "preservation of bureaucracy" motivation in agency decisions.

Each of the summaries above is extracted from more detailed reports, full texts of which are available.

RECOMMENDATIONS FOR IMPROVING THE STATE OF SMALL BUSINESS

Given the conditions just described and the many attitudes recorded in National Chamber meetings and surveys, recommendations to assist small business development clearly need to include improvements in taxation, regulation, paperwork, and control of inflation. The following proposals are respectfully presented for consideration by the President.

TAX REVISIONS

Taxation is an almost universal problem for small business. Tax relief is the only way that many companies can retain earnings to generate internally the capital they can secure from no other source.

The National Chamber's Council of Small Business recently developed an 11-point Small Business Tax Reform Package, which the Chamber has adopted. The Chamber urges that the Administration support and the Congress enact revisions which will:

Increase the corporate surtax exemption to $200,000 and reduce the normal tax rate on the first $50,000 of income;

Reduce rates on individual and corporate income;

Liberalize depreciation provisions;

Make the investment tax credit permanent and raise the limit on used equipment to $200,000;

Expand the capital gains deduction and reduce the tax rate on capital gains proportionate to the length of time a capital asset is held;

Increase the minimum accumulated earnings credit to $500,000;

Allow a net operating loss carryback of three years and a carryforward of eight years;

Permit a "rollover" deferral of the tax on the sale of equity of a small business if proceeds are reinvested in other small business;

Refund overpayments of estimated income tax when claimed, rather than at year end; and

Double the current limits on special treatment of capital losses on small business investments under Section 1244 of the Internal Revenue Code.

In addition, present deductions for nonbusiness interest should be retained.

These proposals would reduce rates for all taxpayers, they would improve small business cash positions by more favorable treatment of depreciable assets, and they would encourage more private investment in small companies.

REDUCING REGULATORY BURDENS

The Chamber applauds initiatives of this Administration in seeking to make the regulatory function effective, workable and less burdensome. The recent draft Executive Order for improving regulatory practices embodies many of the principles the Chamber supports.

The OSHA "common sense" approach to enforcement is a specific example of commendable action. Other examples, now being considered by the Congress, are the proposed Regulatory Flexibility Act and the Small Business Impact Statement Act.

Reform efforts should be based on maintenance of a competitive free market system as the primary source of meeting consumer needs, with regulation only to the extent essential to the protection of health, safety and the general welfare.

Regulation should be administered so as to eliminate uneven and inequitable enforcement, or duplication and conflict in requirements. Procedures should provide for prompt regulatory decisions consistent with due process; assure adequate consideration of costs and benefits; and minimize compliance costs. Orderly development of regulation requires that Congress set basic policy, that agencies regulate in accordance with Congressional intent and that Congress maintain oversight review of regulatory actions.

The Chamber urges continued strong leadership by the Office of the President to assure that further improvements are proposed to the Congress where appropriate and are vigorously implemented where Executive Branch action is called for.

REDUCING THE PAPERWORK BURDEN

At the request of the President one year ago, the Chamber presented a comprehensive set of recommendations for reducing the paperwork burden created by the federal government. Since that time, the Commission on Federal Paperwork has completed its work and transmitted final recommendations compatible with the Chamber's suggestions.

As in the case of regulatory improvements, the Administration has the pivotal responsibility for bringing about change in paperwork requirements. Much of the total paperwork volume stems from executive agencies operating under broad control of the President. The complexities of paperwork requirements do not lend themselves to treatment under primary leadership of the Congress. The strong personal leadership of the President is the key to effective action in reduction of paperwork as it is in regulatory reform and related organizational and management improvement.

The Chamber urges determined effort on the part of the Administration to implement recommendations of the Paperwork Commission which can be accomplished by Executive Order. Priority should be given to strengthening and coordinating federal management. This is imperative to a more efficient, effective and responsive government.

The Chamber urges the Administration to give priority support to Commission recommendations for action by Congress that would make the government responsible for, and responsive to, the burden that government puts on others. A priority example would be adoption by the House of Representatives of a paperwork impact assessment rule similar to the McIntyre Amendment approved by the Senate.

CONTROLLING INFLATION

Inflation may be the most intractable economic problem of our time, and effective leadership in the federal government can help control it.

Chief among National Chamber recommendations to reduce inflation is maintenance of an independent Federal Reserve System. The independent Federal Reserve is the one element in the federal establishment that most consistently tries to combat inflation. In addition, a balanced federal budget combined with a limit on total federal spending can contribute substantially to reducing inflation.

The Chamber applauds the Administration's pledge to balance the federal budget and to hold spending to a fixed percentage of the gross national product. The Administration should stand fast on these pledges and take no action that would weaken, or support Congressional efforts to weaken, the independence of the Federal Reserve System.

CONVENING OF A WHITE HOUSE CONFERENCE ON SMALL BUSINESS

The Chamber urges that prompt steps be taken to call a White House Conference on Small Business to accomplish several important objectives:

Increase public awareness of the importance of small business;

Examine specific problems of small business;

Explore possible governmental actions to encourage the growth of small business.

Among specific subjects, the conference might address each of the problems identified in this report plus others such as government contracting, venture and equity capital, and more adequate economic data on small business.

The last such effort, made 22 years ago by a Cabinet Committee on Small Business, produced notable results including the landmark statutes to authorize privately-operated venture capital companies and the Subchapter S provisions of the Internal Revenue Code to help closely-held businesses.

Convening of a White House Conference on Small Business could be expected to generate new initiatives of at least equal importance.

CONCLUSION

The state of small business today is a mixture of decline and optimism, of frustration and determination, which offers some hope but a great deal of concern.

The initiatives of the Presidency to which reference has been made hold great potential for benefiting small business. The Chamber will support these initiatives, will continue to alert its membership to the important issues and will work to mobilize grass roots efforts to gain Congressional approval of necessary legislation.

Adoption of our recommendations would do much to improve the condition of small business.

The Chamber asks for careful review and support of these recommendations.●

LABOR LAW REFORM FACT SHEET

● Mr. WILLIAMS. Mr. President, for the last several months the labor law reform bill has been the subject of considerable interest and comment. Many Senators have received objections to and criticisms of this bill that are based on misreading and misunderstanding of the bill. Often such criticism is unrelated to the bill's actual provisions. I have, therefore, prepared a brief factual analysis of the bill's actual provisions which clearly and concisely states the true contents of S. 2674, the proposed Labor Law Reform Act.

I would like to share this analysis with all the Members of this body in order to assist them in considering S. 2674 on its merits and without the rhetoric and misinterpretations which currently prevail.

The analysis follows:

LABOR LAW REFORM FACT SHEET

PURPOSE OF THE BILL

The primary purpose of this legislation is to correct two major problems that have arisen under the current law: (1) delays in the processing of both election petitions and unfair labor practices, and (2) the inadequacy of the remedies which the National Labor Relations Board may invoke against violators of the law, particularly when violations occur during the critical period before a collective bargaining relationship is first established.

PROVISIONS OF THE BILL

Election procedures

The bill directs the Board to establish rules for holding elections and making determinations in connection with elections, including rules to define appropriate bargaining units to the fullest extent practicable;

The bill establishes time limits for holding representation elections:

(a) In the simple case where a majority of the employees have signed cards authorizing a union to represent them and where the Board has issued a rule defining the appropriate unit, the election would be held within 30 days but not less than 21 days after an employer receives notice that a petition has been filed, unless both the employer and the labor organization agree to an earlier election.

(b) Where the appropriate unit is not established by rule or less than a majority of the employees sign authorization cards, the election would be held within 45 days of filing of a petition for election;

(c) Where an election involves complex issues, the election would be held within 75 days;

To assure that employees have adequate information in casting their vote, the Board is required within one year of enactment to issue fair campaign procedure rules assuring that employees have an equal opportunity overall to receive information from the employer and the labor organization during a representation campaign. The rules would assure that when employers make campaign speeches or other communications relating to the campaign to employees on plant premises or during working time, employees would be given an opportunity to receive information from the union in an equivalent manner, consistent with maintenance of production, details to be established by rulemaking within one year;

FREE SPEECH

Eliminates the Board's power to regulate the content of employee speech which contains no threat of reprisal or promise except that the Board could regulate misrepresentations in the 48 hours before an election.

UNLAWFUL CONDUCT

Remedies for election periods

Whenever the Board has reasonable cause to believe that an employee is unlawfully discharged during an organizational campaign, a campaign to oust a union, or during a period after an election but prior to the entering into of a first collective bargaining contract, the Board must seek reinstatement of that employee through the injunction process provided for under Section 10(1) of the Act;

Employees who are illegally discharged for engaging in union activity during an organizational campaign, a campaign to oust a union, or during a period after an election prior to a first collective bargaining contract, may be reimbursed at one and a half times their wage rate with any actual income they earned during the period of their discharge deducted;

Where an employer or a union is found guilty of an unlawful refusal to bargain in good faith prior to the signing of a first collective bargaining contract, the Board may award back pay damages to employees who suffered on account of the refusal to bargain, based upon an objective statistical measure of wage and benefit settlements under collective bargaining agreements negotiated during the period of the violation;

PROCEDURAL CHANGES TO HELP THE BOARD WITH ITS RISING CASELOAD

The National Labor Relations Board is expanded from 5 to 7 members, with seven year terms. To assure a balance on the Board, no more than a majority of the members of the Board may be from the same political party; (Note: the Board's caseload has expanded by 980 percent since the last time the Board was expanded from three to five members.)

The Board is directed to establish rules for a summary affirmance of an Administrative Law Judge's decision in uncomplicated cases on a motion filed by a prevailing party;

The bill provides that any party seeking judicial review of a Board order must petition for review within 30 days or the order becomes final and that the Board can apply for enforcement of its orders.

SANCTION FOR CONTEMPTUOUS VIOLATORS OF FINAL ORDERS

When the Board determines that an employer or a union has willfully violated a final order of the Board, or of the Court declaring that violators conduct to be unlawful, that violator may be debarred from receiving federal contracts for 3 years or less, or until the violator comes into compliance with the law, except where to do so would jeopardize the national interest.

CONSCIENTIOUS OBJECTORS TO UNIONS

A religious conscientious objector who objects to paying dues to a labor organization may pay amounts equal to those dues to a charity or to a fund maintained by the employer for the payment of arbitration costs.

COVERAGE OF GUARDS UNDER THE ACT

The bill provides that "in house" guards may be represented by a union which is affiliated with a national or international union representing non-guard employees so long as it doesn't represent non-guard employees at the same location; retain present law permitting only pure guard unions unaffiliated with any other union to represent guards employed by contract guard companies or armored car companies;

WILDCAT STRIKES AND STRANGER PICKETS

The Courts may, on petition of an employer, enjoin unauthorized concerted refusals to work in breach of contract that are a response to any picket line other than one set up by a union to further its position in a labor dispute, and the Courts may enjoin unauthorized breach of contract work stoppages where union picketing is not involved.●

NATURAL FOOD MONTH

● Mr. McGOVERN. Mr. President, I would like to advise my colleagues that April has been selected as Natural Food Month by the National Nutritional Foods Association in cooperation with other regional and educational affiliates across the United States.

The National Nutritional Foods Association is a nonprofit trade organization representing retailers, manufacturers, distributors, publishers, agronomists, and educators in the nutritional foods field throughout the Nation.

Among the goals of Natural Foods Month is the adoption by Congress of a preventive health policy and the need to inform Americans that their diets have changed radically within the last 50 years, with great and often very harmful effects on their health.

Last year every child, woman, and man in this country consumed over 125 pounds of refined sugar and over 100 pounds of fat. The consumption of soft drinks more than doubled in the past decade—surpassing milk as the second most consumed beverage. Too much fat, too much sugar or salt have been linked directly to heart disease, cancer, obesity and other killer diseases in testimony that has been presented to the Nutrition Committee and Subcommittee. Dave Ajay, president, National Nutritional Foods Association, said:

In observance of Natural Foods Month during April, many educational events will be held all over the country by members of the National Nutritional Foods Association to promote nutrition education of all consumers so that they will be better informed about the nutritional and health values of vegetables, fruits, whole grains, and other unprocessed additive-free foods.

We are all pleased to note that the National Nutritional Foods Association has been a leader in increasing our awareness of the relationship between diet and health, and in seeking nutrition education.

It has cooperated consistently with efforts of the Nutrition Subcommittee to develop a more nutrition alert society.

During April the National Nutritional Feeds Association will present on its national non-commercial education series, "Viewpoint on Nutrition," special programs that will assist Americans to select a greater variety of nutritional foods that will benefit their health.●

SALT II OR NO SALT

● Mr. CULVER. Mr. President, one primary concern surrounding a possible SALT II agreement is whether we will be better off militarily with or without it. Probably no question is more central to the merits of the treaty.

A thoughtful analysis of this issue has been prepared by our colleague in the House of Representatives, LES ASPIN. His report, "SALT II or No SALT," provides one well-reasoned perspective on the advantages such an agreement could offer.

I commend Mr. ASPIN's report to the attention of my colleagues, and ask that it be printed in the RECORD.

The report follows:

SALT II OR NO SALT

The curtain is about to rise on a long national debate over the SALT II treaty with the Russians. Although the treaty has not yet been completed, the salient numerical ceilings have already been revealed. The prospective treaty has come under attack largely because it contains fewer Soviet concessions than President Carter had wanted when he issued his dramatic proposals last March and because it isn't as comprehensive as many Americans had hoped.

The crucial question, however, is not whether SALT II is less than the March proposals or less than our hearts desire. When the Senate acts, it can vote only to ratify or reject the treaty. Therefore, the question is whether the SALT agreement is worse than nothing. In other words, are we better off with or without SALT II?

Historically, Soviet defense spending has grown only 3 percent a year. But Soviet strategic spending outpaced ours and concentrated on quantitative improvement at least until 1972, while the U.S. emphasized qualitative improvements. This enabled Russia to reach rough parity with the United States about 1972, the year the SALT I agreement was signed. This balance of forces continues today.

Beyond 1977, what does the future hold? This analysis looks at anticipated force levels with and without SALT by the end of 1985, since that is the year SALT II would come up for renewal.

Soviet Forces without SALT II (explanatory details in Appendix A).

The Soviets currently have 1,398 silos for modern, land-based missiles. They were limited to this number under the SALT I accords; but even before that treaty was negotiated, the Russians were slowing down construction of new silos.

Within the limits of SALT I, the Russians have been modernizing the 1,398 launchers by substituting newer missiles for existing ones. Without SALT II, a plausible, "moderate" estimate is that they would continue this process.

In order to modernize fully the existing silos—that is, to fill all silos with missiles introduced after 1973—the Russians would have to deploy an average of 130 missiles a year until the end of 1985. This is well within their capacity. The USSR is now deploying about 100–150 ICBMs a year. Over the period 1968–72 nearly 200 SS–11s alone became operational each year.

If the Russians followed this modernization route, they would attain a very powerful force of 1,398 fixed ICBMs without the trouble and expense of constructing new silos. (In addition, they could deploy about 100 mobile ICBMs with relative ease).

On the other hand, if the Soviets choose to construct new silos for the 100–150 new missiles each year while retaining their existing missiles and silos, a force of roughly 2,500 operational ICBMs would result by the end of 1985. This "high" estimate of future forces might occur if there were a sudden deterioration in U.S.-Soviet relations or a hardening of the Kremlin's attitudes.

SLBMs are the second component of strategic forces. Future inventories will depend on production rates plus retirements of subs as they age.

By completing submarines already under construction, the Soviets will have roughly 1,000 SLBMs in 1980. That same year the first submarine of the new Typhoon class should become operational. Output of this sub probably will replace output of existing classes, but the production rate is uncertain.

The Russians have been building about six missile-carrying submarines a year. It is doubtful they will be able to sustain this rate in the 1980s because a) the Russian Navy has accumulated a huge backlog of submarine repair and overhaul requirements that will probably divert shipyard space from production to maintenance work and b) the complexity of the Typhoon will slow production.

As for retirements, the Soviet Union has never scrapped a nuclear submarine before it was 20 years old. Only eight missile carrying "Hotel" subs—carrying a total of 24 launchers—will be over this age in 1985.

Assuming the retirement of these eight, there are two estimates of the Soviet 1985 SLBM force without SALT. A high projection would assume that in spite of the Typhoon complexity and the repair requirements the Soviets continue to produce six subs per year, giving them 1,680 SLBMs by 1985. A more likely "moderate" estimate assumes that the Typhoon complexity and repair problems would slow production eventually to three Typhoons per year, giving them 1,350 SLBMs by 1985 or 60 percent more than they have now.

In addition to ICBMs and SLBMs, there are heavy bombers. The Russians have only about 140 aging bombers now; without SALT-related constraints, the majority would probably remain in the force in 1985. A new bomber is expected in the early 1980s. If past production practices are followed, about 100 of these might be operational in 1985—for a total force of about 200 planes.

The resulting strategic inventory is shown in Figure A.

FIGURE A.—SOVIET ICBM'S, SLBM'S, AND HEAVY BOMBERS

Weapon	1977	By end of 1985 without SALT II: Moderate	High
ICBM's	1,490	1,498	2,492
SLBM's	850	1,350	1,680
Heavy bombers	140	200	200
Total	2,480	3,048	4,372

U.S. Forces without SALT (explanatory details in Appendix B).

Unlike the Russians, the U.S. has few strategic programs in the works that would enable us to rapidly boost our stock of launchers should there be no SALT II.

No new ICBM deployments are planned until the M–X in 1986. The best we could do in terms of adding to the ICBM force by 1985 is to use about 100 extra Minuteman IIIs already in storage. They could be put into silos that now hold older Minuteman IIs.

We have recently begun construction of the new Trident class of missile-carrying subs, a program beset by delays. A reasonable projection is that Trident delays will mean a slight decrease in the total number of missile subs from 41 to 38. However, because the Tridents carry more missiles than the Polaris boats they will replace, the number of SLBMs in the U.S. inventory should increase slightly from 656 to 664.

The United States traditionally maintains a large bomber force. Now that the B–1 has been killed, however, there is nothing in the works that would increase the size of the bomber force by 1985. Except for an occasional loss, the U.S. bomber force should remain relatively stable through 1985. However, its effectiveness will be greatly increased by the installment of cruise missiles on about half the planes.

Thus, if the United States were simply to continue existing programs in the absence of SALT II, we could expect to have 2,059 launchers by 1985 which is exactly what we have now—the slight increase in SLBMs being offset by a slight decline in bombers due to occasional loss.

FIGURE B.—U.S. ICBM'S, SLBM'S, AND HEAVY BOMBERS

Weapon	1977	In 1985 without SALT II (present plans)
ICBM's	1,054	1,054
SLBM's	656	664
Heavy Bombers	349	341
Total launchers	2,059	2,059

We are not necessarily confined only to these programs, but this is all we have planned at this time. If we choose to increase our strategic program, there are other weapons we could push in the period through 1985 as described in a later section, but our options remain limited.

Future forces under SALT II (explanatory details in Appendix C).

While some important aspects of the SALT II accord remain to be negotiated the major numerical ceilings are known. The accords contain a series of ceilings and subceilings not only on launchers but also on MIRVed missiles and bombers equipped with air launched cruise missiles (ALCMs). There are a total of five numerical limits that form the heart of SALT II (See Column 1 of Figure C).

FIGURE C.—THE SALT II CATEGORIES

Measure	SALT limits	Carter/March	United States, 1985: 1977	With SALT	Without SALT current plans	Soviet Union, 1985: 1977	With SALT	Without SALT: Moderate	High
Launchers	2,160–2,250	1,800–2,000	2,059	1,996	2,059	2,480	2,200	3,048	4,372
MIRV'ed missiles and ALCM'ed bombers	1,320	1,100–1,200	1,046	1,320	1,483	300	1,320	2,036	2,366
MIRV'ed missiles	1,200–1,250	1,100–1,200	1,046	1,151	1,314	300	1,224	1,936	2,266
MIRV'ed ICBM's	820	550	550	519	650	300	818	1,398	1,398
MLBM's*	308	150	0	0	0	308	308	308	480

*Modern large ballistic missiles.

To be sure, the SALT II numbers are higher than Carter proposed in March (See Column 2 of Figure C). In every case, SALT II allows the Russians (and the Americans) more weapons than Carter had suggested.

Also to be sure, the SALT II numbers require some reduction in current plans by the Americans particularly in MIRVed missiles and ALCMed bombers (See Column 3). We plan for 1,483 but SALT II would limit us to 1,320—requiring a 10 percent reduction.

But the real advantage of SALT II can be seen in Column 4 on the Soviet Union. In numbers of launchers and in each of the MIRVed categories, Russia's ongoing programs would give her in 1985 about half again as many pieces of equipment as SALT would hold her to (using the moderate estimate).

SALT II will marginally constrain future U.S. programs. Moscow will be much more constrained.

The strategic balance in 1985 (explanatory details in Appendix D).

Counting launchers and MIRVed weapons are simple measurements. But they are not the only measures, nor are they necessarily the best.

Three others are commonly used: (a) the numbers of warheads-atop-missiles and bombs-inside-bombers, called force loadings; (b) the megatonnage or explosive power of all those weapons; and (c) the throwweight or tonnage that a missile can hurl or a bomber carries.

Figure D shows each of these measurements in turn, using the "moderate" estimates of Soviet forces at the end of 1985. To more concretely reflect the relative strengths and weaknesses of the super-powers, the table states U.S. strength as a percentage of Soviet strength.

FIGURE D.—U.S. FORCES AS PERCENTAGE OF SOVIET FORCES

Measure	1977	1985 with SALT	1985 without SALT
Launchers	83	91	68
Force loadings	240	129	93
Megatonnage	35	29	24
Throw-weight	75	51	37

The table demonstrates that no matter which of the four popular measurements of strategic power one uses, the United States comes off better with SALT than without it.

U.S. force improvements (explanatory details in Appendix E).

Clearly American public opinion will not silently accept the inferiority which would be decreed in the absence of the SALT II constraints. Our efforts will be stepped up. With an eye on economy and on guaranteeing that our future without SALT will not leave us in worse shape than a future with SALT, we could push forward with several weapons systems. These could include the immediate construction of 100 FB–111 bombers and the modernization of existing ones, the retention of all Polaris subs until they reach 30 years of service (rather than the currently planned 20), deploying sea-launched cruise missiles aboard Navy attack submarines, the replacement of the remaining 450 Minuteman IIs with the more modern and MIRVed Minuteman IIIs, and the deployment of additional ICBMs outside of silos.

This representative program would cost $19.9 billion in 1978 dollars to build and to operate over ten years.

There are other programs we could pursue. For example, we could speed up the MX missile. However, if the planned deployment date of 1986 is speeded up by two years, that will give no relief in the immediate future and provide very few weapons even in 1985. We could also restart the B–1 bomber program. That alternative could cost $24 billion for construction alone and be far more expensive than the program outlined here.

Effect of the $20 billion expansion program as shown in figure E.

FIGURE E.—IMPACT OF EXPANSION PROGRAM

U.S. FORCES AS PERCENTAGE OF SOVIET FORCES IN 1985

Measure	With SALT II	Without SALT II + $20 billion program
Total launchers	91	91
Force loadings	129	125
Megatons	29	28
Throw-weight	51	53

In other words, if we reject SALT II we can have the privilege of spending an additional $20 billion to end up in exactly the same position we would be in if we ratified SALT II.

This assumes that the Russians pursue a plausible but moderate strategic program. If the Kremlin, irate at the rejection of SALT II, decides to pull out all, or even just some, of the stops, the price of playing catch-up would come still higher.

Over the years there has been a classic distinction between the Soviet and American war machines. They have produced vast hordes of weapons; we have relied on quality and felt our edge there offsets their crude numbers. In the proposed SALT II accords, we have the Russians agreeing to equality of numbers. If SALT II does not end the arms race, it will at least put an end to the numbers race and confine the competition to the qualitative area—the very area which is our strong suit. If we reject the treaty and resume the numbers race, we are entering a race in which we are already behind—surely a very curious route to choose.

APPENDIX A—SOVIET FORCES WITHOUT SALT

The foundation for future ICBM forces is the current inventory.[1] The Interim Agreement on Strategic Offensive Arms (SALT–I) limited the Soviet Union to 1607 ICBM launchers completed or under construction as of July 1, 1972. These included: 209 launchers for old, pre-1964 "heavy" missiles (SS–7s, SS–8s); 308 launchers for modern "heavy" missiles (mainly SS–9s); and 1090 launchers for "light" missiles, of which 1030 were SS–11s and 60 were SS–13s.

The Protocol to the Interim Agreement also permitted more than 740 sea-based missiles provided that an equal number of old ICBM launchers were dismantled or destroyed. The Soviets exercised this option and have dismantled a large portion of their SS–7s and SS–8s. About half of the remaining old "heavies" are deployed in vulnerable soft silos; even those in hardened silos are extremely inaccurate and are considered obsolete. The USSR is expected to dismantle all of them before 1985.

Launchers for the 308 modern heavy and 1090 light missiles are another matter. The Soviets have retained all of these and are upgrading them by substituting newer missiles for existing ones (see Figure 1). SS–11s are being replaced by SS–19s and SS–17s, which became operational in 1974 and 1975. Some SS–9 launch groups have been converted to SS–18s, introduced in 1974. By modernizing these launchers with existing fourth generation and expected fifth generation missiles, the USSR could assemble an extremely impressive force without the trouble and expense of constructing new silos.

Footnotes at end of article.

FIGURE 1.—SOVIET ICBM DEPLOYMENT*

	1st generation missiles	2d and 3d generation missiles	4th generation replacements	5th generation follow-ons
Year of IOC*	1962–63	1967–73	1974–76	Early 1980's
Old heavy missiles	SS–7, SS–8	----------	----------	
Modern heavy missiles	----------	SS–9	SS–18	Likely.
Light missiles	----------	SS–11	SS–17, SS–19	Likely.
	----------	SS–13	SS–X–16	Likely.

*IOC stands for initial operational capability.

If the Soviets opt to continue their modernization program, they probably would completely modernize their force by the end of 1985. To do this, they would have to deploy an average of 130 new ICBMs a year through the end of 1985 (see Figure 2).

FIGURE 2.—ICBM MODERNIZATION REQUIREMENTS

	Number deployed[3] end 1976	Additional deployments required by end 1985	Modernized force composition end 1985
SS–18 and follow-ons	*50	258	308
SS–19, SS–17 and follow-ons	180	850	1,030
SS–16 and follow-ons	0	60	60
Total	230	1,168	1,398

*Over half of these are not mirved. To have a completely mirved force of "heavies" by 1985 would thus require some additional deployments.

Note: Deployments required per year (end of 1976 to end of 1985=9 yr): 130 annually.

This rate is consistent with present deployment rates, which are running at 100–150 a year.[5] Over specific time periods, the rates have been higher. Thus, more than 175 new missiles were deployed annually from 1963 to 1971; over a shorter five-year period (1968–72) nearly 200 models of the SS–11 alone became operational each year.[4]

Thus, a moderate estimate is that in the absence of SALT–II the Soviets would retain and fully modernize all of their 1,398 modern heavy and light launchers. By the end of 1985, 308 SS–18 and follow-on ICBMs would be deployed in the heavy silos; 1030 SS–19s, SS–17s, and follow-ons in the SS–11 light silos; and 60 SS–X–16s and successors in the SS–13 light silos. (More SS–19-types than SS–17-types since the former is a better missile). Virtually all of these missiles can be expected to be Mirved.

Besides missiles in fixed silos, the USSR could also deploy as mobile ICBMs an estimated 100 SS–X–16s that have already been built.[6] (Under SALT–II, testing, production and deployment of this missile would be banned).

If the Soviets opt for modernization, the number of ICBMs in 1985 will not be very different from today. Of course, the capability of the force will be greatly increased.

The preceding seems the most likely course of action. But if there were a deterioration in East-West relations or a hardening of the Kremlin's attitude, the Soviet Union could assemble a much larger land-based inventory in the absence of SALT II. The Russians might choose to construct additional silos into which they could place new fourth and fifth generation missiles while retaining all existing launchers (except perhaps the SS–7s and –8s). Under these "high" assumptions, the Russians would have roughly 2500 operational launchers by the end of 1985.

Besides ICBMs, the USSR had 61 nuclear-powered strategic submarines (SSBNs) with

about 816 SLBMs at the start of 1977.[7] Eight of the SSBNs were Hotel-class submarines built around 1960. The remaining 53 had all been produced since 1936 and included: 33 Yankee-class SSBNs with 528 SS–N–6 missiles; 1 modified-Yankee with an estimated 16 SS–NX–17 missiles; 14 Delta I-class SSBNs with 168 SS–N–8 missiles; 4 Delta IIs with 64 SS–N–8s; and 1 Delta III with an estimated 16 SS–NX–18 missiles.

Future SLBM levels will depend on two factors: retirements of the existing hardware and production of new equipment.

Few retirements seem imminent. The Soviet Union has traditionally displayed the greatest reluctance to scrap even the most obsolete equipment. It has never retired a submarine before it was 20 years old. Only the Hotel SSBNs will be over this age in 1985, so they are the only candidates for removal.

As for future production, the Soviets already had about 180 new launchers on SSBNs that were being fitted out, on sea trials, or under construction at the start of 1977.[8] When these are delivered—probably before 1980—the Soviets will have approximately 970 SLBMs on about 65 Yankee and Delta-class submarines, all of which will have been built since 1966.

Beyond 1979 the picture is less certain. The Soviets are building a new SSBN class, the Typhoon, designed to launch 20–24 long-range ballistic missiles.[9] The first Typhoon is likely in 1980. As these begin deliveries, construction of Delta submarines should come to an end.[10]

The pace of Typhoon production is harder to project. In recent years the Soviets have constructed about 6 SSBN's displacing a total of roughly 55,000 tons annually.[11] Two shipyards have devoted nearly full time to this effort.[12] But the Soviets' ability to sustain this building rate in the 1980s is doubtful.

For one thing, whereas the Delta-class submarine was really just a stretched version of the existing Yankee class, the Typhoon is an entirely new design. With nearly twice the surface displacement of Yankee and Delta I submarine,[13] it represents a quantum jump in complexity. The Russians have experienced significant trouble with some past nuclear-powered ships; two tactical submarine classes, Alfa and Papa, were terminated before series production began. So the Russians are likely to proceed with some caution and encounter some problems with a new design.

A second constraint on new SSBN construction is shipyard capacity. By building so many nuclear submarines over a relatively short period of time, the Soviets have accumulated inordinately large repair, maintenance and overhaul requirements but have very limited capacity to handle such needs.[14] Diversion of some existing ship construction facilities to major repair and overhaul work is likely.

What these factors imply is a gradual build-up to a lower level of Typhoon output. A plausible estimate of eventual output is half the present building rate, or 3 per year by 1982, after 2 in 1981 and the first submarine in 1980. This assumption is reflected in the "moderate" estimate. A "high" projection assumes that the Russians manage to sustain a 6-subs-per-year rate.

In addition to strategic missiles, there is the Russian heavy bomber force. This is the least significant branch of their forces and it receives the smallest share of resources (about 5 percent of the estimated dollar cost of Soviet long-range strategic attack forces in 1976).[15] In 1977 about 140 aging aircraft were deployed: 105 Bears and 35 Bisons.[16] Without SALT–II the Soviet Union would probably follow its standard practice of retaining aging equipment—at least a 100 or so of the Bears, the majority of which have been improved by the addition of air-to-surface missiles.

A follow-on bomber is also expected to become operational between 1980 and 1985.[17] If production began at the midpoint at rates equivalent to that experienced with the Backfire bomber (30 per year), roughly 100 planes could be operational by the end of 1985.

Estimating the armament of the expected follow-on heavy bomber is very speculative. But the Soviets have already deployed the AS–6 air-to-surface missile with a range of up to 500 miles.[18] This suggests the potential for a longer-range cruise missile by the early 1980s (though compared to U.S. cruise missiles, it would probably be primitive). A follow-on bomber would be a natural platform for such missiles.

From this discussion of ICBMs, SLBMs, and heavy bombers, a clear picture of future inventories emerges. Figure 3 summarizes Soviet strategic forces by the end of 1985 in the absence of any SALT constraints. Both the moderate estimate and a high projection are shown.

FIGURE 3.—PROJECTED SOVIET ICBM'S, SLBM'S, AND HEAVY BOMBERS: NO SALT, END 1985

	1985 forces without SALT	
	Moderate estimate	High projection
ICBM's:		
SS–18's and follow-ons*	308	308+
SS–19's and follow-ons*	700	700+
SS–17's and follow-ons*	330	330+
SS–X–16's and follow-ons* fixed	60	60+
SS–X–16 mobile	100	100
2d and 3d generation missiles (SS–9's, SS–11's, SS–13's)		994
Total ICBM's	1,498	2,492+
(Mirved ICBM's)	(1,398)	(1,398+)
SLBM's:		
SS–NX–18's or follow-ons* in Typhoon SSBN's	330	660
SS–NX–18's* in Delta III SSBN's	208	208
SS–N–8's in Delta I and Delta II SSBN's	268	268
SS–N–6's or "backfitted" follow-ons in Yankee SSBN's	544	544
Total SLBM's	1,350	1,680
Mirved SLBM's**	(538)	(868)
Heavy bombers:		
Bears	100	100
New cruise missile carrier-type bomber	100	100
Total heavy bombers	200	200
(With cruise missiles)	(100)	(100)
Total ICBM's plus SLBM's plus heavy bombers	3,048	4,372+
(Aggregate of mirved missiles and bombers with cruise missiles)	(2,036)	(2,366+)

*All are assumed to be mirved.
**This assumes that possible "backfit" follow-ons in Yankees are single-RV or MRV missiles.

Without a SALT agreement then, we can expect the Soviet strategic forces to increase rather dramatically. For the Soviets to deploy substantially fewer missiles than those predicted here they would have to pursue unprecedented policies: either they would have to retire large numbers of modern launchers, an action inconsistent with all previous Soviet practices, or they would have to cut unilaterally their construction program, which has been proceeding at a steady pace for a good number of years.

It should be noted that these projections are based on extending current and past Soviet practices into the future. No increase in the rate of Soviet production is part of these forecasts.

It should also be noted that as the Soviets increased their strategic deployments during the 1960s, the United States intelligence community repeatedly and erroneously assumed that their forces would soon level off and that they had modest definitions of "sufficient" inventories.[19] Anyone arguing that in the absence of SALT the Russians would restrain the size of their inventories will not find solace in similar predictions of past years.

APPENDIX B—U.S. FORCES WITHOUT SALT

Since 1966, and in contrast to the Soviet program, the U.S. strategic program has remained fairly constant—as measured in some quantitative terms. Thus, outlays for strategic forces have remained fairly constant over the past 10 years as have the ICBM, SLBM and total number of delivery vehicles.

We can predict with a fair degree of accuracy future U.S. strategic force levels because U.S. program plans are better known than Soviet plans.

The current ICBM force consists of 550 Mirved Minuteman IIIs, 450 Minuteman IIs, and 54 Titan IIs. Current plans call for improving the Minuteman IIIs by the substitution of a more powerful warhead, the Mark–12A. No new ICBMs are programmed by 1985; the MX missile would not be deployed before 1986.[20]

In the absence of SALT, the United States could deploy more Mirved ICBMs. Since we have already stockpiled enough Minuteman IIIs to replace about 100 additional MM IIs,[21] this modification to current plans is likely.

As for the current strategic nuclear-powered submarine force, the United States has 41 SSBNs with 656 SLBMs. At the end of 1985, the U.S. plans to retain 31 Poseidon submarines—21 carrying 336 Mirved Poseidon missiles and 10 "backfitted" to carry Mirved Trident-I missiles. All 10 existing Polaris submarines are to be retired after 20 years of service during the 1981–83 period.

Several new Trident submarines are scheduled to undergo sea trials* by the end of 1985, but the precise number is uncertain. A two-year lag in the program, which can be expected by the time several submarines are delivered,** would result in 168 Trident-Is on seven new submarines by the end of 1985.[22] Along with the 31 Poseidons, the addition of the Trident SSBNs would make a force of 38 SSBNs (or 664 SLBMs).

Three classes of heavy bombers will be in the force of 1985: B–52 Gs, which are expected to carry cruise missiles; B–52 Hs, which will continue to carry short-range attack missiles and gravity bombs; and B–52 Ds, which carry gravity bombs only.[23] There are currently 173 Gs, 96 Hs, and 80 Ds. Some accidental losses are likely in future years, amounting to perhaps one a year or a total of eight by 1985 (4 Gs, 2 Hs, and 2 Ds). All other planes would remain operational.

The forces just outlined would contain a total of 2,059 launchers. Of these, the aggregate of Mirved missiles and bombers with cruise missiles is 1,483. Barring any extraordinary changes in current program plans, those are the characteristics of U.S. forces in the absence of a SALT. (See Figure 4)

*Once a submarine begins sea trials, it is counted under SALT.

**The first ship of its class is already one year behind schedule. While the Navy says the program will be back on schedule by the seventh submarine, the assertion is unsupported by historical evidence. From 1973 to 1975, estimates comparable to today's forecast o fthe delivery of the first Trident have been accurate only 5 percent of the time; 60 percent of the time an additional year of delay was experienced. Based on this and similar experience, the first Trident submarine should be two years late.

It has been assumed, perhaps optimistically, that subsequent ship deliveries are not delayed further.

(Aggregate of Mirved missiles and bombers with cruise missiles)	(1,483)

* All are Mirved.

APPENDIX C—FUTURE FORCES UNDER SALT–II

SALT–II will have three parts—a treaty lasting to 1985, a protocol lasting three years, and a set of principles for negotiating a follow-on agreement. The important numerical limits contained in the treaty—although still under negotiation—are shown below.

FIGURE 5. *Expected SALT–II Treaty*

Category	*Limit*
Total Number of Launchers*:	
Initially	*240
By 1980–1982**	**2,160 to 2,250
Aggregate of Mirved missiles and bombers with cruise missiles	1,320
Mirved missiles	**1,200–1,250
Mirved land-based ICBM's	820
Modern large ballistic missiles (MLBM's)	308

*The Soviet Backfire bomber is excluded from the count. The USSR is providing a variety of assurances in a unilateral statement designed to put a ceiling on the production rate of the bomber and to assure that it is not configured in an intercontinental role.

**Still under negotiation. Lower numbers and earlier date are U.S. proposals; higher numbers and later dates are Soviet proposals.

The restricting factor for the United States under the terms of the prospective SALT–II agreement will be the aggregate limit of 1,320 Mirved missiles and bombers armed with cruise missiles. As noted above, 1,483 such U.S. launchers could be expected by the end of 1985 without SALT restrictions.

To stay within the 1,320 ceiling, the United States would have to refrain from converting 100 additional Minuteman IIs to Minuteman IIIs and forego or retire 63 other Mirved launchers.

It is reasonable to expect that the 63 Mirved launchers will come equally from the Minuteman force and from the Poseidons[24]. On the one hand the Minuteman IIIs will be extremely vulnerable to a Soviet first strike by 1985, so their value is questionable. On the other hand, the Poseidon submarines will be over 20 years old and the number of Mirved SLBMs would be increasing substantially with the arrival of Trident submarines.

Two Poseidon submarines carrying 32 Mirved missiles and 31 Minuteman IIIs could therefore be prematurely dismantled under SALT–II. This is hardly an awesome sacrifice. As illustrated by Figure 6, the treaty would only marginally affect programmed forces.

FIGURE 6.—*Future U.S forces: with and without SALT, end 1985*

	Expected U.S. forces, end 1985	
	With SALT	Without SALT
Minuteman III's	519	650
Minuteman II's	450	350
Titan II's	54	54
Trident is on new subs	168	168
Trident I backfits	160	160
Poseidons	304	336
B–52 Cruise missile carriers	169	169
B–52's with standard loads	172	172

In contrast, the Soviet Union would be severely limited by the terms of the prospective agreement. By the end of 1985, the above moderate estimate of Soviet forces included: 1,398 Mirved ICBMs, but only 820 are allowed under the treaty; 1,936 Mirved missiles, as opposed to the 1,200–1,250 ceiling now under negotiation; 2,036 Mirved missiles plus bombers with cruise missiles, while the treaty allows an aggregate of just 1,320; and 3,048 ICBMs, SLBMs, and heavy bombers, but only 2,160–2,250 will be allowed.

Thus, in terms of force levels alone, the composition of the Soviet forces will differ substantially from the no-SALT situation.

Under a SALT–II agreement the Soviets can be expected to build up to the negotiated ceilings—perhaps with a force structure like the one given in the first column of Figure 7.

Thus, at the end of 1985, the USSR should have 308 Modern Large Ballistic Missiles (MLBMs), consisting of SS–18s and a follow-on type. Since single warhead versions of these missiles would count as Mirved launchers under treaty terms already negotiated,* the Soviets would undoubtedly Mirv all MLBMs so as to maximize their impact. Otherwise, to take the SS–18 as an example, they would be giving up 8–10 two-megaton warheads for just 1 warhead in the twenty-megaton range.

The USSR would also undoubtedly deploy about 510 additional Mirved ICBMs to reach the 820 ceiling. The vast majority of these, a little over 400, would be SS–19s or successors since that missile is the most powerful "light" ICBM available. An additional 100 or so SS–17s and follow-ons would balance and fill out the Mirved, land-based inventory.[25]

The Soviet Union would have limited options with respect to Mirved SLBMs. Assuming that nearly 820 ICBMs are fitted with multiple independent warheads, only about 400 or so Mirved SLBMs would be allowed.[26] An estimated 208 of these will be on Delta III submarines by the time that program is finished. This means that only about nine Typhoon submarines carrying approximately 198 Mirved SLBMs could enter the force by the end of 1985.

* Under the treaty, if a missile has been either tested in a Mirved mode or fired from a silo with multiple independent warheads, all of its variants are counted as Mirved launchers.

This would leave room for about 100 bombers with cruise missiles if the Soviets wanted to reach the 1,320 aggregate in the treaty. As noted earlier, a follow-on bomber of this type and in this number could probably be deployed before the end of 1985.

With 1,320 Mirved missiles and bombers with cruise missiles, the Russians would be permitted about 880 other launchers.[27] They are expected to retain roughly 400 light ICBMs with single warheads or Multiple Reentry Vehicles (MRVs), which do not count under the Mirv ceilings. The likely candidates are the newer SS–11s and its probable fifth-generation successor.

Only 480 other launchers could then be deployed. They would consist of single-warhead or MRV SLBMs. (It is doubtful that any would be bombers, since the likely candidate will be the Bear aircraft of 1950s' design and since much more modern SSBNs would be available).

The USSR would certainly retain some 268 newer launchers aboard Delta I and Delta II submarines. To deploy no more than 480 unMirved SLBMs, they would be able to keep just 13 Yankee-class SSBNs in service with 208 launchers. The remaining 21 Yankee submarines now in the force would probably be converted to tactical submarines.

The resulting estimate of Russian forces by the end of 1985 under SALT II is shown in Figure 7. For contrast, the moderate projection in the absence of SALT is included.

FIGURE 7. *Future Soviet forces: With and without SALT II, end 1985*

Mirved SLBM's	(632)	(664)	(406)	(538)
Heavy bombers	341	341	100	200
With cruise missiles	(169)	(169)	(100)	(100)
Total launchers	1,996	2,059	**2,200	3,048
Aggregate of mirved missiles and bombers with cruise missiles	(1,320)	(1,483)	***(1,320)	(2,036)

*Moderate estimate.
**Specific total and more accurate breakdown will depend on limits still under negotiation.
***Figures in table add up to 1,324; this is due to approximation, some adjustments in forces would be expected to stay within 1,320 ceiling.

Thus, the SALT II treaty would have a relatively minor impact on programmed U.S. forces. In contrast, the Soviet Union would become far more powerful without the constraints of the prospective agreement. Using the moderate estimate of future forces, the Russians could be expected to deploy about 850 additional strategic launchers in the absence of SALT II—nearly a 40 percent increase over levels attained under the prospective agreement. (Under "high" assumptions, over 2,100 additional launchers or roughly 100 percent more than those attained under SALT II could be expected.)

Appendix D—The Strategic Balance, 1985

It follows from the preceeding discussion that the strategic balance would be far more favorable to the United States with a treaty as opposed to without one. There is no universal convention for comparing the strategic capability of two nations. The most common method is to compare static indices.

Thus far, we have only considered the total number of launchers. This measure by itself is important primarily in terms of political value and the perceptions of each nation's power. Other measures include: Total number of warheads. Significant in that, as Henry Kissinger put it, it is warheads that actually kill people and do the damage; megatonnage, a measure of gross destruction capability; and throw-weight, a rough indicator of the usable capacity of a country's delivery vehicles.

Figure 9 displays the projected military balance at the end of 1985 with and without SALT II using these four measures. U.S. inventories are expressed as a percent of those attained by the Soviets. The forces assumed in the table are those outlined in previous sections (the moderate estimate of Soviet forces without SALT II has been used). Assumptions about the detailed characteristics of those weapons have been based on the best available data.

FIGURE 9.—STATIC INDICATORS OF THE BALANCE[28]

	U.S. forces as a percent of Soviet forces		
Measure	1977	End 1985 with SALT II	End 1985 no SALT II
Total launchers	83	91	68
Force loadings*	240	129	93
Megatons	35	29	24
Throw-weight**	75	51	37

*Independently-targetable weapons/warheads associated with on-line ICBM's, SLBM's, and unit equipage heavy bombers.
**Missile throw-weight plus an equivalent measure for bomber payload.

Even accounting for the degree of error associated with such measures, the United States strategic position would clearly be more favorable under a SALT II agreement.

Appendix E—U.S. Force Improvements

Thus far we have considered currently programmed U.S. forces in the absence of SALT II. But if SALT II fails, the United States could deploy additional forces—at a price. Trying to match Soviet strategic strength with a SALT II agreement is not easy. Some programs, while important, would not have a sizable impact by the end of 1985. For example, given the number of Trident submarines already in the pipeline, more funding in this year's budget would have negligible results before 1986. Similarly, if the M-X ICBM were accelerated, it would still not have much impact on 1985 inventories.

Several options could be fully implemented by 1985. A representative program balanced among the various components of our forces might include the following actions:

Building 100 new FB–111H penetrating bombers and converting 65 existing FB–111s into the H configuration, a rapid method of modernizing the bomber force. This would entail $5.6 billion in investment costs alone. (To operate the force for 10 years would require on the order of $5.7 billion in additional outlays.) [29]

Retaining Polaris submarines for 30 years as opposed to the currently planned 20, a simple and inexpensive means of strengthening our sea-based deterrent. The full cost of this option is at least $1.0 billion.[30]

Deploying strategic sea-launched cruise missiles aboard all nuclear-powered attack submarines, as a means of diversifying the threat the Soviets face. For missiles alone, the cost would be $0.4 billion. (Operating costs are assumed to be negligible since the attack submarines would be deployed regardless.) [31]

Replacing all remaining Minuteman II ICBMs with more accurate, Mirved Minuteman IIIs, which would cost on the order of $2.6 billion. (Again, recurring costs over and above existing outlays would be negligible.)[32]

Procuring and deploying an additional 290 Minuteman IIIs in either a soft or semi-mobile mode. Simply to buy and operate for 10 years the missiles alone would require about $4.6 billion. (Additional fixed costs associated with the basing mode are not included.) [33]

If all of these measures were adopted, total ten-year costs as a minimum would amount to $19.9 billion (1978 budget dollars). This is obviously not the only way such money could be spent.[34] It is not even necessarily the most effective way to increase U.S. strategic forces. But it does represent a balanced set of force improvements that have been proposed for upgrading our inventories.

The interesting feature of these proposals is that if all were adopted the strategic balance without SALT would be only as good as that attained with SALT (based on the indicators in Figure 12). In other words, in the absence of SALT II the United States would have to spend about $20 billion merely to attain the same numerical balance that results from the prospective agreement. This is illustrated in Figure 10.

FIGURE 10.—PRICE OF NO AGREEMENT

[In percent]

	United States forces as a percent of Soviet forces	
Measure	End 1985 with SALT II	End 1985; without SALT II, with current program plus $20 billion
Total launchers	91	91
Force loadings	129	125
Megatons	29	28
Throw-weight	51	53

Admittedly, the range of options under the prospective agreement is more limited. The United States could not, for example, deploy additional Mirved missiles without scrapping existing ones. But there are a number of measures (such as postponing Polaris retirements or building FB–111Hs) that would be compatible with the treaty terms.

FOOTNOTES

[1] Discussion of Soviet forces under SALT–I is based primarily on *United States Military Posture For FY 1977*, Statement by the Chairman, Joint Chiefs of Staff Gen. George Brown, Feb. 20, 1976, p. 32 (hereafter cited as *JCS Posture*).

[2] Missile description primarily from *JCS Posture for FY 1978*, pp. 8ff.

[3] Secretary of Defense Harold Brown, Speech to the 34th Annual Dinner of the National Security Industrial Association, Washington D.C., Sept. 15, 1977, p. 5.

[4] Deployments do not count substitution of existing missile mods. with the precise same missile mods, nor deployments for testing and related purposes. Historical rates of deployments were derived in part using Albert Wohlstetter, *Legends of the Strategic Arms Race*, USSI Report 75–1 (Washington, D.C.: United States Strategic Institute, 1975), p. 30, which is based on declassified intelligence estimates; and various PCS Posture Statements.

[5] Data from *Annual Defense Department Report FY 1978*, Report of Secretary of Defense Donald Rumsfeld, Jan. 17, 1977, p. 62.

[6] See, e.g., Bernard Weinraub, "Pentagon Aides Say Moscow Has Mobile Missiles Able to Reach the U.S.," *New York Times*, Nov. 3, 1977, p. A3.

[7] Description of existing Soviet forces is easily assembled using raw data supplied by Rear Adm. Donald Harvey, Director of Naval Intelligence, in *Military Posture*, Hearings before the House Armed Services Seapower Subcommittee, 95 Cong. 1 Sess. (1977), Pt. 4, p. 57 and *JCS Posture for FY 1978*.

[8] Based on 200 launcher figure as of Nov. 1976 in *JCS Posture for FY 1978*, p. 13, and assuming 1 SSBN delivery before Jan. 1977.

[9] See, e.g., Richard Burt, "Soviet Is Reported Building a New Missile Submarine," *New York Times*, Oct. 29, 1977, p. A3.

[10] It was assumed that Delta Production is

phased out after 34 SSBNs, the same number of subs built in the Yankee-class production run.

[11] 6 SSBNs a year is from the International Institute for Strategic Studies, *The Military Balance*, 1977–78 (London: IISS, 1977), p. 90 with tonnage from *Janes' Fighting Ships*.

[12] The yards are Severodinsk and Komsomolsk.

[13] See Burt, *op. Cit.*

[14] For an unclassified discussion of this point, see the testimony of Dave Baker of the Naval Intelligence Support Center in *Current Status of Shipyards 1974*, Hearings before the House Armed Services Seapower Subcommittee, 93 Cong. 2 Sess. (1974), pp. 146–7.

[15] Central Intelligence Agency, "A Dollar Cost Comparison of Soviet and U.S. Defense Activities, 1966–1976," SR 77–10001U, Jan. 1977, p. 12.

[16] 105 Bears figure is from CIA testimony in *Allocation of Resources in the Soviet Union and China—1976*, Hearings before the Joint Economic Subcommittee on Priorities and Economy in Government, 94 Cong. 2 Sess. (1976), pt. 2, p. 69. Bison figure is from the IISS.

[17] CIA data supplied for the record in *ibid.*, p. 72.

[18] John M. Collins, "American and Soviet Armed Services, Strengths Compared, 1970–76," *Congressional* Record, CCXXIII (Aug. 5, 1977), Pt. III, p. 27607.

[19] See Wohlstetter, *op. cit.*

[20] The IOC date was originally 1983 but slipped as a result of budget amendments submitted by President Carter.

[21] Considering the testimony of Lt. Gen. Alton Slay, Deputy Chief of Staff for Research and Development, USAF, *Department of Defense Appropriations for 1978*, Hearings before the House Appropriations Subcommittee on the Department of Defense, 95 Cong. 1 Sess. (1977), pt. 7, p. 69; and the fact that Congress refused to approve the proposed rescission.

[22] For original Trident delivery schedule see *Military Posture* Hearings, pt. 4, p. 187.

[23] Concerning cruise missiles on B–52s, see Air Force testimony in *Department of Defense Appropriations, Reprogrammings, Fiscal Year 1977*, Hearings before the House Appropriations Subcommittee on the Department of Defense, 95 Cong. 1 Sess. (1977), appendix to part 7 Hearings, p. 159.

[24] Even if the assumed mix of Mirved missile retirements was to shift between Minuteman IIIs and Poseidons, it would result in only very minor changes in the balance.

[25] 400 SS–19s is the figure suggested by Paul Nitze and it seems the most plausible.

[26] Since the Mirved missile limit is still under negotiation, the mid-point of the range being negotiated was chosen (i.e., 1225) for use in this analysis.

[27] Since the total launcher figure is still under negotiation, a limit of 2200 was assumed.

[28] For roughly similar types of figures covering 1977 and 1986 with a different SALT treaty, see Statement of Secretary of Defense Harold Brown before the House Armed Services Committee on H.R. 8390, Supplemental Authorization FY 1978, August 2, 1977, p. 14.

Note that even if different weapons characteristics are assumed the relative results with and without SALT II are still significantly different.

[29] See testimony on FB–111H in *Department of Defense Appropriations for 1978*, pt. 7, various pages; and unclassified version of the Staff Study for the Secretary of Defense, "Modernization of the Strategic Bomber Force," 1977.

[30] Polaris cost figure estimate based mainly on annual recurring cost of the force in Congressional Budget Office, "SALT and the U.S. Strategic Forces Budget," Background Paper No. 8, Washington, D.C., June 23, 1976, p. 36. Cost should be higher in future years since force will be older and since additional overhauls would be required to extend service life.

[31] Assumes 4 SLCM's per 1980's SSN force at just over $1 million per SLCM.

[32] For rough cost estimate and discussion of option, see testimony of Secretary of Defense Brown in *Department of Defense Appropriations for 1978*, pt. 7, p. 47.

[33] Such an option has been suggested by, among others, Francis P. Hoeber in Francis P. Hoeber and William Schneider, Jr., eds., *Arms, Men, and Military Budgets*, (New York: Crane, Russak & Co., Inc., 1977), p. 60. Costs based on Defense Department and CBO data.

[34] The cost in procurement alone of the B–1 bomber would exceed this amount.●

JIM CALLOWAY

● Mr. HUDDLESTON. Mr. President, on March 23 of this year the Senate marked the retirement of James R. Calloway by passing a resolution commending him for long, faithful and exemplary service to this body. For the last 5 years, Jim ably served in the important capacity of chief counsel and staff director of the Committee on Appropriations.

Jim's fine record of service has been well detailed by our distinguished majority leader, Senator ROBERT C. BYRD, who sponsored the resolution, and by others of my colleagues on the Appropriations Committee. There is no need for further elaboration, and I completely endorse the resolution of commendation and appreciation.

At risk of belaboring the obvious, the Committee on Appropriations could not execute its responsibilities, involving virtually all aspects of the Federal Government, without the assistance of a dedicated and competent professional staff. As director of that staff, Jim Galloway at once contributed to and encouraged its professionalism through his leadership. In the capacity of chief counsel, his advice was always of material assistance in dealing with the many divergent issues which confronted us and, from a practical standpoint, he also knew the most effective manner in which to get things done—a function of his long association with the workings of the Senate.

Jim has certainly earned the thanks of those of us who valued his knowledge and capability, and I wanted to add my own brief expression of appreciation. I wish him the best of luck and equal success in his future endeavors, which is a high goal, indeed.●

MAINE INDIAN LAND CLAIMS

● Mr. MUSKIE. Mr. President, land claims by the Passamaquoddy and Penobscot Indians which could affect title to two-thirds of the land in Maine present a tremendous challenge to the citizens and leaders of Maine. We have been working to resolve this issue for nearly 2 years now. The problem before us is not our own making. Two Federal courts have ruled that the United States has a trust responsibility to the Maine tribes under the Indian Nonintercourse Act of 1790. The Department of Justice and the Department of Interior, acting under orders from the courts have concluded that the Maine tribes have a substanital legal claim for lands in violation of the Nonintercourse Act. They are preparing a suit to pursue those claims. The prospects of such massive litigation and the implications of the mere existence of the claim moved our Governor and Attorney General in 1976 to ask the Maine congressional delegation to help find alternatives to litigation. We turned to President-elect Carter in January of 1977. Even before he was sworn into office the President moved to develop a strategy to avoid immediate devastating litigation and seek an alternative resolution agreeable to the parties involved.

The most recent effort to develop an alternative to massive litigation involved a three-man task force which submitted last February a proposal for partial solution together with two settlement offers from the Indian tribes.

Eliot Cutler, Associate Director for Natural Resources, Energy and Science in the Office of Management and Budget, and a native of Bangor, Maine, is a member of the task force. He addressed the Husson College business breakfast in Bangor, Maine, on April 14, describing the White House efforts to resolve the Indian claims. President Carter's efforts in this matter have been misunderstood. Eliot Cutler's speech outlines clearly the approach the President and the White House have taken toward resolution of this case and deserves attention of my colleagues.

I ask that the following remarks be printed in the RECORD:

REMARKS OF ELIOT R. CUTLER

Last week the White House Work Group announced that the Penobscot and Passamaquoddy Tribes had agreed to extend for one month the time available for the State of Maine and the large landholders to respond to the Tribes' settlement proposals.

On or shortly after May 10, the Administration will file legislation to clear title to 9.2 million acres of land in the 12.5 million-acre claims area in order to provide complete protection for most landholders and homeowners. The legislation would provide for a $25 million federal payment to the tribes. On or about June 15, litigation will commence against any other defendants—such as the State and the large landholders—who have not reached an out-of-court settlement with the Tribes. Should the Congress fail to pass the protective legislation, it eventually would be necessary to also bring an action against hundreds of thousands of Maine citizens to recover land held by them.

I know that I speak for my colleagues on the Work Group, for the President's Counsel, Bob Lipshutz, and for the President himself, when I say that we do not want this case to go to court.

Not because we fear that one side or the other may win.

Not because we think that the many historical and legal issues in the case should not be resolved.

But because we are deeply concerned about the chaos, the hardship and the suffering that many years of litigation would inflict upon all the people of Maine.

In short, we think it is unfair to ask the people of Maine to pay the price of litigation.

The period between now and May 10 is a crucial time for all of us. Each day that passes without progress toward a negotiated settlement brings us closer to a costly confrontation in court. Yet I know that each day also brings more questions, more doubts, and more confusion as to what is the right thing to do.

I would like to take the opportunity this morning to discuss five basic questions about this case that I know trouble many Maine citizens and to address in connection with those questions several misunderstandings about the role the Administration has played in this case and the nature of our proposals.

First, why are the Justice Department and the Interior Department preparing to sue the State of Maine? Why are those two federal agencies taking the tribes' side of this case?

To answer that question, we first must go all the way back to 1971. By that time, the Penobscot and Passamaquoddy Tribes had discovered a copy of the 1793 treaty, had taken it to their lawyers, and had asked the Interior Department to assist them in pursuing the matter further. The tribes claimed that the federal government had an obligation to do that under the terms of the 1790 Non-Intercourse Act.

The government turned down the tribes' request, claiming it had no such duty, and the tribes sued Secretary of the Interior Rogers Morton in Federal Court in Portland in 1972. The State of Maine, recognizing that its interests were very much at stake, asked to intervene and became a second defendant in the case in 1973. In early 1975, Maine's District Judge Gignoux decided that the tribes were right: The tribes, he said, were entitled to the protection of the Non-Intercourse Act, and the federal government was a trustee for the tribes under that Act. The government appealed Judge Gignoux's decision to the U. S. Court of Appeals for the First Circuit and again lost in late 1975. No further appeal was taken, even though the state could have sought to vacate the judgment as late as 1977.

This is a nation which lives under the rule of law, and from that time forward the federal government was bound by Judge Gignoux's decision that it owed to the tribes the duties of a trustee.

On that particular subject, that is as far as Judge Gignoux went. He did not order the federal government to sue the state or anyone else. He said only that the tribes were protected by the Non-Intercourse Act and that the federal government had to act as trustee for the tribes. The federal government had to decide, as trustee, whether it had an obligation to bring the present land claims case to court.

But the government's discretion at this point was limited. It is a fundamental principle of trust law—indeed of our legal system in general—that a trustee's foremost duty is to act in behalf of and to protect the interests of those persons to whom the trust obligation is owed. The lawyers at the Interior Department and the Justice Department examined the legal and historical evidence that had been amassed in the land claims case and decided that there was a case to be made and that the federal government had an obligation to do what any reasonable person would do acting in his or her own best interests—it had to pursue the claim and, if necessary, sue the present landholders on behalf of the tribes. As a lawyer, I cannot imagine that any lawyer or anyone in a position of public responsibility would suggest that the government should have done otherwise.

A second question: We accept that. Though we don't like to be sued by the federal government, we accept the fact that the Justice Department has no choice. But why did the President get involved?

Let me assure you that was not an easy decision for the President to make. Certainly there is no political credit to be gained. The easiest course of action would have been to take the case to court and to let the State of Maine and the large and small landholders fend for themselves. Indeed, the previous Administration was prepared to do just that on January 15, 1977.

However, in 1976 the first indications of the potential upheaval and chaos that would result from litigation began to appear. A number of Maine towns in the claims area were having trouble with bond issues, and there was widespread concern that titles to real estate would be questioned in sales and mortgage transactions. The Governor and the Attorney General asked the Maine Congressional delegation for help, and the delegation turned to President Carter.

In early 1977, the President asked the best lawyer he knew, retired Georgia Supreme Court Justice William Gunter, to be his special representative, to listen to the arguments on both sides of the case, to examine the merits, and to recommend any actions which the federal government and the parties might take to resolve the dispute. In July, Judge Gunter told the President that the claims were serious and substantial, but his proposed terms were rejected as a basis for settlement by both the tribes and the State of Maine.

In August, the President appointed the White House Work Group, and he asked us to enter into further discussions with the tribes concerning federal-tribal relationships. We did that, and another proposal was made in February—one which was more advantageous to the state.

A third question: Why were the Work Group's discussions held only with the tribes? Was the state shut out of the negotiations?

On at least three separate occasions after Judge Gunter's recommendations to the President were made known to state officials, those officials indicated to us that in their view settlement of the case would be inappropriate and that the state preferred to litigate. The repeated refusals by the responsible state officials to consider any settlement to which the state would make a contribution left us no choice; we could not invite the state to participate in negotiations when the state insisted that it would not settle on any terms.

The tribes, on the other hand, expressed a willingness to enter into further discussions. In light of Judge Gignoux's decision, it was imperative that we begin discussing a number of important questions concerning the relationship between the federal government and the tribes. For example, what was to be the level of future federal services?

It became apparent early in those discussions that the issue of a partial settlement with the tribes would be an unavoidable topic. And given our concern for the hundreds of thousands of Maine homeowners and businesses facing the threat of litigation, it made sense to us to pursue that topic. It also became clear that we could at least explore the possibility of an overall settlement and obtain from the tribes terms on which at least they would be willing to settle.

Had it not been for those difficult and lengthy negotiating sessions, there would not be on the table at this time any settlement proposals to which even one party had agreed.

A fourth question: Why has the "Great White Father" put the State of Maine "up against the wall?" Why is the Administration trying to force a negotiated settlement?

No one is backed up against a wall. The federal government's efforts over the past year have been strictly voluntary—made at the request of Maine's Congressional delegation. We cannot force a negotiated settlement.

Like Judge Gunter, the Work Group reviewed the tribes' claim, the state's defenses, and the pertinent law and historical materials. We reached the same conclusions as Judge Gunter did: The tribes' claims are not frivolous. They are for real. They could be entirely successful in litigation. And the litigation will take many years to resolve, with economic chaos a likely result.

In view of those conclusions, the President authorized us to agree to a partial settlement with the tribes. In exchange for a voluntary payment of $25 million by the federal government, we can clear title and guarantee security for thousands of Maine citizens who own homes and businesses in the claims area, who would suffer the most from litigation, and who could least afford to risk either the costs of litigation or defeat in court. The Congress must approve this settlement, and anyone who thinks it wise to oppose it can do so. We cannnot force its ultimate acceptance by the Congress.

The terms of settlement proposed by the tribes to the state and the large land holders, on the other hand, were set forth without endorsement by the Administration. We neither support those terms nor oppose them. The tribes have made an offer.

As the President said here in Bangor two months ago, "If the Governor of Maine or the fourteen landowners don't want to accept [the offer], they have three choices. They can either continue to negotiate, they can accept the agreement . . . and have an end to it, or they can stay in court and litigate. I have no preference about it. . . . We have not imposed the will of the Executive Branch on the State of Maine at all. The Government of Maine is still completely free to do anything it chooses."

A final question: Isn't is unconstitutional, un-American and unfair to treat large landholders differently from small landholders, homeowners and businessmen?

In responding to this question, I should first point out that it is the opinion of the Justice Department, based on legal precedent, that the proposed 50,000-acre exemption is constitutional. We would not have proposed it if we had not received that assurance.

One of the reasons that it is constitutional is that it is inherently fair. All landholders are treated equally; every person or entity would have title cleared to 50,000 acres. Indeed, the greatest beneficiaries of this approach—those who would benefit the most from the voluntary $25 million federal contribution—would be those who own the most land.

Second, this proposal is as fair and constitutional as Maine's own growth tax or the federal income tax, where people who own the most timber or have the highest income are taxed at the highest rates.

Finally, this proposal is fair because if the claims are legitimate, those who have benefitted most from any illegal conveyances have the most at stake in this case and can be expected to contribute proportionately more to any resolution of it—in or out of court.

No one is requiring the large landholders to participate in out-of-court settlement. They have the same choices as the state: accept the tribes' offer, negotiate, or litigate. In fact, up until the Administration got involved in this case, there was no settlement offer to which the large landholders could respond.

Small landholders and homeowners do not really have those choices. They generally could not afford to settle on their own; they could not be expected to negotiate individually; and they could not afford the legal expenses or the economic consequences of litigation pending for years and years. And if they lost in court, they could lose their homes and their livelihood. The only fair thing for the federal government to do is to guarantee their security—to protect those who cannot protect themselves.

I know I have taken a good deal of your time this morning, and I appreciate your willingness to listen so patiently. I hope I have clarified some matters, but I am sure you have other questions as well. I will try to answer as many as I can.

But before I close, I would like to read for you one passage from the February Joint Memorandum which I think we all ought to keep in mind.

"If settlement can be accomplished, it will reflect a compromise from every perspective. The tribes regard their claims as worth many times more than any consideration to be received under this agreement. The State of Maine, on the other hand, has taken the position that the tribes' claims are without merit . . .

"With these considerations in mind, any settlement would reflect a shared understanding of the reality created by the litigation, rather than one party's view of the equity of the claims. The claims are unique, and resolution of them on any basis other than litigation similarly must be unique."●

GEOTHERMAL ENERGY IN ALASKA

● Mr. STEVENS. Mr. President, recently an article appeared in the Anchorage Times which discussed the potential for geothermal development in the State of Alaska.

The article points out that 88 volcanic calderas and 98 thermal springs have been identified in Alaska. A number of State agencies and private organizations are investigating the feasibility of utilizing these geothermal energy sources in various ways. One of the more novel options under consideration is to build a fish hatchery which uses geothermal heat directly to warm the waters in which the young fish are to be raised. Other options include new technologies for electric power generation and space heating.

Alaskans take seriously the potential of geothermal energy. While our vast oil and gas resources are currently at the focus of national energy policy, we are planning for the development of our renewable energy sources to meet the needs of a healthy, dynamic Alaskan economy in the decades ahead.

Mr. President, I ask that the article from the Anchorage Times be printed in the RECORD.

The article follows:

[From the Anchorage Times, Sunday, Mar. 12, 1978]

ONE SOURCE LIES UNDER THE EARTH

Every point of the globe rests on an ocean of molten rock at 1,000 degrees Centigrade.

Heat from this immense reservoir flows steadily to the earth's surface where it appears most dramatically as volcanoes, hot springs and geysers.

Over the centuries numerous beneficial uses have been found for geothermal resources. Because geothermal power plants are relatively clean and create no pollutants comparable in quantity or complexity to air pollution from coal-fired plants or to radioactive wastes from fission reactors, the resource is gaining more attention as a possible energy source for the future.

The potential for geothermal resources in the United States is hundreds of times greater than current use. The U.S. Geological Survey assessed geothermal reserves in the Western United States and concluded that reserves are adequate to supply all new electrical capacity in those states for the next two decades.

U.S.G.S. estimates that more than 100,000 megawatts of electricity could be generated from natural steam and high temperature geothermal fluids at prices competitive with electricity from fossil and nuclear power plants.

Currently the total United States electric capacity from all sources is 500,000 megawatts.

As a source of electricity, geothermal resources globally supply about 1,500 megawatts of power from about a dozen geothermal areas.

The Geysers dry-stream field north of San Francisco generates about 500 megawatts, which is enough to supply a city of one-half million.

Mexico, Japan, the Soviet Union, Hungary, Iceland and New Zealand far exceed other countries in direct application of geothermal energy; their use totals almost 6,000 megawatts for agriculture, industrial processing and for heating and cooling buildings.

In the United States, geothermal energy is used directly for heating at Klamath Falls, Ore.; Boise, Idaho and in other scattered locations.

In Alaska, 88 different volcanic calderas have been identified. They occur in Alaska's two major volcanic regions in the Aleutian Chain and the Wrangell Mountains. Of these 88 locations, the heat content has been identified for 16 sites, with values running as high as 345×10 to the 18th calories at Mt. Emmons. For comparison 310×10 to the 18th calories represent enough energy for a 100 megawatt plant to operate for 100 years.

However, because of technical problems of heat transfer, it is unlikely that energy from igneous systems could be utilized to any extent prior to the year 2000, a Division of Energy and Power Development report says.

Geothermal areas which hold some promise in Alaska include water-dominated systems which could be used for space heating, agricultural needs and recreation.

There are 98 known Alaskan thermal springs, four with temperatures of 90 degrees to 150 degrees.

Another geothermal resource, normal gradient systems, has been studied by the Alaska Office of Pacific Sierra Research Corp. The study investigated the economics of normal gradient hydrothermal resources of Alaska for non-electrical, multiple-use applications in Barrow, Kiana, Huslia, Nikolski, Wrangell and Nome.

From any surface location on earth, if a hole is dug deep enough, a geothermal resource will be located. A normal heat gradient is about 3 degree Centigrade per 100 meters below the earth's surface. Some heat gradients as high as 15 degrees to 18 degrees per 100 meters have been observed in geothermal areas.

A number of hot springs in Alaska have been used in the past for space heating and recreation. William Ogle, President of the Anchorage-based firm Energy Systems, did an extensive study throughout the state of Alaska's hot springs.

Ogle made the study in connection with the selection of a site for the possible installation of a small binary geothermal electric generating plant.

Also the state division of energy and power development funded a study of several geothermal areas to find a possible site for a fish hatchery.

The study recommended Bailey/Bell Island area as a promising thermal spring site for hatchery development and suggested further evaluation.

The use of a binary power cycle has been suggested as perhaps the best current method to generate power from geothermal heat sources. Such cycles generally involve the direct transfer of heat between hot geothermal water and an organic working fluid.

Other methods of extraction include fluidized bed technology for removing heat from molten igneous magma systems, hot dry rock technology, geopressured-geothermal technology and vapor and water dominated technology.●

A QUESTION OF HONOR

Mr. SCHMITT. Mr. President, the attack last Thursday on an unarmed Korean airliner by the Soviet Union raises two important questions: First, what possible reasons could justify the attack and the resulting loss of life and injuries; and second, where is the sense of moral outrage on the part of the world community in general and the United States in particular?

The first question can only be answered by the Soviets. We can predict that the answer will be put forth in terms of "maintaining the sovereignty of Soviet airspace" and so on. While that answer can in no way justify the senseless attack, it is doubtful that the true story can or will ever be brought before the people of the world. We can, however, address the second question, because it deals with us, and the rest of the free world, and our seeming inability to respond to such outrageous international brutality.

If we were to consider a similar scenario with different international players the result would probably be somewhat different. Suppose an Aeroflot flight from Moscow to New York were to have a navigational equipment failure over the North Pole. And suppose as a result the aircraft turned to the right—along a track that would take it over Montana. That track would take the flight near the heart of our deployed Minuteman forces. When the deviation was detected by our surveillance radars, we would initiate, along with our Canadian allies, a communications search in an attempt to make contact with the flight to return it to its proper course. Failing that we or the Canadians would scramble interceptors to join with the flight and using the proper international signals lead the errant airliner to a safe landing. If the Aeroflot aircraft did not heed our signals we would maintain surveillance and look for the display of any signs of hostility. Those signs might include dropping parachutists, laying mines, firing on the interceptors, or, of course, dropping bombs. If there were no such acts of hostility apparent, we would do nothing except follow the flight and provide whatever assistance we could until a landing was necessary.

But, let us change that scenario to an equivalent of the Soviet response last Thursday. Let us say that because the Aeroflot airliner did not heed our signals and was flying into one of our most strategically important areas, we gave the word to our interceptors to open fire. As a result, two people were killed, many injured, and the aircraft crashlanded in a wheatfield. With this revised scenario it is inconceivable that the Soviets would not act immediately and forcefully. They would most likely demand an immediate convening of the U.N. Security Council to address the "criminal act of the United States." Our own news media, Members of Congress, and others in and out of Government would demand investigation

of the "excess response of our defense forces against an international commercial flight." And, to be sure, they would be quite right in doing so.

So where is the hue and cry from the administration, Congress, and the news media in the downing of the Korean jetliner? Is it because there were no Americans aboard that we have remained publicly silent? Was there a collective sigh of relief from Washington that Secretary Vance's SALT II negotiations in Moscow would not be disturbed since no American life was lost? Have we really come that far from our ideal of the importance of every person's right to live and pursue happiness without fear?

The Soviet Union should be exposed to the glare of world scrutiny. The outrage we should feel and express overrides the importance of SALT or wheat deals or even détente itself. There simply is no reason for us, or the rest of the world for that matter, because of intimidation or some misguided sense of political necessity, to do nothing while two Korean families bury their dead, and free people everywhere become a little less free.

ORDER VITIATING ORDERS FOR RECOGNITION OF CERTAIN SENATORS TOMORROW

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that four special orders for recognition of Senators on tomorrow, Senators JAVITS, PERCY, STAFFORD, and MATHIAS, be vitiated.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR RECESS UNTIL 9 A.M. TOMORROW

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that when the Senate completes its business today it stand in recess until the hour of 9 a.m. tomorrow morning.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR RECOGNITION OF SENATORS MORGAN AND SCHMITT TOMORROW AND FOR RESUMPTION OF CONSIDERATION OF SENATE CONCURRENT RESOLUTION 80

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that after the prayer on tomorrow morning Mr. MORGAN be recognized for not to exceed 15 minutes, to be followed by Mr. SCHMITT for not to exceed 15 minutes, after which the Senate resume its consideration of Senate Concurrent Resolution 80.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR SENATOR DOMENICI'S AMENDMENT TO BE THE PENDING BUSINESS

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the amendment by Mr. DOMENICI become pending at that hour.

The PRESIDING OFFICER. Is there objection?

Mr. DOMENICI. Mr. President, reserving the right to object, and I have no objection to that, I wonder if we might work out something where the vote on my amendment might be deferred, perhaps backed with some others, or at least put off until a little later in the day.

Mr. ROBERT C. BYRD. Mr. President, if I might have the attention of the distinguished Senator from Maine (Mr. MUSKIE).

The PRESIDING OFFICER (Mr. MATSUNAGA). The Senate will be in order.

The Senator from West Virginia.

Mr. ROBERT C. BYRD. Mr. President, may I ask the distinguished manager of the resolution in response to the inquiry of Mr. DOMENICI at what time we might be able to begin voting on the amendment by Mr. DOMENICI first and stacking any other votes behind it that may be possible.

Mr. DOMENICI. What was the next amendment?

Mr. MUSKIE. We do not have them scheduled. The amendments of which I am aware, and I do not see the sponsors here, are an amendment by Senator DOMENICI, two Durkin amendments of 30 minutes each, and he should be notified to be here in the morning, two Byrd amendments and we have 4 hours down for that, but I understand he will not agree to a limitation but he does not believe he will take more than an hour on those two. There is a Nelson amendment which will not involve a vote to be offered, and it has 30 minutes.

The PRESIDING OFFICER. The Senate will come to order.

Mr. MUSKIE. The Tower amendment.

The PRESIDING OFFICER. Please cease conversations going on on the floor. The Chair is unable to hear what is going on on the floor.

Mr. MUSKIE. The Tower amendment we would like to delay until about noon to serve the convenience of Senator STENNIS.

Mr. ROBERT C. BYRD. I wonder, if the distinguished Senator will yield at that point, whether it will be possible to have the first vote, say, occur at 12 or 12:30 p.m. tomorrow so as not to disturb the committees which are trying to meet the May 15 deadline?

Mr. DOMENICI. I think that would be a good suggestion. Go ahead with mine coming on first, agreeing that it would be the first one voted on but the vote on it would not occur prior to 12 o'clock.

Mr. MUSKIE. That would be fine with me.

Mr. ROBERT C. BYRD. Will that be agreeable?

Mr. DOMENICI. Yes.

Mr. ROBERT C. BYRD. 12 or 12:30?

Mr. DOMENICI. Whichever the leader thinks preferable.

Mr. ROBERT C. BYRD. Perhaps 12:30 p.m. That will give committees time to meet.

Mr. MUSKIE. If there are others in the interim, may I say to the majority leader, that could follow the Domenici amendment.

Mr. ROBERT C. BYRD. Yes.

ORDER OF PROCEDURE TOMORROW

Very well, then, Mr. President, if that is agreeable, I ask unanimous consent that the vote on the amendment by Mr. DOMENICI, which amendment will become the pending business when the Senate resumes consideration of the resolution in the morning, occur at the hour of 12:30 p.m. tomorrow and that when the debate is completed on the amendment by Mr. DOMENICI tomorrow it be temporarily set aside to allow other amendments to be called up and that if rollcall votes are ordered in such other amendments that they follow in sequence immediately back of the vote on the disposition of the Domenici amendment.

Mr. DOMENICI. Mr. President, reserving the right to object.

The PRESIDING OFFICER. The Senator from New Mexico reserves the right to object.

Mr. DOMENICI. I wonder if the distinguished chairman of the Budget Committee might agree as a further condition that we change the time allowed for the Domenici amendment from a half hour equally divided up to 45 minutes equally divided.

Mr. MUSKIE. Yes.

Mr. DOMENICI. I am not sure I will use that, but I have certain notions in mind between Senator MUSKIE and me that we might have to talk about here on the floor.

Mr. MUSKIE. That is agreeable. I suspect we may be moving slowly at that hour in the morning anyway.

Mr. DOMENICI. That is what I mean.

Mr. ROBERT C. BYRD. I include that in my request.

Mr. DOMENICI. No objection.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President. I thank all Senators.

EXECUTIVE SESSION

Mr. ROBERT C. BYRD. Mr. President, if it is agreeable with Mr. STEVENS, the acting Republican leader, I understand that the following nominations have been cleared for action, and I ask unanimous consent that the Senate go into executive session now for not to exceed 5 minutes.

There being no objection, the Senate proceeded to the consideration of executive business.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senate proceed with the consideration of the nominations beginning on page 2 of the Executive Calendar, beginning under the following number, Calendar Order No. 116, then all of the nominations under "New Reports" down to the Department of Justice on page 3 and then going over to the nominations placed on the Secretary's desk in the Coast Guard, and then taking up the nomination that has been reported today out of the Banking Committee chaired by the distinguished Senator from Wisconsin (Mr. PROXMIRE) in connection with which nomination I understand has been cleared all the way around.

Mr. STEVENS. Mr. President, reserving the right to object, I am informed that the calendar numbers listed by the distinguished majority leader have been cleared on this side and we do not object.

The PRESIDING OFFICER. Is there objection?

Mr. HELMS. Mr. President, reserving the right to object, may I ask the majority leader, there was some confusion in the Chamber, did he include Mr. Cottine's nomination?

Mr. ROBERT C. BYRD. No, not in this request.

Mr. HELMS. He did not include Mr. Slater?

Mr. ROBERT C. BYRD. No, not in this request.

Mr. HELMS. I thank the majority leader. I have no objection.

The PRESIDING OFFICER. The clerk will report the first nomination.

THE JUDICIARY

The second assistant legislative clerk read the nomination of Robert W. Sweet, of New York, to be a U.S. district judge for the southern district of New York.

The PRESIDING OFFICER. Without objection, the nomination is considered and confirmed.

SECURITIES INVESTOR PROTECTION CORPORATION

The second assistant legislative clerk read the nominations of Hugh F. Owens, of the District of Columbia, Ralph D. DeNunzio, of Connecticut, Brenton H. Rupple, of Wisconsin, and Michael A. Taylor, of New York, to be Directors of the Securities Investor Protection Corporation.

DEPARTMENT OF THE TREASURY

The second assistant legislative clerk read the nomination of Saul Silverman, of Pennsylvania, to be Assayer of the U.S. Assay Office at New York, N.Y.

U.S. COAST GUARD

The second assistant legislative clerk read the nominations of Rear Adm. John B. Hayes, U.S. Coast Guard, to be the Commandant of the U.S. Coast Guard; Rear Adm. Robert H. Scarborough, Jr., U.S. Coast Guard, to be the Vice Commandant of the U.S. Coast Guard; Rear Adm. Robert I. Price, U.S. Coast Guard, to be the commander, U.S. Coast Guard Atlantic Area; and Rear Adm. James S. Gracey, U.S. Coast Guard, to be the commander, U.S. Coast Guard Pacific Area.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the nominations on page 2 and going down to the Department of Justice on page 3 be considered en bloc.

The PRESIDING OFFICER. Without objection, the nominations are considered and confirmed en bloc.

NOMINATIONS PLACED ON THE SECRETARY'S DESK IN THE COAST GUARD

The second assistant legislative clerk proceeded to read various nominations in the Coast Guard.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the nominations placed on the Secretary's desk in the Coast Guard be considered and confirmed en bloc.

The PRESIDING OFFICER. Without objection, the nominations are considered en bloc and confirmed en bloc.

FEDERAL HOME LOAN BANK BOARD

The assistant legislative clerk read the nomination of Anita Miller, of New Jersey, reported earlier today to be a member of the Federal Home Loan Bank Board for the remainder of the term expiring June 30, 1978, vice Thomas R. Bomar, resigned; and the nomination of Anita Miller, of New Jersey, to be a member of the Federal Home Loan Bank Board for the term of 4 years expiring June 30, 1982.

The PRESIDING OFFICER. Is there objection to the consideration of the nomination?

Mr. PROXMIRE. Mr. President, I would like to speak on that nomination briefly.

The PRESIDING OFFICER. The Senator from Wisconsin is recognized.

Mr. PROXMIRE. Before I do, the four people just approved as Directors of the Securities Investor Protection Corporation indicate that this is an extraordinary example of an efficient agency, and that is the reason I want to make this statement. They have done a fine job, a most impressive job, and the President has done an excellent job in finding capable people for this position.

The committee was most impressed with these nominees, because they came from the industry, they understood the industry thoroughly. They were experienced people, with fine educational and business backgrounds, well qualified for this agency, which is one of the reasons why the agency has functioned so well, and that is because they have had these qualified people.

Mr. President, the Committee on Banking, Housing, and Urban Affairs received on April 7, 1978, President Carter's nomination of Anita Miller for membership on the Federal Home Loan Bank Board to fill the remainder of the term of former Board Chairman Thomas R. Bomar expiring June 30, 1978, and for a new 4-year term expiring June 30, 1982. The committee held a hearing on the nomination April 20 and unanimously voted on April 21 to recommend Mrs. Miller's confirmation.

I am pleased to support Mrs. Miller's nomination. If she is confirmed by the Senate, the Board at last will be brought to full strength and will have as a new member a person who is well qualified for the job. Mrs. Miller not only will bring a wealth of professional experience in the housing field but also, as she demonstrated at her confirmation hearing, a broad familiarity with many of the housing, lending, and savings and loan industry issues the Board faces.

For the past 6 years, she has headed up the Ford Foundation's activities in the housing and neighborhood conservation areas where she has been involved in working to improve housing in urban and rural communities across the country. Mrs. Miller has also been closely involved with Federal, State, and local agencies in devising and evaluating housing programs and strategies. In that capacity, she has advised several State deparments of community affairs and worked with the governments of New York City and Providence, R.I on minority group and fair housing problems.

In addition, Mrs. Miller served on the FHLBB's Advisory Council which has given her a grounding in responsibilities of the Board and a foretaste of the issues she will be dealing with as a member.

I was pleased by Mrs. Miller's forthright responses to the committee's questions on such important issues as how best to prod savings and loan institutions to meet their community reinvestment obligations, what steps the Board should take to carry out and toughen its antiredlining policies and how to assure equal employment opportunities for minorities and women in the savings and loan industry.

Nevertheless, Mr. President, I was disappointed by her apparent unwillingness to speak out against insider abuse when mutual savings and loan institutions converted to the stock form of ownership. The matter of conversions is under current study at the Home Loan Bank Board. I hope and trust Mrs. Miller will immerse herself in this study and be ever watchful of the need to protect the huge public net worth of mutual savings and loan institutions.

In addition, I would just like to say an additional word on the nominee before the Senate now, Mrs. Miller. Mrs. Miller is, to my knowledge, the first woman ever nominated to the Home Loan Bank Board, and I think it is about time.

Mrs. Miller brings an excellent background in housing to the Board. Of course, that is the principal function, to provide supervision for the agency that overseas the S. & L.'s. Mrs. Miller was unanimously approved by the committee. The committee was most impressed by her intelligence, her capability in answering questions, and her remarkable knowledge of the industry. This, too, was an outstanding nomination by the President, and he deserves credit for it. At long last, after several years now, the Home Loan Bank Board for the first time in 2 or 3 years has the full three-member board that will enable it to act promptly in matters of agency business. So I am happy to support that nomination.

The PRESIDING OFFICER. Without objection, the nomination is considered and confirmed.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that it be in order to move to reconsider en bloc the votes by which the nominees have been confirmed.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. I so make that motion.

Mr. STEVENS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the President be immediately notified of the confirmation of the nominations.

The PRESIDING OFFICER. Without objection, it is so ordered.

LEGISLATIVE SESSION

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senate return to legislative session.

The PRESIDING OFFICER. Without objection, the Senate now stands in legislative session.

THE CALENDAR

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of Calendar Order No. 677.

ENCOURAGED TRAVEL IN THE UNITED STATES

The Senate proceeded to consider the bill (S. 2552) a bill to amend the act of July 19, 1940, relating to travel in the United States, to authorize additional appropriations, which had been reported from the Committee on Commerce, Science, and Transportation with an amendment beginning on page 1, line 5, strike through and including page 2, line 6, and insert the following:

July 19, 1940 (16 U.S.C. 18d), is amended by (1) striking out "1977, and" and inserting in lieu thereof "1977;"; and (2) striking out "1978." and inserting in lieu thereof "1978; and $1,008,000 for the fiscal year ending September 30, 1979.".

So as to make the bill read:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 5 of the Act entitled "An Act to encourage travel in the United States, and for other purposes", approved July 19, 1940 (16 U.S.C. 18d), is amended by (1) striking out "1977, and" and inserting in lieu thereof "1977;"; and (2) striking out "1978." and inserting in lieu thereof "1978; and $1,008,000 for the fiscal year ending September 30, 1979.".

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the bill passed.

Mr. STEVENS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 95–742), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

PURPOSE OF S. 2552

S. 2552 would amend the act of July 19, 1940, relating to the promotion of travel within the United States by the Secretary of Commerce through the U.S. Travel Service.

Specifically it would authorize to be appropriated for that program $1,008,000 for fiscal year 1979.

BACKGROUND AND NEEDS

The act of July 19, 1940, authorized and directed the Secretary of Interior to encourage, promote, and develop travel within the United States, its territories and possessions, providing such activities did not compete with the activities of private agencies.[1]

By Public Law 93–193 enacted December 19, 1973, the authority contained in that act was transferred to the Secretary of Commerce. Appropriations to implement the act were finally authorized by Public Law 94–55, enacted July 9, 1975.

Thus, although the authority contained in the act of 1940 was transferred to the Secretary of Commerce in 1973, it was dormant for lack of funding authority until Congress, in spite of a Presidential veto, enacted appropriations authority almost 2 years later in 1975.[2]

The value of the Federal domestic travel program as indirect support for State, local, and private promotional activities lies in its potential rather than any demonstrable achievements by the U.S. Travel Service to date.

From the beginning, USTS has ignored the expressed legislative intent of Congress to develop an "in-house" program after consultation with all substantial segments of the travel industry.

The agency has undertaken various initiatives on an ad hoc basis which are clearly inconsistent with the direction Congress intended the program to take.

After an inquiry made by this committee the Secretary of Commerce halted and then terminated one such program.[3]

Another program for which the USTS furnished financial and personnel assistance was, at the request of this commitee, audited by the General Accounting Office. The GAO report concluded that the USTS had provided financial and personnel assistance "without acquiring sufficient information with which to adequately evaluate the need or to what extent it should contribute its support."[4]

Most recently, during the current fiscal year, the USTS has committed or earmarked $665,603 of its $1,008,000 budget or over 65 percent to activities to be done outside of the agency. The previous fiscal year the agency committed $1.1 million or over 75 percent of its $1.5 million budget to outside contracts.[5]

USTS' domestic program as reflected in the law and the legislative history is intended to furnish indirect support for State, local, and private promotional activities. The legislative history is also quite emphatic that the domestic program should be developed "in-house" as opposed to being "contracted out".

For example, prior to his nomination hearing, the present Assistant Secretary of Commerce for Tourism was asked the following question by the Committee:

As head of USTS do you intend to develop without delay, an in-house domestic tourism program with intermediate and long-range objectives and goals?

Mr. Chavez's written reply was:

Yes, I do and I intend to keep this committee completely informed as this program develops and to seek the committee's support in this endeavor.[6]

Subsequently, by letter dated May 13, 1977, the Secretary of Commerce, Juanita M. Kreps informed the committee that she had made a decision:

"To proceed immediately to develop a sound in-house domestic tourism program in accordance with the subcommittee's directions concerning tourism programs."[7]

Subsequent events were to prove that USTS neither proceeded to develop an "in-house domestic" program nor attempted to inform the committee "completely" as to the agencies activities or efforts in this regard.

A hearing on S. 2552 was held on March 15, and one witness, The Assistant Secretary of Commerce for Tourism testified. Mr. Chavez supported an authorization of $1,008,000 for fiscal year 1979 for the agency's domestic program.

In the committee's judgment, the hearing record (S. 2552) supports the following conclusions:

The Assistant Secretary was not familiar with the programs and work of his agency (USTS).

USTS continued in its failure to develop an "in-house" domestic program. In fiscal year 1977 it contracted out three-fourths of its budget of $1.5 million; and in fiscal year 1978 it contracted out two-thirds of its budget of $1,008,000.

With respect to many of the agency's outside contracts, et cetera, it was clear that USTS in many cases contracted away considerable money as fast as it could without coordination or a true understanding of who was going to do what; how it was going to be done; and most importantly, why it was going to be done.

A number of these contracts were also sole source, and the Assistant Secretary gave no adequate explanation of (i) why they were sole source, and (ii) why a particular entity was chosen as the source.[8]

The committee believes the evaluation of the U.S. Travel Service which appears in the final report of teh National Tourism Policy is relevant to the question of the agency's performance.

That Report concludes:

"In summary, the USTS lacks the respect of the travel industry, and dissatisfaction with the Federal tourism efforts, as represented by the U.S. Travel Service, is widespread within the industry. The principal Federal tourism agency should function in support of private sector organizations if it is to be effective and provide leadership to all individuals and organizations interested in tourism. The failure of the USTS to do either effectively in the past, severely limits its ability to be creditable in these roles in the future. . . . Existing USTS staff cannot be expected to function any better in the future than it has in the past without the infusion of new management capable of developing procedures that establish clear priorities, coherent programs, and effective control on performance. Congress must tighten . . . its oversight to assure that it functions effectively, and intervene quickly and surely if it does not."[9]

As mentioned the committee has just received the final report on the National Tourism Policy Study. That report makes comprehensive recommendations to rationalize the extensive Federal involvement in travel and tourism. Within the next few months after the agencies of government and the public and private sectors of the travel industry have had sufficient time for review and analysis, the Committee will begin exensive hearings with a view toward recommending to the Congress a national tourism policy and legislation to implement it.

Footnotes at end of article.

Considerable streamlining of the present Federal effort is necessary if its programs and policies are to be responsive to the national interest in travel and tourism, and meet the needs and interests of the public and private sectors of the industry and the travel consumer. The comprehensive recommendations of The National Tourism Policy Study recognized this necessity, and change in the existing Federal structure is a distinct possibility in the forseeable future.

Meanwhile, however, the U.S. Travel Service and its personnel represent the principal Federal agency and professional staff devoted exclusively to travel and tourism in the United States. However imperfect, and until there is legislative change, USTS is therefore the logical Federal agency to undertake domestic programs of indirect assistance and support to the industry and the travel consumer.

In this context, and with the full realization that the present structure of USTS may be radically altered by legislation within the next 2 years, the committee wishes to set forth some general views and guidelines on the kind of "in-house" domestic program it believes the agency should develop. It should be emphasized that these are generalities, and not intended to be rigid, specific prescriptions for a domestic program.

The Federal Government can assist the U.S. domestic tourism industry in a variety of ways, to assure an adequate supply of travel opportunities for the public which will contribute to the quality of life of the public, the economic prosperity of the country, and the economic growth of the industry. While the magnitude, diversity, and pervasiveness of travel in the United States are so great as to warrent a vast number of efforts, present circumstances prevent the development of a full complement of programs. Consequently, the committee, believes that the Travel Service must carefully select a limited number of programs which will complement or supplement the efforts of the industry, States, cities, and other Federal agencies. USTS must do what industry cannot or will not do. These programs, necessarily modest in the beginning should be innovative and catalytic in nature, designed in such a fashion to educate and stimulate industry leaders (public and private) to carry the benefits to others in the industry and the consumer. The output of USTS should be guidelines, models, educational packages, communications mechanisms, and other devices which can assist the industry to improve upon the quality and quantity of its product, sharpen its efficiency, improve communications, and maximize the benefits of travel to consumers industry and the economy.

Although it has long been recognized that the actions of many Federal agencies impact travel and play a significant role in providing travel opportunity, the staff of USTS presently represents the principal professional, Federal staff devoted exclusively to travel and tourism in the United States. For the time being, therefore, it is from this professional resources and the growing body of knowledge contained in data and scientific, professional, and business literature that programs should emanate.

Among the programs that might provide long-term and increasing benefits to travel and tourism are:

Clearinghouse and information system.—USTS could collect and catalog industry innovations, Federal and State program information, research data, and professional literature in a library and clearinghouse easily retrieved for industry use. A series of communication techniques could be devised to advise the industry of available information and bring particularly relevant programs, regulations, and activities to the attention of industry leaders on a current basis.

Training and education programs.—USTS could develop a series of training packages in the form of workshops, films, publications, and other educational tools for training of and use by travel industry leaders and employees. Such programs need not be designed to promote the virtues of travel and tourism, but rather to bring the latest in techniques and innovations to the travel industry. Fragmentation and poor communications affect the ability of the industry to keep abreast of current and efficient ways and means to maximize program efficiency while providing quality travel opportunities.

Planning and research.—USTS could be collecting, developing, and disseminating planning and research guidelines. Although the "state-of-the-arts" in planning and research is limited, considerable attention has been given to these areas in recent times. Preliminary guidelines and suggested methodologies could be cataloged and disseminated. While the development of sophisticated techniques may be impossible at this time, USTS should bring existing technology to the industry It should be a strong proponent of tourism/travel planning and research. In addition to sharing the technology of planning and research with the industry, USTS should be supporting, chiefly through in-house efforts, innovative inquiry into questions dealing with travel impact, costs, benefits, behavior, constraints, policy, and other questions for which answers are lacking.

In summary, USTS should reach out to the U.S. travel industry with programs which will improve communications within the industry, sharpen the ability of the industry to meet public needs, and maximize the economic, social, and cultural benefits of travel. USTS should serve as a clearinghouse for information, a liaison between industry and government, an educational center, and an innovator of techniques and methods to insure that travel and tourism contribute to the welfare of the public, the industry, and the Nation. Such an effort should emanate principally from within the professional expertise of USTS, with industry and the academic community serving as partners to provide assistance where necessary.

With great reluctance, the committee feels it can only justify continued authorizations for USTS programs—international and domestic—if it also specifies procedures it believes the agency should follow in its future contracting with respect to both its international and domestic activities.

Specifically, where amounts of $25,000 or more are involved, the committee expects USTS to refrain absolutely from "sole source" contracting, or sole source grant procedures such as it employed in the case of the University of Missouri, or Discover America Travel Organizations, Inc.[10]

Where amounts of $25,000 or more are involved, the agency should solicit at least three sealed proposals. Before formally awarding a contract, the agency should notify the committee in writing who the successful bidder is, and the reason therefor. The notice to the committee should be in sufficient time before the award to enable the committee to raise any questions or objections it feels necessary.

Finally, the "Request for Proposal" in these instances should be sufficiently specific and provide enough notice to enable potential bidders to compete effectively for the contract.

With respect to contracts or grants in an amount less than $25,000, the committee believes USTS should have the flexibility to go "sole source" only when absolutely necessary. In the event it chooses to do so, however, the committee expects prior notice as to the justification for going "sole source," the identification of the party with whom the agency intends to contract, and the reasons for its choice. Again the notice must be in sufficient time before the contract is entered into to enable the committee to raise questions and objections if necessary.

Out of an abundance of caution, the committee wishes to emphasize that nothing in the foregoing discussion of agency contracting procedures is intended to imply that USTS need not develop its domestic program in-house. The committee's past intention in this regard is unchanged and reemphasized.

Mr. ROBERT C. BYRD. Mr. President, I yield the floor.

THE HUMAN RESOURCES: ALASKA'S LABOR MARKET

Mr. STEVENS. Mr. President, recently the Stanford Research Institute conducted a study of the potential economic benefits to the Nation and environmental impacts associated with the development of Alaska's metallic minerals and asbestos based on the analysis of seven specific mineral deposits considered economically attractive. One of the findings of that study is particularly interesting. The study indicates that, in the absence of extensive legislative or regulatory impediments to the development of mineral resources, a mining industry could develop in Alaska by the 1990's that would provide the Nation with 20,000 to 40,000 additional jobs. This represents about 0.5 percent of current unemployment.

It is quite clear that Congress decision concerning the final disposition of Alaska's d–2 lands will have a great impact on the labor force. I think my colleagues will find an article by Jesse L. Carr, secretary-treasurer of Teamsters Local Union 959, which has jurisdiction over the entire State of Alaska, of particular interest. Jesse Carr points out that few States can match the "intimate, close-knit, cooperative manner in which Alaska's employers and labor work together." Alaska has come into its own lately in our history and it offers huge potential for the future. But, as Mr. Carr points out—

Any development of Alaska's resources will come only when the world market dictates that development. Therefore it is automatic that such development will be carried out with scrupulous safeguards and necessities.

Alaska will be the first place in the United States where development will be done right the first time, within limits set by our knowledge at that time.

I ask unanimous consent that Mr. Carr's article be printed in the RECORD at this time.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

THE HUMAN RESOURCES: ALASKA'S LABOR MARKET

(By Jesse L. Carr)

It is doubtful that any similar population base can offer the great diversity and high level of skills forming Alaska's Labor market. It is definite that none can match the intimate, close-knit, cooperative manner in which Alaska's employers and Labor work together.

These big plus factors, which are available to any potential developer of Alaska's waiting resources, have formed over the years, from heaven knows what sources. Some have speculated that they came because the common enemies of weather and climate forced everyone to unite in order to survive. That the habit of being united carried over into those areas where they would normally find a base for separation, or even confrontation. Whatever the source, they have proven invaluable in heading off costly labor disputes and the more costly closures of industry.

Today, Alaskan Labor and management work together to foster and develop those resources having a potential in the markets of the world.

Teamsters Local 959, which has jurisdiction over the entire state of Alaska, is presently working with the State Chamber of Commerce to create and make operative the first *Alaskan Development Council* ever formed within the State. When that Development Council is full blown and effective, it will have at its disposal all information relative to available resources, requirements for the development of those resources and further, an effective team for solving problems and bringing about that development.

It is known and accepted by our Union that this Economic Development Council is a long range undertaking, involving a commitment ". . . above and beyond the normal line of duty." It is further accepted that it will make demands upon our Union and its officials and will involve them in economic battles, far beyond their daily sphere. So be it. We accept whatever comes because it must be done.

We are further dedicated to those steps required to gain the cooperation and alignment of our State government toward these development ends. In reality, our State administration holds many of the reins which can either check or expedite resource development. Roads, airports, availability of lands, even basic regulatory functions rest solely within the purview of the State government. It must be State policy to turn these, where possible, toward easing the burden of a potential developer.

Does all this concentration mean development at any cost? Definitely not!

Any development of Alaska's resources will come only when the world market dictates that development. Therefore, it is automatic that such development will be carried out with scrupulous attention to environmental safeguards and necessities. Alaska will be the first place in the United States where development will be done right the first time, within the limits set by our knowledge at that time. We have waited this long. We can take the added time to do it right.

Does Alaska have any definite advantage to offer a developer so far as Labor is concerned? We believe it does.

First of all most development would come as "new industry," having no counterpart and involving no traditional practices. This would mean that the latest, most modern push-button plant would take away no jobs, would create no change. Instead it would create new jobs and would have the full cooperation of all involved from Labor. Those who have attempted to build such "new industry" in other areas will be instantly aware of the gain here.

Second, Labor itself contains years and years of experience which could, if called upon, serve to eliminate needless cost factors and advise wisely on operations under arctic conditions.

Finally, so far as our Union is concerned, our concept of Labor being the "Partner of each Employer" automatically commits us to working jointly with management, toward solving new problems as they arise. This concept, though not 100% acceptable to all employers, has enabled us to work for more than 20 years without a strike in the construction industry and with a minimum of stoppages in the myriad other fields our Union works in.

Today, Alaskan Labor and management work together against prohibitve legislation such as H.R. 39, the Udall bill to create a blockade against all development; work together for an Economic Development Council; work together for the training of the Labor force as needed; and work together ad hoc toward the solution of day to day problems as they arise. We have even worked together in a joint effort to offset the damage from the inflationary spiral.

Teamsters Local 959 looks forward to that day when it can lend its aid toward solving the new problems brought by those who would join in the development of our State's vast resources. We urge those of you interested in that development to begin your planning now. Alaskan development carries a built-in time frame of some ten years from the day the decision is made to start. In view of that time frame, we urge you to check out the worth and value of Alaska's resources as part of your 20-year projection.

"HOLOCAUST"—A CALL TO ACTION

Mr. PROXMIRE. Mr. President, it has been only 9 days since NBC began its television drama, "Holocaust." Many of the scenes from this presentation are still vivid in my mind, and in the minds of the 120 million Americans who are estimated to have seen "Holocaust," about half the population, who had seen at least one episode. And the horrible revulsion caused by the brutality of these scenes simply will not go away.

One of the most impressionable scenes from the presentation was the episode in which Erik Dorf participated in his first killing. In one respect, the scene was not unusual—it was as brutal as any of the other Nazi atrocities. But this scene was crucial for it revealed how mass murders were tolerated by those who carried them out.

Dorf's participation in the shooting made him sick to his stomach. He realized that these acts were intolerable to human sensibility. Face to face with the annihilation of human beings, Dorf is inevitably repelled, as anyone would be. This is something we all realize.

What is more difficult to comprehend is how quickly Dorf adapted and rationalized his actions. For this, I urge a careful reading of the book, "Holocaust," written by Gerald Green, on which this series is based. In particular, I urge a reading of the chapter describing this shooting. Through distorted logic, Dorf's mind reasoned that there must be some reason for such unusually cruel acts. And he proceeded to invent a purpose, based on the German defamation of Jews. In Dorf's words—

And I am now a convinced believer in the correctness of it. The Jews have no other purpose than to die.

This mental delusion is more frightening than any other aspect of "Holocaust." For it indicated that genocide is not simply committed by deranged, insensitive individuals. It can also be committed by those who sense the tragedy of their actions on an emotional level, but overcome their revulsion through rationalizations.

This is why "Holocaust" is not merely an historical novel. The threat of genocide still exists as long as individuals are capable of thinking and acting as Eric Dorf did. Thus, "Holocaust" is also a compelling call to vigilance, a reminder that human emotions and moral justice can easily be twisted.

I strongly believe we should answer this call. Here in the Senate, we can do so in a substantial way. Thirty years ago, the Genocide Treaty was drafted. Members of the treaty resolve to condemn and punish acts of genocide. I urge that we heed the message of "Holocaust" and ratify this treaty. Let us make the Nazi actions of World War II the last "Holocaust" we have to watch.

But let us recognize that right now, today, at this moment, when there is a genocide going on in Cambodia, in Uganda, and this is something that continues and something that we have a responsibility if we really believe in human rights, to act on.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to cal the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

A SENATOR'S WIFE AS AN ARCHEOLOGIST

Mr. ROBERT C. BYRD. Mr. President, the Members of the Senate have enjoyed the presence and admired the abilities of our distinguished colleague from New York, Senator DANIEL PATRICK MOYNIHAN, for the past year and a half. Before his election to this body, Senator MOYNIHAN had already served this country with distinction in many other roles, including his ambassadorships in India and at the United Nations. He has established a reputation for brilliance, eloquence, and originality.

It is not surprising, therefore, to discover that Senator MOYNIHAN's wife is a person of unique accomplishments, as well. The distaff members of many senatorial families have won recognition for themselves in a number of ways. But in the entire history of the Senate, I do not

recall another instance in which a Senator's wife has been acclaimed internationally as an archeologist, as has Elizabeth Moynihan.

According to an article in the May 1 issue of People magazine, Mrs. Moynihan is responsible for the discovery of a long-lost and legendary garden of vast proportions, built by the first Mogul emperor of India, Zahir ud-din Muhammad Babur, in the early 16th century. Through patience and scholarly research, Mrs. Moynihan has helped to reveal again to the world one of India's genuinely important archeological sites.

Mr. President, I congratulate Mrs. Moynihan on her success, and I ask unanimous consent that the article from People magazine be printed in the RECORD.

There being no objection, the article was ordered printed in the RECORD, as follows:

NO WIFE TO BENIGNLY NEGLECT, SENATOR PAT MOYNIHAN'S LIZ MAKES ARCHEOLOGICAL HISTORY

Never the faceless helpmeet type, Elizabeth Moynihan packed for India five years ago determined not to let husband Pat's new ambassadorship set back her own fulfillment. "I don't believe in the State Department's getting two for the price of one" was her motto, and for the two years they lived there, her personal challenge was the study of the architecture of the Mogul dynasty, in which she became an acknowledged expert. That in itself would have been extraordinary, but last month, in the course of research for her forthcoming book on Persian and Mogul gardens, Liz made a discovery that promises her a permanent place in the annals of archeology: the long-lost pleasure garden of Emperor Zahir-ud-din Muhammad Babur (1483–1530), India's first Mogul emperor. The Indian government has already moved to protect the site, which may run to 30 acres of arbors, mosques and fountains carved out of stone, and Mrs. Moynihan is justifiably exultant: "It's as if England found a new castle built by William the Conqueror."

Babur had stirred her imagination during the years in India. "He is a very real person to me," she says. "He was not a run-of-the-mill Oriental despot. He was a just ruler. He didn't come from Central Asia only to pillage and destroy India. He stayed and built gardens and wrote poetry. Besides, Babur was a key link for me because he was the person who brought the tradition of Persian gardens to India." Yet, except for a vivid description of an Eden-like dark-red sandstone Lotus Garden in his autobiographical *Babur Nama*, evidence of it had vanished. "I thought something of that 1528 garden must have survived," she says now. "It was cut out of living rock, and things in stone don't disappear that much. It was a hunch worth following." Even after husband Pat had been repatriated and became the junior Senator from New York, she returned to retrack the route Babur and his armies took from Kabul to India. Guided by clues in the *Babur Nama*, she ended her journey near the northern Indian town of Dholpur.

She and her photographer had vainly sought signs of Babur's Lotus Garden there for two days when she thought to consult Dholpur's version of a *griot*—"the old man with the collective memory of the area." When they arrived next morning at the home of 80-year-old Hari Singh Rajoria, Liz was struck that "no one had told him we were coming, but he acted as if he was expecting us. He looked at my sketches, and I read from the *Babur Nama*. Then for 10 minutes he just looked straight ahead, saying nothing. Finally he said, "There is one very strange thing—a square well.' " That was a feature of the garden mentioned in the autobiography.

"His son took us two miles west of Dholpur," she remembers, "and there was the well, and a rise, and then—my God!—the central octagonal pool. I was jumping out of my skin." Two days of work at the site with a borrowed shovel unearthed sufficient features to confirm the find. It seems so simple, but as her proud ex-Harvard professor husband puts it, "It's always simple once you describe how you did it. Very few people actually add to knowledge. It's a very rare event, and it's happened to her."

As a political wife and mother of three, Elizabeth had won notoriety before—once, for example, responding to a State Department request for a little more decorum in the U.N. ambassador's residence by whimsically installing a life-size papier-mâché butler at the front door. Yet she has rendered heroic service to a husband whose career has taken the family to 18 residences so far. But only now, at 47, has Elizabeth Moynihan, a one-time Boston U. student (she didn't graduate), come completely into her own. This week, following in her husband's footsteps, she will give a Harvard lecture—on the Lotus Garden. And at the family's base camp, a 300-acre farm in upstate Pindars Corners, N.Y., the senator is upstaged in his fixation with 1983. Sure, it's the start of a second term if he's reelected, but that seems trivial to Elizabeth, compared to the 500th anniversary of Babur's birth.—JUDITH WEINRAUB.

PROGRAM

Mr. ROBERT C. BYRD. Mr. President, the Senate will convene tomorrow at 9 o'clock a.m.

After the prayer, the distinguished Senator from North Carolina (Mr. MORGAN) will be recognized for not to exceed 15 minutes, to be followed by the distinguished Senator from New Mexico (Mr. SCHMITT) for not to exceed 15 minutes, after which the Senate will resume consideration of the congressional budget resolution, at which time Mr. DOMENICI's amendment will become the pending business.

An agreement has been entered into whereby the vote on Mr. DOMENICI's amendment will occur at 12:30 p.m. tomorrow, but after the debate on the amendment has been completed, that amendment will be set aside temporarily for the convenience of other Senators who may wish to call up amendments in the meantime, and votes ordered on such amendments will be stacked up behind the rollcall vote in connection with the Domenici amendment, which is to occur, as I say, at 12:30 p.m. tomorrow.

So there will be rollcall votes throughout the afternoon tomorrow in connection with the budget resolution; and I would think the prospects for the completion of our work on this resolution tomorrow are good.

RECESS UNTIL 9 A.M. TOMORROW

Mr. ROBERT C. BYRD. Mr. President, if there be no further business to come before the Senate, I move, in accordance with the order previously entered, that the Senate stand in recess until tomorrow at the hour of 9 a.m.

The motion was agreed to; and at 7:24 p.m., the Senate recessed until tomorrow, Wednesday, April 26, 1978, at 9 a.m.

NOMINATIONS

Executive nominations received by the Senate April 2, 1978:

IN THE ARMY

The following-named officers for temporary appointment in the Army of the United States to the grade indicated, under the provisions of title 10, United States Code, sections 3442 and 3447:

To be brigadier general

Col. Kermit Douglas Johnson, [redacted], U.S. Army.

IN THE NAVY

The following-named officer having been designated for commands and other duties of great importance and responsibility in the grade of vice admiral within the contemplation of title 10, United States Code, section 5231, for appointment while so serving as follows:

To be vice admiral

Rear Adm. Sylvester R. Foley, Jr., U.S. Navy.

IN THE MARINE CORPS

The following-named officer under the provisions of title 10, United States Code, section 5232, to be assigned to a position of importance and responsibility designated by the President, in grade as follows:

To be lieutenant general

Maj. Gen. Edward J. Miller, [redacted], U.S. Marine Corps.

CONFIRMATIONS

Executive nominations confirmed by the Senate April 25, 1978:

SECURITIES INVESTOR PROTECTION CORPORATION

Hugh F. Owens, of the District of Columbia, to be a Director of the Securities Investor Protection Corporation for a term expiring December 31, 1979.

The following-named persons to be Directors of the Securities Investor Protection Corporation for the terms indicated:

Ralph D. DeNunzio, of Connecticut, for a term expiring December 31, 1979.

Brenton H. Rupple, of Wisconsin, for a term expiring December 31, 1978.

Michael A. Taylor, of New York, for a term expiring December 31, 1980.

DEPARTMENT OF THE TREASURY

Saul Silverman, of Pennsylvania, to be Assayer of the U.S. Assay Office at New York, N.Y.

IN THE COAST GUARD

Rear Adm. John B. Hayes, U.S. Coast Guard, to be the Commandant of the U.S. Coast Guard for a term of 4 years with the grade of admiral while so serving, and

Rear Adm. Robert H. Scarborough, Jr., U.S. Coast Guard, to be the Vice Commandant of the U.S. Coast Guard with the grade of vice admiral while so serving.

Rear Adm. Robert I. Price, U.S. Coast Guard, to be the Commander, U.S. Coast Guard Atlantic Area with the grade of vice admiral while so serving, and

Rear Adm. James S. Gracey, U.S. Coast Guard, to be the Commander, U.S. Coast Guard Pacific Area with the grade of vice admiral while so serving.

FEDERAL HOME LOAN BANK BOARD

Anita Miller, of New Jersey, to be a member of the Federal Home Loan Bank Board for

the remainder of the term expiring June 30, 1978.

Anita Miller, of New Jersey, to be a member of the Federal Home Loan Bank Board for the term of 4 years expiring June 30, 1982.

The above nominations were approved subject to the nominees' commitments to respond to requests to appear and testify before any duly constituted committee of the Senate.

THE JUDICIARY

Robert W. Sweet, of New York, to be U.S. district judge for the southern district of New York.

IN THE COAST GUARD

Coast Guard nominations beginning Robert, L. DeMichiell, to be captain, and ending Robert N. Ross, Jr., to be commander, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD on April 6, 1978.

WITHDRAWAL

Executive nomination withdrawn from the Senate April 25, 1978;

IN THE ARMY

Col. Junior Henry Burkhead, [redacted], for appointment as brigadier general in the Adjutant General's Corps. Army National Guard of the United States, under the provisions of title 10, United States, Code, sections 593(a) and 3392, which was sent to the Senate on April 6, 1978.

EXTENSIONS OF REMARKS

MEOW

HON. CLARENCE J. BROWN

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 25, 1978

● Mr. BROWN of Ohio. Mr. Speaker, it has now been over 1 year since the President sent Congress his energy message. Although much of the program remains bogged down in conference, it is noteworthy that substantial progress has been made in reducing our oil imports without having Government-forced conservation or energy price controls.

Once again, as the following Wall Street Journal indicates, the Federal Government is "a day late and a dollar short" in its energy policies:

MEOW

Today we celebrate the first anniversary of President Carter's famous MEOW, the moral equivalent of war. His energy proposals remain bogged down in Congress, but even without the benefit of his program a lot has happened.

During the year we now celebrate, the only detectable energy shortage occurred in those sections of the nation overly dependent on American-produced coal. In California, crude oil is a drug on the market. World-wide, the International Energy Agency sees a "temporary" surplus of oil lasting into the 1980s. U.S. oil imports are no longer growing; indeed the American Petroleum Institute reported yesterday that they fell 14% during the first three months of the year.

Over the year, the price of oil has been steady, meaning that it fell after inflation adjustment. The administration felt free to kill a deal to import huge quantities of natural gas from Mexico because it doesn't like the price U.S. companies have agreed to pay. But the President, Czar Schlesinger and the like continue to assure us that the energy crisis is just around the corner.

Actually, the crisis has more-or-less officially been postponed until 1985 at the earliest. If you want to conjure up a big crisis then, you assume: first, that the Soviet Union will swing from an oil exporter to a big importer somehow finding the foreign exchange to foot this bill; and, second, that Saudi Arabia will cap its production because it likes the old values better than the new money. Because the CIA finds this scenario likely, we're told, we need a big new tax on the production of oil in the United States.

What we have been witnessing in the past year is the huge adjustive power of the price mechanism, even when politicians do all they can to hamper it. Stanford's Henry S. Rowen observes that since 1973, real gross national product has increased by about 11% while energy consumption has increased by only about 3%. This means that even without legislation, a great deal of conservation is going on as a response to the price increases. Prof. Rowen calculates that, holding production constant, consumers are reducing their energy consumption by about 2% yearly.

Higher prices are not only reducing demand but calling forth greater supply. With environmental and legal roadblocks finally overcome, oil is flowing from Alaska and exploration has started off the Atlantic coast. With somewhat higher gas prices and higher prices for "new" oil, drilling and discoveries in the U.S. have both increased, though not yet fast enough to keep up with consumption. But supply incentives are still uncertain, given the government's record of expropriating the returns from new oil with successive tiers of price controls and state or federal taxes.

It is this supply-demand balance called forth by the price mechanism, and not the beneficence of Saudi Arabia, that has kept OPEC from increasing its prices during the past year. Even a cartel is not immune to the laws of supply and demand; at some point higher prices mean lower sales and lower net income.

The improvement in the energy outlook in the past year has come despite government policy, not because of it. Indeed, the U.S. government has been OPEC's biggest economic ally. American oil imports are high because of the government's entitlements program, which in effect taxes the production of domestic oil and uses the proceeds to subsidize imports. Mr. Carter proposes to "cure" this by taxing domestic oil and using the proceeds to subsidize the consumption of home heating oil.

The way to reduce imports would be to end all entitlements and price controls, paying Americans as much for oil as you pay foreigners. This step would increase the price of gasoline by a maximum of seven cents a gallon; some argue that in fact the price would fall because of greater efficiency. Yet the government sees this simple step as an anathema.

The government's record during 1977 scarcely gives reason for confidence in its prescience about 1985. Over the years there has always been a finite supply of energy visible at any one time; the reason is that it is not economic to develop resources too far in advance. Above all, it is risky to invest too much capital in a single source or single technology. You may guess wrong. Huge sums invested in coal will be wasted if there is a breakthrough in producing geopressurized methane.

We do not know where future energy will come from, but we do know that there is a nearly endless list of possibilities, from coal to methane to nuclear to solar. Over the years, market price mechanisms have proven their ability to make such choices and such transitions smoothly. There will be no crisis if we let them do their work. The only way there will be an energy crisis in 1985 is if the government causes one. While the administration still has not grasped this, the biggest change since MEOW was declared a year ago is that more of the public and more of Congress now understand.●

POLISH CLUB CELEBRATES 75TH ANNIVERSARY

HON. FREDERICK W. RICHMOND

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 25, 1978

● Mr. RICHMOND. Mr. Speaker, for 75 years, Brooklyn's St. Aloysius Young Men's Catholic Club in Greenpoint, N.Y., has unselfishly served the cultural and spiritual needs of the Polish-American community while actively participating in national events.

The club will celebrate its 75th anniversary during a banquet on April 29. I commend to my colleagues the following brief history and description of St. Al's and ask my colleagues to join me in wishing this truly remarkable group continued success in the years ahead.

The article follows:

ST. AL'S 75TH YEAR

On February 3, 1903, the St. Aloysius Young Men's Catholic Club (St. Stanislaus Kostka Parish), Greenpoint, Brooklyn, New York, was organized. St. Al's, as it is commonly known today, was founded on three basic principles.

First, the organization of Polish-American youth to aid them in the fulfillment of their religious and moral obligations.

Second, to maintain a characteristic of brotherly love.

And third, to keep alive the Polish language, customs and traditions, while maintaining a continued interest in the affairs of the nation, community and parish.

Needless to say, through the many years that have followed, numerous changes have taken place; however, these three basic principles have remained and have been adhered to by the membership.

On February 5, 1978, the membership, family and friends participated in the celebration of a diamond jubilee Mass in the Parish church, and afterward, all joined together at a collation in the clubrooms.

On April 29, 1978, a 75th anniversary banquet will be held at Rovnak's Princess Manor, also in the Greenpoint section of Brooklyn.●

CAMP SAFETY

HON. JOHN B. ANDERSON

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 25, 1978

● Mr. ANDERSON of Illinois. Mr. Speaker, I want to commend the administration on rejecting mandatory Federal youth camp safety standards and enforcement, as recommended by the House Education and Labor Committee in its Youth Camp Safety Act, H.R. 6761, and instead embracing a voluntary State approach as provided in my own Camp Safety Incentive Act, H.R. 5167.

On April 3, 1978, HEW Secretary Joseph A. Califano, Jr., transmitted a letter and bill to the Speaker setting forth the administration's Youth Camp Safety and Health Act of 1978. Like my own bill, the administration's bill calls for the Federal Government to develop model camp safety standards. Some grant assistance is made available to the States to develop their own camp safety programs. Specifically, the bill authorizes $2 million a year over a 6-year period, on a 50-percent matching basis. States wishing to enable camps within their boundaries to advertise compliance with the model Federal standards would have to have federally approved plans which include supervised inspections.

Mr. Speaker I think the approach decided upon by the administration after a year of deliberation is the proper course. While we are all concerned with the health and safety of our Nation's children, especially when they go away to camp, I do not think the problem was so severe as to warrant massive Federal intrusion into this area which has traditionally been considered one of the police powers of the State.

At this point in the RECORD I include Secretary Califano's letter and the text of the administration's bill:

APRIL 3, 1978.

Hon. THOMAS P. O'NEILL,
Speaker of the House of Representatives, Washington, D.C.

DEAR MR. SPEAKER: Enclosed for the consideration of the Congress is a draft bill "To provide for the development and implementation of State programs for youth camp safety and health". The draft bill is intended to assure that Federal leadership will be provided to the States through the development of safety and health standards and the provision of grants and technical assistance, to assist them in developing programs which can provide assurance that youth camps meet minimum safety and health standards. The States, however, are to retain full responsibility for the implementation and enforcement of effective safety and health regulations.

The draft bill charges the Secretary of Health, Education, and Welfare with responsibility for developing model youth camp safety and health standards. In carrying this out, he must first consult with State officials and representatives of other concerned public and private agencies. Thereafter, but within one year of enactment of the draft bill, he must develop the standards and within the following 30 days, publish them in the Federal Register. These standards are models for the use of the States and have no regulatory effect until their adoption by one or more States.

The Secretary may also make grants and provide technical assistance to States for purposes such as developing new State programs for assuring youth camp safety and health and coordinating existing activities, developing and conducting training programs for State and camp personnel, designing systems for camps to use in reporting accidents or injuries and procedures for the States to follow in keeping records of these reports for later State and Federal use, and for creating or designating a State agency to implement the State's youth camp safety and health programs and, specifically, monitoring the compliance of individual camps with the State's standards. Grants can be made for no more than 50 per cent of the cost of the activity, and are not to replace State money which would otherwise be available for these purposes.

If a State wishes to enable camps within its boundaries to advertise compliance with the model Federal safety and health standards, it must first have an approved State plan. The plan must provide for State supervised inspections of camps and for prohibiting a camp from advertising its compliance with the Federal standards unless it is appropriately certified by the State agency. The plan must also specify sanctions sufficient to deter uncertified camps from advertising that they meet the model Federal standards.

The Secretary is directed to report to the Congress on the administration of the Act after the second and fifth years of the program, and to include a statement of any changes which he is planning to make in the model standards.

The bill would authorize $2 million for carrying out the Act in fiscal year 1979, and a like amount for each of five fiscal years thereafter.

We urge the Congress to favorably consider this draft bill.

We are advised by the Office of Management and Budget that there is no objection to the submission of this legislation from the standpoint of the Administration's program.

Sincerely,

/s/ JOSEPH A. CALIFANO, JR.,
Secretary.

H.R. —

A bill to provide for the development and implementation of State programs for youth camp safety and health

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Youth Camp Safety and Health Act of 1978."

STATEMENT OF PURPOSE

SEC. 2. It is the purpose of this Act to protect and safeguard the health and well-being of young persons in youth camps, by providing for the development of model standards for the safe operation of such camps, and to provide Federal grants, technical assistance, and leadership to the States in developing and implementing safety and health programs for youth camps, thereby providing assurance to parents and interested citizens that youth camps meet minimum safety and health standards. It is the intent of Congress that the States assume responsibility for the implementation and enforcement of effective youth camp safety and health standards and regulations.

DEFINITIONS

SEC. 3. As used in this Act—

(1) "Youth camp" means any day camp, primitive or outpost camp, residential camp, travel camp, trip camp, or short-term group camp whether on public or private land, which is designed to be attended by 10 or more campers at the same time who are under 18 years of age. The terms include any program promoted or advertised as a youth camp and shall also include programs conducted on sites or facilities primarily designed for other purposes such as schools, playgrounds, resorts, wilderness areas, and government lands.

(2) "Day camp" means a camp operated for any part (but less than 24 hours) of the day for at least 5 days during a 2-week period. The term does not include day care centers as defined or licensed by the appropriate State agency.

(3) "Primitive or outpost camp" means a portion of the permanent premises of a camp or other site at which the basic needs of camp operations, such as places of abode, water supply systems, and permanent toilet and cooking facilities, are not usually provided.

(4) "Residential camp" means a camp operating on a permanent site at which the same campers remain for a period of at least 96 consecutive hours.

(5) "Travel camp" means a camp which provides care for not less than a 48-hour period and which uses motorized transportation to move campers as a group from one site to another.

(6) "Trip camp" means a camp which provides care for not less than a 24-hour period and which supervises campers as they travel, either on foot or by a transportation mode permitting individual guidance of a vehicle or animal from one location to another.

(7) "Short-term group camp" means a camp which provides care for more than a 24-hour period but less than a 96-hour period for troops, clubs, or groups of campers sponsored by an organization or person.

(8) The term "Secretary" means the Secretary of Health, Education, and Welfare.

(9) The term "State" includes each of the several States, the District of Columbia, Puerto Rico, American Samoa, Guam, the Virgin Islands, and the Commonwealth of the Northern Mariana Islands.

YOUTH CAMP SAFETY AND HEALTH STANDARDS

SEC. 4 (a). The Secretary, after consultation with—

(1) appropriate State officials, and

(2) representatives of appropriate public and private organizations,

shall, within one year after the enactment of this Act, develop model standards for youth camps directed toward assuring that such camps are operated in a manner which protects the health and safety of the campers and related to matters such as, qualifications for director and staff; ratio of staff to campers; sanitation and public health; personal health, first aid, and medical services; food handling and group feeding; water supply and waste disposal; water activity safety, including swimming and boating equipment and practices; vehicle condition and operation; building and site design; and condition of equipment facilities and density of their use. In developing such standards, the Secretary shall consider existing Federal guidelines, State and local regulations and standards, and standards developed by private organizations, applicable to youth camp safety and health and shall also consider the experience of State, local, and private agencies and organizations in implementing such regulations and standards, and such other information as may be available.

(b) The Secretary shall, within 30 days after development of the standards referred to in subsection (a), publish these standards in the Federal Register. The published standards may be revised from time to time as determined by the Secretary.

ASSISTANCE TO STATES

SEC. 5. (a) The Secretary may provide grants or technical assistance to any State planning to develop a comprehensive youth camp safety and health program. These grants or technical assistance may be used for the purpose of—

(1) coordinating existing education and enforcement activities relating to youth camp safety and health;

(2) creating or designating an appropriate State agency which will be responsible for administration of a youth camp safety and health program;

(3) developing and implementing safety and health programs directed toward specific camping activities such as, aquatics, water skiing, arts and crafts, archery, horseback riding, mountaineering, white-water canoeing and rafting, caving, and proper use of firearms;

(4) developing and conducting seminars and other short term training courses for State youth camp safety and health personnel and for camp health, safety, and supervisory personnel;

(5) designing and implementing procedures and systems for reporting of illnesses or injuries in youth camps within a State's jurisdiction and the keeping of State records of such reports; and

(6) developing programs to monitor compliance with State standards and regulations applicable to youth camp safety and health.

(b) The amount of any grant provided under this section shall not exceed 50 per centum of the costs incurred by the State to carry out the activities referred to in subsection (a). Federal funds made available under this section for any period will be used so as to supplement the level of State funds that would otherwise be made available for the activities described in this section, and will in no event replace such funds.

YOUTH CAMP SAFETY AND HEALTH PLANS

SEC. 6. (a) Any State desiring to authorize youth camps in that State to advertise compliance with the Federal model youth camp safety and health standards, shall submit to the Secretary a plan which provides—

(1) for the creation or designation of a State agency to be the principal agency in the State responsible for administration of its youth camp safety and health program;

(2) for State-supervised inspections of youth camps and certification of those camps found to be in compliance with the model youth camp safety and health standards developed pursuant to section 4;

(3) that camps certified as being in compliance with those standards will be authorized to advertise that fact through the use of the statement "This camp has been certified by (the appropriate State agency) as meeting the model Federal Youth Camp Safety and Health Standards.";

(4) that any camp not so certified will be prohibited, with penalties sufficient to assure compliance, from advertising or otherwise implying that it meets such standards; and

(5) that the State agency will make such reports and provide such information to the Secretary as he determines to be necessary to carry out his duties under this Act.

(b) The Secretary shall approve a plan submitted by a State if he finds that it meets the requirements set forth in subsection (a).

FAILURE TO COMPLY WITH STATE PLAN

SEC. 7. In the case of any State plan approved under section 6, if the Secretary, after reasonable notice and opportunity for a hearing to the State agency responsible for administering such plan, finds that the plan has been changed so as not to be in compliance with the provisions set forth in section 6(a) or that in the administration of the plan there has been a failure to comply substantially with any provision required by section 6(a) to be included in such plan, the Secretary shall suspend approval of the plan until he is satisfied there is no longer any such failure to comply, and shall so notify the State agency.

PENALTIES

SEC. 8. Whoever, being an officer, director, agent, or employee of a youth camp located in a State which does not have a plan approved pursuant to section 6 and who uses or causes to be used any advertisement or statement which indicates that such camp is in compliance with the model Federal youth camp safety and health standards is guilty of a misdemeanor, and upon conviction thereof, shall be fined not more than $1,000.

ADMINISTRATION

SEC. 9. The Secretary shall prepare and submit to the President for transmittal to the Congress after the close of the second and fifth fiscal years for which this Act is in effect a comprehensive report on the administration of this Act, including any changes which are planned in the model youth camp safety and health standards.

AUTHORIZATION

SEC. 10. There are authorized to be appropriated to carry out the provisions of this Act $2,000,000 for the fiscal year ending September 30, 1979, and $2,000,000 for each of the five succeeding fiscal years.●

A NEW APPROACH AGAINST OVERREGULATION

HON. GLENN M. ANDERSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 25, 1978

● Mr. ANDERSON of California. Mr. Speaker, management and labor are often portrayed as being on opposite sides of most issues, and sometimes they are. There is, however, much room where these two great forces can work cooperatively, to their mutual benefit, and the benefit of the Nation.

I would like to call my colleagues attention to a February 17, 1978, editorial from the Long Beach Independent Press Telegram. It cites a proposal made by the president of Dow Chemical Co., Paul F. Oreffice, that management and labor form a coalition to fight Government overregulation.

[From the Long Beach Independent Press Telegram, Feb. 17, 1978]

TIME FOR JOINT EFFORT

It is so common for business and industry to complain about government overregulation that, although we fully concur, we are afraid a lot of people pay little attention.

Yet it is a problem that affects labor as well as management, and the proposal by Paul F. Oreffice, president of Dow Chemical Co., for a labor-management coalition to fight overregulation is an excellent one.

In a recent talk to the Commonwealth Club of California, Oreffice said it's time for the American people to call a halt on government regulations which drive up consumer costs and eliminate jobs.

Oreffice urged labor to openly support the need for profits as "the only legitimate way to create and maintain jobs," and for management to support labor's "legitimate desires for better working conditions and steady employment."

Labor and management, of course, have conflicting economic interests up to a point—but to both, it is essential that the business or industry concerned is healthy. There must be fair profits for management and fair wages for labor.

In accomplishing these mutual goals, the less government interference, the better.

Obviously, not all government regulations are bad but, as Oreffice said in his talk, regulations must be "logical, workable and economically feasible."

"If labor and management together can't reverse the present trend of excessive federal government intervention," he warned, "American industry will be stifled and American jobs will continue to be lost by the thousands."

It isn't going to be enough just to complain about excessive regulation. Oreffice proposed that the labor-management coalition work to elect legislators "who know what it's like to work in a competitive society . . . what it's like to have to meet a payroll."

Labor and management have more in common than many of their members realize. Overregulation costs both of them money—and could cost them their livelihood.●

IS WASHINGTON AFFECTING SOMOZA'S DOMESTIC POLICY?

HON. HAMILTON FISH, JR.

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 25, 1978

● Mr. FISH. Mr. Speaker, is Alan Riding, New York Times columnist, who is not known as a friend of Nicaragua's Somoza, giving this administration a message about the effects of some of President Carter's policies?

I submit the following New York Times article for my colleagues' information:

SOMOZA APPEARS POLITICALLY ISOLATED AS UNREST SPREADS IN NICARAGUA

(By Alan Riding)

MANAGUA, NICARAGUA, April 24—Three months after the assassination of a leading opposition figure, Nicaragua remains in a state of unrest, with the campaign to oust President Anastasio Somoza Debayle becoming steadily more violent and radicalized.

Although General Somoza seems in no immediate danger of being overthrown, his Government has been unable to restore order in the country since the slaying January 10 of Pedro Joaquin Chamorro, a newspaper editor who was an outspoken foe of the 45-year rule of the Somoza family.

Today General Somoza appears to be politically isolated, sustained only by the 7,500-man National Guard. "Opposition has spread like a brush fire, consuming one sector after another," a foreign diplomat said. "It's like watching a slow-motion revolution."

In an interview with local reporters last week, General Somoza warned that "I believe that while education in word, speech and action does not stop, we can expect a period of greater violence in Nicaragua."

STUDENTS OCCUPY SCHOOLS

The immediate crisis for General Somoza involves the occupation of dozens of high schools and churches by militant teen-age students, but he is also under mounting political pressure because of a three-week-old hunger strike by over 100 opponents of the Government.

In addition, clashes between demonstrators and National Guardsmen take place almost daily in cities throughout the country. So far this month, at least five protesters, and, according to well-placed opposition sources, more than a dozen National Guardsmen have been killed.

The latest offensive against the Somoza regime began last October with a series of attacks on National Guard barracks by leftist guerrillas. But it was only after Mr. Chamorro's still-unsolved killing that opposition groups as diverse as conservative businessmen and Marxist students joined forces to work for General Somoza's overthrow.

Late in January, the country's main business organizations called a two-week work

stoppage to demand the President's resignation. Coinciding with the strike, which was supported by labor leaders, moderate and leftist political groups promoted a series of demonstrations and the guerrilla movement, known as the Sandinist National Liberation Front, carried out new attacks on National Guard barracks.

Since then, however, even opposition leaders seemed to have lost control of the anti-Government offensive as it has spread rapidly and chaotically to the country's urban poor.

INDIAN DISTRICT REBELS

"The country is in an insurrectional mood," a moderate opposition leader said. "I would never have believed that the masses could become so politicized so quickly. The masses are now without either democratic or revolutionary leadership. The situation is rapidly becoming anarchic."

For the last two months, the focal point of the simmering rebellion has been the city of Masaya, 20 miles south of Managua, and its Indian district of Monimbo. The National Guard put down a week-long uprising in Monimbo on Feb. 26, killing at least 40 people and losing as many soldiers, but the Indians there have continued arming themselves and last week they resumed their insurgency.

According to well-placed sources, the rebel Indians, who are actively supported by the guerrillas, have developed a powerful homemade bomb and are well armed, in some cases with submachine guns taken from National Guardsmen whom they have killed. "Monimbo is one big bomb factory," one source said, adding that the Government was expected to launch a new counteroffensive soon.

The campaign by high school students also began in Masaya late in March. Although National Guardsmen using tear gas and automatic rifles last week cleared the city's National Institute of students who had seized it, dozens of other high schools throughout Nicaragua are still being held by military youths.

At the Ramirez Goyena Institute in Managua, teen-age students explained that they were striking in sympathy with the 26-day-old hunger strike of Mrs. Albertina Serrano de Jaen, whose 21-year-old son, Marcio, is serving a five-year prison term for guerrilla activities. Mrs. Jaen and more than 100 others who joined the hunger strike are demanding better prison conditions for Marcio Jaen and another guerrilla leader, Tomas Borge, who have been held in solitary confinement for the last 20 months.

But while most protesters make specific demands of the Government, political analysts believe that the campaigns are all essentially aimed at undermining the regime. "If the Government accepted their demands," a foreign diplomat said, "then they would make new demands. Somoza fears this is the case so he feels justified in turning down most of the demands."

In response to political pressure, General Somoza in fact announced two months ago that opposition parties would be allowed to participate in the next presidential elections in 1980 and that the Inter-American Human Rights Commission and the International Red Cross could send inspection teams to Nicaragua.

But these concessions have failed to defuse the opposition and nonviolent groups have stepped up their efforts to form a broad front against the regime.

Eager to avoid a crisis in his relations with Washington, General Somoza has tolerated press freedom and over the last seven months has arrested only opponents involved in the guerrilla movement. "I have to admit that Somoza has been fighting us with one arm tied behind his back," an opposition leader said. "But if he fights us with two hands, he may also have to take on the United States."●

MEMORIES OF LINCOLN

HON. MICHAEL HARRINGTON

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 25, 1978

● Mr. HARRINGTON. Mr. Speaker, a constituent of mine, Theodore Safine of Peabody, Mass., has recently sent me a poem written in memory and honor of President Abraham Lincoln.

As Mr. Safine requested, I would like to insert his poem in the CONGRESSIONAL RECORD at this time, during April, the month of President Lincoln's death:

MEMORIES OF LINCOLN

(By Theodore Safine)

To greater heights where joys await,
Beyond what here he could attain,
He traveled forth to reach the light
That led him to a higher plane.

(A lanky lad by the failing light
Of well banked fires through the quiet night
In Kentucky hills so long ago,
Eager to read, to learn, to know.)

Here is a picture, sad but true,
Of one whose deeds are known to you
Who in the world of greats has won
So much of honor and of fame—
Abraham Lincoln was his name.

(Young Abe Lincoln, a splitter of rails,
Reader, writer and teller of tales,
Wrestler, runner and fisherman, too,
Whatever boys did, young Abe could do.)

Now that his work on earth is done,
His body rests beneath the sod
His soul in peace at home with God.
Where Heaven's joys his sorrows drown.
There his soul has long since fled
And all the tears that he has shed
Have turned to pearls for his crown.

(Captain, postmaster, riverboat hand,
Lincoln the merchant in prairie land,
Love in New Salem, Lincoln and Ann
All were a part of Lincoln the man.)

Pearls for a crown in Heaven he wins,
Absolved from earthly errors and sins,
Gems of gratitude, ample measure,
Grateful prayers that his heart would
treasure,
Tears turned to pearls day by day—
Far too many to make a crown,
Let the others come drifting down,
And we will cherish them alway.

(Pardon he had for the soldier boy
Who slept at his post one lonely night,
Asleep while the silent hours passed by.
When the dawn crept over the eastern sky,
He was sentenced to die in the morning.)

In our remembrance ever near
Lincoln remains, we hold him dear,
Though far from earthly smile or frown,
His labor has not been for naught
For all the deeds on earth he wrought
Have turned to stars to make a crown.
Stars! A multitude they measure,
For his crown a priceless treasure!
His deeds of mercy, day by day,
Are bright beside the Milky Way,
A great memorial display—
We'll gaze and cherish them alway.

This man of wisdom, kind but keen,
This man of sorrows, gaunt and lean,
Trusting in God's almighty hand,
Planned for the nation, every state,
And though opposed by doubt and hate
Emerged victorious as he planned.

(Emancipating a bondaged race,
Giving to all an equal place.
On him a nation's fate depended,
His hands its unity defended.)

He had the prayers of many nations,
Of every creed and every race,
Enduring with unending patience
Though lines of sorrow marked his face.

He is remembered in his greatness,
His loyalty and glorious past,
He sacrificed his life for freedom,
Well earned fame, may it always last.
The hidden wounds grew daily greater
'Till his stout heart would almost fail,
But he proved himself a giant,
A heart of gold in body frail.
A stalwart heart, a master mind,
Abe Lincoln led a nation brave,
A leader merciful and kind,
He'll be remembered in his grave.

(Lincoln the planner left behind
Standards compassionate and kind,
Plans that held through the troubled ways
As peace emerged from war's dark days.)

In April of eighteen sixty-five
From a madman's bullet Lincoln died
Leaving behind a mourning nation—
In every state the people cried.
Though hushed the voice and gone the face
(He'd gone to his eternal rest)
His spirit lingers ever near,
From north to south and east to west.

President Lincoln gave of his best
To our land from his White House seat,
And when he died on that tragic day
A loving people knelt at his feet.
Men whom he most had come to dread
Bowed in sorrow beside his bed.

God took him from us, it was His will
But in our hearts we love him still.
His memory is as dear today
As at the hour he passed away.
Millions of hearts were crushed and sore
When Lincoln died and could lead no more.●

SOLAR ENERGY CONVERSION SYSTEMS

HON. CARL D. PURSELL

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 25, 1978

● Mr. PURSELL. Mr. Speaker, today I would like to continue my presentation of testimony which was presented by three University of Michigan professors on April 12 before the Public Works Appropriations Subcommittee.

Dr. John Clark, a professor of mechanical engineering and president of the Central Solar Energy Research Corp., spoke to the subcommittee regarding solar energy conversion systems. Following is his testimony:

TESTIMONY BY DR. JOHN CLARK

My name is John A. Clark. I am a Professor of Mechanical Engineering at the University of Michigan, Ann Arbor, and a former Chairman of that Department. I also serve as President of the Central Solar Energy Research Corporation (CSERC) located in Detroit. For the past five years I have been devoting all of my professional efforts in the field of solar energy both as a private consultant to several solar energy manufacturing firms and user groups, in research at the University of Michigan and teaching solar energy courses at that institution.

I appreciate the opportunity to appear before this Committee and to provide this testimony which I hope will be useful to

your purposes. The focus of my presentation today will be on solar energy conversion systems in general and solar heating and cooling applications in particular.

The resolution of the problem of energy for the United States certainly ranks among its most important current problems. Although this situation is often described as the "energy crisis" it is my judgment that the problem far transcends a situation that can be termed a "crisis". The word crisis implies a temporary situation, the effects of which in the near term will pass. The problems of energy for this nation are so fundamental and deep that it seems probable that our energy problems will persist for the next fifty to perhaps one hundred years. As things now stand, we are importing approximately half of the liquid petroleum consumed in this nation. Because of the clear threat to our social and economic well-being by this condition, it is urgent that all sectors of American society take immediate steps to the development of every possible alternate energy form that appears to have both immediate and long-term chances of being applied.

The first and obvious form of alternate energy sources is, of course, solar energy, the energy from the sun that falls continuously on this country in abundant quantities. Solar energy is at once clean, silent, abundant, widely available, dependable, and essentially inexhaustible. It is sometimes said to be "free". This however, is a fallacy since as any other resource the practical utilization of solar energy requires the investment of considerable capital. Accordingly, solar energy is probably the most expensive form of energy that we have today. It is to this point that I shall direct my principal comments in this testimony.

Although one can identify many barriers to the utilization of solar energy such as social, legal, legislative, political, financial, etc., the principal technological barriers today are those associated with efforts to produce reductions in the cost of solar energy conversion systems of all kinds. The solar energy demonstration programs in the field of solar heating and cooling, while valuable in the sense of bringing to the attention of the general public the possibilities of solar energy, has the undesired effect of freezing the technology, thus not contributing in a meaningful way to the necessary cost reductions in these systems through the development of new technology that is really essential to their widespread and rapid commercialization and application. It is my first recommendation to this Committee that you give serious consideration and every possible encouragement within the Department of Energy and elsewhere to the development of innovative design methods, innovative manufacturing techniques, innovative installation procedures and maintenance methods to all forms of solar energy conversion systems, in particular the solar collection, distribution and control systems for the heating of domestic and service hot water and the heating and cooling of space. These are the systems which will be installed first.

At the present time, there is considerable research being done into the physical behavior of these kinds of systems and components which result in feasibility-type studies. I believe these are important in developing an improved understanding of the technical and economic characteristics that may be expected from these systems. However, usually these studies do not direct their attention at the specific problems of design, manufacture, maintenance and installation, and accordingly are not of much value to the private sector that must manufacture, distribute, maintain and install these systems.

It is my view that, as a round number, the total installed costs of solar energy conversion systems for water and space heating have to be reduced by approximately a factor of two or three in order that these systems become competitive with those using conventional fuels. Because the basic cost of materials used to assemble these systems has probably reached values as low as they will ever become, it is necessary to look to other aspects of the problem for significant cost reduction. Accordingly, it is the areas of design, manufacture and installation that appear to provide the single greatest hope for significant cost reductions through innovation in design, and innovation in manufacturing methods thus obtaining as much high volume production and simplicity in installation as possible. Our nation is well known for cost reduction through mass production derived from new technology and I am confident that with the right mix of professional efforts such cost reduction can be achieved in the solar energy industries as it has in the automobile industry, the electronics industry and the consumer products industry. The state of Michigan, furthermore, has been a recognized leader in this field.

At the present time, the Central Solar Energy Research Corporation has submitted to the Department of Energy a proposal for a Solar Technology Institute to be located in Michigan, the goal of which is precisely that I have outlined above, namely, cost reduction through innovative design and innovative mass manufacturing. An important part of the STI proposal is the creation of a government-industry partnership through the establishment of an industrial consortium which will assure relevance to the STI program. This proposal was written as part of the planning for the Northcentral regional solar energy activities of the Department of Energy. It is my hope that this proposal, which is now undergoing evaluation and review within DOE, will receive an affirmative response from the Department of Energy. When established the Solar Technology Institute will be able to contribute in a significant way to the rapid utilization of solar energy in this country through cost reductions in the production and installation of solar energy conversion systems of all kinds.

Thank you very much for the opportunity to present these views to the Committee.●

IMPORTS KILLING OFF OUR LARGEST INDUSTRY

HON. JOSEPH P. ADDABBO

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 25, 1978

● Mr. ADDABBO. Mr. Speaker, the New York Post on April 18 took a sharp look at why a major manufacturing industry has declined so dramatically in New York City. What the article tells us should be of importance to every Member of this House, because what has happened in my hometown can just as easily happen in your's. The article examines how the increase in imported textile products has decimated the textile industry within our own country. This has brought serious problems to what has long been New York City's largest industry. I ask unanimous consent that this article be included in the RECORD and that an accompanying article by Sol C. Chaikin, president of the International Ladies Garment Workers Union be included as well.

FREE TRADE AND THE DEATH OF 600,000 AMERICAN JOBS

(By Michael Sharkey)

The garment and textile industry employs 2.3 million workers in this country.

It is New York City's largest manufacturing employer.

A Burlington Industries study projects that imports will kill 600,000 American jobs between 1978 and 1985.

The impact of this job loss and the associated trade deficit will magnify the total to 1.6-million jobs.

New York City alone has lost 50,000 jobs in this industry since 1970.

Garment and textile imports accounted for one-third of our total trade deficit in 1976.

According to the ILGWU, 80 per cent of their largely minority work-force are women, one third of whom are the sole supporters of their families.

Between 1961 and 1976, imports of some women's garments rose to 125 per cent of American production and men's garments suffered a 30 per cent import infiltration.

During this period, 146,000 potential jobs were not realized in the apparel industry.

The recessionary period between 1972 and 1976 saw imports achieve a 13 per cent growth rate while the domestic garment and textile sector fell 12 per cent and unemployment rode at a steady 8 per cent.

An American garment worker makes as much as $3.76 per hour, gets fringe benefits and is paid time-and-a-half for overtime past 40 hours.

A worker in one of the Far Eastern or Latin American exporting countries gets few or no benefits and may work up to 60 hours a week at straight pay.

A "cloth" industry worker in Hong Kong makes 62 cents per hour, one in Taiwan 34 cents, and in South Korea 27 cents.

The same shirt that an American manufacturer puts on a store shelf at a cost of $7.68 would cost the South Korean exporter $4.50 to deliver, all costs included.

The import flow is regulated through bilateral agreements negotiated separately with each exporting nation.

They were initiated by the Kennedy Administration in 1961 and most of them expired at the end of 1977.

New agreements are currently being negotiated by the office of Special Ambassador for Trade, Robert Strauss.

Critics of the treaties cite several weaknesses:

They allow imports to grow at rates that are sometimes double that of domestic industry.

The import quotas are measured in units rather than total value, encouraging higher grade imports.

The agreements allow import levels to fluctuate from year to year, causing chaos in the American market.

While the government negotiators claim to be sensitive to the needs of the domestic textile and garment industries, they must also contend with foreign policy considerations and the possibility of exporting countries retaliating against what they consider American "protectionism."

The Carter Administration leans toward a "free trade" policy and believes in providing the consumer with some lower priced imports as a hedge against inflation.

Article 807 of the U.S. Tariff Schedules has come under fire for being part of the problem. It allows raw, cut unassembled garments to be shipped overseas, assembled at very low labor cost and sent back into this country at a minimal tariff charge.

In most cases 95 per cent of the work is done on the garment abroad, usually in Latin America.

IMPORTS KILLING OFF OUR LARGEST INDUSTRY

(By Sol C. Chaikin)

A flood of imports is washing away hundreds of thousands of jobs in the American economy, with devastating consequences for the entire nation.

The decline in the number of workers in the manufacture of apparel is not due to any loss of interest on the part of the American woman in being the best dressed in

the world. Apparel purchases in America grow every year.

The workers who have lost their jobs have been displaced by imports. If imports were zero today, there would be another 170,000 people employed in the manufacture of women's garments.

What is happening in the garment industry is happening in the entire textile and apparel trade—the nation's largest factory employer with more than two and a quarter million employes. Were it not for mounting imports, textile and apparel would now be providing jobs to another quarter million workers.

But just as crucial as the number of jobs lost is the kind of people who have lost jobs. They are those who could least afford it. They are the marginal populations who are heavily employed in light manufacture. The displaced persons are disproportionately black Hispanic, low-income whites. For millions of them, light manufacture has been the first rung on the economic ladder. When that rung goes, all hope goes with it.

For a city like New York that has traditionally depended on light manufacture as a prime base of its economy, the flood of imports has been catastrophic. Between 1969 and 1976, the total employment in manufacturing in New York has fallen from 825,836 to 522,878.

We are losing our market to imports not because of any deficiencies in our know-how. But our superiority is of little use because American manufacturers put our technology and skills to work in other lands where they make products for export to the U.S.

Not untypically, a shop in Bangkok will be making blouses exclusively for one American manufacturer who has supplied the style, some initial capital, the sizing and access to the American market. In this distant sweat shop, reminiscent of the garment industry before the turn of the century in the U.S., the young girls who work for a pittance (sometimes just a few bowls of rice a day) stitch the brand names of American outlets into their product. Sometimes, the label is that of an American manufacturer; sometimes it is that of an American chain store. In any case, it is an American company that employs incredibly exploited labor overseas to manufacture products for sale in the U.S.

As if such cheap labor were not sufficient incentive to export jobs to other lands, the U.S. Tariff Code has a special proviso (Item 807) that further encourages American manufacturers to get their work done elsewhere. Under this law, U.S. companies that have American component parts assembled in other lands may import the finished product with the tariff limited to the value added, which in the case of low-wage countries, is very low. Hence, American apparel firms send their work to other lands to be stitched at 30 and 40 cents an hour, and then bring back the end product for sale in this country. So lucrative is this shuttle trade for American producers that Item 807 imports of garments have grown from $1,730,377 in 1965 to $292,475,804 in 1976.

Although the labor that goes into imports is very cheap, the American consumer rarely gets a bargain.

Several months ago, I submitted dramatic visible proof that savings in wage costs for products made overseas were not passed on to the consumer. I showed four identical blouses to a Senate Committee—blouses that we had bought in the same store—each carrying the same brand name and selling for the same price. One was made in the U.S. and the other three in other countries where labor was but a fraction of that paid here.

The beneficiaries of low wages were the manufacturer and/or the retailer who could make a larger profit on the cheap import.

One-million jobless costs the Federal treasury $16 billion a year in lost income and in money paid out for unemployment insurance, welfare, food stamps, etc. The cost to state treasuries is another $4 billion.

The import infection is spreading from light industry to heavy industry. We are hit not only by import of commodities but by export of capital and technology as giant multinational corporations close down plants here to open them in other lands to take advantage of cheaper labor, tax laws, and protected markets overseas.

The evidence of the infectious spread is written in our recent trade balances. In 1977, we ended the year with a deficit of $30 billion—by far the greatest annual loss in our history.

Theoretically, this last deficit should not have happened. Our bad balances have been devaluating the worth of the dollar on the world exchange. This cheapening of the buck should have boosted our exports since people with foreign currencies could buy things cheaply if they were priced in dollars. And, vice versa, our imports should have fallen since it takes more dollars to buy things priced in marks, yen, or francs. But just the opposite happened.

Why? Because every major (and many minor) country shut out our wares with both tariff and non-tariff barriers—the last being a thousand bits of red tape to bar the entry of American goods. We, on the other hand, continue to leave our doors wide open—a free trade island in a protectionist ocean, with our economy eroding under the pounding waves of imports.

"Free trade" is a mischievous myth used by American manufacturers, retailers and importers to promote their profits. The American people pay the price in chronic unemployment that will not be cured by the traditional medicines.

What America needs today is a fair trade policy that is both generous and realistic. Such a policy would not close our doors to imports but would regulate the flow in accordance with our capacity to absorb. Thus, if the American garment market grows by 3 per cent a year, imports should be allowed to grow at the same rate. In that way, both domestic production and imports can grow as the U.S. market grows.●

HOW BUCK LOST ITS BANG

HON. BOB CARR

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 25, 1978

● Mr. CARR. Mr. Speaker, recently the media has been filled with reports of the decline of the dollar abroad. These reports have spread the concern to many of our citizens. My mail shows this concern. It also shows that there is considerable confusion and misunderstanding about the issues involved. Some of the mail has equated the decline of the dollar with a decline of America's prestige abroad.

Such confusion is understandable. The international monetary issues are complex and generally not of the common experience of many of our people.

Recently in the March 5, 1978, issue of the Detroit News, Michigan State University Prof. Mordechai Kreinin lucidly explained what the declining dollar was all about. His explanation clearly points out that the dollar decline is cause for some concern but not for panic. He puts the problem in perspective in a way that is readable and understandable. I commend it to my colleagues and their constituents.

[From the Detroit News, Mar. 5, 1978]

HOW BUCK LOST ITS BANG

(By Mordechai E. Kreinin)

On March 1, 1978, the financial press was startled by the decline of the value of the dollar to a record low of less than two German marks. Concern over future foreign-exchange developments, and their effect on the economy, became widespread.

THE FACTS

Depreciation in the value of the dollar relative to certain currencies is not new. The U.S. currency has been taking a beating on the European currency markets for quite some time. Over the past 12 months, it lost 15–25 percent of its value relative to three currencies: The Japanese yen, the German mark and the Swiss franc.

But the decline of the dollar was not universal. It gained 12 percent against the Canadian dollar (our major trading partner), as Canadians transferred funds south of the border for fear of secession by Quebec. And it remained almost unchanged relative to the French franc, a currency subject to financial jitters, triggered by fears of a socialist political victory at the polls. The British pound declined relative to the dollar in mid-decade all the way from $2.40 to $1.55. But in the last few months it climbed back to $1.95, as the flow of North Sea oil made the U.K. independent of imported petroleum and freed its balance of payments of that burden. Currencies of smaller countries moved in various directions relative to the dollar.

In sum, the source of public concern is the depreciation of the dollar relative to three currencies: The yen, mark and Swiss franc. The first two represent large and important countries.

CAUSES

Under the present international currency system, exchange rates are determined by market forces of supply and demand. Any sizable addition of dollars to the foreign exchange markets depresses their value. Because $250 billion already there held in deposits in foreign banks (Euro-dollars, a legacy of previous years), even rumors of an impending addition to dollar supply (or decline in demand for dollars) can trigger a large-scale sale of dollars, with an attendant decline in dollar value.

Such additions to dollar supply came about through deficits in the U.S. balance of payments. When we buy more from foreigners than they buy from us, we pay out more than we receive, and that excess expenditure is added to dollar supply on foreign currency markets.

In 1977, the U.S. recorded an unprecedented trade deficit of $27 billion, and the consensus forecast is for a similar deficit in 1978. These increases in supply depress the dollar. In addition, holders of vast sums of dollars in Europe—fearing a decline in their exchange value—wish to unload their holdings, further contributing to the decline in the dallar value. In doing so, they exchange dollars for "strong" currencies. These are currencies of countries running sizable trade surpluses, to wit: Germany and Japan; hence, the rise in value of the mark and the yen.

But what accounts for the U.S. deficits? Our $45 billion of oil imports come first to mind. Unlike European countries, the U.S. failed to adopt an energy-conservation and output-expansion program. Even the "Carter nudge" to the market is being held up in Congress. And the prolonged coal strike certainly intensified doubts about the U.S. ability to cope with the energy problem.

But this is only a partial explanation. It certainly begs the question: If oil is the root cause of the problem, why is Japan—100 percent dependent on imported oil—running

huge trade surpluses? A similar question can be asked with respect to Germany. Clearly part of the answer must be sought elsewhere.

This takes us back to the 1974–75 recession—the deepest and most prolonged of the postwar recessions. The Paris-based organization of the industrial countries—the Organization of Economic Cooperation and Development—adopted a "game plan" which called for the "three locomotive countries" (the U.S., Germany and Japan) to grow at a 5–7 percent annual rate, and pull everybody up with them. These three giant economies are relatively free of external constraints and can adopt strong meausres to stimulate their economies. As their real gross national product grows, they import more from other countries, which are in turn pulled up through expansion in exports.

While the U.S. followed the growth prescription, Germany and Japan did not. The main reason is their intense concern over domestic inflation which is likely to accompany a faster growth rate in real GNP. The U.S., for reasons of its own, preferred faster growth and a reduction in unemployment, even at a cost of higher inflation.

As a result of the differential policy approach, the U.S. has a growth rate in real GNP of nearly 6 percent and an equal rate of inflation. Both rates were less than 3 percent in Germany and Japan.

It is commonplace in economics that the higher the country's income and real rate of growth, the higher its imports. Likewise, the higher its rates of inflation, the less competitive are its products at home and abroad; consequently, high inflation reduces exports and increases imports.

On both the real income and price counts, the U.S. trade balance deteriorated, and that of Germany and Japan moved into large surpluses. Apart from these disturbances, the failure of the Japanese and German economies to grow thwarted the original Organization of Economic Cooperation and Development plan. The European economies are still at a low ebb. So much so, that the organization last week adopted an alternative game plan to "spread the burden." It calls for faster growth in seven major countries, instead of just the "three locomotives."

The differential growth and inflation rates, the energy situation, and the absence of unusually high demand for U.S. farm products, go a long way toward explaining the decline in the value of the dollar. Market intervention by central banks to arrest the decline, and special taxes levied upon foreign depositers by Germany and Switzerland to discourage capital inflow, only touch the symptoms of the problems, and not its root cause.

EFFECTS

To the average American, the decline in the exchange value of the dollar is of little consequence. If a tourist must go to Germany or Switzerland, their dollar expenditures will rise, as each dollar is converted to fewer francs and marks to defray local expenses. But a tourist usually has an option to switch his destination to Canada or Italy, where the U.S. dollar goes further.

Similarly, if he must purchase a German or Japanese product, these imports would cost more. But for most consumers, this holds out the attractive possibility of switching to American-made substitute products. Indeed, the fact that U.S.-made merchandise, such as autos, are made more competitive is a major benefit flowing from the depreciating dollar.

For the general economy, the depreciation of the dollar raises the price of imports, and thereby contributes to domestic inflation. But if we succeed in holding the price line on most American-made products, the imports, contribution to inflation would be small. After all, imports of goods and services occupy less than 9 percent of gross national product.

Down the road, there is the added possibility that truly international commodities, such as oil, will no longer be priced in terms of dollars. As members of the Organization of Petroleum Exporting Countries sustain losses caused by dollar depreciation, they may opt to switch their pricing unit to an alternative asset such as Special Drawing Rights of the International Monetary Fund. Special Drawing Rights are valued as a weighted average of 16 important currencies. Airlines and shipping companies may do likewise. As a consequence, the dollar would lose some of its value as an international currency, and the cost of our imports may rise even more.

But against these costs, there is the benefit that these goods become more competitive at home and abroad. This is the best way to reduce the share of imports in the U.S. automobile, steel and electronics markets, and expand the share of U.S. exports in the world's chemical, machinery and aircraft markets. But all this requires American manufacturers to hold the line on domestic prices. Certainly the prices of U.S. subcompact cars should not be increased in line with that of the foreign competition.

It is for this reason that Europeans are concerned about the declining dollar, and urge the U.S. government to intervene in the currency markets and arrest the decline. But as long as our trading partners refuse to stimulate their lagging domestic economies, dollar depreciation is the only way to restore balance to our international transactions. This is the way the international system is supposed to work.

Recent developments are not a cause for alarm, much less panic. They do not call for massive U.S. intervention in the foreign exchange markets. They do call for increased vigilance on the domestic inflation and energy fronts. But all steps to control inflation and measures to deal with the energy crisis, involve many trade-offs. The costs and benefits of each measure must be weighed carefully.●

EXPLANATION OF VOTES MISSED ON APRIL 20, 1978

HON. ROBERT W. EDGAR

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 25, 1978

● Mr. EDGAR. Mr. Speaker, on Thursday, April 20, 1978, I had business that required my absence from Washington. Therefore, I was unable to vote during the session on Thursday when the House continued consideration of H.R. 8494, the Public Disclosure of Lobbying Act.

On Thursday I traveled to St. Louis, Mo., to address a meeting of the National Association of Van Pool Operators. My speech was on vanpooling and related transportation issues. Thursday evening, back in Pennsylvania, I spoke to the Delaware County Medical Society about medical costs and insurance as well as other legislative topics.

Had I been in Washington, I would have voted as follows on those votes missed:

Roll No. 239—For the House to resolve itself into the Committee of the Whole. Yes.

Roll No. 240—To table a motion to reconsider the previous vote (Roll No. 239). Yes.

Roll No. 241—Amendment to include departments or agencies of the executive branch of the Federal Government and the White House Office as organizations that could be covered by this bill. No.

Roll No. 242—Amendment to require registered lobbying organizations to report the name and address of organizations contributing $3,000 or more during the calendar year and the amount given. Yes.

Roll No. 243—Motion that all debate on the committee amendment in the nature of a substitute and all amendments thereto end at 5 p.m. No.●

ALDO MORO KIDNAPING DEPLORED BY NEW YORK STATE ASSEMBLY

HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 25, 1978

● Mr. BIAGGI. Mr. Speaker, I wish to bring to the attention of my colleagues a resolution passed recently by the New York State Assembly expressing shock over the brazen kidnaping of former Italian Premier Aldo Moro and the killing of his five bodyguards.

The sentiments expressed in this resolution are shared by millions around the world. This act of terrorism has thrown Italy into a state of turmoil. Aldo Moro is certainly one of the most respected public figures in Italy and his fate remains a matter of profound concern to the people of Italy.

World terrorism has reached alarming levels in many areas of the world. The Fascist based Red Brigade have engaged in a ruthless campaign of terror and political murders for much of the past 2 years. The Government of Italy is courageously resisting capitulating to their clearly unreasonable demands while at the same time trying to do everything possible to keep Moro alive. The world community must unite in opposition to terrorism before its impact is felt anywhere else.

I now insert the text of Assembly Resolution No. 217 and commend each of its sponsors.

STATE OF NEW YORK LEGISLATIVE RESOLUTION

Whereas, This Legislative Body is shocked and horrified by the abduction of former Prime Minister Aldo Moro of Italy and the wanton slaying of five of his bodyguards by the terrorists known as the Red Brigades, an urban guerilla group; and

Whereas, This kind of moral malaise internationally is, indeed, a contagion that affects the whole fabric of our world society and breeds a sense of mental and moral ill-being that ought to be eradicated at all costs whatsoever, otherwise we will witness the decline and fall of our Twentieth Century world; and

Whereas, It is the sense of this Legislative Body that it should express its sense of outrage and serve notice on all democratic legislative and parliamentary bodies of the free nations of the world at all levels of government, ranging from local to national, that there should be a concerted effort to eliminate terrorism and its attendant despair, instilling a new sense of survival, by enacting meaningful laws to discourage this dreadful violence; now, therefore, be it

Resolved, That this Legislative Body pauses in its deliberations and deplores and denounces the kidnapping of former Prime Minister Aldo Moro of Italy and the wanton slaying of five of his bodyguards by the terrorists known as the Red Brigades, an urban guerilla group; and be it further

Resolved, That copies of this resolution, suitably engrossed, be transmitted to the President of the United States, to the Italian

Ambassador to the United States, to the Secretary General of the United Nations, to the Speaker of the House of Representatives of the United States, to the President Pro Tempore of the Senate of the United States and to each member of the Congress of the United States from the State of New York.●

SOYBEANS

HON. PAUL FINDLEY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 25, 1978

● Mr. FINDLEY. Mr. Speaker, I wish to call attention of the Congress to an article entitled "The Joy of Soy," telling of the many nutritious uses of soybeans. The United States is the world's largest producer of the versatile soybean and we are now striving to increase exports to share nature's bounty with the peoples of the world.

I include the following article from a recent issue of Vegetarian Times:

SOYBEANS

(By Frances Sheridan Goulart)

If you live by soybean alone (as many of the world's peoples do, and have done for thousands of years)—you can have it your way. Soybeans can be the cream in your coffee, the dog in your bun, the chow in your cat, and then some. It is, by far our most versatile food and indeed, has proven to be one of our most nutritious as well.

The U.S. is the world's largest producer of soybeans. We plant some 60 million acres and harvest more than 1.5 million bushels per year. Oddly, despite such statistics we are also the biggest bean know-nots using less than 15 percent of the soybeans we produce for human consumption and virtually hiding most of that in a host of other processed foods.

The primary use of soybeans (known as the "Cow of China" and "Meat without Bones" in the Orient) is for animal feed in the U.S. Over 85 percent of the non-exported soybeans grown in the U.S. (and the U.S. grows 75 percent of the world's soybeans) are fed to animals. In contrast, China—with more than three times as many mouths to feed and the world's second largest producer of soybeans. feeds virtually none of its beans to animals.

It's sad that the un-bean enlightened "average" consumer is so used to paying high prices for a "complete protein" from meat that is loaded with saturated fat, chemicals, uric acid, artificial hormones and worse. The soybean, by contrast is polite and relatively pure pulse protein with a superlative blend of amino acids that gets even better when its protein is complemented with wheat, oats or corn.

Meat is just meat, but a soybean—ah! The versatile bean can "become" scrambled eggs, a soyburger, a soyball, frozen yogurt or just about anything else you'd care to boil, whip, stir, bake or mix it into.

No matter what you have in mind for your mouth, the soya is a pulse (edible pod-bearing seed) that you should and can take often. It provides 40 percent protein (twice as much as other beans) and 50 percent protein in its flour form. (Just adding one tablespoon of soyflour to 4 tablespoons corn flour will increase the protein content 150 percent.)

Although a great deal has been made of soy protein content, it is low in starch (2 percent) richer in potassium than any other food with the exception of brewer's yeast. In addition, it is rich in easily digestible oils.

A great food, highly versatile and inexpensive. So how can you put it to use? In many ways. You can buy it roasted or roast them yourself and save yourself from getting roasted at the checkout counter; you can make it into tempeh (see accompanying article); make it into or buy it as tofu; use it as a sauce, a milk or add it's flour to your baked dishes. Indeed, there are almost as many ways to use it as there are ways to eat and cook.●

STATEMENT OF SAM M. GIBBONS ON MULTIEMPLOYER PENSION PLAN TERMINATION BILL

HON. SAM GIBBONS

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 25, 1978

● Mr. GIBBONS. Mr. Speaker, today, I am introducing a bill intended to strengthen the security of the private sector pension benefits for millions of active employees and present retirees covered by multiemployer pension plans. The first section of my bill accomplishes this through an amendment to the Internal Revenue Code which provides a substantial disincentive to the termination of a multiemployer plan maintained in an economically sound industry.

The second section of the bill is essentially unrelated to the first. It "decouples" the maximum termination insurance benefit guaranteed by the Pension Benefit Guaranty Corporation (PBGC) from the social security wage base and freezes the maximum at its current level. This will assist in safeguarding the financial integrity and viability of PBGC's single employer and multiemployer termination insurance programs which were initiated by the Congress 3½ years ago under the Employee Retirement Income Security Act of 1974 (ERISA).

Under the terms of the first section of my bill on multiemployer terminations, plan sponsors who terminate a "related" multiemployer plan may not set up one or more new tax qualified plans and trusts covering essentially the same employees or former employees or retain the qualified status of an existing related collectively bargained plan. However, it applies only where the terminated multiemployer plan is determined by the IRS not to have operated in a depressed or declining industry.

In making this determination, the IRS would be required to take into account whether or not: First, a substantial number of the employers required to contribute to the multiemployer plans were operating at an economic loss; second, there was substantial unemployment or underemployment in the industry concerned; third, the sales and profits of the industry concerned were depressed or declining; fourth, and the duration and expected duration of each of the above; fifth, the ratio of active to retired participants in the multiemployer plan; and sixth, other relevant factors. These factors are to be considered on a long-term basis, that is, economic conditions and trends in the industry for at least 10 years before the date of the multiemployer plan termination.

There is also a time limit on the application of the provision to affected plan sponsors. Specifically, a new qualified plan(s) could be installed by such sponsors after the expiration of a 5-year period from the date of the termination of the "related" multiemployer plan. The 5-year period seems to provide an adequate deterrent to a nondepressed industry termination.

The rationale for this first section is simple: management and particularly union sponsors of multiemployer plans will be less likely to consent to the termination of their multiemployer plan if they know that a new tax-favored plan or plans (for example, one favoring active employees) could not be set up in its place. Likewise, an existing plan or trust and any plan or trust spun off from these would not retain its tax-qualified status under the Internal Revenue Code if a "related" multiemployer plan or trust were terminated.

Some employers might find it advantageous to terminate a poorly funded multiemployer plan whose benefits have been significantly raised in recent years. Present termination insurance phase-in rules limit the recognition of benefit increases within a 5-year period prior to termination. By reason of my bill, however, union negotiators could no longer be promised that the present employees would be covered by a new plan—or continue their coverage under another existing qualified plan—after the termination of an existing plan. Thus, union negotiators, union-appointed plan trustees and, of course, the rank and file may find it more necessary to resist the termination of an existing multiemployer plan and endeavor instead to improve the financial stability of the existing plan.

Moreover, if the existing plan is preserved, both promised plan benefits—the PBGC will often guarantee less than the full range of promised plan benefits—and the ability of the PBGC to effectively insure multiemployer plan benefits in genuinely troubled industries will be enhanced. Further, the interests of all other multiemployer plans—whose premium dollars support, in the first instance, the multiemployer termination insurance program—and of taxpayers generally—who may in the future be called upon to support multiemployer plan benefits through general revenue financing—will be protected.

I recognize that few unions and employers—the very people who deserve credit for having voluntarily installed and sustained these multiemployer plans through many years—would discontinue these plans absent great business hardships. The great majority of plan sponsors are concerned with the welfare of rank-and-file employees, and do not need added incentives to continue maintaining their multiemployer plans.

Nevertheless, the bill I am offering today is both necessary and appropriate for four basic reasons:

First, the overall likelihood of multiemployer plan terminations now appears considerably greater than it did 4 years ago when title IV of ERISA was being finalized. In fact, the danger of substantial terminations was then argued to be remote. But many factors are now

undermining the stability of many plans: pre-ERISA funding practices tolerated severe underfunding and inadequate catch-up requirements under present funding standards; existing statutory incentives to individual employer withdrawals from multiemployer plans undermine plan stability; the certainty of rising multiemployer premiums. The PBGC has recently reported that some 12 percent of the Nation's existing multiemployer plans—with unfunded liabilities totaling approximately $4 billion—are in severe trouble. In short, the risk of substantial multiemployer plan terminations in the next 5 years is clearly anything but remote.

Second, some employers required to contribute to plans which have large unfunded liabilities may not be adequately deterred by the PBGC's potential claim under existing law against 30 percent of their assets, and may find plan termination to be in their financial interest after PBGC coverage becomes mandatory in July 1979. The result would be the transfer of the consequences of past irresponsibility to the PBGC. In order to overcome union resistance to such a move, management might well promise that a new plan covering or favoring active employees would be put in place. Clearly, however, the Pension Benefit Guaranty Corporation was not intended to be—and is not capable of being—a multiemployer plan refinancing corporation.

Third, the Congress clearly aimed the termination insurance program at extreme business hardship situations. Thus, early financial danger signs, known as "reportable events," are statutorily required to be reported to the PBGC. To repeat, the PBGC was not intended as a mechanism for public refinancing of plans operating in viable industries, and its existence was not meant to determine, or even influence, a termination decision.

Finally, it must be acknowledged that even a handful of multiemployer plan terminations, carrying with them a large enough unfunded liability, can virtually render PBGC's present self-financing multiemployer program unworkable—or drive its premiums so high that additional terminations would be precipitated—or necessitate turning to general revenues, a taxpayer bailout. If, therefore, my bill contributes to the deterrence of even a single avoidable multiemployer plan termination, it will have achieved its aim—especially if the single termination could have broken the camel's back.

As to the second provision, decoupling PBGC's guaranteed benefits from the social security wage base is clearly appropriate in light of the recent changes made to social security to finance the trust fund. As such, these deductions reflect no congressional judgment as to the appropriateness of these levels for any other purpose. If this decoupling is not effected, we will only escalate the financing problems of another fund—PBGC's. Finally, the maximum benefit level is now set at well over $900; this level is clearly adequate for several years into the future. PBGC would be required to notify Congress of the need for increases in the future.●

AFFIRMATIVE ACTION VERSUS NEGATIVE ACTION

HON. JOHN CONYERS, JR.

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 25, 1978

● Mr. CONYERS. Mr. Speaker, Jim Fitzgerald of the Detroit Free Press is a veteran journalist and commentator who has a keen sense of the double standards that operate in contemporary life.

Affirmative action in the Detroit Police Department has not been working. A recent court decision knocked down affirmative action guidelines in the promotion of Detroit police officers. In a March 6 column in the Free Press entitled "Sins of Our Fathers Must Be Atoned Now," Fitzgerald defends affirmative action as the only workable remedy to the long years of negative action, in which black Americans were denied equal opportunity.

I commend to my colleagues Jim Fitzgerald's commentary on affirmative action and equal opportunity, as follows:

SINS OF OUR FATHERS MUST BE ATONED NOW

Seriously, there are two or three things that really make me angry . . .

. . . My Cousin Al was delighted by Judge Fred Kaess' decision against the use of affirmative action in promoting Detroit policemen. Cousin Al is typical of the righteous hypocrites who insist it is as wrong to discriminate against white people today as it was to discriminate against black people yesterday.

But where was Cousin Al yesterday? He is 65 years old. Today he yelps about constitutional rights when a black man is allowed to slip into line ahead of a white man. A few years ago he had no complaints when blacks were not allowed in line at all because it led to a sign saying "Whites Only." In fact, Al thought it was damn pushy of the blacks to suggest they had any right to stand in the same line with white folks.

If only the obvious bigots like Cousin Al were using the Constitution to fight affirmative action, I wouldn't be so dismayed by the hypocrisy. But many supposedly enlightened people, including judges and newspaper editorialists, are taking the same position.

Where was all that grave concern for equal opportunity when the black people needed it?

The opposite of affirmative action is negative action. Blacks were victims of negative action for hundreds of years. They are still victims. As Mayor Young said, if Judge Kaess doesn't think there is discrimination against blacks in the Detroit Police Department, the judge must live on another planet.

It is true, as Cousin Al keeps preaching, that two wrongs don't make a right. But in a society trying to atone for past sins, it is not wrong to give blacks a head start for the first few years they compete in a race that previously they were only allowed to watch—from segregated seating. It is not wrong. It is the fair and decent thing to do.

It's too bad some innocent whites must personally pay the price of atonement, but it's a debt someone must pay. Who could deny that those doing the atoning are suffering far, far less than those who were sinned against?

My sympathy is with the white cop who must let a black cop cut into line ahead of him. I would only ask him to try to understand.

But there is no sympathy here for Cousin Al and the other righteous hypocrites who have suddenly discovered it is unconstitutional to ride in the back of the bus. I would only ask them to get out and walk.

. . . In Cincinnati last month, a judge refused to allow a woman prisoner to be with her three-year-old son while he died in a nearby hospital. The woman's crime was selling marijuana.

At the same time, former U.S. Attorney General John Mitchell was on vacation from prison so he could be treated by the doctor of this choice. You remember what his crime was.

Equal justice. It is a laugh, if you can stop crying long enough.●

CUTBACKS ON VETERANS' ADMINISTRATION FUNDS HARM TRAINING PROGRAM

HON. ROBERT W. EDGAR

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 25, 1978

● Mr. EDGAR. Mr. Speaker, Members of Congress are hearing from constituents in ever-increasing numbers about cuts the administration has proposed in the Veterans' Administration medical system. The dollar figures, the number of beds to be taken out of service, the staff cuts—these figures are familiar to us, and I will not repeat them here.

What I do want to emphasize is the irrevocable nature of what is happening to our largest governmental medical system. Closing hospitals beds is one thing; they can be put back into service. But closing out research programs and training facilities is something else. With this deterioration, it will be the beginning of the end. Once placed in motion, there can be no turning back.

In the delivery of health care, research and training programs are essential for the provision of quality medical services. There is no question about that according to all knowledgeable individuals. What is happening now, Mr. Speaker, is that as the result of the administration's threatened cutbacks, medical schools are reevaluating their affiliation agreements with VA hospitals. VA hospitals have grown into excellence as a result of these affiliations; and if they are dissolved, the decline in the quality of patient care will follow as the night follows day.

The dimensions and details of this trend are outlined in an article in the April 15, 1978, issue of the publication, U.S. Medicine. The U.S. Medicine article reads as follows:

CUTBACKS THREATEN VA TIES WITH MED SCHOOLS

WASHINGTON.—Affiliations between Veterans Administration hospitals and medical schools may be terminated if the hospitals lose their research funding, the National Association of VA Physicians (NAVAP) has warned.

A survey taken by the organization—one of a series it is conducting to try to stem planned research budget cuts—shows affected medical schools do not want to remain associated with institutions whose care threatens to become "second-quality," NAVAP said.

As part of a budget cut more than $6 million for medical research programs, VA has made plans to end research programs at 55 hospitals in fiscal 1979. In addition, nine other hospitals already have been notified that their research funding will stop.

There is a chance the situation could be reversed, however. If Congress follows the

recommendations of its House and Senate Veterans Affairs Committees, medical research funding would increase by $18 million instead of declining.

The issue now is before the appropriations committees in both houses.

NAVAP, through its surveys, hopes to provide evidence of the "disastrous" effects it says such budget cuts will produce.

In its most recent survey the organization contacted staffs at hospitals and medical schools on the list of those whose research funding might be terminated.

Here are the comments from four affiliated hospitals and medical schools on the list:

Northport, N.Y., Veterans Administration hospital and the School of Medicine and Health Sciences Center, State University of New York at Stonybrook; affiliated since 1971:

The chief of nuclear medicine at the hospital would leave; two staff psychiatrists would be lost; acquisition of a nephrologist would not be possible.

Dr. Marvin Kuschner, dean of the medical school, says discontinuing the hospital's research program "would encourage the concept of two levels of faculty, with those stationed at the university hospital being first-class and those at the VA being second-class."

"This is unacceptable to us, and we feel it threatens the viability of our association with the VA hospital," he said. "Should the research program be eliminated, it is my intention to instruct our clinical chairmen to plan an orderly withdrawal from the VA hospital over the next two years."

Newington, Conn., Veterans Administration hospital and the University of Connecticut Medical School, affiliated since 1968:

A statement prepared by physicians at the hospital states:

"The continuation of house staff and faculty input depends entirely on the availability of research support for faculty based at the VA hospital. Therefore, elimination of the support means that the affiliation with the medical school would end and nearly all of the fulltime staff physicians and all of the house staff physicians would leave.

"Newington physicians have calculated that a return to VA rather than university recruitment would lower the cost-effectiveness of patient care and make care at the VA hospital so costly that there would be little justification for maintaining the hospital.

"Newington stands to lose all or most of 12 board-certified internists in the department of medicine. Research programs currently underway at Newington are aimed at finding new approaches in the treatment of infections, cancer, diabetes, heart disease and other problems particularly relevant to veterans. These programs would cease."

Syracuse, N.Y., VA hospital and Upstate Medical Center of the State University of New York:

Dr. William J. Williams, chairman of the department of medicine, states: "The most important dimension of the VA affiliation, in my view, has been the excellence of the faculty recruited for the VA hospital. As a group, they are in every way equivalent to the faculty of any university hospital I know."

"One of the major reasons we have been able to recruit and retain this excellent staff has been the research support available through the Veterans Administration program."

Dr. Norman B. Ackerman, professor and chairman of the department of surgery, says: "I myself will suggest strongly to the new incoming chairman of our department to reevaluate our commitment to the VA in general surgery and to suggest that we consider increasing our program at the private hospitals where the receptiveness to our efforts might be more appreciated."

Dr. Gilbert S. Ross, professor and chairman of the department of neurology, states: "The Upstate Medical Center affiliation with the VA in regards to neurology would terminate within two years and qualified neurological physicians would be extremely difficult to obtain for the VA neurology service."

Dr. S. A. Blumenthal, associate chief of staff for ambulatory services, says: "If the research program at the VA hospital were to be dismantled, I would have absolutely no reason to stay on at the VA hospital and would immediately look for a position elsewhere."

"I doubt, however, that I would accept a position in another VA hospital, even if that position included research opportunities, because my presumption would have to be that all VA research programs were in jeopardy."

Dr. G. F. Reed, dean of the medical center, states: "If the research cuts were to come about, I can assure you that our institution would not be interested in any significant involvement with an institution of poor quality, and I am afraid that our present affiliation, presently so beneficial to both the Veterans Administration and the medical center, would quickly deteriorate to one of no significant importance."

Tampa, Fla., Veterans Administration hospital and the University of South Florida Medical School:

Dr. R. G. Mason, professor and chairman of pathology, states: "Certain diagnostic tests now carried out in research laboratories would no longer be performed for VA patients. The downgrading of the general level of expertise of faculty members is a serious potential problem."

Dr. H. N. Schnitzlein, professor and chairman of the department of anatomy, says: "The transplant program of the department of surgery has benefited from the availability of basic science personnel in the research facility. Loss of this ancillary program would be disastrous for the kidney transplant program."

Dr. J. A. Del Regato, professor of radiology, states: "No education is truly significant unless it is carried out in the light of research.

"A research program is not a luxury, but an indispensable companion of all worthy medical education; it is also the only assurance that medical service is properly invigorated." ●

MASSACHUSETTS SUPPORTS HUMAN RIGHTS FOR NORTHERN IRELAND

HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 25, 1978

● Mr. BIAGGI. Mr. Speaker, on St. Patrick's Day, Gov. Michael S. Dukakis of the State of Massachusetts signed an official proclamation declaring March 17, 1978, as Human Rights Day for Northern Ireland. As chairman of the 104-member Ad Hoc Congressional Committee for Irish Affairs I express the committee's warmest congratulations to the Governor.

This is but another in a growing national expression of concern for the ongoing human rights violations which occur in Ireland. I maintain that these violations and deprivations serve as fundamental obstacles to peace and must be ceased.

It is my firm hope that continued activities by States, cities, and counties will provide the impetus for long overdue hearings to be conducted on the entire Irish question by the House International Relations Committee. This is a multifaceted problem which must be viewed as a critical issue in our foreign policy. Hearings can play an enormously constructive role in getting the main issues discussed, focusing attention and concern on human rights violations and may also lead to a diminution of violence, which we all deplore. The President has stated his interest in possibly providing U.S. foreign economic assistance to Ireland but he wisely tied it to peace being reached. It is to advance the cause of peace that the Ad Hoc Congressional Committee for Irish Affairs was formed.

We intend to continue our advocacy of this cause and urge more Members to join. The present membership follows:

MEMBERS, AD HOC CONGRESSIONAL COMMITTEE FOR IRISH AFFAIRS*

Mario Biaggi, Democrat of New York, Chairman.
Peter W. Rodino, Democrat of New Jersey.
James J. Delaney, Democrat of New York.
John M. Murphy, Democrat of New York.
Benjamin S. Rosenthal, Democrat of New York.
Joshua Eilberg, Democrat of Pennsylvania.
James M. Hanley, Democrat of New York.
Robert A. Roe, Democrat of New Jersey.
Lester L. Wolff, Democrat of New York.
Joseph P. Addabbo, Democrat of New York.
William R. Cotter, Democrat of Connecticut.
Edward P. Beard, Democrat of Rhode Island.
Bruce F. Caputo, Republican of New York.

Parren J. Mitchell, Democrat of Maryland.

At this point I am proud to submit the Massachusetts proclamation on Human Rights Day in Northern Ireland. I also pay special tribute to the leadership of the Irish National Caucus for their efforts on behalf of this proclamation.

A PROCLAMATION, 1978

(By His Excellency Michael S. Dukakis)

Whereas it is the proud tradition of the U.S. to promote international respect for the human rights of all people; and

Whereas each St. Patrick's Day the American people, and especially the citizens of Massachusetts, join with their fellow Americans of Irish ancestry in celebrating Ireland's National Day; and

Whereas the State of Massachusetts owes a special debt of gratitude to the Irish for their magnificent contributions; and

Whereas the on-going violations of human rights in Northern Ireland casts a shadow on our celebration of St. Patrick's Day this year; and

Whereas it would be the hope of the citizens of Massachusetts that the conflicts troubling the people in Northern Ireland could be resolved in an expeditious and peaceful manner;

Therefore, I, Michael S. Dukakis, Governor of the Commonwealth of Massachusetts, do hereby proclaim March 17, 1978, as "Human Rights Day for Northern Ireland" and urge the citizens of the Commonwealth to take cognizance of this event and to participate fittingly in its observance.●

COMMEMORATION OF ARMENIAN MARTYR'S DAY

HON. EDWARD J. DERWINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 25, 1978

● Mr. DERWINSKI. Mr. Speaker, in commemorating the suffering of millions of Armenians 63 years ago, we note what is properly regarded as the first deliberate genocide in the 20th century the ruthless massacre of the Armenian people by the Ottoman Empire. Since that time, of course, the world has witnessed other incidents of man's savage cruelty to fellow human beings. However, this historic event not only threatened the Armenian people with extinction which was the goal of the tyrants of the Ottoman government, but also set an unfortunate precedent, that of world inaction.

The anniversay of this tragic event must not be allowed to pass without a tribute to the 1,500,000 Armenian men, women, and children who perished during the 1915–18 period. Again this year, we should remember those martyrs who sacrificed their lives and rededicate ourselves to a renewed reverence for human life.

The history of the Armenian people has been marked by long periods of subjugation to foreign rule. As early as the 16th century, nearly the whole country was overrun and held by the Ottoman Turks. Today, the historic Armenian area in what is now Turkey, is totally devoid of Armenian people, while the Soviet Union holds the Armenian people captive in the area known as Soviet Armenia.

Despite the years of subjugation by alien rulers, the Armenian people still manage to retain their national consciousness through their church, culture, and language. The Armenians were the first nation in the world to accept Christianity as their state religion, and were perhaps the oldest of the civilized races in western Asia. Their sense of unity and national aspirations became so intense by the mid-19th century that the Armenians developed a strong desire for attainment of their goal of self-government.

However, at that time, the Turks set out to exterminate the Armenian Christian population within Turkish borders and attempted to eliminate some 2 million Armenians in the empire through deportation, contrived famine, and large-scale massacres. While many hundreds of thousands were able to flee to neighboring lands, many others, mostly women and children, were forced to adopt the Moslem faith and submit to servitude in Turkish homes. The Armenians paid with their lives for having entertained the idea of human dignity and freedom.

I believe that we should be confident that this historical injustice will one day be corrected and a free and independent Armenia will once again exist. The Armenian people have demonstrated throughout history, their fortitude, stamina and tenacity in maintaining their church, culture, and language. The existence today of this Armenian spirit is the foundation that will lead to the ultimate restoration of a modern Armenian nation.

Therefore, we should be strengthened by the belief that their suffering was not in vain and that a free Armenia will arise despite the shocking indifference of the world at the time of the massacre unleashed by the Ottomans and the various political setbacks that have occurred in the last 63 years.●

VA MEDICAL RESEARCH PROGRAMS IN DANGER

HON. DAVID F. EMERY

OF MAINE

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 25, 1978

● Mr. EMERY. Mr. Speaker, as many of our colleagues are aware, the inadequacies of the President's budget request for the Veterans' Administration medical care program are staggering and will adversely affect almost every VA facility in the country.

The President's budget reduces the operating beds in VA hospitals by a total of 3,132. There is no question in my mind that the quantity and quality of medical care and treatment to which veterans are entitled under laws passed by the Congress will be reduced to an unacceptable level.

Aside from the reductions in the number of beds and the loss of personnel, there is another area which concerns me very much—that being the future of our VA medical research programs.

In the VA system there are some 177 hospitals. Eighty of these have medical school affiliations. However, indications are that research funds in medical schools are in short supply and that pressure is being applied on the Veterans' Administration to provide additional funds to those hospitals with medical school affiliation.

Currently, there are 64 hospitals with research budgets of approximately $120,000 per year. Nine of these are to be terminated and the remainder have been site-visited to determine which programs should be kept and which should be phased out. In any event, those which are recommended for continuation will receive reductions in their programs so

that more money will be available for the hospitals with medical school affiliations.

The situation at the Togus VA Center in Togus, Maine, is perhaps exemplary of circumstances which will occur across the country if these research programs are terminated. At Togus, an additional 12 positions will be lost.

Mr. Speaker, the Maine Department of the American Legion has provided me with some important reasons why clinical and basic research is important at Togus. I am sure these same reasons can be applied to our VA Centers across the country and their research programs. I would like to share those reasons with my colleagues at this point:

SOME REASONS WHY CLINICAL AND BASIC RESEARCH IS IMPORTANT AT TOGUS

1. Improves the quality of patient care because:

a. Recruiting staff: Better-trained staff of all types is attracted to a hospital with a basic research program. Our staff has improved as research grew.

b. Education: Goes hand-in-hand with research. An atmosphere of inquiry is essential to good teaching. This helps patient care.

c. Scientific standards: Basic research has the most exacting standards which affects all staff and creates a scientific atmosphere in addition to the clinical aspect.

2. Stimulates other research, clinical, Health Services, biomedical engineering:

a. The fecundity of aggregates operates at Togus where there is a remarkably well-integrated group of investigators developing. There are close, supportive relationships between basic biomedical research, HSR&D, and clinical research in medicine, surgery, psychology, social work and other services. Basic research is essential to these other groups in encouraging high standards, improving communications, supporting new ideas and projects emotionally, financially and administratively.

In recent years, Togus has attracted many new staff members with research interests and with varying degrees of experience. This is probably a microcosm of what is happening all over Maine which is the second fastest growing state (U.S. Dept. of Commerce). It is the only post-industrial state in the Union, and is attracting many competent people who come here because of Maine's unique advantages. All indications are that this trend will continue.

The Jackson Laboratory at Bar Harbor and the Woods Hole Oceanographic Institute are two examples of excellent research facilities which grew "in isolation" because they attracted creative staff just as Togus is doing.

3. Affiliations:

a. Current negotiations with Tufts University School of Medicine are underway for this hospital to serve as a teaching facility for third and fourth year students from Maine attending Tufts. The support of a research facility and its productive use by staff members is important to this affiliation. Furthermore, the research facility which has been constructed permits the acceptance of doctoral degree candidates from the University of Maine whose interest is the investigation of a particular aspect of a human disease, using first an appropriate animal model to perfect experimental procedures and test hypotheses before using human source material. Staff members with research interests will serve as mentors.

b. Approved current affiliations number 20 and include among others Tufts University School of Dental Medicine, Harvard School of Dental Medicine, Bangor Community College, University of Maine at Augusta Division of Nursing, Maine Medical Center, Central Maine Medical Center, University of Maine at Orono, and University with accredited doctoral training programs in Psychology, e.g., Adelphi.

4. Impact of VA Medical Care Program upon community medicine:

a. To emphasize further the importance of the Medical Research Service to the overall medical care program within the State of Maine, it should be pointed out that in the State's population of nearly one million, 160,000 are veterans. If one crudely estimates that each veteran is married with one child, nearly half of this state's population is service-related. About 11% of the state's veterans seek medical care at this hospital. Obviously, the major portion of medical care is provided by the private sector. To help support this private sector, services such as kidney biopsies diagnosed by electron microscopy have been proposed and enthusiastically endorsed by the pathology departments of these hospitals. This station has developed its electron microscopy facility in research with the view of contractual arrangements to help support its maintenance, technician's salaries and supplies. This is the only hospital-based electron microscope in the state. Funds are to be solicited from the Bingham Fund for a 2-year feasibility study to defray the expense of these services to the areas hospitals prior to making contractual arrangements. Full utilization of the instrument is assured by this arrangement as well as assuring its use for research problems arising from its clinical application. The impact upon patient care is apparent, particularly for the staff at Togus and the staffs of hospitals within this state.

b. Similarly, amino acid analyses as an additional diagnostic service, particularly for pediatrics, has been proposed. Again, this is the only amino acid analyzer available for medicine in the state. Dr. Cuprak who trained Dr. Ampola of Dr. Gellis' staff in pediatrics at Boston Floating Hospital, New England Medical Center Hospital, has also provided the requisite training to technicians here.

c. Regionalization, therefore, does not reach approximately 89% of the veteran population in the state but a medical care facility with a medical research department can influence the excellence of care not only at this station but serve to radiate it to local hospitals where the majority of veteran patients and their families is being treated.

5. Loss of the research service at Togus will jeopardize the affiliations listed in paragraph 3 and will also compromise our ability to continue as a leader in community medical health care including the family practice residencies, surgical residencies and contemplated internal medicine and psychiatric residencies. As one of the leading hospitals in the State of Maine it will be difficult to maintain this position and to recruit a staff able to teach Maine students in medicine at Tufts and Vermont Medical School during their 3rd and 4th year clerkships and to provide an attraction to assist our efforts in recruitment as cited in paragraph 1.

6. Through the years since the Medical Research Service was inaugurated in 1957 many volunteers have served in the laboratory; numerous summer student positions have been filled and student research programs have been completed using the Togus facilities. Many of these students have received their basic inspiration and training which enabled them to continue in medical studies ultimately completing their medical training and returning to the State of Maine as badly needed physicians. Others have pursued health related careers and science oriented endeavors.

7. The contribution of research to patient care in a health care facility is recognized. To discontinue the present Medical Research Service at Togus is to retreat to a secondary care and treatment facility which is not in the best interests of the veterans of the State of Maine.

8. Without the value of research, and facing all of the above-mentioned problems, what would be left to attract competent doctors to the Togus VA Hospital? No medical school is going to guide their students into a system that lacks adequate training and an economical future.

9. If President Carter's budget clears Congress in present form, you will see the demise of over 50 hospitals almost overnight.●

SHCHARANSKY CASE STILL A MAJOR CONCERN

HON. PAUL SIMON

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 25, 1978

● Mr. SIMON. Mr. Speaker, there is no more tragic, dramatic situation of the suppression of fundamental civil liberties in the Soviet Union than the case of Anatoly Shcharansky.

I was pleased to see the letter by the distinguished political scientist, Hans J. Morgenthau, and several others, which appeared in the New York Times recently.

I am submitting it in the RECORD here for my colleagues, who may not have seen it and for the benefit of our friends at the Soviet Embassy, who I know read the CONGRESSIONAL RECORD faithfully.

The letter follows:

MOSCOW VS. ANATOLY SHCHARANSKY

To the Editor:

Anatoly Shcharansky was arrested on March 15, 1977, in Moscow and incarcerated in the notorious Lefortovo Prison. A Soviet prosecutor announced the launching of an investigation against him on charges of treason and espionage, which could carry the penalty of death.

Soviet newspaper articles accused Shcharansky of spying for the C.I.A. The President of the United States formally declared on June 13, 1977, that Shcharansky had never worked for the C.I.A.

For one year Shcharansky has been held incommunicado, forbidden to see visitors, forbidden to hire a lawyer of his choice and kept in the dark about the specific charges against him, while the state-controlled press and leading Soviet officials have, even before an indictment, judged him guilty and called for his execution.

Anatoly Shcharansky personifies the link between Jews actively seeking emigration and the movement for democratic change in the U.S.S.R. Once refused his fundamental right to leave the U.S.S.R. Shcharansky, a computer scientist, became active in the emigration struggle and helped to write complaints about the lawlessness with which emigration matters are treated by Soviet officials. When the Group of Assistance to the Soviet Implementation of the Helsinki Agreement was formed in Moscow, he joined in the belief that the Helsinki Accords, in which the Soviets committed themselves to promote human rights, could change decisively Soviet handling of emigration.

The Soviet authorities tried to frighten and demoralize Shcharansky. He was arrested four times and jailed on fabricated charges for participating in peaceful demonstrations of would-be emgirants.

From the open letter of Dr. Sanya Lipavsky published on March 5, 1977, in Izvestia, it appears that the Soviet authorities greatly fear the consolidation of persons struggling for human rights in the U.S.S.R., which Shcharansky represents. Preliminary reports indicate that they are attempting to link through Shcharansky, in a show-trial reminiscent of Stalin's days, American intelli-

gence agents, diplomats and journalists in a wholesale plot for the purpose of suggesting that all dissent in the Soviet Union is directed or exploited from the United States.

We, the undersigned, are appalled by this persecution of Anatoly Shcharansky, which could make of dissent or emigration a form of treason. And we urge that the Soviet Union, as a matter of right, release Shcharansky immediately and permit him to leave for Israel and rejoin his wife.

HANS J. MORGENTHAU,
DANIEL BELL,
SAUL BELLOW,
NATHAN GLAZER,
IRVING HOWE,
H. STUART HUGHES.

NEW YORK, *April 6, 1978.*

(Mr. Morgenthau is chairman and the other signers are sponsors of the Academic Committee on Soviet Jewry.)●

TRIBUTE TO TAIWANESE RELIGIOUS LEADER

HON. JIM LEACH

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 25, 1978

● Mr. LEACH. Mr. Speaker, I had the privilege and opportunity several weeks ago to meet with one of the prominent Christian leaders and spokesmen in Taiwan, the Reverend H. K. Weng, during his visit to the United States. He has since returned to his duties in Taiwan where he has just been elected to serve as moderator of the General Assembly of the Taiwan Presbyterian Church. His election to this position is a fitting tribute to his uncommon leadership ability and his extraordinary commitment to the church and to the country in which he lives.

Reverend Weng assumes this task at a time when the island of Taiwan faces a future of uncertainty. With the possibility of the United States moving toward normalization of relations with the People's Republic of China, the fate of the Taiwanese people is a constant and troubling question. The Taiwanese people clearly sense this and believe that their voice must be heard if their lives, their future, and their homes are to be secure and free.

I am reminded at this point, Mr. Speaker, of the early days in our own country, and the signficant role which a religious leader, John Witherspoon, played at a most difficult political time for this Nation. The parallel is striking. A Presbyterian clergyman himself, John Witherspoon served as the moderator of the church's first general assembly in 1789. He also served as a member of the Continental Congress and signed our Declaration of Independence.

Having visited with the Reverend Weng and having gained a new appreciation and understanding of the tremendous responsibility he and his colleagues share as Taiwan moves into a world of new political realities, I am struck by the importance of continued American support and friendship of the Taiwanese people. It would be tragic if that support were to be eroded by the imposition of laws and policies restrictive to freedom of religious expression. We all hope that political changes in Taiwan will be in the direction of greater freedom and greater democracy, not greater limitations on individual rights and liberties.●

LOBBY REFORM

HON. TOM RAILSBACK

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 25, 1978

● Mr. RAILSBACK. Mr. Speaker, last week the House began consideration of H.R. 8494, the Public Disclosure of Lobbying Act. This legislation is a vast improvement over the existing statute, and I am hopeful our deliberations on H.R. 8494 will proceed expeditiously this week.

However, the majority of our colleagues believed some of the reporting provisions in the bill were deficient, and therefore overwhelmingly adopted three amendments which I firmly believe have improved the bill substantially. I hope H.R. 8494 will now pass the House as it is now written. A number of recent newspaper editorials support the concepts behind these amendments, and for the review of my colleagues I ask unanimous consent that a sampling of these editorials be inserted in the RECORD immediately following my remarks. I think they will make very clear the broad support that exists in all parts of this country for meaningful lobby reform.

The articles follow:

[From the San Francisco Examiner, Mar. 30, 1978]

THE LOBBY LAW

Using a cliche to make a point is not altogether indefensible in some cases, such as lobbyists have been getting away with murder in Washington too many years to remember.

Legislation to replace a 32-year-old federal lobby law will soon be debated in the House. The new bill would expand lobbying coverage, reveal hidden influences and the money involved. The 1946 law has so many loopholes it is virtually unenforceable. Many big lobbyists didn't even bother to register last year.

To stop the lobbyists from getting away with murder, the full House should restore two provisions deleted by its Judiciary Committee. One would require more disclosure about "grassroots" lobbying-getting citizens back home to write members of Congress supporting or opposing certain legislation. The other would spotlight major financial backers.

We agree with Common Cause Chairwoman Nan Waterman that if these two provisions are killed the lobbyists "will once more have pulled down the shades on sunshine."

[From the Paterson (N.J.) Evening News, Mar. 10, 1978]

REFORMING THE LOBBY LAW

The Feb. 20 issue of the Congressional Record lists all lobbyists registered in 1977 with Congress under the 1946 Federal Regulation of Lobbying Act. The list is 55 pages long with, by rough guess, about 2200 names. Though it seems quite extensive, if really isn't.

On closer reading, the list discloses some notable gaps. We looked in vain for General Motors, Exxon, and Mobil Oil. Oh, there were a few biggies, such as the AFL–CIO, the Teamsters Union, and Getty Oil. But nearly all of those registered were small fry. Moreover, with some exceptions, the list didn't say how much money was spent on lobbying, nor for what purpose.

The reason is that the 1946 Lobbying Act contains some loopholes big enough for a congressman to drive a Cadillac through. For instance, organizations are only required to register under the act if their "principal purpose" is lobbying. This major corporations, such as Ford Motor Co., Exxon, and U.S. Steel—all of which lobby extensively are exempt because their principal purpose is something else, like making steel or producing oil.

A study released by Common Cause last month showed that most of the organizations, including the seven largest oil companies, which lobbied on the energy bill in 1977 didn't disclose their activities under the 1946 law. In fact, only one in 10 organizations that lobbied on energy-related matters last year bothered at all to register. And it is perfectly legal. In the future, hopefully, it won't be.

A bill now before the House (H.R. 8494) is designed to plug some of the loopholes in the 32-year-old lobby law. It already has been weakened, however, in the Judiciary Committee, and unless supporters wage a strong fight, the new law won't be worth much more than the old.

H.R. 8494 would eliminate the principal purpose test and replace it with criteria based on how much money an organization spends on lobbying. It would have to register and report lobbying efforts quarterly if it spent $2,500 for a lobbyist. This would go far toward the major problem of identifying those organizations which lobby extensively.

It wouldn't touch the problem, however, of identifying the source of lobbying efforts by nondescript sounding groups. For instance, what is the Calorie Control Council—a group of weightwatchers or soft drink manufacturers? Who does the American Rivers Conservation Council represent—boat owners, conservationists, or barge operators?

A provision, since deleted from the bill in the Judiciary Committee, would have gone far to help as know. It would have required disclosure of the identity of every major financial backer of lobbying groups, i.e., those contributing over $3,000.

Some congressmen have argued that such a provision would impede the first amendment's guarantee of freedom of association. But it would only require disclosure of large contributors. It wouldn't restrict or regulate the amount of contributions in any way.

In the only Supreme Court case to date ruling on disclosure, *U.S.* v. *Harris* (1954) the Court upheld the requirements of the 1946 Act. Its language would apply equally well today: "Congress has not sought to prohibit (lobbying activities)." It has merely provided for a modicum of information from those who for hire attempt to influence legislation or who collect or spend funds for that purpose.

As a minimum, Congress should return the financial disclosure provisions to H.R. 8494 and pass the bill. The public has a right to know who pressures and cajoles our legislators and the reasons why.

[From the Kansas City Times, Apr. 19, 1978]

TEETH BACK INTO LOBBY BILL

Debate is scheduled to begin today in the U.S. House on a lobbying disclosure bill. The turn this legislation takes will reveal a great deal about just how seriously reform is being taken in Washington this spring. Previous action does not bode especially well for a strong bill.

In February the House Judiciary Committee eliminated two key provisions that were in the lobbying legislation as it was intro-

duced. One would have required disclosure of "grassroots" lobbying campaigns in which groups urge citizens to write members of Congress on an issue. More and more interest organizations are turning to this technique because it is an effective way of bringing pressure to bear on lawmakers. Unless this requirement is restored by amendment during debate—as it should be—the American public will be deprived of important information about who is attempting to sway Congress. Generally it is as important to know the source of pressure as it is to know that influence is being brought to bear.

The other requirement that was dropped mandated that lobbying organizations must divulge the names of their financial contributors. Here again is a move by the committee to prevent the citizenry from an opportunity to know precisely who is behind lobbying efforts. This information is absolutely necessary if the legislative process is to be entirely open, as it most certainly should be in a representative democracy.

A legal question has been raised about the requirement on financial contributions, specifically about the right of free association. Nothing in the disclosure provision is intended to limit financial gifts. The objective is to require groups to reveal their large contributors. The present law, weak as it is, requires reports on certain contributions.

The U.S. Supreme Court has upheld this requirement. Part of the decision is persuasive on this basic of a free society. "Congress has not sought to prohibit (contributions)," stated the court in a 1954 ruling. "It has merely provided for a modicum of information from those who for hire attempt to influence legislation or who collect or spend funds for that purpose. It only wants to know who is being hired, who is putting up the money, and how much . . ."

Supporters of reform, including Common Cause, are backing amendments that would put the provisions on contributors and "grassroots" lobbying back into the legislation. The amendment on disclosure would require the reporting of contributions of $3,000 or more a year.

Generally the measure to be debated would require lobbying groups to register, file reports on their activities and list names of individuals who are hired to work in their behalf. As matters stand now, only groups with the "principal purpose" of lobbying are covered. This loophole is so large that hundreds of companies and organizations slip by without disclosure of their expenditures and activities.

This legislation reflects an improved attitude in Congress, even though the Judiciary Committee dropped two significant provisions.

The public has a right to the information that would be available through the provision on "grass-roots" lobbying and disclosure of large contributors. Without them the new statute could be more of a sham than genuine reform.

[From the Macon, (Ga.) News, Mar. 27, 1978]

LOBBY LAW LOOPHOLES OVERDUE FOR PLUGGING

If you want to know who's paying what to pressure your congressman or senator—and often to pressure you—write your representative about House Resolution 8494.

The proposed federal lobby law came out of the House Judiciary Committee late last month with two gaping holes poked in it. These need to be closed, and the rest of the bill protected, as it comes on the floor now.

The present law, 32 years old, has more loopholes than Swiss cheese. It's a joke—on us. Because under it only groups whose "primary purpose" is lobbying have to register and report their expenditures, major corporations that do a lot of lobbying get off unexamined.

As a result huge consumer organizations, the nation's biggest oil companies and an electrical industry body employing 30 full-time lobbyists haven't had to register.

The new law makes a wider net: a lobbyist is any organization that spends $2,500 in a quarter to lobby.

The 1946 lobby law requires lobbyists to report only their expenditures for communicating directly with congressmen. But the big news in lobbying these days is the "grass roots" technique. The AFL-CIO, Common Cause, the National Rifle Association and business groups all use it.

An organization spends huge amounts on advertising or direct mailings urging citizens to write or phone congresmen. A flood of mail descends. Yet the old law doesn't help a congressman to know who is financing the letters.

H.R. 8494 had a clause designed to close this loophole taken out in the Commerce Committee. It needs to be put back on the floor.

So does another provision which would require lobbying organizations to disclose who their major financial backers are. (The "Calorie Control Council" is financed by soft drink makers to work against the FDA saccharine ban.)

We can't know enough about lobbying—a perfectly legitimate activity which is part of the democratic process. Congress has to be convinced of that.●

A DEFENSE ANALYSIS

HON. RALPH S. REGULA

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 25, 1978

● Mr. REGULA. Mr. Speaker, the mayor of North Canton, Ohio, Mr. Dennis Grady, recently called to my attention a paper written by a student in a political science class the mayor taught at Stark Technical College. He was impressed with the paper.

I agree with the mayor's judgment and find the paper a very interesting analytical commentary by a young American on the state of our Nation's defense.

I believe the following paper, written by Jim Nalley of Bolivar, Ohio, expresses a deep concern for our Nation's safety which deserves the attention of my colleagues in the House of Representatives.

The paper follows:

NATIONAL DEFENSE

I've always been an advocate of cutting back on defense spending. I thought by researching this I could cut down our military leaders and advisors who are always begging for more funds. My reasoning being that we should try to solve our other internal problems such as unemployment, Social Security, etc. But, after reading magazine and newspaper articles, portions of books, and selected government publications, I have changed my point of view. Of course, there is still the problem of who to believe, everyone writing their own points of view and using different sources of research. There has been enough written and said though, concerning our military and defensive inferiority to the U.S.S.R. that say the same things with coinciding statistics that I, personally, believe it. It scares me. We won't have our internal problems if we keep on cutting back on defense. The Soviets will have solved them for us.

For fiscal year 1978, 26 cents out of the budget dollar was set aside for national defense. This was done by President Ford who recommended continuation of the growth in defense effort initiated in 1976 after a review of our defense policy. This included production of the B-1 bomber. Well, President Carter has halted production of the B-1. As an alternative, Carter proposes that existing B-52 bombers be equipped with ALCM's (air-launched cruise missiles). ALCM's are less vulnerable to Soviet air defenses and at a cost of under $1 million each, we can afford to buy large numbers of them. This means that launching all ALCM's at one time would overload Soviet air defenses allowing many to reach their target.

On the other hand the B-1 costs about $100 million each and is very vulnerable to Soviet air defenses. But, the B-1 was going to carry the ALCM as one of its weapons. The B-1 is a superior aircraft to the B-52 in every way.

What I'm getting at is, when does playing politics with the people override their safety. The public is critical of any new weapon system because of their memories of Viet Nam which have made them anti-military. But, I think this is caused by the facts necessary for intelligent decisions not being made available to the public. How many people know the real economics behind a weapons system? To make a defensive system against an offensive weapon costs more. The more you can force the Soviet Union to spend on defense the less they have to spend on offensive capabilities. You have to complicate their job of modernizing defense systems. As it is now, the Russians have superiority in every category.

Deterrence seems to be the key. If the U.S. or U.S.S.R. think that by launching a first strike against the other, that a second retaliatory strike would be devastating to their people, then deterrence is intact. But, regardless of the SALT and other agreements, the Soviets have accelerated research and development of defensive and offensive strategic forces.

Detente is effective when both adversaries agree to abide by their agreements and transactions. While we have been telling everyone about detente the U.S.S.R. has been passing us in military superiority. In 1975 the Soviets' armed forces were 109 percent greater than ours.

From 1968 to 1975 our armed forces were demobilized by 40 percent to 2.1 million men, while the Soviets increased theirs 37 percent to 4.4 million. They may have as many as 25 million in the reserves to our 902,000. In total military expenditures the Soviets spent about $143 billion in 1975 and were likely to spend $153 billion in 1977. We requested $101.1 billion for 1977. This doesn't even tell the whole story. 57.3 percent of our defense expenditures was for payroll. The Soviets spent 15 percent for payroll. They can spend 38 percent more on weapons. From 1965 to 1975 Soviet research and development increased 113 percent while ours dropped 26 percent.

In strategic air defense radars the Soviets have 5000 to our 67. In medium range bombers they have 580 to our 66, a 778 percent advantage. In explosive power of nuclear weapons we are behind 2 to 1. In expenditures on strategic forces they were outspending us in 1975 by 60 percent.

I think these statistics have shown what the problem is. The U.S.S.R. has or will have in the very near future the capability of launching an attack on the U.S. without danger of a retaliation that would cripple them. As it is now the Soviets could launch a strike against the U.S., absorb a counter strike, and still have remaining forces sufficient to destroy Chinese and NATO nuclear capability, and attack U.S. population and military targets, and still have explosive pow-

er in excess of ours. All this leads to surrender under such circumstances. Not unconditional but maybe something like staying out of the Middle East and dismantling our remaining strategic forces. It is clear what the end result would be, a totalitarian world.

But, would our leaders even retaliate with the risk of losing tens of millions of lives and the industrial complex? Experts say no, that it would be the most suicidal course to take.

Aleksandr Solzhenitsyn said in a speech after coming to the U.S., "At one time there was no comparison between the strength of the U.S.S.R. and yours. Then it became equal to yours. Now, as all recognize, it is becoming superior to yours. Perhaps the ratio is just greater than unity, but soon it will be 2 to 1. Then 3 to 1. Finally it will be 5 to 1. With such a nuclear superiority it will be possible to block the use of your weapons, and on some unlucky morning they will declare: "Attention. We are marching our troops to Europe, and if you make a move, we will annihilate you. And this ratio of 3 to 1, or 5 to 1, will have its effect: you will not make a move."

Our policy is to prevent nuclear war. By doing this we are giving in to every Soviet wish. By not building our arms up and antagonizing or threatening them. How many Americans know that we have extended considerable economic aid to the Soviets and are providing them with whole factories, food, and technical scientific aid in their space and satellite programs, among others. The Soviets are being aided and abetted by their potential victims. Many recognize this, but conclude that detente is our only alternative to war. This is wrong.

Throughout history, peace has been maintained by clear purposes, military power, and the will to use it. Peace is preserved when potential aggressors know that the rewards are not worth the costs of war. Detente is putting the U.S. in a position of strategic surrender to the Soviets. Americans may have no choice but to bow to nuclear blackmail. But, how soon.

Soviet objectives are to eliminate capitalism. We are the principal embodiment of that social system, which gives them the motivation for launching a first strike. We have no reason nor ever shown a need to attack the Soviet Union. Our objective is peaceful coexistence with each independent state choosing their own future and social system. In contrast, the Soviets have shown that they regard the world struggle as a fight to the finish between two diametrically opposed social systems. It is a fight, though, the Soviets intend to win.

The Soviet Union does not want to destroy America. Our industries and farmland is much too valuable to them. They just want to cripple us into submission. The Soviets have the capability to launch a first strike against our defenses and military bases that would kill 5 or 6 million people, destroy our strategic forces, and leave 99 percent of the industry undamaged. This is made easy because our military bases are built away from our largest cities.

This brings up civil defense. The Soviets since 1950 have been steadily upgrading and improving their civil defense. They have built enough adequate bomb shelters to save a high percentage of lives important to the administration of the country. These have been and are being stocked with enough food and supplies to sustain them until the fallout has decreased to a safe level. They have built their factories in outlying areas and dispersed them to make it harder for us to destroy them. Civil Defense is a branch of their armed forces which would provide for organization in the event of a surprise attack.

What are our civil defense precautions? Naturally, we can't move all our factories from the clusters that they now operate. We don't have an organized civil defense procedure to follow. I don't know of any shelters where I could expect to live for an extended period of time. But, I don't know if I would want to survive. What would be facing us upon emerging from the shelter? Would it be complete devastation? Nothing would ever be the same. Would we be overrun by the Russians or just left to try to rebuild? We would have no allies, with Russia threatening annihilation to anyone providing assistance. Naturally, if we wanted to stay alive, we would succumb to the Communists. I would rather be dead.

I guess what I have been trying to show is the delicate balance that exists, or maybe imbalance. This country needs a national defense policy to be adhered to regardless of who or what party is in office. We have the money and technology to reestablish the U.S. as the most powerful nation in the world, and in a short amount of time. I wonder what would happen now if the Soviet Union started building missile sites in Cuba. If our cutbacks are continued, sooner or later there will be no need for a nuclear war. The Communists will rule the world by simply the threat of annihilation and devastation. We need to educate our people of the true facts and objectives of the U.S. compared to Soviet goals. But, and I am sad to say, nothing will be done until a crisis happens. Then it will be too late. Isn't that the American way of doing things?

The End??●

SENATOR METZENBAUM OFFERS GOOD ADVICE

HON. PAUL SIMON

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 25, 1978

● Mr. SIMON. Mr. Speaker, ordinarily I believe it is not a good practice to reprint things that have already been in the CONGRESSIONAL RECORD.

But in the event that some of my colleagues did not read the remarks of Senator HOWARD METZENBAUM in the CONGRESSIONAL RECORD of March 21, I'm taking the liberty of inserting a portion of those remarks.

Senator METZENBAUM very effectively calls into question our whole practice of paying farmers not to produce.

I hope some of my colleagues will read his remarks.

The remarks follow:

GLOBAL FOOD PROBLEMS AND THE TALMADGE FARM BILL (H.R. 6782)

* * * Mr. President, I believe that there is something deeply wrong about paying American farmers not to produce. I believe that it is a tragedy that our farmers are suffering as a direct result of their success in responding to the need of a still-hungry world for additional food production * * *

A few short years ago, in 1974, I attended the World Food Conference in Rome. That Conference, called in response to the potential disasters that confronted the world in 1972 and 1973, seemed at the time to offer the hope that a process could be set in motion to create an effective international approach to a common problem for all humanity * * *

Mr. President, the world food shortage is over, but is only over for now. The bumper crops for the last few years represent merely short-term increases in the food supply. The 2.5 percent annual rate of growth achieved worldwide in the 1970's falls well below the 4 percent growth rate recommended by the World Food Conference.

Current world food stocks—now about 14 percent of annual consumption—are still well below the 17 to 18 percent designated by the United Nations Food and Agriculture organization as the minimum "safe level". Current stocks are, in fact, comparable to what they were in 1972–1973, when poor weather and massive crop failures in the Soviet Union caused a rapid depletion in world reserves.

In making the steps proposed by this bill (HR 6782), we will remove 31 million acres of American land from production.

These steps are inevitable. They may be necessary. They are certainly sufficient to make a major, positive impact on farm income. But we must face the fact that they involve real and substantial risks for this country and for the poor of the world * * *

Mr. President, I believe that our incomparable agricultural potential can and should be fully harnessed in the cause of ending hunger and malnutrition in our own country and in the world at large. The prospect that people anywhere in the world will go hungry while our farmland lies idle is unacceptable to me, and I am convinced, to the farmers of America * * *●

CONTRIBUTIONS TO JIM HENSEVELT

HON. IKE SKELTON

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 25, 1978

● Mr. SKELTON. Mr. Speaker, those of us who are involved in the business of the Federal Government here in Washington know full well the importance of having dedicated and competent officials hard at work in local communities. Many of the most creative pieces of legislation coming out of Washington have their origins in the experiences of smalltown mayors, city councils, and city managers. We depend on input from these officials in order to identify the needs and desires of the people in their communities.

I mention this today because I would like to single out one outstanding official from my hometown of Lexington, Mo., who has recently retired from public life. Jim Hensevelt has just completed his second term as mayor of Lexington. Prior to that, he was a city councilman for 6 years. But cold numbers like that cannot begin to tell the story of what he has done for the community. In 1974, Jim retired at the end of his first term as mayor. However, he had done such a good job that the people just would not let him go. He was reelected in 1975 by a write-in ballot.

Jim Hensevelt is a lifelong resident of Lexington. His father, Ben, still lives in Lexington. In 1946, Jim married Betty Robertson. They have two children, Carol Hensevelt, of Victoria, Tex., and Steven Hensevelt, of Lee's Summit, Mo.

Jim served with the Air Force in World War II as a ball turret gunner in Italy. He answered the call to colors again in the Korean conflict, serving on the island of Okinawa.

As a citizen, Jim Hensevelt has served the community in many capacities. He

served on the State Finance and Revenue Commission for the Missouri Municipal League. Recently he was appointed to the Missouri Housing and Development Commission by Gov. Joseph Teasdale.

This month, Jim Hensevelt stepped down as mayor of Lexington. I am sure that history will prove that he was one of the best mayors Lexington ever had.●

OUR DOOR IS OPEN TO SPIES

HON. BOB WILSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 25, 1978

● Mr. BOB WILSON. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following:

OUR DOOR IS OPEN TO SPIES

(By Marvin Stone)

Many people—and too many officials—in this country think of Soviet spying as a bugaboo of the past. That, in our view, is a dangerous mistake. Soviet espionage is not just a bugaboo. Nor is it a thing of the past. It is a present and growing threat to our security.

The fact is: The Soviet Union and its Communist allies are flooding the U.S. with more spies now than ever before—more, even, than in the cold-war days when Communist spying was taken far more seriously than it is today.

This phenomenal increase is occurring at a time when American counterintelligence is a shambles. The Central Intelligence Agency and the Federal Bureau of Investigation have been so weakened and their operations so tightly curbed that there is serious concern about their ability to cope with the spying upsurge.

In the last five years, the number of officials from nations of the Soviet bloc stationed in the U.S. has increased by more than 50 percent—up from 1,383 in 1972 to 1,898 this year. No fewer than 1,266 of those are Russians.

That is only part of the story. There also has been an enormous expansion in the number of visitors coming here from the Soviet Union. This is the result of the numerous exchange agreements between the U.S. and Russia that were signed in 1972 with the opening of the era of so-called détente. The number of Soviet visitors has nearly doubled, increasing from 6,344 in 1972 to roughly 12,000 last year.

On top of that, the FBI reports that each year more than 20,000 Soviet seamen are permitted to come ashore in numerous American ports visited by their ships. Intelligence experts are convinced that a large percentage of these Communist officials and visitors act as spies, either on a full-time basis or on special assignments. We are told that there are as many as 5,000 Russians in this country every year who are agents of the Soviet secret service, KGB, or who are somehow connected with it.

Not only has the number of potential spies increased, but the softening of restrictions accompanying détente has made their work easier. Limits on travel of Soviets inside the country have been removed or relaxed. Scientists and technicians here on exchange visits are given access to plants and places from which they would have been barred a few years ago. The laxness of security in American plants handling sensitive defense contracts is described by informed officials as "appalling."

It's not only military secrets the Soviets seek. Industrial, scientific and technological secrets have become major targets. And the doors have been opened to them by the exchange programs. U.S. officials have compiled a voluminous file of secrets stolen by the Soviets.

Another lucrative area the Soviets are trying to penetrate is Congress. The targets there are the staff members employed by lawmakers and committees. Many of them have access to highly sensitive information. These staffers are routinely given easy "security clearance" by an FBI reluctant to antagonize Congress. There is concern about some staffers' discretion in guarding the information they possess.

What can be done about all this?

One suggestion: Tighten up on the exchange programs, limit the number of Soviet visitors and their access to target areas.

The State Department argues that the exchanges are important in cementing Soviet-American relations. But their real value to American interests is open to challenge. Where is there evidence that they have influenced Soviet behavior?

Another proposal: Deny security clearance—and thus deny defense contracts—to firms that do not take adequate security measures.

But the one thing that is of paramount importance is to quit punishing our counterintelligence agencies for past misdeeds by crippling their ability to cope with spies.

National security is too important to be sacrificed to a spirit of revenge.●

TRIBUTE TO THOMAS NELLIGAN

HON. RONALD A. SARASIN

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 25, 1978

● Mr. SARASIN. Mr. Speaker, occasionally in life one has the good fortune to encounter an individual whose character and integrity, perseverence and good will enrich the lives of all he touches to surpass even his greatest contributions. One such individual is Mr. Thomas J. Nelligan of Ansonia, Conn., who will be retiring on April 30 after 44 years of dedicated service to his company, Uniroyal.

Since his early days as mayor of Ansonia, Mr. Nelligan's endless generosity and continuous involvement have left the community with many invaluable contributions for which he will always be remembered. In the course of his 44 years at Uniroyal, the last 8 of which he served as industrial relations manager, his unselfish giving and fine counsel have earned him the respect of all his colleagues. Through his involvement in the church, the hospital, the many redevelopment projects of the city and as member of various industrial councils, he has had a decisive impact on the development of the entire region and its people, improving the quality of life for all. Always determined, always dedicated, and always keeping the interest of his fellow man at heart, Mr. Nelligan has earned the high regard and esteem of the entire community.

It is, therefore, with great pride and pleasure that I commend to my colleagues the many outstanding achievements of this gentleman and join with his community in applauding his years of selfless efforts to improve living and working conditions for all. I join them in wishing him many years of health and happiness, fully confident that his commitment to community involvement will continue long into retirement.●

"PRELUDE TO HOLOCAUST"

HON. FREDERICK W. RICHMOND

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 25, 1978

● Mr. RICHMOND. Mr. Speaker, I would like to bring to the attention of my colleagues two recent newspaper articles of unusual poignancy which, taken together, provide a chilling perspective on issues now confronting Israel and the western democratic world.

An excellent article in the Washington Post of Sunday, April 16, 1978: "Prelude to Holocaust" by Peggy Mann, recounts the now forgotten conference held at Evian-les-Baines, France, at which the free nations of the world failed to stand against the growing wave of Nazi terror in 1938.

During the 1930's and 1940's, the national policy of Nazi Germany was directed toward systematic persecution and extermination of the Jews. That policy resulted in the slaughter of 6 million human beings whose only crime was the fact that they were Jews.

But we must recall, too—painful as those memories are—that the nations of the free world, the United States included, failed to open their doors to the persecuted Jews of Germany and Austria before it was too late.

The purpose of the Evian Conference was to provide asylum for these imperiled people. A temporary haven was all that was required at the time to save virtually all of the 500,000 Jews in Germany and Austria. Acceptance of these refugees was well within the combined resources of the 32 nations attending the Evian Conference.

Whether through bigotry, indifference or political inertia, this critical act of compassion was not forthcoming. At no time during that tragic period in the history of civilization did the world act decisively to oppose the horrors being perpetrated by the Nazis.

Failure to confront and counter Nazi persecution encouraged it to proceed and to increase in scope. The Nazis concluded that "nobody gave a damn about the Jews," and that they were merely working the world's will. The result of silence and inaction in the face of organized evil was to seal the doom of European Jewry.

I commend this article to my colleagues. Its message is clear: Not only must people of conscience speak out against persecution, but free world governments must act against those who would employ terror as an instrument of policy and victimize an entire people by design.

My colleagues will also be interested in a sensitive and powerful article from

the New York Times of March 16, 1978 by Cynthia Ozick, "Letter to a Palestinian Military Spokesman." The writer reflects on the death of Imri Tel-Oren, her 14-year-old cousin, who was brutally slain with over 30 other civilians by Palestinian terrorists near Tel Aviv.

This article brings into stark relief the continuing struggle of the Jewish people against terror and persecution more than 30 years after the fall of the Nazis. Ms. Ozick's telling letter gives us a unique sense of continuity with respect to the tactics of totalitarianism, whether employed by Nazis in the 1930's and 1940's, or by the PLO in the 1970's.

Again, it is imperative that we recognize the need for free people everywhere to stand in forceful opposition to terror and its perpetrators. Today, just as in 1938, silence and inertia—now reinforced by the lure of petrodollars—make it convenient for some to avoid confronting terrorism and the unholy alliance of Arab dictatorships and totalitarian states that instigate, abet and profit by terrorism.

We must remember, as the conference at Evain demonstrated, that indifference in the face of oppression and murder compromises all decent people. It can only increase the likelihood of continuing outrages of the sort that robbed the world of 14-year-old Imri Tel-Oren, and serve as a prelude to even greater abuses of humanity.

PRELUDE TO HOLOCAUST

(By Peggy Mann)

EVIAN-LES-BAINS, FRANCE.—I stood on a lawn overlooking Lac Leman where tiny sailboat triangles moved slowly through the evening. Behind me rose the white splendor of the Royal Hotel. It was a setting epitomizing peace, well-being. Yet, this is the place where, in July, 1938, the holocaust—the murder of two-thirds of Europe's Jews—could have been halted.

Here, in the famed French resort, 15 weeks after Hitler annexed Austria, delegates from 32 nations met to determine how they could rescue the Jews of the Greater German Reich, help them to reestablish their lives elsewhere.

Never before in history had nations of the world gathered together for the single purpose of saving a doomed people. "Nations of Asylum" they called themselves.

The conference had been organized by President Franklin D. Roosevelt, who appointed Myron C. Taylor, former president of U.S. Steel, as his special ambassador. All of the delegates were important men: three ambassadors, three ministers, 13 envoys and 13 other diplomats of high status. They settled into their luxurious suites at the Royal Hotel buoyed by the aura of expectancy and good will which news of the conference had engendered.

Reporters from the 32 nations attended. Two days before the opening of the conference, Anne O'Hare McCormick wrote in The New York Times: "It is heartbreaking to think of the queues of desperate human beings around our consulates in Vienna and other cities waiting in suspense for what happens at Evian. But the question they underline is not simply humanitarian. . . . It is a test of civilization. . . . Can America live with itself if it lets Germany get away with this policy of extermination, allows the fanaticism of one man to triumph over reason, refuses to take up this gage of battle against barbarism?"

Who were these "Nations of Asylum?" Argentina, Australia, Brazil, Colombia, Denmark, the United States, Great Britain and her Commonwealth countries, France, Belgium, Sweden, Norway, the Netherlands, Switzerland, nations of Latin America and Africa. Only two countries, Italy and South Africa, turned down the invitation, but South Africa sent an observer.

There also was a contingent of uninvited observers: Nazis. No one knew quite what to do about this, so they were allowed to remain. They showed up at every session, most of them dressed in mufti. And they took careful notes during all the proceedings.

Also attending were top officials of 39 refugee organizations, including 20 Jewish organizations, who had come to present the delegates with eyewitness accounts, reports, statistics, all of which culminated in one irrefutable conclusion: the Jews of Hitler's Reich were doomed unless they could get out of Germany and Austria.

And they *could* get out—then. Indeed, the official German policy in 1938 was to make the Reich *Judenrein*—purified of Jews—by getting the Jews out. There was only one problem. Who would let the Jews *in*?

A sad joke was making the rounds in the Reich. A Jew goes into a travel agent; he wants to take a trip. The agent sets a globe on the counter before him. "There. The world. Choose." Slowly the Jew turns the globe, studying it carefully. Finally, he looks up and says: "Have you got anything else?"

There was, in fact, only one spot in the world where Europe's Jews *were* welcomed. Palestine. At least they were welcomed by the Jews of Palestine, not by the Arabs of Palestine. And not by the British who held a League of Nations mandate to rule over Palestine. Just prior to the Evian Conference, the deputy head of the British delegation, Sir Michael Palairet, succeeded in winning a promise from Taylor that the world's most eloquent spokesman for increased Jewish immigration to Palestine, Dr. Chaim Weizmann, would not be allowed to speak. Not only was Dr. Weizmann an eloquent spokesman, he also was the most official spokesman the Jewish people had. He was president of the World Zionist Organization and president of the Jewish Agency, the widely recognized government of the Jewish people. A 40-year-old woman named Mrs. Golda Meyerson (Meir) had been sent to Evian by the *Yishuv*, the Jews of Palestine, because of her direct forcefulness as a speaker. But she also was not allowed to speak.

A heated debate took place during the first 2 days of the conference. The subject: which of the three main powers, the United States, France or Britain, should chair the proceedings. It was finally decided that the honor should go to the United States.

Then the representatives of the 39 refugee organizations were heard. All of their presentations were scheduled for a single afternoon. Each representative was given 10 minutes. As the afternoon wore on, the time allocated was cut to 5 minutes. The World Jewish Congress, which represented 7 millions, had 5 minutes. The Association for Aid to German Scientists had 5 minutes. The delegation of Jews of the Reich did not receive any time at all. They were told to submit a written memorandum to be included in the minutes.

HORRORS IN AUSTRIA

In the limited time at their disposal, the advocates of Jewish survival detailed horrors which had been happening for the past 3 months in Austria: tens of thousands of Jews thrown into concentration camps . . . men, women, even small children cornered on the streets, beaten, kicked, whipped by black-booted SS men . . . rabbis sent to clean the SS toilets . . . Jewish women forced down on their knees to scrub the gutters, often with acid added to the scrub water . . . throughout the country civilians "cooperating" with the SS by beating up Jews, evicting them from their flats, breaking into Jewish shops and homes, carting out anything of value. The explosion of terror and sadism even exceeded what had been seen in Germany.

Newspaper reports also were distributed to the Evian delegates. For example, two weeks before Evian, The London Times Vienna correspondent had written about "the constant arrest of the Jewish population. No specific charge is made, but men and women, young and old, are taken each day and each night from their houses or in the streets and carried off . . . There can be no Jewish family in the country which has not one or more of its members under arrest. The state of hopelessness and panic which is engendered can be imagined . . ."

In Austria, it had been happening for 3 months, since Hitler took over that country. In Germany it had been happening for 3 years, starting officially with the Nuremberg Laws of Sept. 15, 1935. The German Jew was not recognized as a citizen. All Jews in the civil service had been fired. Jewish teachers had been fired. Jews were excluded from the entertainment industry, from journalism, radio, the stock exchange, law. Indeed, by 1937, half the Jews in Germany were unemployed. And signs had started appearing throughout the county, signs on butcher shops, dairies, groceries, pharmacies: No Jews Allowed. Thus, in many towns, Jews could not buy milk for their children, medicine for their sick. Jewish children had to attend segregated schools and even kindergardens bore the signs: Jewish Scum, or Cursed Be the Jew.

Meanwhile, a brand new First Reader had been issued for small German Aryans. In the section on religion, for example, the youngsters read: "Remember that the Jews are children of the devil and murderers of mankind. Whoever is a murderer deserves to be killed himself."

A month prior to the Evian Conference, the Great Synagogue of Munich was destroyed on Hitler's personal orders, followed by the destruction of synagogues in Nuremberg and Dortmund. Two weeks before the conference, 15,000 Jews were arrested throughout Germany, sent to concentration camps. In Buchenwald, Jews were whipped, tortured in the daytime. And all through the night a recorded voice kept shouting through the loudspeaker: "Any Jew who wishes to hang himself is asked first to put a piece of paper in his mouth with his number on it, so that we may know who he is."

Today, when asked how many of the 6 million annihilated Jews came from Germany and Austria, most people answer, 3 million, 4 million or more.

The fact is that at the time of the Evian Conference there were only 350,000 Jews in Germany and 220,000 in Austria. The 32 "Nations of Asylum," many of which had vast areas of unpopulated lands, could easily have agreed to save every Jew in the Greater German Reich? How many did they agree to save?

WHAT THE U.S. DID

Taylor was the first to speak on the subject. His words were awaited with great anticipation. Not only had the conference been called by the American president, but, in his opening address, he had exhorted the delegates to uphold "those principles which we have come to regard as the standards of our civilization."

Some delegates wondered whether the United States would agree to accept all the Reich's 570,000 Jewish refugees. (A generation later, the United States accepted 585,000 Cuban and Vietnamese refugees, with no noticeable ill effects on the economic life of the nation.)

Carefully, Ambassador Taylor explained that the United States had its quota system which could not be changed. However, an important new step now would be taken. Al-

though the total German quota was 25,957 per year, it so happened that a total of only 27,000 Jews had been admitted to the United States during the past 6 years. (This had been brought about through a number of factors. They ranged from a "roadblock" set down by President Herbert Hoover in 1932 with the intent of discouraging immigration to the depression-ridden United States to the outright anti-Semitism of certain local U.S. consuls who made the on-the-spot decisions as to who should be granted visas.) Although, said Ambassador Taylor, unused quotas of previous years could not be used in subsequent years, U.S. consuls were being advised that the severe restrictions they had imposed upon Jewish refugees should be lifted for the current year, so that the full quota of 27,730 German and Austrian immigrants would be admitted each year. (This included, of course, any Christians who wished to come.)

There was a stunned silence as the ambassador sat down. *This* was the great gesture of hope and help offered by the nation populated by immigrants, the nation which for generations had offered asylum to Europe's oppressed?

Why had Roosevelt called the conference if this was the example the United States planned to set? Countless polls had shown that Americans, on the whole, were dead set against any increase in immigration quotes On the other hand, the Nazi annexation of Austria had brought about increased pressure from many organizations, congressmen and reporters (notably Dorothy Thompson) for a State Department action to aid the refugees. According to an internal State Department memorandum, the Evian conference would enable the United States to "get out in front and attempt to guide the pressure, primarily with a view toward forestalling attempts to have the immigration laws liberalized."

Roosevelt sincerely hoped that at the Evian conference, large underpopulated countries would accept the Jews of the Reich. Indeed, he previously had proposed this idea to Brazil.

The United States was only the first nation to be heard from. There were 31 others, some of them the largest and least populated countries in the World. Surely *they* would find room for the refugees: Canada, the second largest nation in the world; Brazil, the fifth largest; Australia, the sixth largest. Between them they could easily absorb all the half-million would-be refugees.

The delegate from Canada explained that Canada could accept only experienced agricultural workers. (Columbia, Uraguay and Venezuela, it turned out, also had the same immigration restriction.)

What of the vast and underpopulated nation of Brazil? When inviting countries to the conference, the U.S. State Department had made it clear that no country "would be expected to make any change in its immigration legislation." And just before coming to the conference, Brazil had enacted a brand new law—henceforth, every visa application must be accompanied by a certificate of baptism. So, unfortunately, Brazil could not accept any Jews at all.

The entire continent of Australia had a population of the city of London today. "Populate or perish" was a popular Australian slogan. Politicians were warning that if Australians did not populate their own 3 million square miles, some one else would do it for them. Yet, the Australian delegate, Lt. Col. J. W. White, minister of commerce and customs, explained that Australia could accept only 15,000 Jewish immigrants over a 3-year period. "As we have no real racial problem, we are not desirous of importing one." (Actually, from 1933 to 1943, only 9,000 entered the country.)

The British delegate had similar worries. A rush of Jewish refugees from the Reich "might arouse anti-Semitic feeling in Great Britain." Nor did the British colonial empire contain territory suitable for the large-scale resettlement of the refugees. (No mention was made of Palestine.)

The French delegate announced that his country had already taken in 200,000 Jews and "had reached the saturation point."

Nicaragua, Costa Rica, Honduras, all classified intellectuals and merchants as undesirables. Unfortunately, half the Jews in Germany and Austria fell into the "intellectual" category: doctors, lawyers, professors; most of the rest were businessmen.

The Swiss delegate spoke about the "inundation" of Jewish refugees after the fall of Austria to Hitler. Three or four thousand had already fled across the border, and unless the flow stopped, he warned, "Switzerland, which has as little use for these Jews as has Germany, will herself take measures to protect Switzerland from being swamped by Jews with the connivance of the Viennese police."

And so it went during the final days of the conference. One delegate after another rose with a similar message: The situation for Jews in the Reich was, indeed, horrendous. Unfortunately, his country's laws prevented any concrete aid. But he was certain that other nations would open their doors.

Three small countries did express willingness to help. Holland, the most densely populated of the Evian nations, with some 800 people per square mile, had already taken in more than 25,000 Jewish refugees, but offered itself as a country of temporary asylum. (The Germans invaded 2 years later, and by the end of the war, 75 percent of the Jews in Holland had perished.)

The Danish delegate stated that his overcrowded country would continue to accept refugees. (And Denmark took in—and protected—1,500 Jews.) The Dominican Republic announced it would settle 100,000 refugees. (However, due to innumerable roadblocks, only 500 found a home there.)

Even the positive proposals put forth by these three small nations at Evian were drowned out by an official resolution passed unanimously on the final day of the conference: "The delegates of the Countries of Asylum are not willing to undertake any obligations toward financing involuntary immigration." In simpler words, only Jews who could afford to pay their way would be accepted. Since it had been clearly brought out at the conference that no Jew was permitted to leave Germany or Austria with more than 10 Reichsmark—less than $5—that single resolution made every Jew from Germany and Austria officially and automatically unacceptable to "the Countries of Asylum."

Furthermore, at the request of some of the South American delegates, "contentious allusions" to the Third Reich were omitted in the final resolution.

The delegates then appointed a committee to study the matter further: The Intergovernmental Committee on Refugees. The director was an American lawyer, George Rublee, a friend of FDR. The committee set up headquarters in London.

1938 GERMAN POGROM

On Nov. 9 and 10, four months after Evian, came the Kristallnacht (crystal night, so-called after the glass that littered the streets from the windows of Jewish homes and businesses), the ghastly government-sponsored campaign of arson, mayhem and terror aimed exclusively at Jews and carefully organized throughout every village, town and city of Germany and the country which had been Austria. Some 267 synagogues and congregational buildings were razed, and 7,500 Jewish shops were damaged, virtually the entire number which remained in the Reich prior to Nov. 9. A few Jews were thrown out of apartment house windows and from moving trains. Some were shot while trying to escape. Nearly 30,000 Jewish men between 16 and 18 were arrested on Nov. 10 and sent to concentration camps, 10,911 to Dachau, 9,845 to Buchenwald and 9,000 to Sachsenhausen.

In the villages, Nazi gauleiters held competitions to see which community should be "purified" of Jews first. Men, women, even small children were dragged from their homes, driven and whipped through the streets. Some were tethered to horse carts, their bodies pulled down country roads. Some were tied up and thrown into rivers. A few were hung. Official German figures listed 33 German Jews killed. But reporters and diplomats counted many more Jews murdered.

The Kristallnacht was the worst pogrom the modern world had, as yet, known, and outrage replaced apathy as tens of thousands of citizens of the Countries of Asylum petitioned their governments to immediately open their doors to the imperiled Jews of the Reich Britain took in 9,000 Jewish children; Holland took in 1,700; Belgium accepted several hundred more. And George Rublee felt that now, finally, the time had come. Now the 32 nations must act. He put forth a simple plan. Each of the 32 nations should at once accept 25,000 Jews.

If only half the 32 nations had agreed, every Jew in the Reich could have been saved.

None agreed.

Four days after the *Kristallnacht*, Rublee wired Secretary of State Cordell Hull: "The attack on the Jewish community in Germany on the one hand and the indifference of the participating (Evian) governments to the fate of the victims on the other has brought the affairs of the Intergovernmental Committee to a critical state where, in our opinion, immediate action is required if the president's initiative is to lead to a positive result . . .

"With the exception of the United States, which has maintained its quota, and the British Isles, which are admitting immigrants at a current month's rate equal to the rate immigrants are being admitted to the United States, doors have been systematically closed to involuntary emigrants since the meeting at Evian."

Indeed, during the four months since the Evian Conference some of the nations of asylum, including Argentina, Mexico, Chile and Uruguay, had adopted new and even more restrictive immigration regulations, specifically designed to keep out Jews.

On Nov. 15, the day after Rublee's urgent cable to Hull, President Roosevelt held a press conference. His prepared statement on the *Kristallnacht* included the realization that: "The news of the past few days from Germany has deeply shocked public opinion in the United States . . . I myself could scarcely believe that such things could occur in a 20th century civilization."

When a reporter asked whether the president would recommend a temporary change in the immigration laws so that more refugees would enter the United States, he replied that no snch changes were being considered.

Was the United States contemplating breaking trade relations with the Third Reich?

"No," said the president.

Similar reactions were forthcoming from other "Evian nations." Most of the nations of asylum expressed their strong disapproval of the *Kristallnacht*. But none modified their immigration laws so that the Reich's half-million Jews could be saved.

GERMAN REACTION

What if the Evian Conference had proceeded according to the desperate hopes of European Jewry? What if the delegates of the Nations of Asylum had stood up, one after the other, to announce their nation's horror at what was happening to the Jews of Germany and Austria? What if each nation at

Evian had immediately agreed to take in 17,000 Jews at once? Every Jewish man, woman and child in Germany and Austria could have left for a new homeland.

But, as Golda Meir later wrote, "After the conference at Evian-les-Bains, it became chillingly clear that the Jewish people were entirely 'on their own.' "

The Evian Conference took place 8 months before Germany's annexation of Czechoslovakia, 14 months prior to the Nazi invasion of Poland and the outbreak of World War II. During all those strategic months, it was only the Reich's 570,000 Jews who were in dire danger. Their lives, in any case, would have been saved.

Could the holocaust have been halted at Evian? No one can second-guess history. But after a staunch expression of world opinion regarding the horrors being perpetrated on the Jews of the Reich—world opinion backed by world action—it seems almost inconceivable that Hitler would have proceeded with his "final solution to the Jewish problem."

What is certainly clear is that, in Hitler's view, the Evian Conference gave him carte blanche to go ahead.

Just prior to the conference, Hitler had said in a speech at Konigsberg. "I can only hope and expect that the other world, which has such deep sympathy for these criminals, will at least be generous enough to convert this sympathy into pratical aid. We, on our part, are ready to put all these criminals at the disposal of these countries, for all I care, even on luxury ships."

In a speech made immediately after the conference, Hitler derided "the other world" which "is oozing sympathy for the poor, tormented people, but remains hard and obdurate when it comes to helping them."

The Danziger Vorposten summed up reaction in Nazi newspapers in a single sentence: "The Evian Conference serves to justify Germany's policy against Jewry."

After the conference, when French Foreign Minister Georges Bonnet informed Germany Foreign Minister Joachim von Ribbentrop that France's great interest in the Jewish problem was "not to receive any more Jews," Ribbentrop replied with understanding, "We all wish to get rid of the Jews. But no country wishes to admit them."

On Oct. 14, 1938, the French wrote an explanatory memorandum to the German Foreign Ministry about the intergovernmental Committee on Refugees which had been born at Evian. This document stressed the purely humanitarian function of the committee, and reassured the Germans that "none of the states would dispute the absolute right of the German government to take, with regard to certain of its citizens, such measure as are within its own sovereign powers."

Hitler then informed the South African defense minister, Oswald Pirow, "We shall solve the Jewish problem in the immediate future. . . . The Jews will disappear."

On Nov. 22, 1938—4 months after Evian—a front page article appeared in Das Schwarze Korps, official newspaper of the Gestapo: "Because it is necessary, because we no longer hear the world's screeching and because, after all, no power on earth can hinder us, we will now bring the Jewish question to its totalitarian solution." Steps toward the final solution were outlined, concluding with the sentence: "The result would be the actual and definite end of Jewry in Germany and its complete extermination."

There are few people today who even remember the momentous conference which, perhaps, more than any other single factor underwrote the death warrant for 6 million European Jews. However, when I visited Evian last summer, I did find one man who remembered: Rene Richler, the elderly concierge at the Royal Hotel. He was a concierge then, at the time of the conference.

"Oh, yes," Richier told me, "I remember the Evian Conference well. Very important people were here and all the delegates had a nice time. They took pleasure cruises on the lake. They gambled at night in the casino. They took mineral baths and massages at the *Etablissment Thermal*. Some of them took the excursion to Chamonix to go summer skiing. Some went riding; we have, you know, one of the finest stables in France. Some played golf. We have a beautiful course overlooking the lake. Meetings. Yes, some attended the meetings. But, of course, it is difficult to sit indoors hearing speeches when all the pleasures that Evian offers are waiting right outside."

[From The New York Times, Mar. 16, 1978]

LETTER TO A PALESTINIAN MILITARY SPOKESMAN

(NOTE.—A Palestinian military spokesman in Beirut said the attack had been carried out by members of Al Fatah, the largest guerrilla group in the Palestine Liberator Organization. He asserted that 33 Israeli soldiers had been killed in the attack.)—The New York Times, March 12, 1978.

(By Cynthia Ozick)

Dear Palestinian Spokesman:

When you say that your friends killed 33 Israeli soldiers in last weekend's terror attack on the road near Haifa, do you mean my cousin Imri? Your friends shot him in the throat. He was not a soldier. He was 14 years old, and played the clarinet.

Now I am not sure what the mentality of a terrorist might be, since unlike you, I have never had one for a friend; but it seems logical to assume that if you have murdered someone, you might like—even if only out of idle curiosity, but especially out of ideology—to know something about the life you have taken. So please let me tell you a little bit about my cousin Imri. I promise you it won't occupy much of your time, because if someone is murdered when he is only 14 years old, how much can there be to tell?

In fact, Imri's life was so brief, and there was so little he ever had a chance to do, that I might as well begin with his grandfather and grandmother.

Imri-grandfather is a poet, a lover of the English Romantics. He has won some fine prizes for his work (including the Brenner Prize, named after an early Zionist who vowed that Jews were no longer going to be murdered just for being Jews), and he has translated Walt Whitman into Hebrew; but he is rather elderly now, so these days he mostly sits in his little garden reading Wordsworth and Keats and Shelley and Blake.

The garden is rather special. It is in the backyard of a house not far from the Lod airport (where some of your other friends murdered a group of Christian pilgrims not so long ago.)

When Imri's grandparents built the house—a simple concrete cube filled with volumes and volumes of poetry—it was entirely surrounded by sand. But Imri's grandmother, though very frail, put down seeds and nourished and raised up her "babies"—a whole orchard of flowering fruit trees.

Every morning very early Imri's tiny grandmother climbs a shakly ladder to reach up to each young pear, which she patiently and meticulously wraps in a little paper bag. It looks pretty comical—a paper-bag tree!—but Imri's grandmother will not spray the trees with insecticide; she does not want to kill the insects, who also have a right to live. Imri's grandparents are vegetarians, and so was Imri, and so are his parents and all his brothers and sisters and aunts and uncles. You see, they do not like to take life.

Imri's mother and father are passionate musicians. They play first and second flute in the Jerusalem Symphony—or at least they did until last weekend, because Imri's father may never play again. One of your friends blew up his hand. In the hospital at Haifa they are trying to patch together some of it with bone grafts; soon they will know whether the nerve will die. (Imri's brother Nir is luckier; it was only his leg that was wounded. He lost a lot of blood but he is all right.)

About two years ago, Imri's father came to America for a time to teach flute at Ithaca College. It was hard to tell which he loved more—music or his students. Tears fell from him when the term drew to an end and he had to say goodbye. When he heard or played music he seemed illuminated: "Isn't this beautiful?" he would murmur. All of Imri's six brothers and sisters are musical. They play all sorts of instruments, and the beauty flies out of their hands.

Imri's oldest sister, Anva, a dancer, just had her second baby, and so what happened was this: Imri and his brothers Nir and Adiel and his little twin sisters Vivi and Cori and their parents all piled into the family car to drive up to Haifa to see the new baby. After the visit, they were on their way home to Jerusalem, just behind a bus, when your friends started throwing grenades and shooting at them, at first on the road itself and then from inside the bus. When Imri's father, who was driving, got hit, Imri's brother Nir managed to grab the wheel and save his family, even though his leg was streaming blood. In the horror of the explosions and the pursuit it was a little while before anyone realized that Imri was dead.

All right, now about Imri himself.

He was mainly a quiet boy, private as some adolescents like to be, and a good student. Until not long ago he was still quite small, but in the last few months his family had begun to marvel at how he was springing up. He was going to be tall, like his father. He was fond of stamp-collecting, and when his mother toured with the orchestra she always brought back interesting foreign stamps for him. His instrument was the clarinet; he was a member of a youth orchestra in Jerusalem. He used to grumble over his clarinet because it was second-hand and somewhat woebegone; but only two days before your friends killed him he had the delight of learning that he was going to get a better clarinet.

And that is about all I can tell you about your victim Imri. I warned you it wouldn't amount to much. The main thing, you know, is that he was never going to kill anyone or anything—not even a fish or a chicken, much less a fellow human being. He was only going to make beautiful sounds on his clarinet.

Imri's grandfather, when he was not much older than Imri during the First World War, used to write pacifist poems; and once after the 1948 war he began a lyric about Bialik, the Hebrew poet, that in the most natural way turned into a prayer for fraternity between Arabs and Jews. And after that Imri's grandmother kept on growing trees and flowers in what used to be sand, and Imri's whole family kept on sending music, one of the languages of peace, up into the Middle East air.

Well, I just thought you would like to hear about one obscure 14-year-old who happened to become a target of yours, because why shouldn't you know who it is you hated enough to kill? And now that your friends have murdered Imri and blown up his father's hand, there will be that much less music in the world, and that much less civilization.

You have made it pretty clear that all of this feeds your pride and your notion of manhood and especially your sense of nationhood. The triumph of guns and blood excites you more than symphonies and poems and clarinets.

It could be, though, that you didn't really tell an untruth when you called Imri a "soldier." On our battered planet there are always, after all, two armies—the army of

guns and the army of clarinets. Death flies out of one and beauty from the other. Imri is a fallen soldier in the army of clarinets, and in the end your most intractable stumbling block, your deepest contest, will have to be not politics, or your Soviet arms suppliers, or land, or your propagandists abroad, or your multiple perversions of the vocabulary of idealism, or your fellow Arabs who have imprisoned and despised and morally crippled and corrupted you for the last 30 years, or your hatred of Jews, or what you call "self-determination" while denying it to another people, or your vow to dismantle Israel, or your putting military uniforms on boys just Imri's age and teaching them terrorism, or even your bloodthirsty braggadocio; or anything like that.

No. You will have to grapple with what you know to be your chosen enemies—rank after rank of the singing clarinets: the army of civilization. Your guns cough in brutal eyeblink blasts and shatter human bones. Your friends, by steatlh and ambush, murdered Imri. You are terribly proud of this, and crow it over the airwaves. No matter. Civilization is more tencious than the death you bring. Paperbag trees, and Keats in a garden near an airport, and the long, long voice of the flute, and the singing clarinets—these are the soldiers you will have to defeat. If you can.

BOY SCOUT EXPRESSES VIEWS ON SALT

HON. BOB WILSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 25, 1978

● Mr. BOB WILSON. Mr. Speaker, I recently received a letter from a young San Diegan—a Boy Scout working on his Citizenship in the Nation merit badge. One of the requirements to be fulfilled is to communicate with a Senator or Representative on an issue of local or national importance.

Neal Engstrom expressed his views on a subject that has been a matter of vigorous debate these past weeks—the SALT negotiations and the neutron bomb. I consider Neal's grasp of the situation and ability to communicate his opinion most impressive for a young man of his years, and believe that all of us can benefit from his assessment.

Neal's letter follows:

SAN DIEGO, CALIF.

DEAR REPRESENTATIVE WILSON: I am a Boy Scout, 11 years of age. I am in Troop 1200 in San Diego. I'm working on the Citizenship in the Nation Merit Badge. For this merit badge I was asked to write a senator or representative of my state about a local or national issue. I was glad because I'm interested in the Neutron Bomb.

As I'm sure you know, after World War II and up till a decade ago the U.S. has wondered if there will be a war between Russia and the U.S.A.

Both countries had been (and have been) producing many types of weapons. After awhile the SALT Talks began. This was saying: "If you get rid of this weapon, we'll discard this one." This is all fine except that the U.S.'s goal at the SALT Talks is to get rid of everybody's (both nations') weapons, and end the production of weapons. But the Russian's goal at the SALT Talks is to limit the amount of weapons the U.S. has, and produces, so that Russia will have a stronger force, and have more power.

Recently the Neutron Bomb was about to be built, and President Carter ordered that it not be. Now this was completely dumb for two reasons. One, because he went against the advice of all his advisors, and our allies in other countries. And number two, you don't just order a weapon not to be made, as he could have traded the Neutron Bomb for a Russian Weapon at the SALT Talks, and then we still wouldn't have to make the weapon, and the Russians would be set further back.

Now Carter realizes this and he's trying to get it changed around but the Russians know that we won't build a Neutron Bomb, so they are not worried by Carter.

My feeling is that we should build a Neutron Bomb. Couldn't this be done by the Congress outvoting Carter? I also think that the bomb should only be built as a device for bargaining at the SALT Talks. Also we shouldn't let Russia rip us off at the SALT Talks.

Thank you for hearing me out.

Sincerely,

NEAL ENGSTROM.●

SOVIET AUTHORITIES IMPRISON ANOTHER UKRAINIAN HELSINKI MONITOR

HON. PAUL SIMON

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 25, 1978

● Mr. SIMON. Mr. Speaker, I would like to call your attention to yet another violation of the Helsinki accords by the Soviet Union. Petro Vins, one of the newest members of the Ukrainian Helsinki Watch Group and son of Pastor Georgi Vins—a name well known to this body—has been imprisoned. This young man, who is only 23, was convicted of parasitism, a charge frequently brought against "bothersome" human rights activities, and one that was levied against Vins as he was in the process of applying to emigrate to Canada. With two of its members in prison, the Vins family can hardly leave the Soviet Union now.

Soviet actions against the Ukrainian Helsinki Monitors has been particularly harsh. Young Vins in fact joined the group after four of its leading members had been arrested. The four, Oleksei. Tykhy, Mykola Rudenko, Mykola Matusevych and Myroslav Marynovych, have since been sentenced to especially long prison terms. Vins is thus the fifth member of the Ukrainian group to be imprisoned for his activities, which have included the particularly dastardly crimes of possessing Bibles and calling upon his government to honor its international commitments.

While these actions by the Soviet Government are serious enough in themselves, I am also disturbed by the attitude the Soviets have shown in jailing these men only before and after, but not during, the course of the Belgrade meeting to review compliance with the Helsinki accords. The timing of these trials is a clear indication that the Soviet Government sought to escape well deserved criticism of its human rights record in this international forum. Surely such cynical behavior exposes the falseness of claims that these men are merely common criminals.

Mr. Speaker, I call upon my colleagues to join me in condemning this most recent Soviet violation of the Helsinki accords.●

TUITION CREDIT

HON. JOSEPH L. FISHER

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 25, 1978

● Mr. FISHER. Mr. Speaker, I want to take this opportunity to discuss my reasons for having voted against the tuition credit legislation reported out of the Ways and Means Committee last week.

In its original form, the bill before the Ways and Means Committee would have applied to tuition paid to send children to elementary and secondary schools as well as to institutions of higher learning. The amount of the credit varied. For elementary and secondary schools, the credit began at $50 per student, effective August 1 of this year, with the amount to be increased to $100 in 1979. The credit allowed for tuition paid at the post-secondary level initially would have been $100 for education furnished from August 1, 1978 to the end of the year, with the credit to rise in 1979 to $150 per student and then finally to $250 in 1980. Availability of the credit would have ended December 31, 1980.

During consideration of this bill by the Ways and Means Committee, I voted in favor of an amendment, which failed, that would have provided meaningful financial assistance to families attempting to put their children through college instead of the token relief granted under the bill ultimately reported out of the committee. The amendment would have permitted a taxpayer to defer a maximum of $1,000 in taxes per student per year, beginning in 1978. This amount would rise to $1,500 in 1982, and then to $2,000 in 1986. The taxpayer could defer a maximum of $10,000 on behalf of any one student. All amounts deferred would have to be repaid by the beginning of the 10th year following the child's graduation from college with interest at a rate of 3 percent per annum accruing on the amount deferred. This tax deferral amounts to a loan at a low interest rate.

Under the tax deferral approach, for example, parents with two children in college could defer payments of as much as $2,000 in taxes in 1978, compared to a $200 credit provided under the bill approved by the Ways and Means Committee. This concept represents real relief to the parents with children attending college. It provides needed cash at a time when cash is short and requires payback after the cash crunch of educating children has passed. Moreover, since the tax will ultimately be paid, the cost to the Treasury in terms of foregone revenue would be minimal. In short, I supported the proposal because of the greater relief it provided, coupled with the much smaller revenue loss to the Treasury. Furthermore, the tax deferral approach could not be thwarted, as the

existing government loan guarantee is thwarted, by banks refusing to make tuition loans to students. And this approach would not require singles, marrieds without college-age children, retired persons, and other to pay taxes to make up for the tuition tax credits. Unfortunately, this proposal was defeated by a single vote, 19–18, in the committee, but I hope this result can be reversed when the bill reaches the floor of the House.

Having been defeated on this amendment, I chose to vote against both the credit for elementary and secondary tuition and the credit for tuition paid to post secondary institutions.

However, my reasons for voting against the two credits were entirely different. There are several reasons why I could not endorse the credit for tuition incurred at elementary and secondary schools. First, the constitutionality of a credit for elementary and secondary education is highly suspect under the establishment clause of the first amendment of the U.S. Constitution. In a situation analogous to the credit that was before the Ways and Means Committee, the U.S. Supreme Court held in the case of Committee for Public Education and Religious Liberty against Nyquist (1973) that a New York State income tax deduction for children attending a nonpublic secondary or elementary school in an amount unrelated to the actual cost of tuition violated the separation of church and state doctrine contained in the establishment clause of the first amendment. Relying upon the Nyquist decision, the Attorney General of the United States informed the Secretary of Health, Education, and Welfare on March 17 of this year that the tax credit proposals before the Congress would be held unconstitutional if they involved aid to elementary and secondary schools.

Secondly, as I indicated earlier, the cost of the proposal before the committee would have been considerable and would have increased the budget deficit at a time when the rate of inflation is far too high. Estimates I have seen reveal that the total loss to the Treasury from the credit for elementary and secondary schools plus the credit for institutions of higher learning would exceed $1 billion in the early part of the 1980's. Since it was primarily the private schools that lobbied for the credit at the elementary and secondary level, I would expect those schools simply to raise their tuition by the amount of the credit, if such a credit should be enacted. If that is the case, the individual paying the tuition would not benefit at all economically, because the reduction in taxes would quickly be offset by an increase in tuition.

Thirdly, the proposal could lead to the public schools charging tuition in order that they could derive a benefit from this form of Federal revenue sharing. This result has been characterized by some as the undoing of our free public schools that have become a significant part of the American society.

When the credit for tuition at the elementary and secondary level was deleted from the bill, I was then faced with the decision of whether to vote for or against a credit for tuition paid to institutions of higher learning. I decided to vote against the proposal for a number of reasons. First, the amount of the credit was quite small (maximum of $250 per student) when compared with the spiraling cost of college tuition and would be achieved at a high cost to the Treasury in lost revenues. Moreover, whereas the tax deferral program I discussed earlier would provide meaningful relief to taxpayers at less cost to the Treasury, the proposal before the committee would serve only to encourage colleges to raise their tuition with no assurance that the taxpayer would benefit. Second, the credit approach of $250 per student for tuition paid does not focus relief on families who truly need it and provides a windfall to families who require no assistance at all.

In closing, Mr. Speaker, I hope that my remarks will serve to clarify my position regarding proposals that would provide financial assistance to parents with children in school. I am quite sensitive to the financial problem which parents face in trying to find the funds to send their children to college, my wife and I having seven children to educate. For the reasons set out here, I lent my support to an amendment that would have provided substantial relief through a tax deferral assistance program to parents with sons and daughters in college. However, I could not support the tax credit approved by the committee, which merely represents token relief unrelated to actual tuition paid and which would be achieved at a high cost to the Treasury.●

DISPLACED HOMEMAKERS—WELCOME PROGRESS

HON. J. J. PICKLE

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 25, 1978

● Mr. PICKLE. Mr. Speaker, legislation fashioned by our esteemed colleague from California, Representative YVONNE BURKE, comes before an Education and Labor Subcommittee this week for markup. The legislation seeks to bridge gaps from the work of homemaking to work in a salary paying job for thousands of displaced homemakers. I am pleased to be a cosponsor of this legislation, and I commend to the House an excellent article in the winter 1978 Civil Rights Digest which explains what a displaced homemaker is and outlines the history of Mrs. BURKE's legislation:

DISPLACED HOMEMAKERS—"FORCED RETIREMENT" LEAVES MANY PENNILESS

(By Tish Sommers and Laurie Shields)

Who is a "displaced homemaker"? This woman from a small Midwestern town is one:

In 1974 my husband died suddenly and in a matter of a few horrible hours I became a 55-year-old widow. I spent 33½ years of my marriage making a home for my husband and three children. I have developed no working skills and have been unsuccessful in finding any sort of a job. The opportunities are limited in a small town and are naturally filled by the young. Consequently, my funds grow smaller along with my shrinking ego.

The 2½ years until I reach 60 stretch interminably. My husband's social security will be no big deal at best. Preoccupation with grief, unexpected responsibility, rejection by potential employers, limited funds have made me feel alone and apart from life. After months of desperation I have lately begun to think of death as an attractive alternative.

Also this woman:

I am still married to a United States Post Office letter carrier, who plans to retire this year. He states he will elect to take the larger pension benefits awarded to himself alone rather than small benefits which would leave some to a beneficiary. I learned this shocking news in 1975 after 33 years of marriage. During this time I worked damned hard as a rural unpaid housewife who raised three kids on his measly salary. We could not have managed without my contributions—at least, not well. I was raised in the "great depresssion" and learned frugality early. I made all the children's clothes and maintained the home—paint, carpentry, etc., grew and preserved food (most of what we ate), ad infinitum.

Then in 1970, he left me to seek younger grass so I have been forced to live alone. . . . I have held temporary jobs since 1974 and have not yet established minimum social security credits of my own. As a postal worker, no social security was ever deducted from his pay so I am in the position of not having even this. . . .

And another:

I am a 65-year-old Christian lady whose husband, after 32 years of marriage, divorced me 2 years ago to marry his secretary, who was a widow, much younger, and had a great potential for inheritance. The divorce cut me off from our Blue Cross-Blue Shield which my husband had with his government job. Any hospital insurance I have been able to find says they start where Medicare leaves off. But with raising five children I never worked out to establish social security, so am not eligible for Medicare.

Oh, yes, they said I could take Medicare insurance, but how many who are not eligible for social security can afford that? I can't. I now own half of my three-bedroom home. My ex and his wife live across the street from me. I go out to work as baby sitter in their home. That's the only job I could get. He pays the house payments as my settlement, but I have to pay tax on that, since he claims it is part of my income. All this just does not seem very fair to me. . . .

All three of these women and possibly millions more like them are displaced homemakers. Displaced persons are those who have been "forcibly exiled" through social upheavals and war. Displaced homemakers are the victims of a quieter transformation in the structure of the American family. They are primarily older women who have been forcibly exiled from a role, an occupation, dependency status, and a livelihood.

HOMEMAKING AS WORK

Despite the oft-reported move of women into the labor force, homemaking is still the fulltime occupation of the majority of married women (and most of the rest are moonlighting). Motherhood, which is the central function of homemaking, usually terminates in the middle years, so that women in this occupation experience the same trauma as persons in other occupations whose jobs are phased out. But because homemaking is not yet recognized as work and not paid, this loss of job is not called mandatory retirement, but given the sociological description of the "empty nest syndrome." Suicide rates peak for women in these years, just as they go up abruptly for men after retirement. Again because homemaking is not paid, no cushions

or benefits aid these workers at this crucial life transition—only psychiatrists' couches and prescription drugs, euphemistically called tranquilizers, dull the pain.

Nor is being fired from homemaking (divorce) seen as comparable to unemployment. Displaced homemakers, like other workers, have lost the sole source of income on which they have been dependent. In their attempts to find jobs they are turned down because they have no recent record of paid employment and also because they are older women. They are ineligible for unemployment insurance because they have been engaged in unpaid labor in their homes. If their children are over 18, they are ineligible for AFDC. Most are ineligible for social security because they are too young, and some may never qualify because of the dependency pitfalls within that system or because, as in two cases cited above, the breadwinners were in other retirement programs.

If the problem is severe, why has it not surfaced before? Precisely because homemaking, not recognized as work, has been seen as outside the economic sphere. As John Kenneth Galbraith has pointed out, the consumption tasks of the homemaker are essential for the well-being and continuing growth of the economy, but the housewife's contribution is systematically ignored. Any accounting of her contribution is scrupulously avoided. On the grounds of complexity of assigning a monetary value to nonpaid work, homemaking is kept out of the realm of statistics.

In 1975, when the Alliance for Displaced Homemakers commissioned a study to determine the actual number of women nationally who would qualify as displaced homemakers, it was found that only a scattering of information existed, much of it lacking conciseness. What wasn't counted as labor obviously wasn't counted at all, and if you are not counted, you don't exist. Even today, there is no definitive socioeconomic profile of this group. The Alliance estimates 2 to 3 million women are displaced homemakers, and potentially 15 million more are women out of the labor market who currently have minor children and will be without benefits when their children reach 18 years of age.

Part of the reason for their invisibility is that homemaking is an isolated occupation, and women who fit the definition tend to think of themselves as victims of circumstances rather than as a social problem. Each believes hers is a unique personal problem.

Despite the absence of good statistics, some idea of the extent of the condition can be deduced from related reports. According to the Census Bureau, in March 1976, 4.4 million divorced women had not remarried. Over 2 million women were separated from their spouses and over 10 million were widows. Demographic studies confirm that women are outliving men and the gap is widening. While it is commonplace for widowers or divorced men to marry younger women, the reverse is relatively rare. There are more than four widows to every widower. No-fault divorce has cut a wide path through the ranks of older women as well. And in a recent report on spousal support by the National Commission on the Observance of International Women's Year, only 14 percent of divorced women are awarded alimony. Of these, only 45 percent get their payment with any degree of regularity.

Most women who are now in their fifties and sixties bought the social contract of man the breadwinner and woman the homemaker. They assumed that their retirement benefits, health insurance, and economic security flowed from their marriage. If they worked outside the home, it was likely to be supplemental, irregular, and often part-time. Most of these women are poorly equipped to compete in today's job market. Their skills are obsolete or may no longer be in demand. (How many older school teachers can be placed these days?) Not only has the job market changed, but the women have changed too. The many negative messages they receive—from potential employers, family, the media, and elsewhere—tell them they are unemployable, which soon becomes a self-fulfilling prophecy. It is difficult enough for an older man who loses his job to find another one. (Persons over 45 suffer terms of unemployment equal to black teenagers.) But the older unemployed male at least has a work history; the former homemaker has none that is recognized. As one such woman wrote:

I've answered dozens of ads and tried the unemployment office where they send me to the job board. Those jobs are already filled or after I fill out an application I never hear from them again. They say I have no experience. Well, I thought raising six fine children and working on school bond campaigns and electing the right candidates to Congress was experience but I guess not. They look at you like a piece of discarded junk.

Displaced homemakers are in fact a newly emerging disadvantaged group that has yet to be officially recognized. This segment is composed of "old poor" (growing older and poorer) and "new poor," former dependents of persons outside the poverty ranks. Many of these latter are the least equipped for coping with combined age and sex discrimination. As one widow writes:

Four years ago at the age of 48 I was widowed and was so sure I could get a job and take care of myself. What a shock to find out I couldn't and there was no help available anywhere. In these years since, I had to sell my house just to have money to exist. I moved to a little cottage with no running water. I carry wood to heat the place. I'm not complaining, mind you, but what will happen when I am physically not able to do this any more? I have no health or hospital insurance. Small towns have few jobs, but would my luck be better in a big city? The future frightens me.

Another such woman did move to an urban setting and found the going no easier:

I married at 15, I worked in the fields, ran a home, growing gardens, raising livestock so as to live, all the time having children. Many a night I never got to close my eyes, sewing, mending, doing floors, painting, canning, preserving. I'm old, too old to find work and too spent. I have nothing but food stamps. . . . is that anything to live for? Is that what I've worked all these years for?

These are the women who are caught in the middle. Too young to be considered part of the "aging," they are therefore not eligible for most programs designed for "the elderly." Changing aspirations and expectations of women have left them stranded. While older widows are traditionally an impoverished group, their situation has deteriorated immeasurably through the compounding impact of inflation year by year. Changing laws and mores in regard to divorce have swelled the ranks of older women on their own. The divorced older woman's plight is accurately described by a judge for the Court of Appeals, Fourth District, California, as he held for a 44-year-old wife divorced after 25 years of marriage:

A woman is not a breeding cow to be nurtured during her years of fecundity, and then conveniently and economically converted to cheap steaks when past her prime. If a woman is able to support herself, she certainly should do so. If, however, she has spent her productive years as a housewife and mother and has missed the opportunity to compete in the job market and improve her jobs skills, quite often she becomes, when divorced, simply a "displaced homemaker."

For these many reasons the authors have focused upon the displaced homemaker as a new and unrecognized disadvantaged category for whom there has been been little official concern and no specific assistance. We have defined her as an individual who has performed unpaid labor in the home, is not gainfully employed and who has had or would have difficulty in securing employment. She has been dependent on the income of another family member or on Federal assistance but is no longer eligible because her children have reached their majority. The personal plight of these women is desperate and, as they are quite aware, they are headed for abject poverty in old age. The psychological toll is enormous.

A LEGISLATIVE FOCUS

Older women, trying to move from dependency to self-sufficiency, are not specifically excluded from government-funded programs; such programs are simply not designed with these women in mind. The problem of the older woman who falls through the cracks was brought to public attention in the fall 1974 issue of the *Civil Rights Digest*, among other places, but nothing happened until specific legislation was introduced to address the problem.

In the spring of 1975, a Displaced Homemaker's Bill was introduced in the U.S. House of Representatives by Rep. Yvonne B. Burke of California. Drafted by legal services lawyer Barbara Dudley at the request of the then NOW Task Force on Older Women and members of Jobs for Older Women (a community-based organization in Oakland), the proposed legislation gave a name to the problem, defined it, and suggested remedies. Modestly conceived, it called for the U.S. Department of Health, Education, and Welfare to provide multipurpose service programs including job readiness, transition counseling, training, placement, and help in recycling of homemaker skills to paying jobs. Its greatest value was conceived to be its potential impact upon other agencies, both public and private, in sensitizing them to a category of persons about whom they knew little.

In order to mobilize effective grassroots support for the legislation, an Alliance for Displaced Homemakers was formed with the sole function of promoting legislative support at both the State and national level. The first State bill to fund one multipurpose service center for displaced homemakers as a pilot project was enacted in September 1975 in California. Support for the legislative drive across the country came from diverse quarters—from traditional women's organizations and from members of NOW and other feminist groups. Church women's organizations, recognizing that their membership included many displaced homemakers, were especially responsive.

In the 2 years subsequent to the passage of California's State bill, 13 other States followed suit: Maryland, Florida, Nebraska, Montana, Texas, Oregon, Illinois, Minnesota, Louisiana, New York, Massachusetts, Colorado, and Ohio. (Anticipation of passage of a Federal bill that would have provided matching funds—90 percent Federal, 10 percent State—spurred passage of many of these bills. But in a number of cases, the bills were more an expression of interest than a commitment of State funds; some appropriations were made contingent upon the availability of Federal money.)

Early in the 95th Congress, Representative Burke reintroduced an amended Displaced Homemaker Act (H.R. 28). An identical version was filed in the Senate by Senator Birch Bayh (S. 418). Refined specifics of the measure called for HEW to establish a minimum of 50 multipurpose service centers for displaced homemakers, mandating the selection of rural as well as urban sites.

Congressional hearings on both bills were held in 1977, and it was clear that members of the subcommittees in both Senate and House recognized that displaced homemakers

as defined in the legislation represented a significant segment of the country's hard-to-employ. But it was equally obvious that since the legislation was intended to open up paying jobs, the program more properly belonged under the aegis of the Department of Labor.

Early in December 1977, Representative Burke therefore filed new legislation (H.R. 10270) to amend the Comprehensive Employment and Training Act (CETA) to include the entirety of the Displaced Homemaker Act under Title III, which had been created in 1973 to deal with the very hard-to-employ through a special program approach. Representative Burke was joined in the filing by Representative Augustus Hawkins, chairman of the House Subcommittee on Employment Opportunity, as a prime cosponsor. As this article goes to press, it is expected that Senator Birch Bayh will file an identical measure when Congress reconvenes in January.

Considering attitudes toward spending for new public programs and the trend against "categorical programs," this legislation has been swimming upstream all the way. But the issue has caught media attention as America's "number one lady in distress." The National Women's Conference held in Houston spotlighted homemakers' concerns and gave overwhelming support to displaced homemaker legislation as an immediate and concrete step toward addressing the neglected problems of older women.

FURTHER STEPS

The legislation, both State and national, includes the following statement: ". . . homemakers are an unrecognized and unpaid part of the national work force who make an invaluable contribution to the welfare and economic stability of the Nation, but who receive no health, retirement, or unemployment benefits as a result of their labor. . . ." Certainly the sentiment expressed in the first part of that statement is taken for granted (at least on Mother's Day), but the second half has not been addressed in any systematic way. Setting up multipurpose service centers as the bill directs may provide immediate assistance to a limited population but will not address the roots of the problem.

A second small step is written into the bill as well:

SEC. 7. (a) The Secretary (of Labor), in consultation with appropriate heads of executive agencies, shall prepare and furnish to the Congress a study to determine the feasibility of and appropriate procedures for allowing displaced homemakers to participate in—

(1) programs established under the Comprehensive Employment and Training Act of 1973. . . .

(2) work incentive programs established under Section 432(b)(1) of the Social Security Act;

(3) related Federal employment, education, and health assistance programs; and

(4) programs established or benefits provided under Federal and State unemployment compensation laws by consideration of full-time homemakers as workers eligible for such benefits of programs. (emphasis added.)

While studies should never be confused with implementation, they seem to be a necessary step in drawing attention to newly recognized problems. Including full-time homemakers under the unemployment compensation laws may seem impossible, but no serious consideration has yet been given to the matter. A well-researched study should provide alternative solutions. It might begin by acknowledging the economic worth of the contribution homemakers make to this Nation.

The process of working in behalf of the legislation has already raised consciousness in Federal Government circles as to the plight of the displaced homemaker. Most legislators and officials in relevant agencies have at least heard the term and have some idea of the issue. Because the problem crosses all race, class, and political party lines, there is now some willingness to do something about this constituency—as long as the "something" doesn't cost too much or interfere with "more important" considerations.

Already the category of "displaced homemaker" is creeping into some agency programs. In some, the focus on older women has been maintained; in others, the definition of displaced homemaker has been broadened to such an extent that the focus has been lost. The director of a CETA-funded program for displaced homemakers in Montgomery, Alabama, points out in his description of the program that "the project definition of a displaced homemaker differs from the national definition to include women 22 years of age and above and unwed mothers."

The regulations for vocational education programs following passage of the 1976 Education Amendments Act included displaced homemakers as one target population for funded projects. While little evidence exists of implementation for older women under these provisions, the existence of more displaced homemaker centers will eventually assure that this will happen. ACTION is another government agency interested in displaced homemakers. Although Congress turned down ACTION's request for funding of a volunteer-oriented program designed for these women, the establishment of displaced homemaker centers will provide the opportunity for interaction through cooperative programming with ACTION. The Women's Bureau of the Department of Labor, long charged with gathering information on the status of women in and out of the labor market, is interested in the research implications of the legislation.

CETA administrators in Washington have already responded by funding a number of pilot projects in various parts of the country. They range from research to job-related services, but as pointed out above, the absence of official acceptance of the term "displaced homemaker" to mean a person in her middle years has diluted the efforts for older women. With growing pressure from the grassroots on CETA to address the job needs of older workers of both sexes, prime sponsors may begin to identify displaced homemakers at the local level and design programs to fit their needs. Passage of the pending displaced homemakers national legislation will certainly increase their awareness and encourage action.

So, the original intent in sponsoring legislation to draw attention to an invisible problem has already produced significant results. What a difference a name makes! Even though the term was greeted with disapproval and was considered "too harsh" by those who had never experienced the problem, it was quickly adopted by thousands and thousands of women who found it an apt description of their own situation. We who had vowed to make it a household word are, with the collective action of older women across the country, well on the way to our goal.

One more addition to the lexicon of those experiencing discrimination is a limited victory. Nevertheless, there comes a time when the cry of outrage must be translated into legislative language, when the broad basic sweep of reform is broken down into tiny steps forward. A full bill of rights for homemakers may not come in our time, but its time will come.●

BRITISH PAPER OFFERS NEUTRON BOMB WARNING

HON. PAUL SIMON

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 25, 1978

● Mr. SIMON. Mr. Speaker, one of the magazines which gives me a perspective of how people in other nations view a variety of issues is Atlas World Press Review.

The magazine republishes a variety of feature stories and editorials from around the world.

If there are those among my colleagues who do not subscribe, I recommend that they do.

In the most recent issue, they reprinted an article from the Guardian of London, by Anthony Tucker, about the neutron bomb that I hope Members of the House and the Senate and their staffs will take a few minutes to read. It will cause us to pause and reflect a little before we move ahead on something which could have a devastating impact.

A "CLEAN" BOMB?

THE NIGHTMARE EFFECTS ON THOSE WHO SURVIVE

(By Anthony Tucker)

When the "clean" tactical neutron bomb bursts over the battle salient, those who die quickly will be the lucky ones. Within 450 yards of ground zero, where the blast and burn effects differ little from those of a conventional fusion weapon, the dose levels of fast neutrons and hard gamma radiation will be over 18,000 rads, even for men in tanks. Given a few moments of realization of the meaning of the flash and the extraordinary nausea, then coma and merciful oblivion will intervene until death a day or two later. But only a few will die as cleanly as that.

Most will die slowly, and most of these will know almost from the outset that they are going to die. For there are two related but separate series of symptoms suffered by those exposed to high doses of radiation, quite apart from radiation-induced skin burns (90 percent of victims suffer first-degree whole body burns at 650 rads plus; second-degree burns at 2,600 rads plus).

The first series is called "prodromal," and acutely affects the gastrointestinal and neuromuscular systems: nausea, vomiting, diarrhea, cramps, salivation, dehydration, and anorexia result, say the textbooks, noting that the severity of these symptoms and their duration seem to predict the severity and eventual end point of the radiation injury. These symptoms, and the panic and helplessness they induce, would be better called the "premonition phase."

With it, high-dose levels, come the neuromuscular effects—fatigue, listlessness, exhaustion for some, sweating, headache, behavioral abnormalities, sudden limb paralysis, fever reduction of blood pressure, and shock. All those receiving a lethal dose of radiation greater than a few thousand rads will suffer all these early symptoms, probably associated with cerebral bleeding.

The onset will generally be with five to fifteen minutes of exposure, reaching a peak within about thirty minutes and then merging with the later and ultimately fatal symptoms resulting from massive damage to the central nervous system and the bone marrow. Above 1,000 rads, survival may be five to ten days, but during that time most will die of

massive bleeding through the destroyed surfaces of the gastrointestinal tract.

At these high levels of radiation the cells which make up the brain and the nerves also disintegrate; neither the behavior, the feelings, nor the competence of individual humans can be predicted for this phase of dying. Inability to make valid judgments, paralysis, and gross unpredictability are the probable hallmarks.

At high-dose levels, death will generally intervene before the symptoms of bone-marrow destruction reveal themselves. But at lower lethal doses—the LL or "latent lethality" levels on the military scale, ranging from 200 rads upward to the 1,000 rad level—the bone-marrow symptoms will dominate and may determine the outcome.

The bone marrow is a kind of miraculous factory which manufactures—nobody understands quite how—all the various and highly specialized cells for the blood. When the bone-marrow function is impaired or lost then life is impaired or lost.

With radiation damage, after a latent period of a few days (the "premonition phase" may have receded by then into a misleading phase of apparent well-being), the bone marrow's failure to produce essential blood cells is revealed in anemia, bleeding through loss of the ability to clot, and massive failure of the immune-response system that protects us from disease. Rapid infections, ulceration, internal hemorrhage, and uncontrollable fever lead to death within a few days or weeks.

If, after sixty days, the bone marrow has repaired sufficiently to provide enough blood cells for immune and other functions to return, then the victim may survive for several years. He will, however, be impotent. At about this sixty-day milestone—which separates the "early" effects of radiation from the so-called "late" effects (predisposition toward leukemias and cancers of all kinds, cataract, increased susceptibility to infection and nonspecific life shortening)—the effects of radiation damage to the gonads become apparent. The gonads are probably the most radiosensitive organs of the human body, and both male and female glands are readily and lastingly damaged.

In the male, a radiation dose in excess of fifty rads causes the sperm count to drop almost to zero after a latent period of sixty to eighty days. Doses above 650 rads will certainly produce lasting reduced fertility—and, most probably impotence—because the damaged testicular cells are no longer capable of producing viable spermatocytes, the cells which eventually evolve into spermatazoa.

It seems that anyone within about 1.25 miles of the blast will suffer gonad damage and infertility to some extent, but there are important uncertainties about biological effects of high-energy neutrons at low doses—that is, on the periphery of the radiation area. It is known that neutrons are very much more damaging than gamma rays at low doses and, for different effects, they may be ten, thirty, or 100 times as potent.

Soldiers are, of course, required to perform their duties until they die, and the clean tactical value of the neutron bomb may seem to be that it knocks out the enemy in his tanks, eliminating within two to five minutes a potential breakthrough or breakout. Those are the quick dead (7 percent) and the quick down (9 percent). But what of the 40 percent who either go down and then get up again to function abnormally and unpredictably, or who go down slowly with increasing disability and impairment? They will die, of course, but what will they do with their undamaged equipment before they die when they are no longer responding to commands?

And what about the remainder on the periphery, most of whom will suffer radiation sickness and deep-seated latent damage which will reveal itself in late effects? Is it a "clean" weapon which, where it does not kill, plants the seeds of blindness, cancer, impotence, and early death? Or is it called "clean" only because, to the military mind, that which is not relevant to the course of the battle is of no significance?

A GLOBAL CONCERN

(Samplings from a worldwide dialog)

FRANCE

If it is acknowledged, which is generally the case, that one of the main dangers for the West is a massive tank attack penetrating our defense lines, it must be agreed that the neutron bomb appears to offer extra security while avoiding the "black marks" of atomic fission bombs—high loss of civilian life, and massive destruction of allied or enemy territory. Opinions can be legitimately divided as to whether the neutron bomb is a positive contribution in the area of deterrence. But for defense the contribution appears to be beyond question.

Whether one wishes it or not, the influence of those in possession of nuclear weapons for the defense of Europe cannot fail to grow.—Francois de Rose, "Le Monde," Paris (liberal), Feb. 28.

THE NETHERLANDS

On March 19 in Amsterdam more than 50,000 people participated in an international demonstration against the introduction and production of the neutron bomb. The march, organized by The Netherlands' "Stop the Neutron Bomb" group, was preceded by an international colloquium of 1,500 representatives from Eastern and Western Europe and eight international organizations.

The demonstration and colloquium marked a climax in the largest antiarmament movement Holland has known since the War. Nearly 1.2 million signatures decrying the neutron bomb have been collected. Several speakers at the final meeting emphasized the need for international action and cited the Dutch movement as an example and stimulus for actions elsewhere.

Rudie van de Velde, nuclear physicist and Communist councilman of Amsterdam, pointed out that those in favor of introducing the neutron bomb are to be found in the military-industrial complex, "where it isn't the insecurities surrounding the N bomb that are taken into account, but the securities at the stock market." Van de Velde argued that peaceful coexistence of the world's nations is the condition *sine qua non* for safeguarding mankind's future.

Holland's churches played a prominent role in the anti-neutron bomb action. Many Amsterdamers were urged from the pulpit to participate in the march.—"De Volkskrant," Amsterdam (independent), Mar. 20.

ENGLAND

European members of NATO are increasingly reluctant to reach a decision on whether the neutron bomb should be deployed on their territories. West German Chancellor Schmidt has already said the neutron bomb will be a useful deterrent until international arms control is achieved. Many politicians in Bonn are strongly opposed to its deployment on West German soil, however.

Although the resolution of NATO's Nuclear Planning Group remains secret, it is no secret that nearly all NATO serving officers would unreservedly want to see the neutron bomb deployed in Europe. They are aware of the emotions the bomb has aroused, but they hope these will calm down in time.

The Dutch Government has refused to let the bomb be deployed on its territory. So, too, has the French Government, which refused to accept NATO nuclear weapons because they are not under French control. But it is likely that France will develop a neutron weapon of its own. The Greek Government is also strongly opposed to having the neutron bomb stockpiled on Greek soil, even on American bases, while the Norwegians refuse to accept nuclear weapons of any type.

Strong public opposition to any use of the neutron weapon is not continued to left-wing opinion. Some politicians believe that most Europeans are so deeply opposed to the weapon that they will attempt a revolt against the military if they try to deploy it. They fear the two superpowers may try to fight it out on the plains and forests of Germany, whatever the effect on civilians. Clare Hollingworth, "Daily Telegraph," London (conservative), Feb. 27.

GERMANY

Bonn Government spokesman Klaus Bölling says that the Government of Germany is in favor of using all opportunities for arms control talks, especially in view of the arms buildup in the East, before actually deploying the neutron bomb in Europe. As to whether the neutron bomb ought to be developed and manufactured. Bonn says this decision rests with the U.S."

The Soviet Union has nothing to rival this miniature hydrogen bomb, which may even help, its ability to launch a surprise attack despite the Warsaw Pact's tank superiority. Even so, the military priority of offsetting the Soviet Union's 3-to-1 tank supremacy in Central Europe must not override strategic and security policy misgivings.

America and Russia were unable to agree on limitation and subsequent reduction of anti-missile systems until they had both spent enormous amounts of money on convincing themselves that ABMs did not live up to expectations. It was much the same with MIRVs. Yet America's decision not to manufacture the B–1 supersonic bomber failed to bring anything tangible as a Soviet counter-concession. Would it be wise to expect the Kremlin to forgo stationing more SS–20 missiles in Western Russia or to reduce its tank strength in East Germany in return for the nonmanufacture of the bomb?

It will take time and effort to find out whether the bomb is sufficient to persuade the Soviet Union to reduce its offensive potential.—Kurt Becker, "Die Zeit," Hamburg (Liberal), March 3.

REWRITE OF THE COMMUNICATIONS ACT

HON. TIMOTHY E. WIRTH

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 25, 1978

● Mr. WIRTH. Mr. Speaker, the House Subcommittee on Communications is undertaking major revisions to the Communications Act of 1934 under the able leadership of its chairman, Mr. VAN DEERLIN, and the ranking minority member, Mr. FREY. In light of that effort I wish to call to the attention of my colleagues to two articles which have appeared recently in the press concerning the issues we are confronting in the rewrite.

The articles follow:

[From Computerworld, Mar. 6, 1978]

IBM, BELL HEADED FOR CLASH IN MID-1980s, ANALYSTS WARN

(By E. Drake Lundell Jr.)

WASHINGTON, D.C.—A major clash over markets is inevitable between IBM and AT&T in the 1980s, two major industry analysts

agreed here at the recent DataComm '78 conference.

"AT&T is in essentially the same business as IBM, no matter what they say," Charles P. Lecht, president of Advanced Computer Techniques, Inc., said, while Frederic G. Withington, a consultant with Arthur D. Little, Inc., said it was "inevitable" that the two would compete even more than they have to date.

Lecht said the major collision between the two industry giants will come in the mid-1980s after the satellites of Satellite Business Systems (SBS) are launched, but Withington predicted the collision will result more from offerings planned for the late 1980s and early 1990s.

However, both agreed the big question mark in the equation is the threat of government regulation.

Legislators do not realize the significance of the coming clash and are not really equipped to deal with the issues raised, Lecht pointed out, while Withington said he hopes the government will not stop or stifle the innovative growth period ahead.

In reaching their conclusions, the two traveled slightly different paths.

By 1983, 87% of all computers will have some terminal hookups, Lecht noted, adding that computer mainframers that cannot offer a communications capability will end up as "component suppliers to those who do."

IBM's SBS, he said, is breaking the previous lines between computers and communications by placing a computer mainframe maker strongly in the communications business—even if only through a subsidiary.

WRITEOFFS FOR AT&T?

At the same time, AT&T could be facing huge writeoffs—in the neighborhood of $20 billion—if its terrestrial plant is outmoded or leapfrogged by satellite services such as SBS, he noted.

To counter this, AT&T is developing communications systems such as its as yet unannounced Advanced Communications System (ACS) that will handle many communications functions previously handled in a mainframe or front-end-type processor, Lecht predicted.

ACS, he said, will have the capability for data capture and data entry and will provide a host of preprocessing services formerly handled by communications software on a mainframe. The line between the two has always been fictionally drawn, Lecht noted, and it will be even more blurred in the 1980s when it will be impossible to tell whether computers are the slave of communications or vice versa.

With the development of ACS, the battle will really begin, he predicted, because IBM's Systems Network Architecture (SNA) will not be able to coexist with the Bell ACS offerings.

IBM PERSPECTIVE

Withington looked at the picture from the IBM perspective, noting that pretending to be president of IBM was one of his favorite fantasies.

IBM wants to keep up its dramatic growth, starting from its base in the data processing and office markets, so the next step is integrating its word processing systems into networks and then having links with its DP base, he said. This will call for the development of both graphics and image processing systems, which will require very wide bandwidth communications systems, such as will be available from SBS, he added.

As these functions get distributed on communications nets, he perdicted, IBM will then "have to get into voice," possibly to the extent of even supplying telephones.

Presently, IBM and AT&T compete in the terminal area to a great extent, he said, noting that AT&T's teletypewriter is one of the most popular terminals and that the Dataspeed 40 gear is actively competing in the market.

Withington also downplayed some of the things people have said might constrain the two from competing.

For example, he said many people have said that the threat of antitrust action against IBM would constrain the firm. But, he noted, IBM has been more aggressive in price cutting against the plug-compatible CPU makers than it ever was against the peripherals firms, even though it is being sued on antitrust grounds now.

In addition, the two firms would not stop being customers for each other's equipment even if they became competitors, as some have predicted.

Withington predicted that the confrontation would start on the equipment front with IBM coming out with more and more terminal equipment, initially specialized for the SBS, and including such things as facsimile, video and audio equipment for teleconferencing, and remote printing devices. In addition, it will get into the business of multifunctional units to provide such services.

Furthermore, IBM is heavily involved in fiber optics research and may offer fiber optics systems for inplant use, he said, as well as entering the PBX marketplace with its Carnation unit that has been available in Europe for almost five years but never introduced here.

[From the Washington Post]

DO-IT-YOURSELF TELEVISION

If you have been looking at the ads, you know that the prices of those machines known as video recorders have been coming down while the prices of almost everything else have been going up. They're still expensive—$800 and up. But enough of them are in use (150,000 or so) and their makers are promoting sales furiously enough to suggest that they are more than just another electronic gadget. Like the television sets of a generation ago, the video recorders are capable of producing major changes in the way we live and in the communications and entertainment businesses.

One version of these machines, in case you haven't seen it, takes television signals off the air, records them on magnetic tape and plays them back on command through your television set. Given the right attachments, it will record one channel while you watch another, record programs while you are not at home, or play prerecorded tapes of, say, movies or Broadway shows. Down the technological road are devices to turn home movies into tape, to run programs backward or in slow motion—and who knows what else? Coming into competition soon with these tape systems will be others based on discs like phonograph records. While these systems won't let you record material off the air, the basic set will be cheaper to buy and the cost of prerecorded discs of movies or symphonies or do-it-yourself programs will be substantially lower and the visual quality somewhat higher than comparable tapes.

It doesn't take much imagination to figure out some of the things that come next: movie-of-the-month clubs, rental libraries, discount stores and so on. But no one is quite sure what all this will do to television and the resurgent movie industry. What if most people decide that, rather than watch what the networks offer, they will program their own entertainment from the discs or tapes they can buy, rent or borrow? Will that be the end of network television as we know it? Or what if people decide to tape programs at off hours and play them during prime time rather than watch the network offerings? The ratings game, in which television is so deeply engrossed, could turn into chaos. And what if all those parents who hate the commercials for sugary breakfast foods were to provide their children with a supply, on tape or discs, of the same cartoons minus the ads? If these or any of several other possibilities occurred, the role of television as the major supplier of entertainment would be sharply changed. In response, the networks might be driven to expand vastly their role as a supplier of news of live events—political, social and athletic—thus beginning to live up to the potential they have never fully exploited.

There are a couple of clouds on this horizon. One is the reverse side of the competitive system that is bringing down so quickly the prices of these new devices; some of the various systems are incompatible, and consumers who buy the ones that lose out in the market may be stuck with obsolete equipment, just as some consumers were in the early days of long-playing records. The other cloud is a lawsuit in which two moviemakers are charging that the federal copyright laws are violated when consumers tape things likes movies off the air. They may well be right; the tape-system manufacturers are now telling customers that federal law may be broken when copyrighted material is taped. If so, the solution is to find a way to protect the owners of the copyrights without destroying this new tape industry. That might require some legislation by Congress.

So far, neither Congress nor any other arm of government has gotten into this field. When they do, the principle guiding their action ought to be clear. These new recorders, especially when combined with the coming mini-computers and cheap television cameras, can change that home television set into an information and entertainment center almost beyond belief. The government's role should be to remove any roadblocks and let it happen.●

THE PEOPLE PLAY STRONG ROLE IN FOREIGN AFFAIRS POLICY

HON. GUS YATRON

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 25, 1978

● Mr. YATRON. Mr. Speaker, I know that many of my colleagues share my belief that people are at the center of our foreign policy. It is not difficult to lose sight of this important fact, in this age of rapid change and high technology. I firmly believe that people-to-people exchanges and communication have a far greater role to play in our relations with other countries, than presently is the case.

Mr. and Mrs. Roy O. Christman of Hamburg, Pa., recently returned from a 5-week visit to Pakistan. As participants in the 1978 Farmers and World Affairs Program, they traveled throughout the country, visiting 25 different farms representative of Pakistani agriculture. Later this year, the Christmans will in turn host Pakistani farmers in their home in Hamburg.

On their return to the United States, Mr. and Mrs. Christman were kind enough to visit me in my Washington office to share with me their many experiences. I would like to take this opportunity to call to the attention of my colleagues, the Christmans' written report to me on their trip to Pakistan. As a member of the Subcommittee on Asian and Pacific Affairs, I was most interested to read their reflections. Not only is their

report informative about life in Pakistan; it also demonstrates very clearly the understanding which is generated by people-to-people programs like the Farmers and World Affairs exchange. Mr. and Mrs. Roy O. Christman have made an important contribution to United States–Pakistani understanding and I am proud to represent them in the Congress.

Their report follows:

FARMERS AND WORLD AFFAIRS PROGRAM—1978

As part of the Farmers and World Affairs Exchange program to Pakistan, we traveled over five thousand miles in five weeks. This F.W.A. program of farm leaders of America and Pakistan to become more informed and concerned by taking an active part in the building of a world of peace and freedom has been in existence since 1959. This annual program calls for a group of 6 or 8 Americans actively engaged in all types of farming to visit Pakistan to observe their agriculture and agribusiness and for a corresponding group to visit America for the same purpose. This year 3 couples, Mr. and Mrs. Roy O. Christman of Hamburg, Penna., Mr. and Mrs. Andrew Jackson of Howell, Michigan and Mr. and Mrs. Mervin Sutter of Sarasota, Florida visited and lived in their counterparts' homes in Pakistan. Later on this year 6 Pakistanians will come to America to be guests of this year's exchanges and former participants on their farms. Since each former participant arranges for programs and recreation typical of his area and his type of farming, the present participants have a varied and enjoyable trip.

This 1978 Farmers and World Affairs Exchange started for us on Feb. 6 at Karachi, Pakistan. We eventually drove 4,500 miles from Karachi on the south, northward through the Indus Valley, to the Swatt Valley in the north. After 5 weeks on the road, traveling in three cars which enabled us to reach nearly inaccessible places on nearly unrecognizable roads, we flew from Rawalpindi to Karachi adding another 900 miles.

Some of the highlights included visits and meals at twenty-five different farms with overnight stays at seven of them. These farmers represented every type of agriculture native to Pakistan and included mangoes, citrus, bananas, sugar cane, rice, wheat, alfalfa, vegetables, mustard for oil and poppies. From the sky, Pakistan has a yellow color due to its acres and acres of flowing mustard fields. With very little export and limited storage and processing facilities most of the food is locally consumed, being merchandized by "Poppa" stores and push cart vendors. The many animals of Pakistan, the camel, oxen, water buffalo, donkey, goat and the horse manage to eat up many acres of alfalfa and wheat as fodder. Briefing at the State Dept., Washington, D.C., the American Consulate, Karachi and meetings with various Directors of Fisheries and Agriculture of the Sind, Punjab and North West Frontier Provinces acquainted us with the fundamental facts of Pakistan's agriculture. Visits to 4 research centers, 2 colleges, fish harbors, a sugar mill, an Esso Refinery and the Lahore Vegetable and Fruit Market showed us the utilization of PL 480 funds and the practical, down-to-earth application and results of these facts.

Our impressions are that Pakistan will never really benefit from outside help until it changes its traditions and conditions from within. There are at least three main factors each so intermingled with each other that there is no single solution to their problem. In fact the biggest mistake any aiding country can make is to think money alone pumped into a country can solve their problem. Such money usually ends up aiding the governing class already corrupt and affluent. It never touches the needly lower class.

Politics is the number one unstable factor. Although the country is new as to it's creation, it's age old landowner-tenant system will keep the country in a state of upheaval. Whenever you have a very rich educated minority dictating to a very illiterate poor majority there is bound to be political unrest. There has to be some sort of land reform in the land ownership distribution with compensation for the landowner and incentive for the tenant. Taking the land away from the present owner (land that has been in the family for hundreds of years) without payment as the present government has tried to do only creates more corruption and unrest in the already ruling class. There are few incentives for the lowly tenant who exists to support his landlord and his own family or for the professional person who fears governmental reprisals or the industrialist who fears nationalization. Nationalization proved to be a disaster since it suppressed investments by the Pakistanians and discouraged investments from other countries too.

Pakistan needs industry to employ more of the over 80 per cent now in agriculture. Employment in agribusiness such as processing, transportation, packaging, manufacturing of machinery and even research will lead to larger, more economical and mechanized farm units. The saving of food now utilized by the bullocks, who are necessary because of the small farm size worked by the tenant, would make Pakistan self-sufficient.

Education of both sexes will be a giant step forward. Other countries are supplying technology but without education the masses cannot understand it. Importation of sophisticated farm machinery is also not the answer. Self production or practically sized and horse-powered equipment would be a more economical approach. Those achieving an education eventually leave the country for material advancement offered by other countries. Education will solve other problems. The agriculture research centers, the Extension system and other agencies are set up but "politics" and selfish motives block the flow of information and good seed to the right people. Better crops would mean better diets, more income, better standards of living, more uniformity of the classes, more exports and national stability. It is hoped Pakistan will solve it's own differences before some outside country will.

At first glance it would seem religion and tradition would be one and the same thing. However on understanding some of both it is not necessarily so. Religion was the reason for the creation of Pakistan. Strict religious belief will hamper the growth and keep progress stalemated. More aggressive sectors tend to take advantage of religious elements.

Tradition (pride in country and people) is something to be commended. In the case of Pakistan it is proving to be a deterrent. The many tribes are partially or wholly independent paying little or no taxes and carrying guns in defiance of national law. Purdah and tradition concerning the position of women in society tend to make Pakistan a male-oriented country. Education and active participation of women in all phases of life would lead to a more competitive spirit and higher standard of living. Polygamy and the belief that large families insure a more secure old age for the parents as well as more manpower tend to perpetuate poverty. Planned or arranged marriages concentrate either wealth or poverty and further divides the classes.

Since Pakistan has all the potentials needed for growth, we are optimistic she will emerge as a self-sustaining nation one day. With her great irrigation system and the improvements such as the Tarabella Dam and others to come, her great manpower, her friendly people, her rich soil and natural resources Pakistan is truly an emerging country.●

SILVER ANNIVERSARY OF MAY—NATIONAL TAVERN MONTH

HON. EDWARD J. PATTEN

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 25, 1978

Mr. PATTEN. Mr. Speaker, this decade has been a difficult one for our Nation's small businessmen. Inflation, increased competition from large corporations—and yes—interference and increasingly complex regulations from the Federal and State Governments have contributed to these trying times. Many have survived out of the sheer will power and determination of the owners and many more have been aided by their national trade associations.

For example, the nearly 500,000 on-and off-premise liquor retailers in the United States are well served by the National Licensed Beverage Association. Among other activities, NLBA has for 25 years sponsored an annual program designed to spotlight the history and important role of the American tavern in our way of life, and insure its continuity as an important social institution.

On this, the silver anniversary of May—National Tavern Month, I would like to insert the following brief history into the RECORD as a way of paying tribute to NLBA and the millions of Americans participating in the retail liquor industry:

AMERICA'S TAVERNS—YESTERDAY, TODAY, AND TOMORROW

Dr. SAMUEL JOHNSON: "There is nothing which has yet been contrived by man by which so much happiness is produced as by a good tavern or inn."

The world's first taverns were probably built in Egypt thousands of years ago. And as civilization spread to all the corners of the earth, so has the oldest of all community establishments—the tavern. Spanning the centuries, the tavern is the common link between all nations and all peoples.

As the settlers crossed the Atlantic to find a new home in the New World, they brought with them the tradition of the English pub. Typically the first two structures in any colonial settlement were the church and the tavern. Quite often, tavern licenses were issued on the understanding that the tavern be built near the church.

In these Colonial days, church services often lasted all day in unheated structures. Thus a nearby tavern was required for its warmth, refreshment, and lodging for those who lived at a distance from the church. It was not at all uncommon, prior to the construction of the town church or during inclement weather, for the church services to be held within the tavern itself.

So important were taverns to the early settlements that they were often required by law. While many colonies offered land and tax exemptions to prospective taverners, Connecticut in 1644 levied a fine on any town without its own tavern.

The purpose of such laws was to insure accommodations for travelers and to provide "community centers" throughout the colonies. In these early times, the taverns were the only public buildings, and as such housed the town meetings and gatherings, was the center for news and gossip, served as coach depot and post office in addition to being livery stable and restaurant. These varied functions of early taverns required that their owners be able to perform many jobs. He was commonly not only the post-

master and "coach agent," but also clerk of court, town registrar, magistrate and/or sheriff.

As is the case today, Colonial licensees were subject to rules of good conduct and business practice. In 1672 it was illegal to sell beverages to minors, slaves or servants without the consent of parent, owner or master. Sales were also forbidden to "habitual inebriates" and the daily closing was 9:00 p.m.

There were other requirements upon Colonial tavernkeepers too. Establishments of the day were required to provide food and drink (often at prices set by law) as well as "six good feather beds with sufficient covering for same, plus Indian corn, oats, hay, straw and stabling for 10 horses at least."

Above all, however, the taverner has to be a good citizen and man of honorable character. Since licenses were controlled by a board of town officials, it is not surprising that the town's most respected individual was usually its tavernkeeper. It goes without saying that his continued good citizenship and stewardship were essential to the operations and success of his tavern.

The American tavern has frequently been called the "Cradle of Democracy," since it played such a central role in the struggle for independence. Paul Revere and his compatriots held their meetings in Boston's Green Dragon Tavern, while the Montagne Tavern in New York City was headquarters for the Sons of Liberty.

General George Washington's New York headquarters was the tavern managed by Samuel Fraunces. Thomas Jefferson's first draft of the Declaration of Independence was written in Philadelphia's Indian Queen Tavern, while the final version of the Star Spangled Banner was penned by Francis Scott Key in a Baltimore tavern.

The history of the Revolutionary War is rich with tavern lore and legends. Since the taverns frequently provided the only accommodations for miles they were selected as command posts for the opposing armies; on occasion housing the staffs of British and Colonial commanders on alternate nights as the tide of battle changed. And since the tavern was normally located on a main road, or a crossroads, many battles were fought literally on the doorsteps.

During the long war, the American tavern served as headquarters, news center battlesite and field hospital. But when the war was won and our Independence secured, the tavern was the site of gaiety and celebrations throughout the colonies that were soon to become the United States of America.

As America grew and expanded the tavern took on the coloring of its time and location. The New England tavern, with its decidedly English ambience was a far cry from the Western saloon, as wild and wooly as its surroundings, and from the notorious "pirates' dens" of the Southern port cities like New Orleans.

The mining towns of the West often became as famous for their taverns as they did for the mineral strikes that created them. Tombstone, Arizona, had two claims to fame in the 1870s: the world's largest silver lode and the most ornate taverns outside of San Francisco's Barbary Coast section.

Since the mining camps had only the barest necessities for survival, the work was hard and the days were long, the saloon provided the only "recreation." Locked into this hard life, the miners made any occasion a celebration—which in some cases could continue for days, or until the celebrant's ready cash of nuggets or dust was exhausted.

In Nevada during the late 1800's saloons were similar to clubs as we know them today. There were the "one-bit" houses, where a drink of any kind cost 12½ cents (one bit); and two-bit houses, where drinks were a quarter. Lunches were generally served free of charge, but were subject to strict local customs. Etiquette dictated that a person could eat as much as he wished, but slowly so as not to draw attention to himself.

As today, Nevada's taverns were proud of their orderliness in the 1870s. They also offered a choice: In Virginia City in 1876, records show there were 100 retail liquor establishments, served by the area's 10 wholesalers and five brewers.

According to early American definitions, a tavern was an establishment offering food, drink and lodging; an "ordinary" was one that served food and drink at prices which were fixed by regulation (usually by edict of the governor); and an inn was a hostelry with a number of rooms which might be secured separately (as opposed to the common bunk rooms typical of the day). Today, of course, the shapes, styles and definitions of taverns have changed to reflect our modern lifestyle.

In today's language, a tavern is any establishment that serves a "licensed" beverage, either distilled spirits and/or malt products or vinous spirits. As procedures of state licensing developed, different classes of taverns have developed reflecting legislative differences from state to state. For example, in some states a "tavern" is a premises licensed solely for malt products and light wines sales; while in others "taverns" or "bars" are those premises that do not or need not sell food along with a beverage sale.

Confusing as these labels might appear, the spirit of America's Taverns remains the same. They are community meeting places in the small towns, and places where "singles" can meet in larger cities. They are places for food, beverage and companionship; places for dining and dancing; places where darts, pool or pinball amusements may be enjoyed. Their variety reflects the diversity of the needs of America's population—but they fill the same essential human requirement today as they did centuries ago, the need for "social" companionship.

Throughout history, as America's social needs changed, so did the American Tavern—changing to meet these needs. While no one can predict the economy, social structure, or recreational habits of America in the coming 25 years, we can be sure that America's tavern owners will change with society to continue to provide Americans with the atmosphere and food and drink they have come to expect from the American tavern industry, in a creative and responsible manner.

PROFIT IS NOT A DIRTY WORD II

HON. BOB WILSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 25, 1978

● Mr. BOB WILSON. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following:

PROFIT IS NOT A DIRTY WORD II

Harold Sydney Geneen, who started his business career as a 16-year-old runner on the floor of the New York Stock Exchange and later was responsible for building one of the world's great multinational corporations, says that if he were starting over again, he would go into business for himself.

Just retired as chief executive officer of International Telephone & Telegraph Corp., but still chairman of the board, Geneem celebrates his 68th birthday today. Neither the passage of years nor the shedding of burdens has dimmed his vigor—or his habit of speaking bluntly to the point.

U.S. business, Geneen asserted when we visited his relatively spartan new office at ITT's Park Avenue headquarters in New York, is being shortchanged by the American public, the government and the media, which generally don't understand the importance of profits in making the free enterprise system work.

"The only courage a businessman has got is his profits," Geneen said. "When he has profits, he goes and builds plants, does things, creates jobs. And when he doesn't have profits he pulls in the roof and gets scared. It's just the simple.

"What the hell is wrong with profits? And what the hell is wrong with unconscionable profits? Any business that has profits, generally speaking goes and builds more divisions and has more R. & D., comes up with more products, and does things with it. That creates jobs and creates a standard of living.

"Suppose they have excess profits?" he continued. "Suppose some guy got a big dividend and bought a yacht? What the hell is wrong with that? The guy is going to put someone to work to build the yacht, spend some money while he's got it, and when he's dead, you take it away, anyway.

"Take the oil industry, for example," Geneen added, warming to his point. "Everybody is stifled on this whole energy program because they're scared stiff somebody's going to make a profit. That's really the problem. The oil industry is going to make a windfall profit. And my comment is, suppose the hell they did? They're going to spend it on exploration . . . and if they give it in dividends, it's no great problem. And the stock market would go up, and a lot of things would happen to keep this momentum going that built the kind of country we have.

"Companies ought to be able to make a profit, make a big profit," he said. "I don't think there's anything wrong with a big profit—unless the guy puts it away in a mattress."

Profits are the key, he emphasized. If the businessman gets no profits, or dwindling profits, "his initiative begins to curdle" and the country's growth comes to a halt.

But the government and the public have got to the point, Geneen asserted, "where they're scared stiff to advocate that we should continue an unfettered free enterprise system.

"This comes out of the style and vogue that's been coming on us in the last 15 or 20 years that, somehow nobody is supposed to have more than anyone else," he contended. "This is a sort of egalitarian approach, and the politicians are scared stiff of it. And actually what built the country was just the opposite. Everybody had an equal opportunity, but you needed a wealthy class that earned it—I'm not talking to the guy who inherited it—because that was the incentive for the other guy."

Geneen himself was not born to the purple, nor ever seemed to aspire to it. He was brought to this country from England as an infant, lived with his mother after his parents split up and went to a boarding school. He worked his way through college at night, became an accountant and wound up having more influence on the development of business around the world in the third quarter of the 20th century than any other corporate executive of his generation. He also became one of the most controversial, as ITT became involved in accusations that it improperly tried to influence governments here and abroad.

But Geneen, inflappable through it all, concentrated on building ITT and its profits. He earned close to $900,000 annually the last two years and the stock and options he holds make him a millionaire several times over.

In his 19 years at the helm, he built ITT into a company with sales of more than $12 billion a year and businesses in every corner

of the globe. Although he shuns ostentation, Geneen is proud of his achievements and the niche he carved for himself in the corporate pantheon.

And yet, he told us, if he were advising a young college graduate today on how to seek his fortune, he would suggest—to those "who are motivated that way"—that they "get out on their own and have a small company in the end."

He feels that way, he explained, because "my impression is that nobody has any real idea of what the people running large companies do or what they're accomplishing."

Entertainers and athletes are paid huge sums, and nobody questions that, he noted. "But if they pay some guy running a corporation half a million dollars, and he's got 40,000 people working for him, somehow that's wrong."

But, Geneen said, "The economy is supported by big companies, not by small companies." And "99 percent" of the people running them, he added, are "solid American citizens who believe in everything you believe in." ●

FRAUD AND ABUSE IN FEDERAL PROGRAMS

HON. ELLIOTT H. LEVITAS

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 25, 1978

● Mr. LEVITAS. Mr. Speaker, I would like to submit for the RECORD the final article in the New York Times series on fraud and abuse in Federal programs. This article is a case study on a Detroit computer school which participated in HEW's basic educational opportunity grant program. The president of that school is presently under indictment for submitting bills for students who did not attend classes that were never held.

The amount of money which the Federal Government loses in a year through fraud and abuse is mind-boggling. In this case alone, HEW paid out nearly $400,000 before investigators stepped in. We simply cannot let this continue. We must augment agency efforts to stop fraud and abuse. The House took a significant step last week in this regard by passing legislation establishing Offices of Inspectors General in various agencies and departments. I hope that the Senate will act expeditiously on this bill.

The article follows:

DETROIT COMPUTER SCHOOL IS FOCUS OF CASE ALLEGING CHEATING IN FEDERAL AID PROGRAMS

(By Jo Thomas)

DETROIT, APRIL 17.—Essie Lee Conway, a large black woman in a pink bathrobe who has been down on her luck longer than she cares to remember, answers the door in a grimy housing project shoved up against the railroad tracks of River Rouge.

She is a welfare mother of eight, a grandmother before she turned 40 last December, a woman who says that the time crawls without work and that the medicine prescribed for her depression makes her sleep a lot these days.

A few miles and seemingly worlds away, Harry M. Borcherding walks into his new suite on the 18th floor of an office tower in Detroit's Renaissance Center. The rooms have red shag carpeting and the furniture is black patent leather and Plexiglass.

Mr. Borcherding, 45, white, a college graduate, a former civil servant and now the proprietor of a computer school, reports that he has been spending a good deal of time lately in a nearby law library. Mrs. Conway is one of the reasons. Mr. Borcherding, who is acting as his own attorney, is under a four-count criminal indictment for fraud.

According to the charges against him, Mr. Borcherding's scheme was a classic example of fraud against the Government—the systematic looting of Federal aid programs, not just by welfare mothers who illegally collect benefits but by relatively well-to-do doctors, pharmacists and businessmen who contract to supply services or goods in such programs.

It is difficult to estimate how many cases there are of fraud or abuse in Health, Education and Welfare Department programs, partly because the mechanisms for detecting them have been so deficient.

"Every time we turned over a rock at H.E.W. we found another problem," said Robert W. Ogren, who until recently headed the fraud unit in the United States Attorney's office for the District of Columbia. But he said there was no way of knowing what percentage of cases were being discovered because "there was no detection mechanism in the whole system."

ANNUAL LOSSES IN BILLIONS

Other sources said that many others, particularly among Federal prosecutors, agreed. Alan Kaufman, an Assistant United States Attorney who handles fraud cases in the Southern District of New York, said that the potential for fraud in many programs was so enormous and the monitoring by the agencies so lax that "to a great extent, it's an invitation to steal."

It is a problem of vast proportions, with some estimates putting the annual loss at $12 billion to $15 billion, but its actual extent is unknown. It is exacerbated by a range of circumstances—the widespread conviction that no one is injured because the money in question belongs to everyone; the reluctance of bureaucrats to root out corruption in programs to which their careers are tied; the inadequacy of the Federal effort to detect and prevent fraud and, consequently, the low odds that an offender will be caught.

But it is a problem that has recently begun to generate growing concern in Congress and the executive branch, producing additions to the staffs of inspectors general and other enforcement officials.

The allegations against Mr. Borcherding fit the pattern almost exactly, describing the profitable manipulation of a desperately needed social welfare program by a person with impeccable credentials. Federal and state officials were eager to give him money, and he was, in the end, caught only because he asked for too much.

U.S. WON VERDICT

In a reverse of the usual pattern, the Government has won a civil verdict against Mr. Borcherding, charging that he had submitted false claims under a Federal educational grant program. A jury in October sided with the Government, which is entitled to recover twice the amount of the claims.

No judgment has yet been handed down in the case, however, pending settlement of Mr. Borcherding's counterclaim that the Government interpreted the regulations incorrectly and changed its interpretations long after it was too late for the school to do anything about it.

In January Mr. Borcherding was indicated by a Federal grand jury on four charges that his statements were fraudulent. That trial is pending.

Nevertheless, sworn testimony by students, instructors, and Mr. Borcherding himself in the six-week civil trial last fall described in great detail the way the school, the grant program and Mr. Borcherding operated.

Mrs. Conway and Mr. Borcherding first crossed paths three years ago when Mr. Borcherding's school was selling dreams and Mrs. Conway was in the market but had no money with which to buy. Mr. Borcherding signed her up to learn how to become a data processing specialist and sent the Federal Government the $1,050 bill.

SUBMITTED 2,000 APPLICATIONS

In all, under what was then a new Federal program, Mr. Borcherding's school submitted more than 2,000 applications from welfare recipients who wanted to become data processors. The Government paid out $389,103 before auditors moved in and charged that he was submitting bills for students who did not attend sessions that were not held.

It is likely that the situation might have passed for years as bad bookkeeping, with no Federal or local monitoring, if Mr. Borcherding had not sought to make it quite so profitable. All 2,000 preprinted applications arrived at the same Government contractor's office on the same day.

They were gathered, according to testimony, in welfare offices throughout Detroit in March 1975. The automobile industry was ailing, unemployment hung in the air like a cough and long lines of applicants formed at the mere rumor of a job.

Mrs. Conway had gone to the Wayne County Department of Social Services' southwest office, which had been a supermarket before its windows were smashed in Detroit's 1967 riots.

"They was catching people in the welfare office," Mrs. Conway recalled. "I went up to see my worker. I saw this sign that says you can be a computer operator, and I said, 'Oh that's what I always wanted to be in'."

TOLD SHE WAS ELIGIBLE

Two women were sitting at a desk taking applications, she recalled, and "they said I was eligible."

What Mrs. Conway and the others applied for was a grant under the Basic Educational Opportunities Grant Program, authorized in 1972 as a way the Federal Government could give needy students money for vocational training after high school.

It was and is, as one Federal official described it, "a pure giveaway program." This year, 4.5 million students will apply for $1.7 billion to be used at 6,300 educational institutions ranging from universities to beauty schools. Under the program, a student applies for a grant, which he can then take to any participating school. The school, in turn enrolls the student and submits his grant form to the Government for cash.

"There's no way the Government can account for the activities of each and every school participating in the program," Thomas M. Woods, one of three Government attorneys handling the suit against Mr. Borcherding, told the court. The Government must "rely on the integrity of these schools," he added.

SOLE STOCKHOLDER

In 1972 Mr. Borcherding set up the Institute of Computer Technology, a private, profit-making institution of which he was the president and sole stockholder. It operated in a two-story office building he owned in the Detroit suburb of Oak Park. Its quarters were spacious, its furnishings even luxurious, with thick carpeting and silver foil wallpaper. There were only about 100 students at first, but Mr. Borcherding said he hoped to expand.

In August 1974 the institute applied to participate in the grant program, and by October an agreement had been signed. A few months later, Mr. Borcherding said, he approached the Wayne County Department of Social Services with a proposal to train 3,000 welfare recipients for jobs as data processing specialists. He wanted social workers to help him sign them up.

PRINTED SCHOOL ADDRESS

Delois Whitaker of the county department testified that she and others had been eager to help welfare recipients get training that

would lead to jobs. They became concerned, however, when they saw samples of the 10,000 application forms Mr. Borcherding had printed. He would later testify that he had printed his own forms because he could not get enough from the Government.

In the space for the student's home address, Mr. Borcherding had preprinted his school's name and address. He had also preprinted the answer "yes" to whether the applicant was a United States citizen and "no" to whether the applicant had prior training.

Mr. Borcherding explained to the social workers and later to the court that this was a convenience to make it easier for the grants to be collected by the school and to keep an application from being rejected because an answer was overlooked.

But the social workers were also worried that they might not be able to get accurate financial information, for the applicants had to show need. The social workers rejected Mr. Borcherding's suggestion that they simply have the applicants sign the forms and that he would help the applicants fill in the financial information later.

In the end, the Social Services Department did sign an agreement promising to help recruit applicants, but the social workers were busy elsewhere and finally signed up only about 18 students. Mr. Borcherding, using teams of recruiters, signed up about 3,300 in eight days or so.

Mrs. Conway was one of them. Letha Taylor, 57, was another. She had gone to the same office to buy food stamps and saw the same sign.

ASKED ABOUT AGE LIMIT

"After I finished getting the food stamps," she testified, "I asked did they have any age limit. I didn't know whether they would accept me or not."

Mrs. Taylor told the court that she wanted to study "library aide." "It's work in the library as an aide to the librarian," she said. "Well, at the present, when I first enrolled, I had to take up computer, this I.B.M."

She testified that after she started classes in key punching she told a staff member, "I was interested in going for the course I had enrolled for. She said "I had to finish this course first, so I never went into library aide."

At a rate of 25 hours a week, the course would take 37 weeks to complete. It included classes in key punching, data control, data library, console operation and computer programming. To qualify for the grants, the Government attorneys would later assert, the school must see that the students attended 24 hours a week, either in class or in supervised laboratory sessions. In fact, the attorneys argued, the students attended class far less time if they attended at all.

Mrs. Conway said she called Washington to complain, but "the lady never called back; the Government don't care."

Unknown to Mrs. Conway, the school was already in trouble. The recruiters had collected about 3,300 applications for the 1974–75 academic year and the same number for the following year. The school had weeded out duplications and sent about 2,000 grant applications to the government contractor who was supposed to process them, American College Testing Program, in Iowa City, Iowa.

CONTRACTOR BLEW WHISTLE

They were all hand-delivered on March 14, 1975, a day before the deadline for the upcoming academic year. The contractor, according to court testimony, noticed that the applications were preprinted and contained no instructions for the students. The contractor blew the whistle.

After negotiations, in which the Government insisted on knowing the home addresses of the students getting the grants, more than 650 students were enrolled before the auditors got to the school in May.

Russell L. Allen, who headed the audit team, said he found that out of 25 randomly selected student files, only three contained evidence to verify actual student attendance. A review showed one student had never attended eight started a class but did not finish, two dropped out after one course, and 14 were still in good standing. The dropouts, Mr. Allen said, appeared to be entitled to refunds they did not receive.

On July 1, the Government filed a civil suit in Federal District Court in Detroit, asking for a temporary restraining order to stop Mr. Bocherding and the school from dispersing funds and charging them with "substantial, wholesale violations" of the contract with the Health, Education, and Welfare Department. The suit charged that Mr. Borcherding had comingled funds failed to compute eligibility properly and failed to give refunds.

At the civil trial last fall, their attorney, Gregory Curtner, said, "We will concede that the records were a mess," but laid the blame on the Government. "They couldn't keep records; they didn't know who was where; they didn't send out regulations; they didn't know what the regulations meant," he said.

Since the Government cut off the grant money, the institute has continued to operate, although it moved to much smaller quarters and only a shadow of where its name was taken off the building shows where it once was.●

NO MORE COMPROMISES ON PROTECTION OF ALASKAN WILDERNESS

HON. PETER H. KOSTMAYER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 25, 1978

● Mr. KOSTMAYER. Mr. Speaker, the Committee on Interior and Insular Affairs has reported H.R. 39, the Alaska National Interest Lands Conservation Act. The bill as revised represents the results of many months of hearings, briefings, and Subcommittee and Committee debates and mark-up sessions.

I voted for the bill and will support it on the floor. I urge my colleagues to do the same. I have reservations, however about the compromises that have been made, and am apprehensive about the pressures which will be brought to bear in favor of further attempts to weaken the bill's provisions for protection of the magnificent wilderness, wildlife, scenic, natural, and other values of Alaska.

The St. Louis Post-Dispatch accurately summarized the status of the legislation when, in a recent editorial it stated that the "Alaska parks bill that has emerged * * * has already been weakened as much as, and probably more than, it should be."

I am entering this editorial in the RECORD for the benefit of my colleagues:

[From the St. Louis Post-Dispatch, Mar. 18, 1978]

SAVING THE LAST WILDERNESS

The Alaskan Parks bill that has emerged from the House Interior Committee has already been weakened as much as, and probably more than, it should be. The administration's proposal provided for setting aside a fair amount of land to benefit the American people as the last thriving example of wilderness in this country. The plan would put the state of Alaska, and thereby the mining and logging industry, in control of the bulk of the mineral wealth and land. The mineral interests were not satisfied, however, and have succeeded in getting the House committee to weaken protection of some specific areas and to adopt a provision that would open millions of otherwise protected acres to "mineral processes." If the Alaskan parks legislation is actually to protect wilderness, this nibbling away at the safeguards it provides will have to stop.

If the bill were assured of passage in its present form, it would meet most of the needs of the Alaska wilderness, but it still has another House committee and the full House as well as the Senate to go through and needs to be carefully shepherded. Further weakening of the legislation could well mean inadequate protection for the fragile ecosystems that exist in Alaska.

Contrary to charges by some state officials, the intent is not to lock up Alaska from development; plenty of land will be left after the federal government sets its portion aside. Rather the intent is to insure that the land that is set aside is sufficient for preservation. As Secretary of Interior Cecil Andrus said when he presented the administration's proposals, "If we err by conserving too much this can always be changed in the future.' But once wilderness is gone, it can never be brought back.●

MR. COLE BRIDGES

HON. NORMAN Y. MINETA

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 25, 1978

● Mr. MINETA. Mr. Speaker, it gives me great pleasure to rise today to honor one of Saratoga's outstanding community leaders, Mr. Cole Bridges, who is retiring from public office after 10 years of service. In appreciation for all his fine work over the years, the Saratoga community is sponsoring a dinner in Cole's honor on Sunday, April 30, 1978.

Cole's community service began in August of 1968, when he helped establish the parks and recreation commission. He was elected the commission's first chairman a year later. In 1970, he was elected to the Saratoga City Council, becoming its vice-mayor in March of 1974. Later in the year he began a term as mayor of Saratoga which ended just last March.

Cole ably represented the city of Saratoga on the Santa Clara County Transporation Commission, on the Inter-City Council of Mayors and as a member of the board of directors for sanitation district No. 4.

He was chairman of the county transportation commission for 3 consecutive years, a tribute in itself to his fine leadership abilities. While he was chairman, the commission made great strides in improving the bus system in the county and investigating alternative methods of mass transit that would better meet the needs of the citizens of the Santa Clara Valley.

Cole is a warm compassionate man, who has often demonstrated his deep concern for people. He encourages a complete airing of all viewpoints on any issue and he is respected by all for his patience and his sense of fairness.

As mayor of San Jose and as a Member of Congress, I have worked with Cole on many occasions. He understands the concerns of the people in Saratoga and Santa Clara County, and he has provided me with helpful information and advice on how legislation would affect his community.

The city of Saratoga will miss his leadership and guidance in the months to come, but we understand his desire to spend more time with his family and business.

Mr. Speaker, I ask you and all my colleagues to join with me to thank Cole Bridges and wish him the best of luck in the future.●

NUCLEAR WASTE STORAGE

HON. ROBERT H. MICHEL

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 25, 1978

● Mr. MICHEL. Mr. Speaker, the issue of nuclear waste storage is one of growing concern around the country. The Department of Energy has released a report on the nuclear waste management problem and legislation has been introduced in the House of Representatives to deal with storage of these hazardous materials.

One of these bills was first introduced last December by our colleague from Illinois, the Honorable TOM CORCORAN. Entitled "The Spent Nuclear Fuel Storage Act of 1978," this legislation is receiving attention from the Department of Energy, environmental groups, and the nuclear industry. The bill would expedite the decisions concerning the temporary and permanent storage of all radioactive wastes by involving Congress in the formulation of a much-needed national policy in this area. This proposal has already been reintroduced once with a number of cosponsors and the interest among Members is growing.

Additionally, two publications recently cited Mr. Corcoran's bill as a viable solution to the problems of nuclear waste storage. Both articles do a good job of describing H.R. 10301 and its specifics for dealing with the temporary storage of spent fuel and the permanent storage of spent fuel and other wastes. As a cosponsor of this measure, I invite my colleagues' attention to these articles, which follow:

[From the Nuclear Fuel, Jan. 23, 1978]

SPENT FUEL SOLUTION DEMANDED BY CORCORAN IN BILL ON INTERIM, PERMANENT STORAGE

Spent fuel storage and waste management solutions—priority issues in both government agencies and in Congress—have found yet another champion, this time in Rep. Thomas Corcoran (R.-Ill.). Corcoran's bill, the "Spent Fuel Storage Act of 1978," was introduced on the last day of the session in Congress last month and has been referred to the Committees on Rules, Interior & Insular Affairs and Interstate & Foreign Commerce; "we hope action on the bill begins as soon as Congress gets back," said a source on Corcoran's staff. Under the proposed legislation, DOE would be required to submit a preliminary report on the interim storage of spent fuel within six months after the enactment of the bill, and a preliminary report on the permanent storage of spent fuel and other high and low-level radioactive wastes within two years after enactment. The bill, as presented to Congress, is intended to "expedite decisions concerning the temporary storage of spent fuel and the permanent storage of spent fuel and other radioactive waste, including the selection of sites for storage facilities, the determination of whether the federal government should take title to such fuel and such waste, and the amount of storage fees which should be charged."

The bill's scope is wider than that of the spent fuel storage legislation which staffers in the House subcommittee on oversight & investigations say is in final draft in that committee, chaired by Rep. John Moss (D-Calif.). The Moss bill, which the staff expects to report on soon, deals specifically with the spent fuel storage issue; the staff was last week collating the results of a nationwide survey of utilities' spent fuel storage needs for inclusion in the report. Corcoran's bill, a staffer explained, is designed to start the wheels moving on the entire policy question, which has been stagnant—at least publicly—since the original announcement was made that the U.S. government plans to accept spent fuel for storage.

On the temporary storage of spent fuel, the bill calls for DOE, in consultation with the EPA, the Council on Environmental Quality, the U.S. Geological Survey and the NRC to:

Determine the amount of spent fuel which has been generated so far and the amount anticipated in the next five years;

To determine the amount of spent fuel which can be stored at temporary storage facilities in operation or under construction when the act is enacted, the number and design of additional facilities which would be required to store the remainder of such fuel, and the approximate storage capacity of each such additional facility;

Identify five preferred and five alternative sites for such additional temporary storage facilities;

Determine whether the federal government should own such additional temporary storage facilities or whether such facilities should be owned by commercial entities;

Evaluate the appropriateness of transferring to the federal government the title to any spent fuel stored in facilities owned by the federal government and determine the conditions which should be attached to such transfer of title; and

Determine the amount of fee which should be charged.

The bill also provides that within 60 days after the preliminary report on interim spent fuel storage, DOE shall hold at least one public hearing in Washington to provide the governor of any state which has jurisdiction of any property within 100 miles of any site recommended in the report with the opportunity to testify concerning the report. DOE's final report would then be issued 90 days after the hearing, including comments.

Sixty days after the President receives the report, the bill provides that he specify the location of sites to be used, the design and approximate storage capacity. After the plan is submitted to Congress, the President would be able to make amendments or modifications to the plan; the plan would take effect 60 days after submission to Congress unless the two houses adopt by an affirmative vote a concurrent resolution disapproving the plan. The bill has considerable detail on the procedure to be followed in this case, concluding with a provision that Nepa be circumvented because of the urgency of the matter. In other words, Nepa would not apply to any preliminary or final report or to any plan or action taken to implement such as a plan.

On the permanent storage of radioactive waste, Corcoran's bill provides that DOE will conduct a study to:

Evaluate the methods of providing for permanent storage;

Determine the amount of storage capacity which will be required to permanently store all radioactive waste now existing and which will be generated by 2000;

Determine the type and amount of permanent storage facilities;

Determine the period of time if any during which any spent fuel shall be retrievable from the permanent storage facility in which such fuel was placed;

Determine the conceptual design, possible sites and ownership of such facilities;

Evaluate the appropriateness of transferring to the federal government the title to any radioactive waste stored in permanent storage facilities and the conditions for such transfer;

Determine the fee schedule which should be established by the federal government to cover any costs incurred by the government.

The preliminary report would be submitted to the public; a draft of the environmental impact statement or statements required under Nepa would be submitted as well to the President, Congress, and the governors of each state. Again, public hearings would be provided for under the same provisions as the interim storage report.

[From the Babson's Reports, Feb. 6, 1978]

NUCLEAR WASTE DISPOSAL

Illinois Republican Rep. Tom Corcoran has introduced a bill that is designed to expedite decisions concerning the temporary storage and the permanent storage of spent fuel and other radioactive waste.

The measure (H.R. 10301) would provide for the selection of sites for storage facilities, the determination of whether Uncle Sam should take title to such fuel and such waste, and the amount of the storage fees to be charged.

Corcoran thinks it's time the U.S.—after 30 years of involvement with nuclear power—came to grips with the problem of what to do with waste produced during nuclear reactions.

He points out that the President's decision early in '77 not to reprocess this fuel has increased the severity of the problem in terms of time . . . because the 60 or more reactors around the country that are now in operation continue to produce this spent fuel without adequate on-site storage facilities.

Corcoran also claims there is insufficient off-site space to handle this waste . . . maintains that the only off-site facility currently in operation in the entire nation will be filled to capacity by the early '80s.

He further contends that storage facilities for spent fuel at the individual reactor sites will be filled to capacity before long.

OTHER DEADLY MATERIALS

Corcoran's bill also deals with—and attempts to solve—the problem of nuclear waste other than spent fuel.

These wastes will remain radioactive for an indefinite period, probably for hundreds of thousands of years . . . making it imperative to assure ample, safe storage space.

The Illinois solon's bill has been referred to the following 3 House committees: Interior and Insular Affairs, Interstate and Foreign Commerce, Rules.

A House vote during the current session is possible but by no means assured . . . and Senate action is even more problematical. But the process could be speeded up if public support of the legislation were to swell.●

CATHERINE CURRAN, MARY GAUDIOSE, ELEANOR MARTIN, CATHERINE McFARLAND, AND CAROLINE PATTON, RETIRING MAHONING COUNTY, OHIO, WELFARE DEPARTMENT EMPLOYEES, TO BE HONORED

HON. CHARLES J. CARNEY

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 25, 1978

● Mr. CARNEY. Mr. Speaker, the city of Youngstown, Ohio, will be honoring five Mahoning County Welfare Department employees on their retirement at a banquet on May 5, 1978. The retirees—Catherine Curran, Mary Gaudiose, Eleanor Martin, Catherine McFarland, and Caroline Patton—have more than 200 years cumulative service among them. All are natives of Youngstown, and all have attained supervisory status in their special areas of expertise within the Welfare Department.

Catherine McFarland is the daughter of the late Thomas and Mame McFarland, and was educated at Ursuline High School. After earning her college degree in education at Kent State University, she started her career with the Welfare Department in 1935. Prior to her promotion to supervisor of the Intake Department in 1954, she held a variety of positions, including caseworker, social worker, and income maintenance worker. In 1972, she became supervisor of the general relief unit, a position which she held until her retirement.

Catherine R. Curran, the daughter of the late Mary Veronica and Joseph Lawrence Curran, graduated from Rayen High School and attended Youngstown College prior to starting her public service career in 1935.

Initially serving with the aid to the aged agency in Youngstown, Miss Curran became a Mahoning County Welfare Department supervisor as a result of 1966 social security legislation consolidating local agencies. At the time of her retirement, she was an income maintenance worker III, supervising the nursing home unit.

In addition to her career, Miss Curran has been active in professional, community, and church groups, including casework practitioners, ladies of charities, and the Catholic Daughters of America. Although she plans to do some travelling, Miss Curran intends to remain active in church and community groups.

Mary Elizabeth Gaudiose, the daughter of the late Youngstown-area pharmacist, "Doc" and Ella Mae Dusseau O'Linn, majored in education at Youngstown College prior to starting her career with the county welfare department. She started with the department as a clerk in 1939, and has held positions such as caseworker I, III, IV, executive I, and administrative specialist II. At the time of her retirement, Mrs. Gaudiose was a supervisor in the aid to dependent children eligibility unit.

Along with her career, she also attended many work-related seminars, workshops, and study courses, as well as continuing her education at Youngstown College. She is a member of St. Christine's Church and several religious organizations, including the Altar and Rosary Society, Infant Jesus of Prague, and the Charismatic Movement Bible Study Course.

Since 1949, she has been married to Martin Gaudiose, who is the principal of Struthers Fifth Street School. Two of their sons, Brian and Martin, are involved in drug counseling and rehabilitation in the Youngstown area. Their third son, Michael, is a doctor in Akron. Mrs. Gaudiose will use her retirement to travel and to increase her involvement in church and civic organizations.

Eleanor Martin, retiring clerical supervisor of the assistance control unit, has served in the welfare department for 39 years. Prior to agency consolidation in 1966, she held a variety of positions with the division of aid and the former aid for the aged agency.

A graduate of Old Market Street Elementary School, Mrs. Martin majored in secretarial studies at the Youngstown College Business School. In addition to participating in work-related seminars and workshops, she has also taught Sunday school at the Pilgrim Collegiate Church, and has been an active junior business woman of the YWCA.

Mrs. Martin is married to Richard Thomas Martin, a teacher and principal of North Elementary School in Girard, She will use her retirement to pursue her knitting, bridge, and sports hobbies.

Caroline Patton leaves the welfare department after 45 years of service. A graduate of South High School, she earned a B.S. in education from Wilberforce University, and has done graduate work at the University of Pittsburgh and Case Western Reserve University.

Her career started in 1933, when she was employed as a social worker with the Allied Council. Before working for the Mahoning County Relief Agency in 1936, she also worked briefly for the Federal Emergency Relief Agency. In 1940, she became involved with the aid to dependent children office, which was later merged into the Mahoning County Welfare Department. Within the department, she has served as a caseworker, casework supervisor, social worker II and IV, administrative specialist IV, and her current position of income maintenance supervisor I.

Mrs. Patton has remained active in a variety of religious and community organizations, including the Heroines of Jericho, the Alpha Kappa Alpha Sorority, and the Youngstown Negro Business and Professional Women's Club. She has served as secretary and matron of the Order of Eastern Stars, and is a former president of the Youngstown Chapter of Links, Inc. She is also a member of St. Andews A.M.E. Church, and serves on the stewards board. Her husband, Felix A. Patton, is retired from the Erie Lackawana Railroad.

In retirement, Mrs. Patton intends to remain active in her many community and social groups.

Mr. Speaker, these retiring women are to be commended not only for their years of dedicated service with the welfare department, but also for their sustained community involvement. Each woman has given of herself not only professionally, but also in religious and community organizations. Their dedication to bettering the Youngstown community—both on and off the job—deserves the praise of all of us. They can all take pride in a job well done.

I want to join the many friends, coworkers, and family members of Catherine Curran, Mary Gaudiose, Eleanor Martin, Catherine McFarland, and Caroline Patton, in congratulating them on their many years of fine work in the Mahoning County Welfare Department, as well as in the varied church and civic organizations, and in the Youngstown community in general.

In addition, I wish these wonderful women good health and happiness in their retirement. They will all be missed, and certainly not forgotten.●

AGRICULTURAL CREDIT ACT OF 1978

HON. BALTASAR CORRADA

OF PUERTO RICO

IN THE HOUSE OF REPRESENTATIVES

Monday, April 24, 1978

● Mr. CORRADA. Mr. Chairman, I was gratified by yesterday's overwhelming endorsement of H.R. 11504, the Agricultural Credit Act of 1978, which revises the farmer loan program of FmHA, initiates an emergency loan program for farmers and ranchers, and extends the Emergency Livestock Credit Act.

The bill increases the limits on farm ownership loans from $100,000 to $200,000 for direct and insured loans, and to $300,000 for guaranteed loans. Farm operating loans are increased from $50,000 to $100,000 for insured loans and $200,000 for guaranteed loans. The total indebtedness limit on farm ownership is raised from $225,000 to the value of the farm and other collateral. These increases are commensurate with the increased cost of farming today, where the cost of land, machinery, fuel, and borrowing, have seriously threatened our agricultural segment of the economy.

I was also glad to see the adoption of the Glickman amendment, which I had supported by cosponsoring a rural housing bill which contained this provision. The amendment requires that mortgage guarantees offered by FmHA be subject to conditions no less favorable than those governing mortgage guarantees offered by HUD. Other provisions of the bill, such as the establishment of a direct and insured program of loans with reduced interest rates for low income, small or beginning farmers; the increase in the maximum grant for rural water and sewer systems from 50 to 75

percent of program cost; and the initiation of a new emergency loan program for farmers under financial stress, all serve to unburden somewhat the heavy loan borne by our farmers. This bill does not foment dependence, but utilizes the self-reliance and initiative of the farmer through loans. I commend the chairman of the Agriculture Committee, Mr. FOLEY, and his committee for their fine work in making these programs more responsive to the current needs of our farmers.●

EIGHTH ANNUAL QUESTIONNAIRE RESULTS

HON. NORMAN F. LENT

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 25, 1978

● Mr. LENT. Mr. Speaker, each spring since my first election to the Congress in 1970. I have asked my constituents in the Fourth Congressional District of New York their opinions on important issues facing the Congress and our Nation. Each year the response has been most impressive, and has given me valuable insight into the grass roots opinion of my district.

This year marked my eighth annual questionnaire. I was highly gratified by the fact that more than 13,000 persons responded to the questions. I found the results highly significant in relation to economic affairs and to our current international situation.

The tabulation of the results confirmed that there is a growing concern over the state of our Nation among my constituents. Especially is this true in regard to economic conditions. In response to the question: Do you expect the economic situation of most Long Islanders to improve during 1978, 80 percent replied no. Only 15 percent of the more than 13,000 persons responding thought the economic situation would improve this year.

Mr. Speaker, this pessimistic result reflects the heavy impact on Long Island of the increasing rate of inflation, higher social security taxes, and the prospect of higher energy taxes.

Economic concerns are reflected also in the 70 percent support for an across-the-board reduction in Federal income taxes, in preference to the Carter tax cut program which provides reductions mainly for lower income taxpayers. This near 3-to-1 margin of support for an across-the-board income tax cut shows that we who advocated the Roth-Kemp bill have strong grass roots support for this 3-year program of reductions in the Federal income tax rate averaging 30 percent for all taxpayers.

Mr. Speaker, I call to the attention of my colleagues these two results of my questionnaire. I trust this call from the grass roots will help persuade them of the necessity for a real reduction in Federal income taxes, rather than the mislabeled "tax cut" plan of the Carter administration, which, with the reforms the administration insists must be part of the package, would result in virtually no tax reductions for nearly half of the Nation's taxpayers, and even higher income taxes for many.

Concerning international affairs, results from my questionnaire showed negative feelings among my constituents as to President Carter's policies. Asked whether they thought President Carter's actions and statements are helping chances for a Middle East peace settlement, 58 percent said no. Only 36 percent responded favorably. Even stronger sentiment was registered on the Panama Canal treaties. Sixty-seven percent opposed the move to give the Panama Canal to Panama, only 30 percent supported it. This strong grass roots opinion encourages me to see through to completion the legal challenge the treaties now before the U.S. Supreme Court, and should encourage my colleagues to insist upon the constitutional right of the House of Representatives to vote on the transfer of property involved in the treaties.

I trust that President Carter and his aides will also note the near 2-to-1 margin against U.S. trade and diplomatic relations with Cuba. This reflects the grave concern in my district over the new role Cuba has assumed in providing modern-day Hessians to fight for Russians causes in Africa.

Another strong expression of grass-roots opinion came from the 71 percent who voted for stronger liability and safety standards for oil tankers and offshore drilling. I am sending this result to Senators HENRY M. JACKSON and EDMUND S. MUSKIE with a renewed request that they end delay in action on two vital bills in this area, the Outer Continental Shelf Act, and the Comprehensive Oil Pollution Liability and Compensation Act. These two bills should have been enacted into law by now. Further delay, with more and more offshore drilling operations planned for the Atlantic Ocean coastal areas near Long Island, is inexcusable.

Mr. Speaker, in calling the attention of my colleagues to the results of my eighth annual questionnaire, I wish also to express my gratitude for the heavy response, and to extend my thanks to each and every one of the more than 13,000 persons who took the time and trouble to answer the questionnaire. They have faithfully carried out their responsibilities as citizens of our Nation, in expressing their opinions on issues of the day.

U.S. Supreme Court Justice Louis D. Brandeis once wrote an opinion in a case concerning citizen participation in government in which he said:

> The greatest menace to freedom is an inert people . . . public discussion is a political duty . . .

I am proud that so many of my constituents have demonstrated their interest and have contributed to public discussion of important issues.

At this point, Mr. Speaker, I wish to enter into the RECORD the complete tabulation of results from my eighth annual questionnaire:

TABULATION OF RESULTS, CONGRESSMAN LENT'S EIGHTH ANNUAL QUESTIONNAIRE

1. Do you approve of the proposed treaty giving the Panama Canal to Panama?
Yes 30.5 No 67.2 Undecided 2.3

2. Do you believe President Carter's actions and statements with respect to the Middle East have helped chances for a peace settlement?
Yes 36.3 No 58.1 Undecided 5.6

3. Do you favor phased withdrawal of all remaining U.S. ground forces from South Korea as proposed by President Carter?
Yes 47.5 No 48.7 Undecided 3.8

4. Should the United States resume trade and diplomatic relations with Cuba at this time?
Yes 35.2 No 61.0 Undecided 3.8

5. Should Congress require stronger safety and liability standards for oil drillers and oil tanker operators, although this may mean slightly higher fuel prices?
Yes 71.3 No 25.2 Undecided 3.5

6. Do you favor an extension of the March 1979 deadline for states to ratify the Equal Rights Amendment?
Yes 38.0 No 58.2 Undecided 3.8

7. Different approaches to reductions in federal income taxes are being proposed this year. Do you favor an across-the-board cut for all taxpayers, rather than tax cuts mainly for lower income taxpayers?
Yes 70.4 No 26.7 Undecided 2.9

8. Do you feel federal income tax cuts should be deferred by Congress until a comprehensive tax "reform" package is agreed to?
Yes 38.8 No 56.7 Undecided 4.5

9. Do you expect the economic situation of most Long Islanders will improve during 1978?
Yes 15.3 No 80.0 Undecided 4.7 ●

STATEMENT BY THE HONORABLE THOMAS A. LUKEN ON THE CASE OF JESSICA KATZ

HON. THOMAS A. LUKEN

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 25, 1978

● Mr. LUKEN. Mr. Speaker, I would like to take this opportunity to bring the very serious case of Jessica Katz to the attention of my colleagues.

Jessica Katz is an infant from the Soviet Union who is reportedly suffering from malabsorption syndrome, a disease which makes her incapable of absorbing vital nutrients. She was born on October 3, 1977, but has gained very little weight since birth. Her situation has become extremely serious, as she has shown very little stability in recovering from this disease.

In Cincinnati we have one of two facilities, both in the United States, which are best adapted and best equipped to treat and possibly cure Jessica Katz. One of these, Cincinnati Children's Hospital has written Soviet Minister of Health Boris Petrovsky, offering the facilities of the hospital in treating Jessica.

However, in order to give Jessica this essential medical care, we must first get her out of the Soviet Union, from where her parents have repeatedly been refused permission to emigrate. I have circulated a letter to all Members of the House requesting their support in securing permission for Jessica to emigrate and come to this country.

I am hopeful that, in this case at least, the Soviet officials will listen to our voices and allow Jessica Katz to come to this country. It is essential that we expedite this procedure to get treatment for this very sick infant.

Thank you.●

VOTING RIGHTS FOR YOUNG PEOPLE

HON. LEO J. RYAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 25, 1978

(Mr. RYAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

● Mr. RYAN. Mr. Speaker, 15 years ago, as chairman of an education subcommittee of the California State Assembly, I investigated a situation in Paradise, Calif., in which a great teacher was being harassed and threatened by a few self-appointed anti-Communists who accused her of teaching communism. They conveniently left out the preposition "about" in front of the word.

Today, of course, the climate of fear in the Nation has passed, but that great teacher still teaches. Last week she was in our Nation's Capitol with a group of bright and capable young people under the sponsorship of the fine Close-Up program, and I had a chance to renew our friendship of 15 years.

The students of her school, in San Rafael, Calif., in Representative JOHN BURTON's district, have asked me to introduce a constitutional amendment which would allow all persons eligible to vote in the November election by reason of age, to be eligible to vote in the primary election for the same office. The idea is a good one, and should be swiftly enacted. I am proud to be the author of a bill which was conceived by these students from San Rafael High School and their teacher, Dr. Virginia Franklin.

In 1944, in the Smith against Allwright case, the Supreme Court ruled that the primary was an integral part of the entire election process. All Federal officials should be elected similarly so that no one segment can be denied a crucial vote in the primary. Although the State controls its own primary, it is up to them to supply equal protection of the law, and for this reason Congress should set the example. Ten States, including Delaware, Illinois, Indiana, Kentucky, Maryland, Mississippi, North Carolina, Ohio, South Carolina, Tennessee, Virginia, and West Virginia already have corrected this shortcoming, thus magnifying the existing inequity.

The experience of voting is the ultimate field trip for students who have merely read about government, and this early involvement in the election process will more likely become a lifetime habit. With the passage of this bill, young people will be more involved in the political campaigns of the future and will increase their interest in government. And if we continue to discriminate against new voters, their initial contact with elections will be a negative one. Past experience has shown that many young people do not carry on and pick up their electoral duties after high school because they never had the actual opportunity while in school. This amendment will change that. Those who assisted in initiating what must become a nationwide movement among young people are as follows:

Becky Ablin.
George Afremow.

Joint resolution proposing an amendment to the Constitution of the United States extending the right to vote in any election to nominate any candidate for any Federal office to citizens who will be eighteen years of age or older on the date of the election for such office

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled (two-thirds of each House concurring therein), That the following article is proposed as an amendment to the Constitution of the United States, to be valid only if ratified by the legislatures of three-fourths of the several States within seven years of the date of final passage of this joint resolution:

"Article —

"SECTION 1. The right of citizens of the United States, who will be eighteen years of age or older on the date of any election for the office of President or Vice-President of the United States or for the office of Senator or Representative in, or Delegate or Resident Commissioner to, the Congress of the United States, to vote in any election to nominate any candidate for such office shall not be denied or abridged by the United States or any State on account of age.

"SEC. 2. The Congress shall have power to enforce this article by appropriate legislation.".●

SPECIAL EDUCATION DIRECTORS IN MINNESOTA SUPPORT OBERSTAR BWCA PROPOSAL

HON. JAMES L. OBERSTAR

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 25, 1978

● Mr. OBERSTAR. Mr. Speaker, the Boundary Waters Canoe Area is an issue with which my colleagues in this House are daily becoming increasingly familiar. In the past week, my colleagues have been visited by many of my constituents who have come to Washington to express their great concern over the issue.

The House Interior Committee has recently reported legislation on the BWCA authored by the gentleman from California (Mr. PHILLIP BURTON).

The House will very likely consider that bill within the coming month.

The people of my district are strongly opposed to the Burton-Fraser-Vento bill because of its unreasonable and unnecessary restrictions on recreational use in the BWCA.

The committee bill will severely curtail the existing recreational use within the BWCA. It will reduce access to the BWCA by handicapped Americans and older Americans.

Recently, the special education directors of Minnesota passed a resolution in support of my proposal for the BWCA.

I very much appreciated their support because one of the essential purposes of my bill is to enable people with special needs to continue to enjoy the BWCA.

I would like to share with my colleagues the resolution adopted by the special education directors in Minnesota, cited in the letter I received from Mr. Duane Googins of Minneapolis, president of the Minnesota Administrators of Special Education, informing me of the directors' action:

MINNESOTA ADMINISTRATORS OF SPECIAL EDUCATION,
April 11, 1978.

Hon. JAMES OBERSTAR,
House of Representatives, Cannon Office Building, Washington, D.C.

DEAR CONGRESSMAN OBERSTAR: At a recent meeting of the Special Education Directors of the State of Minnesota the following resolution was adopted:

Whereas, Section 504 of the Rehabilitation Act of 1973 states that, "No otherwise qualified handicapped individual in the United States . . . shall, solely by reason of his handicap, be excluded from the participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance," and

Whereas, legislation regarding the Boundary Waters Canoe Area as proposed by Congressman Phillip Burton, Bruce Vento and Donald Fraser, tends to limit the accessibility for handicapped people; therefore, be it

Resolved, That the Minnesota Administrators of Special Education go on record as supporting the Oberstar proposal which will

allow more liberalized use of motorboats and snowmobiles into the peripheral lakes of the Boundary Waters Canoe Area.

Sincerely,

DUANE GOOGINS,
President of the Minnesota Administrators of Special Education.
MINNEAPOLIS, MINN.●

RHODESIA: WHY, WHY, WHY?

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 25, 1978

Mr. McDONALD. Mr. Speaker, while Ian Smith of Rhodesia proceeds with his timetable on majority rule in Rhodesia, our State Department and President Carter continue to play footsie with the bought and paid for in Moscow leaders of the so-called Patriotic Front, Joshua Nkomo and Robert Mugabe. What the United States is supposed to gain from this insanity has never been made clear. What the Soviet Union and the Communist World will gain is abundantly clear. Again, the Washington Star recently ran another fine editorial on this matter in their April 19, 1978, edition which I commend to my colleagues.

The editorial follows:

[From the Washington Star, Apr. 19, 1978]

RHODESIA: WHY, WHY, WHY?

The road to Dar es-Salaam, like a more famous road, is paved with good intentions. And is it really less treacherous?

There, in the capital of Tanzania, an Anglo-American diplomatic team (Secretary Vance, Ambassador Young, and Dr. Owen, the British foreign secretary) met again with Joshua Nkomo and Robert Mugabe, the fire-eating leaders of the Rhodesian Patriotic Front.

Afterwards, the parley was pronounced a success, inasmuch as Messrs. Nkomo and Mugabe said they might join an "all-party" conference on Rhodesia's future. If this is success, what would failure consist of? The two guerrilla leaders haven't given an inch on the tough program they outlined at Malta some weeks ago. In fact, they have toughened it. They still want a single-party dictatorship on Marxist lines in Rhodesia. They still demand control of the army and the police, and a "predominant" role in the transitional government. As for the future, Mr. Mugabe now denounces political variety—that is, the toleration of any political parties other than his own—as a "luxury."

These views are unacceptable to the new government in Salisbury, where Prime Minister Ian Smith and his National Front have set in motion a plan for majority rule, adopted a new constitution, and released political prisoners.

So what is the gain? The aim of the Anglo-American plan, supposedly, is to avoid a civil war. But its effect may ultimately be otherwise. The other day in Nigeria, President Carter subscribed to a communique describing the new internal government in Rhodesia as illegal. We are not sure what that means. It may be illegal in the sense in which the Continental Congress was illegal in 1776, for whatever ice that cuts.

The heart of the matter, however, is that Bishop Muzorewa and the other black leaders inside Rhodesia have a far larger political constituency than either Mr. Nkomo (who has a slight one) and Mr. Mugabe (who reportedly has next to none). The hope of the latter two for power in Rhodesia—other than by shooting their way in—is kept alive today by an unholy collaboration between the U.S., Great Britain, and their arms suppliers in the Soviet Union.

If the issue is, as advertised, democratic rule in Southern Africa, will someone please explain to us how that objective is advanced by continuing to abase ourselves before those who spout anti-democratic and authoritarian demands? ●

MONARCHY AND MEDICINE

HON. PHILIP M. CRANE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 25, 1978

● Mr. CRANE. Mr. Speaker, with National Health Insurance proposals blooming in every legislative garden this spring, the bureaucratic gardeners in HEW are busily working away drafting proposals and implementing plans. Not to add to the proposals but to shed a little light on the matter, I would like to insert a timely and excellent article by Mr. William Simon, former U.S. Secretary of the Treasury and now a financial consultant with Booz, Allen & Hamilton, Inc. Instead of examining the NHI proposals, Mr. Simon dedicates the vast part of his article to examining the basic premise under which these health plans have been formulated and dismantles all the arguments put forth by those who would want the Federal Government to take over our health care system:

The article follows:

PREVENTING MEDICINE

(By William E. Simon)

Although he remains relatively calm about welfare and unusually silent on the subject of educatiton, Mr. Carter's ebullient HEW secretary, since the moment of his appointment, has issued an incessant stream of complaints about the system of American health care.

"We perceive health care in America today," says Joseph Califano, "as a vast, sprawling, highly expensive, and virtually non-competitive industry . . . a unique system of economic relationships that are commanding, and controlling, an ever larger share of our nation's resources." That is the essence of Califano's complaint. And his solution? "National Health Insurance to protect all Americans from the crushing burden of medical expenses is essential."

Perhaps the first thing to note here, in both Califano's statement of the problem and his proposed solution, is the striking lack of of logic. There is little competition in the health care industry, Califano charges. Therefore, nationalize it. But this is rather like saying that the way to solve the problem of the Imperial Presidency is to establish a Monarchy. The concept of the divine right of kings would do little to democratize the White House. Nor would the socialization of the health care industry, no matter what else it accomplished, increase competitiveness. Further, to imply that Americans now burdened with medical bills would be miraculously relieved of those burdens if their bills were first recycled through Washington is not only illogical, but downright dishonest.

True, there is a cost problem. In 1976, the national health care bill came to just under $140 billion, a difficult figure to come to grips with. But the answer, surely, is not massive federal intervention. As even the President's Council on Wage and Price Stability (COWPS) admitted in 1976, after years of avoiding the issue: "It is all too apparent that right now with current reimbursement programs and the ubiquitous and often conflicting morass of regulations, the Federal government, instead of being part of the solution, is part of the problem of rising health care costs."

Nor are the analyses which occasionally issue from Califano's own bailiwick much more reassuring. Hard and fast federal figures on the subject are difficult to come by, but according to one recent HEW estimate, a comprehensive "sperm-to-worm" program, such as that being proposed by Senator Edward Kennedy, could boost the nation's health care tab to $248.3 billion by 1980. Other proposals before Congress are little better. One, favored by the American Medical Association, could raise the nation's health care bill to $243.8 billion by 1980; a plan favored by the insurance industry would increase the cost to $234.5 billion.*

Logical? According to most measures and nearly every honest estimate, a federal takeover of the health care system would push prices up very near the outer limits of our ability to pay them. Partial federal intervention is now driving prices skyward, as COWPS points out; total federal intervention would accelerate the process. When the problem is discussed as the solution, we may be right in feeling that things are just a bit out of whack.

But logic seems to play no role in the discussion. Califano and his health-care planners simply skip around the figures, never taking them seriously, even when the government itself puts them out. Occasionally, when pinned down, they will acknowledge the figures, but argue that they are inaccurate. Such estimates cannot be accurate, they say, because they do not take into account the basic cost-cutting theories now espoused by the government.

One such theory involves the practice of preventive medicine, and runs this way: If financial barriers to access are eliminated on the primary level (doctors' offices, clinics, etc.) through a comprehensive health insurance program, then minor health problems will be arrested before they develop into major problems, thereby reducing the cost of treatment.

On the face of it, this is an attractive theory. But on reflection it makes little sense, for the vast majority of our health problems are not problems that early care can prevent. How many of us, when we think back over the past year, have been to see a doctor about a problem that an earlier visit would have prevented? In general, the answer is precious few. A cracked rib, an infected eye, an infected ear, bronchitis, viral afflictions of all kinds, a sprain, a strain, a fall, a broken arm, a broken leg—these ailments and others like them form the bulk of the problems that we take to our doctors. None of them would be prevented by early visits.

There are, of course, extremely effective preventive procedures. Hypertensive medication for high blood pressure comes to mind, as do certain methods of cancer

* The tendency for such federal programs to grow tremendously should not be overlooked. Medicaid was supposed to cost $200 million per year when it was proposed in 1966. By 1968 the annual cost had jumped to $1.9 billion. In fiscal year 1977 Medicaid cost $10.3 billion.

screening. But cost alone is seldom the barrier which prevents us from seeking such treatment. On the whole, the diseases involved here are of such consequence that those fearful of being afflicted would not find a relatively modest doctor's fee in any way a cause for procrastination. True, there may be people both genuinely concerned and genuinely unable to pay. But they are already covered by Medicaid or Medicare. For those not so covered, with marginal medical budgets, there are thousands of free clinics. For the rest of us, the fact that we procrastinate springs from something infinitely more complex than a physician's fee, and abolition of that fee would make the prospect of a visit to the doctor no more seductive.

Human nature presents a profound problem for the proponents of preventive medicine. We cause most of our own basic health problems by eating too much, smoking too much, and drinking too much. We refuse to exercise, we drive our cars unsafely, and some of us won't even use seatbelts. All this, say preventive medicine proponents, is the result of our "life-styles." Change those lifestyles, and there would be far fewer health problems. All of which, of course, is true. But the advocates of preventive medicine run into trouble when they attempt to explain just how free medicine would effect a significant life-style change. Indeed, it might be argued that a government which encourages us to put total responsibility for our health into its hands could end by making us even less responsible for our own health. Some day, of course, they may have us all out at lunch hour, exercising in the parking lots to the tune of loudspeakers. But until then, if Califano actually believes that a socialized system would compel us to trot obligingly into our doctor's office so that he can tell us to stop smoking so that we can then go home and do so, his view of human nature is hopelessly muddled.

Nor does his view of the basic human condition seem much clearer. The most important preventive techniques are those that detect and prevent major medical problems. But to characterize such techniques as "money saving" is surely to miss an important point—we all die anyhow, and few of us die healthy. Save us from one thing, and we will eventually suffer from and die from another. And a great deal of money will be spent on us in the process. Consider: A man found to have operable prostate cancer at 40 may be saved to enjoy the benefits of a pacemaker at 65. Or a woman whose hypertensive problems are brought under control at relatively little expense at 60 may at 70 suffer from advanced senility and be placed in a nursing home. In each case, a great deal more money will be spent on such patients than would have been spent had the preventive techniques not succeeded.

This is as it should be, for that is what American medicine is all about. But here again, in the government's characterization of such techniques as "money saving," we run into one of those great reversals of logic. Such techniques by definition must cost, rather than save, money. The only real way to save money on that man with the prostate cancer is not to treat him at all. That, of course, is something no American doctor would think of doing. But, public statements about preventive techniques as money savers aside, there are hints that the idea has occurred to high HEW officials. In public, they continue to take the approved line on preventive medicine. In private, however, they are saying things that suggest a radical redefinition of the preventive concept, one which more nearly squares with logic but violates every precept of American medicine.

Recently, for instance, a storm briefly swirled through HEW when an internal memo was leaked to the press. The memo, from Robert Derzon, director of HEW's newly created Health Care Financing Administration, suggested that Califano consider a number of ways to bring costs under control. Among Derzon's suggestions: discourage the use of sophisticated medical technology; limit the supply of doctors; slap controls on doctors' fees; encourage welfare mothers to get abortions; and persuade the states to adopt "living wills" by threatening to withhold federal funds.[1]

Abortions would be beneficial, explained Derzon, because "every unwanted birth prevented saves about $1,000 annually in welfare payments and another $100 in Medicaid funds." Too many kids, costing too much? Simple. Abort them. Too many old people? "Over one-fifth of Medicare expenditures are for people in their last year of life," Derzon observes pointedly. The solution? Living wills, an approach which encourages oldsters to acquiesce in euthanasia. Neat. Not everyone quite appreciated the simple beauty of Derzon's approach, however. As Harry Schwartz of the *New York Times* pointed out, "Mr. Derzon likes euthanasia. . . ." Such a predilection on the part of the high HEW official who will probably be tapped to run any system of national health insurance is something less than reassuring.

Derzon, in typical bureaucratic fashion, has since denied meaning what he said. But as Schwartz points out, "what is irrefutable is that these and related ideas have recently been actively discussed at the highest policy levels of HEW."

Closely tied to the theory of preventive medicine is the assault on what Califano and the federal planners call "runaway medical technology." Right now their argument is that what needs controlling most are costs at the upper level. Give them the power to pay the total health care bill, they say, and they will hold down those costs by refusing to pay for certain procedures and types of treatment. But do we really want that? Most of us, when someone close becomes very sick, will seek out the very best treatment money can buy. To this end we shop for private insurance policies which guarantee that we will be able to pay for it—and if we do not have such insurance, we will go deeply in debt to pay for that treatment. But now the government is talking as though it intends to save us from those urges—whether we want saving or not—by denying us certain kinds of services and treatment.

What would that mean? It might mean, for instance, that a child with a brain tumor would not have access to a sophisticated brain scanner that could pinpoint the tumor's location. It might mean that the hospital nearest to the heart attack victim would not have a cardiovascular unit. With the government firmly controlling the purse strings and determined not to pay for such equipment, it would not be purchased.

Increasingly, national health insurance proponents are depicting hospitals as luxury playgrounds for medical dilettantes, and breathtaking medical technologies as expensive toys for grownup boys. (One HEW expert, at a recent meeting in Washington, referred to some of the most important technological devices of the century as "whatsydutsy machines.") Get rid of all that frivolous technological stuff, the attitude seems to be. It just drives up costs, and if we all practice preventive medicine, we won't need it anyhow. What is seldom acknowledged is that hospital improvements and medical technology aim either to preserve life or to enhance its quality. When the time comes for each of us, we would probably prefer to have had our money spent in this manner. But, again, perhaps the unstated argument is that the single best way to save money is to prevent life from lingering.

Here, as in so many other cases, Califano has things backwards. If he and his peers truly wanted to hold down costs and enhance the quality of care, they would start at the other end and attempt to eliminate services on the primary level. As any physician will tell you, this is where health care expenditures are truly wasted. As matters now stand, doctors are plagued by a horde of patients with self-treatable or nonexistent afflictions. There is the patient with the scratchy throat, the patient concerned with excessive or inadequate body hair, the patient who sometimes gets a funny feeling in his right shoulder, the patient who simply enjoys the attention of a physician and finds his office a satisfying social center. And as third-party payments increase—and with them the illusion of free medicine—so do such patients increase proportionately.

Califano, however, is working from the other end. He intends to encourage *more* utilization on the primary level by providing free and unlimited access to services, while at the same time limiting access at the upper level. With unlimited access, concludes a Rand Corporation study of National Health Insurance, treatment in doctors' offices would increase by 75 percent. This increase would take place precisely where it is needed least; and what's more, it would dramatically siphon off dollars essential to our care.

In effect, the Califano approach consists of taking resources from those who genuinely need them and distributing them among those who do not. If he were to take a similar approach to education, he might end by funding postgraduate courses for cafeteria help and janitors, while denying them to all students with an I.Q. over 125. Were the same approach taken to welfare, able-bodied bachelors might be encouraged to go on relief, but disabled women with dependent children would be discouraged.

National Health Insurance is simply not the most effective way to guarantee the nation's good health, nor is its method on allocating the health care dollar either wise or just. Nor is its current rationale in any way logical. Health care costs are soaring we are told. Therefore, we must institute a system that by the most conservative estimates could add $16 a billion a year to those costs. If Califano and his colleagues really believe that, they're bananas.

But they're not, of course. At least not all of them. Most of the HEW planners are simply doing their jobs. And this is especially true of Califano. He is a hired gun, and a good one, the quintessential Washington operator, totally loyal to whoever happens to be paying his fee. He has been told to pave the way for a system of National Health Insurance, and that is what he is doing. His method is an effective one. He looks for whatever apparent weaknesses appear in the present system and he shoots holes in them, and it is irrelevant whether or not his charges are untruthful or exaggerated. And because he does it well, it occurs to few that his facts are frequently either distorted or simply wrong. But they are.

Take his most basic assertion—health care costs are spiraling out of sight. Califano would have us believe that the increase in these costs is outstripping the increase in the costs of all other commodities. But this is not the case. In fact, according to the Consumer Price Index (CPI), medical costs over the past decade have not risen nearly as rapidly as the costs of many other essential services. According to an analysis of the CPI by the American Medical Association, the equivalent

[1] A "living will" spells out the conditions under which a person would not want to continue living—e.g., dependence on a life-support system.

of a dollar's worth of medical care in 1967 costs $1.85 today. In comparison, insurance and finance charges which cost a dollar in 1967 have risen today to $1.97; legal expenses have risen to $2.00; and postal fees, under government supervision, have risen to $2.22.

Many other costs have also outstripped medical costs. A dollar's worth of auto repairs in 1967 now goes for $1.90; appliance repair has risen to $2.00; plumbing services are up to $2.10; house reshingling, $2.33. Then there are the consumer products—sugar, coffee, seafood, rib roasts, bacon, ham, tuna fish, potatoes, and, of course, electricity and everything connected with energy. Even a dollar's worth of blue jeans in 1967 goes for $1.90 today.

Consider as well, the bite the Social Security tax is taking out of consumers' paychecks. From 1967 through 1977, the maximum Social Security tax increased approximately twice as much as health care costs over the same period. And with the massive new increases enacted by Congress—the members of which, incidentally, do not have to contribute—the sky's the limit.

Nor are comparative price rises under the present system expected to be particularly dramatic, even though federal programs permit millions of poor Americans to enjoy virtually limitless access to health care. According to a projection by Predicasts, Inc., expenditures for education since 1957 will have risen in 1990 by a yearly average of 8.2 percent. Welfare costs will have risen 11.1 percent over the same period, and health care costs will fall in the middle at 10.9 percent.

If this forecast is at all accurate, the situation seems much less alarming than Califano would have it. But Califano is not interested in figures that undermine his case, and he chooses his statistics carefully. Thus, whenever he complains about rising costs, he goes to the Social Security Administration's compilation of health care statistics for 1975 and 1976. These are two good years, for the statistics, if taken alone, do seem to demonstrate that health care costs are the major problem.

But what Califano and others who single out these two years do not discuss is that the size of the figures is due not so much to costs out of control as to costs *under* controls—the Nixon controls, that is, which remained in effect in the health care field a year after they were lifted in most others.

Thus in 1975, the first full post-control year, medical care costs as recorded on the CPI shot from 5.7 to 12.5 percent—certainly an alarming statistic when taken in isolation. But in 1974, the year in which the rest of the economy was freed from controls, the CPI for all items jumped from 4 to 9 percent, and in 1975 it climbed to 11 percent. In 1976, the third control-free year, the CPI for all items levelled off at 7.1 percent. In the same year, the second year in which health care costs were free from controls, the medical care component of the CPI dropped from 12.5 to 10.1 percent.

Economists call this phenomenon of post-control prices rising to their natural level a "bulge." The bulge is commonly thought to subside after two years. But in the case of the CPI for all items, it was a three-year process, while the figures for 1975 and 1976 cover only the first two years of the health care component bulge. Thus, the relevant comparisons would be between 1974 and 1975, and between 1975 and 1976. When one compares the figures year for year, as Califano does, the comparison between the cost of medicine and the cost of everything else must inevitably be distorted.

In fact, if one stretches the span out a bit the results are quite different. If, for instance, one averages the medical price rise between 1973 and 1976, and then compares that increase with the rise in costs of all other items, the rate of increase is almost exactly the same. All items on the CPI during that period rose 31.1 percent. Medical costs rose 31.5 percent. That means that since 1973, health care costs have risen at a rate less than one-half of one percent higher than all other items.

It is not quite fair, of course, to confine such an analysis to the 1973–1976 period. Between 1965 and 1973, for instance, health care costs rose 9.6 percent more rapidly than other costs. But these were the years of the great gathering together of federally insured patients, and that increase is directly attributable to federal programs. In any event, it is surely as fair to compare costs between 1973 and 1976 as it is to complain only about the price rises of 1975 and 1976, without acknowledging the effects of price controls.

Califano's tendency to overstate and to use statistics selectively is especially apparent in his frequent assaults on pharmaceuticals. Among all major industries, pharmaceuticals have been most successful at keeping prices down, and in terms of real dollars we are paying considerably less for our prescription drugs now than we were a decade ago. Between 1967 and 1977, according to the Social Security Administration, prices for all goods rose approximately 44 percent. During the same period, however, the price of prescription drugs rose just a bit less than 19 percent.

That figure is especially remarkable when you consider the effect of FDA regulations on the drug industry. During the mid-1960s, it cost approximately $1.5 million to develop a new drug and win federal approval to market it. Today, that cost has risen to an estimated $15 million. Yet in 1976, when other costs were rising 5.7 percent, drug prices rose only 3.9 percent.

Nevertheless, despite the figures, the prices of drug products are under almost constant attack in Washington. Senator Kennedy has called for (but not held) hearings on drug prices. The Naderites, in their sixties, with-it fashion, talk of "drug ripoffs." And Califano, in his peculiar rococo style, talks of "patent monopoly pots of gold at the end of the research rainbow."

In each of the areas discussed here—preventive medicine, the "drug ripoff," spiraling costs—the fashionable indictments of the present health care system collide with a collection of real-world facts. But these facts are seldom aired, for the men who set the terms of the national debate simply are not interested in hearing them. These men have been appointed to bring in a system of National Health Insurance. So the existing system is by definition bad, and anything at all is fair that might help to discredit it.

Their job is not an easy one, however. For one thing, the line shifts radically from year to year. Ten years back, when the economy was booming, we were told that although National Health Insurance would be expensive, it was necessary because many Americans were receiving unequal care. Then came Medicare and Medicaid, the problems of equity and access were alleviated, and we were told that, although we were all getting it, American medical care was shoddy and incompetently practiced; that we were not getting what we paid for; and that, although National Health Insurance would be expensive, it would enable the government to exercise control over the quality of care.

Now, however, the line has shifted again. It isn't quality we're worried about any longer. It's cost, pure and simple. Previously the approach was to try to convince us that National Health insurance was affordable. Now we're being told that we cannot afford not to have it.

One wishes, before Califano nationalizes our system of medicine, that he would reassure us all by pointing to just one instance in which government intrusion into the private sector has resulted in a less expensive product—or for that matter, a product of higher quality. To my knowledge, that has never happened, and it would be highly unlikely to happen in the complex field of health care.

But perhaps we needn't worry. The first target date for National Health Insurance was late 1977. Then it was moved up to mid-1978. Now Califano is talking about early 1979. In the meantime, as the projected NHI cost estimates continue to soar, the American people, already afflicted by inflation and threatened by a huge new Social Security tax bite, may decide they simply do not want to foot the bill for a nationalized system of medicine. Besides, as most Americans who think about it have come to understand, we already have a comprehensive national health care system, created by the private sector. And in comparison to the systems of those nations—especially Great Britain—where medicine has been socialized, it doesn't look bad at all.●

KEEP LOBBYING DISCLOSURE BILL STRONG

HON. ROMANO L. MAZZOLI

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 25, 1978

● Mr. MAZZOLI. Mr. Speaker, on April 19 and 20 the House took up H.R. 8494, the Public Disclosure of Lobbying Act. During the activities of those 2 days, the House adopted very important strengthening amendments to the bill.

One amendment requires lobbying organizations to report expenditures for grassroots lobbying activities.

Another requires lobbying organizations to disclose the names of major groups contributing $3,000 or more to their operations.

And, a third requires organizations to disclose the names of their chief representatives, whether paid or unpaid, who engage in lobbying communications on behalf of the organization.

These improvements convert H.R. 8494 from a good bill into an effective and serious lobbying reform bill.

So, when H.R. 8494 comes before us tomorrow for further consideration, I urge my colleagues to keep these improving amendments in the bill and to reject all efforts to delete or weaken them.

H.R. 8494 strikes the necessary balance between the public's right to know who and what influences Federal lawmaking and the public's right to petition its elected officials and to seek redress of grievances.

It is a bill we can be proud of. Let us not change it now.●

SENATE—*Wednesday, April 26, 1978*

(Legislative day of Monday, April 24, 1978)

The Senate met at 9 a.m., on the expiration of the recess, and was called to order by Hon. DENNIS DECONCINI, a Senator from the State of Arizona.

PRAYER

The Chaplain, the Reverend Edward L. R. Elson, D.D., offered the following prayer:

Let us pray in the words of the favorite daily prayer of General of the Army Douglas MacArthur—

"Give me, O Lord, that quietness of heart that makes the most of labor and of rest. Save me from passionate excitement, petulant fretfulness, and idle fear. Teach me to be alert and wise in all responsibilities, without hurry and without neglect.

"Tame Thou me and my tongue that I might not transgress. When others censure, may I seek Thy image in each fellow man, judging with charity as one shall be judged.

"Banish envy from my thought and hatred from my lips. Help me to be content amid the strife of tongue with my unspoken thoughts.

"When anxious cares threaten my peace, help me to seek Thee, that I may find my rest and be made strong for calm endurance and valiant service." Amen.

APPOINTMENT OF ACTING PRESIDENT PRO TEMPORE

The PRESIDING OFFICER. The clerk will please read a communication to the Senate from the President pro tempore (Mr. EASTLAND).

The legislative clerk read the following letter:

U.S. SENATE,
PRESIDENT PRO TEMPORE,
Washington, D.C., April 26, 1978.

To the Senate:

Under the provisions of rule I, section 3, of the Standing Rules of the Senate, I hereby appoint the Honorable DENNIS DECONCINI, a Senator from the State of Arizona, to perform the duties of the Chair.

JAMES O. EASTLAND,
President pro tempore.

Mr. DECONCINI thereupon assumed the chair as Acting President pro tempore.

RECOGNITION OF LEADERSHIP

The ACTING PRESIDENT pro tempore. The Senator from West Virginia.

Mr. ROBERT C. BYRD. Mr. President, are there any orders for the recognition of Senators on tomorrow?

The ACTING PRESIDENT pro tempore. No, there are none.

ORDER FOR RECOGNITION OF SENATOR LEAHY ON TOMORROW

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that Mr. LEAHY be recognized for not to exceed 15 minutes tomorrow morning after the two leaders have been recognized under the standing order.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

THE JOURNAL

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Journal of the proceedings be approved tc date.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I have no request for my time.

RECOGNITION OF LEADERSHIP

The ACTING PRESIDENT pro tempore. The Senator from Alaska.

ALASKA: AMERICA'S FROZEN ASSETS

Mr. STEVENS. Mr. President, recently "International Business," a magazine which covers the international business community, devoted their entire edition to "Alaska: America's Frozen Assets." The magazine includes articles on resources in Alaska, including agriculture, mineral, and oil and gas reserves as well as discussions of the d–2 issue by State and national leaders. I believe that these articles contain a great deal of insight which should be considered as Congress moves toward making a critical decision on the appropriate utilization of Alaska's resources. I intend to submit several of these articles for the RECORD over the next few weeks.

The article I would first like to draw to the attention of the Senate is an article by Dr. William J. Darch, president of Alyeska Pipeline Service entitled "Oil! And the Future of Alaska!" Dr. Darch's piece is particularly enlightening as it goes through the history of oil at Prudhoe Bay from discovery to delivery and then discusses the prospects and problems in Alaska's future. I ask unanimous consent that this article be printed in the RECORD at this point.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

OIL AND THE FUTURE OF ALASKA

(NOTE.—International Business had an opportunity to meet the president of Alyeska Pipeline Service Company, Dr. William J. Darch, during our visit to Alaska. A native of Wales, this multifaceted gentleman played international-level rugby while earning his bachelor's, master's, and doctoral degrees in chemical engineering.

(He has served in several positions in British Petroleum, Ltd. since first joining the firm in 1948, and his responsibilities have taken him from Wales to Perth, Australia, to Montreal, Quebec, to London, and in July of 1976, to Anchorage, and Alyeska.

(IB asked Dr. Darch to provide our readers with a brief summary of the petroleum industry's history and present role in the state, and where he foresees its future, and future problems. We are most grateful for his generous response.)

OIL AT PRUDHOE BAY!

Discovery to delivery

January, 1978 marks the tenth anniversary of the discovery of crude oil at Prudhoe Bay. By the middle of 1968, further exploratory wells had delineated the magnitude of the Prudhoe Bay find. The field contained some 9.6 billion barrels of oil. It was the largest single deposit of oil ever found in the United States.

At this point, Alaska was ready to step into the major league of oil producers. There was to be a long period of gestation, however, before the schemes for production and transportation of the oil could reach fruition, and Alaska could take its rightful place as a major oil producing state. The longest single delaying factor was the construction of the Trans Alaska Pipeline System (TAPS).

There were two general sets of problems that created the delay. First, there was the problem of getting a transport system approved in Washington, D.C. The proposed route of the pipeline lay largely over Federal and State lands, and the government was more involved in the details of the project's planning than it had ever been with any previous project. The granting of the many requisite permits was delayed, time and time again. The Congress was also debating new legislation that would have monumental influence on the project.

Three pieces of legislation which had direct impact on the building of TAPS were finally passed between 1970 and 1973. The National Environmental Policy Act was passed late in December and became law on January 1, 1970. Meanwhile, the Congress moved to expedite the settling of land claims of Alaskan natives. In December 1971, the Alaska Native Claims Settlement Act became law, granting 40 million acres and a cash settlement of $962 million to Alaska's native people, clearing a major legal hurdle for securing a pipeline right-of-way across Alaska public lands. In November 1973, after another two years of Congressional debate, the Trans Alaska Pipeline Authorization Act was enacted, clearing the way for the project to begin. A target date of mid-1977 was set for completion and startup of the pipeline system.

Then the second set of problems began, relating more to operating in Alaska than to Washington, D.C. The physical and psychological problems of working in the remote, harsh Arctic were monumental. Unprecedented environmental stipulations, governmental monitoring and regulation made a very difficult job sometimes seem impossible. But we had decided on two major goals, and we aimed to keep them: protecting the environment and doing the job as fast as possible to meet the national need.

Finally, the project was completed. On August 1, 1977, a tanker sailed from Valdez carrying 840,000 barrels of crude oil from Alaska's North Slope. Since then a steady stream of vessels have carried more and more Prudhoe Bay crude to waiting markets in the "Lower 48" states.

Prudhoe and the Nation

The significance of Prudhoe Bay oil to the Nation was underscored at the time the enabling legislation passed the Congress. The project was approved "in the national inter-

est" as it represented a significant step towards reducing U.S. dependence on foreign oil. Over a period of years, the decline in domestic oil and gas production, coupled with the high growth rate in energy demand, had led to ever increasing levels of foreign oil imports. By the first half of 1977, U.S. crude production had reached its lowest point since 1965. With the addition of Prudhoe Bay oil, the six-year decline in domestic crude production was finally reversed. Because of international political and economic events, Alaskan oil had become a matter of extreme strategic significance.

The October 1973 Middle East crisis and oil embargo left the world a different place. The international energy and economic picture has darkened considerably for major oil-consuming nations and the Less Developed Countries. Meanwhile, the OPEC Nations, who control most of the world's oil production, have raised the price of oil fivefold since 1973 and, as of 1976, have accumulated a surplus of $36 billion. There is little doubt that OPEC will raise prices again and again in the years ahead, the only questions being how soon and by how much. Recent projections suggest that, if there is a slow-down or collapse in Arab-Israeli peace efforts, a real oil price increase in the range of 10–15 percent is likely as soon as 1978 or early 1979.

The effect of all this on the U.S. has been to increase the national significance of Prudhoe Bay crude. In the early 1970's, the U.S. paid an average of less than $4 barrel per annum for its imported oil. In 1976 the U.S. bill for oil imports was $32 billion. And in 1977, the U.S. spent more per month on imported oil than it spent per year less than a decade ago. But, by the end of 1977, about 130 million barrels of North Slope oil will have been delivered to U.S. markets. At current world prices, this should reduce the foreign trade deficit by about $1.8 billion during 1977. In 1978, the first full year of operation, the pipeline will be delivering oil at a rate which will offset about $5.6 billion in oil import costs or more than 15% of the national bill for oil imports.

The delivery of Prudhoe Bay oil through the Trans-Alaska Pipeline is also significant as a demonstration that energy and environmental considerations can be accommodated in the United States. One writer who flew over the pipeline compared its impact on the Alaska wilderness to the impact of a thread stretched across Manhattan. Those who have seen the pipeline area have been impressed with the environmental achievement that it is. The pipeline also represents an important technological achievement, illustrating that science and ingenuity, combined with human care and concern, can safely open the nation's vast frontier areas for exploration.

Prudhoe and the State

Most people would probably agree that the Prudhoe Bay discovery put Alaska on the map. National and international attention has focused on Alaska as it never had before. As with most such occurrences, the results of all this attention have been both good and bad. But it seems safe to say that more good than bad resulted from the discovery and the presence of the oil industry in Alaska.

The major beneficial influence to Alaska has, of course, been economic. During the years of Trans-Alaska Pipeline construction, Alaskans in many parts of the State enjoyed a tremendous gain in direct and indirect employment related to the pipeline and North Slope development. Average family income in Alaska has soared, thanks to the Prudhoe Bay discovery. In 1968, Alaskan average family income was $11,650 per year. In 1977, family income averaged $22,000 per year, an impressive gain even with inflation.

The effect of Prudhoe Bay on the State's budget has been monumental. As the budget has multiplied, needed social and educational programs could at last be implemented. And the State is now involved in a debate as to what to do with the billions of dollars of surplus revenue expected to flow into State coffers by 1985.

In fact, relatively few Alaskans seem to view the discovery at Prudhoe as a negative with respect to Alaska. After all, Alaska has one million acres for every day of the year, and compared to her land size, the population is still so small that Alaska's land/people ratio reminds one of a vast undeveloped nation. Although Alaska's population has significantly increased since the Prudhoe discovery, the population growth rate has stabilized. Overall, it appears that most Alaskans want to see continued, steady resource development in their State, in large measure because Alaskans want economic independence and because resource development means jobs for Alaskans.

ALASKA'S FUTURE: PROSPECTS AND PROBLEMS

The potential of Alaska

As concern over global resource shortages has increasingly attracted international attention, the world has not forgotten Alaska. Indeed, Alaska's reputation as "the last frontier" appears increasingly important in terms of her vast untapped resources. And one can't help wondering why more resource development has not taken place during the decade since the Prudhoe Bay discovery.

Alaska's resources are exceedingly plentiful. According to the U.S. Geological Survey, 40% of the remaining oil to be found in the U.S.—up to 49 billion barrels—is in Alaska or off her shores. Undiscovered recoverable natural gas in Alaska could be as high as 132 trillion cubic feet.

Furthermore, geologists estimate that Alaska has half the Nation's uranium reserves; fantastically large copper deposits; perhaps the richest molybdenum find in the United States; nickel deposits that may exceed those of any place in the world; and estimated potential coal reserves of almost 3 trillion tons.

It seems that once again, however, potential development in Alaska is being slowed as before because of (1) the Congress in Washington and (2) the environment in Alaska—only this time, it's not just the climate of Alaska that is slowing development, it is, inadvertently perhaps, state government resource policies that have been developing over a period of years. The Washington problem, the so-called d-2 lands issue, is fairly well known. Problems relating to the Alaska State Government are becoming increasingly well known. Hopefully, both sets of issues will be resolved to the benefit of Alaska in the not too distant future.

The d-2 question

The future of Alaska stands very much in balance with the current discussion on the so-called d-2 lands issue. Today less than 1 percent of Alaska's 375 million acres is in private ownership. In 1966, former Interior Secretary Stewart Udall clamped a freeze on land transfers until Congress acted on the native claims. In 1971, the Alaska Native Claims Settlement Act provided 40 million acres of land and almost $1 billion for the natives. In the Settlement Act was a provision, Section 17(d)(2).

While the main purpose of the NCSA was to settle the legal issue of aboriginal claims on Alaska lands, clearing the way for pipeline construction from the North Slope, many Congressmen looked on the claims bill as a way to settle many more general issues involving Alaska public lands. To get the support of Eastern-state Congressmen with strong environmental constituencies, it was necessary to use the promise of creating 80 million acres of new parks, refuges and forests in Alaska as a tradeoff for their support for 40 million acres to Alaska Natives and a final settlement of the long-standing land claims question.

But now, as legislation establishing those parks and refuges starts moving through Congress, a new move by conservation groups has focused on legislation that would add "wilderness" designations to the d-2 lands and other federal lands in the state. Wilderness classification is a formal designation that would prohibit any access by aircraft or motorized vehicles. For all practical purposes, this would end any exploration or development activity on these lands, for petroleum, coal, minerals or other resources.

One bill in Congress, H.R. 39, sponsored by Rep. Morris Udall and 22 co-sponsors in the House of Representatives, would designate about 146 million acres as wilderness, about half the total land area of Alaska! Almost half the acreage covered in the Udall bill is underlain with significant deposits of sedimentary rocks which are, of course, the source rocks for petroleum. It also appears that most of Alaska's lands with mineral potential would be covered by H.R. 39, as well as roughly 90 percent of the State's potential hydroelectric sites, about 50 percent of the commercial timber lands, and about 6.5 million acres of potential agricultural lands.

It does appear that the more extreme sections of the "Udall" bill are headed toward modification in Congressional committees later this year. Congressman Lloyd Meeds of Washington is now working on a compromise bill in the House, for example. But as the major d-2 bills start to move in Congress next year, Alaskans will still be concerned that substantial acreages will be given the formal designation of "wilderness."

SPECIAL ORDER

The ACTING PRESIDENT pro tempore. Under the previous order, the Senator from North Carolina (Mr. MORGAN) is recognized for not to exceed 15 minutes.

S. 2991—PILOT PROJECTS FOR FREE SCHOOL LUNCHES

Mr. MORGAN. Mr. President, today I bring before this body a bill that is designed to improve the health and well-being of this Nation's children.

The legislation I am introducing today will test the full social and economic costs and benefits of a free school lunch program. This legislation will accomplish this objective by establishing pilot projects for free school lunches in various areas of this diverse Nation.

This bill represents a middle ground in the effort to enhance our child nutrition programming. I would prefer to see passage of S. 1251, a bill which would mandate a universal free school lunch program for the entire country. This legislation, introduced by the late Senator Hubert H. Humphrey and myself, enjoys wide support from both sides of the aisle. Unfortunately, many people do not yet fully appreciate the benefits of such a program. Consequently, something less than what is really fully needed must be sought.

On numerous occasions I have shared with the members of this chamber my view that a universal free school lunch program should be made an integral part of our educational system. After all, what is more important than nutrition, particularly for youngsters who are growing and in need for sufficient vitamins, minerals and protein along with the other

nutritional essentials for good physical and mental health.

Mr. President, I strongly feel that the lunch program should be viewed as much a part of our school program as textbooks or bats and balls. To continue to separate this program, as we do now, seems to make no sense to me.

There are a multitude of reasons—economic, social, and educational—why we should move to a universal free school lunch program. I have discussed these reasons as recently as April 10, when I appeared before the Subcommittee on Nutrition of the Senate Committee on Agriculture, Nutrition and Forestry. I intend to make my statement of April 10 a part of the record here today.

Mr. President, this bill is really quite simple. It calls for the Secretary of Agriculture to conduct not less than 30 such pilot projects in representative areas during the 2-year life of the bill. This bill authorizes only funds that will be needed to operate a free program, with the remaining funds coming from regular school lunch funding.

Matching State and local contributions, on a per lunch basis, will not be reduced.

Further, this bill mandates program evaluation of these projects by the Secretary of Agriculture, with the Secretary's report going to the appropriate committees of the Congress. As a result, Congress will have a full accounting of the worthiness of this program.

I am pleased that Senators McGOVERN, and HUMPHREY, have offered their support for this much needed legislation. I am hopeful that this bill will be considered by the Subcommittee on Nutrition when it begins its markup of child nutrition legislation in May.

The American School Food Service Association has endorsed this legislation.

Enactment of this bill will mark a welcome addition to our basic child nutrition statutes. I am confident that passage of this bill will inevitably lead us to the conclusion that a universal free school lunch program would be a worthy addition to our Nation's nutrition program.

Mr. President, I ask unanimous consent that my April 10 testimony before the Subcommittee on Nutrition and the text of this bill be printed in the RECORD.

There being no objection, the statement and bill were ordered to be printed in the RECORD, as follows:

ON A UNIVERSAL FREE SCHOOL LUNCH PROGRAM

Mr. Chairman, it is a privilege for me to appear before this Subcommittee to discuss the merits of a Universal Free School Lunch Program. Such a program, enbodied in S. 1251, enjoys wide political support, Introduced by the late Senator Hubert Humphrey, Senators McGovern, Clark, and Thurmond join me as a cosponsor. Certainly, this bill was very important to Hubert. I remember discussing this legislation with him last year and I recall the great interest that he had and his firm conviction in how this program would impact on the health and vitality of our children.

I must also say that this program enjoys the support of many in my home state of North Carolina. Furthermore, the American School Food Service Association has indicated its unequivocal support.

This Subcommittee knows of the importance of good nutrition. Indeed, you, Mr. Chairman, have offered legislation to strengthen this nation's nutrition programs. I commend you for your leadership.

The importance of proper nutrition for the health and sound development of our children is clearly established. The absence of proper or sufficient food for our children interferes with their physical health, and makes it more difficult for them to stay alert, learn, or otherwise develop their minds. It can place serious restraints on their ability to live a happy life as adults, by increasing their likelihood of having chronic or other health problems, and the possible loss in mental activity may negatively reflect on their chance to go to a college and to get a good job. It would be wrong to place handicaps on young children who are unable to fend for themselves.

A free school lunch would not be another unnecessary government handout. Government requires children to attend school. It pays for their transportation and instruction, buys bats and balls and their textbooks. But at lunch-time, children are expected to hand over varying amounts of money.

The present system already gives free lunches to some students, greatly reduced-price lunches to others, and slightly reduced-price lunches to the remainder. In effect, we have created three classes of students in our schools.

Being singled out for a free or greatly reduced-price lunch is degrading to a child. We were all children once and most of us have children, and we know what it is like for a child to be singled out for special treatment. And here it is being done for circumstances totally beyond the child's control.

Actually, we are telling our children that some parents have been less effective in providing for their children than others. For this reason, many school children from middle and lower income families, who might otherwise benefit, do not get to take advantage of the present limited program because their parents consider it demeaning.

Meanwhile, some other parents, whose children are not eligible, seek to submit inaccurate information so they might save a little money and, in the process, transmit their willingness to commit petty fraud to their children. Schools do not have the means, nor should they be expected, to check out the validity and accuracy of the information in the application forms.

The present system, which provides several different subsidies for the same lunch, imposes a bureaucratic and administrative nightmare on our schools and teachers. The present system of sending out, processing, and evaluating applications is time-consuming, expensive, and frequently arbitrary. It is arbitrary for the reasons mentioned above: some parents whose children are eligible do not submit applications, and others submit inaccurate ones.

Even the process of distributing the tickets or tokens so that children can get their lunch, is expensive and time consuming. In some schools this is done by administrative employees, which means somebody must be hired to do the work. In other schools, the work is done by teachers, who should be spending their time teaching and planning lessons. Regardless of the method, it reduces class-time for the children, by as much as 30 minutes a day, which does not cost money, but then it does not help them to learn either.

The problems with the present system are so serious that two counties in my state, Edgecombe in the east and Hoake in the west, have gone ahead, without state or federal support, and introduced their own free school lunch programs. This, however, is so novel that there are no rules or regulations to cover the situation, so they are having some trouble dealing with the Department of Agriculture, even though the free program costs no more money than the old one. Now, I do not blame the USDA. The Department requires guidance over how to deal with this situation, and the Congress should provide it. Remember, a free lunch program cannot be cost effective unless many of the existing bureaucratic requirements can be abolished or greatly reduced.

Implementing a universal school lunch program would not cost much more than what is being spent now. By the time one considers the lowering of costs due to fewer administrative requirements and the ability to reduce the price of each lunch through economies of scale, and the increase in class time available for useful purposes, the value of each dollar being spent would be greatly stretched. Some increase in cost would result because of higher participation rates, which are only about 62 percent now, and the lower contribution required from many families, but the latter would be money saved as far as the family was concerned. But we must always keep in mind the great benefit that would accrue to so many of our children.

Recognizing, however, that it might be difficult to get such a major new initiative as a universal free lunch program approved and implemented, it might be more appropriate to begin by having pilot projects in several states. With this in mind, I will be introducing legislation in the very near future which will authorize a series of pilot projects in various parts of this great nation.

Mr. Chairman, I really believe that a Universal Free Lunch Program would be a prudent and valuable program for this Congress to enact. However, in full recognition of budgetary and political realities, a middle ground must be sought. So, after considerable thought, I have decided that legislation for pilot projects would be both appropriate and acceptable.

I hope that the members of the Subcommittee on Nutrition will give this bill serious consideration when it marks-up child nutrition legislation in May. I certainly will be available to you, Mr. Chairman, to help in this effort. We must remember that it is the children of this country whose futures we are deciding and I submit we have no more precious resource.

S. 2991

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the National School Lunch Act (42 U.S.C. 1751–1771) is amended by adding at the end thereof a new section as follows:

"PILOT PROJECTS FOR FREE SCHOOL LUNCHES

"SEC. 21. (a) The Secretary shall conduct pilot school lunch programs in school districts (or other appropriate units) located in geographically dispersed areas of the United States for the purpose of determining the feasibility, desirability, advantages, disadvantages, economic impact and other consequences of a school lunch program under which no child is charged for his or her lunch.

"(b) The pilot programs authorized by subsection (a) shall begin with the school years beginning July 1, 1979 and July 1, 1980. The Secretary shall conduct not less than 30 such pilot projects during the period covered by this bill.

"(c) The Secretary shall select representative areas throughout the United States (in both urban and rural areas) for participation in the pilot projects provided for in this section except that priority for participation shall be given to those school districts (or other appropriate units) that are currently conducting school lunch programs under which lunches are made available without charge to all children in the district (or other appropriate unit).

"(d) The Secretary shall reimburse participating school districts (or other appropriate units) for all costs incurred by such district (or other appropriate unit) in conducting a free school lunch program

project under this section to the extent that such costs exceed the costs which would normally be incurred by such district (or other appropriate unit) in carrying out a school lunch program under this Act. State and local governments (or other appropriate unit) cannot reduce their contribution per lunch.

"(e) The Secretary shall provide for a continuing evaluation of the pilot projects conducted under this section and shall include an evaluation of the social and economic benefits of such projects at the Federal, State, and local level and the costs involved at each such level.

"(f) The Secretary shall submit to the appropriate committees of the Senate and the House of Representatives the results of the Secretary's evaluations made under subsection (e) not later than 18 months after such a program becomes effective. The Secretary shall include in such evaluations the amount of money which local school districts (or other appropriate units) would save through the establishment of a permanent free school lunch program.

"(g) There is authorized to be appropriated such sums as may be necessary for the fiscal year beginning October 1, 1978 and $10,000,000 for fiscal year 1980 and fiscal year 1981 for the purpose of carrying out this section.

"(h) The Secretary shall issue such regulations as the Secretary deems necessary and appropriate to carry out the pilot projects provided for in this section, including a regulation requiring school districts (or other appropriate units) participating in such projects to maintain appropriate accounting records of expenses incurred in carrying out such projects and to submit such records to the Secretary for review and approval.".

Mr. MORGAN. Mr. President, I yield back the remainder of my time.

Mr. ROBERT C. BYRD. Mr. President, will the distinguished Senator yield me 3 minutes of his time?

Mr. MORGAN. Mr. President, I am delighted to yield to the distinguished majority leader.

THE STATE OF THE ECONOMY

Mr. ROBERT C. BYRD. Mr. President, with springtime has come good news on a number of fronts: Production in all sectors of the economy is growing, particularly in mines and factories; investment in capital goods is increasing; employment has registered solid gains in every major industry; consumer spending is picking up; oil imports are declining; domestic oil production is increasing for the first time since 1970; the stock market is rising; the fall in the value of the dollar has abated and may have bottomed out; March economic statistics indicate that the economy as a whole has overcome the winter slack.

This good news suggests to me that business conditions will continue to improve throughout the spring and summer.

These days, it seems that economic predictions are made to be broken. Since inflation has sapped the strength of each recovery during the past 10 years, predicting beyond the end of the summer is risky. Inflation remains the nagging question mark.

Mr. President, I commend President Carter for facing up to this hard fact and for committing the administration's resources to our national anti-inflationary efforts. President Carter is determined that his administration will take positive action to moderate the inflationary impact of Federal Government decisions.

In this regard, the Senate last week took the lead in minimizing Federal interference in the business of air travel. The Senate's action shows that regulatory reform is more than a theoretical concept. Although existing law limits the ability of the Civil Aeronautics Board to eliminate unnecessary Government restrictions on the airline industry, the Board's efforts in this direction to date demonstrate that free enterprise is anti-inflationary and expansionary. Competition creates jobs.

Business and labor have as great a role in containing inflation as does the Federal Government. Prices and wages are decided by the private sector. In free markets, this is as it should be; controls are inappropriate and ineffective.

Just as business, labor, and consumers must depend on the Federal Government to take steps to moderate the inflationary impact of Federal decisions, so must we in Government depend on corporate managers and union leaders to decelerate their demands. Taking anti-inflationary measures is no easier for those of us in Government than it is for decisionmakers in the private sector. What we also must remember is that the actions we take in the next few months will determine to a large extent the duration of the current recovery.

Mr. President, I yield back the remainder of the time that was yielded to me.

How much time do I have that was first allotted to Mr. MORGAN?

The ACTING PRESIDENT pro tempore. The Senator from North Carolina has 8 minutes remaining.

Does the Senator from Virginia wish time?

Mr. HARRY F. BYRD, JR. Will the Senator yield for a question?

Mr. ROBERT C. BYRD. Yes; I am happy to yield.

Mr. HARRY F. BYRD, JR. Will the Senator consider a unanimous-consent request that before the vote on Senate Concurrent Resolution 80, the Senator from Virginia may be granted 20 minutes of time?

Mr. ROBERT C. BYRD. Yes; I am sure I can agree to this and Mr. BELLMON and Mr. MUSKIE would have no objection.

Therefore, I make that unanimous-consent request, Mr. President.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, does the Senator from New Mexico need any time in addition to his order?

Mr. SCHMITT. I would appreciate the withholding of the yielding back of the Senator's time, if he would do that.

Mr. ROBERT C. BYRD. I ask unanimous consent that I may yield the remaining time of Mr. MORGAN to the distinguished Senator from New Mexico if he should need it.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

COMMITTEE MEETINGS DURING SENATE SESSION

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Rules and Administration Committee be authorized to meet during the session of the Senate today to consider Senate Resolution 166, to provide for the reorganization of the administrative and support services of the Senate, and for other committee business.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Commerce, Science, and Transportation Committee be authorized to meet during the session of the Senate on Thursday, April 27, 1978, beginning at 2:30 p.m., to hold oversight hearings on the Fisheries, Conservation, and Management Act of 1976.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I thank the distinguished Senator from New Mexico.

SPECIAL ORDER

The ACTING PRESIDENT pro tempore. Under the previous order, the Senator from New Mexico is recognized for not to exceed 15 minutes.

KOREAN AIR LINES FLIGHT 902

Mr. SCHMITT. Mr. President, yesterday, I spoke about the Soviet attack on the Korean Air Lines Flight 902 last Thursday. The Washington Post of this morning has reported that the decision to fire missiles on the commercial airplane was not an accident but a policy decision made in Moscow. If this report in the Washington Post is true, this decision by Soviet authorities is one of the most serious matters to infect the world that we have seen in recent months, if not recent years. It certainly deserves more serious attention than has been officially given it by the United States or any other nation in the world. I commend the Washington Post and other distinguished newspapers in this country for giving it the direct and front page attention that they have. I only apologize for the Government of the United States, that it has not done likewise.

While the incident did not directly affect any Americans and the death toll was "limited" to two, these deaths were unnecessary by any standard and the death toll could easily have been 110.

The indirect effect on Americans and all free peoples around this planet is immeasurable.

Yesterday, in an editorial, the Wall Street Journal stated:

To compound the felony, Russian officials held the plane's captain and navigator after releasing other occupants of the plane.

These two men are still being held captive for what the Soviets are saying is an investigation. Yesterday's editorial in the Washington Post stated:

But it is Soviet performance that ought to be investigated. It was inexcusable.

The Republic of Korea and the United States still have not determined the cause of the plane's intrusion into Soviet airspace and their efforts have been hampered by the Soviet Union. The captain, navigator, and airplane are all needed for the investigation. To date, they are unavailable.

Mr. President, this incident is serious and its seriousness is being compounded by the silence of the President and the United Nations. If this incident is ignored for the sake of better United States-Soviet relations, I submit those relations will not be better and, in fact, greatly worsened. If the statement in the May 1 issue of Time magazine is correct, then we are giving the Soviet Union or any other nation the license to shoot any airplane or any ship which accidentally violates the airspace or territorial waters of the Soviet Union.

That statement is as follows:

With U.S. Secretary of State Cyrus Vance in the middle of this mission to Moscow and with the revived SALT negotiations under way, neither the Americans nor the Russians seemed eager to make too much of the incident.

Mr. President. I question why in the world there would ever have been an incident, particularly with the Secretary of State of the United States of America in Moscow for extremely important negotiations that will affect the future of the world.

Two people perished in what the Wall Street Journal described as the least defensible misfortunes that can befall air travelers on grounds of mischance or human error. Violation of airspace by a commercial flight is not a threat to the security of any nation. Yesterday, I suggested the response which the United States would have made had the situation been reversed.

Mr. President, I am absolutely confident that our response would have been prudent and restrained, having been closely associated with the men and women and the leaders of our Air Defense Command and those of the Canadian Government.

I also suggested the repercussions which would have occurred if the United States reacted in the manner in which the Soviets reacted.

Mr. President, it is imperative that the Soviet Union know that the United States and the United Nations will not tolerate this type of behavior, that innocent people cannot be killed by overreaction without a word of protest. It is no different from the deadly terrorism that is rampant in our world today.

In fact, it is worse, because presumably, it reflects the relations between supposedly civilized nations.

Mr. President, I ask unanimous consent that the editorial which appeared in the Wall Street Journal yesterday be printed in the RECORD at the conclusion of my remarks.

The ACTING PRESIDENT pro tempore. Without object, it is so ordered.

(See exhibit I.)

SENATE RESOLUTION 439

Mr. SCHMITT. Mr. President, in order to bring this issue into some sort of focus in the United States, I am sending to the desk a resolution calling on the President to instruct Ambassador Young, who is currently serving as President of the United Nations Security Council, to call the Security Council into session and to introduce a resolution condemning the Soviet actions with regard to Korean Air Lines flight 902.

I ask unanimous consent that this resolution be read and I ask unanimous consent for the immediate consideration of the resolution.

The ACTING PRESIDENT pro tempore. The clerk will state the resolution.

The assistant legislative clerk read as follows:

S. RES. 439

To express the concern of the U.S. Senate about the April 20, 1978 Soviet attack on Korean Air Line Flight 902

Whereas on April 20, 1978, Korean Air Lines Flight 902, a commercial flight with 97 passengers and 13 crew members aboard, strayed into Soviet airspace and was fired upon by Soviet MiG fighters.

Wheras Soviet lack of restraint resulted in the deaths of two passengers and in injuries to thirteen others and could have caused the deaths of all 110 passengers and crew members;

Whereas equipment failure, especially around the North Pole, is not uncommon and violations of the airspace of other nations have been handled with restraint;

Whereas the Soviet Union has not yet released the plane's captain and navigator nor the plane itself, making it even more difficult for the Republic of Korea and the United States to determine the cause of the plane's intrusion into Soviet airspace; and

Whereas the commercial airplanes of the United States and any other nation may also encounter difficulties and equipment failures that result in the violation of some nation's airspace: Now, therefore, be it

Resolved, That it is the sense of the Senate that the President of the United States instruct Ambassador Young, who is currently serving as President of the United Nations Security Council, to call the Security Council into session and to propose a resolution condemning the actions of the Soviet Union with regard to Korean Air Lines Flight 902.

SEC. 2. The Secretary of the Senate shall transmit a copy of this resolution to the President.

Mr. ROBERT C. BYRD addressed the Chair.

The ACTING PRESIDENT pro tempore. The Senator from West Virginia.

Mr. ROBERT C. BYRD. Mr. President, reserving the right to object, while I certainly sympathize with and share the indignation that is expressed by the distinguished Senator from New Mexico, this resolution has not been cleared with the Foreign Relations Committee on this side of the aisle or with members of other committees, and I assume it has not been cleared on the minority side.

Under these circumstances, I would be constrained to object. I do so reluctantly. I hope that the distinguished Senator from New Mexico will understand my reasons.

I do object to the immediate consideration of the resolution.

The ACTING PRESIDENT pro tempore. Objection having been heard, the resolution will go over under the rule.

Mr. SCHMITT. Mr. President, I understand the distinguished majority leader's objection.

I think it is a simple resolution that could well have been dealt with immediately.

I intend, because of the rush of events that brought it to a head, to follow up and ask the distinguished leaders of appropriate committees if they would agree to this resolution being considered rapidly by the Senate. Time is of the essence. We need to make sure that this kind of incident does not go unanswered, as it has so far.

I hope that the distinguished minority leader will assist me in the task of assuring that there is rapid consideration of the resolution by the Senate.

EXHIBIT 1

TERRITORIAL IMPERATIVE

Of all the misfortunes that can befall air travelers the one least defensible, on grounds of mischance or human error, is the kind that befell 108 passengers and crewmen aboard Korean Air Lines Flight 902 last week.

Aircraft can stray off course, but it defies all logic that a nation would authorize its fighter pilots to shoot down an identified commercial airliner. Yet a Soviet fighter put several shells into Flight 902, forcing it to make a crash landing south of Murmansk. Two passengers are dead, several others injured and all 108 might have come to grief but for a skillful landing. To compound the felony, Russian officials held the plane's captain and navigator after releasing other occupants of the plane.

This is not the first time such a thing has happened, of course. The Israelis shot down a Libyan Arab Airlines Boeing 727 in February 1973 after it had strayed over Israeli controlled territory in the Sinai on a flight from Benghazi to Cairo. In that case, 83 passengers were lost.

The justification offered for this kind of thing is born out of the ardent nationalism of our times, the claim that there is something truly sanctified about national boundaries. Travelers who make an unauthorized entry, even by accident, are subject to death.

It is a strange notion, although perhaps no stranger than the Soviet practice of holding 250 million people captive inside Soviet boundaries. It shows a very low regard for human life.

It wouldn't seem beyond the mind of man to devise clear procedures for preventing attacks on stray aircraft. A starting point would be a better briefing for fighter pilots and airline pilots on a radio channel to be used for challenging strays. Air defense commands could be instructed as well to be less zealous about shooting at anything that moves.

The main obstacle to such an understanding is the brute notion that the land and the air above it are the property of the state. Few regimes are stronger in that belief than the Soviets. If the United States is really serious about human rights it should make a louder noise about the fate of the 108 travelers of Flight 902.

(Later the following occurred:)

Mr. SCHMITT. Mr. President, I ask unanimous consent, in conjunction with the submission of the resolution that was just considered, that Mr. LUGAR, Mr. MOYNIHAN, and Mr. BELLMON be included as cosponsors of the resolution, and that it be mentioned in the RECORD.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

OPPOSITION TO NOMINATION OF CHARLES LUNA—NATIONAL RAILROAD PASSENGER CORPORATION

Mr. SCHMITT. Mr. President, it is my understanding that in the near future, possibly as early as tomorrow, the Sen-

ate will consider Calendar No. 22 under nominations, that of Charles Luna, of Texas, to be a member of the board of directors of the National Railroad Passenger Corporation for a term expiring July 18, 1980. This is a reappointment.

Mr. President, this is merely to alert my colleagues, as I have through a letter yesterday, that I will oppose that nomination, not on the grounds that Mr. Luna does not have background and experience appropriate to this job, but on the ground that he has been in direct violation of statutes for several years, has not taken the appropriate steps once informed of that violation to remove this violation, and I think it would be inappropriate to confirm this nomination under those circumstances.

In fact, Mr. Luna's original position when informed of this difficulty was that he would resign his seat on the board and sell the stock only if he was reconfirmed.

I think that that is not the way we want to do business in this Government. I think it is not the way the public wants us to do business. I hope that my colleagues will, upon reading of this problem in the RECORD tomorrow, join with me in opposing the nomination of Charles Luna.

Mr. President, I have no further business and I yield back the remainder of my time.

ROUTINE MORNING BUSINESS

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that there be a brief period for the transaction of routine morning business for the purpose only of statements, introduction of bills, resolutions, petitions, and memorials into the RECORD.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

(Routine morning business transacted and additional statements submitted will be printed later in today's RECORD.)

CONCLUSION OF MORNING BUSINESS

The ACTING PRESIDENT pro tempore. Is there further morning business? If not, morning business is closed.

CONGRESSIONAL BUDGET, 1979

The ACTING PRESIDENT pro tempore. Under the previsous order, the Senate will now resume consideration of Senate Concurrent Resolution 80, which the clerk will state by title.

The assistant legislative clerk read as follows:

A concurrent resolution (S. Con. Res. 80), setting forth the congressional budget for the U.S. Government for the fiscal year 1979.

The Senate resumed the consideration of the resolution.

Mr. ROBERT C. BYRD. Mr. President, I suggest the absence of a quorum, but first I ask unanimous consent that the time not be charged against either side on the Domenici amendment.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the time for the quorum call which I shall request be equally charged against both sides on the resolution.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. DOMENICI. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. DOMENICI. Mr. President, a parliamentary inquiry.

The ACTING PRESIDENT pro tempore. The Senator will state it.

Mr. DOMENICI. Under the unanimous consent agreement of yesterday, how much time is there remaining on my amendment and to whom does the time belong?

The ACTING PRESIDENT pro tempore. Forty-five minutes have been granted for that amendment. None of the time has been allocated. It is to be equally divided, half to the Senator from New Mexico and half to the Senator from Maine.

UP AMENDMENT NO. 1247

Mr. DOMENICI. Mr. President, I send a modified amendment to the desk, and ask that my amendment be so modified.

The ACTING PRESIDENT pro tempore. The Senator has that right.

The modified amendment of the Senator from New Mexico will be stated.

The assistant legislative clerk read as follows:

The Senator from New Mexico (Mr. DOMENICI) proposes unprinted amendment No. 1247, which is a modified version of amendment No. 1604.

Mr. DOMENICI. Mr. President, I ask unanimous consent that the reading of the modified amendment be dispensed with.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

The amendment is as follows:

On page 1, line 11, strike out "$566,100,000,000" and insert in lieu thereof "$563,900,000,000".

On page 2, line 2, strike out "498,900,000,000" and insert in lieu thereof "$496,800,000,000".

On page 2, line 5, strike out "$55,600,000,000" and insert in lieu thereof "53,500,000,000".

On page 2, line 7, strike out "$853,800,000,000" and insert in lieu theerof "851,700,000,000".

On page 2, line 9, strike out "$101,800,000,000" and insert in lieu thereof "$99700,000,000".

On page 2, line 20, strike out "$129,800,000,000" and insert in lieu thereof "$129,400,000,000".

On page 2, line 21, strike out "$116,600,000,000" and insert in lieu thereof "$116,300,000,000".

On page 2, line 23, strike out "$12,800,000,000" and insert in lieu thereof "$12,500,000,000".

On page 2, line 24, strike out "$7,200,000,000" and insert in lieu thereof "$6,900,000,000".

On page 3, line 5, strike out "$10,200,000,000" and insert in lieu thereof "$10,000,000".

On page 3, line 6, strike out "$10,100,000,000" and insert in lieu thereof "$9,900,000,000".

On page 3, line 8, strike out "$13,700,000,000" and insert in lieu thereof "$13,600,000,000".

On page 3, line 9, strike out "$12,500,000,000" and insert in lieu thereof "$12,400,000,000".

On page 3, line 14, strike out "$5,900,000,000" and insert in lieu thereof "$5,800,000,000".

On page 3, line 15, strike out "$3,600,000,000,, and insert in lieu thereof "$3,500,000,000".

On page 3, line 17, strike out "$19,500,000,000" and insert in lieu thereof "$19,400,000,000".

On page 3, line 18, strike out "$17,500,000,000" and insert in lieu thereof "$17,400,000,000".

On page 3, line 20, strike out "$10,400,000,000" and insert in lieu thereof "$10,100,000,000".

On page 3, line 21, strike out "$9,000,000,000" and insert in lieu thereof "$8,900,000,000".

On page 3, line 24, strike out "$31,600,000,000" and insert in lieu thereof "$31,400,000,000".

On page 3, line 25, strike out "$31,200,000,000" and insert in lieu thereof "$31,000,000,000".

On page 4, line 2, strike out "$52,700,000,000" and insert in lieu thereof "$52,500,000,000".

On page 4, line 3, strike out "$49,500,000,000" and insert in lieu thereof "$49,300,000,000"

On page 4, line 6, strike out "$159,900,000,000" and insert in lieu thereof $159,600,000,000".

On page 4, line 8, strike out "$21,000,000,000" and insert in lieu thereof "$20,800,000,000".

On page 4, line 9, strike out "$20,800,000,000" and insert in lieu thereof "$20,700,000,000".

On page 4, line 17, strike out "9,700,000,000" and insert in lieu thereof "$9,600,000,000".

On page 4, line 18, strike out "$9,600,000,000" and insert in lieu thereof "$9,500,000,000".

Mr. DOMENICI. Mr. President, the chairman of the committee and the ranking Republican member have my modification. I shall start by summarizing quickly what it does as contrasted with the amendment that I introduced yesterday.

The modification will cut budget authority by $2.2 billion and will cut outlays by $2.1 billion.

The amendment that was made a matter of record and that Senators have would have cut budget authority $2.8 billion and outlays $2.6 billion.

Mr. President, I yield myself 5 additional minutes of time.

Let me say that a lot was spoken yesterday by different Senators about the budget process, and I for one want to set the record straight from this Senator's standpoint.

I believe the process is working, and I believe the Budget Committee has developed some processes and some procedures that unquestionably have inured to the benefit of this country.

As I think back over the past 4 years, I can just imagine what would have happened without this process in the heat of the recession when historically every committee in this Congress would have found the solution and would have brought antirecessionary legislation to the floor. The budget process was extremely effective in keeping that kind of legislation under control, and I might say more times than not when antirecessionary programs of a new type are initiated they were almost always triggered, that is to say, they were tied to the economic conditions and would be either phased out or substantially diminished as the economy improved.

I think that is a rather dramatic occurrence that would not have happened without this process.

I remind my fellow Senators that each year for the last 3 years if this Budget Committee had not existed the authorization committee requests in almost each of the years would have exceeded that which the Budget Committee came up with by 40, 50, and in some instances as much as $90 billion that this committee did not see fit to include in their efforts to put some sense into the budgeting process.

Now, having said all of those good things, and adding just one additional one, this particular year, in an effort to better understand what we were doing, the splendid Budget Committee staff, aided by the CBO, has come up with a concept of mission budgeting. I believe, as this is looked at in more detail now and in the future, it will also be an extreme plus on the side of the budgeting process in the United States.

Then one need not go back very far to remember that every time a major appropriation bill hit the floor of the Senate it would be accompanied by literally scores of amendments where we would add here on the floor millions and sometimes billions of dollars to the appropriation process.

To the benefit and credit of the Budget Committee, one need only look back at the last 2 or 3 years to see how drastically that has changed.

In spite of that, and having said all those good things about the process, it appears to me that this year in this budget we have on the revenue side decided to go along with a major American tax cut, and I supported that and, perhaps, I would even support more than is reflected in the revenue side of this budget. That is absolutely necessary because the time has come when the average man and woman in America who works hard in an effort to get ahead, has seen both inflation and the absence of indexing on the income tax structure just eat away at their productivity, when it is our opportunity to say to them, the hard-working men and women of this country and the risk-takers, that we want them to benefit, we want them to feel that their energy and productivity are worthwhile. So the tax cut that is provided for is a plus.

But the most important issue confronting the American people is inflation. I think that was predictable. Even though for the most part in the last 3 years we have been concerned about unemployment and a recession, it is obvious that the time has come to do something significant about inflation.

As the good chairman of this committee indicated throughout the markup on this particular budget, there is indeed in the minds of the American people and in the minds of the experts of this country and, indeed, among the average people a feeling that there is a direct relationship between Federal expenditures, deficits, and inflation.

I think this is the year for us, while we are going to cut taxes for the American people, to indicate a clear determination to come forth with a budget that clearly indicates our commitment to a minimum deficit this year, and to minimum program expansions over the next 5 years so that we will indeed be looking not 15 years from now but in the foreseeable future at a balanced budget.

With that in mind, I commend the Budget Committee for its efforts. But I honestly believe we can do somewhat better. I believe that my proposal, which is not a shotgun approach, is not a 5-percent cut across the board, it is not a 1-percent across-the-board approach, but rather function by function, with the exception of a few small functions where there is really no latitude, is a better approach. I have provided for a cut, not a large one. But when you add up a few hundred million dollars here and there you end up with a $2.2 billion reduction in budget authority and $2.1 billion in outlays.

I will quickly indicate where I have cut those and then yield back, and if there are questions in more detail I will be glad to answer them.

So that everyone will understand, this Senator has been one who has always been concerned that we should not cut the military unless we are sure that we are not taking a risk, and we should there provide more rather than less. But because I am genuinely concerned about this deficit and want to send a little stronger message about our conviction and commitment, in function 050 I provide for an outlay cut of $300 million and a budget authority cut of $400 million; in function 150 I have provided for a $300 million budget authority reduction and a $300 million cut in outlays.

In function 270, which is science and space, I have provided—in function 250, as I indicated previously, there is no room for a cut. That is one of the small ones, and if we cut there we would really be putting that major program into a reverse gear, which I do not think is necessary.

Function 270 is energy. We are cutting $200 million in budget authority, and $200 million in outlays; function 300, natural resources, $100 million in each, budget authority and outlays.

Function 370, housing, $100 million in each; function 400, transportation, $100 million in each; function 450, which is the regional development and community development function, $300 million and $100 million; function 500, education and training, $200 million in each; function 550, health, $200 million in each; function 600, zero in budget authority and $300 million in outlays. That is income security, and we will be glad to explain that if anyone has any questions.

Function 700, veterans, $200 million in budget authority and $100 million in outlays. That one also I would be glad to explain if anyone wants to question it, in that this is certainly not a cut because we have substantially increased the veterans' function in the budget authority and outlay figure that the committee itself provided.

Function 850, revenue sharing and local fiscal assistance, we have provided a cut of $100 million in each.

Now, Mr. President, again I want to say that I truly commend the committee for its work, the staff for its work, CBO for the innovative approaches they have given us, the help they have given us in the shortfall assessment which have permitted us to take some cuts in the basic budget that we would have otherwise missed.

But I truly believe this is an opportunity to come in with a budget this year that is adequate for the United States in every respect, that will be substantially less than the President's, and $2.2 billion less in budget authority under this recommendation and $2.1 billion less in outlays under the Budget Committee's recommendation.

I yield the floor and reserve the remainder of my time.

(Mr. ZORINSKY assumed the chair.)

Mr. BELLMON. Mr. President, the distinguished Senator from New Mexico offers a well-thought-out amendment. It shows his knowledge and his insight in the workings of government and in the budget process.

He is an extremely valuable member of the Budget Committee and has made many important and significant contributions to the development of the process and to the various resolutions and decisions we have been called upon to make.

The Senator from New Mexico knows that the Senator from Oklahoma voted for an even larger cut in spending during the markup of the resolution, and probably understands that this puts me in somewhat of a dilemma. I have, since the Budget Committee was formed, consistently taken the position that we ought to work as a committee, work our wills, make the best decisions we could, and then, having come to that conclusion, we ought to support that decision as a committee so that when we came to the floor we would not each of us be going in our separate directions and, in this way, weaken the budget process.

I am concerned that the whole effort to bring about a meaningful way of developing the Federal budget could disintegrate if the Budget Committee fails to work as a unit and to protect, as much as we can, the decisions that the committee has made. I feel that the process is vital, that the presentation of the new budget effort we are making must perhaps take a higher precedence than even some savings of this magnitude; and certainly that is significant, particularly at this time, when we are trying, as best we can, to hold down inflation and to eliminate, as we must constantly strive to do, unnecessary Government spending.

So, as attractive as I find the Senator's amendment to be, and in spite of the fact that I originally supported

amendments not too much different from this during the markup of the budget resolution, I must say that I feel at this time, partially because other committees will not have known in advance about the impact that such cuts might have on the areas of their concern, that the amendment should be rejected, and it is my present intention to vote against it when it comes up for a vote.

Mr. MUSKIE. Mr. President, this amendment springs——

Mr. DECONCINI. Mr. President, will the Senator yield? If I could interrupt the Senator from Maine, I have to go to a committee meeting at 10 o'clock, and I do have one short question I would like to ask the Senator from New Mexico.

Mr. MUSKIE. Good.

Mr. DECONCINI. Will the Senator explain the cut he mentioned a few moments ago in the veterans area?

Mr. DOMENICI. Yes. This will be on my time, I will say, Mr. President.

The current policy for veterans would be $20.5 billion in budget authority and $20.2 billion in outlays. The current policy would mean we would keep every program as we have it in existence, and provide the requisite expected inflation for that program.

The Budget Committee recommended $21 billion and $20.8 billion, which is substantially higher than current policy. The President of the United States recommended a figure that is lower than our figure, $19.1 billion and $19.3 billion, which is lower than current policy and lower than the figure which would result with my cuts, which would bring them to $20.8 billion and $20.7 billion.

Mr. DECONCINI. So the recommendation in the Senator's amendment would still be higher than what was submitted by the administration?

Mr. DOMENICI. Substantially higher than that. Actually, I believe it is fair to say that it will cover everything that we had in mind, with the possibility that some of the reform planned for pension benefits might not be able to be implemented in toto this year, and on some of the expected add-ons for veterans hospitals in terms of personnel, instead of adding as much as recommended, there will be an add-on but it will be slightly less.

Mr. DECONCINI. I thank the Senator from New Mexico, and I thank the Senator from Maine for yielding.

Mr. MUSKIE. Mr. President, I would like to address some comments to this point.

Mr. DECONCINI. I would be delighted to hear them.

Mr. MUSKIE. The veterans function, function 700, was one of the most thoroughly discussed in the budget markup. That stems from the fact that the chairman of the Veterans Committee, Senator CRANSTON, always comes to our markups well prepared with information about veterans programs, and he always works hard in the Veterans Committee to justify every penny that that committee requests.

He made that presentation in our committee, and we finally cut his request. To arrive at the numbers in the veterans function took five votes in the committee. It was a very difficult compromise, and took some time to work out.

Mr. DECONCINI. Will the Senator yield?

Mr. MUSKIE. Yes.

Mr. DECONCINI. What was the request from the Senator from California?

Mr. MUSKIE. The request was for $21.6 billion in budget authority and $21.2 billion in outlays. What we recommended was $21.0 billion in budget authority, or $600 million less, and $20.8 billion in outlays, or $400 million less.

I am afraid if we reduce the result of the committee vote by way of this amendment, that that will trigger floor debate over the amount to be provided for this function, which would take considerable time and probably involve a very difficult compromise. This is one of our most difficult functions to resolve in the Budget Committee, I would say to the Senator.

May I then address myself, Mr. President——

Mr. DOMENICI. May I give the Senator from Arizona one further fact?

I say to the Senator from Arizona we are $1.7 billion in budget authority, under my amendment, higher than the President, and in outlays we are $1.4 billion higher than the President.

I do not disagree at all that this is a function, because of the senior Senator from California's extreme interest, that we went into in great detail. But when we go into them in great detail, we also plan for some things that might not happen, because some laws have to be changed and other things for all of those kinds of proposals to come into effect.

If I thought we were going to cut the program anywhere in any significant degree, I would not be proposing it.

Mr. DECONCINI. Except that the Budget Committee has already taken a substantial cut from what the request of the senior Senator from California was. I wish that the Senator's amendment might not cut that part of it. It seems to me that the Budget Committee has struggled with it at great length, and I do not see the justification for the Senator's amendment in this one single area.

Mr. DOMENICI. I would say to the Senator from Arizona that in this one particular function there is less of a cut from the authorizing committee's request than in any other function. If we accepted the authorizing committee's requests, my recollection is that we would be $90 billion higher than we are, because each of these functions has that same argument that the Senator is making on this point.

Mr. DECONCINI. I thank the distinguished Senator from New Mexico and the distinguished Senator from Maine.

Mr. MUSKIE. Mr. President, I think it is fair to say that this amendment springs out of a development that took place in the Budget Committee markup. On page 6 of the committee report, that result is described, and I would like to read from the report:

> As in previous years, the Committee engaged in two separate rounds of consideration of the amounts recommended in the resolution reported. Following the initial round of decisions, the Chairman presented a recommendation for spending reductions in seventeen different budget functions, amounting to an aggregate reduction of $4.7 billion in budget authority and $4.0 billion in outlays.
>
> The Chairman's proposed reductions included a proposed cut of $1.5 billion in budget authority and $1.0 billion in outlays in the defense function, and $3.2 billion in budget authority and $3.0 billion in outlays in the non-defense functions of the budget. After debate the Committee voted to table the Chairman's motion 9 to 7. The Committee then voted 13 to 3 to report a First Concurrent Resolution on the Budget containing its original recommendations.

Mr. President, I offered those proposed cuts in 17 functions for a very specific reason.

I am concerned about inflation. I happen to believe that by holding the deficit down as much as possible we could send a signal to the country that we are concerned about inflation to the point of trying to discipline congressional spending. I conceded, when I offered my amendment, that in many, if not in all, cases the proposed cuts would put a squeeze on many of the functions, a difficult squeeze in many cases. My argument was that if we truly are concerned about inflation we ought to be willing to make sacrifices in terms of restraining spending in any or all of these functions in order to send a credible signal to the country.

The committee rejected those cuts. Senator DOMENICI, the sponsor of the pending amendment, joined in voting against my proposed cuts. I think it fair to say that the reason why many of those who opposed my cuts did so was because of the proposed cuts in defense, which, I repeat, were $1.5 billion in budget authority and $1 billion in outlays.

I invited members of the committee, if they thought my proposed cuts were too severe, to offer counterproposals reducing my cuts. In effect, I invited an amendment of the kind now offered by the Senator from New Mexico. Rather than respond to that invitation, the motion was then made to approve the first round of budget numbers. That vote was 13 to 3. So the committee position, Mr. President, on the record and over my objection, is against the cuts I offered in committee and against any modification of those cuts.

I understand, of course, that Members who voted against the cuts I offered and who refused to offer counterproposals in committee may have changed their minds. There is nothing against any Senator changing his mind. But there are two observations I want to make about that, Mr. President.

It is now established practice on the part of the chairman and the ranking minority member of the committee to defend the resolution that the Budget Committee reports, even when the defense of that resolution appears to put them in an inconsistent position with respect to positions they took in the committee markup.

We do that for a very, very clear reason: When we report out a budget resolution, we are putting every authorizing committee and every Senator on notice as to what the Budget Committee has done to their recommendations.

I asked that floor action on this resolution be delayed a week so that committees would have ample opportunity to study the record and to understand what

the Budget Committee had done to their recommendations. As I said yesterday, we had cut over $36 billion from the recommendations of committees. Senator BELLMON and I have always taken the position that having given committees that notice, having given Members that notice, we ought not to casually abandon the resolution that the majority of the committee had approved.

With respect to this amendment, if this amendment had been offered in the committee I would have supported it as an alternative to mine, and I would have been here on the floor of the Senate fighting for it.

If my amendment had been adopted in committee, I would be here on the floor fighting for those cuts.

The fact is, Mr. President, that in some cases that are easily identifiable these cuts—and the similar cuts I offered—are going to squeeze the functions. Committees have a right to be on notice, ample notice, of that possibility, so that they can bring their case to the floor of the Senate.

Yesterday I engaged in several colloquies with Senators, including the Senator from New Mexico, regarding several functions of the budget. Those Senators were interested in knowing whether or not there was room in the budget and in those functions for the consideration of specific proposals in which they were interested. The Senator from New Mexico specifically inquired about programs in which he was interested in the energy and community and regional development functions.

My answers to all of them, including the Senator from New Mexico, might well have to be modified if we were to adopt his amendment which includes reductions in those very functions.

I find myself in a very difficult position, Mr. President. On the one hand, as I said in committee, I think the inflation threat requires that we take some step such as this, and yet having offered that step and having had it rejected, and having relied on the decision of the majority of the committee, I am now in the position of having put other committees and other Senators on notice that we are defending that resolution, a resolution which does not altogether reflect my notion of what it ought to be.

This process will work, Mr. President, only to the extent that it has not only the commitment of the Committee on the Budget, but the commitment of other Senate committees as well.

I have asked the staff to notify the committees that this amendment involving these proposed cuts is pending. But there are only 30 or 35 minutes at most remaining on the amendment. I doubt very much that many committees have focused on the implications of the amendment. So I find myself in a very difficult position.

I would like to see cuts of this kind in this budget resolution, but at this late date, after the committee already has acted, and after other committees have been put on notice, I find it very difficult, if not impossible, to vote for the amendment.

If the Senate votes for it, that is the prerogative of the Senate. As a matter of fact, I might even be pleased by that result in one sense. But if the effect, Mr. President, is to put other committees in a squeeze which they have not anticipated, and if as a result of that squeeze later on in this session when appropriations bills come to the floor I am forced, if the Senate adopts this amendment, to flash the red light on a Member's project, program, or amendment because of this amendment, I would find that very difficult to do, if I supported this amendment.

I simply want to put everyone on notice. I detect on the part of Members a great reluctance to propose amendments to increase this budget, but, nevertheless, there is great concern among Members as to whether or not this budget resolution is too tight in many respects to meet what they regard as legitimate needs. One of the purposes of this floor debate is to enable other Senators and committees to engage in that kind of analysis and discussion.

That obviously is not going on this morning. Other Senators are not here, other committees are not represented on the floor, during the consideration of this amendment.

I reserve the remainder of my time.

Mr. DOMENICI. Mr. President, how much time do I have remaining?

The PRESIDING OFFICER. The Senator from New Mexico has 7 minutes remaining.

Mr. DOMENICI. Mr. President, I want first, to commend the distinguished chairman of the committee for his excellent analysis of where we are this morning, then make just a few remarks to my fellow Senators and authorizing committees who may be concerned, because of the chairman's remarks. I also address these remarks to the institution and its role.

If we followed current policy, which means we leave every program where it is, if it is supposed to increase by its own language and it increases, then we add the discretionary inflation to it, we would have a budget authority figure of $548 billion and an outlay figure of $492.6 billion.

Mr. MUSKIE. Mr. President, will the Senator yield?

Mr. DOMENICI. I am pleased to yield.

Mr. MUSKIE. That argument was just as valid in the markup. It is the argument I made.

Mr. DOMENICI. Indeed.

Mr. MUSKIE. If I had had the Senator's support in the committee, the vote would have been changd by one and we would have needed only one other. I think these other considerations are valid considerations. The Senator's argument is like that made by the Senator from Wisconsin yesterday.

Mr. DOMENICI. No, it is much different. I provided my specific cuts and I want everyone to have a chance to look at them.

I did not vote in committee, I say to the Senator, I did not support his proposed second-round series of cuts, but neither did I vote to accept the first round, which is what we have before us today.

But the Senator is correct, neither did I have a detailed analysis as I do now. I make no excuses for it. It was late in the day; we were trying to get finished. I just could not put it into perspective with items, function by function. So I brought it to the floor.

But I do say that but for the function of defense, which the Senator had proposed to cut substantially more than I in his second-round proposal, every one of the other cuts is his or substantially less than that which he proposed.

Mr. MUSKIE. Exactly, but that is the point. If we are going to indulge our own priority in the committee and, in a spirit of excessive protection of that one priority, fail to deal with the rest of the proposition, we are not serving the process.

Last year, as the Senator recalls, I offered a similar array of cuts and we went through them function by function. We each understand what the impact would be. We modified some of my numbers, rejected others, accepted others, and we came up with a committee consensus as to each of them.

We came up with numbers that we were able then to bring to the floor and defend. But here, in sharp contrast, there was no effort made.

There was no need to finish that night. We could have worked that whole evening; we already had the evening set aside for it. It turned out that we did finish early because of the precipitate action taken on my amendment. We could have come back the next day and still had time to finish and we did not.

That is not to say that the Senator is not fully entitled to bring his amendment up today. But the Senator has to agree that there is not the notice to other committees of the impact of his amendment that there would have been if we had taken this action in committee, then sent it out to other committees so that they could examine it. I suspect we may have had some amendments to wipe away the effect of the Senator's amendment. Knowing how long it takes for Senators to focus on something like this, I suspect that after we have voted on the Senator's amendment and if the Senator is successful, there is going to be some screaming around here. I shall refer the screamers to the Senator from New Mexico.

Mr. DOMENICI. I thank the Senator. I shall be delighted to accept the screaming.

Let me put into perspective what I think this amendment does. Yesterday, the Senate had opportunity to cut this budget. I fully agree with the chairman that a 5-percent across-the-board cut, saying everybody should get a 5-percent cut, is not the way to handle this matter. It was then reduced to a lesser percent, but nonetheless across the board. I want to tell my fellow Senators what this amendment does and instead of being so concerned about whether or not their authorizing legislation is going to fit, I think they ought to be a little concerned about what the American people expect.

This is a less than one-half of 1 percent cut in this budget, spread out across the functions in a manner that I think is equitable. I remind everyone that, while I do not want to belittle the impact of the functions in this budget, they are merely targets. They are not binding, they are targets for which the Budget Committee and others can come to the floor and argue when somebody is going

to breach the target. I submit that, in a year such as this one, with the rhetoric about inflation and that we ought to do something about it, this is precisely what we should do to these target functions, squeeze them just a little bit more—not an inordinate amount. I do not think I have done that. If any authorizing committee people want to know what I have in mind for each of these——

Mr. MUSKIE. Will the Senator yield?

Mr. DOMENICI. I have exactly 1½ minutes left and I have to go to another committee.

Mr. MUSKIE. Will the Senator yield on my time?

Mr. DOMENICI. Between now and 12:30, I shall be delighted to show them the extent of this enormous squeeze that is going to be imposed upon them of, in most functions, far less than one-half of 1 percent as a target for them to shoot at.

I yield—how much time do I have remaining?

The PRESIDING OFFICER. The Senator has 1 minute remaining.

Mr. DOMENICI. I shall reserve it and yield to my good chairman.

Mr. MUSKIE. The Senator says 1½ percent is not going to hurt anyone.

Mr. DOMENICI. One-half of 1 percent.

Mr. MUSKIE. One-half of 1 percent of the defense function is $600 million. Would the Senator wish to modify his amendment to increase his cut in the defense function—I am talking about outlays—from $300 to $600 million?

Mr. DOMENICI. If I had wanted to do that, Mr. President, I would have put it in——

Mr. MUSKIE. Then let me say to my good friend that, if one-half of 1 percent is unacceptable pressure on the defense function, it is conceivable that it is unacceptable pressure elsewhere, including veterans and other functions. Remember, 1 percent of the Federal budget is $5 billion. When you consider how much of the Federal budget is uncontrollable, you cannot take $5 billion out of the controllable part of the budget without making an impact. That could be a squeeze.

The Senator's answer to my question on the defense function makes my point eminently well. The Senator is not willing to cut defense by the amount that he says is inconsequential for other functions of the budget.

Mr. DOMENICI. I do not believe I said inconsequential.

Mr. MUSKIE. That was the essence of what the Senator said.

Mr. DOMENICI. I said they are reasonable targets to shoot for. That is why I included them.

I have 1 minute remaining. Let me say that while I greatly respect the chairman, and I hope he will think that I have been constructive within the committee, I hope we have not reached the point where, because the Budget Committee reports out a resolution, we have an argument that it should not ever be changed. If someone wants to change it by a flat cut and they are opposed, if someone wants to change it item by item, the fact that the Budget Committee did not support that is used here to indicate in some way that we ought not to have any amendments. I close by saying I think mine is eminently reasonable. They are targets that we can reasonably shoot for and they would do more than mere rhetoric in showing our great concern about inflation.

Mr. MUSKIE. Mr. President, I do not think I have ever said anything to suggest to the Senator from New Mexico or to anybody else that the Senate does not have the right to change the budget resolution. The Senator knows better than to imply that.

We have said that when the committee works, the ranking member and I and the rest of the members of the committee, the rest of the Committee on the Budget has often voted against the chairman and the ranking member.

We have not tried to impose our discipline on other Members, but we have taken the position, in order for other Members and other committees to know what it is that is at issue, that Senator BELLMON and I bring the resolution to the floor and then the Senate works its will on that resolution.

Surely, the Senator is not arguing that Members and committees ought to have a right to offer an amendment, but that we have no right to defend the budget resolution.

I think we have every right to defend it, to explain why the Budget Committee did what it did, to explain what the committee did not do and why it did not.

Is the Senator objecting to the Senate knowing what went on in the Budget Committee? I do not believe so.

So I think when he rereads what he has just said on the floor, he will agree with me that maybe, like so many of us on the floor, he misspoke a little bit.

Mr. DOMENICI. I really did not intend in any way, as the chairman well knows, to say anything other than words of great respect for the chairman. I think he should be here defending the resolution.

As he well knows, for 3 out of the 4 years I have been on the committee with him, I was here defending it with him. I have been to conference with him and defended it more times than not.

I think it is kind of, if the shoe fits that way, it fits the other way. I, in turn, in this particular year when I think we want to set an example, think it is well within my prerogative. I think everyone understands the issue now.

The PRESIDING OFFICER. Time on this amendment has expired.

Mr. MUSKIE. I would like to take 1 minute on the bill just to make this point to the Senator.

I say with all sincerity and without denigrating his contribution to this budget process, would the Senator not agree that if the objective of this amendment is sound, that the prospects for implementing that objective would be much stronger, would be much more effective, if his timing had been such that he could have given support to that objective in committee?

To try to add it ad hoc on the floor is his prerogative, of course, but if his timing had been the same as mine, this could now be in the budget resolution. We would not be fighting each other about something on which we are probably in fundamental agreement about.

But the timing did not work out that way. I think that is regrettable. But now other considerations have come into play and I have recited them. They may not seem serious to the Senator from New Mexico, and if they do not, I understand. I am not criticizing his own judgment and conscience.

But I just regret, and I do it sincerely, that we could not have this coincidence of objectives in the committee.

The PRESIDING OFFICER. The Senator's time has expired.

Mr. TALMADGE. Will the distinguished Senator yield me 1 minute on the bill?

Mr. MUSKIE. Yes. I yield 1 minute to the distinguished Senator from Georgia.

Mr. TALMADGE. I certainly vigorously oppose any amendment to reduce the Talmadge work incentive program.

The Labor Department has reported that for every dollar we spend on WIN program we save $1.30 the first year on welfare payments. Mr. President, that savings is cumulative, year after year after year.

WIN has been the only welfare reform program that we have had in my 21 years in the Senate. Last year under that program we took 282,000 people off public welfare, put them in private jobs and made taxpaying citizens out of them. They are proud of themselves, proud of their ability to work and to earn and to support their families.

This is one area where funding ought to be increased and not reduced. I, therefore, hope that the Senate will reject the amendment of my distinguished friend from New Mexico.

Mr. President, recently, the Honorable Glenn W. Nichols, director of the Idaho Department of Employment and president of the Interstate Conference of Employment Security Agencies, Inc., testified before the Subcommittee on Labor and Health, Education, and Welfare of the House Committee on Appropriations. Mr. Nichols' comments on the Talmadge WIN program are quite pertinent since Congress is presently reviewing all existing Federal welfare programs with an eye toward welfare reform and in light of efforts to reduce WIN funding.

As I have long maintained, the work incentive program (WIN) is the only real welfare reform we have had since I have been in Congress. I submit the following excerpts from Mr. Nichols' testimony for the RECORD.

EXCERPT

Mr. Chairman and members of the Committee, my name is Glenn W. Nichols. I am Director of the Idaho Department of Employment and President of the Interstate Conference of Employment Security Agencies, Inc. With me today is Mr. C. David Hilburn, Deputy Director of the Massachusetts Division of Employment Security and Chairman of the Administrative Financing Committee of our Conference. Also with me are Messrs William L. Heartwell, Jr. and Robert C. Goodwin, Executive Vice-President and Associate Vice-President of the Interstate Conference, representing our Washington, D.C. staff.

We thank you for this opportunity to present our views on the President's budget proposals for Fiscal Year 1979 as they relate

to the employment security program which we administer.

The State Employment Security Agencies which we represent are totally funded from federal dollars and administer three major programs—the Work Incentive Program or WIN, the Federal-State Employment Service, and the Nation's Unemployment Insurance Program.

We are here to persuade you to increase your investment in . . . sound programs that can demonstrate tangible savings. We are promoting a portfolio of . . . cost effective enterprises which will yield concrete return on investment.

WORK INCENTIVE PROGRAM

First, we would request that you consider an increased investment in the Work Incentive Program. The Department of Labor estimates that for every dollar you invest in WIN, you will reap a return of $1.30 in reduced welfare grants in the first year after placement. This does not include savings in food stamp and Medicaid reductions. In Fiscal Year 1977 the program cost of WIN was $365 million. Welfare savings resulting from that expenditure were $439 million. When we consider reductions of $115 million in food stamps and $102 million in Medicaid the savings is over $655 million—a balance of $290 million in savings over program expenditures.

The President has requested the same dollar amount for WIN in this year's budget as was expended in Fiscal Year 1978. The real effect of this "standstill" budget would be a decrease of 20 percent in WIN activity. Even at present levels of funding, only one-fourth of WIN applicants can be fully served.

Public Law 95-30 authorized an additional $435 million for WIN for Fiscal Year 1979 with no requirement for (10 percent) State match. This, together with the President's request, would raise total WIN funding to $800 million. A program of this magnitude would permit us to help significant numbers of welfare recipients prepare for and find employment. At that level, we estimate that over 500,000 recipients could be placed in productive employment. There would be 500,000 of those at the greatest disadvantage in the labor market—single women, minorities, welfare recipients, economically deprived—would move from the oppression of welfare to the dignity of productive employment.

Your investment in WIN yields a return not only in human dignity and pride but in cash savings to the taxpayers who support welfare programs.

At any rate, given the thrust toward welfare reform and the interest in demonstration projects, a proven program such as WIN should certainly not receive a decrease in funding. Rather than putting $200 million into welfare demonstrations, why not take at least half of that and invest in a substantial increase in WIN—a program which we know result in welfare savings.

In conclusion, let me remind you of my opening remarks. We are not here simply to ask you to spend more money on endless needs with no measurable tangible return. We are asking you to consider an investment in a . . . portfolio. Your investment in WIN will result in a tangible yield of savings of taxpayer dollars for AFDC, food stamps, and Medicaid.

The PRESIDING OFFICER. Under the previous order, this amendment will now be set aside until a vote occurs at 12:30 today. We will now proceed to further amendments on this bill.

Mr. DURKIN addressed the Chair.

The PRESIDING OFFICER. The Senator from New Hampshire.

Mr. DURKIN. I thank the Chair.

AMENDMENT NO. 1805

(Purpose: To increase new budget authority and outlays for energy by $200,000,000)

Mr. DURKIN. Mr. President, I call up amendment No. 1805 and ask that it be stated.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from New Hampshire (Mr. DURKIN) proposes an amendment numbered 1805.

Mr. DURKIN. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 3, line 5, strike out "$10,200,000,000" and insert "$10,400,000,000".

On page 3, line 6, strike out "$10,100,000,000" and insert "$10,300,000,000".

Mr. DURKIN. Mr. President, I have called up my amendment which increases the budget authority and outlays which the Budget Committee recommends for energy—function 270—by $200 million for fiscal year 1979. The need for this increase is as simple as it is unfortunate: Because it is becoming increasingly apparent that the administration is reneging on its commitment to develop solar and other renewable energy resources, it is up to Congress to assure that the budget resolution leaves sufficient room for higher authorizations in this critical area.

As an advocate of solar energy development, I was taken completely by surprise when the administration submitted its proposed fiscal year 1979 Department of Energy (DOE) budget. We had expected to accelerate the Nation's commitment to wind, small hydroelectric resources, passive solar, photovoltaics, and the many other renewable resources which we had been promised would be emphasized. Instead, I discovered that the solar budget actually had been cut from the inadequate levels of the previous administration. Once again, those of us who believe in solar energy found ourselves scrambling for crumbs while breeder reactor research was given a second lease on life.

In spite of this administration reversal, we are taking constructive action to assure that solar energy continues to receive a fair share of the DOE research, development, and demonstration funds. Through the solar coalition, my colleagues on both sides of the Capitol and myself are acting in committee to speed up DOE programs in passive solar energy, photovoltaics, biomass, wind, and small-scale hydroelectric development. With these increases, it is my hope that the optimistic solar predictions appearing with greater frequency in the reports of such agencies as the Council on Environmental Quality will be borne out.

These comments are not intended, of course, to cause any dispute with the distinguished members of the Budget Committee, who have had a most difficult task trying to piece together recommendations for a budget ceiling for the energy function when the energy bill has been stalled in conference and when the administration continually ignores its own promises to the American people about the development of alternative energy sources. The Budget Committee, in these times of too much Federal spending and a too large Federal deficit, must try to keep a lid on spending. But I know the members of the committee are also aware that some short-term apparent savings on something as crucial as research and development of solar energy will have long-term substantial costs as this country becomes more and more dependent on imported oil.

I think we all realize that we have a national energy crisis and a national energy problem, but I believe the administration has failed to realize, in its schizophrenic approach to resolving our energy problems, that many of these problems, while national in scope, are regional in solution.

The work of the Senate Energy and Natural Resources Committee already is being hindered by the insufficient energy budget which has its roots in the administration's solar program slash. The recommended Budget Committee ceiling of $10.2 billion already has caused the chairman of the Energy Research and Development Subcommittee to urge caution in increasing the authorization for vital solar programs. At a time when the Nation is supposed to be concentrating on alternate energy resource production as one of its highest priorities, this is incomprehensible. My amendment to increase the budget ceiling by $200 million is intended to provide the necessary flexibility to the Energy Committee so that we can recommend to the full Senate a balanced energy budget which reflects the appropriate emphasis on solar and other renewable energy resources.

Mr. President, at this time, I reserve the remainder of my time.

Mr. MUSKIE. Mr. President, the first point I should like to make, before getting into more extensive discussion, is that the Budget Committee does not build the budget resolution on a line item basis. If, for example, the Senator's amendment were to be adopted, there is no assurance that that $200 million would be devoted to solar energy research.

So the question is not whether or not in this budget resolution we can somehow focus more resources on solar energy by way of the budget resolution. The question is—whether or not the Senator's amendment is adopted—whether the authorizing committees can succeed in shifting the thrust of the effort being made in the executive branch.

Mr. DURKIN. Mr. President, will the Senator yield?

Mr. MUSKIE. I yield.

Mr. DURKIN. I realize that that is true. But our problem has been that in the Energy Research and Development Subcommittee we run up against the ceiling when we come to an alternative energy source. There seems to be money for something exotic—for a breeder and some of those projects—but we run into constraints when we bring up an alternative. I know there is no line item for particular energy projects.

Mr. MUSKIE. I will get into the question of the sufficiency of the re-

sources, but I wanted to make that point at the outset.

Second, I hope the Senator has focused on the fact that there is pending—we have just completed debate on it—the Domenici amendment, which would cut several functions, including the energy function. The proposed cut in the energy function is $200 million in budget authority and $200 million in outlays—the same number in the reverse direction of the distinguished Senator's amendment.

Senator DOMENICI is very much involved in energy legislation. As a matter of fact, yesterday, he engaged me in colloquy to get reassurance that the amounts the budget resolution assumed for energy were sufficient to allow a project, in which he is interested, to compete for funds.

It is a little frustrating on one day to be asked to give that assurance and on the next day to be asked by the same Senator to reduce the total resources available in the very function with which he is concerned.

So this business of competing for the resources is a very real one.

Now let me go to the gross amounts that are available here and put those in perspective.

Solar energy programs are classified, as the Senator knows, in function 270. It is a new function, incidentally, added to the budget this year. It is the first time energy has had a function by itself.

The committee's recommended targets in function 270 are $10.2 billion in budget authority and $10.1 billion in outlays. The Budget Committee considered these adequate, for the following reasons: They are $700 million in budget authority and $200 million in outlays above the President's budget.

Second, if we exclude the gas guzzler tax refund—which, I take it, will not be enacted in any case—they are $1.2 billion in budget authority and $700 million in outlays above the President's budget.

The aggregate amounts provided in function 270 are $2.2 billion in budget authority and $1 billion in outlays above current law. They are $1.8 billion in budget authority and $900 million in outlays above current policy. Current policy, defining it in shorthand, includes an allowance for inflation in addition to current law funding.

So what we have is about 21 percent real growth in budget authority in this function.

The targets are comprised of the following mission recommendations, and the Senator will be interested in this, I know. This year, for the first time, we have divided the functions into missions.

For example, in this function there are four missions—energy supply, energy conservation, emergency energy preparedness, and then an all other energy program mission. We break the function down by mission and establish amounts for each mission; not that they are in the resolution—they are not—so they are not binding, but they demonstrate to the Senate how we reached our recommendation for the functional total.

Mr. DURKIN. Mr. President, will the Senator yield?

Mr. MUSKIE. I yield.

Mr. DURKIN. The mission I am referring to at this time is the mission on energy supply, and that is earmarked at $3.9 billion. If I understand the Senator's statement correctly, that was merely a guideline for the Budget Committee, and that is not a subceiling within function 270.

Mr. MUSKIE. The Senator is correct.

Mr. DURKIN. The Energy Committee can exceed that, so long as the total $10.2 billion energy function is not exceeded.

Mr. MUSKIE. A mission subtotal is not a ceiling. Nevertheless, if any mission were increased by the appropriate committees, then another mission would have to be reduced in order to come under the total aggregate. So I think there is a discipline built into these mission numbers, even though they are not enforceable ceilings in the sense that the functional ceiling is.

Mr. DURKIN. If energy supply, say becomes $4.1 billion, one or the other missions has to be reduced by $200 million?

Mr. MUSKIE. That is right.

Mr. DURKIN. But that is left for the authorizing committee.

Mr. MUSKIE. That is right, to the authorizing committee, the appropriation committee, and ultimately to the Senate itself.

With respect to that mission, let me give the Senator some numbers. As to that mission, $3.9 billion in budget authortiy is $1 billion above the President's recommendation and $500 million above current law, and it is very close to the Energy Committee's recommendation of $4.1 billion.

In all, we have cut authorizing committees almost $37 billion. So that $200 million reduction in that one mission is a miniscule reduction compared to the cuts that we imposed on other committees.

Mr. DURKIN. If the Senator will yield for another question, maybe we can move this along. If my mathematics are correct, there is currently an approximate $700 million cushion between the energy staff projections and the figures of the Budget Committee.

Mr. MUSKIE. The Budget Committee staff tells me we do not know what the energy staff's figures are.

Will the Senator repeat what he said so I may be sure I understand?

Mr. DURKIN. It is my understanding that the energy staff recommendations are exceeded in the total 270 function by about $700 million.

Mr. MUSKIE. The Energy Committee's recommendation was $10.7 billion in budget authority for the whole function, and the Budget Committee's recommendation is $10.2 billion. That is one of the smaller reductions that we made in the committee recommendations.

Mr. DURKIN. I have been getting those figures from the most recent Energy Committee staff recommendations, not the March 15 submission. They may well have not been forwarded to the Budget Committee, because they have not been resolved.

Mr. MUSKIE. We have the full committee's recommendation in the March 15 report and that figure is $10.7 billion in budget authority for the whole function. Within the $10.7 billion of the Energy Committee's recommendations they allocated $4.1 billion to energy supply.

And we came within $200 million of that recommendation.

Mr. DURKIN. One further question, and then I think maybe we can resolve the problem. If I understand the figures correctly, there is approximately $4.3 billion in money to buy oil for the strategic oil reserve, which we all support if they will put some of those reserves in places that New England will be protected.

Mr. MUSKIE. That is the emergency energy preparedness mission, for which budget authority is $4.3 billion and outlays are $3.5 billion. Most of those sums go to the purchase of oil for the strategic petroleum reserves. Some go for facilities design and construction, but most of it is for purchase of oil.

Mr. DURKIN. And there is testimony in the Energy Committee in the letter from Assistant Secretary of Energy George McIsaac which says given physical conditions and time constraints, DOE will not be able to expend much more than $2.5 billion in fiscal 1979 for the oil reserve outlays.

My question is, because that provides an additional cushion for reallocation of these missing figures in the energy function, if the Energy Committee and if the full Senate——

Mr. MUSKIE. That is on the outlay side. If that mission for any reason does not require all the resources that we have assumed, the resources are available to the Energy Committee under the overall function for other purposes.

Mr. DURKIN. So, in other words, there is within the Budget Committee recommendations adequate funds to provide the additional money for solar energy that my amendment seeks, realizing the limitations of not having line-by-line items in the Budget Committee recommendations. Our job is not necessarily to increase the budget figure, but to convince the Energy Committee to allocate that money toward renewable resources——

Mr. MUSKIE. That is right.

Mr. DURKIN (continuing). Because the money is actually there and has not been restricted by the Budget Committee action.

Mr. MUSKIE. I want to be very careful not to say that the sums will fund any and all energy projects that any Senator can see. The targets are not that large. However, they are ample, and, within reason, I think that there is likely to be room for the energy technologies the Senator favors, in the mix the Energy Committee decides is the right mix for the national interest. The Senator is a member of the Energy Committee, and a very articulate spokesman, I might say, and a scrapper. There are resources available for the competition among energy technologies, within the targets for energy set in this resolution.

Mr. DURKIN. Mr. President, I appreciate the position of the chairman of the Budget Committee in trying to keep our Federal spending within reasonable bounds. It is my belief that during a national crisis as severe as the energy crunch it is appropriate to spend as much as we need to maintain our na-

tional security. I can think of nothing which is more likely to enhance our national security than increasing our reliance on solar and other renewable, nonpolluting energy resources.

My major concern, and the reason why I am offering this amendment, is that I want to see that solar energy and other renewable resources can be developed at the fastest possible rate. The total budget ceiling for the energy function—$10.2 billion—certainly should provide enough money to do this and much more. The difficulty is that the Senate Budget Committee report on the first budget resolution breaks down its discussion of the energy function into several mission discussions, each with a portion of the total $10.2 billion energy function ceiling, only $3.9 billion of which appears to be earmarked for energy supply development including solar energy. It may be unclear to some who read the report whether the $3.9 billion energy supply figure is a ceiling beyond which the Energy and Natural Resources Committee cannot go in authorizing energy technology development or whether it is simply a guideline which discusses how the Budget Committee arrived at the $10.2 billion total energy ceiling.

This question is of some importance, because it may influence the outcome of the Energy Committee consideration of the fiscal 1979 Department of Energy authorization bill. If the Energy Committee shares my enthusiasm for solar energy development, it may choose to accelerate significantly the proposed budget for solar and other renewable resource technologies at the expense of less immediate expenditures covered in the budget resolution report under other missions. But the Energy Committee might not have this choice if the budget resolution or the report have the effect of limiting the Energy Committee's authorizing discretion within bounds of the budget ceiling.

Therefore, since the chairman clarified the effect of the mission breakdown in the budget resolution report on the energy function by explaining that each mission was intended as a guideline to illustrate how the Budget Committee reached the total ceiling figure of $10.2 billion for this function—rather than being further subdivisions of how the ceiling is to be allocated by the Energy Committee — I am satisfied that there is enough budget authority available for an adequate solar energy program and will withdraw my amendment.

Mr. President, in light of that explanation, I withdraw amendment No. 1805.

The PRESIDING OFFICER. The Senator has that right.

The amendment is withdrawn.

Mr. MUSKIE. I reiterate my request for the Senator to join in opposing the previous amendment.

Mr. DURKIN. If nothing else, the Senator picked up my support on the other.

Mr. MUSKIE. Otherwise, we have $200 million less in this function.

Mr. DURKIN. That is not the direction that I intend to go.

AMENDMENT NO. 1806

(Purpose: To increase new budget authority and outlays for transportation by $100 million)

Mr. DURKIN. Mr. President, at this time I call up amendment No. 1806.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from New Hampshire (Mr. DURKIN) proposes amendment numbered 1806.

Mr. DURKIN. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 3, line 17, strike out "$19,500,000,000" and insert "$19,600,000,000".

On page 3, line 18, strike out "$17,500,000,000" and insert "$17,600,000,000".

Mr. DURKIN. Mr. President, it is essential for the Senate in considering this year's budget resolution to set its own priorities based on its assessment of the Nation's needs, rather than to acquiesce in the administration's judgments when they are questionable. The recommended budget ceiling for the transportation function—function 400—is just such an example. Today I am introducing an amendment to increase the transportation budget authority and outlay ceilings by $100 million to assure that there is enough flexibility for railroad rehabilitation of lines needed for energy transportation.

The coal conversion bill, still stuck in conference at the administration's behest, contains an important amendment which I sponsored to upgrade the Nation's railroads for transporting coal and other forms of energy. Senators MAGNUSON, JACKSON, BAYH, RANDOLPH, MCINTYRE, HASKELL, FORD, MATSUNAGA, HATHAWAY, ABOUREZK, WEICKER, PELL, and LEAHY all cosponsored it and passed the Senate by a rollcall vote of 60 to 21. Our amendment provides $100 million specifically for the purpose of rehabilitating rail lines through the existing railroad rehabilitation and improvement fund to help increase coal use in areas which could offset imported oil with domestic coal. In enacting this amendment by such a wide margin, the Senate agreed with us that our energy policy must take into account the substantial transportation problems which afflict regions like New England.

Nonetheless, the administration failed to include budget authority for this important purpose in its transportation budget recommendation for fiscal 1979. Faced with increasing inflation, the budget committee has wisely tried to hold the budget down as far as possible. Unfortunately, the failure to include the $100 million in my amendment may mean that this important program is delayed by at least a full year.

It is essential that the transportation budget be sufficient to permit the appropriations committees the flexibility to recommend funding for this important program if they deem it worthwhile. Increasing the transportation budget ceiling by $100 million will accomplish this goal. I urge my colleagues to support my effort to assure that our energy policies take account of the serious transportation problems which all regions will have to face if we are to break the iron grip of imported oil.

Mr. President, last year the Senate adopted an amendment of mine cosponsored by Senators MAGNUSON, RANDOLPH, JACKSON, and others. The energy policy seems to be that there is going to be a need for increased use of coal especially in those areas of the country that are most dependent on OPEC oil. The distinguished chairman of the Budget Committee and I come from that area which is the empty and expensive end of the energy pipeline. We are heavily dependent on OPEC oil.

We have heard Dr. Schlesinger make statements endorsing coal conversion. Yet the only way we are going to get coal to New England—in the event the President removes his hold on the coal conversion bill, the utility reform bill, and the conservation bill, which have languished in committee since mid-December—under today's conditions is to fly it in. The railbeds are inadequate to haul the amount of coal that would be needed to reduce our dependence upon OPEC oil.

Again, as further evidence of the schizophrenic approach to the national energy policy as articulated by Dr. Schlesinger, the administration in conference with the House opposed my amendment which provides $100 million in authorization to rebuild the railbeds to haul coal and changes the purpose clause in title V of the Railroad Revitalization and Regulatory Reform Act so that the existing funds could be used to rebuild the rails for hauling coal.

But the House, having better sense than the White House, went along with our amendment, and so it is engrafted to the coal conversion bill which is tied up in the energy conference.
